10 p1868 A70-24196

Elongated rotating configuration evolution by gravitational radiation and secular instability using homogeneous figures of Maclaurin and Jacobi

10 p1916 A70-24404

Rotating degenerate gravitating fluid cylinders equilibrium configuration

10 p1917 A70-25208

Linear viscous theory of steady rotating fluid flows with nonlinear modification of boundary layers, considering inertial modifications

11 p2036 A70-26011

Temperature profiles in upper symmetric regime of heated rotating water annulus convection obtained by thermocouple probe, noting flow field disturbance and correction

11 p2046 A70-26499

Liquids relative rotary motion in vertical rotating cylinders under large amplitude axial vibrations and angular velocities

12 p2209 A70-27213

Bounds in magnetofluidynamics for angular velocity of rotating fluid mass in relative equilibrium noting generalization of Poincare theorem

13 p2463 A70-29153

Convective flow stability in rotating fluid layer under rigid boundary conditions, calculating critical Taylor number as function of Prandtl number

16 p2893 A70-33686

Stratified-rotating fluids mathematical analogy, examining flow constraints, parameters and variables

17 p3068 A70-34664

Similarity equations for rotating flow near disk, using Navier-Stokes equations for case of complicated boundary conditions

18 p3239 A70-36223

Spatially periodic dynamos, analyzing homogeneous conducting fluid motions and magnetic field forms

18 p3291 A70-36407

General relativistic equations for stationary axially symmetric rotating perfect fluid in comoving coordinate system

18 p3292 A70-36900

Velocity profiles in steady and unsteady rotating flows for impulsive slow down and acceleration in cylindrical chamber

19 p3403 A70-37527

Boundary layer oscillatory flow interaction with nonuniformly rotating lamina, calculating velocity distribution and transitional frequencies

19 p3406 A70-38443

Weak stratification and geometry effect on steady mechanically driven motion of contained rotating viscous fluid

20 p3608 A70-39357

Gas core nuclear rocket engine light and heavy species centrifugal separation by MHD-driven rotating flow, discussing fluid dynamic simulation results

20 p3671 A70-40256

Unsteady compressible boundary layer formation on rotating disk, assuming uniform fluid rotation

22 p4009 A70-42616

Ducted propeller subsonic rotational flow with free boundaries, presenting second-order partial differential equation solution without linearizing assumptions

24 p4287 A70-45269

Sphere rotating in viscous fluid at rest, investigating surrounding flow field from creeping flow to turbulent boundary layer

24 p4326 A70-45989

Nonlinear effects of oscillatory disturbances produced by viscous excitations in rotating fluid inside of cylindrical tank

13 p2386 A70-28819

Helical vortex generation in rotating flow in straight tube having angular momentum flux sufficiently large relative to linear momentum flux

14 p2565 A70-30277

Figure of gravitating inhomogeneous rotating liquid, applying results to Jupiter and Saturn model construction

15 p2805 A70-32713

Viscous conducting liquid forced vortex motion, considering radial velocity distribution and rotation effect on free surface shape

24 p4383 A70-45140

ROTATING MATTER

Finite rotating universe model construction not possessing Goedel cosmos pathological properties, discussing relation to Mach principle

01 p0191 A70-11358

Oscillations and stability of rotating masses for axisymmetric equilibrium configurations with toroidal magnetic field based on virial equations

14 p2642 A70-30886

Surface temperature distribution over rotating nucleus of comet deficient in volatiles

18 p3319 A70-37058

Einstein field equations for spatially homogeneous spaces, considering rotating matter model in regularized Euler-Lagrange form

23 p4219 A70-44406

ROTATING MIRRORS

Broad bandwidth electronic analysis of high resolution photographic film using flying spot CRT or rotating mirror devices

02 p0302 A70-12613

Self mode locked pulses with rotating mirror Q switched carbon dioxide laser, attributing pulse shortness to saturation broadening of spectrum

07 p1301 A70-20018

Rotating parabolic mirror /antenna/ on multisupported suspension analyzed for static rigidity, determining elastic deformation under mirror weight

08 p1586 A70-21055

Rotating parabolic mirror /antenna/ cantilever suspension rigidity with emphasis on rigidity of central bushing

08 p1586 A70-21056

Control system for high speed photographic diagnostics based on rotating mirror action

09 p1679 A70-22993

Systematic errors in rotating mirror framing cameras and film records for quantitative high speed motion analysis

17 p3095 A70-35632

High speed camera rotating mirror dynamic surface deformations, discussing reflected waves, astigmatism, gas turbulence and pressure effects [SMPT PREPRINT 34]

22 p4033 A70-43043

Partial frame shutter for high speed rotating mirror camera, using explosively driven opaque dust cloud [SMPT PREPRINT 33]

22 p4033 A70-43044

Rotating mirror hologram camera for high speed phenomena, using Q switched ruby laser pulses [SMPT PREPRINT 7]

22 p4035 A70-43054

ROTATING PLASMAS

Transverse Kelvin-Helmholtz instability in rotating thermally ionized alkali metal plasmas /Q machines/, analyzing LF drift wave edge oscillation using dispersion equation

02 p0348 A70-12239

Rotary equilibrium of plasma ellipsoid in external HF fields in constant magnetic field, calculating revolution frequency and effective energy potential

03 p0530 A70-13085

Axial and rotational velocity profiles of plasma jet from Doppler shift of spectral lines [DFVLR-SONDDR-27]

04 p0729 A70-15612

Rotating plasma in nonuniform magnetic field analyzed for interchange instability based on MHD fluid and charged particle treatments

10 p1924 A70-24800

Solar thermal convection model, examining effects of rotation about vertical axis

13 p2496 A70-29839

Rotating plasma disturbances onset in MPD arc, determining magnetic field dependence on mass flow, background pressure and propellant [AIAA PAPER 69-232]

13 p2475 A70-29961

Ar arc discharge magnetically induced retrograde rotation dynamics, using high speed photography

19 p3475 A70-37533

Inhomogeneous plasma ellipsoid equilibrium in external HF field, assuming parabolic density distribution

19 p3479 A70-37739

Fully ionized magnetized rotating plasma interaction with neutral gas blanket, discussing plasma decay and velocity field

19 p3481 A70-38489

Rotating cold plasma wave propagation modes including Coriolis effect in absence and presence of external magnetic field

21 p3860 A70-41924

Low beta surface ionized rotating streaming plasma column, determining low magnetic field effects on density and stability

23 p4229 A70-44988

ROTATING SHAFTS

NT SHAFTS [MACHINE ELEMENTS]

NT TURBOSHAFTS

Externally pressurized air journal bearings load capacity, film stiffness, attitude-eccentricity locus and mass flow, studying supply pressure and shaft rotation effects

[ASME PAPER 69-LUB-29] 01 p0100 A70-10380

Static deformation of radially polarized inhomogeneous rotating cylindrical shaft of barium titanate using elasticity, electric field and constitutive equations for piezoelectric materials

01 p0118 A70-10549

Mathematical model for studying three dimensional whirling shaft stability as function of angular to critical velocity ratio, using Liapunov method for equations of motion

01 p0143 A70-10889

Step thrust self acting gas bearing without feed grooves for two directions of shaft rotation, determining geometric, gas and speed parameter characteristics

02 p0307 A70-12164

Photoelastic stress analysis of shouldered shafts with keyways in shanks under direct loading and torsion, including keyway and shoulder fillet stresses

02 p0388 A70-12496

Lateral vibrations of rigid rotating shaft in viscous fluid using inner and outer expansions method, considering small amplitude vibration and fast rotation

04 p0769 A70-14865

Shaft misalignment effect on accuracy of precision digital shaft angle encoders, using test fixture and optical methods

05 p0844 A70-15769

Rotation of circular cross sectioned continuous rod with constant bending moment, assuming linear strengthening with fixed cyclic strain diagram

06 p1163 A70-17396

Lip and face seal lubrication used on rotating shafts operating in compartments with fluids under pressure

07 p1293 A70-18955

Forced and free vibrations of shaft carrying unsymmetrical rotor, studying effects of distributed shaft mass and nonlinear shaft stiffness

07 p1401 A70-18976

Unstable vibrations in rotating flat shaft with unsymmetrical flexibility carrying unsymmetrical rotor in four degrees of freedom

07 p1402 A70-18978

Inductive sensor design and circuitry for measuring rapidly rotating shaft bending deflections at various vibration frequencies

07 p1279 A70-19115

Hydrostatic journal bearing calculation for case of shaft misalignment, deriving linear inhomogeneous equations with symmetrical matrix for pressure

07 p1293 A70-19119

Rotating rotor with mass distributed along shaft analyzed for nonlinear flexural and torsional vibrations, determining dynamic instability ranges

08 p1584 A70-20694

Rotating shaft vibrations on assembly designed to balance rotor in magnetic field, eliminating bearings effect on shaft to determine internal friction

01 p1584 A70-20697

Rigid rotating cylindrical shaft vibrations along diameter in viscous fluid using inner and outer expansions method [ASME PAPER 69-APM-S]

08 p1589 A70-21307

Self excited vibrations in balanced vertical shaft running on plain lubricated bearings, making numerical analysis of small perturbation transition to fully developed swirl

09 p1690 A70-22399

Elastic shaft with central unbalanced disk, deriving equation of motion for rotation in flexible bearings

10 p1958 A70-24520

Rotating shaft model with slight curvature for estimating maximum bending moment through Fourier series analysis

13 p2416 A70-28372

Dynamic instability of multirecess hydrostatic journal bearings at critical shaft rotation velocity

13 p2418 A70-28745

Temperature measurement of rotating shafts under cyclic loading, using thermistor as thermal radiation sensor

15 p2734 A70-31581

Disk forced vibration mounted on rotating shaft with ball bearings, assuming nonlinear elastic characteristic of system

16 p2996 A70-34293

Magnetostrictive measurements of torque from high speed rotating shafts

17 p3093 A70-35501

External and material damped three dimensional rotating elastic shaft-disk system, using energy technique and nonlinear model

19 p3542 A70-38062

Rotational stability of heavy horizontal shaft supported on plain lubricated bearings with cavitation in lubricant 19 p3438 A70-38669

Closed loop automatic speed control system for working shaft of two stage alternating current electric servomotor, using invariance principle 20 p3564 A70-39849

Rotating elastic shafts rectangular shape stability under creep conditions, considering single mass rotor 20 p3727 A70-39883

Rotating shaft system consisting of variable cross sections, disks and journal bearings, calculating unbalance vibration by numerical method 21 p3832 A70-40898

Three-lobe fluid film bearing configuration for gas turbine concentric rotating shafts/spool shafts/[ASME PAPER 70-LUBS-10] 22 p4045 A70-42450

Viscoelastic continuous shaft whirling motion, discussing boundary conditions and internal linear viscous damping 22 p4012 A70-42939

Elastoplastic bending of rotating circular shaft with constant end cross section force couple, assuming small deformations of linearly hardening materials 22 p4118 A70-43570

ROTATING SPHERES

Thin liquid film equilibrium on rotating sphere, determining conditions for detachment as function of angular velocity 01 p0068 A70-11578

Pulsar slowdown by radiation field torques indicated by alignment torque in magnetized oblique sphere rotating in vacuum 07 p1389 A70-20220

Moon rotational constants determination allowing for crater Moesting A coordinate errors 08 p1574 A70-21156

Viscous incompressible fluid secondary steady state flow due to rotating spheroid, considering acceleration terms in Stokes linear equation solution 11 p2034 A70-25390

Swirling and meridional flow induced by steady rotation of gravitating sphere in compressible monatomic gas, considering compressibility effects and surface layer [ASTME PAPER MR-69-714] 11 p1978 A70-26690

Convective heat transfer from rotating Al spheres in air at rest, investigating structure and boundary layer changes by schlieren method 14 p2665 A70-30398

Transparent spherical rotor spin axis orientation by measuring Fresnel drag effect of optical beam inside ring laser cavity 19 p3445 A70-37669

Viscous incompressible fluid flow between two rotating concentric spheres, calculating stability 21 p3811 A70-42217

Nonaxisymmetric convection of rotating spherical shell in Herring approximation, noting applicability to sun 22 p4104 A70-42994

Spherical celestial bodies anomalous rotation problem, noting sunspots zonal character 22 p4106 A70-43261

Gravitating sphere high speed rotation in monatomic gas, discussing viscous and thermal boundary layers, velocity fields, temperature effects and fluid motion 23 p4131 A70-43944

Rotating spherical shell equations as initial value problem, noting maximum convective heat transport at equator 23 p4249 A70-44805

Laminar boundary layer on uniformly rotating sphere studied by momentum integral method, imposing zero vorticity condition 23 p4184 A70-44981

Magnetized conducting sphere steady rotation in viscous conducting liquid, solving for fluid velocity and induced magnetic field 24 p4386 A70-45609

Two spherical particles rotation and slow motion about axis of circular cylinder in direction perpendicular to line of centers, considering fluid flow characteristics 24 p4325 A70-45781

Sphere rotating in viscous fluid at rest, investigating surrounding flow field from creeping flow to turbulent boundary layer 24 p4326 A70-45989

Conducting sphere MHD rotation in viscous conducting fluid under uniform magnetic field 24 p4387 A70-46028

ROTATING STALLS

Axial flow compressor blade rings interaction effect on angular speed of rotating stall zones 11 p1974 A70-25780

Critical load, force characteristics and pressure variation on blades of axial compressor under rotating stall 11 p2133 A70-25795

Axial-flow compressors stall characteristics measurement using water as working fluid 13 p2341 A70-29446

Rotating stall in axial compressors, using finite difference method 17 p3011 A70-35450

ROTATING VEHICLES

U ROTATING BODIES
U VEHICLES

ROTATION

NT AUTOROTATION
NT EARTH ROTATION
NT MOLECULAR ROTATION
NT PLANETARY ROTATION
NT SATELLITE ROTATION
NT SOLAR ROTATION
NT STELLAR ROTATION

Integral formulas of thermoelasticity theory for calculating displacements and rotations caused by temperature field action in micropolar Cosserat and Hooke media 02 p0391 A70-12817

Discharge tube rotation effects on ring laser polarization, Q factor and radiation frequency 03 p0501 A70-13744

Illusions of rotation perception with oscillating trapezoid and oscillation perception with rotating trapezoid, correlating magnitudes 05 p0807 A70-16673

Whirl effect on heat exchanger efficiency and reliability, discussing tests with transparent models and defective filling of circuits by feeding system [ONERA-TP-768] 10 p1968 A70-24400

Vestibular adaptation to heat and rotary stimulation in animals and men 11 p1986 A70-25822

Galaxies rotation, applying optical and radio data to statistical analysis of angular velocities and periods 13 p2492 A70-29386

Reflecting prism standards rotations effect on autocollimating images positions of optical instruments, investigating focusing method 16 p2915 A70-34214

Small angle of rotation measurement of coherent radiation polarization plane, discussing technique for increasing sensitivity and accuracy 20 p3643 A70-39759

Asymmetric micropolar thermoelasticity, deriving integral expressions for strains, rotations and temperatures in finite body 20 p3726 A70-39878

Galactic rotation model derived from radial velocities and spectrophotometric distances of H II regions 22 p4101 A70-42864

Atmospheric vorticity and dust devil rotation direction relationship, suggesting shear in horizontal flows associated with convective activity in unstable atmosphere 22 p4065 A70-42912

Energy rotation in electromagnetic wavefields, noting TE-MODE excitation in rectangular guides 23 p4164 A70-44384

ROTATIONAL FLOW

U FLUID FLOW
U VORTICES

ROTONS

Velocity distribution of atoms evaporating from superfluid He II at low temperatures, noting roton shifting and multiexcitation processes 06 p1108 A70-18639

ROTOR AERODYNAMICS

Helicopter engineering covering structure, rotor systems, aerodynamics, vibration and applicability to fixed wing aircraft 02 p0225 A70-12309

Air cooling with radial and jet blowing on gas turbine stage, discussing influence on aerodynamic characteristics 03 p0551 A70-13486

Helicopter tail rotors aerodynamic characteristics, using statistical methods for planning experiments and interpreting results 05 p0793 A70-15900

Laminar viscous flow on rotating propeller and helicopter rotor blades, studying crossflow and unsteady boundary layer effects, separation, transition, etc [AIAA PAPER 70-50] 06 p0974 A70-18161

Lifting line with arbitrary motion represented by line of acceleration doublets for unsteady aerodynamics of helicopter blades [ONERA-TP-787] 06 p0984 A70-18471

STOL touring aircraft propeller design and aerodynamics, discussing takeoff runs, landing runs, high lift, downwash, ground effects, etc 08 p1435 A70-20628

Static tank visualizations obtained in two dimensional flow and on rotors hovering or in transition in ONERA hydrodynamic tunnel [ONERA-TP-777] 08 p1434 A70-21846

Unsteady aerodynamic forces on helicopter rotors using pressure measurements and wind tunnel visualizations of smoke emission [ONERA-TP-777] 08 p1434 A70-21847

Dual flow turbojet engine rotor slip constraints during turning, investigating turbine blade strength, thrust deviation, fuel consumption and compressor stability 10 p1930 A70-24285

Helicopter rotor, discussing conventional, semirigid, gyro and ABC systems in relation to roll balance and control 13 p2344 A70-28849

Propeller in axial motion through homogeneous turbulence, studying forces and moments by statistical analysis [AIAA PAPER 70-549] 13 p2339 A70-29014

Soviet book on practical aerodynamics of Mi 6 helicopter covering engine/rotor power balance, control, flight characteristics and solutions to in-flight emergencies 14 p2532 A70-31414

Axial compressor aerodynamics investigation methods concerning compressor flow for efficiency improvement 16 p2836 A70-33757

Helicopter aerodynamic problems, discussing rotor performance improvement for increased cruising speed 16 p2841 A70-33758

Helicopter rotor blades flapwise bending moments prediction by transfer function/superposition techniques 17 p3013 A70-34704

Soviet book on vibration and balancing of aircraft engine rotors covering structural deformation and dynamics of turbine engines and compressors 19 p3489 A70-37237

German book on propeller theory covering airfoil theory, propeller flow and pressure fields, propeller vibrations, shrouded and tilted propellers, helicopter rotors, etc 23 p4180 A70-44097

NACA/NASA rotating wing aircraft research history 1915-1970, Part 3, covering rotor dynamics and flying qualities, hovering tests, rotor flow, loads, etc 23 p4142 A70-44856

ROTOR BLADES

Discrete noise generation and propagation due to fan engine rotor forcing excitation and interaction with downstream stator 05 p0896 A70-16791

Rotor blades structural fatigue strength tested on gas dynamic test stand under cyclic thermal loading and static tensile load 05 p0954 A70-17058

Rotor blade random vibrations in response to turbulence [AIAA PAPER 70-548] 13 p2339 A70-29013

CH-47C helicopter fiberglass main rotor blade, discussing composite materials impact on design 17 p3013 A70-34702

Helicopter rotor blade stall flutter response prediction based on NACA 0012 airfoil aerodynamic data 17 p3009 A70-34734

Shock wave radiation from supersonic ducted rotor, determining sound power at blade passing harmonic frequency 19 p3353 A70-38614

NACA/NASA rotating wing aircraft research history 1915-1970, Part 2, autogyro flight test experiences, rotor blade dynamics research, interest in helicopters, etc 23 p4142 A70-44852

ROTOR BLADES [TURBOMACHINERY]

Cascade tests to investigate nature of flow in rotor blade channels of axial flow turbines with partial admission 01 p0162 A70-10329

Fan rotors aerodynamic noise tonal annoyance reduction by blade unequal circumferential spacing, noting sound-pressure wave shape determination [ASME PAPER 69-WA/FE-23] 04 p0614 A70-14776

Packing rub effect on rotating machinery produced by unstable vibration generated by friction and heat of rubbing rotor in sliding contact 05 p0854 A70-15908

Wear resistance of turbine rotor blade stabilizing elements in form of bolts connecting overlapping leading and trailing edges of adjacent tips 09 p1768 A70-22095

Pressure and velocity distribution within radial flow gas turbine rotor computed by two dimensional streamline curvature method 09 p1608 A70-23737

Three dimensional incompressible turbulent boundary layer detachment on rotating blading of axial impellers 11 p1975 A70-25793

Incompressible inviscid fluid flow behind impeller blades, determining velocity profiles, flow-off angle and stable operation limits 11 p1977 A70-26349

Turboengine blade resonance vibration measurement by ELURA device, assuming one degree of freedom system 13 p2411 A70-29714

Logarithmic and Coles velocity profiles validity for turbulent boundary layers on radial rotating impeller blades 14 p2527 A70-30176

Rotor wakes and diffuser blades interactions visualization using hydraulic setup 14 p2528 A70-30297

German monograph on stress-strain state determination for rotors of turbomachines covering strain equations, partial differential equations, boundary conditions, etc 16 p2971 A70-34078

Gas turbine aero engines damage due to bird strikes, emphasizing rig testing and simulation at first stage rotor blading 18 p3236 A70-35995

Buzz-saw noise of transonic compressor due to rotating pressure field at supersonic blade tip speeds [ASME PAPER 70-GT-54] 18 p3303 A70-36838

Rotor wakes intrastator transport effects on high Mach number axial flow compressors performance, considering stagnation temperature profile and rotor blade loss factor [ASME PAPER 70-GT-39] 18 p3209 A70-36869

Discrete components formation in noise spectra of axial turbocompressor intake, considering relationship between blades and rotor disk 19 p3353 A70-38652

Air circulation around radial flow machine rotor blades calculated without velocity distribution factor 23 p4183 A70-44774

ROTOR DISKS

U TURBINE WHEELS

ROTOR HUBS

U HUBS

U ROTORS

ROTOR LIFT

Lifting line with arbitrary motion represented by line of acceleration doublets for unsteady aerodynamics of helicopter blades [ONERA-TP-787] 06 p0984 A70-18471

ROTOR SPEED

Optimal damping of flexibly mounted rotor by providing system with additional degrees of freedom and applying damping to additional masses 01 p0199 A70-10121

High speed rotor supported by air lubricated foil bearings subjected to periodic unidirectional excitation by vibrator, noting stability at high speeds [ASME PAPER 69-LUB-E] 01 p0099 A70-10376

Air lubricated foil bearing support design with external pressurization for high speed rotor in high temperature turbomachinery [ASME PAPER 69-LUB-D] 01 p0100 A70-10377

Photochronographic measurements of high speed rotor vibrations, showing precision and nutation components 01 p0093 A70-11268

Bursting speed and mode of high speed rotating disk with rim, boss and blades, noting influence of boss thickness 06 p1129 A70-17129

Thin gas turbine disk strength under axisymmetric flexural vibrations, noting agreement of calculated and experimental rotor rpm danger zone 06 p1166 A70-17654

Ring seal elements structural parameters influence on fluid leakage at various shaft speeds and fluid pressures 07 p1294 A70-19123

Machine-plotted pseudo three dimensional turbocharger rotor whirl display, discussing amplitude and frequency 08 p1496 A70-21300

Cavitation in centrifugal pumps, predicting breakdown and inception points variation with temperature and speed 15 p2744 A70-32097

High powered high speed helicopters autorotation entry characteristics, noting capability of meeting control time delay requirement 17 p3014 A70-34715

High speed photographic recording of bursting rotor in fragment control device 17 p3063 A70-35523

Time of acceleration to rated speed for three-phase asynchronous gyroengine rotor 19 p3420 A70-37259

Forced vibrations of rotor with variable rotating speed, investigating inertia terms effect 19 p3542 A70-38221

Critical rotation rates of gas turbine rotors disk-drum designs, describing initial parameters of model in matrix form 20 p3721 A70-39782

Gas lubricated three-foil bearing for high speed rotor support, considering dynamic and static behavior in zero gravity environment [ASME PAPER 70-LUBS-18] 22 p4044 A70-42443

NT TILTING ROTORS

NT TIP DRIVEN ROTORS

NT TURBINE WHEELS

Stability analysis of rotors consisting of disks on massless shaft mounted in unsymmetrical flexible bearings, considering free and forced vibrations with damping neglected 03 p0599 A70-14248

Axial misalignment control of gimbal pivots and rotors in gyroscopes 04 p0692 A70-15282

High speed helicopter with fixed wings and longitudinal axis tail rotor 05 p0794 A70-16349

Forced and free vibrations of shaft carrying unsymmetrical rotor, studying effects of distributed shaft mass and nonlinear shaft stiffness 07 p1401 A70-18976

Flexural vibrations of rotor resting on nonlinear elastic bearings under action of exciting forces harmonics using variational method based on Hamilton principle 07 p1403 A70-19112

Rotating rotor with mass distributed along shaft analyzed for nonlinear flexural and torsional vibrations, determining dynamic instability ranges 08 p1584 A70-20694

Central equilibrium position stability of gas bearing supported rotor allowing for inertia and lubricant compressibility 08 p1502 A70-20695

Stable equilibrium of rotor in pressurized gas bearing, considering perturbed rotor motion equation together with Reynolds equations for pressures in lubricant layer 09 p1690 A70-22544

Error analysis in calculating periodic limiting state of rotor motion 09 p1727 A70-22624

Two-disk flexible rotor balancing method based on shaft vibration and bearing forces analysis 10 p1896 A70-25093

Moments equations for electrostatic gyroscope drift caused by rotor asphericity 11 p2048 A70-25559

Balanced rotor with radial sliding bearing bushings, studying lubricant gas restoring force effect on stability with allowance for bushings translational movements 11 p2058 A70-25581

Vertical position stability of gyropendulum mounted on vibrating platform, showing foundation induced gimbal rotor parametric vibrations 12 p2233 A70-27563

Electromagnetic single-coil suspension for cryogenic gyroscope with superconducting sphere rotor, calculating suspension force characteristics 12 p2234 A70-27565

Satellite stationary motions stabilization using rotors with axes fixed inside spacecraft 13 p2499 A70-28389

Brushless DC motor consisting of permanent magnet rotor, wound stator and optical rotor position sensing 16 p2843 A70-33000

Mechanical stresses effect on Vicalloy rotor packets magnetic properties 19 p3357 A70-37265

Three dimensional flow through rotor of axial vortex flow fan, using airfoil method for design 19 p3352 A70-38248

Nonspinning symmetrical satellite in circular orbit, analyzing laterally oriented rotor effect on attitude stability 19 p3533 A70-38340

Tail rotor thrust increase for yaw control via increased blade area, higher tip speeds and cambered airfoils 23 p4140 A70-44324

ROUGHNESS

NT SEA ROUGHNESS

NT SURFACE ROUGHNESS

ROUND TRIP TRAJECTORIES

NT CIRCUMLUNAR TRAJECTORIES

Atrophic changes in tortoises during roundtrip to moon on Zond 5 ascribed to hunger and space flight factors 07 p1207 A70-19496

Atrophic changes in tortoises during roundtrip to moon on Zond 5 ascribed to hunger and space flight factors 15 p2685 A70-32741

Circumlunar trajectories with return to earth atmosphere, comparing various methods 18 p3312 A70-36165

Travel time for trips to Neptune, calculating earth gravitational field escape hyperbola and waiting time before return 23 p4245 A70-44653

ROUNDED LEADING EDGES

U LEADING EDGES

ROUTES

Long range air transport routes, predicting equipment and expenditures modifications 22 p4128 A70-43533

ROVER PROJECT

Transport ratio for I-131 air to milk concentrations, determining mean value and statistical variation from Project Rover data 19 p3361 A70-38012

RUBBER

NT CHLOROPRENE RESINS

NT ELASTOMERS

NT SYNTHETIC RUBBERS

Inertial damping of soft rubber under forced torsional vibrations, discussing viscoelastic body linear model 04 p0712 A70-15100

Atomic bond rupture rate in rubber subjected to uniaxial tensile strain in ozone environment monitored by electron paramagnetic resonance measurements 08 p1527 A70-21454

Conductive rubber pressure transducers for fluid flow measurement 14 p2584 A70-30503

Simulated Venusian atmosphere effects on polymeric plastic and rubber materials, comparing with high temperature air and nitrogen exposures 14 p2640 A70-30781

Colloidal filler /carbon black/ reinforced rubber for various applications, noting fabrication into composite material 15 p2764 A70-31930

Elastic and optical properties of polyurethane rubber under large deformation using natural stress concept derived from stress-strain linear relationship [SESA PAPER 1608] 15 p2821 A70-32319

Connectors for superjet airliners, discussing butyl rubber grommet, power distribution collector, modular terminal blocks and passenger service connector 16 p2878 A70-33956

Gaseous and liquid fluorine exposure effects on nitroso rubbers at ambient and cryogenic temperatures, using impact tests and IR spectroscopy 21 p3844 A70-42140

Carbon dioxide laser adapted for high speed drilling of fine holes in thin rubber sheeting 23 p4201 A70-44474

RUBBER COATINGS

Hotshot wind tunnel performance improvement by coating arc chamber with silastene to retard heat loss and metal pollution 17 p3057 A70-34774

RUBIDIUM

NT RUBIDIUM ISOTOPES

NT RUBIDIUM 86

Crossed molecular beam study of reactive asymmetry of oriented methyl iodide molecules reacting with Rb, accounting for observations with hard sphere model 07 p1225 A70-20051

RUBIDIUM COMPOUNDS

Solid state batteries based on highly conducting solid electrolyte rubidium silver iodide, testing discharge performance 22 p3966 A70-43543

RUBIDIUM ISOTOPES

NT RUBIDIUM 86

Coherent light scattering disturbance in level-crossing signals of Rb 85 and Rb 87 second excited state by noble gas atoms 02 p0311 A70-11851

Age and initial strontium for Guarena chondrite, determining differential evolution of Rb/Sr systems involving simple metamorphism of closed systems or multistage processes 03 p0576 A70-14088

Atomic clock reproducibility short and long term stability, weight and power consumption characteristics, noting Rb gas cell for collision avoidance systems 04 p0688 A70-14724

Frequency shift in Rb-87 atomic frequency standards dependence on filter temperature interpreted for optical pumping radiation improvement 05 p0859 A70-16269

Crossing level resonances of magnetometer in optically pumped Rb87 atoms applied to weak field measurement 13 p2454 A70-30035

Optically pumped Rb laser theory, taking into account superfine and Zeeman structure of atoms 15 p2749 A70-31521

Rb-Sr internal isochron ages from Ocean of Storms, discussing analytical results of two texturally and mineralogically distinct crystalline rocks from Apollo 12 16 p2975 A70-33659

Rubidium-85 maser, discussing continuous oscillation in low magnetic field 19 p3446 A70-37769

Middle Devonian Tioga Bentonite age from Rb, Sr and Sr isotopes in weathered whole rock samples 20 p6165 A70-38989

Apollo 11 lunar rock Rb-Sr isotopic age relationships, discussing magmatic fractionation of Rb relative to Sr in moon primordial material 21 p3908 A70-41585

- Magnetic field-independent optically pumped Rb 85 maser oscillator power output 22 p4049 A70-42334
- RUBIDIUM 86**
- Myocardial blood flow in patients with acute myocardial infarction determined from measuring effective capillary flow /ECF/ by direct counting of rubidium 86 uptake 04 p0636 A70-15468
- RUBY**
- Ruby green /U/ absorption band magnetic circular dichroism calculations in linear approximation, considering spin-orbital interaction constant and magnetic field strength 01 p0156 A70-10188
- Electron-phonon interaction model of temperature dependence of luminescence produced by multiphonon nonradiative transitions in Cr ions of ruby crystal, deriving transition probability 03 p0538 A70-13058
- Temperature dependence of luminescence quantum yields and lifetimes in transitions during excitation of ruby crystal atoms 03 p0538 A70-13059
- Magnetic field effects on ruby absorption in R-line region 08 p1555 A70-20543
- Ruby crystal surface destruction by laser radiation, studying surface structural and optical properties effect and threshold power dependence on light pulses duration 12 p2248 A70-27541
- Temperature influence on luminosity centers and line darkening in synthetic ruby powder with chromium concentration 15 p2782 A70-31558
- Doubly pumped ruby maser operating in conjunction with superconducting magnet 18 p3265 A70-35953
- Sapphire and ruby plastic deformation and fracture properties at room temperature, discussing sapphire base ceramics 18 p3278 A70-36046
- RUBY LASERS**
- Difference frequency generation by resonant three photon process during optical mixing in ruby laser medium with simultaneous emission of optical transitions 01 p0108 A70-10350
- Frequency control of ruby laser pumped lithium niobate singly resonant parametric oscillator by radiation injection of CW Nd-YAG laser 01 p0110 A70-10566
- Electrical supply and control of monopulse 6.25 Hz ruby laser for use in optical radar, high speed photography, etc 01 p0114 A70-11270
- Ruby laser Q switching by chlorophyll d and derivatives, discussing peak output power 01 p0114 A70-11391
- Banana self focusing in water of laser beams with nonmonotonic intensity distribution, noting ruby laser experiment 02 p0312 A70-12260
- Ruby laser light wavelength temperature dependence measurement using Fabry-Perot etalon 02 p0313 A70-12440
- Ruby laser emission wavelength temperature dependence measured spectrographically 02 p0313 A70-12441
- Book on ruby laser output power calculation as function of pumping efficiency, considering energy density distribution, absorption, induced emission and excited Cr ions 02 p0314 A70-12692
- Population inversion coefficient as function of optimal impurity concentrations and efficiency of ruby quantum paramagnetic amplifier in 3 cm range 03 p0499 A70-13457
- Transient processes in ruby quantum paramagnetic amplifier during pumping, showing technique for saturation prevention and relaxation effects on population inversion 03 p0456 A70-13460
- Ruby laser experiment in illuminating satellites equipped with retroreflectors to determine satellite position in space from range and photographic data 03 p0450 A70-13674
- Power losses in ruby laser with polarized spontaneous luminescence determined as function of laser parameters and light polarization 03 p0502 A70-13747
- Flash lamp illuminated ruby laser operating with ordinary or extraordinary polarization, measuring gain or absorption 03 p0502 A70-13954
- Pumping energy distribution over cross section of active ruby laser elements in relation to smoothly polished, roughly polished and dull lateral cylindrical surfaces 04 p0700 A70-14607
- Raman backscatter of frequency doubled ruby laser beam by water vapor in atmosphere observed by optical radar, calculating water vapor mixing ratio profile 04 p0677 A70-14950

- Ruby laser giant pulses time stretching and shaping using stimulated Raman scattering in liquid nitrogen cell inserted in laser resonator 05 p0857 A70-16076
- Double giant pulse ruby laser with 1.5 m coherence length for producing double exposure holograms of stress wave propagation in solids 05 p0861 A70-16850
- Breakdown of cryptocyanine dye in methanol solution by ruby laser pulses providing passive Q switching mechanism 06 p1083 A70-18524
- Ohmic contacts to n- and p-type semiconductors obtained by ruby laser, noting linear current-voltage characteristics 07 p1299 A70-19797
- Emission kinetics variations of ruby laser due to aging attributed to inhomogeneity of active medium developing simultaneously with color centers 07 p1300 A70-19872
- End reflectors effects on ruby lasers emission spectra and kinetics 07 p1300 A70-19873
- Two photon photoconductivity of CdS crystals stimulated by ruby laser, showing emission self focusing during pumping 07 p1302 A70-20322
- Coherence improvement of ruby laser emission in free mode using corrective holograms in resonator 07 p1303 A70-20323
- Ruby laser energy threshold dependence on partial shielding of rod by stainless steel tubing 09 p1694 A70-22136
- Diffraction shaped ruby laser monopulse during excitation of modulated ultrasonic traveling waves in phototropic Q switch 09 p1696 A70-22483
- Ruby lasers simultaneous Q switching by single rotating prism, discussing possible differential frequency ranges 09 p1697 A70-22989
- Transient stimulated rotational and vibrational Raman scattering in gases using mode locked ruby laser 09 p1700 A70-23568
- Motion picture holography using continuously pumped ruby laser illumination system in repetitive Q switched mode 09 p1689 A70-23782
- Ruby monopulse laser emission spectrum wavelength stabilization by frequency tuning of generated radiation using Fabry-Perot interferometer 10 p1898 A70-23970
- Ruby monopulse laser with narrow emission line, describing two generator system 10 p1899 A70-24264
- Divergence measurement of beam emitted by ruby laser in relaxation mode as function of cavity length and excitation voltage 11 p2063 A70-26462
- Ultrasonic effects on synchronization of ruby laser radiation, investigating emission pulse structure and peak sequence 12 p2245 A70-27297
- Ruby laser with electro-optical Q switching, using polarization element for emission spectrum narrowing to single longitudinal mode 12 p2245 A70-27303
- Single mode TW ruby laser with ring resonator, analyzing emission spectral characteristics by Fabry-Perot etalon 12 p2246 A70-27356
- Ruby laser beam used to trigger high voltage spark discharge in vacuum, studying auxiliary photoionization during firing delay or failure 12 p2249 A70-27999
- Triple passage crystal amplifier of single frequency ruby laser emission, noting radiation structure and coherence 12 p2250 A70-28183
- Ruby and He-Ne laser radiation attenuation found due to scattering by gas molecules and aerosols from atmospheric spectral transparency fine structure studies 12 p2191 A70-28294
- Resonant absorption in ruby crystal under combined acoustic and laser pulses, noting use for laser intensity measurements 12 p2251 A70-28331
- Ruby laser output calculated as function of pumping power, taking into account pumping energy density spatial distribution and laser level depopulation 13 p2427 A70-28985
- Ruby laser radiation frequency control by birefringent calcite plate and KDP electro-optical Q switch 13 p2428 A70-29363
- Interference holograms of low temperature nitrogen plasma jet using fundamental and second harmonic ruby laser emissions 13 p2464 A70-29384
- Ruby laser Q switching by chlorophyll thin film, discussing characteristics and mechanics 13 p2429 A70-29670

- Strong short coherent light pulses with diffractive divergence generated by ruby lasers in series, showing pulse, emission and far field interferograms 13 p2430 A70-29762
- Small angle light scattering indicatrices in ruby crystals approximated by Gauss type function 13 p2431 A70-29869
- Radiation coherent enhancement of single frequency emission fields in Q modulated coupled ruby lasers 14 p2593 A70-30152
- Giant pulse generation in ruby laser requiring no introduction of additional modulating elements into resonator 15 p2749 A70-31524
- CW nonspiking single mode ruby laser operation by end pumping ruby with CW argon ion laser output 15 p2751 A70-31981
- Mode controlled Q switched tuneable ruby laser, obtaining frequency scanning by temperature and pressure control 15 p2752 A70-32048
- Mirror damage problem with mode locked ruby laser system solved by rough stack mirror fabricated from microscope coverslips 15 p2753 A70-32546
- Ruby laser spatial and temporal characteristics improvement with bleachable dye filter, using local negative feedback 15 p2754 A70-32865
- Monopulse ruby laser with phototropic Q switch based on radiation density increase due to beam distribution 15 p2754 A70-32867
- Power density fluctuations in emission peaks of ruby laser determined by splitting beam into two components and using photosensitive element and photomultiplier recording 15 p2754 A70-32874
- Peak emission currents from tungsten under ruby laser focused radiation, describing integral emission by heat conduction theory and Richardson equation 15 p2754 A70-32875
- Free generation regime of ruby laser studied by electro-optical method of smoothing spatial inversion inhomogeneities 16 p2927 A70-33192
- Ruby laser second harmonic radiation generation efficiency, using cylindrical lens beam forming optical system 16 p2929 A70-34212
- Giant pulse periodic operation ruby laser with 50 MW power and 10 Hz frequency 16 p2929 A70-34217
- High speed pulsed ruby laser holography, discussing transmission-reflection holocameras and applications 17 p3085 A70-35007
- Four dimensional recording using synchronous multiple pulse ruby laser holography 17 p3088 A70-35027
- Optical and electronic components design for ruby lasers generating giant pulses 17 p3107 A70-35121
- German monograph on spectral emission behavior of pulsed ruby laser with regard to output intensity 17 p3107 A70-35369
- Spectral and temporal characteristics of ruby laser operating with dielectric coated mirror scatterer 17 p3108 A70-35673
- Spontaneous megawatt pulsing in ruby laser with output beam reflected back into cavity 17 p3108 A70-35909
- Nonequidistant structure of axial mode spectrum of ruby laser with plane dielectric mirrors 18 p3266 A70-36418
- Regular relaxation oscillations of ruby laser by moving resonator mirrors 18 p3271 A70-36954
- Holographic interferometry of rapid phase objects by two wavelengths from ruby laser and KDP crystal filter, noting application to dense plasmas 19 p3422 A70-37650
- Pulsed ruby laser holography with coherent light, discussing applications 19 p3425 A70-37886
- Strong short coherent light pulses with diffractive divergence generated by ruby lasers in series, showing pulse, emission and far field interferograms 19 p3447 A70-38394
- Single frequency ruby laser with electro-optical Q switching, selecting transverse and longitudinal modes by stepwise voltage application to shutter 19 p3448 A70-38737
- Ruby laser radiation injury relationship to position and number of energy absorbing pigment particles in iris 20 p3579 A70-39425
- Double holography on phase objects in diffused light using pulsed ruby laser 20 p3630 A70-39499
- Pulsed ruby free emission mode laser spectrum narrowing, using diffraction lattice adjusted in resonator transversely to beam axis 20 p3643 A70-39757

- Microwelding by pulsed ruby laser radiation, discussing characteristics and advantages 20 p3638 A70-40149
- Normal mode pulsed ruby laser system with Xe flash lamp pumping, trigger circuit and transistorized power supply 20 p3643 A70-40355
- Ruby giant pulse laser produced plasmas from aluminum and copper surfaces, measuring electron and ion energies by time of flight and retarding potential techniques 21 p3860 A70-41925
- Radiation coherent enhancement of single frequency emission fields in Q modulated coupled ruby lasers 21 p3839 A70-42076
- Breakdown mechanism in Q switched ruby laser triggered spark gap, noting pulse duration and power peak 22 p4049 A70-42352
- Ruby laser mode excitation, spatial coherence and free emission kinetics investigated by high speed camera scanning 22 p4051 A70-43461
- Optical transmission and reflection gratings formed by standing light waves evaporation of thin metallic films in ruby laser cavity 23 p4200 A70-43817
- Al-27 NMR saturation effects on ruby electron cross relaxation and inversion 23 p4230 A70-43932
- Ruby laser in repetitive pulse operation, determining temperature, heat generation and transfer coefficient from spectrum shift measurement 23 p4203 A70-45071
- Pulsed ruby laser radiation energy characteristics relation to crystal temperature distribution, thermal deformation and compensating lens focal length 24 p4352 A70-45460
- Photo copying in diapositive form, using ruby laser light on IR film 24 p4352 A70-45559
- Ruby laser second harmonics generation in low loss lithium iodate crystal with high conversion efficiency 24 p4355 A70-46085
- Spectral anomalies due to inhomogeneous optical pumping in masked ruby laser, using mathematical model 24 p4355 A70-46264
- Ruby laser application to air humidity measurement via hygrometric method 24 p4356 A70-46401
- RUDDERS**
- NT AERIAL RUDDERS**
- Natural frequencies and modes of tapered swept back rudder fin of aircraft using vibration analysis 07 p1417 A70-20417
- Flutter suppression in elastic finned beams in supersonic flow controlled automatically by rudder deflection according to flexural strain 09 p1785 A70-23615
- F-4 Be rudders design and tests compared to Al structure [ASM PAPER W70-12.4] 15 p2676 A70-32336

- U ENGINE TESTS**
- RUNWAY CONDITIONS**
- Runway visibility measuring techniques, discussing RVR measurement limitations 02 p0336 A70-12226
- Lift-dump system for Hawker Siddeley DH 125, combining aerodynamic drag increase with lift reduction to improve deceleration 02 p0225 A70-12266
- Airport fog attenuation systems design and operation consisting of power and communication cables linking diffusers to central control and command 05 p0830 A70-17092
- Accelerate-stop distance problem in takeoff refusal due to critical engine failure, emphasizing runway limited length hazards 08 p1436 A70-21270
- Airport runway and slant visual ranges determination using single scanning lidar/laser radar/ 09 p1696 A70-22490
- Video role in air transport safety, describing runway visual range (RVR)/ measurement using TV camera and spaced lights 10 p1889 A70-24507
- Slush and water hazards on runways, discussing investigation and amelioration methods 11 p2030 A70-25356
- Airport runway slipperiness rating, predicting and alleviating to reduce aircraft accidents [SAE PAPER 700265] 12 p2206 A70-27434
- Collision and missed approach risks in high capacity airport landing operations, discussing parallel runways spacing and aircraft longitudinal separation 12 p2207 A70-27629
- Wing tip trailing vortices hazard reduction on closely spaced parallel runways by suction application, discussing power requirements 12 p2207 A70-27631
- Jet transport wakes resulting from high engine thrusts considered hazardous to following aircraft, discussing multiple-instrumented runways for measuring visibility 12 p2162 A70-27995
- Wet runway operations in air traffic control, discussing viscous, reverted rubber and dynamic hydroplaning 13 p2348 A70-29779
- Aircraft tires tread design for improved adhesion under wet runway conditions 14 p2532 A70-31336
- UHF radio telemetry for transmissometers measuring airport runway visibility 16 p2889 A70-34222
- Runway visual range assessment using automatic transmissometer-reflector measurements 17 p3132 A70-34641
- Aircraft landing and takeoff difficulties and dangers due to mud and water on runways, discussing coping methods 17 p3057 A70-34692
- Fog dissipation on aircraft runways, using aircraft jet engine exhaust heat and mixing properties 17 p3133 A70-35929
- Airport bird detection equipment (ABDE)/ radar to display airfield map for presence and magnitude of bird groups and vegetation on runway 18 p3226 A70-35998
- Runway low visibility and ceilings frequency and duration at German airports, using 1949-1967 statistical data 19 p3462 A70-37925
- RUNWAY LIGHTS**
- Liverpool airport lighting emphasizing beacons, approach, runway and taxiway high intensity lighting installations 10 p1857 A70-24000
- Video role in air transport safety, describing runway visual range (RVR)/ measurement using TV camera and spaced lights 10 p1889 A70-24507
- RUNWAYS**
- Flexible pavements for commercial jet planes representative of current and future aircraft 03 p0462 A70-13173
- Structural reinforcement for existing airport pavements, discussing construction procedures 03 p0462 A70-13174
- Rigid and flexible pavements response to jumbo jets load using elastic theory 03 p0462 A70-13175
- Runway acceptance rate improvements to alleviate air traffic congestion metropolises areas, using approach and landing sequence model for conventional jet aircraft [AIAA PAPER 70-74] 06 p1029 A70-18078
- Control system, operational procedures, aircraft guidance and runway design for increasing runway capacity, noting roles of automation and reduced separation [SAE PAPER 700280] 12 p2206 A70-27440
- Urban airport runway capacity increase via reduced aircraft separation, additional parallels and improved terminal traffic control, discussing design for acceptable safety levels 12 p2207 A70-27627
- Airport capacity increase via electronic aids enhancing guidance, flight control, reduced aircraft separation, ATC automation and runway configurations 12 p2208 A70-27914
- Longer runways for increased airport safety indicated from data concerning overruns, undershoots and veering, discussing certification testing during takeoff and landing 12 p2208 A70-27994
- Airport runway to fog radiative heat transfer analysis by Monte Carlo method 12 p2333 A70-28115
- Commercial aircraft launching and arresting systems for airport runway length reduction, discussing safety factors [SAE PAPER 700264] 18 p3237 A70-36821
- ATC systems safety, capacity and delay, discussing terminal operations, runway capacity and aircraft spacing 19 p3465 A70-38228
- Maximum throughput-rate capacity for runway and final approach path airspace involving multiple IFR landings 19 p3465 A70-38235
- Airport capacity analysis for terminal areas, using simulation for alternatives to parallel runway operation 19 p3397 A70-38236
- ATC airborne surveillance, communication and control system functioning as CAS after error or failure, discussing minimum parallel runway separation 19 p3466 A70-38241
- RUPTURING**
- Bearing strength and rupture of reinforced plastic composites under intense one-sided electric heating and hydrostatic pressure due to pyrolysis of plastic bond 03 p0515 A70-13244
- Life fraction hypothesis equation in creep testing derived on basis of chemical reaction rate theory [ASME PAPER 69-MET-A] 04 p0705 A70-14875
- Time-to-rupture dependence on temperature and stress related to chemical reaction rate equation in creep testing [ASME PAPER 69-MET-B] 04 p0770 A70-14877
- Carbide rupture energy in wear resistant alloys during abrasion, considering metallographic data and energy parameters 04 p0707 A70-15212
- Polycrystalline metals strength factors in aircraft and aerospace construction as relation between rupture time and embrittled grain boundary at high temperatures 04 p0779 A70-15671
- Creep rupture effect on fatigue damage of structural material, constructing nondimensional stress range diagrams 05 p0943 A70-16806
- Traumatic rupture of aortic arch and descending thoracic aorta resulting from abrupt linear body deceleration 07 p1206 A70-19295

Rupture safety in fiberglass reinforced plastics using variation coefficient illustrated in vessel design
07 p1410 A70-19760

Dimensionless strength parameter in determining bursting pressure of ductile metal diaphragms in square section shock tubes
08 p1481 A70-21034

Atomic bond rupture rate in rubber subjected to uniaxial tensile strain in ozone environment monitored by electron paramagnetic resonance measurements
08 p1527 A70-21454

Ni-Fe base superalloy notch and rupture properties as function of thermal and chemical changes, using electron microscopy
13 p2437 A70-29829

Al-Zn-Mg alloys aging kinetics and rupture mechanism, discussing stress corrosion, welded structures stability, activation energy, etc
14 p2597 A70-30965

Al alloy welded joints delayed rupture tendency, describing constant load test method
14 p2591 A70-30969

Al-Zn-Mg alloy welds delayed rupture under constant uniaxial load in distilled water or aqueous salt solution
14 p2591 A70-30970

Al-Zn-Mg high strength weldable alloys rupture characteristics, analyzing crack distribution, stress raisers and weld defects
14 p2591 A70-30971

Delayed rupture and relaxation in Ti alloys during cyclic deformation, comparing fatigue tests results for continuous and discontinuous cyclic loadings
16 p2931 A70-33209

High speed photographic recording of bursting rotor in fragment control device
17 p3063 A70-35523

Bearing strength and rupture of reinforced plastic composites under intense one-sided electric heating and hydrostatic pressure due to pyrolysis of plastic bond
19 p3455 A70-38462

Plastic bodies rupture and crack growth under creep, considering tension of bar with symmetrical angular notches
20 p3727 A70-39882

Deformable bodies rupture condition formulation by melting analogy, comparing results to experimental data
20 p3733 A70-40394

Longitudinal shear crack propagation in random internal stress field, examining quasi-brittle rupture theory and cyclic loading
20 p3733 A70-40396

Polymethyl methacrylate rupture during omnidirectional compression under laser radiation, showing pressure effect on microdefects and cracks
21 p3841 A70-40644

Slip, fracture and rupture in sintered and cast ductile and brittle polycrystalline Mo under tension, using optical and electron microscopy
23 p4204 A70-43884

RUTHENIUM

Carbon monoxide adsorption on ruthenium and ruthenium HCP metals emphasizing surface migration, work function increments and desorption
12 p2181 A70-27676

Clean Ru/0001/ and Rh/111/ surface properties by LEED and Auger electron spectroscopy, discussing gas adsorption
19 p3483 A70-37546

RUTHENIUM ALLOYS

Nb-Ru equiatomic alloys reversible phase transformations, using electrical resistivity, hot stage optical metallography, X ray diffraction and magnetic susceptibility measurements
23 p4208 A70-44858

Rare earth metals-ruthenium Laves phases solid solutions superconducting transition temperature measurement
23 p4231 A70-44885

RUTILE

Maser amplifier with nonoriented Fe-doped rutile powder as active material, observing broad absorption bands under magnetic field
12 p2249 A70-27649

U MILITARY AIRCRAFT

RYDBERG SERIES

Atomic Ar absorption spectrum in vacuum UV region, observing Rydberg series interactions as perturbations and autoionizations
21 p3781 A70-41933

S

S BAND

U SUPERHIGH FREQUENCIES

U ULTRAHIGH FREQUENCIES

A-1548

S GLASS

S glass fibers strength characteristics at quasi-static strain rates, considering temperature effects on elastic modulus
13 p2439 A70-29707

S MATRIX THEORY

Unconditional stability criterion of active two port in scattering and admittance matrix notation equivalent to conjugate matching for maximum power gain with part impedances
02 p0271 A70-12820

Reduced multipoint equivalent scattering parameters derivation by matrix method, determining load reflection coefficients effect on signal attenuation and phase shift
03 p0458 A70-14038

Intrinsic noise of passive waveguide multipoint with losses, obtaining mean values and wave correlation functions using scattering matrix
04 p0655 A70-14402

Equivalence class technique to compute measure of similitude between two vehicles based on radar signature in terms of scattering matrix elements
04 p0648 A70-14656

Bounded operator functionals used for deriving nonlocal interaction Hamiltonian of quantum electrodynamics corresponding to converging series for scattering matrix in perturbation theory
05 p0883 A70-16876

Bounded nonlocal operator used in deriving series of subtracting Hamiltonians representing S matrix in perturbation theory after transition to local limit
05 p0883 A70-16877

Scattering matrix noniterative integral solutions applied to singlet and triplet s-wave Hartree-Fock phase shifts for electron-H-atom scattering
06 p1108 A70-17486

Noniterative integral solutions of scattering equations extended to coupled channels using matrix notation
06 p1108 A70-17487

Optical activity theory based on Kirkwood independent group model using scattering matrix
07 p1334 A70-19264

Probability of three photon band-band excitation of electron in semiconductors using S-matrix formalism, calculating absorption coefficient for two band approximation
07 p1356 A70-19795

Multimode rectangular waveguide lateral surface opening, determining scattering matrix coefficients governing mode conversion characteristics
08 p1462 A70-21224

Numerical calculation of S matrices for Stark broadening of Lyman-alpha line based on straight line classical path model
09 p1730 A70-22228

Scattering matrix for resonance lines with arbitrary level splitting in magnetic field
09 p1753 A70-22452

Computerized design of microwave circuits with S matrix
11 p2019 A70-26714

Wave scattering by statistical distributions of discrete obstacles, deriving various functions for diagnostic applications
11 p2086 A70-26762

Microwave parametric amplifiers with nonideal circulators, deriving gain via scattering matrix theory and signal flow graphs
16 p2874 A70-33389

Maxwell field quantization theory for case of interaction with Dirac field, calculating S matrix for interacting electrons
19 p3473 A70-37413

Waveguide transformer using rectangular waveguide permitting Galerkin method, determining scattering matrix
19 p3385 A70-37429

Two dimensional electromagnetic fields in presence of cylindrical objects of arbitrary physical properties and cross sections, using scattering matrix approximation
19 p3471 A70-37778

Diatom molecules inelastic collision cross sections for specific rotational transitions, discussing S matrix energy requirements for statistical analysis
19 p3474 A70-38268

Polarization of radiation reflected and transmitted by earth atmosphere, calculating scattering matrix for aerosol size distribution model
21 p3820 A70-41725

Scattering matrix for external coupling effects in dielectric covered phased array
23 p4160 A70-43766

Strong coupled rotational excitation problem in atom-diatom molecule scattering system, discussing transition probability matrices statistical analysis
23 p4212 A70-44600

S WAVES

Shear velocity variation with depth in upper mantle for Basin and Range province of western North America, using S waves measurements
02 p0292 A70-12505

Shear wave interaction in infinite homogeneous reacting fluid, using Fourier and Taylor series for velocity, temperature, density, pressure and composition
06 p1040 A70-18154

Electron scattering from diatomic molecular systems including coupling of partial waves in fixed-nuclei approximation
06 p1114 A70-18633

Shear wave and plate velocity expressions derived for orthotropic elastic plate with shear coupling, considering propagation direction
07 p1412 A70-19961

Dynamic response of joined elastic quarter spaces of solids to time varying free surface shear tractions parallel to plane of juncture
08 p1591 A70-21467

Alfvén shear waves collisionless damping from finite Larmor radius coupling to ion acoustic mode, observing longitudinal electric field existence
10 p1921 A70-23966

First order scattering formulae for s- and p-light reflected and transmitted by rough plane surface using perturbation theory
11 p2086 A70-26840

Upper critical field dependence on s- and p-wave scattering of Frenkel effects in electron irradiated niobium
13 p2471 A70-29535

CDs high field domain modes generation for C parallel to E described by interaction between drift carriers and off-axis shear wave
15 p2784 A70-31984

S and SKS travel times for arc distances of 30-126 degrees
16 p2898 A70-33975

Brittle elastic material with wedge shaped void, calculating shear stresses during crack propagation generated by horizontally polarized shear wave
21 p3932 A70-40547

Phase velocity and attenuation of shear waves in gases from sampled-CW ultrasonic crystal resonator reflection measurement
21 p3827 A70-41457

Apollo 11 lunar sample elastic wave velocities at high pressures, examining P and S waves, Q value and geophysical implications
21 p3916 A70-41666

CAT origin in unstable atmospheric shear and gravity waves, using ultrahigh resolution radar for observation of transition process
23 p4214 A70-44032

S-N DIAGRAMS

S/N fatigue life gage for nondestructive evaluation of cumulative damage, discussing calibration and two step, block and random tests
01 p0053 A70-10009

Turbine blades durability and fatigue characteristics, plotting fatigue diagram from statistical tests
01 p0105 A70-11418

Overstress cycles sensitivity for welded specimens on basis of French fatigue damage line and Wohler S-N line
05 p0941 A70-16520

Heat resistant steel and nickel alloys stress rupture strength at operating temperatures, discussing endurance diagrams under cyclic bending loads
05 p0868 A70-17047

Cylindrical Al, high strength pig iron and heat resistant steels elastoplastic deformation diagrams for cyclic compression tension loads
06 p1084 A70-17387

Fatigue resistance of high yield strength steel weldments under uniaxial loading, describing cyclic behavior by S-N curve
18 p3278 A70-37114

S-6 SATELLITE

U EXPLORER 17 SATELLITE

S-16 SATELLITE

U OSO-1

S-17 SATELLITE

U OSO-B

S-49 SATELLITE

U OGO-A

S-64 HELICOPTER

U CH-54 HELICOPTER

SA-330 HELICOPTER

SA.330 Puma tactical support helicopter design and performance
14 p2530 A70-30286

SAAB AIRCRAFT

NT SAAB 37 AIRCRAFT

SAAB 37 AIRCRAFT

Canard and variable geometry aircraft designs noting SAAB 37 Viggen performance
10 p1805 A70-24764

Flight simulation in SAAB AJ37 aircraft development, describing analog and digital computers, cockpit simulators, automatic pilots, control and display devices
23 p4178 A70-44140

[ICAS PAPER 70-42]

Viggen aircraft testing for flight properties, discussing measuring instruments, analog and digital recording, preprogrammed control, etc 24 p4317 A70-46228

Sapuc-Salut system for evaluating test data measured onboard Viggen aircraft 24 p4339 A70-46229

SACCHARIDES
U CARBOHYDRATES
SACCHAROMYCES
3-O-methyl-mannose neutral sugar indentification as constituent of fungal polysaccharide 20 p3572 A70-39625

Homogeneous magnetic fields effects on growth rate of *Saccharomyces cerevisiae* and *Micrococcus denitrificans* 24 p4306 A70-45102

SADDLE POINTS (GAME THEORY)
Steady burning process equations numerical solution for boundary conditions prescribed at saddle point singularity 01 p0218 A70-11019

Two dimensional supersonic turbulent near wake saddle point singularity during recompression analyzed by including transverse momentum integral equation [AIAA PAPER 70-228] 06 p1039 A70-18106

Saddle point existence in determinate integrodifferential games with variable delay, assuming given control function over time interval 10 p1911 A70-25183

Stationary saddle points phase method for wave diffraction problems in inhomogeneous medium, deriving asymptotic expansion for surface integrals 22 p3984 A70-42390

SAFETY

NT FLIGHT SAFETY
NT INDUSTRIAL SAFETY
NT RANGE SAFETY
NT REACTOR SAFETY
SAFETY DEVICES
NT ABORT APPARATUS
NT ARRESTING GEAR
NT EJECTION SEATS
NT ESCAPE CAPSULES
NT ESCAPE ROCKETS
NT HELMETS
NT SEAT BELTS
NT SPACE SUITS
Transistorized lightning protected VHF ground antenna for air traffic communication providing high operational safety standards 03 p0459 A70-14297

Fire safety in hyperbaric systems isolated from environment by gas tight barrier [ASME PAPER 69-WA/SAF-2] 04 p0784 A70-14836

Air traffic control problems in avoiding midair collisions, satellite utilization in transatlantic flight control and anticollision devices and procedures 04 p0623 A70-15350

Static electricity suppression for textile materials by blending conducting metal fibers into yarn 05 p0870 A70-16299

Emergency in-flight evacuation concepts adapted from military experience considered for application to commercial aircraft 06 p0986 A70-17722

Spacecraft incorporated emergency rescue systems, discussing design of nonseparable crew escape compartment and separable capsule 07 p1218 A70-19010

Laser safety programs in biomedical applications, discussing installations, techniques, hazards and protection 08 p1451 A70-21048

Lightning protection development programs application to light aircraft plastic components, emphasizing structure and fuel systems designers awareness [SAE PAPER 700220] 11 p1980 A70-25892

Aircraft crash fire fighting equipment and tactics for future airport needs 12 p2160 A70-27433

Static charge reducer for aircraft fuels handling safety, discussing performance factors [SAE PAPER 700277] 18 p3263 A70-36808

Tractor rocket powered escape system of 600 knot extraction capability using drogue parachute and barometric time delay device 21 p3751 A70-41809

Pilot airborne recovery device /PARd/ midair rescue system, discussing buoyancy, midair pickup, seat ejection energy absorber, homing avionics and human factors [AIAA PAPER 70-1206] 21 p3752 A70-41812

Aircraft crash protection with preinflated air bag added to conventional seat/lap belt tested with human sled subjects 23 p4140 A70-44456

Emergency life saving instant exits for transport aircraft, using electromechanical confined transfer shaped explosive device 23 p4141 A70-44487

Testing laboratory for safety, survival and life support equipment concerning parachutes, aircrew protective helmets and maintenance manuals 23 p4141 A70-44488

Information handling for safety design concerning standards, criteria and requirements 23 p4153 A70-44493

Modularized multiple use SIIS-3 ejection seat escape system, discussing weight, envelope and low cost 23 p4143 A70-44499

SAFETY FACTORS
Marine safety aspects of helicopters with flotation equipment, considering effects of severe winds and waves, aircraft abandonment procedure, etc 01 p0007 A70-11316

Materials selection and Apollo command module atmosphere design considerations, discussing fire extinguisher system, equipment design changes, etc 03 p0437 A70-14058

Electroexplosive devices /EED/ in electromagnetic environments, discussing principles of warship safety 03 p0549 A70-14129

Static electricity generation and discharge in human beings due to clothing layers, analyzing body capacitance, resistance and inductance for ordnance and fuels safety 03 p0439 A70-14133

Test setup to determine safe limits of atmospheric potential gradients in electroexplosive device initiation 03 p0549 A70-14136

Space station damage containment and control, emphasizing safety problems and guidelines 04 p0762 A70-14933

Flammability control requirements and related hazards in avionics systems materials and components, using systems approach [SAE PAPER 690712] 05 p0956 A70-15854

NASA aerospace system safety program implementation and supporting organization with emphasis on background, concepts, constraints, methods and results [SAE PAPER 690710] 05 p0792 A70-15856

Safety analysis of VTOL aircraft for passenger transport based on accidental failures caused by technical defects, human error, weather, sabotage, etc 05 p0794 A70-16348

Rupture safety in fiberglass reinforced plastics using variation coefficient illustrated in vessel design 07 p1410 A70-19760

Fiberglass plastics structure safety design using time dependent limiting states with wear allowance 07 p1410 A70-19761

Computer program /SAFETE/ for evaluating missile launch risk on near real time basis [AIAA PAPER 70-248] 07 p1250 A70-20370

Missile and space vehicle range safety policies and practices using past statistical performance data and cost consideration [AIAA PAPER 70-246] 07 p1251 A70-20372

Design allowables and factors of safety for filamentary composite materials, discussing reliability 08 p1595 A70-21900

Safety characteristics of potassium chloratellactose mixtures as standard for comparing dangerousness of pyrotechnical compositions 15 p2786 A70-31848

Aircraft ground damage during maintenance and servicing 15 p2675 A70-32210

Flight safety standards, criteria and requirements, stressing accident prevention shift from accident investigation 15 p2831 A70-32212

C-5 aircraft failures and system safety program, noting landing gear, pressure equalization, visor nose, crosswind computer, nacelle separation and propulsion design 15 p2675 A70-32215

Airplane design safety considerations covering turbine cooling, liquid methane fuel, turbine wheel burst damage and lightning hazards 15 p2676 A70-32230

Sounding rockets safe operation and handling, examining ground and flight factors 16 p2981 A70-32923

Safety, microdamages and lifetime of elastic structures under random Poisson pulsed loads 16 p2996 A70-34328

Evolution and current status of Apollo crew safety, discussing hazard aspects, program approach and measures and activities incorporated in project [AAS PAPER 70-051] 17 p3176 A70-34790

Manned space station safety, discussing hazards identification and elimination, rescue/escape systems, etc [AAS PAPER 70-056] 17 p3016 A70-34792

Tektite II program safety planning for ambient pressure habitat under saturation diving conditions [AAS PAPER 70-053] 17 p3036 A70-34796

Aircraft accident prevention and investigation, noting economic factors as deterrent to safety measures implementation 17 p3022 A70-35860

Instrumentation safety for physiological research in hyperbaric chamber environment, taking into account pressure, isolation, atmosphere, electricity and fire 18 p3222 A70-35939

Solid oxygen generator for oxygen gas production from sodium chlorate decomposition, discussing reliability, safety and maintenance 18 p3225 A70-36211

Safety factor limit analysis for anisotropic non-homogeneous solids by variational method, exemplifying by four layer rectangular beam 19 p3547 A70-38355

Safety program effectiveness based on evaluation activity for monitoring field installations 19 p3555 A70-38848

Failure probability from finite sampling characteristics, emphasizing statistical safety factors to characterize structures strength reliability 20 p3724 A70-39856

Safety factor estimation by nomographic techniques for eye protection against direct viewing of laser beam 21 p3768 A70-40761

MIL-STD-882 systems and subsystems and equipment safety requirements related to program management activities 22 p4048 A70-43730

Safety standards and biological effects of microwave radiation, investigating cataractogenesis and heart rate in rabbits 23 p4144 A70-43790

Man-rated chamber facilities at Manned Spacecraft Center /MSC/, discussing safety requirements and criteria, environmental test chamber design and test results 23 p4152 A70-44458

Equipment, sources and safety in neutron radiography for industrial quality control 24 p4376 A70-45747

SAFETY HAZARDS
U HAZARDS
SAGITTARIUS CONSTELLATION
Angular size measurement for galactic X ray sources in Sagittarius region using modulation collimator aboard sounding rocket 09 p1744 A70-22521

Celestial positions and intensities of X ray sources in Sagittarius region obtained from rocket experiment 09 p1744 A70-22522

Formaldehyde absorption profile in direction of Milky Way center observed using lunar occultation 10 p1936 A70-23905

Sagittarius sources A and B2 018H absorption lines measured at microwave frequencies, determining oxygen isotopes abundance ratios 10 p1936 A70-23907

Sgr gamma-1 source, determining upper limit on soft X rays intensity 13 p2475 A70-28615

Neutral hydrogen observations in Sagittarius and Scutum spiral arms, examining circular galactic rotation by density wave theory kinematic models 18 p3331 A70-37197

High energy cosmic gamma radiation detection from point source in Sagittarius, using balloon mounted spark chamber with Cerenkov telescope 19 p3500 A70-38078

Gamma ray background anisotropy effects of Sgr A flux arising from Compton scattering and neutral pion decay, discussing complex radio and IR structure 21 p3878 A70-40926

X ray sources celestial positions in Sagittarius region, using rocket-borne rotating modulation collimator 22 p4094 A70-42928

Radio emission searched for X ray sources near Sagittarius 22 p4094 A70-42930

SAHA EQUATIONS
Ionization equilibrium of atoms and hydrogen-like ions in nonthermal plasma, transforming into Saha formula for high electron densities 11 p2086 A70-25836

Statistical mechanics of partially ionized hydrogen plasma, deriving Saha equation to calculate ionization degree and potential for various electron densities and temperature 12 p2281 A70-27882

Observational evidence concerning validity of Saha and Boltzmann laws in O, B and A stellar atmospheres 17 p3170 A70-35387

SAILPLANES
U GLIDERS
SAILS
NT SAILWINGS
NT SOLAR SAILS
SAILWINGS
Flying ejection seat providing capability for leaving hostile area before vertical descent by parachute, using Princeton Sailing and bypass fanjet 07 p1192 A70-19020

Hi-glide personnel canopy /Para-Foil, Parawing, Sailing, Volplane/ technology capability requirements identification from performance parameters tradeoffs [AIAA PAPER 70-1194] 21 p3753 A70-41822

- Water ballast loadings on sailplane Cobra 17, considering wing, aileron, tailplane, fuselage and landing gear 22 p3962 A70-42962
- SAINT VENANT FLEXURE PROBLEM**
U SAINT VENANT PRINCIPLE
SAINT VENANT PRINCIPLE
 Astatic equilibrium loadings in Saint Venant principle for linear elasticity, analyzing physical distinction from self equilibrated loadings to explain smaller long range stresses 04 p0769 A70-14860
 Compression test for ductile materials based on Saint Venant principle of plasticity to reduce friction effects on deformation by lubricant pressurization 04 p0776 A70-15373
 Saint Venant torsion problem using finite element method, establishing direct matrix relation between forces and displacements 04 p0778 A70-15527
 Exact polynomial solution Saint Venant flexure of pretwisted rectangular plate treated as shallow hyperbolic paraboloidal shell 05 p0928 A70-16056
 Saint Venant torsion and flexure of composite prismatic and cylindrical bars with circular and concentric interfaces 05 p0936 A70-16318
 Axially uniform stress and strain in cylindrical shells, discussing Saint Venant torsion and displacement relations 07 p1405 A70-19255
 Saint Venant principle in cantilever sandwich beams under two statically equivalent load systems, considering Young moduli effects 07 p1406 A70-19328
 Strain and stress compatibility from extension of Saint Venant and Beltrami-Mitchell equations for physically and geometrically linear to nonlinear media 08 p1585 A70-20962
 Integration of Saint Venant equations of deformation continuity for region occupied by elastic medium 08 p1587 A70-21166
 Astatic equilibrium in Saint Venant principle applied to surface of linear elastic body, discussing stress field produced by boundary loading 08 p1591 A70-21463
 Flexural rigidity of thin walled beams, analyzing relationship between loads and displacements taking into account Saint Venant torsional resistance 10 p1955 A70-24052
 Saint Venant principle in linear isotropic viscoelasticity of Toupin estimates for body of arbitrary shape to allow integration by parts 13 p2513 A70-28990
 Saint Venant principle treating Neumann problem with nonthin two dimensional domain 15 p2767 A70-31855
 Book on elasticity theory covering end effects, Saint Venant principle, edge and screw dislocations, moire method, thermoelasticity, cavity and inclusion effects, Muskhelishvili methods, etc 17 p3183 A70-34603
 Stress decay rates in Saint Venant boundary region in truncated semiinfinite elastic cone, using Papkovitch-Neuber functions for eigenfunctions formulation 18 p3339 A70-36489
 Strain and stress compatibility from extension of Saint Venant and Beltrami-Mitchell equations for physically and geometrically linear to nonlinear media 20 p3719 A70-39384
 Medium thickness shells under thermal creep using Saint Venant semiinverse method 20 p3722 A70-39787
- SALINITY**
 Cotton plant leaves from high saline soil area, observing chlorophyll content on color photographs 14 p2576 A70-30977
 Sea water temperature and salinity effects on smooth ocean surface radiation in centimeter range 18 p3250 A70-36968
 Microwave radiometric airborne measurement of salinity of Mississippi River outflow, using P3A aircraft 24 p4330 A70-45979
- SALIVA**
 Thermoregulatory salivary responses of dog to various ambient temperatures, emphasizing hypothalamic temperature, threshold and proportionality constant 01 p0017 A70-10465
- SALIVARY GLANDS**
 Hypoxia and parotid secretion in humans exposed to angular accelerations 17 p3038 A70-35137
 Human mental stress evaluation through chemical analysis of 17-hydrocorticosteroid level in parotid fluid 24 p4308 A70-45509
- SALT BATHS**
 High temperature oxidation of Ni-Cr alloys and stainless steels in molten salt, observing grain boundary corrosion with electron probe 15 p2757 A70-31875

SALT SPRAY TESTS

- Ni alloys with protective coatings for gas turbine blades, testing corrosion resistance in diesel fuel combustion products with intermittent salt water sprays 17 p3125 A70-35394
 Alloying elements effects on corrosion resistance of Mg ingot in NaCl aqueous solution 24 p4363 A70-46198

SALTS

- Polyamides /nylons/ stress cracking by metal halides and halide-like salts, investigating effects of nylon temperature, moisture content, concentration, etc 10 p1907 A70-24224
 Nylon 6 polyamide tensile stress cracking by metal thiocyanates in aqueous and nonaqueous solutions, comparing results with cracking by metal halides 10 p1907 A70-24300
 Electrodeless electrolysis of solid ionic conductors and fused salts without contact leads, using electron beams and glow discharge 13 p2361 A70-28929
 Human water-salt metabolism following exposure to transverse accelerations, discussing diuresis and Cl-K excretion 17 p3038 A70-35364
 Inorganic liquid lasers, discussing Nd salts solution preparation and handling methods 23 p4201 A70-44929

SAMPLED DATA

- U DATA SAMPLING**
SAMPLED DATA SYSTEMS
U DATA SAMPLING

SAMPLERS

- Microbiological evaluation of modified vacuum probe surface sampler for handling and fallout contamination compared with swab-rinse technique 05 p0807 A70-16574
 Vacuum probe sampler to monitor particle contamination on surfaces within clean environments 05 p0808 A70-16703
 Vacuum probe as effective device for sampling surface contamination of airborne microorganisms 05 p0808 A70-16704
 Vacuum probe sampler to monitor particle contamination on surfaces within clean environments 09 p1623 A70-22340
 Airborne precipitation drop sampler imprint size relationship to water drop diameter 10 p1857 A70-23932
 Rocketborne cryogenic sampler using shock diffuser inlet for air collection at supersonic speeds during rocket ascent 10 p1949 A70-23937
 Atmospheric aerosols optical and microphysical measurements comparison, evaluating sample collection equipment, errors, etc 19 p3421 A70-37637
 Rain sampling by Varsity aircraft, determining reliability of droplet sampling instruments above aircraft top surface 19 p3463 A70-38947
 Aerobee rocket-borne cryogenic air samplers heat exchanger design by mathematical model and computer solution 23 p4280 A70-44365

SAMPLES

- Free jet expansions in molecular beam sampling systems, using Sherman equations and chemical kinetic equations [WSCI PAPER 70-12] 13 p2389 A70-29608
 Apollo 11 mafic crystalline rocks and mineral assemblages, discussing collection, classification and sample environments 21 p3894 A70-41502

SAMPLING

- NT AIR SAMPLING**
NT CORE SAMPLING
NT DATA SAMPLING
NT RANDOM SAMPLING
 Probability selection of useful plants based on distribution of resolving statistics 01 p0053 A70-11023
 Stationary Gaussian stochastic processes sample functions properties and local times 02 p0324 A70-12504
 Automated mars surface sample return /AMSSR/ mission, discussing Saturn 5 chemical and nuclear approach [AIAA PAPER 69-1066] 04 p0764 A70-15626
 Duration measurements for sampling function in dynamic crossed field photomultiplier 05 p0849 A70-16655
 Rocket-borne sampler for collecting noctilucent cloud particles in mesopause, describing collection and analysis methods and protection against tropospheric contamination 07 p1273 A70-20266
 Multistage sampling of space and aircraft remote sensor imagery for forest inventory 12 p2228 A70-26921
 Data system obtaining sampling rate for cardiac volume measurement via fast biplane cineangiography 15 p2691 A70-31922

- Sample images division into teaching and checking sequences in pattern recognition problems, determining coefficients based on statistical properties of set 19 p3382 A70-37449

- Risk interpretation of prior distributions in acceptance sampling by Bayesian analysis 19 p3440 A70-38817

SAMPLING DEVICES**U SAMPLERS****SAN MARCO SATELLITE**

- Global and European geodetic satellite network, discussing San Marco equatorial satellite and observation stations 03 p0581 A70-13829

SAN MARCO SATELLITES**NT SAN MARCO 2 SATELLITE****SAN MARCO 2 SATELLITE**

- Equatorial ionosphere ionization and electron density measurements by San Marco 2 satellite 03 p0475 A70-13830

SANDS

- Sand and dust environmental test of T-63 regenerative engine, discussing performance depreciation, recuperator inspection and comparison with non-regenerative t63-a-5a engine 01 p0164 A70-10685
 Sand erosion of metals and plastics, discussing effects of impact conditions and impacting particles and target surface properties 07 p1314 A70-20004
 Erosion by solid particles, discussing impacting velocity effects, natural sand quartz particle size distribution and composition, artificial industrial abrasives, etc 17 p3126 A70-35600
 Sand bed stability under shear flow of low Froude number 24 p4330 A70-45980

SANDWICH CONSTRUCTION**U SANDWICH STRUCTURES****SANDWICH PLATES****U PLATES [STRUCTURAL MEMBERS]****U SANDWICH STRUCTURES****SANDWICH STRUCTURES**

- Coherent precipitates effect on explosive shock hardening of pure nickel and Inconel alloy sandwich assemblies determined from simultaneous shock loading at specific pressures 01 p0116 A70-10107
 Minimum weight sandwich plates complying with von Mises criterion, providing constant dissipated energy density 01 p0202 A70-10947
 Sandwich plates plastic buckling stability under uniaxial compressive loads from compressible theory viewpoint 01 p0204 A70-11137
 Buckling of orthotropic sandwich plates derived for sixth order governing differential equation by variational theorem 01 p0204 A70-11139
 Sandwich panel equations derived from elasticity theory equations applicable to stress analysis in internal zone and edge effects analysis 01 p0210 A70-11409
 Mathematical model for local postbuckling strength of flat truss core sandwich panels loaded in compression, considering application to Ti structures 02 p0386 A70-11948
 Sandwich structures nondestructive testing by holographic interferometry, discussing system operation, specimen stressing, acoustic vibration, etc 02 p0309 A70-12274
 Cylindrical two layer shells stability under compression and radial pressure, calculating compression and transverse shear strains in carrying layer and filler 03 p0592 A70-13443
 DC electrical conduction in In and In-Pb alloy foils sandwich structures, discussing size effect and Pb diffusion rate 03 p0540 A70-13624
 Complex uncoupled modes to analyze forced vibrations of three layer damped sandwich beam with arbitrary boundary conditions, discussing orthogonality 04 p0773 A70-15076
 Shear modulus of sandwich structure tubular core derived by virtual work principle and matrix approach, comparing results with honeycomb core [DGLR-69-64] 04 p0774 A70-15156
 Orthotropic sandwich cylinders buckling under axial compression, presenting linear theory approximate design equations 04 p0776 A70-15381
 Rectangular waffle plates minimum-weight design efficiency with multiple rib sizes in stiffening direction compared to honeycomb core sandwich construction 04 p0777 A70-15526
 Circular sandwich plates fundamental natural frequencies, considering face members membrane characteristics and thickness, face and core isotropy, etc 04 p0778 A70-15559

- Thin cylindrical circular shell and three layered plate, analyzing vibration and stability due to loads and temperature 05 p0926 A70-15916
- Three layer plate of elastic fiber glass reinforced plastic outer layers and metallic plastic filler, studying elastoplastic stability 05 p0934 A70-16218
- Honeycomb and sandwich construction design, discussing optimal material selection, filament wound technology, panels fabrication, destructive and non-destructive test methods, etc 05 p0941 A70-16616
- Dynamics of composite, sandwich and stiffened shell type structures with various geometries 06 p1160 A70-17158
- Transient heat flow in three dimensional rectangular panels, developing criterion for problem dimensionality [AIAA PAPER 70-16] 06 p1182 A70-18212
- Crack self healing in aluminum foil-polyvinyl acetate sandwich structures 07 p1315 A70-18713
- Vibration damping by sandwich structure consisting of viscoelastic layer between two high Youngs modulus metal sheets 07 p1401 A70-18845
- Tensile and shear properties of blind fixed, blind floating and through types of bonded sandwich inserts, noting geometry and temperature effects 07 p1401 A70-18934
- Shallow spherical sandwich shells under concentrated forces, obtaining inhomogeneous equations solution by integral Hankel transforms 07 p1402 A70-19053
- Rectangular three layer plate bending with load carrying central layer obeying Kirchhoff-Love hypothesis and external layers obeying Noeth hypothesis 07 p1403 A70-19117
- Optimal linear viscoelastic synthetic sandwich structures, investigating test/calculation agreement for simply supported beams and embedded plates [ONERA-TP-702] 07 p1404 A70-19137
- Shell elastic constants for multilayered sandwich cylinders using Donnell approximation 07 p1406 A70-19326
- Saint Venant principle in cantilever sandwich beams under two statically equivalent load systems, considering Young moduli effects 07 p1406 A70-19328
- Minimum weight design of elastic sandwich beams with deflection constraints using n-dimensional space of discretized bending stiffness 07 p1407 A70-19358
- Rectangular bidirectional composites and sandwich plates three dimensional elasticity solutions 07 p1412 A70-19952
- Stability equations of three layer panels with allowance for rigid filler transverse deformations 07 p1415 A70-20186
- Elastic-plastic work hardening sandwich arch under given loading rate analyzed for stress rates using integral equation [ASME PAPER 69-APM-21] 08 p1593 A70-21616
- Stresses and strains in multilayer systems of viscoelastic materials showing aging solved by quadratures and Volterra equations, noting dependence on time 08 p1594 A70-21672
- Combustion rates and temperature distribution in condensed and gaseous phases of ammonium perchlorate sandwich with synthetic resin middle layer 09 p1741 A70-22105
- Stress concentration at elliptical hole of arbitrary eccentricity in shallow sandwich shells with hard and soft fillers 09 p1783 A70-23385
- Sandwich plates stability in conducting compressible fluid flow under magnetic field 09 p1785 A70-23621
- Equipment container with sandwich type structure for packing delicate parts 10 p1852 A70-24899
- Convective-radiative heating of multilayer plate approximating temperature field by iteration 10 p1969 A70-25143
- Multilayer plate vibrations calculated with allowance for energy dissipation in material, deriving equations of motion 10 p1965 A70-25297
- Rectangular sandwich plates stability under combined loads, deriving equations for determining critical loads 11 p2129 A70-25563
- Vibration equations for closed and open sandwich cylindrical shell with thickness-shear deformation in core and face layers compared with membrane theory 11 p2145 A70-26697
- Axisymmetric and unsymmetric free vibrational modes of right-circular conical or cylindrical sandwich shells with free edges, discussing Rayleigh-Ritz solution 11 p2145 A70-26700
- Supersonic aerial target wing synthesis using sandwich construction with graphite-epoxy laminate skins bonded to Al honeycomb, achieving significant weight reduction 12 p2160 A70-27118
- Thermal stresses in temperature dependent multilayered cylindrically anisotropic hollow cylinders 12 p2321 A70-27203
- Sandwich beams elastoplastic stability, determining critical load 12 p2323 A70-27342
- Shear deformation of sandwich plate cross sections with hinged opposite edges, constructing transfer matrix for state variables 13 p2508 A70-28483
- Potting material applicability to attaching honeycomb sandwich assemblies to structures, describing pre- and postpotting methods 13 p2418 A70-28667
- Vibration control by alternate layers of high damping viscoelastic material, discussing damping and loss factors, beams design and attachment 13 p2513 A70-29079
- Thermoelastic equations for circular sandwich plates bending due to asymmetric temperature distribution 13 p2518 A70-29976
- Thin film sandwich Ag/Ni/Cu, demonstrating multiple electron diffraction 14 p2627 A70-30724
- Photographic enhancement by slightly offset film sandwiching 14 p2586 A70-30979
- Clamped orthotropic rectangular sandwich plates bending using approximate solution 14 p2661 A70-31429
- Core shear deformations effects on stress, deflection and buckling load calculations for sandwich panels 15 p2815 A70-31931
- Sandwich wire planar antenna array design, noting electrical performance, ruggedness, volume and weight 16 p2877 A70-33416
- Geometrically nonlinear theory for sandwich type plates symmetrically built of three elastically and thermally anisotropic layers, considering nonuniform temperature field 16 p2990 A70-33744
- Embedded damped sandwich beams, determining equations for resonant frequency, loss factor and modal roots 16 p2992 A70-34018
- Sandwich rings inplane transient response to concentrated radial impulsive loads based on Timoshenko type theory, noting dependence on extensional to shear stiffness ratio 16 p2993 A70-34093
- Core flexibility effects on deformation of uniformly loaded clamped parallelogrammic sandwich panels using linear theory 17 p3185 A70-34920
- Optimal design of elastic sandwich, solid beam and plate structures under dynamic harmonically varying loads 18 p3336 A70-36220
- Thickness determination of external elastic plates in freely supported three layer structures of uniform strength under perpendicular loads 18 p3343 A70-36717
- Minimum weight thermoelastic design of sandwich beam for given deflection, using potential energy principle 19 p3541 A70-38044
- Minimum weight design of sandwich beams with elementwise constant cross section for prescribed compliances under alternative loads 19 p3543 A70-38303
- Circular sandwich arc subject to central concentrated load and symmetrically applied edge couple, obtaining shakedown interaction curve 19 p3546 A70-38354
- Sandwich panels geometrically and physically nonlinear theory, obtaining equations of motion and boundary conditions consistent with strain displacement relations 19 p3547 A70-38360
- Ti sandwich structures low temperature brazing with Al alloy, describing fabrication process and mechanical properties 20 p3638 A70-39969
- Finite deflection discrete element analysis of sandwich plates and cylindrical shells with unbalanced laminated faces 20 p3732 A70-40268
- Stress distribution at hole in orthotropic cylindrical sandwich shell under internal pressure 20 p3734 A70-40440
- Closed circular cylindrical shell nonlinear problem solvability extended to anisotropic sandwich shell, using mean deflection theory 21 p3933 A70-40601
- Solid and sandwich beams lateral vibrations under transverse shear, rotary inertia and variable midplane stretching 21 p3938 A70-41761
- Weight-optimal sandwich beam design for given static deflection, using energy approach 22 p4113 A70-42535
- Joint strength of three layer fiberglass reinforced plastic panels with bilateral adhesive patches under linear axial force 22 p4115 A70-42812
- Sandwich multilayer structures temperature fields and heat transfer characteristics at high temperature [ICAS PAPER 70-38-BIS] 23 p4276 A70-44136
- Elastic circular sandwich beams optimal design for minimum compliance and given weight, considering rings and semicircular arches 24 p4420 A70-45276
- Holographic interferometry for NDT inspection of adhesive bonded honeycomb sandwich aerospace structures 24 p4338 A70-45754
- Sandwich structures in aerospace hardware, considering joining methods, materials and geometries [SAE PAPER 700859] 24 p4425 A70-45879
- Bonded honeycomb sandwich structure fastening techniques in aerospace design, noting application to aircraft and spacecraft structures [SAE PAPER 700850] 24 p4425 A70-45882
- SAPPHIRE Schottky barrier FET fabrication using epitaxial growth of single crystal GaAs on insulating sapphire substrate 04 p0660 A70-15364
- Epitaxial beta-SiC films formation on sapphire by chemical conversion 06 p1127 A70-17946
- Sapphire whisker-Al composites fabrication methods using air elutriation techniques and semiautomatic methods for fiber alignment, discussing elastic modulus, tensile strength, etc 07 p1314 A70-19956
- C-axis single crystalline sapphire filament tensile and fracture tests 08 p1514 A70-20647
- Laser pulse energy ponderomotive meter using mechanical action exerted by light on movable sapphire plate in air at atmospheric pressure 09 p1700 A70-23657
- Metallic base fiber and particulate composites, emphasizing silicon carbide, sapphire, boron and graphite filaments 14 p2597 A70-31168
- ZnO epitaxial layers deposition by chemical vapor transport on sapphire single crystal substrates 15 p2784 A70-31982
- Hydrogen effect on impurity redistribution in heteroepitaxial Si layers on sapphire substrate 15 p2785 A70-32529
- Sapphire and ruby plastic deformation and fracture properties at room temperature, discussing sapphire base ceramics 18 p3278 A70-36046
- Compressive and rarefaction shock wave propagation in polymethyl methacrylate, fused silica and sapphire, using laser interferometer measurements 22 p4031 A70-43020
- SARCOMA U CANCER SAS-A Variable parameter nutation damper SAS-A dual spin satellite, discussing design and expected in-flight performance by digital simulation [AIAA PAPER 70-972] 20 p3669 A70-39557
- SATAN (SENSOR) U TERRAIN ANALYSIS SATELLITE ANTENNAS Solar radiation influence on Alouette satellite spin behavior with long flexible antennae, taking into account sunlight/shadow history and solar vector inclination 02 p0380 A70-11852
- Satellite mounted mm wave parabolic dish antenna for tracking communication satellite in synchronous orbit 02 p0392 A70-11933
- Structural and systems design of large orbital radio astronomy antenna /crossed H interferometer/ with astronaut participation in deployment, operation, maintenance and updating [AIAA PAPER 70-100] 06 p1156 A70-18058
- TV system for satellite antenna boom position monitoring, describing camera system and programming, imaging techniques, position calibration, etc 10 p1891 A70-24898
- Air traffic control system using ground controlled satellite-borne phased array antenna to overcome UHF downlink path loss [AIAA PAPER 70-497] 11 p2077 A70-25421
- Attitude stabilization of synchronous communications satellites employing multiple narrow beam antennas [AIAA PAPER 70-457] 11 p2119 A70-25422

Orbit utilization, discussing sharing of satellite communication frequency bands and use of multiple earthward antenna beams
[AIAA PAPER 70-468] 11 p1999 A70-25428

VHF aerosol antenna design and system interactions, analyzing impact of spacecraft dynamics, control system, power supply and propulsion
[AIAA PAPER 70-486] 11 p2120 A70-25439

Low cost earth station and antenna for Canadian domestic satellite, bringing color TV to northern territories
[AIAA PAPER 70-432] 11 p2000 A70-25458

Multiple feed waveguide lens in variable coverage communications antenna for geostationary LES-7 satellite
[AIAA PAPER 70-423] 11 p2016 A70-25461

S band communications repeater using retrodirective phased array on synchronous altitude data relay satellite /DRS/ for intersatellite and ground links
[AIAA PAPER 70-424] 11 p2001 A70-25472

Sidelobe suppression for satellite reflector antennas by heavy taper, blockage compensation and active zone techniques, noting net antenna gain enhancement
[AIAA PAPER 70-427] 11 p2016 A70-25476

X band mechanically despun antenna system with RF and motor drive assembly developed for earth coverage communications satellite
[AIAA PAPER 70-422] 11 p2001 A70-25481

Digital satellite communications systems, discussing time division multiplexing, steerable beam antennas and satellite-to-satellite transmission
[AIAA PAPER 70-491] 11 p2003 A70-25492

RF interference emanating from satellite-borne pulse plasma thruster by measuring RF power at UHF antenna having plasma in near field
11 p2103 A70-26136

Satellite pencil and shaped beam antennas, considering maximum gain conditions for various angles
12 p2197 A70-27929

Ultrahigh strength stainless steel for light gage springs and satellite antennas
13 p2420 A70-29248

Alouette satellite antennas and receivers for detecting plasma resonances and VLF signals, noting ground station telemetry link
13 p2380 A70-29902

Alouette spikes decrease with time equivalent to antenna transient response during hot plasma immersion
13 p2371 A70-29921

Repeater and antennas for space telecommunications onboard ELDO STV-F9 satellite, describing tests and measurements
15 p2811 A70-32282

Counterrotating antenna onboard Italian satellite in synchronous equatorial orbit for microwave propagation experiment
15 p2709 A70-32287

Multibeam array antenna performance improvement by shaping beam for optimum earth coverage from stabilized synchronous satellites
16 p2860 A70-32952

Lens antennas design for communication satellites, discussing power gain, beam width, sidelobe level, temperature distribution, etc
16 p2982 A70-33772

ATSC satellite rocket exhaust plume convective heating measurements of VHF whip antennas, discussing nozzle flow and heating rate
[AIAA PAPER 70-843] 16 p3000 A70-33926

Radio astronomy explorer /RAE/ satellite main antenna array, describing elements, dispenser and take-up mechanisms, construction materials, etc
16 p2986 A70-34144

Brushless despun mechanical drive and control system design and performance for orientation of high gain communications antenna from spin stabilized satellite
16 p2986 A70-34161

Canister for protecting DC motors in Isis 1 antenna unit, noting pressure monitoring device and shaft seal
17 p3100 A70-34753

Electronically despun antenna for spin stabilized medium altitude satellites
17 p3179 A70-35270

Plasma induced radio frequency interferences from DC-DC converter to receiving antenna simulated for REXS satellite in space chamber
17 p3047 A70-35400

Complex impedance measurements for monopole antenna for electron densities in/out of OGO satellite wake in upper ionosphere
17 p3080 A70-35771

Directional solar thermal field /sunlight/ effect on coupled nonplanar transverse and torsional vibrations of satellite cylindrical antennas in orbit
20 p3720 A70-39676

Square loop antenna radiation resistance in warm plasma, comparing theoretical results with measured values from Ariel 3 satellite antenna
21 p3796 A70-40562

Multiple beam antenna system for regional communications satellite directing high radiated power toward specific earth areas
21 p3790 A70-41358

Single multiple access satellite communication system requirements for worldwide, trunked and local operations, considering transponder allocation and antennas
21 p3790 A70-41365

Radio Astronomy Explorer satellite boom deployment method resulting in gravity gradient capture, emphasizing role of predeployment attitude and antenna Vee angle
[AIAA PAPER 69-920] 21 p3931 A70-41856

Satellite-borne loop antenna resistive and reactive impedance measurements in topside ionosphere
22 p4019 A70-43112

SATELLITE ATTITUDE CONTROL

Heat exchange unit for low thrust attitude control propulsion system evaporator designed for converting liquid propellants to gas
[AICHE PREPRINT 25] 01 p0216 A70-10969

HEOS 1 satellite for interplanetary space exploration, describing eccentric orbit, structure, power supply, attitude measurement and control, spin rate control, telemetry and telecommand systems
01 p0196 A70-11114

Satellite attitude control, discussing passive, active and hybrid stabilization methods including spin, gravity gradient and magnetic stabilization
01 p0197 A70-11264

Hydrodynamic journal-thrust bearing system for satellite attitude control flywheel, discussing bearing stability, grease lubricant seal, power consumption, etc
[ASLE PREPRINT 69-1C-22] 02 p0309 A70-12532

Satellites gravity-gradient stabilization by flywheels in elliptical orbits, designing control system for orientation and optimal motion damping
03 p0582 A70-14321

Spacecraft orientation control without measuring vehicle angular velocity based on transient response and oscillations damping effectiveness
04 p0760 A70-14428

Electrostatic charged particle acceleration and ion thruster function in geostationary satellite station-keeping and attitude control, orbital transfer and drag compensation
[ONERA-TP-764] 04 p0735 A70-14934

Satellite orbit and attitude determination and planetary gravity and astronomical constants from earth-based radio Doppler and orbital photogrammetric observations
04 p0750 A70-14938

ESRO 1 satellite attitude stabilization in launching, transition and stabilized phases
[DGLR-69-14] 04 p0762 A70-15168

Free gas formation in propellant systems and effects on attitude control systems
[AIAA PAPER 69-434] 04 p0763 A70-15418

Dodge satellite postlaunch attitude stabilization and flight data comparison with digital simulation, underlining simulation use in design analyses
04 p0765 A70-15674

Semiactive gravity gradient attitude stabilization system /SAGS/ providing active pitch control and semipassive roll/yaw control, discussing design, development and testing
[SAE PAPER 690691] 05 p0923 A70-15863

Pulsed plasma and ion microthrusters providing satellite attitude and position control
05 p0896 A70-16119

Magnetic torquers consisting of permanent magnets or coils for attitude stabilization of earth satellites in geomagnetic field
[IEEE PAPER 27.1] 05 p0924 A70-17000

Attitude performance of GEOS 2 gravity gradient spacecraft, discussing prelaunch design and post-launch analyses
06 p1154 A70-17162

Capture and gravity gradient stabilization of LIDOS satellite in eccentric orbit
[AIAA PAPER 69-921] 06 p1154 A70-17175

Satellite launch vehicle attitude control stability study including fuel sloshing and body bending effects
06 p1155 A70-17320

Jet engine risetime effect on spacecraft orientation control system performance, assuming monotonic or extremal thrust mode
06 p1103 A70-17883

Hybrid coordinate formulation for flexible space vehicle attitude control system design
[AIAA PAPER 70-20] 06 p1158 A70-18180

Aeros satellite active magnetic position control system of axis and spin noting design and operation
[DGLR-69-056] 07 p1393 A70-19148

Suboptimal attitude control system for Nimbus satellite using motor-driven inertia wheels as control torque source for three dimensional control
07 p1331 A70-20027

Active and passive geomagnetic rate dampers for attitude control systems of geomagnetically, gravitationally or spin stabilized spacecraft
09 p1766 A70-22936

Nonspinning satellite orbit eccentricity effect on attitude stability
09 p1766 A70-23229

Satellite attitude and orbit control systems based on electrically heated ammonia or hydrazine
09 p1767 A70-23432

Ionosphere sounding satellite attitude variation dependence on transverse moments of inertia
10 p1949 A70-23918

Gravity gradient satellites equilibrium attitude error analysis showing relative effects of error sources
10 p1951 A70-24825

Star tracker linear and nonlinear model selection influence on satellite attitude stability
10 p1953 A70-25231

Attitude stabilization of synchronous communications satellites employing multiple narrow beam antennas
[AIAA PAPER 70-457] 11 p2119 A70-25422

Communications and attitude control on Phase 2 satellite for Defense Satellite Communication System
[AIAA PAPER 70-493] 11 p1998 A70-25427

Three axis attitude control of earth oriented non-spinning synchronous communications satellite, using gimbal-mounted momentum wheel and pulsed plasma thrusters
[AIAA PAPER 70-456] 11 p2119 A70-25431

Despin ball bearing assemblies performance data for TACSAT and Intelsat 4, discussing technology needed for accelerated testing, higher precision, failure detection and lubricants
[AIAA PAPER 70-459] 11 p2058 A70-25471

LES 5 and 6 feasibility demonstration of satellite communications at VHF/UHF to mobile terminals and as test beds, emphasizing stationkeeping and attitude control
[AIAA PAPER 70-494] 11 p2121 A70-25474

Ammonia micropropulsion operation modes and performance for stabilizing synchronous communication satellite, noting advantages over chemical and ion propulsions
11 p2122 A70-25817

Hybrid attitude attitude control system deformation model, utilizing pivoted flexible boom with tip mass as actuator and inertia wheels to dampen gravity induced librations
11 p2123 A70-26127

Sun-pointing spinning spacecraft attitude control by solar radiation pressure using paddle arrangement without power, sensor and moving parts requirement
11 p2123 A70-26145

Spin stabilized satellite attitude and orbital maneuvers computation, considering required accuracy and computer time in numerical integration procedures
11 p2125 A70-26278

Roll and pitch attitude control for long range station-keeping mission of synchronous flywheel stabilized communication satellite, discussing constraints on on-board equipment and technology
11 p2126 A70-26279

Ground testing apparatus with three degrees of freedom for artificial satellites attitude control systems, establishing mathematical model by digital and analog techniques
11 p2031 A70-26290

Kalman filter modifications for spinning satellite attitude determination in elliptical orbit prior to apogee maneuver, using sun and IR earth sensors
11 p2028 A70-26304

Experimental IR earth horizon profiles measured by satellite in F region, discussing spectral channels and attitude control
12 p2225 A70-27751

Molniya 1 communication satellite attitude control involving automatic solar panel and antenna orientation, using powered gyroscopic stabilizers
13 p2499 A70-28387

Synchronous satellite attitude acquisition and keeping, proposing roll and pitch control law for simulation
13 p2500 A70-28409

Attitude-translation motion coupling effect on stability of gravity-stabilized drag-free satellites
13 p2501 A70-28424

Suboptimal satellite attitude control using ionic microthrusters operating by large modulated amplitude impulses caused by electrostatic deflection of beam
13 p2501 A70-28426

Limit cycle oscillations in satellite attitude control system, producing control moment by pulse modulated controller
13 p2502 A70-28430

Symphonic communication satellite orbit and attitude stabilization systems components, operation and accuracy requirements
13 p2502 A70-28432

Spinning sun oriented satellite using magnetic coil around spin axis for attitude control, detailing design
13 p2502 A70-28439

Thermal interface between edge of planetary disk and space for providing attitude reference during orbiting of planet
13 p2403 A70-28442

Spacecraft orientation control without measuring vehicle angular velocity based on transient response and oscillations damping effectiveness
13 p2503 A70-28453

Simultaneous satellite attitude control and flywheel desaturation using external torque
13 p2503 A70-28527

- Azur satellite flight results, noting trajectory accuracy telemetry reception, yo-yo triggering and attitude control 13 p2505 A70-28766
- Satellite orientation control and stabilization by gyro with statically and dynamically balanced rotors, showing steady motions and stability region augmentation 13 p2507 A70-29769
- Gravity gradient stabilization systems for earth-pointing satellites, noting long term reliability and accuracy 13 p2507 A70-29769
- Nimbus weather satellite as laboratory for sensors collecting data for global weather system, describing launching, attitude control systems and cameras 14 p2654 A70-31149
- Satellite feedback attitude control system resulting in high accuracy earth pointing motions in elliptic orbits 14 p2654 A70-31172
- Nutation damper for dual-spin spacecraft, considering various two degree of freedom systems with two natural frequencies 14 p2655 A70-31367
- Earth-pointing satellites joined by tether, discussing reel back and drag brake orbital deployment techniques and dynamic behavior 15 p2799 A70-31776
- OGO spacecraft structures, thermal control systems, attitude control, weight and power supplies 15 p2810 A70-31782
- Gravity stabilized gyrostatt satellites internal angular momentum effect on nonlinear resonant attitude motions 15 p2810 A70-31785
- Satellite attitude control via optical-inertial stabilization, using Bucy-Kalman linear statistical filtering 15 p2811 A70-32265
- Microthrusters for geostationary satellites attitude and position control 15 p2791 A70-32279
- IR radiating bodies angular displacement determination by vacuum evaporated thermocouple radiation detectors, describing stationary communication satellite attitude control 15 p2740 A70-32422
- Mariner attitude control system limit cycle operation during cruise, noting variation from ideal case to single side operation [AIAA PAPER 69-844] 15 p2812 A70-32507
- Motion and stability characteristics of dual spin satellite system with pendulous type nutation dampers, noting mass unbalance effect [AIAA PAPER 69-857] 15 p2812 A70-32508
- Magnetic hysteresis dynamic model for digital simulation of stabilized satellite attitude motions 15 p2812 A70-32509
- Star tracker rigidly connected to spacecraft frame for attitude determination by star field correlation 16 p2946 A70-33157
- Spacecraft gravity gradient stabilization by damping out oscillatory motions by energy dissipation, using combined eddy current and hysteresis dampers /Combination Passive Damper/ 16 p2985 A70-34133
- ATS attitude stabilization boom packages, describing torque transmission, drum synchronization, electrical isolation, lubrication, etc 16 p2846 A70-34145
- Hydrodynamic journal-thrust bearing system for satellite attitude control flywheel, discussing bearing stability, grease lubricant seal, power consumption, etc 17 p3099 A70-34630
- Bearing assembly energy dissipation effects on dual spin spacecraft attitude stability, explaining satellite motion anomalies 17 p3100 A70-34756
- Heliostationary spacecraft for solar observation near libration point between sun and earth, discussing attitude stabilization by solar pressure 17 p3178 A70-35254
- Spin stabilized satellite reorientation, using magnetic dipole interaction with geomagnetic field 17 p3179 A70-35287
- Steady state off-on attitude control strategy for minimizing propellant consumption and thrust ignitions of satellite in presence of environmental disturbance torques 17 p3180 A70-35556
- Spacecraft wide angle attitude control system stability analysis, using air bearing table simulation 17 p3134 A70-35651
- Spinning symmetric satellite attitude stability in hyperbolic orbit on flyby mission, examining by numerical integrations of equations of motion 17 p3181 A70-35753
- Spacecraft simulator using air bearing technique to simulate low friction aspect of environment, considering application to satellite attitude control 18 p3236 A70-36064
- Japanese scientific satellite magnetic attitude and spin rate control system design and computer simulation 18 p3332 A70-36065
- Optimal orientation control of axisymmetric rotating space vehicle, using cyclic sliding mode theory 18 p3332 A70-36162
- Constraint torque elimination from vector equations canonical system for attitude dynamics of satellite consisting of arbitrarily interconnected rigid bodies [AIAA PAPER 69-923] 18 p3316 A70-36679
- Control moment gyros for spinning satellite stabilization and attitude control 18 p3289 A70-36714
- Gravity stabilized gyrostatt satellite attitude motion stability, using three dimensional diagram and Liapunov functions 18 p3334 A70-37061
- Magnetic perturbations effect neutralization for satellite attitude stabilization by real time simulation of satellite angular motion in magnetic field 19 p3399 A70-38286
- Space motion simulators for Azur satellite, considering satellite attitude related to sun 19 p3400 A70-38296
- Gravity gradient attitude control for satellites near lunar far side libration point [AIAA PAPER 70-1053] 19 p3528 A70-38868
- Interactive hybrid simulation of TRIAD satellite motions, describing attitude control system with magnetic hysteresis damping [AIAA PAPER 70-994] 20 p3714 A70-39536
- Magnetic compensation for attitude control of gravity gradient stabilized satellite using environmental torques and momentum gyro damping [AIAA PAPER 70-993] 20 p3668 A70-39537
- Turbofan engine aerodynamic interactions, cryogenic space storable propellants, space station attitude control biowaste resistojets and long burning time solid propellants 20 p3688 A70-39667
- Satellite steady state motion and relative equilibrium position optimal stabilization by additional forces application 21 p3849 A70-40606
- Digital orbital clock and telemetry adapter for TDIA satellite attitude stabilization, describing mechanical structure 21 p3798 A70-41272
- Ion thrust vectoring systems for satellite attitude control and stationkeeping, discussing deflection techniques [AIAA PAPER 70-1150] 21 p3868 A70-41783
- Three axis attitude ion thrust vector control mechanism for solar electric propulsion spacecraft, discussing gimbal and translation actuators, array and cabling [AIAA PAPER 70-1156] 21 p3759 A70-41784
- Radio astronomy Explorer A attitude determination via disk-oriented programming ground support system for reducing and calibrating telemetry data, attitude prediction and command, etc [AIAA PAPER 69-983] 21 p3795 A70-41857
- Attitude and orbit control electric propulsion systems for long term space stations, discussing resistojets and electron bombardment and contact ionization ion thrusters 22 p4092 A70-43654
- Earth quadrupole moment indirect effect on satellite gyroscope precession 23 p4217 A70-43799
- Attitude control of artificial gravity mass-unbalanced axisymmetric orbital space stations 23 p4258 A70-44502
- Ion micropropulsion for geostationary satellites time optimal attitude control 23 p4261 A70-44669
- Magnetically stabilized satellites passive roll control, discussing resonance solutions by variational approach 23 p4262 A70-44690
- Adaptive time optimum inertial satellite attitude control using air jet 23 p4265 A70-45048
- SATELLITE ATTITUDE DISTURBANCE**
- U ATTITUDE STABILITY
- U SPACECRAFT STABILITY
- SATELLITE COMMUNICATIONS**
- U SPACECRAFT COMMUNICATION
- SATELLITE CONFIGURATIONS**
- Satellite electric propulsion system and configuration for orbital transfer maneuvers, describing ELDO launcher, Black Arrow, orbital dynamics, sensor system, etc 06 p1130 A70-17648
- Tethered orbiting interferometer configurations for future Radio Astronomy Explorer satellites, discussing gravitational stabilization and delta launching into orbit as single payload [AAS PAPER 69-255] 09 p1766 A70-22930
- Optimum sequence integration and ground testing of Defense Communication System Phase II Satellite, considering vibration, shock, space simulation, spin/despin, RF and acoustic requirements [AIAA PAPER 70-447] 11 p2030 A70-25444
- Three-nodes analysis for thermal design of spinning spherical satellite using heat transfer equations in mathematical model 12 p2332 A70-28061
- Automatic rendezvous and mooring-coupling of spin stabilized satellites, discussing configuration, guidance and dynamics model 13 p2499 A70-28397
- Equilibrium configurations, considering aerodynamic forces for axisymmetric satellites attitude stability using infinitesimal analysis and Liapunov method 15 p2809 A70-31779
- Earth gravity deforming effect on flexible crossed-dipole satellite configuration, considering dynamic stability and spin stabilization 22 p4110 A70-43434
- Earth gravity effect on spin vector attitude stability of flexible crossed dipole satellite configuration 22 p4110 A70-43435
- Satellites with many flexibly coupled rigid bodies, calculating libration upper bounds for predicting perturbation and stability 23 p4262 A70-44682
- Dynamics of spin-stabilized flexible satellites of long crossed dipoles or slender beams, noting Alouette and ISIS-1 spacecraft 24 p4415 A70-45549
- SATELLITE CONTROL**
- NT SATELLITE ATTITUDE CONTROL**
- Optimum thrust control of satellite along given trajectory to rendezvous at zero velocity with orbited satellite 01 p0197 A70-11500
- Continuous and pulsed parameter stabilization for circular orbits of navigation and communication satellites under perturbing effects of oblateness and atmospheric drag 02 p0374 A70-12402
- Intelsat satellites telemetry and telecontrol /TTC/, describing Fucino plant design and operation 02 p0263 A70-12647
- Pulse width modulation command order for German research satellite Azur control 04 p0653 A70-15662
- Pulsed plasma vacuum-arc thruster system incorporating throttle and thrust vector controls for long life satellite control applications [AIAA PAPER 70-180] 06 p1133 A70-18232
- Angular motion of deformable earth satellite as solid-elastic system with distributed masses, applying automatic control transfer function 10 p1914 A70-24308
- UK UHF telemetry command station capabilities for Skynet satellites control, discussing equipment [AIAA PAPER 70-415] 11 p2030 A70-25420
- Visible light sensors application in LES control system for circular near equatorial orbits [AIAA PAPER 70-477] 11 p2107 A70-25432
- Satellite stationkeeping by ground command, self contained or combined methods compared for networks of synchronous satellites 11 p2121 A70-25463
- Satellite rendezvous programmed control with allowance for thrust limitation by free trajectories method, determining impulse duration, magnitude and time 12 p2314 A70-28257
- Spin stabilized nonrigid satellite dynamics, considering liquid propellant behavior effect 13 p2499 A70-28401
- Satellite stabilization one-axis control system using earth magnetic torquer 13 p2500 A70-28405
- Electromagnetic control system for spin rate and axis orientation of ISIS ionospheric research satellites, describing design parameters 13 p2501 A70-28414
- Circular orbit gravitationally stabilized satellite oscillation damping by changes of moments of inertia 13 p2501 A70-28420
- Minimum time control for placing circular orbit satellite in gravitationally stable position 13 p2502 A70-28440
- Satellite spin stabilization by Cs contact ion microthrusters with beam deflection, investigating performance obtained by optimal and suboptimal laws 13 p2506 A70-29143
- Two axis eddy current and single axis gravity gradient dampers for satellite stabilization 16 p2985 A70-34135
- PCM telemetry transmitters, command receiver and ground control for German research satellite Azur 16 p2890 A70-34349
- Intelsat IV command and control system, describing ground stations, control center, telemetry data handling and acquisition, etc 17 p3046 A70-35275
- Dynamic flexible artificial earth satellites with mass distribution, considering control systems design principles 17 p3180 A70-35294
- Controlled libration point satellite limit cycle motion, deriving solution in infinite series by harmonic analysis 17 p3181 A70-35752

Planar Tethered Orbiting Interferometer satellite for long wavelength solar and planetary radio astronomy, discussing deployment control and libration damping
18 p3333 A70-36230

Radio Astronomy Explorer satellite boom deployment method resulting in gravity gradient capture, emphasizing role of predeployment attitude and antenna Vee angle
[AIAA PAPER 69-920] 21 p3931 A70-41856

SATELLITE DESIGN

Delta boosted electrically raised high power synchronous satellite for communication tasks
[AIAA PAPER 69-1104] 01 p0194 A70-10617

Manned space station power systems design and selection problems, discussing requirements based on impacts on space station design and operations
[AIAA PAPER 69-1081] 01 p0008 A70-10625

Weather satellites performance emphasizing designs for geostationary altitude and hydrological, oceanographic and earth science applications
[AIAA PAPER 69-1082] 01 p0135 A70-10648

Unmanned teleoperator spacecraft (UTS) for future orbital demonstration, discussing manipulators, multifunction viewing, stabilization, human factors, etc
[AIAA PAPER 69-1067] 01 p0195 A70-10649

ESRO 4 satellite as ESRO 2 design modification, describing experiments involving topside ionosphere ions, mass spectrometry, auroral particles distribution, solar and trapped particle fluxes
02 p0381 A70-12503

German-French communication satellite project Symphonie for radio, TV, telephone, teletype and data transmission, discussing objectives, organization and technical problems
[DVL-910] 03 p0580 A70-13796

Logic methods of efficient organization of satellite integration, considering project, physical components and program elements
03 p0609 A70-13842

European Ultra-Violet Astronomical Satellite (U-VAS) to replace Large Astronomical satellite (LAS) to reduce cost while maintaining scientific objectives
03 p0582 A70-14343

TD-1 satellite design and scientific payload
[DGLR-69-11] 04 p0762 A70-15142

Mission objectives and technical realization of AZUR research satellite and Symphonie communication satellite
04 p0763 A70-15303

Structural and systems design of large orbital radio astronomy antenna [crossed H interferometer] with astronaut participation in deployment, operation, maintenance and updating
[AIAA PAPER 70-100] 06 p1156 A70-18058

Dioscures project satellites design, considering use of rotation stabilization
07 p1392 A70-18989

Monograph on OAO design, experiments, testing, mission operations and history
07 p1393 A70-19100

Lightweight mirror blanks of titanium silicate for OAO-4 providing thermal and dimensional stability
09 p1678 A70-22952

Navy Navigation Satellite System program development and present status, discussing satellite design and system accuracy-geodesy connection
09 p1723 A70-23039

TD-1 satellite design and scientific payload
09 p1767 A70-23429

ESRO 4 satellite design, listing basic requirements of experiments in terms of orbital maneuvers and sensor locations
09 p1767 A70-23700

Pages 1 satellite characteristics, design, structure and orbital elements
10 p1941 A70-24585

Tiros M requirements for earth resources sensor systems, discussing spacecraft structure, dynamics, power, command and communications subsystems
10 p1950 A70-24638

Franco-German telecommunication satellite Symphonie mission objectives and system design
[AIAA PAPER 70-406] 11 p1996 A70-25401

Power sources, transfer and conditioning subsystems design, fabrication and testing for high power communication satellites
[AIAA PAPER 70-433] 11 p2120 A70-25438

Linearized equations of motion solved for stability of dual spin satellite with two dampers, comparing to Floquet analysis
[AIAA PAPER 70-431] 11 p2120 A70-25440

Titan 3C boost phase inertia loads on payload estimated for satellite design, using frequency and interface acceleration methods
[AIAA PAPER 70-485] 11 p2120 A70-25446

TACSAT 1 communication satellite design, dual-spin stabilization principles and dynamic characteristics, noting nutation behavior
[AIAA PAPER 70-455] 11 p2120 A70-25447

Initial Defense Communication Satellite Program/augmentation satellite design and mission, on-board communications equipment, control subsystems, American-British cooperation, etc
[AIAA PAPER 70-492] 11 p2121 A70-25449

Equations of motion for dynamic stability of flexible freely spinning Alouette-type satellite with crossed dipole configuration
12 p2312 A70-27194

Three-nodes analysis for thermal design of spinning spherical satellite using heat transfer equations in mathematical model
12 p2332 A70-28061

Onboard satellite information processing systems for bandwidth compression using digital filters and error correcting coding
13 p2381 A70-28431

Aeros aeronomic satellite mission, orbit and design for upper atmosphere observations, noting braking field analyzer for ion and electron speed measurement
13 p2505 A70-28767

Astronomical Netherlands Satellite (ANS) for carrying out stellar UV and X ray emission experiments
13 p2506 A70-28989

Magnetic field simulator for investigating magnetic properties of satellites designed for magnetometric experiments
13 p2385 A70-29556

Syncom and Early Bird systems development, launch procedure and operation, discussing common components
14 p2654 A70-31144

Equilibrium configurations, considering aerodynamic forces for axisymmetric satellites at attitude stability using infinitesimal analysis and Liapunov method
15 p2809 A70-31779

Small satellites for scientific technological and operational missions, discussing piggyback launching, command, battery storage, telemetry and attitude control systems
15 p2810 A70-31781

Satellite reliability, discussing quality control, contractual matters, mathematical models, project management, failure modes, etc
15 p2813 A70-32826

Tactical communications satellite (TACSAT)/design, emphasizing communications repeater characteristics
16 p2983 A70-34051

Dual spin satellites considered as deformable flexible gyrostats, obtaining stability criteria
17 p3177 A70-35234

Nonlinear three nodes analysis for thermal design of spinning spherical satellite
17 p3177 A70-35249

Satellite temperature distribution prediction from digital simulation
17 p3177 A70-35250

Automated orbiting biosatellite program with reentry system, studying long term weightlessness and radiation effects
17 p3178 A70-35258

OGOs design evolution with respect to scientific mission requirements
17 p3180 A70-35303

Alouette and ISIS experiments programs and design
17 p3180 A70-35305

Stable equilibrium positions for satellite consisting of many rigid bodies in circular orbit about center of gravity, using numerical method
18 p3332 A70-35963

Space environment simulation and thermal vacuum tests for satellite thermal balance during development
19 p3401 A70-38300

Torque free spinning satellite with flexible appendages, investigating design parameters effects on nutational stability
[AIAA PAPER 70-1046] 19 p3534 A70-38861

Space environment simulation chamber for testing of equipment temperature and satellite thermal model
19 p3402 A70-38897

Variable parameter nutation damper SAS-A dual spin satellite, discussing design and expected in-flight performance by digital simulation
[AIAA PAPER 70-972] 20 p3669 A70-39557

Drag-free satellite design and propulsion requirements, noting orbit perturbation mechanisms
[AIAA PAPER 70-1145] 20 p3717 A70-40523

Baseline satellite design for U.S. domestic communications, discussing structural weight, transponders and bandwidth, antennas, etc
21 p3790 A70-41356

Scientific satellites evolution during past decade and future development possibilities in conjunction with space shuttles and stations
23 p4260 A70-44621

Multipurpose earth resource satellites design, emphasizing land use factors and data reduction problems
23 p4286 A70-45005

ATS 6 and 7 satellite design features, operational characteristics and experiments objectives
[AIAA PAPER 70-1307] 24 p4415 A70-45375

SATELLITE DRAG

Atmospheric density variations in thermosphere determined from braking satellite data, discussing correlation with solar activity and temperature variations
01 p0077 A70-11202

Thermospheric structure and variations obtained from satellite drag data analysis, discussing gas density, temperature and atmospheric composition
01 p0077 A70-11203

Jacchia 1965 model discrepancies in solar and geomagnetic activity and semiannual effects observed in satellite drag measurements at 150-200 km and 700-1500 km
01 p0077 A70-11204

Period changes of satellite 1963 53 A due to accelerations from atmospheric drag and solar radiation pressure
02 p0362 A70-11764

Statistical analysis of satellite drag data for characteristic time of thermal fluctuations in upper atmosphere caused by soft solar X-rays
03 p0472 A70-13179

Statistical model based on kinetic and probability theories to determine drag coefficient of orbiting satellites
06 p1159 A70-18289

Satellite wake in ionosphere simulated in cold ion plasma without magnetic field, observing complex far wake structure and peculiar electrostatic probes response
06 p1147 A70-18297

Artificial satellites MHD drag, noting altitude and temperature effects
10 p1921 A70-23834

Satellite orbit prediction using computer program based on first order secular node-to-node drag perturbations
10 p1943 A70-24822

Atmospheric density estimation from observation of satellite drag-induced energy dissipation
13 p2400 A70-29530

Artificial satellite around Venus, investigating orbital lifetime based on atmospheric drag effect on periaapsis height
14 p2637 A70-30563

Steady state plasma wind tunnel for flow around ionospheric satellites, studying wakes of cylinders and spheres
16 p2837 A70-33866

Planetary orbiter parameters long term variations under central body oblateness, solar and atmospheric drag perturbations
[AIAA PAPER 70-1055] 19 p3528 A70-38870

Gravity stabilized drag free satellites attitude instabilities due to coupling between attitude and translational motions
[AIAA PAPER 70-995] 20 p3714 A70-39535

Drag-free satellite design and propulsion requirements, noting orbit perturbation mechanisms
[AIAA PAPER 70-1145] 20 p3717 A70-40523

Monoenergetic nitrogen free molecule beam impingement on solid surface, calculating satellite drag coefficients from momentum transfer measurements
21 p3745 A70-41743

Satellite drag and lift from spatial impulsive surface interaction model
[ICAS PAPER 70-05] 23 p4132 A70-44116

Balloon satellite perturbations in orbital period involving air drag, lunar gravity and solar and terrestrial radiation pressures
24 p4414 A70-45358

Echo 1 satellite orbital acceleration correlated with solar activity, determining atmospheric density from drag observations using PERLO computer program
24 p4408 A70-45552

Balloon satellites orbital accelerations, considering effects due to air drag, solar radiation pressure and spin
24 p4409 A70-45557

SATELLITE GROUND SUPPORT

Postlaunching operations putting HEOS 1 satellite into orbit, verifying subsystem functions, starting experiments and tracking for data recovery
01 p0197 A70-11117

Telemetry tracking and command antenna array of Central German Ground Station for satellite communication
[DFVLR-SONDDR-52] 11 p2017 A70-25800

Azur satellite ground control, describing system organization to measure scientific and data information for entire satellite lifetime
13 p2384 A70-28976

Transmission power formula for satellite to ground station and slant ranges calculations
21 p3785 A70-40755

Fences and pits effectiveness for shielding satellite earth stations from local terrestrial facilities interference
21 p3789 A70-41342

SATELLITE GROUND TRACKS

Terrestrial satellites ground tracks by FORTRAN IV computer program, investigating orbital parameters effects
21 p3892 A70-41325

SATELLITE GUIDANCE

Automatic simulator for guidance system installed on cartographic satellite in circular orbit at 600 km,

discussing weightlessness and vacuum simulation devices 03 p0464 A70-13834

French guided satellite space flight simulator developed in search for suitable three axial onboard guidance systems 06 p1028 A70-17933

Civil aviation satellites for aircraft communication, navigation and traffic control, discussing technical, political and administrative problems 10 p1842 A70-24974

Satellite optimal guidance, discussing gyroscope application for stabilization and orientation control 17 p1381 A70-35691

Low thrust station keeping guidance scheme for gravity gradient stabilized 24-hour satellite, solving equations of motion for near circular equatorial orbit 18 p3289 A70-36676

Guidance and navigation system design for automatic stationkeeping one earth orbiting vehicle with respect to other [AIAA PAPER 70-1005] 20 p3667 A70-39526

Scientific satellite reentry guidance algorithms for inertial system, discussing controllability, onboard computer, gyros, accelerometers, jet actuators, terminal guidance, glide trajectory, etc 23 p4216 A70-44667

SATELLITE INSTRUMENTS

NT LASER ALTIMETERS

High power TV broadcast satellite subsystems technologies requirements, considering transmitters, power conditioners, solar arrays and component reliability [AIAA PAPER 69-1069] 01 p0194 A70-10632

Wide range pulse height discriminator with milliwatt power drain for use in nuclear experiments on scientific satellites 01 p0088 A70-10749

Radiation detectors for ionizing radiation onboard artificial satellites, considering weight and power supply constraints for ionization chamber, GM, proportional and scintillation counters, etc 01 p0093 A70-11254

Cosmos 149 meteorological satellite telephotometer, radiometer and other electronic equipment for measuring atmosphere and underlying surfaces physical parameters 01 p0095 A70-11611

Cosmos 149 meteorological satellite telephotometers for measuring reflected solar radiation from earth 01 p0095 A70-11612

Rb-75 adapted reconnaissance cameras error sources on basis of processed Echo 2 satellite photographs 02 p0294 A70-11772

Instrumentation system for nuclear experiments on scientific satellites allowing highest priority event selection during telemetry sequence and periodic change of priority order 03 p0453 A70-13024

Meteorological spaceborne IR instruments associated with NASA satellites, discussing various Tiros and Nimbus instruments 03 p0491 A70-13666

IR equipment on Tiros and Nimbus 1 and 2 satellites, describing vertical atmospheric sounding 03 p0492 A70-13833

Synchronous satellite attitude measurement during early flight and operating conditions, describing PAS satellite attitude sensor configurations 03 p0581 A70-13844

Superconducting magnetic system in magnetic analyzer of positrons and electrons in primary cosmic radiation tested on board Cosmos 213 04 p0685 A70-14443

Tradeoff methodology establishing evaluation criteria for comparing radar and laser systems to meet geodetic satellite altimeter performance requirements [AAS PAPER 69-604] 04 p0686 A70-14648

In-flight radiometric calibration of low brightness OGO 4 airglow photometer 04 p0696 A70-15645

Onboard digital data acquisition instrumentation system for scientific satellites, combining existing functional blocks to obtain different configurations and performances 05 p0818 A70-16587

Thermal and dynamic considerations of materials choice for satellite mounted telescope mirrors noting Be and silica properties 06 p1064 A70-17781

Mass spectrometer design and calibration for ionic composition measurements on ionosphere sounding satellite, noting effects of satellite velocity and attitude 06 p1065 A70-17908

French guided satellite space flight simulator developed in search for suitable three axial onboard guidance systems 06 p1028 A70-17933

Mirror material for satellite-borne telescopes, considering Be and CER-VIT or ULE silica thermal and mechanical properties 07 p1279 A70-19000

Monograph on balloon and satellite borne spark chambers for cosmic gamma radiation energy and direction determination, discussing relativistic electrons multiple scattering 07 p1368 A70-19617

Satellite-borne experiments of neutral molecular beam-solid surface interactions, describing Molsink chamber, densitometer, sphere and paddlewheel satellites 07 p1344 A70-20128

Thermistors used in temperature measurements aboard satellites, discussing results of electrical and mechanical tests 08 p1493 A70-20612

IR technology in aircraft, satellite and rocket electronics, discussing photography, scanners, search and pursuit devices, guided rockets, pilot warning devices, etc 08 p1494 A70-20687

Liquid helium cryostat for onboard satellite storing designed with allowance for overloads and vibrations during powered flight 08 p1440 A70-21220

Cosmos-261 satellite-borne scintillation electron proton spectrometers and lead shielded Geiger counter, measuring electron and proton energy spectra, pitch distributions, etc 08 p1501 A70-21799

Orbiting clock experiment for measuring gravitational red shift of earth by comparing ground based and satellite-borne hydrogen maser clocks 08 p1501 A70-21950

Satellite remote sensors for oceanographic applications, estimating resolution requirements for temperature, spatial interval, roughness patterns, wind speeds, etc [AIAA PAPER 70-306] 09 p1668 A70-22880

Orbiting satellite-borne instruments for scientific observation of earthquakes, volcanic eruptions, atmospheric phenomenon, cyclones, floods and soil erosion 09 p1763 A70-23377

ESRO 4 satellite design, listing basic requirements of experiments in terms of orbital maneuvers and sensor locations 09 p1767 A70-23700

Earth horizon signal sensors on spin stabilized satellites using micron filters for cloud signal rejection 09 p1686 A70-23757

PSK distortion spectra generated in satellite transponders by interactions of FDMA PSK modulated carriers, developing computer programs for multichannel FDMA PSK modulated systems 10 p1839 A70-24364

Satellite mounted device for detecting and recording 20-110 Mev solar neutrons 10 p1889 A70-24488

Pseudonoise phase shift keying /PN/PSK/ and frequency hopping /PN/FH/ modulation technique for low altitude satellite receiving /VHF/ transmissions [AIAA PAPER 70-496] 11 p1999 A70-25436

Nimbus high resolution IR radiometer /HRIR/ data processed by color display enhancement system, demonstrating meteorological, oceanographic and geomorphological applications 11 p2049 A70-25636

Plate measurement on comparators in satellite geodesy, discussing optics, magnification, mark selection and error elimination 11 p2051 A70-26181

Fluid sphere gyro satellite nutation sensor 11 p2057 A70-26504

Oscillating gyroscopes in satellite testing general relativity and earth gravitational field relation to stars 11 p2057 A70-26706

Microwave radiometer as passive satellite sensor for observing ocean surface properties 12 p2228 A70-26902

Intercoms 2 equipment for measurement of positive ion concentration, electron temperature and energy distribution, electron concentration between satellite and ground reception points, etc 12 p2207 A70-27500

Ionospheric probing by ground based and satellite-borne vertical incidence sounders 12 p2224 A70-27729

Elektron 2 and 4 satellites orientation based on on-board solar and magnetic sensors 12 p2314 A70-28256

Superconducting magnetic system in magnetic analyzer of positrons and electrons in primary cosmic radiation tested on board Cosmos 213 13 p2403 A70-28468

Outgassing pressure variation with time near perigee in satellite-borne pressure gages, using Langmuir model of surface adsorption 13 p2408 A70-29202

Satellite radiometry, discussing vertical soundings, instruments, onboard calibration of interferometer, high spatial resolution, etc 13 p2411 A70-29664

Reliability and environmental testing of residual magnetic field measurements of satellite HEOS-A1 electronic equipment, using Rb vapor magnetometers 13 p2380 A70-30031

Remote atmospheric temperature profile measurements, analyzing physical processes for radiation detection by earth pointing satellite-borne sensor 14 p2611 A70-31156

Ionization measurements by OV-3-6 satellite cold cathode ionization gage of Redhead inverted magnetron type in near circular polar orbit 15 p2723 A70-31660

Photometric calibration changes in EUV solar satellite instruments during orbital operation 15 p2737 A70-32045

Ionospheric probe designs and measurement errors due to perturbations by satellite carriers 15 p2731 A70-32094

Sirio satellite SHF transponder for experiments in atmospheric propagation and communication between ground stations 15 p2709 A70-32285

Low energy proton damage to silicon solar cells on INTELSAT II, F-4 and ATS-F-1, considering exposure area and radiation protection 15 p2677 A70-32419

Scientific satellites pulse height analyzer and associated threshold detection and logic circuitry 16 p2900 A70-33062

Electrostatic near wake model for ionospheric satellites, using low speed fluid dynamic blunt body similarities [AIAA PAPER 69-674] 16 p2837 A70-33867

Nimbus weather satellites mechanical devices and subsystems, including solar array drive, fluid thermal control sensors, horizon scanners and hydraulic dampers 16 p2921 A70-34105

Satellite-borne test instrument for determining mirror materials degradation due to long solar exposure 16 p2921 A70-34109

Lunar Orbiter photo subsystem mechanisms, discussing film transport, vacuum and mechanical clamps, focal plane shutter, processor-dryer and optical mechanical scan 16 p2914 A70-34146

High reliability release mechanism with mechanical redundancy on SERT 2 satellite 17 p3174 A70-34759

Satellite-borne instruments for thermal sounding of troposphere, noting information limitation due to atmospheric effects 17 p3132 A70-35338

Optimum mounting angles for direct solar radiation flux on solar battery on circular orbit satellite 18 p3215 A70-36176

Satellite use for forest fire detection in Italy, discussing forest distribution and measuring instruments 18 p3248 A70-36669

Satellite electrometer for weak DC currents due to charged particle flux 19 p3428 A70-38485

UV photometry from OAO-2, describing Wisconsin instrumentation and equipment 20 p3624 A70-39009

Michelson IR interferometer spectrometer /IRIS/ design calibration and performance onboard Nimbus 3 satellite, demonstrating data reduction and inflight calibration 20 p3626 A70-39078

Remote sensing of atmosphere with emphasis on earth orbiting operational and research satellites 21 p3785 A70-40801

Satellite-borne sensor for ionospheric ions velocity measurement, describing design and principles of operation 21 p3813 A70-40834

Electron temperature incoherent scatter radar and satellite-borne Langmuir probe measurements discrepancy 21 p3825 A70-41104

Digital orbital clock and telemetry adapter for TD1A satellite attitude stabilization, describing mechanical structure 21 p3798 A70-41272

Low noise FET amplifier for satellite magnetometer, measuring interplanetary fields 21 p3799 A70-41923

Pioneer 8 and 9 cosmic ray detector system, discussing mechanical, electrical and data conditioning properties 23 p4195 A70-44300

Soft particle spectrometer in Isis-I satellite using electrostatic deflection for differential energy spectra measurements for electrons and protons 23 p4197 A70-44468

Helios solar observation satellite equipment design study for solar plasma low energy particles onboard measurements 23 p4262 A70-44844

Atmospheric temperature profiles using Nimbus 4 selective chopper radiometer 23 p4192 A70-44865

Esro 2 satellite instrument measuring soft solar X-rays 24 p4340 A70-46358

SATELLITE LAUNCHING
U SPACECRAFT LAUNCHING

SATELLITE LIFETIME

- Long life subsystems design and testing for orbital space station programs, considering nuclear generation, electromechanical equipment, positive expulsion of fluids, instrumentation, etc
[AIAA PAPER 69-1080] 01 p1013 A70-10626
- Azur satellite ground control, describing system organization to measure scientific and data information for entire satellite lifetime
13 p2384 A70-28976
- Atmospheric density effect on satellite lifetime and position prediction, utilizing data from Cannon Ball and SPADES low altitude density research satellites
14 p2653 A70-30562
- Artificial satellite around Venus, investigating orbital lifetime based on atmospheric drag effect on periapsis height
14 p2637 A70-30563
- Nonrecoverable Cosmos satellites lifetimes comparison with last stage rockets
14 p2638 A70-30690
- Ten year NASA manned space station in low earth orbit, grouping experiments in functional program elements/FPE/
[AAS PAPER 70-033] 17 p3156 A70-34802
- Practical stability of highly eccentric orbits quasi-normal to ecliptic, discussing lunar effects on orbital lifetime
23 p4243 A70-44510

SATELLITE MANEUVERS

U SPACECRAFT MANEUVERS

SATELLITE NAVIGATION SYSTEMS

- Satellite navigation efficiency compared with inertial and Omega navigation techniques
01 p0139 A70-11263
- Algorithm for solving autonomous artificial satellite orbital elements, using successive approximations
01 p0139 A70-11503
- User problems in navigation methods, discussing Omega method, Navy Navigation Satellite System and VLF methods
03 p0522 A70-13603
- Operational requirements of shipping for satellite communication systems, discussing distress cases, satellite navigation systems, information distribution traffic control, etc
03 p0522 A70-13605
- Navy Shipboard Navigation Satellite System for worldwide all-weather navigation system, discussing shipboard system, receiver, stable oscillator and antenna
03 p0522 A70-13609
- Satellite potential for long range air traffic control, discussing airline navigation requirements and ATC requirements for position determination
09 p1722 A70-23027
- Navy Navigation Satellite System program development and present status, discussing satellite design and system accuracy-geodesy connection
09 p1723 A70-23039
- Aeronautical satellite system for North Atlantic air traffic position monitoring, discussing simultaneous position display
09 p1723 A70-23040
- SPOT navigation satellite system for near instantaneous fixes or continuous tracks providing height, velocity and automatic guidance and control signals
09 p1723 A70-23041
- Navigation satellite system with 10-meter accuracy, continuous coverage, rapid position determination, simultaneous service and interference immunity achieved by synchronous satellites
09 p1723 A70-23042
- Hyperbolic position finding with synchronous satellites having frequency conversion unit for operations at higher frequency satellite signals
09 p1724 A70-23044
- Error sensitivity to measurement uncertainties and satellite geometry of satellite linked hyperbolic navigation systems
09 p1724 A70-23046
- Navigation-traffic control satellite system application to transoceanic traffic surveillance
[AIAA PAPER 70-487] 11 p2000 A70-25462
- VHF aeronautical communication satellites extended for use in aircraft position determination and surveillance, discussing accuracy and error source reduction
[AIAA PAPER 70-490] 11 p2002 A70-25487
- Satellite navigation method for locating Mars landmark or target point for exploration by roving vehicle located as center of coordinate system
11 p2080 A70-26213
- Low altitude satellite system for aircraft navigation, considering cost factors, military applications, traffic control capabilities, etc
12 p2270 A70-27922
- Midaltitude satellite system for continuous three dimensional navigation, considering elevation angles, constellations and orbits
12 p2270 A70-27923
- Satellite system for air traffic control providing data links for aircraft position determination for U.S. in 1990s using 24-hour inclined elliptical orbits
12 p2270 A70-27926

Hard wired modular multipurpose global navigation system using cluster noncoplanar synchronous satellites
13 p2446 A70-28385

Aircraft/ship navigation system using three synchronous satellites positioned over equator for Pacific applications
17 p3134 A70-35302

Application satellites, discussing uses in communications, meteorology, earth survey and navigation
18 p3333 A70-36348

Optimum altitudes for passive ranging satellite navigation systems, using electronic clocks in satellite and navigator receiver
21 p3883 A70-40724

Dioscures project for ATC over Atlantic Ocean, describing distance measurement by simultaneous use of two geostationary satellites
21 p3848 A70-41258

Air traffic safety problems, discussing satellite radiobeacons applications to aerial navigation
22 p4066 A70-42652

Dioscures satellite navigation system for aircraft and ships, discussing coverage, radio links, project costs, etc
22 p4067 A70-42657

Nautical loci of constant azimuth of artificial satellite at corridor height in circular orbit at arbitrary inclination, using gyroscope and radio sextant
22 p4068 A70-42664

SATELLITE NETWORKS

- TV broadcast satellite system operating with home receivers or special receivers, evaluating technological and cost factors
[AIAA PAPER 68-1061] 01 p0044 A70-10831
- Satellite international system chain consisting of down path, receiving earth station and domestic receiver for Europe, North Africa and Middle East TV distribution
02 p0258 A70-12420
- Aeronautical satellite system for civil flight safety, discussing operational, technical and economic aspects
03 p0522 A70-13610
- Global and European geodetic satellite network, discussing San Marco equatorial satellite and observation stations
03 p0581 A70-13829
- Channels demand assignment between earth terminals of international satellite communication systems, examining multiple access problems
03 p0453 A70-14323
- Meghdoot program for satellite network communications technology applications to national goals in India
04 p0757 A70-15670
- Satellite communications influence on ground stations design, describing steerable antenna and receive and transmit configurations for domestic station
05 p0811 A70-16095
- Four satellite cluster laboratory in near-earth environment to investigate solar-terrestrial relationships, emphasizing interaction of solar wind and magnetosphere
07 p1387 A70-19711
- Digital record message communication satellite network system involving synchronous satellites and small earth terminals
10 p1834 A70-24327
- Worldwide telephone network optimum interoperation including communication satellites complementation
10 p1834 A70-24328
- Satellite communication system using delta modulation for telephone service to large number single channel earth stations
10 p1834 A70-24329
- PCM-TDMA satellite communication system for maximum time slot utility without guard time slots
10 p1834 A70-24330
- Multichannel PCM/TDMA INTELSAT network with time preassignment and time assignment speech interpolation features for field test
10 p1835 A70-24332
- Message traffic problems in satellite telephone network, considering traffic distribution characteristics, interarrival mean time, bidirectional traffic, etc
10 p1839 A70-24367
- Satellite relayed integrated digital multiple access systems, discussing traffic handling, satellite positioning, demand assignment, etc
10 p1839 A70-24369
- Satellite system applicability to earth resources data collection from in situ sensors, discussing synoptic, local time, emergency and demand data collection
10 p1840 A70-24371
- Numerical weather forecasting for several weeks based on global meteorological satellite network observation
10 p1913 A70-25241
- Communication satellites geostationary orbit sharing problem, considering system design and utilization criteria
[AIAA PAPER 70-441] 11 p1998 A70-25419

Orbit utilization, discussing sharing of satellite communication frequency bands and use of multiple earthward antenna beams
[AIAA PAPER 70-468] 11 p1999 A70-25428

Satellite stationkeeping by ground command, self contained or combined methods compared for networks of synchronous satellites
[AIAA PAPER 70-479] 11 p2121 A70-25463

Instructional communication system for U.S. using synchronous satellites over 15 regions
[AIAA PAPER 70-450] 11 p2000 A70-25465

Global commercial communications satellite system arrangements, considering evolutionary political, economic and technological developments within IN-TELSAT context
[AIAA PAPER 70-446] 11 p2152 A70-25478

Communications satellite systems for developing nations, considering educational TV, economic growth, cost estimates, etc
[AIAA PAPER 70-475] 11 p2152 A70-25479

TATS Master tactical communication satellite network controller with modems and digital computer for semiautomatic control over terminals
[AIAA PAPER 70-412] 11 p2002 A70-25491

Symphonic satellite telecommunication network for multiple access telephone, telegraph, data transmission, radio and TV dissemination
11 p2005 A70-26008

Satellite communication systems optimal utilization achievable through supervisory control system
11 p2009 A70-26261

Earth resources satellite systems synthesis, describing analytical techniques in R and D preceding operational status
12 p2334 A70-26942

Multipurpose domestic satellite system design for TV distribution, discussing frequency sharing, synchronous orbit and system model
12 p2183 A70-26998

Air traffic control surveillance and data system using synchronous satellites in inclined elliptical orbits for communications and aircraft position determination
12 p2268 A70-27644

North Atlantic air traffic control system using aeronautical satellites, discussing flight levels, surveillance and positioning, terminals, etc
12 p2268 A70-27645

Navigation systems using 24-hour orbit satellites, discussing system concept options for U.S., Western Hemisphere and global coverage
12 p2270 A70-27924

Multiple user satellite system for air navigation and traffic control, presenting comparative error analyses for position determination by spherical and hyperbolic ranging
12 p2270 A70-27925

Hard wired modular multipurpose global navigation system using cluster noncoplanar synchronous satellites
13 p2446 A70-28385

Cost optimal carrier rocket system for European satellite TV, communication, navigation and earth survey networks
13 p2502 A70-28448

Geostationary tracking and data relay satellites /tdrs/, discussing system design and advantages
14 p2615 A70-31182

Trojan Relay system with satellites preceding and following earth in solar orbit ensuring radio communication throughout solar system
15 p2698 A70-32061

GaAs injection lasers for optical communication, synthesizing high bit rate data link between synchronous relay satellites
16 p2865 A70-33710

Multiple access discrete address system for satellite networks
16 p2865 A70-33729

Satellite broadcasting frequency resources, discussing interference, frequency sharing, antenna transmitting and receiving patterns, etc
17 p3046 A70-35271

Legal problems of space telecommunications, discussing world juridical regime, United Nations work and satellite systems broadcasting
17 p3201 A70-35777

Legal aspects of telecommunications by satellite systems, discussing international organization, Intelsat integration and direct broadcasting
17 p3202 A70-35781

Worldwide communication satellite network cost optimization and application, discussing Intelsat role
18 p3228 A70-36510

Small earth stations to link isolated areas with Intelsat network, discussing costs
18 p3229 A70-36957

Soviet communication satellites orbit and design characteristics, operational uses and ground stations, discussing Molniya 1 series transmitting television, multichannel radio, telephone and telegraphy
18 p3230 A70-37225

U.S. nationwide satellite network for multichannel community antenna TV /CATV/ operated at 12 GHz band
19 p3382 A70-38891

Telecommunication, ATC and navigation satellite systems, examining economic bases for aeronautical and maritime space systems
20 p3740 A70-39407

Communication satellites systems for civil application, considering ground stations design, regional communication, ATC and maritime communications and navigation
20 p3585 A70-39409

Satellite-based air traffic control system for North Atlantic, applying stochastic optimal control theory [ALAA PAPER 70-966]
20 p3669 A70-39563

SKYNET PCM telemetry and command station, discussing system design, pseudomonopulse feed, command and computer subsystems, etc
20 p3589 A70-40322

Satellite networks queueing analysis, examining graph-theoretic model based on stochastic inputs and time delay factors
20 p3589 A70-40338

Global integrated communications satellite system, discussing International Telecommunication Union regulatory functions, etc
21 p3955 A70-40625

Monograph on communicating by satellite covering INTELSAT system design, pricing, procurement, broadcasting, international community responsibilities, etc
21 p3955 A70-40739

Aeronautical satellite system for civil flight safety, discussing operational, technical and economic aspects
21 p3848 A70-41131

Multiple access communication satellite systems providing reliable speech communication for low density use in remote areas [JPL-TR-32-1501]
21 p3791 A70-41368

Italian Sirio satellite with local and foreign ground stations network measuring SHF wave propagation variables
23 p4158 A70-43753

Global rescue alarm net /GRAN/ using satellites for relaying distress signals, eliminating current line of sight restrictions
23 p4143 A70-44455

Worldwide common satellite network for sea and air navigation, discussing cost estimate and economics
23 p4216 A70-44608

Tracking and data relay satellite system in low altitude synchronous orbit [ALAA PAPER 70-1305]
24 p4311 A70-45085

Commercial satellite system circuit quality and reliability in digital communications, considering Automatic Digital Network Trans-Pac cable cut incident
24 p4311 A70-45223

Tracking and data relay satellite system performance by ATS and Nimbus spacecraft for range and range rate tracking and command and data transmission [ALAA PAPER 70-1306]
24 p4374 A70-45949

SATELLITE OBSERVATION

Solar X ray flare regions size, structure and localization from Cosmos 166 and 230 heliograph observations
01 p0168 A70-10252

Spatial characteristics of magnetosheath magnetic field observed simultaneously by Explorer satellites, showing zero order agreement with prediction of MGD theory
01 p0071 A70-10410

Micrometeoroid experiments on OGO 2 and OGO 4 satellites, measuring velocity, masses and particle orbits in earth dust cloud
01 p0086 A70-10444

Earth gravity field intensity variations measured by orbiting two geometrically identical satellites, discussing sensitivity and cost
01 p0087 A70-10445

Alpha particle emissivity measurement of moon by Explorer 35 spacecraft for U 238 abundance in outer crust
01 p0181 A70-10573

Radio star and satellite scintillation observation, considering diurnal, seasonal and latitude variations and relationship to magnetic and solar activity
01 p0181 A70-10590

Rocket and satellite studies of geomagnetic field during IQSY, confirming ionospheric currents responsible for magnetic diurnal variations
01 p0075 A70-10596

Earth resources satellites use in agriculture, considering materials reflectance and emittance, electromagnetic spectrum wavelengths identification and data accuracy standards [ALAA PAPER 69-1083]
01 p0220 A70-10624

Cosmic dust particle direction, velocity and mass from ionization and momentum measurements by dust sensor during impact on Pioneer 8 satellite
01 p0088 A70-10748

Venus atmosphere ionization distribution, temperature and pressure profiles determined from amplitudes

and differential Doppler of radio signals to Mariner 5 during occultation
01 p0186 A70-11084

Satellite observations of semiannual density variations in upper atmosphere
01 p0077 A70-11205

Ionosphere total electron content diurnal and seasonal variations at midlatitudes, based on data analysis from Explorer 22 in polar orbit
01 p0080 A70-11223

Reflected solar energy measurements by ATS satellites applied to meteorological research, emphasizing high areal resolution and dynamic range of cameras
01 p0094 A70-11297

Elektron 4 satellite radio emission data transmitted from July to December 1964, noting month-to-month variations in mean radiation level
01 p0172 A70-11496

Venusian atmospheric pressure and temperature measurements by Venera 4 probe, noting agreement with Mariner 5 observations
01 p0192 A70-11505

Greenhouse effect in Venusian atmosphere, discussing cause of vertical temperature distribution established by Venera 4 probe
01 p0192 A70-11506

Venus atmosphere optical properties on basis of Venera 4 data, proposing models for measured rotational temperature and subcloud atmosphere radiative equilibrium
01 p0192 A70-11507

Fast charged particles measurements by Cerenkov counter in Cosmos 137 satellite, noting hard electron flux and cosmic ray radiation spectrum
01 p0172 A70-11509

High latitude capture region boundary for electrons in upper radiation belt determined relative to current electrojets in ionosphere from satellite observations
01 p0172 A70-11516

Excess radiation in equatorial regions studied on-board Cosmos 137, noting contribution of primary particle multiplication to secondary radiation
01 p0192 A70-11542

Collection of articles on satellite observations, Number 8
02 p0361 A70-11751

Satellite triangulations scale and orientation control, describing terrestrial methods of geodetic bases determination
02 p0254 A70-11755

Doppler observations of D1 A satellite, discussing dispersion of data, mean point displacement and resonance harmonics
02 p0362 A70-11756

Receiving station geodetic coordinates computed from Doppler curves of artificial satellite, using method of differential corrections
02 p0254 A70-11757

Ground station geocentric coordinates from intersection of spatial directions in Baker- Nunn network determined by satellites
02 p0254 A70-11758

Solar activity indices and upper atmospheric density interrelationship from Explorer 1 satellite observations, showing statistical variations
02 p0356 A70-11762

Orbital period determination for satellite from single station visual observations, assuming known orbit inclination, ascending node length and node precession
02 p0254 A70-11765

Air density variations calculated by visual satellite observations processing, comparing results of INTEROBS and average anomalies methods
02 p0288 A70-11766

Cosmos 44 quasi-draconic period analytical and graphical determination, comparing moments of meridian intersection with INTEROBS observations
02 p0363 A70-11767

Satellite rotation periods determination accuracy from photometric observation data improved by determining initial and terminal moments of maximum brightness
02 p0255 A70-11769

Azimuth between two stations of triangulation net determined by simultaneous observation of two satellites, discussing mathematical principles and applications in Europe
02 p0289 A70-11797

Pioneer 6 radio signal spectrograms during solar occultation, noting solar event effects on bandwidth
02 p0369 A70-12060

Solar mean magnetic field relation to sector structure of interplanetary magnetic field, discussing Explorer 33 and 35 observations
02 p0371 A70-12206

Satellite measurement of mean temperature in atmospheric layers to determine vertical temperature distribution
02 p0291 A70-12279

Nimbus 3 satellite observations of near UV solar flux intensity and variability, describing instrumentation and measurement of radiation producing molecular oxygen photodissociation
02 p0291 A70-12295

Solar activity effect on ionospheric total electron content via Explorer 22 observations, discussing relationship to solar elevation angle
02 p0292 A70-12561

Ionospheric electron density vertical distribution calculation starting from satellite measurements of total electron content
02 p0293 A70-12575

UV photometry from OAO, observing planets, gaseous nebulae, X ray source, quasars, Crab Nebula, extragalactic nebulae, etc
02 p0303 A70-12705

Faraday rotation observations on Explorer 22 signals at two receiving stations, discussing comparative evaluation procedures and results
03 p0472 A70-12874

Quiet time primary cosmic ray electron flux and energy spectrum from 10 to 200 Mev in interplanetary space observed by OGO 5 satellite
03 p0553 A70-12902

High energy primary cosmic ray and proton spectra measurements from Proton satellites
03 p0555 A70-13036

Geodetic treatment of satellite observation - Conference, Tashkent, Uzbek SSR, November 1968
03 p0444 A70-13182

Earth satellites optical observations accuracy for geodetic purposes based on errors in station position determinations
03 p0445 A70-13183

Simultaneous ground and space triangulation procedures, recommending use of satellite photographic observations for error reduction
03 p0445 A70-13185

Satellite observations for determining earth shape and gravitational field zonal harmonics, using dynamic methods
03 p0473 A70-13188

Earth potential errors from gravity and satellite motion measurements, discussing sectoral, tesseral and zonal harmonics with large and small second indices
03 p0473 A70-13190

Space triangulation net using direction and distance measurements from satellite photographic and Doppler observations, including tracking data leveling
03 p0446 A70-13194

Undiscovered satellites of solar system major planets, predicting Jupiter satellites
03 p0569 A70-13360

Solar wind discontinuity surfaces observed by spacecraft magnetometers determined from measured time delays and solar wind speed
03 p0558 A70-13600

ESSA system operation, describing applications of satellite meteorological data
03 p0454 A70-13667

Ruby laser experiment in illuminating satellites equipped with retroreflectors to determine satellite position in space from range and photographic data
03 p0450 A70-13674

Satellite observations used to construct coordinate system referred to earth center of mass and axis of rotation
03 p0474 A70-13733

Azur satellite launching project by NASA and Germany, describing orbit for investigating earth inner radiation belt, auroral zone and solar flares
03 p0580 A70-13797

Libration clouds reality possibility from satellite dust counting experiments
03 p0572 A70-13819

Earth exploration and service by satellites - Conference, Rome, March 1969
03 p0572 A70-13826

Global satellite VLF propagation system for investigating mesospheric ionization
03 p0475 A70-13827

Equatorial ionosphere ionization and electron density measurements by San Marco 2 satellite
03 p0475 A70-13830

Geomagnetic tail observations by Pioneer 8 probe
03 p0475 A70-13851

Satellite measurement of auroral particles and particles trapped in Van Allen belts
03 p0559 A70-13852

Electron temperature and density data obtained during Alouette satellite passage over middle latitude red arc, noting influence of intersecting magnetic field lines
03 p0476 A70-13911

Interplanetary magnetic field measurements from Mariner and OGO satellites at various paths, regions and intervals, finding dominant polarity effect dependent on sun latitude
03 p0575 A70-13980

Geomagnetic tail observations by Pioneer 8 at 500 earth radii, analyzing time-averaged magnetic field data
03 p0575 A70-13983

Ionogram conjugate echoes observed at Singapore longitudes by Alouette 2 topside sounder, attributing sequential occurrence to field-aligned irregularities in magnetosphere
03 p0477 A70-13986

Poynting flux direction for proton whistlers determined from Injun 5 observations, obtaining data on source region and propagation in ionosphere
03 p0477 A70-13987

Explorer observations of large temporal variations of midlatitude outer zone energetic electron intensities interpreted as redistribution during geomagnetic disturbances
03 p0560 A70-13989

Interplanetary magnetic field during solar cycle rise and minimum based on Explorer 33 magnetometer measurements
03 p0575 A70-13999

Nimbus 3 satellite carrying IR spectrometer to measure spectral radiances and retrieve atmospheric temperature profiles
04 p0675 A70-14393

Low energy solar proton flux propagation model in interplanetary medium based on satellite data beyond earth magnetosphere
04 p0737 A70-14434

Magnetograms by Venera 4 and Mariner 5 compared to determine interplanetary magnetic field nature in Venus proximity
04 p0744 A70-14438

Three dimensional characteristic of light scattered by lunar surface determined for various incidence angles and azimuths from Zond 3 photometric measurements
04 p0744 A70-14441

Magnetospheric magnetic field disturbance due to abrupt solar wind parameters change, using Explorer 26 data
04 p0738 A70-14444

IMP F solid state detector data on 13 day solar proton event at low energy, considering cosmic rays anisotropy and interplanetary magnetic field
04 p0738 A70-14512

Interplanetary dust measurements near earth compared to theories predicting dust characteristics, discussing concentration, flux, impact rate and solar radiation pressure
04 p0749 A70-14619

Satellite observation of energetic particles and magnetic fields, discussing radiation belts, magnetosphere, galactic cosmic rays, etc
04 p0740 A70-14620

Satellite surveillance in cloud and weather modification, considering area selection for cloud seeding, atmospheric energy redistribution, etc
[AAS PAPER 69-621] 04 p0677 A70-14645

Earth photographs for geotectonic research from manned orbiting spacecraft, describing Apollo and Gemini belts
[AAS PAPER 69-579] 04 p0677 A70-14663

Satellite orbit and attitude determination and planetary gravity and astronomical constants from earth-based radar Doppler and orbital photogrammetric observations
04 p0750 A70-14938

Explorer 31 Langmuir probe data for electron temperature at conjugate point, tracing magnetic field line passing through spacecraft to earth
04 p0000 A70-14971

Ionosphere beacon satellites BeB and BeC transmits for field alignment of small ionospheric irregularities
04 p0678 A70-14975

Lyman alpha auroral emissions observations made with narrow band sky scanning photometer mounted on earth-oriented polar orbiting satellite
04 p0741 A70-15107

Daytime midlatitude ionosphere composition and electron concentration profile measured by synchronized satellites and rocket, investigating discrepancy
04 p0741 A70-15110

Alouette 2 Langmuir probe measurements analyzed for size and amplitude of electron concentration fine structure irregularities in topside ionosphere, discussing F spread
04 p0679 A70-15111

Magnetospheric observations of whistler mode emissions byOGO 1 satellite over VLF and LF ranges
04 p0649 A70-15117

Atmospheric density measurements from Explorer 17 satellite by density gage and drag techniques resolved for difference by calibration and systematic errors considerations
04 p0691 A70-15120

Interplanetary magnetic field fluctuations stimulated by lunar wake, using Explorer 35 satellite measurements
04 p0753 A70-15122

Solar Lyman-alpha radiation observed byOGO 4 spacecraft showing short term fluctuations superposed with monthly variation
04 p0741 A70-15128

Satellite multispectral photometry data in airglow bands correlated with cloud characteristics and surface albedo variations
04 p0715 A70-15522

Radio wave-ionosphere interaction effects on accuracy of radio astronomical observations from earth satellites
04 p0683 A70-15740

Ionospheric air density profiles revision based on satellite orbits analysis
05 p0839 A70-16287

Ionospheric electron content, virtual height and profile measured by Faraday effect of satellite radio emissions compared with radar soundings
05 p0839 A70-16288

Upper ionospheric electron density variations at low magnetic activity times observed with Alouette 2 satellite
05 p0901 A70-16307

Weighting coefficient matrix parameters for European satellite triangulation determined, considering sequence of separate points shown by photographs instead of single point
05 p0839 A70-16345

Computerized method for processing photographic earth satellite observation results, transforming coordinates by nonconformal approximation of polynomial function
05 p0814 A70-16367

Lyman alpha flux observed by satellite-borne ion chambers during solar flare of 20 March 1966
05 p0902 A70-16442

North American datum related to geocentric satellite reference system, using Lambeck method for geodetic parameters
05 p0841 A70-16644

Tangential solar wind discontinuity observed by Vela 2A satellite, producing ground magnetic disturbances conjunctively with magnetospheric, ground and ionospheric currents
05 p0903 A70-16727

Night airglow variations observed during Cosmos satellite orbits, determining atmospheric albedo wavelength dependence for solid and medium cloudiness and clear skies
05 p0841 A70-16728

Error correction for correlation coefficient between satellite data of earth radiation intensity and satellite vision field shift
05 p0841 A70-16729

Magnetic storm /14 September 1966/ observation by Explorer 33 in geomagnetic tail and by polar stations, studying relation in magnetosphere and on earth
05 p0843 A70-16764

Sporadic electron flux contribution to high latitude geomagnetic disturbances at outer radiation belt boundary estimated from Elektron 1 and 2 observations
05 p0843 A70-16765

Lunar structure and evolution based on satellite measurements of mass distribution, radius moments of inertia, gravity anomalies and topographic irregularities
05 p0920 A70-16945

Satellite IR measurements of surface horizontal temperature structure of Gulf Stream compared with ship and aircraft data
05 p0844 A70-17104

Neutron flux measurements on Cosmos 53, equipment and calculation of secondary neutrons due to bombardment of satellite components
05 p0905 A70-17112

Geostationary mode application to earth sensing, examining resolution requirements for earth scanning tracking telescope
06 p1154 A70-17152

Earth resources observation satellite /EROS/ program, discussing geologic terrain and land-use planning maps
[SPE PAPER 2703] 06 p1053 A70-17155

Satellite determination of underlying surface temperature by IR spectroscopy, measuring emitted radiation in atmospheric windows
06 p1061 A70-17205

Atmospheric circulation in tropics using weather satellite data
06 p1095 A70-17220

Radiation dose measurements from satellite and space probe experiments, considering radiation and shielding characteristics, sensor orientation effects, etc
06 p0990 A70-17266

Space radiation doses in inner Van Allen belt, comparing calculated and satellite measured rates
06 p0991 A70-17272

Earth resources and meteorological data collection from in situ sensors via satellite, discussing system considerations
06 p1006 A70-17343

Ionospheric resonances observed by swept frequency Alouette topside sounders, discussing plasma non-linearity
06 p1115 A70-17362

Satellite observations of VLF and ELF resonances related to ionospheric plasma singularities
06 p1118 A70-17375

Low altitude electric and magnetic measurements of plasma waves in space from OV3-3, Pioneer 8 andOGO 5 satellite observations
06 p1118 A70-17376

Simultaneity circle for calculating spatial direction of straight line joining satellite observation stations, noting time factor role
06 p1139 A70-17548

Spatial direction Riga-Cairo determined using simultaneous photographic observations of Pageos A satellite
06 p1054 A70-17550

Thermal sounding of atmosphere from satellites under cloudy conditions, plotting temperature profiles
06 p1097 A70-17787

Vertical air density profile from satellite measurements of atmospheric oxygen radio emission at 40-70 km altitudes
06 p1056 A70-17788

Radiation scattering during upper cloud altitude determination by satellite
06 p1097 A70-17790

Proton satellites measurements reconciliation with diurnal stellar variation data and cosmic rays origin models
06 p1135 A70-17885

Nighttime F 2 region temperature distribution under geomagnetically calm and disturbed conditions calculated from Alouette 1 satellite data
06 p1057 A70-17887

Solar X-ray flux from Explorer 33 and 35 observations, presenting catalog of tabular and graphical data
06 p1135 A70-18006

Atmospheric difficulties in earth surface remote sensing by satellites, describing absorption, emission and scattering as wavelength functions
[ALAA PAPER 70-193] 06 p1057 A70-18083

Passive microwave observation from space of sea surface degraded by atmosphere
[ALAA PAPER 70-197] 06 p1010 A70-18087

Atmospheric effects on passive microwave sensing in EHF region under all-weather conditions on global scale using satellites
[ALAA PAPER 70-198] 06 p1010 A70-18099

Ion and electron density, electron temperature and space potential measured in ion wake formed by Gemini spacecraft using sensors on Agena Target Vehicle
06 p1066 A70-18285

Surface-particle interaction and atmospheric parameters measurements by paddlewheel satellites, discussing angular distribution of re-emitted molecules and accommodation coefficients
06 p1067 A70-18287

Solar wind interaction with moon derived for model and compared with satellite data
06 p1147 A70-18291

Electric field in earth magnetotail via Explorer 33 and 35 satellite observation of solar electrons above 50 keV energy
06 p1058 A70-18528

Local time dependence of geomagnetic cut-offs for solar protons in 0.52-4.0 MeV range from satellite observations
06 p1136 A70-18529

Magnetic activity effect on magnetospheric plasmopause position, measuring ion concentrations as function of local time fromOGO 5 observations
06 p1058 A70-18530

Satellite observations of equatorial erosion and defocusing of VLF waves propagating at low magnetic latitudes
06 p1058 A70-18532

VLF noise phenomena observed with satellite electric dipole antennas compared with lower hybrid resonance frequency of ionospheric medium in vicinity
06 p1011 A70-18534

Plasmopause observations by ion spectrometer aboardOGO-5 vehicle for early orbits, obtaining O, He and H ion concentration profiles for geomagnetic parameter
06 p1059 A70-18546

Tornado producing thunderstorms, using conventional surface and upper air data combined with ATS-III data, discussing mesoscale disturbances and momentum exchange
06 p1102 A70-18583

Satellite observed characteristics of severe local storms in central and eastern U.S., noting potential use for storm forecasting
06 p1102 A70-18584

Data reduction from D1A satellite VHF and UHF Doppler measurements to attempt geodetic link between Nice and Beirut
07 p1262 A70-18941

Book on space observatories covering rocket mounted telescopes for atmospheric structure, opaque wall, air diffusion, clouds and refraction, particle bombardment, meteorite melting, etc
07 p1379 A70-19099

Monograph on OAO design, experiments, testing, mission operations and history
07 p1393 A70-19100

Outer ionosphere magnetoionic and MHD waves, combining electromagnetic and plasma kinetic theory with reference to satellite observations
07 p1264 A70-19188

Solar proton flares radiometric measurement onboard Molniya 1 satellite, detecting intensities in outer regions of magnetosphere
07 p1366 A70-19428

- Mariner 4 and 5 and Venera 4 data used for comparing terrestrial planets ionospheres 07 p1386 A70-19488
- Charged particles and He nuclei spatial distribution from recordings in cosmic ray equator region by Cerenkov counter mounted on Proton 2 satellite 07 p1367 A70-19490
- Micrometeor flux in near-earth space measured by satellite-borne low noise acoustic detectors 07 p1386 A70-19493
- Upper atmospheric horizontal sounding, discussing satellites uses in atmospheric structure studies 07 p1268 A70-19630
- Harmonic ion cyclotron resonances associated with proton whistlers observed from OGO-4 satellite VLF recordings 07 p1268 A70-19630
- Atmospheric integral moisture content determination from thermal radio emission measurements by Cosmos 243 satellite 07 p1329 A70-19649
- Four satellite cluster laboratory in near-earth environment to investigate solar-terrestrial relationships, emphasizing interaction of solar wind and magnetosphere 07 p1387 A70-19711
- Topside ionosphere morphology during IQSY, emphasizing plasma scale height diurnal and latitudinal variations role in satellite data interpretation 07 p1270 A70-20073
- Magnetospheric plasmopause-high latitude electron density trough relations using satellite topside ionograms, noting local time and magnetic disturbance effects 07 p1270 A70-20074
- Highly variable component protons and alpha particles identified in low energy cosmic rays by IMP 4 07 p1369 A70-20199
- Solar soft X ray spectrum analyzed by OSO 4 proportional counter, discussing slowly varying component, corona active regions and impulsive event characteristics 07 p1369 A70-20289
- Ionospheric data of local and integral electron concentration obtained by measuring phase shift of satellite emitted coherent radio waves 07 p1276 A70-20422
- Cold plasma approximation of whistler excitation of lower hybrid resonance at wake of body moving through ionosphere, comparing results with Alouette satellite observations 07 p1276 A70-20425
- Electron and proton precipitation measurements in auroral zone by soft particle spectrometer in ISIS-1 satellite 08 p1560 A70-20501
- Interkosmos-1 satellite for studying solar radiation and effects on ionization and molecular dissociation in atmosphere, weather and radio signals reception 08 p1582 A70-20714
- Satellites for meteorological and geographical studies using information from TV and IR pictures 08 p1487 A70-20716
- Space research in terms of earth environment in space, discussing near-earth spacecraft role in solar, magnetospheric and ionospheric studies 08 p1488 A70-21344
- Solar proton flux increases associated with sudden commencements observed by geostationary ATS-1 satellite 08 p1562 A70-21378
- Magnetic field measurements in geomagnetic tail from Explorers 33 and 35 indicating depressed field region centered on neutral sheet 08 p1488 A70-21379
- Magnetic equator ELF noise examined with OGO 3 magnetometer, indicating unique signals in plasmasphere 08 p1488 A70-21380
- Quasi-trapped electrons precipitating at high latitudes measured from low altitude polar orbiting satellite 08 p1562 A70-21382
- Electron wake measurements on Explorer 8 and 31 and Ariel 1, discussing order of magnitude discrepancy 08 p1497 A70-21392
- Optimal atmospheric transmittance windows for underlying surface and cloud temperature determination from satellites 08 p1538 A70-21426
- Critique of blue haze negative hypothesis in preliminary Mariner 6 data report 08 p1578 A70-21556
- Statistical correlation between polar magnetic disturbances and magnetospheric energetic electron flux increase from IMP-1 satellite observations 08 p1491 A70-21714
- Geoeffective low energy particles and fresh photoelectrons interactions with upper atmosphere observed by satellite Cosmos 261 08 p1492 A70-21796
- Auroral electrons and photoelectrons spatial, energy and angular distributions measurements using low energy electron spectrometer onboard satellite Cosmos-261 08 p1500 A70-21797
- Low energy ion spectrum and spatial distribution measurements in auroral zones by Cosmos-261 satellite spectrometer 08 p1492 A70-21798
- Abstracts with references to literature sources on oceanography from space and aircraft 09 p1665 A70-22014
- Vertical water vapor profile in strato-, meso- and thermospheres measured in rocket and satellite experiments by mass spectroscopy, spectral analysis and thermal sensometry 09 p1666 A70-22187
- TIROS, Nimbus, ESSA and ATS weather satellites configurations, onboard equipment and cloud photographs 09 p1765 A70-22227
- Energy distribution of solar wind alpha particles in magnetosheath observed by Heos A satellite 09 p1744 A70-22305
- Moon gravity field model derived from long-arc analysis of Lunar Orbiters tracking data, considering lunar mass distribution role 09 p1752 A70-22309
- Spaceborne long wavelength radio astronomy, proposing lunar orbit and beyond Pluto observatories to reduce magnetospheric and interplanetary plasma effects 09 p1754 A70-22495
- Position determination from simultaneous observation of Pagesos and Geos 2 satellites, assuming known covariance matrix and applied corrections 09 p1754 A70-22499
- Solar wind heating, determining roles of various energy sources from Explorer 34 observations 09 p1755 A70-22511
- Ionospheric electron content and distribution determination from Explorer 22 satellite signal amplitude recordings, considering wave propagation and polarization and Faraday effect 09 p1633 A70-22530
- Atmospheric density in thermosphere observed by satellites, noting daily and semiannual variations related to solar and geomagnetic activities 09 p1667 A70-22626
- Solar equatorial XUV limb brightening for resonance lines of Li-like ions from OSO-4 observations interpreted by coronal model 09 p1757 A70-22732
- Solar low energy X ray bursts using data from OSO-4 proportional counter spectrometer 09 p1745 A70-22739
- Earth resources data transmission, describing picture reception and reproduction equipment [AIAA PAPER 70-328] 09 p1634 A70-22856
- Communications satellite technology for earth resources data collection 09 p1634 A70-22857
- Earth resources data exploitation, describing potential organizational structures for data handling and various political, economic and technological problems [AIAA PAPER 70-344] 09 p1793 A70-22859
- Earth resources observation satellite /EROS/ program, describing remote sensor data acquisition, processing, dissemination and utilization [AIAA PAPER 70-332] 09 p1667 A70-22861
- International legal and political aspects of earth resource surveying by satellite remote sensors, considering U.S. policy [AIAA PAPER 70-331] 09 p1793 A70-22862
- Microwave radiometric techniques for continuous all-weather remote sensing of sea conditions from satellites, discussing foam and surface ripple effects [AIAA PAPER 70-318] 09 p1677 A70-22869
- Synthetic aperture radar in earth resource monitoring by satellite, determining topography and surface nature from spatial patterns 09 p1635 A70-22872
- Satellite monitoring of air pollution, discussing sulfur dioxide measurement in UV, optical correlation techniques, IR and visible spectra, stratospheric balloon tests, etc [AIAA PAPER 70-305] 09 p1668 A70-22875
- Oceanic wind and wave predictions by satellite radar radiometer using single receiver to determine wind velocity [AIAA PAPER 70-310] 09 p1668 A70-22877
- Satellite remote sensors for oceanographic applications, estimating resolution requirements for temperature, spatial interval, roughness patterns, wind speeds, etc [AIAA PAPER 70-306] 09 p1668 A70-22880
- ERTS satellite role in resource policy, management and remote sensing [AIAA PAPER 70-304] 09 p1668 A70-22881
- Satellite high resolution IR imagery for arctic sea ice mapping, describing sensor design and day and nighttime operation in film-strip format [AIAA PAPER 70-301] 09 p1669 A70-22884
- Remote sensors for earth resources observation by satellites, discussing electromagnetic spectrum, device operation, atmospheric transmission, measuring instruments, etc 09 p1678 A70-22888
- EROS program earth imaging models characteristics, describing airborne and spaceborne film return and global and geosynchronous space data transmission [AIAA PAPER 70-294] 09 p1678 A70-22889
- Artificial earth satellites photographic observation without chronometric recording aids, determining location and time by single indicator 09 p1635 A70-23055
- Solar wind magnitude and variability effects on geomagnetic activity and cosmic ray intensity modulation from satellite observations 09 p1745 A70-23272
- Reference ellipsoids mutual positions determination from observational data by satellites using triangulation points of two triangulations 09 p1763 A70-23327
- Azimuth determination by Vector method based on satellite observations compared to Popovich method, discussing discrepancy 09 p1670 A70-23329
- Orbiting satellite-borne instruments for scientific observation of earthquakes, volcanic eruptions, atmospheric phenomenon, cyclones, floods and soil erosion 09 p1763 A70-23377
- Heliocentric longitude intensity profiles of protons associated with solar flare of 5 February 1965, discussing data from Mariner 4 and IMP 2 09 p1746 A70-23480
- Electron and proton temperature differential near earth bow shock determined from plasma probe measurements by Vela 4B satellite 09 p1670 A70-23486
- Satellite observational data on time history of inner radiation belt /October 1963-December 1968/ 09 p1746 A70-23488
- Auroral arcs far UV observations by OGO 4, discussing luminosity, morphology, position, etc 09 p1670 A70-23493
- Ion cyclotron whistler in Injun 5 satellite VHF radio noise data 09 p1638 A70-23499
- Layered cloud amounts, cloud bases and tops heights analyses based on satellite TV and IR data 10 p1912 A70-23936
- Intertropical convergence zone /ITCZ/ movements, analyzing data obtained by ship and ESSA satellite cloud photography 10 p1912 A70-23939
- Spectral, angular and spatial evolution of earth twilight aureole brightness pattern from visual observation and spectrophotometry on Soyuz 5 spacecraft 10 p1873 A70-24270
- Satellite studies geoeffective particles and photoelectrons, including interactions with earth atmosphere 10 p1874 A70-24312
- Satellite-borne spectrometer for low energy electrons measurement, describing virgin photoelectrons equilibrium energy spectrum for different latitudes and pitch angles 10 p1874 A70-24313
- Satellite-borne spectrometer for low energy ion measurement 10 p1874 A70-24314
- Satellite-borne scintillation spectrometers for medium and high energy electron and proton measurements 10 p1931 A70-24315
- Magnetopause boundary between shocked streaming solar plasma and geomagnetic tail observed at lunar orbit by magnetometer on Explorer 35 10 p1941 A70-24436
- Visual observations of Molniya satellite during low perigee, determining air density 10 p1875 A70-24443
- Plate coordinate measurements obtained with Zeiss precision monocomparator at satellite observation station 10 p1889 A70-24501
- Earth Observation Satellites - BIS-NATO Conference, Cambridge, England, July 1969 10 p1950 A70-24635
- Manned and unmanned earth resources observation satellite program, noting international cooperation 10 p1971 A70-24636
- Manned and unmanned earth observation satellite programs technology gains, discussing atmospheric temperature, pressure, winds, clouds and moisture 10 p1876 A70-24637
- Ozone measurement from satellite by direct beam and scattered light methods employing UV sunlight attenuation 10 p1890 A70-24639
- Lunar cratering and erosion from Orbiter 5 photographs, observing crater densities, highland and maria regions, etc 10 p1942 A70-24643
- Simple layer model of geopotential from satellite-borne Baker-Nunn camera observations 10 p1876 A70-24645

ESRO satellite projects, studying interplanetary magnetic field, ionosphere, relations between sun and earth, gamma radiation sources, particle flow, electric fields, etc 10 p1951 A70-24867

Vertical air density profile from satellite measurements of atmospheric oxygen radio emission at 40-70 km altitudes 10 p1882 A70-25020

Radiation scattering during upper cloud altitude determination by satellite 10 p1913 A70-25022

Soviet cameras for photographic observation of artificial celestial bodies, noting equatorial platform mount, mirror lenses and installations 10 p1892 A70-25128

Numerical weather forecasting for several weeks based on global meteorological satellite network observation 10 p1913 A70-25241

Ionospheric electron content from Doppler data and from Faraday observations of satellite S-66 10 p1884 A70-25256

Satellite solar wind observations concerning interplanetary magnetic field direction and strength, proton distribution, solar wind velocity, density and direction 10 p1935 A70-25286

VHF aeronautical communication satellites extended for use in aircraft position determination and surveillance, discussing accuracy and error source reduction [AIAA PAPER 70-490] 11 p2002 A70-25487

Open magnetic electron multipliers /MEM/ with continuous dynode and field strips for satellite-borne detection systems, emphasizing extreme UV detectors 11 p2049 A70-25628

Gravitational field signatures for planetary fine structure analysis, describing lunar orbiter, selenodesy experiment and gravity field and earth gravity field satellite observation 11 p2111 A70-26029

Gravity waves structure simultaneous determination from airborne ozone and temperature sensors and satellite observations data 11 p2076 A70-26072

Solar wind correlation with geomagnetic activity, comparing Vela 3 and 4 observations with Mariner 2 measurements 11 p2105 A70-26075

Satellite observations reduction, determining continuous transformation over whole field of photograph by local transformations 11 p2007 A70-26187

U.S. Coast and Geodetic Survey satellite triangulation data reduction methods, discussing data acquisition system, plate preparation, etc 11 p2046 A70-26190

Spatial geodesy calculations based on photographs of satellites against star background, recommending ECHO type satellites 11 p2046 A70-26191

Passive satellite coordinates correlations to instants of observation in U.S.S.R. ground stations, reducing quasi-synchronous observations by interpolation 11 p2007 A70-26192

Schmidt photographs reduction, noting film bending during exposure and mean error of satellite position 11 p2007 A70-26195

Photographic satellite plates reduction by astrometric method at geodetic institute at Potsdam, discussing star coordinates, astronomic refraction, etc 11 p2008 A70-26200

Oblique shock initiated by 7 July 1966 proton flare in solar wind observed by satellite magnetometers outside magnetosphere 11 p2105 A70-26562

Undiscovered satellites of solar system major planets, predicting Jupiter satellites 11 p2118 A70-26725

Satellite trajectory parameters estimation by maximum likelihood method applied to continuous satellite observations assuming random Gaussian process as measurement error 11 p2081 A70-26780

Cosmos 137 proton spectra data obtained in inner radiation belt agreeing with Relay 1 data 11 p2106 A70-26786

Radial velocity data monitored during Venera 4 descent used for determining vertical and horizontal atmospheric flows velocities 11 p2118 A70-26792

Geopedological features derivation from satellite measurements, discussing Nimbus 2 data and grid point maps 12 p2217 A70-26914

Remote sensing from aircraft and satellites of chlorophyll concentrations for monitoring of biological productivity of sea 12 p2217 A70-26915

Worldwide crop calendar development from repetitive satellite observation to perform agricultural change detection 12 p2218 A70-26922

Remote sensing techniques for earth resources inventory, describing image enhancement role in multiband space photography 12 p2220 A70-26936

ERTS multispectral scanner with optimal sensitivity and resolution for agricultural scenes signature analysis 12 p2229 A70-26941

Atmospheric temperature determination by satellite IR spectrometer /SIRS-A/, describing data analysis and instrument design, calibration and performance 12 p2263 A70-26954

Energetic electron layer near magnetopause attributed to geomagnetic activity from satellite observations of fluxes 12 p2292 A70-27180

Lyman alpha intensity and hydrogen concentration at 5 to 19 earth radii determined from OGO 3 spacecraft measurements 12 p2222 A70-27181

Broadband and highpass LF noise in distant magnetosphere detected by VLF/LF experiment on OGO 1 satellite 12 p2222 A70-27183

Quasi-sinusoidal fluctuations of magnetic field during geomagnetic storms measured by ATS 1 in synchronous equatorial orbit 12 p2223 A70-27192

Mascons in lunar maria depressions observed by Lunar Orbiter 5 on basis of two layer model of crust 12 p2299 A70-27281

Low energy electron flux as interplanetary radiation primary component, considering data from IMP-1 observations 12 p2292 A70-27383

Beryllium proportional counters for satellite X ray astronomy, noting long term stability and environmental resistance 12 p2232 A70-27403

Ultra low frequency waves features in magnetosphere, considering geomagnetic pulsations, magnetic data from Explorer 33 and bounce resonance 12 p2233 A70-27573

Lunar limb shock wave observed by Explorer 35 satellite defined with respect to solar wind flow direction, discussing formation mechanism 12 p2302 A70-27594

Ionospheric probing by ground based and satellite-borne vertical incidence sounders 12 p2224 A70-27729

Ionospheric electron content calculations based on satellite measurements of Faraday rotation and phase path length variations 12 p2294 A70-27739

Meteorological research potential of manned orbiting spacecraft, discussing electromagnetic sensing instrumentation development, specialized observing programs, etc 12 p2225 A70-27744

Terrain spectral imagery from satellites for natural resources investigations 12 p2235 A70-27745

Oceanographic potential of spacecraft, discussing synoptic scanning, International Decade of Ocean Exploration, etc 12 p2225 A70-27746

Earth resource observation from orbiting spacecraft, discussing photo-image map construction for continents and continental shelves, terrain analysis, delta formation, etc 12 p2225 A70-27747

Experimental IR earth horizon profiles measured by satellite in F region, discussing spectral channels and attitude control 12 p2225 A70-27751

Ionospheric electron content at temperate latitudes during solar cycle increasing phase by radio beacon satellite, discussing diurnal, seasonal and latitudinal variations 12 p2225 A70-27892

Topside ionosphere structural analysis, considering electron density profiles deduced from Alouette 2 satellite data 12 p2226 A70-28062

Topside ionosphere nighttime structure over Japan deduced from Alouette 2 satellite plasma frequency measurements 12 p2226 A70-28063

Proton cyclotron echoes in topside ionograms using Alouette 2 satellite data 12 p2226 A70-28064

Galactic noise and solar type 3 bursts using Alouette 2 satellite HF receiver voltage recordings 12 p2226 A70-28065

F 2 region critical frequency from Alouette 2 satellite data compared with ground based measurement 12 p2226 A70-28066

Plasmasphere ion concentration measurements on-board Elektron 2 and 4 satellites, observing dependence on geomagnetic activity 12 p2295 A70-28260

Long wave cosmic radio background emission in circumlunar space by Luna 11 and 12 satellites, observing increase in earth magnetosphere tail 12 p2295 A70-28262

Low energy solar proton flux propagation model in interplanetary medium based on satellite data beyond earth magnetosphere 13 p2475 A70-28459

Magnetograms by Venera 4 and Mariner 5 compared to determine interplanetary magnetic field nature in Venus proximity 13 p2485 A70-28463

Three dimensional characteristic of light scattered by lunar surface determined for various incidence angles and azimuths from Zond 3 photometric measurements 13 p2485 A70-28466

Magnetospheric magnetic field disturbance due to abrupt solar wind parameters change, using Explorer 26 data 13 p2475 A70-28469

Satellite measurement of water vapor height profiles using outgoing thermal radiation and solar radiation atmospheric absorption techniques 13 p2392 A70-28571

Clouds upper height boundary relation with radiation temperature field from satellite data, noting cirrus clouds influence 13 p2444 A70-28589

Shutter thermal control for Helios solar observation satellite, considering closed and open conditions 13 p2505 A70-28769

Astronomical Netherlands Satellite /ANS/ for carrying out stellar UV and X ray emission experiments 13 p2506 A70-28989

Topside ionosphere structure deduced from electron density profiles observed by Alouette 2 satellite 13 p2395 A70-29090

Topside ionosphere structure deduced from resonance spikes on ionograms obtained by Alouette 2 satellite and electron density distributions 13 p2395 A70-29091

Galactic noise spectrum and solar radio bursts in hecto-decmetric wave region observed by Alouette 2 satellite 13 p2491 A70-29093

F 2 critical frequencies from Alouette 2 satellite ionogram data compared with ground-based sounding results 13 p2396 A70-29094

Magnetosheath plasma measurements by Pioneer 6 during outbound passage in dusk meridian, comparing results with various predictions 13 p2396 A70-29180

Geomagnetic tail structure and magnetic field fluctuations from IMP 3 satellite measurements, showing enhancement during/after SSC and sudden impulses /SI/ 13 p2396 A70-29182

Northern auroral regions low energy electron fluxes survey by Injun 4 satellite during minimum solar activity 13 p2477 A70-29184

Triaxial earth ellipsoid best fitting parameters for geoidal surface radius vector by spherical harmonics with coefficients computed from satellite observations 13 p2398 A70-29207

Harmonic functions defining geopotential and gravity derived from satellite orbit dynamics, applying to earth shape parameters 13 p2398 A70-29208

Universal triaxial instrument with AT-1 telescope for visual observation of satellites, discussing applications and accuracy 13 p2408 A70-29274

Refraction errors and anomalies effects on satellite observation, using atmospheric model 13 p2449 A70-29275

Martian terrain features and atmospheric activity observation by Mariner 6 and 7 13 p2494 A70-29526

Satellite time and position observations mean square error analysis using calculus of variations 13 p2367 A70-29528

Geodetic systems relative positions determination based on satellite synchronous observation 13 p2400 A70-29529

Atmospheric density estimation from observation of satellite drag-induced energy dissipation 13 p2400 A70-29530

Satellite radiometry, discussing vertical soundings, instruments, onboard calibration of interferometer, high spatial resolution, etc 13 p2411 A70-29664

Alouette 1 plasma resonance observations, analyzing electron density measurements in sheath region and cyclotron harmonic resonant frequencies 13 p2466 A70-29903

Dispersion and group velocity characteristics of topside resonance oblique echoes near plasma frequencies observed by satellite 13 p2467 A70-29909

Local resonance at upper hybrid frequency from satellite observation, noting effects of electron plasma/cyclotron frequency ratio 13 p2370 A70-29911

Polar ionosphere auroral oval position detection by satellite observations of naturally occurring VLF and man-made HF plasma waves 13 p2371 A70-29924

Low and high apogee satellite and rocket magnetometers for space measurements, discussing self oriented fluxgate, proton, quantum cesium and three component types

13 p2415 A70-30047

Solar wind parameters time variations influence on geomagnetic activity from measurements by electrostatic analyzers on Vela satellites

13 p2481 A70-30065

Electron and positive ion velocity distributions measurements near earth bow shock by electrostatic analyzer on Vela 4B satellite

13 p2481 A70-30068

Spatial distribution and directional anisotropies of tail plasma sheet energetic electrons from measurements by electrostatic analyzer and energetic particle experiments on Vela 4

13 p2482 A70-30071

Plasmapause position and density profile from ion concentration measurements by OGO-5, determining reaction to magnetic variations

13 p2482 A70-30074

Geomagnetic tail structure and shape from Explorer 33 and 35 and Pioneer 8 observation data, examining field lines divergence with distance from earth

13 p2402 A70-30075

Geomagnetic field distortion in high beta magnetospheric regions from OGO observations for quiet and slightly disturbed conditions

13 p2402 A70-30076

Geomagnetic field distant fluctuations during substorm from ATS 1 magnetometer data on abrupt recoveries of H component

13 p2482 A70-30077

Ionospheric DC electric fields long period oscillations at high latitudes observed by polar orbiting Injun 5 satellite

13 p2403 A70-30081

Van Allen radiation belts energetic electrons injection and distribution due to magnetic storms, using satellite-borne spectrometers

13 p2483 A70-30090

Satellite observation of alpha particles trapped geomagnetically in radiation belts, including Injun 5 results

13 p2484 A70-30092

Trapped alpha particle and proton spectra from satellite measurements, considering magnetosphere injection

13 p2484 A70-30093

Cloud cover photographs in deep occluded cyclone by Soyuz 4 spacecraft

14 p2602 A70-30139

Subpolar ionosphere electron concentration measurements for both hemispheres during solar activity by Faraday effect signal recordings from satellites

14 p2570 A70-30223

Earth radiation balance climatological characteristics based on satellite and published data, analyzing earth-atmosphere albedo on global scale

14 p2603 A70-30402

Free floating balloon position and velocity determination by satellite, using Kalman filter linear estimation theory

14 p2530 A70-30571

Satellite scintillation index variation with zenith angle and azimuth at ground station

14 p2574 A70-30739

Radio wave-ionosphere interaction effects on accuracy of radio astronomical observations from earth satellites

14 p2575 A70-30824

Ion temperature sensitive end effect in long cylindrical Langmuir probe response in high speed collisionless plasma flow at ionospheric satellite conditions

14 p2577 A70-31038

Topographic variations in lunar surface from bistatic radar observations on Explorer 35

14 p2645 A70-31061

Spacecraft measurements revealing hot dense Venusian and cold thin Martian carbon dioxide atmospheres

14 p2646 A70-31066

Numerical weather prediction requirements for global satellite observing systems using atmospheric models

14 p2610 A70-31152

Satellite probing method for transmission absorption spectroscopy of planetary atmospheres

14 p2650 A70-31230

Cloud cover statistical data applied to planning remote satellite-borne sensing missions, using Monte Carlo method

14 p2611 A70-31232

Harmonic analysis of digital data from satellite measurements of periodic phenomena with unknown periodicity

14 p2554 A70-31415

Gravitational field representation in satellite geodesy by simple layer potential, comparing with geopotential expansion in spherical harmonics

15 p2722 A70-31548

Atomic hydrogen distribution in upper atmosphere and solar system obtained during spin operation of OGO 5 with Lyman alpha photometer

15 p2798 A70-31655

Ionospheric electron concentration and temperature measurements by cylindrical Langmuir probe on rockets and satellites, emphasizing error sources

15 p2723 A70-31657

VLF wave propagation direction observation by satellite after passage through magnetosphere at low and mid latitudes

15 p2697 A70-31659

Solar extreme UV radiation measurements over rotation period onboard satellite OSO-3, using atmospheric absorption correction

15 p2792 A70-31666

Polar ionospheric electron/ion density measurements by ESRO 1 satellite, observing dependence on Kp index

15 p2724 A70-31669

Atmospheric density near 180 km /1968-1969/ from orbit of satellite 1967-31A /ATS 2/, noting weak dependence on solar activity and correlations to geomagnetic disturbances

15 p2724 A70-31680

Radar meteor shower rate observation compared with direct cosmic dust measurements on satellites

15 p2798 A70-31682

Ionospheric density profiles measurement by accelerometers on SPADES and Cannon Ball 1 satellites, comparing results with prediction from atmospheric model

15 p2724 A70-31686

Atmospheric vertical temperature sounding from geosynchronous satellite, discussing instrumentation, cloud cover and wind effects, etc

15 p2809 A70-31690

Report to COSPAR on space research in Bulgaria, considering ionospheric physics, cosmic rays, satellite observations, meteorology and space communications

15 p2829 A70-31704

Report to COSPAR on Austrian space research covering picture transmissions, solar activity, satellite observation, etc

15 p2829 A70-31707

Report to COSPAR on Hungarian space research including satellite observations, upper atmosphere, geomagnetic effect, geodesy, cosmic rays, etc

15 p2830 A70-31713

Report to COSPAR on space research in Pakistan, covering rocket, satellite and ground based investigations, etc

15 p2830 A70-31718

Relativistic cosmic rays primordial chemical composition above atmosphere from abundance data obtained with satellite-borne nuclear emulsion detector

15 p2793 A70-31735

Orbital earth resources sensors, outlining user oriented method of determining measurement requirements

15 p2735 A70-31777

Quiet time proton and alpha particle flux and differential energy spectra measured by cosmic ray detectors on OGO 3 satellite

15 p2793 A70-31795

Quietest cosmic ray ionization altitude dependence over polar regions from measurements by integrating ionization chamber on OGO-2

15 p2793 A70-31902

Cosmic ray knee interpretation using polar orbiting ionization chambers data from OGO-2/4

15 p2793 A70-31903

Pioneer 8 wave and particle observations correlation showing broadband wave levels reduction during extended geomagnetic tail crossings

15 p2727 A70-31904

Neutral particle and electron density measurements by Explorer 32 proving thermospheric gravity waves association with wave-like structure in F region electron density

15 p2727 A70-31907

Polar substorm activity associated with magnetopause position variation, using Imp 2 satellite observations

15 p2728 A70-31911

Soviet collection of articles on satellite meteorology covering atmospheric cellular convection, cloud cover, wind field analysis, etc

15 p2769 A70-32063

Wind field reduction from satellite cloud structure data

15 p2770 A70-32066

Atmospheric radiation and heat fluxes calculations comparison with satellite and ground station actinometric measurements

15 p2770 A70-32067

Sea surface temperature and atmospheric moisture determination from satellite measurements of atmospheric thermal radio emission on quiet and cloudy windy days

15 p2770 A70-32069

Atmospheric humidity determination from satellite radio emission measurements at SHF

15 p2771 A70-32071

Earth surface temperature, emissivity and dielectric constant from satellite measurements of SHF radiation

15 p2771 A70-32072

Electric field measurements in ionosphere using satellite and rocket experiments

15 p2729 A70-32082

Atmospheric density and temperature measurements by satellite- and rocket-borne pressure gauges and mass spectrometers, considering error sources

15 p2731 A70-32092

Prolonged upper ionospheric observations from Sputnik 3, Transit 4A and Explorer 22 signals Faraday fading and phase shifts, showing electron content dependence on solar activity

15 p2731 A70-32093

Intercomcos 1 satellite for observing solar UV and X-ray emission in solar flares prediction

15 p2738 A70-32145

Equatorial atmospheric density during geomagnetic storm and quiet days by satellite observation

15 p2811 A70-32284

Solar radio burst satellite observation during Proton Flare Project, giving dynamic spectra

15 p2794 A70-32293

OGO 5 satellite scientific observations, payloads, parameters and objectives

15 p2812 A70-32364

Mariner 4 and 5 and Venera 4 data used for comparing terrestrial planets ionospheres

15 p2805 A70-32733

Charged particles and He nuclei spatial distribution from recordings in cosmic ray equator region by Cerenkov counter mounted on Proton 2 satellite

15 p2795 A70-32735

Micrometeor flux in near-earth space measured by satellite-borne low noise acoustic detectors

15 p2805 A70-32738

Spatial vectors determination by two laser measurements and one optical observation of artificial satellite

16 p2926 A70-33118

Thermal atmospheric sounding from satellites based on Fredholm integral equations, obtaining vertical temperature profiles

16 p2896 A70-33257

Twilight colorimetry from horizon spectra obtained by Soyuz 5, computing chromaticity coefficients for purely scattering molecular atmosphere

16 p2896 A70-33260

Satellite communication/navigation/surveillance systems for domestic and transoceanic ATC

16 p2949 A70-33479

Oceanographic phenomena inference from satellite cloud photographs, developing seasonal cloud climatology for Peru Current area

16 p2897 A70-33713

Gravity wave generation during solar eclipse confirmed by satellite observation on Faraday rotation angle of ionospheric VHF transmissions

16 p2898 A70-33836

Mars evolution observation by gamma ray spectrometer in Martian orbit, transmitting information to earth as pulse height distribution

16 p2912 A70-33978

Solar X-ray spectrum and intensity and diffuse cosmic flux measurements, using polar orbiting satellite-borne instruments

17 p3149 A70-34534

Omnidirectional cosmic gamma ray flux in 1-6 MeV range observed by ERS-18 satellite

17 p3149 A70-34539

Galactic gamma rays from OSO-3 observations attributed to decay of neutral pions produced by cosmic rays interaction with interstellar gas nucleons

17 p3150 A70-34567

Earth gravity field from successive satellite passages, introducing direction and range observations of first passage

17 p3154 A70-34683

Dynamic spectra of type 3 solar bursts from OGO-3 antenna/radiometer observations

17 p3150 A70-34835

UV interstellar extinction, examining reddened and unreddened early stars with OAO satellite spectrophotometric scans

17 p3159 A70-34878

Early-type star spectral scan analysis from OAO observation, comparing model atmosphere calculations

17 p3161 A70-34887

Solar UV spectrum variations due to flares and solar activity diurnal variations from satellite spectrometry

17 p3161 A70-34894

Night sky brightness in UV and visible region by photoelectric photometers on Cosmos 51 and 213 satellites

17 p3163 A70-34901

Ionospheric irregularities properties from San Marco 2 and BE-B satellites recordings, deriving height variation of irregularity size and occurrence

17 p3076 A70-34942

Lyman alpha emission from Comet Bennett observed with photometer on board OGO-5 satellite

17 p3163 A70-35049

Heliostationary spacecraft at L2 point for solar wind observation, describing mission, instrumentation and spacecraft design

17 p3168 A70-35252

OGO-4 observations of hydrogen Lyman-alpha air-glow surrounding earth, measuring dependence on solar zenith angle
17 p3080 A70-35764

Space legal problems involving earth resource survey (ERS) satellites and weather modification
17 p3203 A70-35799

OGO 5 observations of quasi-trapped electromagnetic waves in solar wind at 70 kHz
18 p3306 A70-36005

Plasmasphere bulge region morphology from hydrogen ion concentration measurement by mass spectrometer on OGO 5 satellite
18 p3312 A70-36014

Magnetospheric electric field configuration from trapped particle flux asymmetries, using Explorer 14 electron data
18 p3306 A70-36024

Large amplitude irregular magnetic fluctuations during expansion phase of magnetic substorms, using ATS 1 observations
18 p3312 A70-36025

High energy electrons in near space excess radiation from high altitude balloon and satellite data
18 p3307 A70-36170

Nimbus 3 satellite-borne Michelson interferometer IR spectrometer for spectrum measurement, obtaining temperature, water vapor and ozone vertical distribution
18 p3257 A70-36175

Satellite based systems for aircraft surveillance, discussing satellite power and bandwidth conservation, pulse techniques and interrogators
18 p3288 A70-36391

British X 3 satellite for investigating thermal control surface finishes stability, ultrathin solar cells, electronic systems reliability and micrometeoroid flux measurement
18 p3333 A70-36511

Brightness field spatial structure of solar radiation reflected from earth by Cosmos 149 satellite, discussing homogeneity and isotropy
18 p3247 A70-36629

Earth radiation measurement at 10-12 microns by Cosmos 243 satellite-borne radiometer, comparing temperatures for boundary air layers in cloudless conditions
18 p3247 A70-36630

Proton magnetometer measurements from satellite Cosmos 49, observing residual and broad magnetic anomalies
18 p3248 A70-36770

Solar proton flares radiometric measurement on-board Molniya 1 satellite, detecting intensities in outer regions of magnetosphere
18 p3309 A70-36902

Soviet papers on atmospheric radiation processes and satellite meteorology
18 p3285 A70-36962

Climatological maps of earth mean annual radiation balance compared with satellite data
18 p3286 A70-36966

Atmospheric water vapor distribution by intensity measurements of outgoing radiation from satellites in carbon dioxide and water vapor spectral bands
18 p3287 A70-36971

Electron temperature in 500-1000 km range during minimum solar activity based on Alouette satellite data and atmospheric model, observing latitudinal variation
18 p3254 A70-37029

Meteorological satellites, discussing observation continuity, orbital characteristics onboard memory capacity and sensing methods
19 p3460 A70-37386

Satellite observations of earth by human or automatic methods, discussing principle applications of Earth Resources Technological Satellite
19 p3410 A70-37387

Intercorrelated satellite observations related to solar events - ESRO Conference, Noordwijk, Netherlands, September 1969
19 p3491 A70-37471

Solar cosmic rays satellite observation, considering flare associated, recurrent and storm particle events and active center associated energetic particles
19 p3493 A70-37474

Solar wind disturbances associated with solar activity observed by spacecraft probing interplanetary space, considering geomagnetic activity classes
19 p3494 A70-37478

Solar wind fluxes observed onboard Venera 2 and 6 compared with earth electromagnetic field pulsations and short period disturbances
19 p3494 A70-37479

Low energy solar protons temporal and spatial variations in magnetosphere by data comparison from polar orbiting satellite and Explorers 33 and 34
19 p3494 A70-37486

Geomagnetic storms at ATS 1 in 1967, discussing storm-time disturbance field and associated pulsations
19 p3410 A70-37488

Interplanetary plasma observations by Vela satellites in solar wind and plasma sheet of magnetotail during magnetic storm
19 p3410 A70-37490

ESRO-1, ESRO-2 and HEOS-1 simultaneous observation of solar event of 25 February 1969, describing satellite and experiments
19 p3531 A70-37496

Solar flare of 25 February 1969 ground observations comparison to satellite data, measuring magnetic fields, radio emission, sunspots, ionospheric effects, etc
19 p3513 A70-37497

Solar flare of 25 February 1969 at soft X ray frequencies by ESRO 2 satellite observation
19 p3495 A70-37499

Interplanetary magnetic field during solar particle event of 25 February 1969 from Heos 1 measurements
19 p3495 A70-37500

Solar wind discontinuity during solar flare from Heos A measurements, observing shock wave propagation
19 p3495 A70-37502

Proton spectra and time history in interplanetary space during solar flare by satellite observation, investigating particle flux by shock waves
19 p3495 A70-37503

Solar cosmic ray protons and electrons increase during 25 February-5 March 1969 observed by Venus 5 and 6 space probes, discussing interplanetary medium disturbance
19 p3495 A70-37504

Solar protons directional and omnidirectional measurements during particle event of 25 February 1969 by Heos 1 spacecraft, indicating particle diffusion in interplanetary space
19 p3496 A70-37506

Solar protons distributions in 1-30 MeV range over northern polar cap during 25 February 1969 solar event by ESRO 1 satellite
19 p3496 A70-37508

Magnetospheric thermal plasma electron density measurement during solar flare by OGO-5 satellite
19 p3411 A70-37513

Ionospheric electron density and temperature variation measurements after solar proton event of 25 February 1969, using ESRO 1 satellite
19 p3411 A70-37514

ESRO 1 satellite and ground observations of energetic auroral electrons angular distribution during solar event, using Geiger counters
19 p3412 A70-37519

Low energy solar protons observation by Esro 1 satellite during solar flare of 25 February 1969
19 p3497 A70-37520

High energy solar electrons observed by HEOS-A1 satellite, discussing semitransparent barrier existence at distance from sun
19 p3497 A70-37521

Electron intensity long term variations above 500 MeV by OGO-5 satellite-borne cosmic ray electron detector, supporting diffusion-convection theory of solar modulation
19 p3497 A70-37522

Future space missions for observing solar events, magnetospheric problems, cosmic rays and low energy plasma, considering use of multiple satellites
19 p3513 A70-37523

Simultaneous primary energy spectrum, chemical composition and sidereal daily variation analysis for cosmic ray origin, using Proton measurements
19 p3500 A70-38080

Extraterrestrial gamma radiation from Cygnus region of galactic disk, using OGO-5 observations
19 p3501 A70-38087

High energy gamma ray flux enhancement towards galactic plane from OSO-3 particle telescope observations
19 p3501 A70-38089

Energetic primary gamma ray fluxes by satellite-borne spark chamber, isolating galactic radiation
19 p3502 A70-38093

Quiet time intensity increases and long term solar modulation of interplanetary low energy electrons, using IMP observations
19 p3502 A70-38097

Electron energy spectra range from HEOS A1 satellite mounted Cerenkov counter with shower telescope
19 p3503 A70-38103

High energy charged particle observations on OSO 3 at various rigidities
19 p3505 A70-38117

X rays measurement by spectrometer on satellite Cosmos 207
19 p3506 A70-38122

Galactic cosmic ray energy spectra of light and medium nuclei from IMP-4 satellite measurements, investigating L/M ratio
19 p3506 A70-38124

Cosmic ray heavy nuclei charge composition from satellite-borne emulsion stacks exposure
19 p3507 A70-38134

Rigidity spectra of primary cosmic ray nuclei groups from satellite-borne Cerenkov spectrometer
19 p3508 A70-38135

Relativistic cosmic rays nuclei abundances from Gemini 11 flight
19 p3509 A70-38144

Primary cosmic ray proton energy spectra from satellite observation, presenting spectrum approximating function
19 p3510 A70-38153

Venus atmospheric temperature, pressure and density measurements by Venera 5 and 6 space probes, developing model
19 p3520 A70-38255

Venus atmosphere heat transfer processes from Venera 4, 5 and 6 probes data, evaluating radiative and convective motions model
19 p3520 A70-38256

Atmospheric ozone remote sensing by high resolution IR interferometer spectrometer /IRIS/ aboard Nimbus 3 satellite
19 p3414 A70-38262

Simultaneous hydrogen ion composition measurements by upper ionospheric polar orbiting OGO 4 and eccentric orbiting magnetospheric OGO 3 at midlatitude
19 p3520 A70-38377

Jovian continuum radiation observation by RAE-1 during lunar occultations
19 p3512 A70-38608

Auroral photographic and visual observations, discussing satellite results and substorm development
19 p3417 A70-38730

Artificial satellites photographic observation by camera, describing sighting system, tracking adjustments and shutter controls
19 p3433 A70-38793

Ionospheric electron content measurements during 20 May 1966 solar eclipse by Beacon S-66 satellite
19 p3419 A70-38915

Vertical electron concentrations in upper F region during solar eclipses in South Atlantic from satellite observation
19 p3419 A70-38920

Free air temperature by onboard satellite IR spectrometer /SIRS/, measuring earth spectral radiance in carbon dioxide 15 micrometer band
20 p3660 A70-39077

Cosmic ray albedo neutron flux latitude and altitude dependence, using OGO-6 polar orbiting satellite
20 p3698 A70-39326

Stable midlatitude red arc observation by Alouette 2 satellite for electron temperature and density structure measurement, calculating intensity and extent
20 p3620 A70-39333

Tropical UV nightglow measurement by Ogo-4 spectrometer, considering ionospheric recombination excitation mechanism
20 p3620 A70-39338

Vertical motion determination from satellite cloud pictures based on canonical correlation of initial fields
20 p3664 A70-39401

Atmospheric effects on passive microwave sensing in EHF region under all-weather conditions on global scale using satellites
20 p3586 A70-39703

Global meteorological parameters measurement by satellites, discussing IR instruments
20 p3664 A70-39711

Low altitude cosmic rays dosimetric measurement by Cosmos 228 apparatus
20 p3700 A70-39728

Solar proton intensity measurement during flare by satellite Proton 3 apparatus
20 p3700 A70-39729

Nighttime lightning activity observations by orbiting solar satellite OSO-B, determining thunderstorms positions by optical radiation detection
20 p3623 A70-39978

Cloud motions from IR measurements within overlap region of adjacent Nimbus II orbits compared with wind vectors from constant pressure charts
20 p3665 A70-40068

Millimeter wave propagation measurements by ATS-5 satellite, observing attenuation dependence on meteorological parameters for communication data link performance prediction
20 p3589 A70-40311

Solar soft X ray flare spectra of 16 November 1967, examining electron temperatures and emission lines by OSO-4
20 p3700 A70-40419

OSO far UV solar spectroheliograms atlas, describing instrumentation, data acquisition, etc
20 p3713 A70-40540

COS-B satellite cosmic X ray experiment with high sensitivity and long pointing time for extragalactic sources discovery
21 p3871 A70-40655

High energy galactic gamma rays search onboard OGO-5, tabulating results
21 p3876 A70-40691

Galactic gamma ray intensity near Cygnus by OGO-5 spacecraft-borne telescope with acoustic spark chamber, discussing source intensity
21 p3876 A70-40691

Gamma ray astronomical point sources by balloon flight and satellite observation, discussing detector system and telescope for flux and energy spectrum 21 p3821 A70-40694

Omnidirectional cosmic gamma ray flux near one MeV observed by ERS-18 satellite, plotting spectral energy distribution 21 p3876 A70-40697

Atmospheric temperature and water vapor profiles from iterative solution of radiative transfer equation for comparison with spectral radiance observation from Nimbus satellites 21 p3846 A70-40803

Satellite-borne sensor for ionospheric ions velocity measurement, describing design and principles of operation 21 p3813 A70-40834

Ionospheric ions drift velocity horizontal and vertical components distribution, using satellite-borne sensor 21 p3813 A70-40835

Cosmos 142 satellite measurements VLF radio signals transmitted through ionosphere by ground based stations 21 p3786 A70-40836

Geostationary beacon satellite recording of gravity wave influence on ionospheric electron content 21 p3815 A70-40943

Solar X-ray bursts correlation with H alpha flares and microwave bursts observed by Explorer 34 experiment 21 p3880 A70-40970

Near earth solar UV flux measurement by Spades satellite, discussing nonrandom variations and Ca plage regions 21 p3881 A70-41078

Large scale flare associated solar wind disturbances observed by Vela satellites, noting prolonged elevated flow speed after shock 21 p3881 A70-41080

Solar wind proton properties examined by Vela 3, observing density distribution, flow speed and direction, thermal anisotropy, magnitude and orientation 21 p3881 A70-41081

EROS program earth imaging models characteristics, describing airborne and spaceborne film return and global and geosynchronous space data transmission [AIAA PAPER 70-294] 21 p3829 A70-41871

Real time global temperature and geopotential height profiles acquisition from satellite spectrometer measurements by least squares regression method 21 p3820 A70-42121

Sea surface temperature determination from satellite high resolution IR window radiation measurements by statistical histogram inference method 21 p3820 A70-42122

Ephemerides for lunar-orbiting observation of dust clouds in earth-moon system libration points L4 and L5 by observer orbiting over lunar equator 22 p4097 A70-42308

Dual satellite magnetic field and plasma measurements of earth bow shock pulsation shock by Vela 3A and Explorer 33 22 p4013 A70-42470

Global thunderstorm activity location found by measuring differences between time of arrival of electromagnetic energy at three satellites 22 p4016 A70-42779

F region electron content day-to-day changes observation by Early Bird satellite, determining cross correlation with magnetic indices 22 p4020 A70-43161

Total electron content and equivalent slab thickness statistical data during magnetic disturbances from AT-3 satellite VHF transmission observations 22 p4020 A70-43162

Geostationary satellites for magnetosphere and ionosphere sounding, discussing specific observational capabilities 22 p4024 A70-43397

Outer zone electrons radial diffusion coefficients and lifetimes determined as functions of magnetic shell parameter, based on satellite measurement following geomagnetic storm 23 p4236 A70-43831

Proton energy angular distribution measurement by OV2-5 research satellite confirming model of shell splitting in geomagnetic field 23 p4236 A70-43832

High altitude outer radiation zone boundary region electron energy measurement by satellite Injun 3, noting angular distribution dependence on local time, latitude, etc 23 p4236 A70-43833

Ionospheric ion temperature measurements by retarding potential analyzer on OGO-6 satellite 23 p4185 A70-43840

Neutral air density and composition at 150 km, comparing satellite drag data to rocket measurements results 23 p4185 A70-43843

ELF emissions dependence on plasmopause location in magnetosphere indicated from OV-3 observations 23 p4186 A70-43847

Ionospheric electron trough and magnetospheric plasmopause movements from satellite observations, showing statistical correlation with geomagnetic field 23 p4186 A70-43854

Daytime near horizon atmospheric luminescence measurement by Cosmos 224 satellite, discussing contributions of nitrogen and aerosol and Rayleigh scatterings 23 p4188 A70-44061

Ionospheric electron content measurement from Faraday effect of troposphere on beacon satellite Explorer 22 radio signals 23 p4163 A70-44231

Ozone vertical distribution from satellite IR data, discussing Fredholm equations for radiation transfer 23 p4191 A70-44269

Celestial sphere scanning by spinning symmetric satellite with open loop magnetic control of precession 23 p4216 A70-44524

FSRO satellites missions and payloads, emphasizing studies of earth magnetic and electric field environment and of polar region particle measurements 23 p4191 A70-44663

Geopotential zonal spherical harmonics coefficients revised values determined from reduced Baker-Nunn observations for satellites 24 p4407 A70-45537

Tesseral harmonics of geopotential and station coordinates from combined Baker-Nunn, laser and range data from satellites 24 p4407 A70-45538

Error analysis of satellite orbits obtained by synchronous satellites range and range rate measurements 24 p4407 A70-45539

GEOS 1 satellite short arc optical observations over North American network to improve survey coordinates of tracking stations 24 p4312 A70-45542

Doppler satellite measurements in semidynamic geodesy using data from Mediterranean ground stations 24 p4312 A70-45543

Dynamical and geometrical geodesy on European datum, comparing data from Doppler, laser and photographic satellite measurements 24 p4312 A70-45544

Geodetic parameters estimated from satellite dynamic and geometric solutions and Mariner 4 and 5 missions 24 p4312 A70-45545

Satellite data acquisition and dissemination functions of National Space Science Data Center (NSSDC) 24 p4322 A70-45615

Earth Resources Technology Satellites (ERTS) providing high resolution image data regarding agriculture, geology, hydrology, geography, etc 24 p4416 A70-45869

D2A satellite optical experiments, examining atmospheric atomic H and solar and extraterrestrial 1216 A emission 24 p4339 A70-46094

Subpolar ionosphere electron concentration measurements for both hemispheres during solar activity by Faraday effect signal recordings from satellites 24 p4331 A70-46298

 Periodic motion of satellite with magnetic damper along circular orbit, assuming small value of damping coefficient 01 p0197 A70-11481

Horizontal gradients below satellite orbit effect on reduced and minimum difference in Doppler frequency shifts of coherent radio waves from satellite in inhomogeneous ionosphere 01 p0046 A70-11517

Satellite orbital elements optical determination accuracy by differential corrections, presenting computations for data distributed along small arc 02 p0254 A70-11754

Satellite tracking at several stations at synchronized time to obtain satellite positions, station coordinates and to improve orbital elements accuracy 02 p0254 A70-11760

Cosmos 44 quasi-draconic period analytical and graphical determination, comparing moments of meridian intersection with INTEROBS observations 02 p0363 A70-11767

Three-body gravity gradient satellite orbital plane motion analysis, studying transient damping of proposed tethered orbiting interferometer/TOI/ 02 p0383 A70-12781

Steady motions stability of gyrostat satellite in central Newtonian gravitational field 03 p0579 A70-13343

Azur satellite launching project by NASA and Germany, describing orbit for investigating earth inner radiation belt, auroral zone and solar flares 03 p0580 A70-13797

ESRO German-built satellite HEOS 1 planned scientific space measurements, required orbit and technical concepts 03 p0580 A70-13798

Generalized Keplerian orbits for large cylindrical satellites noting orbit stability 03 p0578 A70-14252

Relative satellite motion equations derived in generalized parameters, obtaining expressions for coefficients of correcting impulses sensitivity to measurement errors 04 p0760 A70-14430

Earth resources satellites capabilities and requirements emphasizing orbit parameters, remote sensing, data handling and telemetry systems [AAS PAPER 69-587] 04 p0760 A70-14642

Prediction accuracies of atmospheric models investigated for medium altitude satellites during disturbed geomagnetic conditions, discussing solar flux and geomagnetic indices as input data [AAS PAPER 69-617] 04 p0677 A70-14647

Satellite orbit and attitude determination and planetary gravity and astronomical constants from earth-based radio Doppler and orbital photogrammetric observations 04 p0750 A70-14938

Navy navigation satellite passes predicted by equations for rise and set times, elevation and azimuth in plane circular polar orbit about spherical earth 04 p0764 A70-15431

Resonance effects on satellite orbits due to tesseral harmonics in potential field 05 p0908 A70-16335

Error analysis of resonant orbits for geodesy, discussing high order geopotential coefficient recovery by resonance and gravity model errors 05 p0909 A70-16341

Earth figure parameters from satellite orbit dynamics, including potential on geoidal surface and scale factor for lengths 05 p0840 A70-16638

Geodetic vertical and geoidal height deflection calculated by gravimetric method, considering satellite orbits data 05 p0841 A70-16643

Satellites and space probes orbital parameters calculation, considering circular and elliptical trajectories and rendezvous maneuver example 06 p1140 A70-17583

Electrically charged earth satellite motion under action of Lorentz force produced by geomagnetic field interaction, relating field trajectories to acceleration 06 p1142 A70-17879

Relative motion of two bodies linked by flexible weightless tether in artificial earth satellite orbit, simulating extravehicular walk 06 p1142 A70-17882

Gyrostat satellite equilibrium positions in circular equatorial orbit under action of gravitational magnetic and aerodynamic moments based on gyrostatized satellite equations of motion 06 p1155 A70-17884

Balloon satellite orbital time and eccentricity correlated, investigating earth shadow and solar radiation effects 06 p1142 A70-17892

Satellite temperature determination in earth orbit, testing mathematical thermal model in simulation chamber 06 p1155 A70-17935

Baseline length and orientation of closely co-orbiting satellites estimated by combined onboard sensor and ground tracking data [AIAA PAPER 70-39] 06 p1146 A70-18186

Eccentric and inclined motions of satellite of spheroidal planet in planet centered coordinate system, applying formulas to Jupiter motion 07 p1374 A70-18693

Satellite orbit using analytic partial derivatives of perturbed motion based on state transition matrices 07 p1381 A70-19301

Maximum probability estimates for satellite orbital plane, reducing computational labor by eliminating use of maximum likelihood principle in differential formulation 07 p1386 A70-19486

Satellite circular orbital plane rotation by jet thrust, minimizing fuel for fixed time 07 p1393 A70-19497

Winds above 200 km measured from vapor trail observations compared to winds deduced from satellite orbital changes and theoretical models 07 p1269 A70-19950

Libration limits of satellite in Keplerian circular orbit, estimating potential energy of perturbing forces 08 p1582 A70-20967

Earth satellite orbit determined by small separated optical observations at two stations 09 p1751 A70-22162

Spherical coordinate intermediaries for calculating satellite orbits 09 p1760 A70-22914

Satellite orbital characteristics selection techniques, tools and methods for mission objectives and constraints
[AAS PAPER 68-136] 09 p1761 A70-22937

Center of mass small displacement effects on satellite orbits by solving variational equations for scalar potential function employing matrix formalism
09 p1761 A70-22938

Nonspinning satellite orbit eccentricity effect on attitude stability
09 p1766 A70-23229

Polynomial force model supplementing reduced gravity model in determining accuracy of near equatorial, near synchronous and near circular satellite orbits
09 p1762 A70-23256

Satellite attitude and orbit control systems based on electrically heated ammonia or hydrazine
09 p1767 A70-23432

Material elasticity effects on librational motion of arbitrary shaped satellite
10 p1950 A70-24177

Satellite orbit prediction formulas for Vinti dynamic model with three coordinates expressed in terms of independent variable
10 p1939 A70-24188

Satellite orbit prediction using computer program based on first order secular node-to-node drag perturbations
10 p1943 A70-24822

Variations after one revolution in semimajor axis, period and eccentricity computed for orbit using variable drag coefficient involving satellite and air thermal speeds
10 p1951 A70-24824

Communication satellites geostationary orbit sharing problem, considering system design and utilization criteria
[AIAA PAPER 70-441] 11 p1998 A70-25419

Orbit utilization, discussing sharing of satellite communication frequency bands and use of multiple earthward antenna beams
[AIAA PAPER 70-468] 11 p1999 A70-25428

Visible light sensors application in LES control system for circular near equatorial orbits
[AIAA PAPER 70-477] 11 p2107 A70-25432

ATS-3 hydrazine orbit control system efficiency evaluation statistical method, considering stationkeeping maneuvers
[AIAA PAPER 70-460] 11 p2121 A70-25464

Systematic errors of reference star catalogs in satellite geodesy, discussing influence on orbit predictability
11 p2045 A70-26180

Satellite trajectory parameters estimation by maximum likelihood method applied to continuous satellite observations assuming random Gaussian process as measurement error
11 p2081 A70-26780

Satellite motion initial phase vector estimation for calculating satellite motion from selection of complete or increasing volume of measurements
11 p2118 A70-26781

Orbital perturbations earth satellite due to zonal and tesseral earth gravitational harmonics and external body fields
12 p2302 A70-27671

Aerodynamic moment on satellite with asymmetrically positioned solar cell platforms, analyzing motion around center of mass for diffuse scattering flow
12 p2314 A70-28254

Ground stationed automatic orbital operations system /AOOSY/ for satellites and space probes, discussing flow diagram and Siemens computer programming
13 p2372 A70-28398

Nondimensional aerodynamic forces and moments coefficients independent of air density and acting on satellites in low orbits
13 p2500 A70-28403

Low altitude operational meteorological and navigation spacecraft, discussing need for orbit adjustment by dynamic control
13 p2500 A70-28404

Symphonic communication satellite orbit and attitude stabilization systems components, operation and accuracy requirements
13 p2502 A70-28432

Relative satellite motion equations derived in generalized parameters, obtaining expressions for coefficients of correcting impulses sensitivity to measurements errors
13 p2503 A70-28455

Atmospheric density effect on satellite lifetime and position prediction, utilizing data from Cannon Ball and SPADES low altitude density research satellites
14 p2653 A70-30562

Steady motions stability of gyrostat satellite in central Newtonian gravitational field
14 p2653 A70-30718

Synchronous satellite orbits determination using mathematical model for simulating gravitational perturbations induced by terrestrial globe and foreign bodies
14 p2651 A70-31279

Earth-pointing satellites joined by tether, discussing reel back and drag brake orbital deployment techniques and dynamic behavior
15 p2799 A70-31776

Synergetic plane change maneuver optimal control, combining aerodynamic and propulsive flight phases for efficiency
15 p2715 A70-31784

Moon shadow solar eclipse encounter probability for high altitude satellite in circular earth orbit
15 p2803 A70-32502

Maximum probability estimates for satellite orbital plane, reducing computational labor by eliminating use of maximum likelihood principle in differential formulation
15 p2805 A70-32731

Satellite circular orbital plane rotation by jet thrust, minimizing fuel for fixed time
15 p2813 A70-32742

Satellite equations of motion in noninertial instantaneous astronomical system, taking into account perturbation equations terms
17 p3155 A70-34684

Intermediate elliptical orbits for planetary satellites with small inclination to equatorial plane
18 p3312 A70-36174

Artificial satellite theory main problem for small and moderate eccentricities, using perturbation techniques based on Lie transforms for computer programming
18 p3334 A70-37062

General potential function in triaxially ellipsoidal coordinates for Laplace equation, examining near earth satellites and Vinti potential
18 p3334 A70-37064

Satellite orbit theory error bounds and initialization, investigating first order von Zeipel method in axisymmetric force field
18 p3320 A70-37067

Position and velocity of geodetic drag free satellite in near circular orbit, including lunar-solar gravitational effects and zonal and tesseral harmonics
[AIAA PAPER 70-1054] 19 p3528 A70-38869

Orbital and physical parameters of calibration satellites launched into right circular cylinder and right circular cone
19 p3382 A70-38894

Earth resources satellite orbits and imaging sensors, discussing multispectral spin scanner design
20 p3626 A70-39053

Libration limits of satellite in Keplerian circular orbit, estimating potential energy of perturbing forces
20 p3713 A70-39388

Guidance and navigation system design for automatic stationkeeping one earth orbiting vehicle with respect to other
[AIAA PAPER 70-1005] 20 p3667 A70-39526

German monograph on satellite orbit synergetic plane change maneuver optimal control by entry into denser atmosphere
20 p3705 A70-39924

Resonant and nonresonant satellite eccentric orbits for determination of high order terms in geopotential
20 p3709 A70-40073

Global geoid sections determined by satellite orbit dynamics, using best fitting ellipses
21 p3812 A70-40591

Optimum altitudes for passive ranging satellite navigation systems, using electronic clocks in satellite and navigator receiver
21 p3883 A70-40724

Computer algorithm for optimal linear impulse corrections to satellite orbit under inequality type constraints
21 p3801 A70-40828

Perturbation of body motion in vicinity of smallest primary according to Huang model of restricted four body problem, discussing near lunar satellite application
21 p3884 A70-40874

Magnetic desaturation of inertia flywheels of satellite in equatorial or slightly inclined orbit, discussing satellite stabilization
22 p4110 A70-42488

Radiation forces on flat plate in ecliptic earth orbit applicable to satellite attitude dynamics during pitching libration
22 p4125 A70-43437

Baseline length and orientation of closely coorbiting satellites estimated by combined onboard sensor and ground tracking data
[AIAA PAPER 70-39] 23 p4243 A70-44505

Recoverable stages for satellites low to stationary orbital transfer, taking costs into account
23 p4245 A70-44671

Parameter optimization of gravity gradient stabilized satellite in circular orbit, considering minimum transition time and eccentricity oscillation
23 p4264 A70-45014

Rapid satellite orbit prediction program by numerical integration including oblateness squared and radiation pressure effects over long time spans
24 p4406 A70-45528

Satellite orbital element values and perturbation parameters from incomplete element system, using maximum likelihood principle
24 p4406 A70-45529

Satellite orbital elements determination by differential correction procedure, considering observation stations distribution influence on accuracy
24 p4406 A70-45530

Satellite orbital elements calculation using ellipsoidal harmonics for geopotential representation
24 p4406 A70-45531

Lunar mass and gravitational fields determined from lunar satellite dynamics
24 p4407 A70-45533

GEOS A and OGO-4 satellite orbits and trajectory analysis using Definitive Orbit Determination System, discussing tracking stations error role
24 p4407 A70-45536

Error analysis of satellite orbits obtained by synchronous satellites range and range rate measurements
24 p4407 A70-45539

Resonant satellites geodesy, determining orbit perturbation and gravity constant via mean Kepler elements high speed analysis
24 p4408 A70-45540

Echo 1 satellite orbital acceleration correlated with solar activity, determining atmospheric density from drag observations using PERLO computer program
24 p4408 A70-45552

Upper atmosphere diurnal, annual and solar activity induced density variations effects on satellite orbits
24 p4408 A70-45553

Atmosphere and earth-reflected solar radiation pressure effects on high altitude satellite orbits
24 p4408 A70-45555

Balloon satellites orbital accelerations, considering effects due to air drag, solar radiation pressure and spin
24 p4409 A70-45557

Echo 1 and PAGEOS 1 orbital elements variations, determining perturbing effects of earth albedo radiation pressure
24 p4409 A70-45558

SATELLITE ORIENTATION

Satellite triangulations scale and orientation control, describing terrestrial methods of geodetic bases determination
02 p0254 A70-11755

Synchronous satellite attitude measurement during early flight and operating conditions, describing PAS satellite attitude sensor configurations
03 p0581 A70-13844

Satellites gravity-gradient stabilization by flywheels in elliptical orbits, designing control system for orientation and optimal motion damping
03 p0582 A70-14321

Spacecraft orientation control without measuring vehicle angular velocity based on transient response and oscillations damping effectiveness
04 p0760 A70-14428

Pulsed plasma and ion microthrusters providing satellite attitude and position control
05 p0896 A70-16119

Attitude performance of GEOS 2 gravity gradient spacecraft, discussing prelaunch design and post-launch analyses
06 p1154 A70-17162

Solar, albedo and earth thermal radiations absorbed by partially obscured spacecraft calculated on digital computer for various orbital positions
06 p1173 A70-17556

Instantaneous and integral solar irradiance of earth oriented satellite surface, noting solar illumination nomogram representation
06 p1155 A70-17893

Baseline length and orientation of closely co-orbiting satellites estimated by combined onboard sensor and ground tracking data
[AIAA PAPER 70-39] 06 p1146 A70-18186

Aeros satellite active magnetic position control system of axis and spin noting design and operation
[DGLR-69-056] 07 p1393 A70-19148

Stationary satellite perturbed motion calculations, assuming small initial orbital eccentricity and inclination and revolution period close to that of earth
07 p1386 A70-19485

Optimal longitude rendezvous for geostationary satellite by using inertially fixed orientation thrust for performing final positioning
[ONERA-TP-801] 10 p1941 A70-24541

Gravity gradient satellites equilibrium attitude error analysis showing relative effects of error sources
10 p1951 A70-24825

Satellite orientation by determining rotation parameters about centers of mass with respect to certain coordinates
11 p2128 A70-26782

Proton 2 satellite orientation and motion about center of mass determined from telemetric data analysis under aerodynamic moment
11 p2128 A70-26783

- Satellite aerodynamic characteristics, considering orbital position and attitude of cylindrical body and separate plate
11 p1218 A70-26795
 - Artificial earth satellites orientation determined by onboard telemetric measurements, constructing model for rotational motion around center of mass
12 p2314 A70-28255
 - Elektron 2 and 4 satellites orientation based on onboard solar and magnetic sensors
12 p2314 A70-28256
 - Electromagnetic control system for spin rate and axis orientation of ISIS ionospheric research satellites, describing design parameters
13 p2501 A70-28414
 - Spacecraft orientation control without measuring vehicle angular velocity based on transient response and oscillations damping effectiveness
13 p2503 A70-28453
 - Orbiting gyrostats equilibrium orientations under gravitational torques, considering internal angular momentum effects
14 p2655 A70-31364
 - Attitude dynamics of slowly spinning axisymmetric satellites under influence of gravity gradient torques, using analytical and numerical techniques
15 p2809 A70-31778
 - Spin stabilized Project Scanner spacecraft attitude determination by star mapping technique, describing optics, photomultiplier, reticle, electronics and sun shield
15 p2772 A70-31791
 - Stationary satellite perturbed motion calculations, assuming small initial orbital eccentricity and inclination and revolution period close to that of earth
15 p2805 A70-32730
 - Holographic device for satellite attitude determination, providing three axis reference information in analog or digital form from single star field sampling
16 p2946 A70-33158
 - Scanning celestial attitude determination system /SCADS/, providing triaxial information for earth stabilized satellites
16 p2946 A70-33159
 - Manned and unmanned orbital space facilities pointing and stability requirements, noting application to stellar and solar astronomy, earth observations, etc
16 p2979 A70-34068
 - Spin stabilized satellite reorientation, using magnetic dipole interaction with geomagnetic field
17 p3179 A70-35287
 - Satellite optimal guidance, discussing gyroscope application for stabilization and orientation control
17 p3181 A70-35691
 - Optimal orientation control of axisymmetric rotating space vehicle, using cyclic sliding mode theory
18 p3332 A70-36162
 - Nonspinning symmetrical satellite in circular orbit, analyzing laterally oriented rotor effect on attitude stability
19 p3533 A70-38340
 - Spacecraft principal inertial axis orientation estimation, comparing tangent 2 theta method with eigenvalue solution
20 p3660 A70-40361
 - Space vehicles dimensions effects on working fluid mass and power required for orientation
21 p3927 A70-40826
 - Artificial earth satellite orbit perigee motion, calculating perturbation effect due to gravitational and magnetic fields on orientation and rotation
21 p3884 A70-40843
 - Baseline length and orientation of closely co-orbiting satellites estimated by combined onboard sensor and ground tracking data

08 p1582 A70-20967
 - Nutation damping in gyrostat stabilization for multispin satellites in terms of energy momentum and damping torque arguments
11 p2119 A70-25357
 - Capillary barriers to provide propellant positioning, expulsion capability and slosh damping for spacecraft propulsion systems during rotational maneuvers
11 p2123 A70-26119
 - Errors in determining controlled satellite rotation periods, proposing scheme for corrected trajectory calculation of small eccentricity orbits
11 p2118 A70-26779
 - Satellite orientation by determining rotation parameters about centers of mass with respect to certain coordinates
11 p2128 A70-26782
 - Proton 2 satellite orientation and motion about center of mass determined from telemetric data analysis under aerodynamic moment
11 p2128 A70-26783
 - Motion stability of rapidly spinning satellite, discussing elastic booms effect
11 p2128 A70-26784
 - Linear periodic coefficient differential equations stability analysis by infinite determinate method, considering applications to damped mechanical systems motion and dual spin satellite
12 p2261 A70-27813
 - Aerodynamic moment on satellite with asymmetrically positioned solar cell platforms, analyzing motion around center of mass for diffuse scattering flow
12 p2314 A70-28254
 - Artificial earth satellites orientation determined by onboard telemetric measurements, constructing model for rotational motion around center of mass
12 p2314 A70-28255
 - Spinning sun oriented satellite using magnetic coil around spin axis for attitude control, detailing design
13 p2502 A70-28439
 - Rotational stability of spacecraft with hinged inelastic rods determined in first approximation from motion equations
13 p2503 A70-28451
 - Earth satellite motion about center of mass, examining effects of random variations in atmospheric density, geomagnetic intensity and solar radiation
15 p2809 A70-31650
 - Attitude dynamics of slowly spinning axisymmetric satellites under influence of gravity gradient torques, using analytical and numerical techniques
15 p2809 A70-31778
 - Book on celestial mechanics covering perturbation methods, two body problems, astronomical coordinates, orbital mechanics, satellite rotation, gravitational effects, etc
15 p2799 A70-31998
 - Ball in tube nutation damper for spinning satellite, describing design, testing and fabrication techniques for achieving low friction level
16 p2985 A70-34136
 - Balloon satellites brightness change from rotation effects, analyzing light curves
16 p2980 A70-34317
 - Dual spin satellites considered as deformable flexible gyrostats, obtaining stability criteria
17 p3177 A70-35234
 - Nonlinear three nodes analysis for thermal design of spinning spherical satellite
17 p3177 A70-35249

Japanese scientific satellite magnetic attitude and spin rate control system design and computer simulation 18 p3332 A70-36065

Liapunov stability analysis of dynamic systems described by simultaneous ordinary and partial differential equations of motion, applying to satellite spin stabilization [AIAA PAPER 70-1045] 19 p3472 A70-38860

Torque free spinning satellite with flexible appendages, investigating design parameters effects on nutational stability [AIAA PAPER 70-1046] 19 p3534 A70-38861

Libration limits of satellite in Keplerian circular orbit, estimating potential energy of perturbing forces 20 p3713 A70-39388

Freely spinning satellites gimbal and momentum wheel system, determining stable equilibrium states by analog computer simulations [AIAA PAPER 70-982] 20 p3714 A70-39547

Motion and stability of rotating connected two body space station satellite system, developing Lagrangian equations of motion and optimizing damping system parameters [AIAA PAPER 69-919] 20 p3716 A70-39678

Magnetic damper motions in rapidly spinning satellite 21 p3927 A70-40833

Artificial earth satellite orbit perigee motion, calculating perturbation effect due to gravitational and magnetic fields on orientation and rotation 21 p3884 A70-40843

Comparative stability of freely spinning satellites for arbitrary number of flexible booms in rotation plane 22 p4111 A70-43440

Spacecraft thin walled tubular booms thermal curvature time constants in relation to solar induced despin of satellites 23 p4258 A70-44521

Rotating cable-connected orbital space stations deployment dynamics, considering cable mass and motion equation 23 p4258 A70-44529

Dynamic systems stability with periodically varying parameters analyzed by Hill type infinite determinant, exemplifying helicopter rotor aeroelastic stability in forward flight 23 p4220 A70-44556

Optimal moments of inertia of rigid satellite in circular orbit by generalization of Beletskij concept, discussing libration boundaries 23 p4261 A70-44677

Freely spinning gyrostatt satellites with dissipation, deriving rotational motion equations by osculating elements method 23 p4261 A70-44681

Lunar libration amplitude estimation, using stochastic process theory 23 p4247 A70-44771

Artificial satellite motion about center of mass, considering gravitational and magnetic effects, resonance effects, motion stability, etc 24 p4415 A70-45548

Dynamics of spin-stabilized flexible satellites of long crossed dipoles or slender beams, noting Alouette and ISIS-1 spacecraft 24 p4415 A70-45549

SATELLITE TELEVISION

High power TV broadcast satellite subsystems technologies requirements, considering transmitters, power conditioners, solar arrays and component reliability [AIAA PAPER 69-1069] 01 p0194 A70-10632

TV broadcast satellite system operating with home receivers or special receivers, evaluating technological and cost factors [AIAA PAPER 68-1061] 01 p0044 A70-10831

Future phase of satellite TV programs distribution in Europe 02 p0403 A70-12645

Ranger, Surveyor and Lunar Orbiter televised and reconstructed picture quality, suggesting improvements in existing photographic systems 03 p0490 A70-13656

Satellites for meteorological and geographical studies using information from TV and IR pictures 08 p1487 A70-20716

Earth resources satellite TV cameras operating on different spectral bands, discussing data preprocessing for correlation with topographic maps 09 p1674 A70-22259

Satellite applications to TV broadcasting for developed and developing areas, considering national and international telecommunications policies 09 p1633 A70-22634

Satellite TV transmission economic, technical and practical feasibility, describing direct transmission system 09 p1634 A70-22766

Direct domestic reception of TV signals from satellites, discussing microwave components, economics and reliability 10 p1840 A70-24448

TV system for satellite antenna boom position monitoring, describing camera system and programming, imaging techniques, position calibration, etc 10 p1891 A70-24898

Software production for Brazilian Advanced Educational Technology System 11 p2152 A70-25403

Satellite distribution of TV signal over earth surface as alternative to terrestrial linkups, overcoming rain attenuation by high power spot beam [AIAA PAPER 70-454] 11 p1997 A70-25410

TV network distribution in Canada by communications satellite and terrestrial microwave links, discussing signal to noise ratios and picture quality [AIAA PAPER 70-430] 11 p1998 A70-25417

ACME hybrid airborne satellite TV and communications system for India, using airborne TV transmitters [AIAA PAPER 70-472] 11 p1998 A70-25418

Educational satellite TV for developing countries, giving model relating economic development to education and applied technology [AIAA PAPER 70-514] 11 p2152 A70-25429

Satellite ETV/ITV broadcast system, discussing frequency, receiver population, channel number, beam number, minimum cost solutions, etc [AIAA PAPER 70-452] 11 p1999 A70-25437

Satellite TV broadcast requirements impact on high power transmitter design, permitting low cost terrestrial receiving systems [AIAA PAPER 70-434] 11 p1999 A70-25450

Low cost earth station and antenna for Canadian domestic satellite, bringing color TV to northern territories [AIAA PAPER 70-432] 11 p2000 A70-25458

High power transmitters for satellites, discussing optimum configurations, supporting power subsystems, breakdown problems in space environments, etc [AIAA PAPER 70-436] 11 p2000 A70-25459

Frequency sharing between satellite-transmitted FM TV signals and terrestrially transmitted AM-VSB TV signals [AIAA PAPER 70-438] 11 p2001 A70-25467

Communications satellite for Alaska and Mountain States TV defined using computerized synthesis program [AIAA PAPER 70-453] 11 p2001 A70-25473

Dual conversion receiver for remote frequency control in satellite TV distribution system [AIAA PAPER 70-414] 11 p2002 A70-25482

Ground frequency converters for reception of NTSC color TV transmission from synchronous communication satellites, tabulating cost estimates [AIAA PAPER 70-440] 11 p2002 A70-25490

Microwave converter system for ETV satellite reception, discussing characteristics and costs for mass production [AIAA PAPER 70-439] 11 p2017 A70-25493

Multipurpose domestic satellite system design for TV distribution, discussing frequency sharing, synchronous orbit and system model 12 p2183 A70-26998

Heavy squalls observations by satellite TV and radar, considering wave disturbances at cold front 13 p2444 A70-28585

Monograph on troposphere pressure, temperature and humidity and satellite TV photographs interpretation 13 p2446 A70-29786

Meteorological satellites TV pictures processing for hydrological information, emphasizing snow photographs interpretation 14 p2601 A70-30138

TIROS weather satellite TV system providing observations to ground stations via ESSA satellites 14 p2654 A70-31148

Space research cost effectiveness in weather forecasting, TV broadcasting, space biology and medicine, geodesy, aerial and maritime navigation, earth resources, etc 15 p2811 A70-32283

Celestee TV photometer system operation on-board OAO by mathematical simulation 16 p2906 A70-33174

Earth resources technology satellite /ERTS-A/ for Eros program, producing telemetric imagery spatially correlated to earth surface 16 p2898 A70-34046

Earth resources satellite /ERS/ TV camera configurations, return beam vidicon camera characteristics and devices for TV picture reproduction on film 16 p2915 A70-34312

UN space committee discussion on rules governing direct TV broadcasting by satellite, taking into account frequency allocation, geostationary orbits, etc 17 p3201 A70-35779

International norms establishment for direct TV broadcast by satellites 17 p3201 A70-35780

Legal problems in satellite communications, emphasizing copyright, satellite television legality and protection of transmission and broadcasts 17 p3203 A70-35800

Satellite-borne UV TV system for photometric investigations of UV stars 19 p3428 A70-38456

Satellite TV cloud picture digital representation, deriving algorithms for statistical analysis of geometrical features 19 p3463 A70-38755

U.S. nationwide satellite network for multichannel community antenna TV /CATV/ operated at 12 GHz band 19 p3382 A70-38891

Earth resources satellite missions TV systems design, using vidicon as sensing element 20 p3626 A70-39052

Space law aspects of direct broadcasting satellites for TV and sound transmission 20 p3740 A70-39408

Satellites for direct radio and TV broadcasting, considering system quality and cost, network planning, frequency economy, etc 20 p3588 A70-40158

Low cost microwave receiver and antenna for instructional satellite TV broadcasting in developing nations 21 p3789 A70-41355

Ground TV station network operating with communication satellites in remote areas 23 p4159 A70-43758

SECAM video and audio color TV transmission over Molniia satellite relay path 23 p4162 A70-44091

Educational TV system via satellite, discussing social benefits for Spanish speaking countries in South America 23 p4285 A70-44602

ITOS-1 second generation meteorological satellite launched with Delta N booster, providing direct APT global readout and AVCS TV data recording for playback 23 p4259 A70-44615

Low cost microwave antenna-receiver for satellite FM TV signal reception at SHF and conversion for standard sets 23 p4164 A70-44645

TV broadcast satellites program distribution direct to home by network and by community 23 p4164 A70-44646

Juridical problems in satellite direct TV broadcasting, discussing regulation proposals submitted to UN and educational applications 24 p4430 A70-45596

OAO 2 satellite Telescope astronomical TV system, describing various developmental problems for future guidelines 24 p4415 A70-45824

SATELLITE TRACKING

Postlaunching operations putting HEOS 1 satellite into orbit, verifying subsystem functions, starting experiments and tracking for data recovery 01 p0197 A70-11117

European Space Operations Center activities in observing HEOS 1 satellite, discussing launch, data processing and S-11 experiment involving ionized Ba cloud creation 01 p0197 A70-11118

Satellite tracking antennas servo design including adaptive and compensation methods and digital computer applications 01 p0011 A70-11453

Least squares method adjusting observation functions in satellite triangulation with correlated observations 01 p0082 A70-11455

Collection of articles on satellite observations, Number 8 02 p0361 A70-11751

Satellite positions from simultaneous measurement by laser along geocentric arc usable for determining earth mass center position 02 p0253 A70-11752

Space triangulation equations based on simultaneous measurements of satellite topocentric coordinates and distances between tracking station and satellite 02 p0254 A70-11753

Satellite tracking at several stations at synchronized time to obtain satellite positions, station coordinates and to improve orbital elements accuracy 02 p0254 A70-11760

Mathematical relations and procedures for automatic satellite tracking by four axis Zeiss camera, discussing motion along small circle approximation and punch tape criteria 02 p0255 A70-11770

Automatic four axle satellite tracking camera design and operational principle, examining lens aberration 02 p0294 A70-11771

Satellite topocentric equatorial coordinates determination from photographic observations 02 p0363 A70-11773

Automatic camera theodolite at Sophia satellite tracking station, discussing instrument constants 02 p0273 A70-11774

Satellite mounted mm wave parabolic dish antenna for tracking communication satellite in synchronous orbit

02 p0392 A70-11933

Laser position finding of satellites fitted with corner reflectors, discussing atmospheric attenuation and applications to global triangulation and gravitational field measurements

02 p0256 A70-12083

Laser range finding by mobile missile station compared with geodesic satellite telemetry by ground station

02 p0312 A70-12212

Q switched and high energy pulse laser devices for location of satellite photographed by night against background of stars, including optimization in noise

[ONERA-TP-753] 02 p0313 A70-12369

Digital onboard telecommunications and tracking equipment based on Dioscures two satellite system for L band operation

03 p0442 A70-12990

Visual photometric tracking data obtained in SPIN program for satellites 1965-II-4 and 1965-53-6 at Kishinev station

03 p0444 A70-13181

Earth satellite tracking data reduction for determining geodetic ground nets, examining errors in triangulation procedures

03 p0445 A70-13184

Gravimetric and satellite tracking data reduction for determining coefficients in mathematical expansion representing earth gravitational field

03 p0473 A70-13189

Satellite surveys and astronomic-geodetic nets for joint terrestrial, space triangulation and gravimetric measurements, including laser distance determination

03 p0445 A70-13191

Great circle vector formula in space triangulation, discussing topocentric and geocentric position of satellite and tracking stations and absolute distance determination

03 p0445 A70-13193

Space triangulation net using direction and distance measurements from satellite photographic and Doppler observations, including tracking data leveling

03 p0446 A70-13194

Satellite optical tracking data in space geodesy, determining stations position from minimum number of stations and observations with time errors

03 p0446 A70-13195

Ruby laser experiment in illuminating satellites equipped with retroreflectors to determine satellite position in space from range and photographic data

03 p0450 A70-13674

Directional transponders for telemetry command, tracking and communications in retrodirective communication satellites

03 p0457 A70-13838

Potential determination from gravity disturbances along fixed direction in analysis of residuals of Doppler tracking of Lunar Orbiter satellites for moon gravity field

03 p0577 A70-14177

Laser ranging systems used with retroreflecting satellites in geodetic and geophysical applications

05 p0815 A70-16691

Triaxial universal astrometric instrument for tracking artificial satellite path with eyepiece crosswire, considering instrument errors

05 p0851 A70-16698

Gravity anomalies of moon mapped by time differentiation of Doppler-tracked satellite velocities, noting isostatic equilibrium

05 p0915 A70-16827

Baseline length and orientation of closely co-orbiting satellites estimated by combined onboard sensor and ground tracking data

[AIAA PAPER 70-39] 06 p1146 A70-18186

Satellite radio tracking systems noting interferometer most suitable for accuracy and maintenance

08 p1463 A70-21712

SPOT navigation satellite system for near instantaneous fixes or continuous tracks providing height, velocity and automatic guidance and control signals

09 p1723 A70-23041

Sequential collation of range/SECOR/ satellite tracking system using electronic phase comparison for measuring ground station-satellite distance

09 p1724 A70-23047

Satellite photograph equatorial coordinates dependence on magnitude of evaluated region, objective distortion and transformation methods

09 p1679 A70-23056

Satellites equatorial topocentric coordinates determination from photographic observations

09 p1763 A70-23328

Short arc method and spatial fitting of orbit in satellite triangulation, establishing sequential order between methods

09 p1670 A70-23440

Telemetry tracking and command antenna array of Central German Ground Station for satellite communication [DFVLR-SONDDR-52]

11 p2017 A70-25800

Satellites photographic positions accuracy compared with stars based on stellar coordinates, investigating causes of difference

11 p2008 A70-26198

Satellite position fixing based on electromagnetic angle measurements from observation station, using least squares method

14 p2612 A70-30187

French EOLE tracking satellite-balloon network for global atmospheric data, describing satellite and electronic instrument package

14 p2611 A70-31154

Report to COSPAR on space research covering satellite tracking telemetry, Apt, meteorology, cosmic rays, solar activity and international cooperative programs, etc

15 p2829 A70-31709

Report to COSPAR on Czechoslovakian space research /1969/ covering satellite telemetry and tracking, proton flares, aeronomy, etc

15 p2829 A70-31710

Report to COSPAR on space exploration research in Poland including satellite tracking, geodesy, meteorology and aerospace medicine

15 p2830 A70-31721

Phased array monopulse autotracking, radiointerferometer and Doppler frequency methods for radio tracking systems for artificial satellite orbits

15 p2697 A70-31836

Earth-satellite range measurements using broadband pseudonoise modulation and delay lock tracking method

15 p2705 A70-32724

Laser range finding to satellite equipped with retroreflectors, noting accuracy dependence on signal strength

16 p2925 A70-33021

Automatic speech recognition and tracking techniques of moving objects, considering applicability to processing data from earth resources satellites

16 p2871 A70-34313

Scientific satellites orbit determination and improvement procedures for tracking system based on Doppler frequency and angular measurements

17 p3046 A70-35280

Weather occultation satellite orbit determination by radio wave measurements between master and slave satellites, formulating mathematical model

[AIAA PAPER 70-1067] 19 p3529 A70-38880

Orbit determination accuracy in synchronous satellite tracking analysis, using weighted least squares method

[AIAA PAPER 70-1068] 19 p3529 A70-38881

Artificial satellite position visual estimates based on geometric relationship to reference stars pair accuracy

19 p3531 A70-38946

Timing systems using Cs frequency standard for satellite tracking

21 p3828 A70-41697

Satellite tracking camera lens-distortion coefficient from comparison of standard stellar and measured X-Y coordinates

22 p4029 A70-42596

Nautical loci of constant azimuth of artificial satellite at corridor height in circular orbit at arbitrary inclination, using gyroscope and radio sextant

22 p4068 A70-42664

VHF geostationary satellite ranging and range correction systems, calculating second-order ionospheric delay effects on position error

22 p4068 A70-43590

Baseline length and orientation of closely co-orbiting satellites estimated by combined onboard sensor and ground tracking data

[AIAA PAPER 70-39] 23 p4243 A70-44505

Laser measurements in semidynamic space geodesy on D1-D satellite using Mediterranean stations

24 p4352 A70-45541

SATELLITE TRANSMISSION

High power TV broadcast satellite subsystems technologies requirements, considering transmitters, power conditioners, solar arrays and component reliability

[AIAA PAPER 69-1069] 01 p0194 A70-10632

Numeric keyboard CRT display for weather data acquisition from ships at sea, utilizing ATS-3 satellite as transmission medium

01 p0048 A70-11279

Ionospheric electron concentration irregularities via satellite signal scintillation analysis, using radio wave diffraction theory

02 p0258 A70-12562

Magnetoionic mode coupling in satellite transmissions through ionosphere near transverse region, showing diurnal variations and error of electron content

02 p0259 A70-12563

Application of atmospheric studies to satellite transmissions - Conference, Bedford, Mass., September 1969

02 p0259 A70-12564

Channel constraints on multiple access systems obtained from airborne propagation tests via satellites, studying disparities in received signal strength

02 p0260 A70-12569

Canary Bird synchronous satellite radio signal transmissions scintillations from recordings, noting diurnal scintillation pattern

02 p0260 A70-12573

Wideband satellites bandwidth and aperture limits direct measurement based on ground monitoring of CW signals, taking into account ionospheric dispersion

02 p0261 A70-12577

Future phase of satellite TV programs distribution in Europe

02 p0403 A70-12645

Traveling ionospheric disturbances from signatures left in columnar electron content records obtained by measuring signal Faraday rotation angle from geostationary satellite

03 p0477 A70-13991

Data transmission from automatic space stations on Mars and Venus, considering relaying via artificial planet satellite or direct transmission to ground station

04 p0648 A70-14931

Electron density profiles along OGO 1 orbit portions calculated by measuring harmonic radio beacon transmissions differential Doppler frequencies and Faraday polarization rotation angle

04 p0741 A70-15118

Magnetoionic mode coupling in satellite transmissions through ionosphere near transverse region, using electron concentration profiles for night and daytime estimates

04 p0650 A70-15131

ESRO 1 thermal behavior, discussing trajectory effects, onboard temperature measurement, data storage, data transmission, telemetered data and data comparison

04 p0762 A70-15164

Frequency bandwidth reduction for geophysical data transmission from satellites or lunar stations by time correlation of signal and transmission channel band changes

05 p0847 A70-15968

Second antenna at Pleumeur-Bodou /France/ for satellite transmissions reception in Intelsat network program

05 p0826 A70-15981

Weather data communication, discussing transmission of radar, polar satellite and ATS satellite data to processing center and forecasts dissemination to public media

05 p0814 A70-16327

Microelectronic L-band phase-lock loop receiver for data transmission between earth stations and satellites

06 p1017 A70-17338

Wideband transmission of photographic reconnaissance information over long distances using Initial Defense Communication Satellite Program satellites

06 p1006 A70-17346

Rate of change of radio ray path length for transionospheric satellite VHF signals determined from Doppler and Faraday effect analyses

06 p1008 A70-17578

Ionosphere disturbances due to high altitude thermonuclear explosions, discussing experimental proof by cosmos satellites short wave transmitter radio signal scintillation statistical evaluation

06 p1057 A70-17888

Satellite signal scintillation phenomenon morphological study and relationship to ionospheric irregularities

07 p1234 A70-19194

Ionospheric inhomogeneities measured by Explorer 22 radio signals emphasizing satellite scintillation

07 p1265 A70-19195

Focusing and saturation effects in radio star and satellite signal scintillations based on diffraction and refraction theories

07 p1271 A70-20157

Ionospheric electron content and concentration variations analysis based on data of radio waves propagating from satellite, considering Doppler shift and Faraday effect

07 p1237 A70-20427

Ionospheric electron content estimated from measurements of Faraday rotation of VHF signals from geostationary satellite

08 p1489 A70-21388

Signal properties of VHF satellite-to-aircraft communications link, discussing results of ATS tests

08 p1463 A70-21779

Earth resources program data management system, discussing mission control, processing and distribution of data from satellite vidicon cameras and multispectral line sensors

[AIAA PAPER 70-321] 09 p1792 A70-22854

Multiband high resolution spaceborne imagery telemetry with optical mechanical scanners from earth orbiting satellites in earth resource applications

[AIAA PAPER 70-314] 09 p1677 A70-22873

Aircraft and ship position surveillance by satellites system with independent capability and undelayed voice and digital communication

09 p1723 A70-23043

Ionospheric irregularities investigated by rocket- and satellite-borne transmitters, obtaining ionization

profiles from amplitude, phase and polarization of radio waves

09 p1669 A70-23273

Polarization diversity reception effects on VHF telemetry signal from low altitude satellites

10 p1832 A70-23919

SNR and system error rate prediction for coherent nonlinear satellite channels based on bounding techniques

10 p1836 A70-24341

Cost analysis for satellite data system determined for bit rates range and break-even distances

10 p1838 A70-24361

Soviet book on satellite communication systems for telephone and TV transmission covering orbit selection, signal level calculation, channel characteristics for frequency bands, etc

10 p1840 A70-24378

Ionospheric electron content diurnal, latitudinal variations and equivalent slab thickness determined from observing satellite signals Faraday fading

10 p1874 A70-24426

Plasmaspheric columnar electron content determination up to plasmapause by ATS-3 beacon transmitter and combining differential Doppler frequency and Faraday rotation angle methods

10 p1874 A70-24430

Direct domestic reception of TV signals from satellites, discussing microwave components, economics and reliability

10 p1840 A70-24448

Ionospheric irregularities showing dispersive motions from systematic skewness in cross correlation functions for satellite scintillations at spaced receivers

10 p1881 A70-24810

Direct broadcast voice satellite for educational system improvement, discussing lesson formatting, ground receiver/programmer, multichannel capacity, etc

11 p1998 A70-25423

Digital satellite communications systems, discussing time division multiplexing, steerable beam antennas and satellite-to-satellite transmission

11 p2003 A70-25492

Polar ionosphere inhomogeneous electron concentration by analyzing satellite signal amplitude fluctuations received by spaced interferometers

11 p2042 A70-25528

Fixed information bit rate approach to coding over space channel introducing redundancy and check digits for error probability

11 p2014 A70-26223

Fluctuations of polarization induced fading periods in short wave transmissions of Soviet earth satellites, showing relation to ionospheric inhomogeneities

11 p2047 A70-26788

Low latitude scintillations from satellite transmission scintillations correlation with solar activity spread F, electron content and ionospheric irregularities

13 p2397 A70-29189

Satellite scintillation index variation with zenith angle and azimuth at ground station

14 p2574 A70-30739

Electronically tracking antenna system for satellite reception in VHF range suitable for unmanned receiving stations

14 p2558 A70-31196

Prolonged upper ionospheric observations from Sputnik 3, Transit 4A and Explorer 22 signals Faraday fading and phase shifts, showing electron content dependence on solar activity

15 p2731 A70-32093

Ionospheric radio wave propagation from rocket and satellite signal transmission using Faraday and Doppler effects, phase delay and refraction measurements

15 p2698 A70-32095

Ionospheric electron content measurement during solar eclipse of 7 March 1970, using VHF radio waves from geostationary satellites

16 p2897 A70-33830

Ionospheric electron density during solar eclipse of 7 March 1970, using Faraday rotation measurements of geostationary satellites VHF transmissions

16 p2898 A70-33831

F region integrated electron density response during solar eclipse of 7 March 1970, using Faraday rotation of linearly polarized signals from ATS 3

16 p2898 A70-33835

Range and velocity components for ray paths between tracking and data relay satellite and user communication satellite

16 p2866 A70-34073

Receiver for artificial satellite transmission and optical tracking time signals, using crossed dipole directional antenna

16 p2867 A70-34303

Satellite broadcasting frequency resources, discussing interference, frequency sharing, antenna transmitting and receiving patterns, etc

17 p3046 A70-35271

Atmospheric studies application to satellite transmissions - USAF Conference, Boston, September 1969

20 p3589 A70-40476

Faraday rotation of radio beacon satellite signals during traveling ionospheric disturbances simulated for spaced ground stations

20 p3590 A70-40481

Satellite wideband transmission of ionosphere data, monitoring amplitude and phase of phase-coherent CW signals from geostationary satellite

20 p3590 A70-40483

Ionosphere and magnetosphere total electron content from beacon method of measuring difference-differential-doppler (DDD) and Faraday effects via synchronous satellite signal frequencies

20 p3590 A70-40484

Scintillation LF observations with synchronous satellite radio signals at low latitude station, noting magnetic activity effects on night and day scintillations

20 p3590 A70-40488

High scintillation indices associated with vertical spreading of sporadic E layer from minute-by-minute ionograms and signal amplitude recordings from Explorer 22 satellite

20 p3624 A70-40489

High latitude F region irregularity structure during magnetic storm from multistation scintillation observations of ATS 3 transmission

20 p3624 A70-40490

Ionospheric electron density disturbance heights measured via radio signal scintillation from earth satellite, using spaced receiver method

20 p3590 A70-40491

Ionospheric disturbances heights at subauroral latitude from Explorer 22 satellite beacon signals recorded at spaced receivers

20 p3624 A70-40492

Long range low loss earth-detached propagation paths in lower ionosphere indicated via OV4-1 satellite experiment on guided ionospheric propagation

20 p3591 A70-40494

Ionospheric ducting of satellite beacon signals observed on Orbis Cal satellite experiment

20 p3591 A70-40495

Polar ionosphere inhomogeneous electron concentration by analyzing satellite signal amplitude fluctuations received by spaced interferometers

21 p3819 A70-41278

Communications satellite carrier instrumentation, using computer controlled frequency shift radiometer for power monitoring

21 p3826 A70-41345

ATS-5 spacecraft L band propagation performance, describing up and downlink test methods

21 p3790 A70-41363

Aeolus A satellite for position fixing and automatic meteorological signal transmission in link with balloons for tropospheric observation

22 p4068 A70-42665

F region ionospheric disturbances size and shape from radio amplitude and phase scintillations in satellite transmission to ground stations

23 p4187 A70-43879

SATELLITE-BORNE PHOTOGRAPHY

Photogeological mapping at medium to small scales, comparing satellite transparencies with aerial photographs

02 p0298 A70-12202

Simultaneous ground and space triangulation procedures, recommending use of satellite photographic observations for error reduction

03 p0445 A70-13185

Martian orbital photographic missions objectives and sensors realizable capabilities, discussing relationships between orbital parameters and imaging systems constraints

03 p0490 A70-13663

Earth resources applications of Apollo 6 photography, describing camera system and photographic coverage

03 p0474 A70-13672

Land use mapping of southwestern U.S. using photographs from Apollo and Gemini missions

[AAS PAPER 69-576] 04 p0676 A70-14640

Earth photographs for geotectonic research from manned orbiting spacecraft, describing Apollo and Gemini belts

[AAS PAPER 69-579] 04 p0677 A70-14663

Geological contribution of satellite photography, discussing synoptic surveyability of vast areas and reduced scale maps of little known remote territories

05 p0837 A70-16073

Sea surface sunglint pattern irregularities in earth orbiting satellite photographs, observing dark patches

05 p0838 A70-16152

Spiral cloud vortex model in occluded extratropical cyclone constructed using atmospheric dynamics equations and satellite photographs

05 p0879 A70-16642

Phobos and Deimos photographic reconnaissance feasibility during 1971 orbiter and 1973 Viking missions, studying trajectory

[AIAA PAPER 70-60] 06 p1146 A70-18191

Remote sensors application to direct and indirect fish detection in fishery research, using aerial and Gemini photography

07 p1262 A70-18957

Three vector coplanarity equations for space geodetic triangulation grid, discussing role of satellite photographic observation

09 p1667 A70-22488

Multispectral point scan camera system as remote sensor for Earth Resources Satellite, noting real time automatic data processing and interpretation

[AIAA PAPER 70-319] 09 p1677 A70-22867

Satellite photographs for geological mapping and research assessed against interpretation of field data and conventional aerial photographs

10 p1876 A70-24640

Simple layer model of geopotential from satellite-borne Baker-Nunn camera observations

10 p1876 A70-24645

Photogrammetric map compilation from orbital satellite photographs, with fictitious and ground coordinates generated by electronic computer, discussing error sources

10 p1890 A70-24728

Cloud cover effect on earth photographing space missions by Monte Carlo computer simulation, using worldwide cloud statistics

11 p2075 A70-25600

Satellite photographic plate reduction - COSPAR Conference, Prague, April 1968

11 p2006 A70-26179

Classical astronomical photographic methods for reducing satellite photographs taking into account linear and nonlinear methods, analyzing random errors

11 p2006 A70-26184

Reduction of satellite photographic data using transformation functions

11 p2007 A70-26186

Plate reduction method for Schmidt satellite camera, considering satellite position, distortion parameters, etc

11 p2007 A70-26193

Data compression for telemetry transmission with sample choice based on time-varying stream slope thresholds illustrated for Ranger photograph

11 p2010 A70-26305

Lunar surface mapping and far side gravity field probing by satellite photogrammetry

12 p2308 A70-27874

Earth global photography by satellites, discussing photointerpretation

12 p2227 A70-28270

Cyclone cloud vortex evolution from satellite photographs, examining reasons for onset and disintegration

13 p2444 A70-28588

Satellite photographs interpretation for cloud types and patterns with allowance for transmission characteristics, image cut-off at corners and sun angle and glint

13 p2394 A70-28786

System design for IR imaging radiometer from synchronous altitude satellite, considering spacecraft dynamics, detectors and cooling

14 p2586 A70-30974

Lunar soil and rocks photometric and polarimetric properties from high resolution Surveyor pictures

14 p2644 A70-31054

Long term effects model evaluation of meteoritic impact against lunar surface compared with analyses of Lunar Orbiter photographs

14 p2645 A70-31062

Cloud distribution and optimal satellite picture foreshortening for global meteorological analysis of atmosphere, using Zond 7 photograph

15 p2771 A70-32110

Onboard IR receiver and ground photorecorder for Meteor satellite cloud tracking, using computer processed data

15 p2738 A70-32112

Anomalous dark areas in sunglint patterns from ATS photographs, considering water temperature effect on ocean surface conditions

16 p2897 A70-33725

ATS spin scan cloud cameras mechanical design and operation

16 p2914 A70-34149

Shallow water bottom biota, sediments and morphology determination by aerial and satellite photography

17 p3079 A70-35620

Surveyor 7 TV system in photon integration mode, analyzing slow scan vidicon storage characteristics and dark current limitations

[SMPTE PAPER 105-72] 17 p3095 A70-35635

Cloud-free earth areas determined via reflected radiance measurements from ATS 3 cloud camera

17 p3133 A70-35930

Satellite-borne UV TV system for photometric investigations of UV stars

19 p3428 A70-38456

Multispectral photography in earth resources research, noting three return beam vidicons for technology satellites

20 p3628 A70-39128

Synoptic surface and upper air analysis and APT mosaics of meridional circulation over Mediterranean by remote satellite images

21 p3846 A70-41399

Ocean swell wavelength and propagation direction measurements, using Fourier optical analysis of Apollo 7 space photography

22 p4029 A70-42766

Ocean roughness determination from satellite photographs sunglint patterns, indicating surface wind speeds

22 p4014 A70-42770

Phobos and Deimos photographic reconnaissance feasibility during 1971 Orbiter and 1973 Viking missions, studying trajectory

23 p4243 A70-44507

North Carolina continental shelf discolored water origin, movement and dissipation from Apollo 9 photograph interpretation

24 p4329 A70-45361

SATELLITE-BORNE RADAR

Satellite coherent side-looking imaging radars producing radar maps with photographic-type quality

11 p2005 A70-26038

Pulse compression for geodesy satellite radar altimeter, considering tradeoff based on system accuracy, power and life

16 p2911 A70-33715

Measured heat flux conversion into average radiation incident on convex satellite surfaces in test chambers

03 p0606 A70-13536

Space temperature determination, discussing planet or satellite absorption and radiation rate dependence on surface characteristics, solar radiation, planet albedo and thermal radiation

05 p0914 A70-16629

Monograph on ionosphere-satellite interactions, discussing ionosphere layers, plasma sheaths and wakes, electromagnetic wave propagation, spacecraft antennas, etc

10 p1944 A70-24900

Magnetic moment measurement of satellite in near earth orbit, using data transmitted by rectangular magnetic sensors

13 p2454 A70-30032

Nonrigid satellites dynamical equations derivation in modeling by generalized coordinates

18 p3333 A70-36702

Satellite dynamics - Conference, Prague, May 1969

24 p4405 A70-45526

SATURATED HYDROCARBONS U LKANES SATURATION

Critique of double resonance theory in gaseous lasers, including correction regarding saturation parameter for small RF perturbations and line width dependence

01 p0109 A70-10432

Emission saturation in Ar CW laser at high discharge current densities under different pressures and tube channel parameters

08 p1511 A70-20542

Carbon dioxide laser saturated gain constant calculated for low and high electron densities based on thermodynamic approach

13 p2425 A70-28793

Regenerative semiconductor parametric amplifier saturation in forward current mode, assuming harmonic voltages /signal, pumping and difference frequencies/ action at p-n junction

15 p2708 A70-31522

Junction FET potential field and carrier distribution in channel investigated for current saturation mechanism

15 p2708 A70-31841

Single mode gas laser with large saturation and dispersion effects, discussing resonator alignment to spectral line frequency

15 p2752 A70-32196

Conditionally stable feedback control systems with saturation, comparing large signal stabilization methods

16 p2884 A70-33313

Microwave radiometric receiver, analyzing video detector saturation effects on linearity

16 p2880 A70-34075

Saturated nitrogen vapors condensing coefficients measurement by cryostat, comparing results with theoretical prediction

23 p4218 A70-44364

Remanence and saturation methods for magnetic-particle flaw detection

24 p4346 A70-45726

Steel surface diffusive saturation with elements of chlorides, noting role of iron chloride phase in promoting coating uniformity

24 p4350 A70-46332

Carbon steel diffusion saturation with Ti and B, investigating layer depth, weight gain and microhardness dependence on powdered mixture composition

24 p4364 A70-46336

SATURN WORKSHOPS

NT SATURN I WORKSHOP

SATURN [PLANET]

Internal powers and effective temperatures of Jupiter and Saturn measured by aircraft mounted telescope, noting restraints on planetary structure and atmosphere models

01 p0173 A70-10045

Atlas of near IR spectra of Venus, Mars, Jupiter and Saturn obtained by Fourier spectroscopy, discussing observational procedures, data recording and processing

01 p0173 A70-10078

Jupiter and Saturn near IR spectra for relative abundances of atmospheric constituents and distribution with altitude, noting rough solar composition

01 p0179 A70-10526

Atmospheric models of deep atmosphere thermal emission and ionosphere free-free emission used for studying Saturn microwave spectrum

01 p0180 A70-10533

Giant planets structure, calculating Jupiter and Saturn densities using Russell solar mixture and internal heat from central core radioactivity

01 p0181 A70-10663

Methane and ammonia absorption bands and possible structure of Jupiter and Saturn cloud layers by spectrophotometric observations

02 p3666 A70-11807

Polarization observations of Saturn in UV and visible regions compared with Jupiter data, noting multiple scattering

02 p3668 A70-11818

Phase diagrams for binary mixtures at high pressures suggesting layered structures existence in Jupiter and Saturn atmospheres resulting from phase separations in hydrogen-helium mixture

02 p3668 A70-11819

Figure of gravitating inhomogeneous rotating liquid, applying results to Jupiter and Saturn model construction

08 p1564 A70-20558

Fourth Saturn ring detection equipment and procedures, discussing negatives revealing small weak zones near globe equatorial east and west edges

08 p1567 A70-20600

Jupiter and Saturn IR reflection spectra observed with Michelson interferometer-spectrometer, eliminating effects of terrestrial atmospheric absorption, solar spectral lines, etc

08 p1570 A70-20895

Saturn globe, rings and satellites observations /1968-1969/

09 p1751 A70-22198

Saturn ring atmosphere absorption spectrum observation during earth passage through ring plane

09 p1754 A70-22497

Planet Saturn right ascensions tabulation /1967, 1968/

09 p1756 A70-22651

Saturn disk temperature obtained from centimeter wavelength, suggesting possibility of nonthermal radiation

09 p1759 A70-22912

Bode law development from dynamical relaxation suggested from comparison of Jupiter, Saturn and Uranus inner satellite systems with planetary system

09 p1765 A70-23796

Saturn ring IR spectrum, discussing resemblance and discrepancies of ammonia and water frost spectra

10 p1935 A70-23813

Motion of negligible mass body near large mass body affected by larger third body applied to Phoebe-Saturn-sun system

10 p1945 A70-24960

Meteoroidal bombardment effects on material loss or gain in Saturn rings

11 p2113 A70-26471

Saturn observation by astronomers of various countries during earth passage through plane of rings, measuring rings thickness

12 p2298 A70-27279

Saturn rings observations during earth passage through ring plane by Abastumant observatory telescope, describing photometric processing and data reduction

15 p2797 A70-31619

Figure of gravitating inhomogeneous rotating liquid, applying results to Jupiter and Saturn model construction

15 p2805 A70-32713

Secular variations in osculating orbital elements of particle in Saturn ring gravitational field, considering motion in both external and internal space

16 p2973 A70-33226

Uranus and Saturn reciprocal mass determination based on astronomical observations of Saturn and Jupiter respectively

20 p3705 A70-39477

Saturn ring photometric properties, discussing multiple scattering and Seeliger principal photometric theory deviation

21 p3885 A70-40932

Saturn ring radial structure, discussing dynamic model, gravitational forces and perturbation of planetary satellites

23 p4241 A70-44253

SATURN LAUNCH VEHICLES

NT SATURN 1B LAUNCH VEHICLES
NT SATURN 5 LAUNCH VEHICLES
Apollo spacecraft contamination control, discussing Boeing responsibility for engineering, facilities, materials, etc, for Saturn rocket

01 p0058 A70-11077
Saturn launch vehicle systems in terms of design, operating characteristics and potential applications, showing need for reusable space shuttle systems [ALAA PAPER 690703] 05 p0922 A70-15830
Apollo-Saturn Launch Vehicle Targeting Program for Lunar Landing Missions, describing functions of integrated digital computer programs [ALAA PAPER 70-172] 06 p145 A70-18093
Saturn ULLAGE solid propellant rocket motor vibration test evaluation

07 p1365 A70-20039
Test program effectiveness for Saturn Instrument Unit (IU), summarizing objectives, costs and results [ALAA PAPER 70-379] 10 p1891 A70-24924
Real time network support simulation allowing network configuration for nominal or perturbed trajectory for Saturn vehicles, applicable to any flight azimuth [ALAA PAPER 69-936] 20 p3591 A70-39684
Jmsphere wind profiles gust variance and spectrum densities for horizontal wind speeds viewed by Saturn vehicle

21 p3847 A70-41878

SATURN S-1C STAGE

Thermal and pressure environments analysis in Saturn S-1C stage base during flight tests, noting base gas flowfield and heating [ALAA PAPER 69-318] 01 p0195 A70-10833
Temperature profiles and frequency driftings of VHF telemetry transmitters for Saturn S-1C stage, using IR radiation data

12 p2196 A70-27725
Systems operation hybrid simulator for computer checkout of Saturn S-1C stage

17 p3061 A70-35489
Short duration tube wind tunnel supersonic testing, noting Saturn S-1C base heating and solid propellant rocket base burning tests

20 p3606 A70-39698

SATURN S-2 STAGE

Quality information system consisting of closed loop input/feedback methods insuring design requirements of Saturn S-2 stage

14 p2654 A70-31116
Saturn S-2 stage propellant feedlines and J-2 engines simulating structural longitudinal oscillation by analog computer [ALAA PAPER 70-626] 16 p2968 A70-33591

SATURN S-4B STAGE

Apollo spacecraft contamination control, describing McDonnell Douglas role in S-4B stage production

01 p0059 A70-11079
Spent Saturn S-4B stage conversion into orbital workshop in Apollo Applications Program 11 p2122 A70-26044
Seismic echo produced by jettisoned Apollo 12 S-4B stage impact at lunar surface analyzed by multiscade scattering theory

12 p2298 A70-27280
S-IVB liquid rocket engine and propellant feed systems restart shutdown in orbital operations [ALAA PAPER 70-672] 16 p2967 A70-33574
Optical system measurement of density and rotational temperature in gaseous plume simulating auxiliary propulsion and oxygen hydrogen burner of S-4B

16 p2913 A70-34023

SATURN STAGES

NT SATURN S-1C STAGE
NT SATURN S-2 STAGE
NT SATURN S-4B STAGE
NASA automatic checkout systems for Saturn 5 stages and instrument units

21 p3803 A70-40770

SATURN 1 WORKSHOP

Deployable meteoroid shield for Saturn 1 workshop, describing design and hardware kinematics

23 p4257 A70-44386

SATURN 1B LAUNCH VEHICLES

Saturn 1B Orbital Workshop solar array thermal and performance analysis for various vehicle orientations and orbital conditions, emphasizing modeling and data handling

11 p2127 A70-26357

SATURN 5 LAUNCH VEHICLES

Apollo/Saturn 5 space vehicle supporting and restraining mechanisms design and operation, discussing holddown assemblies

01 p0055 A70-10468
Saturn 5 launch vehicle design, role in exploration and anomalous structural vibration and oscillation [ALAA PAPER 69-1094] 01 p0194 A70-10620

Unified Flight Analysis System processing post-flight data from Saturn 5 launches, discussing system components, support programs and performance

02 p0264 A70-12127
Saturn 5 thru-bulkhead initiator for solid propellant rocket motor ignition, discussing transfer design, pressure output and postfire leakage

03 p0546 A70-14105

Predicted and measured low density plume impingement effects on loads and heat transfer compared on orbiting Saturn 5 with oxygen-hydrogen burner engine

04 p0737 A70-15430
Saturn 5 program status to meet mission requirements for manned lunar exploration, space station/base programs and outer planet exploration with unmanned probes [SAE PAPER 690715] 05 p0922 A70-15852

Nuclear propulsion requirements for manned landing mission to Mars assuming Saturn 5-based operation

07 p1375 A70-18874
Saturn 5 Prelaunch Systems Simulation Model for launch opportunity containing multiple launch windows, considering last 26 hours of countdown

08 p1582 A70-20933
Launch load simulation on scaled vibration model concerning Saturn 5 structural integrity and flight failure

10 p1953 A70-25072
Cylindrical shell segments supersonic flutter boundaries engineering estimates related to Saturn 5 booster, obtaining thickness requirement as function of panel geometry [ALAA PAPER 68-284] 11 p2134 A70-25959

NERVA nuclear rocket engine design for Saturn 5 third stage, comparing nuclear and chemical engines performance

12 p2270 A70-26871
Saturn 5 launch vehicle navigation system design, discussing configurations, implementation schemes, system tradeoffs and performance

14 p2613 A70-30453
German monograph on heavy space probes for solar system investigation covering systems analysis, mission success, flight programs, Saturn 5 launch vehicle, etc

17 p3168 A70-35378
Remote sonic monitoring system for Saturn V noise measurement and recording

17 p3094 A70-35521
Saturn 5 launch vehicle targeting methods for lunar missions, solving earth departure variables via iterative process [ALAA PAPER 70-1052] 19 p3528 A70-38867

Saturn 5 suboptimal continuous guidance design, eliminating discontinuous control encountered in SA-502 flight [ALAA PAPER 70-965] 20 p3600 A70-39564
NASA automatic checkout systems for Saturn 5 stages and instrument units

21 p3803 A70-40770
Saturn 5 Apollo booster stages oscillations induced by coupling between vehicle structure and engine thrust corrected within existing systems [ALAA PAPER 70-1236] 24 p4417 A70-45954

SAWTOOTH WAVEFORMS

Sawtooth waveform generator using linear discharge of capacitor

15 p2714 A70-32701
Simple high level shock machine producing trapezoidal and terminal peak sawtooth pulses with Al honeycomb impact material

19 p3396 A70-37832
Pulsars subpulse intensities and shapes in magnetic field, noting drift speed sawtooth patterns

20 p3713 A70-40428

SCALARS

Isotropic incompressible three dimensional turbulence representation by wave vector scalar functions, discussing maximum functions number determination

02 p0277 A70-11878
Scalar potential nonlinear fluctuations in quasi-stationary plasma, deriving expressions for potential spectral function and Langmuir and ion-acoustic fluctuations spectral densities

08 p1550 A70-20844
Scalar-tensor theory in canonical form, discussing neutral particle and electron self energy problem

15 p2773 A70-31439
Magnetic scalar potential of circular loop represented by toroidal coordinate system, solving boundary value problems determining fields of coils and toroidal magnetic conductors

18 p3215 A70-36295
Relativistic thermodynamics, developing relativity theories in nonvacuo regimes and discussing covariant scalars and formalisms

18 p3291 A70-36553
Rayleigh wave scalar electric potential analysis on piezoelectric medium, using iterative techniques for Poisson equation

22 p4074 A70-42967
Polynomial approximation process for scalar nonlinear equation solution, applying to Cauchy problem

22 p4064 A70-43482
Static spherically symmetric charged mass distribution exact solutions derived for electrons in scalar tensor theory of gravity by Hamilton-Jacobi method

23 p4222 A70-44403
Relativistic two body system in circular orbits, examining quantum theory with massless and massive

scalar fields and energy and angular momentum for bound system

24 p4379 A70-45521
Beltrami flows on spherical surfaces, using scalar equations from kinematic conditions

24 p4326 A70-45990

SCALE [CORROSION]

Chemical composition of scale formation in jet engine injectors for various fuel types tabulated, noting buildup levels in transport aircraft and subsonic jets

07 p1362 A70-18651
High temperature scaling of Ni, investigating role of oxide microstructure and growth stresses

15 p2762 A70-32388
Sulfidation kinetics and scale morphology of Cr and Cr-Mo alloys at high temperatures in hydrogen/hydrogen sulfide atmosphere

19 p3452 A70-37827

SCALE [RATIO]

Generalized multiple scales method for solving linear differential equations with variable coefficients applied to Liouville-Green approximation

03 p0518 A70-12994
Acoustic intensity determined from time, length and velocity scales in mixing region of jet from nozzle with turbulent boundary layers

05 p0834 A70-16779
Optimal scale selection for aerial surveys by analyzing aerial photography data

07 p1278 A70-18690
Absolute radiometric reference scale, noting International Pyrheliometric Scale 1956 materialization by standard instruments

15 p2735 A70-31805

SCALE EFFECT

Stress rupture strength dependence on specimen geometry /scale effect/ from analyzing metals failure under prolonged loads

02 p0383 A70-11655
Scaling and refractoriness effect in neutral-pulse train transmission on eye incremental sensitivity, discussing applicability as intraretinal mechanism concept

02 p0247 A70-12466
Scale factor effect on crack development in blanks and structure elements undergoing linear and complex stressed states under cyclic thermal loads

05 p0867 A70-17045
Fatigue limits distribution functions of full-scale machine parts estimated by rupture similarity criterion, discussing stress concentration and scale factor effects

09 p1776 A70-22616
Hollow cylindrical sample scale effect on accuracy of testing heat resistance of brittle materials

10 p1965 A70-25301
Transonic scaling effects for shock boundary layer interaction on circular and two dimensional airfoil models, discussing separation and reattachment [ALAA PAPER 70-541] 13 p2339 A70-29008

Similarity and scaling between atmospheric and wind tunnel simulated shear flows near earth surface

14 p2602 A70-30369
Stress rupture strength dependence on specimen geometry /scale effect/ from analyzing metals failure under prolonged loads

19 p3547 A70-38428
Scale factor effect on brittle fracture resistance for Ti and Al alloys and high strength steels

23 p4265 A70-43936

SCALE HEIGHT

High resolution photometry near planetary limb yielding scale height and optical depth applied to Mariner 4 Mars observations

05 p0909 A70-16387
Gas pressure and pressure stratification in sunspot, using curve of growth analysis

05 p0911 A70-16432
Ionized gas height scale changes in polar ionosphere obtained assuming Chapman type ionization distribution

05 p0841 A70-16738
Topside ionosphere morphology during IQSY, emphasizing plasma scale height diurnal and latitudinal variations role in satellite data interpretation

07 p1270 A70-20073
Topside ionospheric plasma scale height, showing influence of magnetic activity level

14 p2569 A70-30207
Pulsar observations based on magnetic dipole model, discussing turnoff time, emission characteristics, birth rate and scale height

17 p3153 A70-34531
Mean molecular mass determination method for upper atmosphere based on Nicolet equation for scale height, using satellite orbit and spin decay data

17 p3138 A70-35773
Lower chromosphere shock wave heating, analyzing density scale height effects

22 p4105 A70-43001
Topside ionospheric plasma scale height, showing influence of magnetic activity level

24 p4330 A70-46282

SCALE MODELS

Flow profiles in models of human bronchial tree typical junctions, visualizing inspiration and expiration patterns for various Reynolds numbers

01 p0034 A70-10653

High altitude scale model experiment to evaluate rocket plume impingement effects on Manned Orbital Workshop pressures, heating rates, forces and moments

03 p0579 A70-13646

Tower influence of wind speed and direction measurements, comparing 150 meter meteorological tower and scale wind tunnel model

09 p1661 A70-22964

Launch load simulation on scaled vibration model concerning Saturn 5 structural integrity and flight failure

10 p1953 A70-25072

Reinforced epoxy models as precursor to prototype design and analysis of aircraft structures, discussing stress analysis methods

12 p2318 A70-27129

Transonic scaling effects for shock boundary layer interaction on circular and two dimensional airfoil models, discussing separation and reattachment [AIAA PAPER 70-541]

13 p2339 A70-29008

Modeling techniques based on Froude scaling laws for helicopter ditching and flotation stability characteristics

17 p3016 A70-34738

Wind tunnel balance for measuring small aerodynamic loads on scale models, describing three component construction

17 p3062 A70-35490

Buoyant Venus station balloon for deployment and inflation during parachute descent into Venus atmosphere tested with scale model balloons in wind tunnels

17 p3063 A70-35658

Structurally similar models, investigating space vehicles dynamic characteristics

18 p3332 A70-36161

Model testing for helicopters, considering scaling, ditching and rotor performance

19 p3402 A70-38610

Thermal scale modeling of heat pipe in deep space, using material and heat flux preservation techniques

21 p3946 A70-41048

Multilayer insulation thermal scale modeling, discussing surface control techniques

21 p3951 A70-41865

Spacecraft thermal control coatings scale models, discussing temperature errors due to energy transport along surfaces

21 p3951 A70-41874

Helicopter rotors fatigue testing using small scale models of full scale components [ICAS PAPER 70-34]

23 p4267 A70-44131

High bypass model jet noise study, describing test setup and noise measurement results as function of secondary/primary flow velocity ratio

23 p4233 A70-44394

Tycho crater northeast rim scale relief model including lava lakes in outer walls

23 p4253 A70-44881

Polyvinyl chloride /Novodur/ mechanical properties application to structural model testing

24 p4367 A70-45445

SCALERS

Quasi-logarithmic readout of conventional binary scaler provided by reduced logic system following generalized equations

05 p0851 A70-16844

SCALING

Scaling and angular resolution for sequential type holographic stereogram, comparing results with conventional hologram

04 p0695 A70-15574

Missile oscillations in plane during pitching moment hysteresis, discussing test coefficients suitability for predicting motion

09 p1606 A70-23258

Interindividual differences in judging stimulus similarities, explaining unsatisfactory results obtained by average scalings

19 p3366 A70-38506

SCALING LAWS

Scaling laws for nose bluntness effects on hypersonic aerodynamics of bodies of revolution [AIAA PAPER 68-1158]

04 p0620 A70-15530

Critical regions equilibrium thermodynamic properties of fluids and magnets using scaled equation of state

07 p1421 A70-19298

Modeling techniques based on Froude scaling laws for helicopter ditching and flotation stability characteristics

17 p3016 A70-34738

Scaling relations showing effects of ballistic coefficient, flight path angle and inverse atmospheric scale height on heating of ballistic entry bodies

17 p3012 A70-35667

Scaling laws for turbulent plasma anomalous conductivity dependent on electrostatic fluctuation spectrum

23 p4227 A70-44796

Cosmic ray events angular distribution from scaling hypothesis

23 p4238 A70-44894

SCANDIUM COMPOUNDS

NT SCANDIUM OXIDES

SCANDIUM OXIDES

Partition functions and equilibrium constants for ScO, YO and LaO computed for 1000-8000 K, assuming doublet ground electronic state

10 p1946 A70-24970

SCANNER PROJECT

Spin stabilized Project Scanner spacecraft attitude determination by star mapping technique, describing optics, photomultiplier, reticle, electronics and sun shield

15 p2772 A70-31791

SCANNERS

NT HORIZON SCANNERS

NT INFRARED SCANNERS

NT OPTICAL SCANNERS

Scanning beam radio guidance system for VTOL approach and landing

02 p0336 A70-12766

Pencilbeam scanning observations of solar bursts revealing recognizable postincrease phase

03 p0558 A70-13588

Airborne multispectral sensing based on modified AN/AAS-5/XE-2/ scanners mounted in C47 aircraft, discussing applications

03 p0491 A70-13669

Projection display methods using scanned and modulated multicolor laser beams, discussing beam generation, modulation and scanning

05 p0858 A70-16188

Laser beam trajectory equation in scanning ultrasonic cell for nonzero incidence angle, relating input and output beam divergence

07 p1300 A70-19865

Soviet book on automatic scanning information systems, discussing equipment, system parameters, scanning methods, etc

10 p1840 A70-24376

Computer program for flying spot scanner pattern recognition, analyzing human chromosome contour

12 p2170 A70-27938

Scanning technique for allowing whole vibration cycles storage on one hologram

15 p2738 A70-32052

Bicylindrical microwave lenses, discussing collimating, virtual line source and point fed scanning lenses design

16 p2876 A70-33405

Scan platform servomechanical actuator for Mariner Mars 1969 spacecraft, emphasizing gear arrangement and train dynamics

16 p2845 A70-34108

Lens with radial symmetry for mm wave scanning antenna

20 p3598 A70-40307

ERTS line scanning system for cartographic data of water, snow, vegetation and cultural areas

22 p4037 A70-43090

Full-scanning random arrays with high resolution for space exploration, radio astronomy and long range radar

23 p4160 A70-43770

SCANNING

NT FREQUENCY SCANNING

NT PANORAMIC SCANNING

NT RADAR SCANNING

Duty factor and contrast in scanned displays, discussing light modulator and emitting displays

01 p0043 A70-10780

Computer processing role in film scanning and digitizing for enhancing X ray and radioisotope scanner images in medical radiographs, discussing image noise reduction

04 p0654 A70-14562

Aperture dissection scheme to reduce transit time of Bragg angle acousto-optical scanning of laser beam

05 p0860 A70-16657

Holography by fixing detector and scanning source based on reciprocity theorem for diffraction field

05 p0849 A70-16677

Dispersion function and measured line profile distortion by rectangular detector slit of order scanning Fabry-Perot spectrometer

06 p1063 A70-17622

Phase interpolation circuits for scanning phased array antennas, using doublers and frequency multipliers

09 p1646 A70-22701

Photosensitivity and scanning of planar Si photodiode image detector arrays, using most ring counter and shift register

10 p1846 A70-23881

Laser-light spatial-domain scanning function for deconvolution of blurred photographs using point-spread and holographic Fourier transform division filter

11 p2050 A70-25832

Track-while-scan algorithm, considering probabilistic interpretation of linear recursive least squares filter for velocity variations

11 p2029 A70-26319

Microwave scanning beam landing system providing aircraft radio approach guidance

12 p2269 A70-27918

Maximum mode selection tuning of scanning interferometer with spherical mirrors applied to He-Ne laser spectrum analysis

12 p2250 A70-28182

Ultrafast laser-Raman spectroscopy, comparing Scan and No-Scan techniques

14 p2593 A70-30361

Search duration distribution of two stage lock-on indicator scanning signal search systems, using regenerative random process and integral recovery equation

15 p2696 A70-31501

Lens antennas for performing radiation collimating function through refraction, discussing solid and artificial dielectrics lens design, beam scanning applications, etc

17 p3052 A70-35069

Apollo black and white TV scan converter design and operation

17 p3095 A70-35636

High speed electro-optic spectral scanning in UV, visible and IR regions, using monochromator deflection of dispersed light

20 p3671 A70-39090

Pilot scanning dwell times and control workload in simulated instrument approach, using eye-point-of-regard/EPR/ measurements

20 p3580 A70-39532

High velocity source and receiver scanning effect on holographic image, observing rotation and distortion

21 p3829 A70-41928

Galactic plane scanned observation of X ray sources, using large area proportional counter rocket sounding

22 p4094 A70-42986

Radiation and phase-scanning properties of planar array of parallel plate waveguides, using wedge diffraction theory

23 p4166 A70-44973

SCANNING DEVICES

U SCANNERS

SCATTER PROPAGATION

NT IONOSPHERIC F-SCATTER PROPAGATION

Pulse methods for measuring correlation function of incoherent scattered signal, calculating bit estimator errors for large and small SNR

01 p0045 A70-11088

Book on ionospheric scattering effects on long distance radio communication, considering Arctic ionosphere, scatter propagation, modulation, sporadic E, etc

01 p0046 A70-11305

Tropospheric scattering ability investigation with radar transmitter emitting vertical pulses, considering implications for scatter propagation from backscattering detection

03 p0453 A70-14298

Daylight ionospheric scatter propagation and absorption during energetic electron precipitation event in auroral zone using bremsstrahlung observations at balloon altitude

07 p1271 A70-20154

Comparative passband of optimal and fixed frequency systems in ionospheric scatter communications during nighttime

14 p2547 A70-30239

Ionospheric measurements from observations of incoherently scattered radio waves, describing radar installations specifications

15 p2731 A70-32096

Ionospheric scatter channel amplitude frequency characteristics recording equipment, discussing design

18 p3256 A70-36090

Ionospheric scatter communications channel phase frequency characteristics measuring method, considering probability density function

18 p3256 A70-36091

Comparative passband of optimal and fixed frequency systems in ionospheric scatter communications during nighttime

24 p4316 A70-46314

 NT X RAY SCATTERING
- Metastable diatomic N beam scattering from Teflon and Cu surfaces measured for velocity and angular distributions
 06 p1112 A70-18273
- Ar beam scattering and UV radiation from glass target surface with adsorbed gas layer
 06 p1112 A70-18274
- Open region waveguide radiation and scattering solved using impedance surfaces of related closed region convergence
 09 p1640 A70-23807
- Nozzle source design for high intensity thermal energy molecular beam with small dispersion in velocity suitable for scattering experiments
 11 p2086 A70-25973
- Chandrasekhar H function approximation for isotropic scattering, calculating absorption line contours
 22 p4109 A70-43750
- SCATTERING AMPLITUDE**
 Backscatter radar signal phase determination from amplitude data, measuring phase and amplitude in laboratory
 05 p0815 A70-16507
- Scattered field amplitude and phase determined from hologram light intensity distribution, noting biological applications
 08 p1500 A70-21786
- Intensity and velocity distributions of thermal energy argon atoms scattered from silver (111) face, using time of flight methods
 16 p2953 A70-33007
- Electromagnetic field amplitude and phase scattering diagrams analysis for shape information capacity
 21 p3785 A70-40637
- SCATTERING COEFFICIENTS**
 Twilight brightness measurements with balloons, scattering coefficient and indicatrix for high altitudes and comparison with Rayleigh-Cabann theory
 01 p0079 A70-11218
- Plane and spherical albedos of planet surrounded by infinite optical thickness atmosphere, with application to Venusian atmosphere
 01 p0193 A70-11591
- Twilight atmospheric brightness calculation for models of vertical distribution of aerosol scattering coefficient, using numerical data
 06 p1056 A70-17828
- Gas stream-elastic solid surface scattering characteristics, calculating trajectories, particle flux angular distributions, velocities, transfer coefficients, etc
 06 p1111 A70-18265
- High energy Ar atomic beams scattering from single crystal face of W measured for distribution pattern
 06 p1112 A70-18270
- Visibility, atmospheric light scattering coefficient and aerosol mass concentration related by integrating nephelometer measurements
 07 p1328 A70-18923
- Mode-scattering coefficients from ionospheric perturbations for sunrise and sunset propagation paths, comparing results with VLF radio measurements
 12 p2189 A70-28053
- Approximate formulas for disperse attenuation and scattering coefficients for water drops in visible and IR spectrum
 18 p3260 A70-36973
- Binary Boltzmann operator for quantum statistical second virial coefficient for real gases and plasmas in two-particle scattering problem involving Jost function
 22 p4081 A70-42824
- SCATTERING CROSS SECTIONS**
 Differential elastic and rotational excitation cross sections for electron-hydrogen scattering in close coupling approximation with electron exchange neglected
 02 p0342 A70-11880
- Hydrogen-hydrogen double excitation collision cross sections computed by impact parameter method, using Born and two state approximations
 02 p0342 A70-11881
- Differential elastic scattering cross section of Ar nozzle beam in nitrogen considered with rainbow effect in determining intermolecular potential well depth
 02 p0344 A70-12722
- Triggered spark source for multiply charged carbon ions applied to collision cross section measurements
 02 p0303 A70-12747
- Slow electrons elastic scattering by diatomic hydrogen molecule, analyzing cross sections in two

- center prolate spheroidal coordinates emphasizing polarization effect
 03 p0528 A70-14179
- Backscattering cross sections of metallic bodies of revolution, analyzing statistically echo pattern of complex targets
 03 p0452 A70-14225
- Electron-electron and electron-atom bremsstrahlung, giving graphical expressions for one and two electron atoms cross sections
 04 p0721 A70-14667
- Elastic and inelastic scattering of proton beam from Ne 20 measured for cross sections to interpret polarization data
 04 p0723 A70-15636
- Rayleigh scattering cross sections of stellar He C, N and O computed by quantum defect method, discussing effects of wavelength dependent polarizabilities
 04 p0723 A70-15692
- Experimental determination of solar neutrino activity from interaction cross section between neutrinos and target nuclei
 05 p0900 A70-15965
- Electromagnetic wave diffraction on absorbing black metallic and magnetic cylinders and strip, plotting radar scattering cross sections
 05 p0813 A70-16262
- Molecule spatial and velocity distributions of supersonic molecular beams, measuring scattering cross sections of He and Ar on noncondensable gases
 06 p1043 A70-18252
- Particle, momentum and energy flux spatial distributions of molecules scattered in collisions of low energy Ar atoms with mica and Ag surfaces
 06 p1111 A70-18268
- Collision cross sections direct measurement for determining macroscopic reaction rates in inelastic molecular collision processes in gas dynamics
 06 p1113 A70-18276
- Hydrogen atoms collisional excitation cross section expressed in terms of quantum numbers of levels and ratio of colliding electron energy to transition energy
 07 p1338 A70-19410
- Wall boundary condition model modification applied to molecular beam-solid surface scattering, noting qualitative agreement with observed distributions
 07 p1342 A70-20118
- Intermolecular potential of atoms and/or molecules determined from scattering cross sections of supersonic He and/or Ar atomic beams
 07 p1344 A70-20132
- Scattering cross sections of K atoms on bromine molecules determined as function of particle energy using supersonic atomic beams
 07 p1344 A70-20133
- Molecular N rotational temperature effect on rare gases scattering cross section
 07 p1344 A70-20134
- Ar-Kr integral collision cross sections based on density measurements of Ar beam passed through liquid nitrogen cooled Kr filled scattering chamber
 07 p1344 A70-20135
- Energy dependence of elastic total collision cross section of identical He molecules, using velocity selected primary beams at low target temperature
 07 p1345 A70-20137
- Proton-deuteron elastic large angle scattering cross sections, noting backward peak consistent with baryon exchange mechanism with resonance transfer
 07 p1345 A70-20198
- Time dependent matrix elements for multistate impact-parameter calculations for atom-atom inelastic cross sections
 07 p1346 A70-20242
- Scattering cross sections of radio waves at wake of vertically moving body near reflecting ionospheric layer, noting wave sphericity influence
 07 p1237 A70-20423
- Radio wave sphericity influence on scattering at moving body wake in ionosphere, determining scattering cross section principal maximum
 07 p1237 A70-20424
- Refractive index variations effect on backscattering, scattering and attenuation cross sections of ice sphere at various low temperatures
 08 p1536 A70-21098
- Cross sections measured for symmetric p , $2p$ reactions on deuterium and He, discussing nonsymmetric p , $2p$ events in He
 08 p1548 A70-21233
- Scattering cross sections of electromagnetic waves in rectangular plasma-filled waveguide based on reciprocity theorem
 08 p1464 A70-21983
- Photon scattering by Ar in vacuum UV measured for cross sections
 09 p1730 A70-22071
- He-Ne and argon lasers for measuring radar scattering cross sections of plane and three dimensional targets
 09 p1632 A70-22405

- Square Van Atta reflector with/without conducting plate used for mounting antenna half wave dipoles, considering scattering cross sections
 09 p1646 A70-22695
- Scattering equations and cross sections for rotational excitation in collisions of rigid diatomic molecules interacting through soft potential
 09 p1732 A70-22901
- Obstacle extinction cross section determination at microwave frequencies from Q factor of open resonator
 09 p1637 A70-23307
- Plane electromagnetic wave scattering by conducting circular cylinder/wire in air/vacuum, computing scattering cross sections by Wiener-Hopf method
 09 p1638 A70-23347
- Dissipative parameters determination for relativistic gas within kinetic theory framework based on particle interaction model, assuming constant differential effective interaction cross section
 10 p1867 A70-24148
- Plane electromagnetic waves scattering from radially inhomogeneous cylindrical structure, deriving expressions for far field and cross section for both polarizations
 10 p1841 A70-24856
- Ar ions excitations by low energy electron collisions, noting excitation functions and cross sections of lines and levels by optical methods
 12 p2278 A70-27501
- Axial incidence HF backscattering cross section for absorbing flat based cone assumed to obey impedance boundary condition
 12 p2185 A70-27716
- Hydrogen and inert gas atoms collisional excitation cross sections calculated by multistate impact parameter approximation
 12 p2276 A70-27878
- Helium excitation from ground to excited state by electron impact, determining differential and integral scattering cross sections
 12 p2276 A70-27879
- Cross sections for electron impact excitation of positive helium and hydrogen ions, using non-relativistic Coulomb-Born-Oppenheimer reactance matrices
 13 p2455 A70-28988
- High energy proton-He 3 elastic scattering cross section measurement, comparing result with Glauber model calculation
 13 p2456 A70-29459
- Quantum mechanical model of electron scattering by homonuclear diatomic molecule at ground state, calculating differential and integral cross sections for elastic scattering
 14 p2618 A70-30113
- Elastic scattering of electrons by hydrogen as function of vibrational excitation, discussing intensities and cross sections
 14 p2618 A70-30114
- Differential cross sections for electron scattering by hydrogen with and without vibrational excitation, discussing inelastic processes
 14 p2618 A70-30115
- Raman scattering cross sections in solid state semiconductor plasma in magnetic field from phonon fluctuations
 14 p2621 A70-30485
- Electron impact excitation cross sections of oxygen ion first negative bands, considering relationship to oxygen ionization cross section
 14 p2620 A70-31363
- Semiclassical collision theory for computing fine structure proton impact excitation rates and cross sections for positive ions, presenting excitation rate tables
 14 p2652 A70-31383
- EM and acoustic scattering by simple shapes covering Maxwell equations, boundary and radiation conditions, radar cross sections, EM potentials, etc
 15 p2700 A70-32402
- Wave scattering from circular cylindrical body, considering plane wave primary source, line source, point and dipole source
 15 p2700 A70-32403
- Measuring instrument for total cross section of proton elastic scattering during sigma R reactions
 16 p2908 A70-33210
- NO and oxygen ions vibrational excitation due to inelastic scattering from He, calculating scattering angle variation
 16 p2955 A70-34010
- Scattering cross sections for monoenergetic Ar beams on epitaxial Ag films
 16 p2956 A70-34013
- Excitation cross sections for Ar I and He I spectral lines in low energy He ion-Ar collisions
 17 p3138 A70-34642
- Total cross sections for production of free electrons in collisions of low energy negative atomic oxygen ions with molecular nitrogen
 18 p3292 A70-36188
- Electron correlations and solar neutrino counts, correcting frequency independent Thomson cross section
 18 p3308 A70-36485

Finite size particle physics for plasma computerized simulation, considering longitudinal oscillations, scattering cross sections, diffusion coefficients, etc
18 p3296 A70-36791

Na D lines emission cross sections measurement from ionic and neutral gases collisions at simulated meteor conditions
18 p3318 A70-37014

Light combinatorial scattering by longitudinal photons with frequency near forbidden zone width, calculating Raman scattering cross sections
19 p3444 A70-37444

Closed coupled partial wave calculation of cross section for fine structure transitions in Na in collisions with He
19 p3372 A70-37541

Diatomic molecules inelastic collision cross sections for specific rotational transitions, discussing S matrix energy requirements for statistical analysis
19 p3474 A70-38268

Deep inelastic lepton-hadron scattering cross sections universality properties based on Wilson theory
20 p3674 A70-39150

Emission cross sections of nitrogen in vacuum UV by electron impact
20 p3675 A70-39617

Cesium beam velocity attenuation by He, Kr and Xe, determining scattering cross sections from gas pressure and density measurements
20 p3675 A70-39618

Decay lifetimes and electron impact cross sections of vacuum UV O I and O II emission multiplets, using pulsed electron beam in low pressure gases
21 p3852 A70-40718

High energy alpha particle beam exposed to plastic scintillators, determining spallation cross section for C12/alpha, alpha/C11
21 p3852 A70-41138

Numerical molecular rotational transition probabilities and cross sections in HCN-HCN and ICN-ICN collisions, using perturbation theory and multipole potentials
21 p3853 A70-41391

Electron excitation cross sections for light atoms using Slater wave functions and Born-Bethe approximations
21 p3853 A70-41393

Reflectors group mean effective scattering cross section measurement by far field criterion
22 p3995 A70-42387

Radiation patterns and scattering cross sections of plane black disks excited by electromagnetic and acoustic waves
22 p3984 A70-42391

Elastic wave diffraction by rigid inclusion, calculating far field displacement and cross section by integral equation method
22 p4073 A70-42636

Differential elastic cross sections of 42 MeV alpha particles scattering from He 3, using optical model with spin-orbit potential
22 p4076 A70-42722

Effective collision cross section for reaction resulting in Cs ions neutralization in thermal Cs plasma calculated from measured ion currents
22 p4082 A70-43374

Low energy proton-hydrogen collisions, computing differential cross sections for direct elastic scattering, resonant charge exchange and direct and exchange excitation
24 p4382 A70-46226

SCATTERING FUNCTIONS

Book on scattering of light and other electromagnetic radiation, treating scattering by spheres, cylinders, liquids, Rayleigh-Debye scattering, particle size analysis, etc
02 p0337 A70-11689

Visible radiation reflection, transmission and inside intensities of terrestrial clouds calculated by Monte Carlo program utilizing scattering phase function
02 p0326 A70-12286

Sky brightness distribution data to determine shape of aerosols scattering as function of wavelength
02 p0292 A70-12435

Scattering functions from sky light spectra measurements on high mountain for various sun altitudes, obtaining color value functions
02 p0359 A70-12776

Mie scattering and polarization functions of atmospheric aerosols determined on basis of logarithmic Gaussian distributions
05 p0879 A70-16664

Noniterative integral solutions of scattering equations extended to coupled channels using matrix notation
06 p1108 A70-17487

Thermally emitted photons of atmospheric molecules and aerosols and planetary surface followed by Monte Carlo method, using anisotropic single scattering functions
09 p1719 A70-23524

Radiant heat exchange local and angular coefficients determined allowing for absorbing and scattering medium between bodies
10 p1969 A70-25141

Wave scattering by statistical distributions of discrete obstacles, deriving various functions for diagnostic applications
11 p2086 A70-26762

Sky radiation scattering and polarization functions for various solar altitudes at Lomnitzer Peak observatory
12 p2294 A70-27674

Single and multistage parametric amplifiers for broadband communications, noting nonideal circular characteristics by scattering parameter and signal flow graph
12 p2197 A70-27933

Scattering function and image quality in sharp edge holography using single mode laser, analyzing coherent and diffuse light
15 p2733 A70-31556

Noniterative homogeneous solutions of integral equations for coupled open channel and coupled eigenvalue scattering
19 p3473 A70-38264

Interstellar spherical dust particles from meteoritic silicates and dirty ice, calculating optical properties and scattering functions
21 p3889 A70-41147

Convergent numerical method for principal value integrals in dispersion relations of coupled channel scattering problem involving wave phase shifts
22 p4062 A70-42748

Absorption line multiple scattering in thick planetary atmosphere, using successive scattering method for single-scattering phase function based on line profile and equivalent width
23 p4222 A70-44550

SCATTERING MATRIX

U S MATRIX THEORY

SCENEDESMUS

Fraction of Chlorella and Scenedesmus biomass, noting changes in adrenal cortex and renal glomerus
03 p0425 A70-13889

SCF

U SELF CONSISTENT FIELDS

SCHEDULES

Automatic landing system assurance of DH 121 aircraft schedule all-weather regularity through high safety level via redundancy
17 p3022 A70-35856

Central passenger traffic schedule role in air traffic control, discussing computer solutions, aircraft optimal use, etc
18 p3289 A70-36397

SCHEDULING

NT PREDICTION ANALYSIS TECHNIQUES

Flights best day pair and weekly leg schedules concept based on decision making model for traffic volume estimation in airline operations
02 p0403 A70-12787

Cost/schedule planning and control system /C/SPCS/ providing early exposure of inadequacies in work execution and initial planning
05 p0959 A70-16461

Linear programming for aircraft takeoff and landing schedules for traffic control on airport runway, using simplex technique for proposed algorithm
08 p1540 A70-20872

Pilot and copilot task distribution schedules adopted by European civil aviation for landing approaches under poor weather conditions
08 p1542 A70-21850

Dynamic programming successive approximation method application to airline scheduling, reviewing real time dispatching, operations, schedule and fleet planning
11 p2013 A70-26209

Tradeoff decision processes scheduling maintenance frequencies for commercial transport aircraft [SAE PAPER 700328]
12 p2243 A70-27461

Reliability prediction techniques accuracy and optimal timing including true and project control predictions
13 p2524 A70-29569

Space station experiments, payloads and activity planning
16 p2983 A70-34067

Predictive model for potential variance from planned schedule of R and D tasks to minimize risk in management
21 p3955 A70-41172

Schedule theory problem with redundancy and technological constraints reduced to optimal control problem by penalty function, making maximum principle applicable
23 p4177 A70-44304

Critical supersaturation vs phase equilibration of tissue in computing decompression schedules from depth and exposure time
24 p4301 A70-45983

SCHALKUNOFF PRINCIPLE

Excited circular cylindrical dielectric rod antenna radiation patterns derivation by Schelkunoff equivalence principle
16 p2872 A70-33121

SCHLEICHER AIRCRAFT

Schleicher AS-W15 glider wing span, weight, wing loading capacity and speed range, noting performance in international competition
05 p0793 A70-15905

SCHLIENEN PHOTOGRAPHY

Holographic color schlieren flow visualization system for three dimensional photography, variable focus shadowgraph, knife edge schlieren, etc
01 p0091 A70-10908

Metal film graded filter fabrication for schlieren photographic system with laser light source and framing camera, using vacuum evaporation
01 p0113 A70-10921

Inexpensive schlieren system for medical ultrasonic research, discussing equipment and application to short wave transducer beam patterns used in ophthalmology
02 p0300 A70-12472

Schlieren photograph intensity variations correlated with statistical parameters for turbulent flow density variations
03 p0464 A70-12941

Displacement interferograms and schlieren pictures of optical inhomogeneities in transparent media obtainable from single exposure hologram, using nonmonochromatic and laser light for reconstruction
03 p0483 A70-12358

Schlieren recorder and Erdmann field absorption methods applied to qualitative and quantitative flow process studies in high velocity wind tunnel
04 p0689 A70-14925

Semifocusing color schlieren systems for quantitative investigations of flows in fluid mechanics and heat transfer, including photographs of boundary layers
04 p0690 A70-15029

Rocket exhaust plume size determined from schlieren photographs during wind tunnel tests, noting agreement with Hill-Habert theory
04 p0736 A70-15417

Schlieren system modification using diffraction grating to produce color applied to airfoil flowfield analysis
06 p1029 A70-18165

Optical tools in aeronautical and space research at Langley Research Center, discussing schlieren photography of aeronautical and space models in wind tunnels
09 p1657 A70-23510

Duplex schlieren optical system with one channel for data recording and second channel for visual monitoring
09 p1687 A70-23766

Color schlieren photography with complete spectrum displayed in single photograph, discussing filter matrix
10 p1857 A70-23913

Gas dynamic processes insufficiency for triggering transition to detonation obtained from laser schlieren records of nonsteady flow field ahead of accelerating turbulent flame
11 p2150 A70-26378

Lambda type pseudoshock /shock during supersonic flow deceleration to subsonic in duct/, investigating mechanism by schlieren photography
11 p2037 A70-26408

Backward facing separated step boundary layer flow at Mach 2.25 investigated by diffraction grating interferometer and color schlieren technique [AIAA PAPER 70-571]
13 p2343 A70-29898

Schlieren optical method for measuring He jet penetration into supersonic flow
15 p2741 A70-32520

Self focusing schlieren observation in gas breakdown, discussing cubic polarizability of excited atoms in electron cascade due to laser pulses
21 p3835 A70-40594

Schlieren method application in plasma diagnostics, obtaining density change of neutral, ion and electron gases
21 p3825 A70-40950

Gas velocity measurement by high speed schlieren observation of laser induced breakdown phenomena [SMPE PREPRINT 27]
22 p4034 A70-43048

Wollaston prism schlieren interferometer for quantitative density gradient measurements in air [SMPE PREPRINT 25]
22 p4034 A70-43050

Supersonic wakes visualization and photographic measurement by schlieren techniques, using amplitude subtraction and He-Ne laser [SMPE PREPRINT 94]
22 p4036 A70-43061

Color filter schlieren photography for visualization of wind tunnel shock and pressures, liquid mixing and convection currents [SMPE PREPRINT 86]
22 p4036 A70-43065

SCHMIDT CAMERAS

Planetary faint nebulae containing northern Milky Way portion in direction of galactic anticenter observed with spectral Schmidt camera, noting stellar appearance
09 p1761 A70-23051

Plate reduction method for Schmidt satellite camera, considering satellite position, distortion parameters, etc
11 p2007 A70-26193

- Schmidt photographs reduction, noting film bending during exposure and mean error of satellite position
11 p2007 A70-26195
- Optical Schmidt system shortening with spherical, ellipsoidal and flattened spherical mirrors
19 p3433 A70-38767

SCHMIDT METHOD

- Evolutionary effects associated with quasars listed in 3CR catalog using Schmidt method
07 p1389 A70-20209

SCHMIDT NUMBER

- Prandtl mixing length and effective Schmidt number distributions from wall jet and wake data to predict film cooling
06 p1035 A70-17688

- Mass transfer and velocity gradient fluctuations at wall in two dimensional or rotational flow for large Schmidt numbers
23 p4181 A70-44210

SCHOTTKY EFFECT

U WORK FUNCTIONS

SCHREIBERSITE

- Enstatite chondrites and achondrites electron microprobe analysis for Si, P and Ni in metal grains and associated schreibersite and perryite
10 p1935 A70-23849

SCHROEDINGER EQUATION

- Coupled Schroedinger equations for diatomic molecules internal motion solved using best adiabatic approximation to obtain energy correction to Born-Oppenheimer method
08 p1548 A70-21522

- Operator originated by Schroedinger equation having inhomogeneous boundary conditions on portion of boundary of Hilbert spaces orthogonal sum, defining region of self conjugation
13 p2442 A70-29514

- Radial Schrodinger equation bound state eigenvalues and properties by iterative method, calculating Coulomb potentials
14 p2600 A70-31360

- Classical approach to quantum mechanics, emphasizing Schroedinger equations and starting from Hamilton-Jacobi equations
16 p2990 A70-33778

- Coupled simple harmonic oscillators with almost degenerate energy levels, comparing partitioning perturbation techniques with Rayleigh-Schroedinger approach
16 p2955 A70-34002

- Adiabatic corrections to long range Born-Oppenheimer interatomic potentials from rotationally coupled Schroedinger equations
17 p3138 A70-35199

- Schroedinger equation for hydrogen solved for high pressure behavior of materials, applying to stellar atmospheres and laboratory plasmas
21 p3849 A70-40933

- Stark effect in hydrogen atoms for nonuniform electric fields, considering correction of energy eigenvalues of Schroedinger equation by WKB method
23 p4221 A70-44401

SCHUMANN-RUNGE BANDS

- Transition probabilities for diatomic oxygen Schumann-Runge bands determined from shock tube emission studies
02 p0344 A70-12658

- Thermospheric heating by solar radiation in Schumann-Runge continuum, taking height and atmospheric components distribution into account
23 p4188 A70-44060

SCHWARTZ METHOD

- Generalized boundary value problems solution for elliptic differential equations by Schwarz method, proposing algorithm
18 p3283 A70-36573

SCHWARTZ-CHRISTOFFEL TRANSFORMATION

- Stress distribution around moving cracks in finite width strip, obtaining solutions for boundary conditions by Schwarz-Christoffel transformation and complex functions theory
22 p4116 A70-43025

SCHWARZSCHILD METRIC

- Einstein equations for five dimensional spherically symmetric space solved using gravitational constant without singularities on Schwarzschild sphere
05 p0880 A70-15793

- Einstein-Maxwell equations solutions relation to Robinson and Robinson metrics compared with Reissner-Nordstrom solution relation to Schwarzschild
07 p1333 A70-18961

- Collapse-anticollapse transition near Schwarzschild radius in multitime universe with arbitrary number of time-similar dimensions
07 p1381 A70-19286

- Circular and radial trajectories in Schwarzschild field applied to isolated metagalaxy with charged central body and nonzero cosmological constant
07 p1385 A70-19426

- Schwarzschild metric properties in synchronous reference system, using succession of Schwarzschild interval holonomic transformations as function of gravitational radius
08 p1545 A70-21406

- Schwarzschild exterior metric stability against perturbations from asymptotic behavior of Einstein field equations solution in Kruskal coordinates
18 p3291 A70-36650

- Differential equations for odd and even parity Regge-Wheeler perturbations on Schwarzschild metric
19 p3457 A70-37573

- Schwarzschild solution singularity elimination using Lorentz transform
20 p3673 A70-39998

- Gravitational radiation scattering by Schwarzschild horizon, discussing odd parity waves of angular momentum
21 p3878 A70-40731

- Optical point characteristics of static spherically symmetric space-times of de Sitter universe, Einstein universe and exterior Schwarzschild field
23 p4239 A70-43821

SCHWASSMANN-WACHMANN COMET

- Comet Schwassmann-Wachmann I brightness variations due to interplanetary shock waves in solar wind
22 p4097 A70-42475

SCIATIC NERVE

- Cerebellar cortex reactions to sciatic nerve stimulation in rats under transverse accelerations in centrifuge
05 p0804 A70-17116

- Bioelectrical reactions in anesthetized cats cortical zones in response to stimulation of contralateral sciatic nerve
07 p1199 A70-18722

- Thalamic N.VPL role in distributing afferent flux in anesthetized cats cortex, using stimulating contralateral sciatic nerve
07 p1199 A70-18723

- Hypothalamus influence on potentials and recovery cycles of mesencephalic reticular formation in response to sciatic nerve stimulation in anesthetized rabbits
07 p1204 A70-19138

SCIENTIFIC SATELLITES

NT APPLICATIONS TECHNOLOGY SATELLITES

NT ATS 1

NT ATS 3

NT ATS 5

NT ENVIRONMENTAL RESEARCH SATELLITES

NT ORBITAL SATELLITE

- HEOS-1 satellite development for ESRO to investigate interplanetary magnetic fields, cosmic radiation, solar wind outside magnetosphere and earth shock wave
02 p0382 A70-12646

- Instrumentation system for nuclear experiments on scientific satellites allowing highest priority event selection during telemetry sequence and periodic change of priority order
03 p0453 A70-13024

- ESRO German-built satellite HEOS 1 planned scientific space measurements, required orbit and technical concepts
03 p0580 A70-13798

- European Ultra-Violet Astronomical Satellite (U-VAS) to replace Large Astronomical satellite (LAS) to reduce cost while maintaining scientific objectives
03 p0582 A70-13434

- Pulse width modulation command coder for German research satellite Azur control
04 p0653 A70-15662

- Onboard digital data acquisition instrumentation system for scientific satellites, combining existing functional blocks to obtain different configurations and performances
05 p0818 A70-16587

- HEOS-A2 project development plan for investigating unexplored interplanetary space in eccentric orbit
05 p0923 A70-16588

- Scientific equipment on Cosmos 237 satellite for recording extraterrestrial radiation data, discussing specifications, operation and mission purpose
05 p0851 A70-16733

- Four satellite cluster laboratory in near-earth environment to investigate solar-terrestrial relationships, emphasizing interaction of solar wind and magnetosphere
07 p1387 A70-19711

- Orbiting satellite-borne instruments for scientific observation of earthquakes, volcanic eruptions, atmospheric phenomenon, cyclones, floods and soil erosion
09 p1763 A70-23377

- Italian Sirio project, describing SHF propagation and communication, cosmic ray and confined plasma experiments
11 p2011 A70-26604

- Diamant B satellite launcher testing and construction, discussing DIAL/WIKA scientific satellite launch
12 p2314 A70-28299

- Azur satellite ground control, describing system organization to measure scientific and data information for entire satellite lifetime
13 p2384 A70-28976

- Astronomical Netherlands Satellite (ANS) for carrying out stellar UV and X ray emission experiments
13 p2506 A70-28989

- Atmospheric density effect on satellite lifetime and position prediction, utilizing data from Cannon Ball and SPADES low altitude density research satellites
14 p2653 A70-30562

- Scientific satellites history, projects, technology, coordination and international collaboration
14 p2655 A70-31416

- Small satellites for scientific technological and operational missions, discussing piggyback launching, command, battery storage, telemetry and attitude control systems
15 p2810 A70-31781

- American-German solar probe HELIOS mission parameters for interplanetary and close proximity solar research, discussing spacecraft building and launching
15 p2801 A70-32281

- Space program planning for scientific and application earth satellites, stressing image sensors development
15 p2812 A70-32289

- OGO 5 satellite scientific observations, payloads, parameters and objectives
15 p2812 A70-32364

- Scientific satellites pulse height analyzer and associated threshold detection and logic circuitry
16 p2900 A70-33062

- Sliding electrical contacts for unmanned scientific satellites, discussing Nimbus AVCS camera iris motors
16 p2920 A70-33809

- Mariner Mars 1971 scientific experiments, describing onboard equipment, mission objectives, etc
16 p2983 A70-34026

- ESRO organization, program, locations, establishments and operational and future scientific satellites
17 p3200 A70-35204

- Japanese sounding rockets for space research, discussing missions, launchings, flight tests, etc, of Kappa and MT-135 rockets and M-45 launch vehicle
17 p3177 A70-35205

- UK space program, describing scientific satellites, Black Arrow launch vehicle and sounding rockets
17 p3167 A70-35206

- Heliostationary spacecraft at L2 point for solar wind observation, describing mission, instrumentation and spacecraft design
17 p3168 A70-35252

- Pseudonoise code command system for scientific satellite, describing added bits and decoder
17 p3046 A70-35276

- Scientific satellites orbit determination and improvement procedures for tracking system based on Doppler frequency and angular measurements
17 p3046 A70-35280

- Japanese scientific satellite magnetic attitude and spin rate control system design and computer simulation
18 p3332 A70-36065

- Apollo Command and Service Modules for lunar orbital science missions, discussing spacecraft-experiment integration
21 p3928 A70-40978

- Small scientific satellite design objectives, structural and electrical requirements, components integration, instrumentation, antennas, spin rates, vibrations, sealing, reliability, etc
22 p4110 A70-42497

- Geostationary satellites for magnetosphere and ionosphere sounding, discussing specific observational capabilities
22 p4024 A70-43397

- Scientific satellites nuclear experiments fast low power drain logic system, using AND and NAND gates, pulse generators, delays and bistables
23 p4143 A70-44299

- Scientific satellites evolution during past decade and future development possibilities in conjunction with space shuttles and stations
23 p4260 A70-44621

- Scientific satellite reentry guidance algorithms for inertial system, discussing controllability, onboard computer, gyros, accelerometers, jet actuators, terminal guidance, glide trajectory, etc
23 p4216 A70-44667

SCIENTISTS

- Correlations between organizational factors and individual engineer performance, analyzing stability of relationships and time lags in measurement
02 p0246 A70-12378

- Aerospace scientific and engineering work force movement between geographical areas and resource location
07 p1426 A70-18799

- Team hiring of research scientists by industrial and academic organizations, discussing causes and influence on R and D organizations management and design
07 p1427 A70-19002

SCINTILLATION

Quasar 3C 273 scintillation intensity, considering role of interplanetary plasma inhomogeneities 01 p0174 A70-10199

Radio star and satellite scintillation observation, considering diurnal, seasonal and latitude variations and relationship to magnetic and solar activity 01 p0181 A70-10590

Optical scintillation measurements applied to turbulence diagnostics, inferring spatial spectrum of turbulent scatterers, using Monte Carlo numerical procedure 02 p0296 A70-11892

Ionospheric electron concentration irregularities via satellite signal scintillation analysis, using radio wave diffraction theory 02 p0258 A70-12562

Canary Bird synchronous satellite radio signal transmissions scintillations from recordings, noting diurnal scintillation pattern 02 p0260 A70-12573

Power spectra, modulation indices, frequency distributions and decorrelation frequencies of intensity fluctuations of pulsar radiation consistent with interstellar scintillation theory 05 p0908 A70-16302

Radio sources structure observations of Arecibo Ionospheric Observatory, discussing interplanetary scintillations of galaxies and quasars 06 p1138 A70-17216

Ionosphere disturbances due to high altitude thermonuclear explosions, discussing experimental proof by cosmos satellites short wave transmitter radio signal scintillation statistical evaluation 06 p1057 A70-17888

Satellite signal scintillation phenomenon morphological study and relationship to ionospheric irregularities 07 p1234 A70-19194

Ionospheric inhomogeneities measured by Explorer 22 radio signals emphasizing satellite scintillation 07 p1265 A70-19195

Diffraction pattern drift velocity increase with temporal frequency of Fourier components by dispersion analysis of interplanetary scintillation, noting solar wind structure 07 p1388 A70-20076

Focusing and saturation effects in radio star and satellite signal scintillations based on diffraction and refraction theories 07 p1271 A70-20157

Electron ion recombination role in atomic collision process in rare gases ionization path, considering scintillation mechanism 08 p1549 A70-21815

Stellar scintillation saturation at large zenith angles interpreted in terms of combined dispersion and aperture filtering 09 p1726 A70-22073

Ionospheric scintillations of lunar radar echo components isolation by CW Doppler shift or coherent pulse time delay techniques 10 p1841 A70-24802

F region irregularity model to include field-aligned columns and sheets and frontal irregularity shapes effect on radio star and satellite scintillations 10 p1841 A70-24805

Ionospheric irregularities showing dispersive motions from systematic skewness in cross correlation functions for satellite scintillations at spaced receivers 10 p1881 A70-24810

Scintillation sudden inception in Faraday rotation in Sodankyl and Oulu, noting diurnal north-south frontier movements in polar ionosphere 10 p1884 A70-25262

Angular coordinate during multilevel quantization of radar signal reflected from scintillating body on Gaussian noise background, applying maximum probability method 11 p1996 A70-25347

Satellite signal scintillation spectrum analysis by digital filtering of magnetic tape recording 11 p2012 A70-26718

Radio sources scintillation due to scattering medium with refractive index irregularities under detection of finite bandwidth receiver 13 p2365 A70-29148

Low latitude scintillations from satellite transmission scintillations correlation with solar activity spread F, electron content and ionospheric irregularities 13 p2397 A70-29189

Satellite scintillation index variation with zenith angle and azimuth at ground station 14 p2574 A70-30739

Solar wind turbulence, demonstrating radio source interplanetary scintillation consistent with plasma density correlation 14 p2642 A70-30888

Quasar 3C 298 angular dimensions and 3C 273 scintillating component at 60 MHz based on mean quasi-periods shifts of scintillations 15 p2808 A70-32885

Coherent light propagation through turbulent atmosphere observed by applying He-Ne lasers to simultaneous measurements of scintillation effects over homogeneous optical paths 17 p3108 A70-35721

Radio source 3C 161 scintillating component angular dimensions and flux density at 60 MHz 19 p3524 A70-38760

Radio sources angular dimensions estimation based on shifts in histograms of scintillation quasi-periods 19 p3525 A70-38766

Angular coordinate during multilevel quantization of radar signal reflected from scintillating body on Gaussian noise background, applying maximum probability method 20 p3589 A70-40459

Low latitude F region irregularities from scintillations of beacon satellite signals 20 p3624 A70-40486

Scintillation LF observations with synchronous satellite radio signals at low latitude station, noting magnetic activity effects on night and day scintillations 20 p3590 A70-40488

High scintillation indices associated with vertical spreading of sporadic E layer from minute-by-minute ionograms and signal amplitude recordings from Explorer 22 satellite 20 p3624 A70-40489

High latitude F region irregularity structure during magnetic storm from multistation scintillation observations of ATS 3 transmission 20 p3624 A70-40490

Ionospheric electron density disturbance heights measured via radio signal scintillation from earth satellite, using spaced receiver method 20 p3590 A70-40491

Microwave scintillations at sunrise indicating solar point sources at sunspot cycle peak and terrain configuration influence on ionospheric disturbances 20 p3591 A70-40493

Low latitude observations of spread F echoes and stationary satellite scintillations, correlating with ionospheric disturbances and geomagnetic activity 21 p3818 A70-41097

Synchronous satellites VHF signal fading attributed to high latitude scintillations, noting intensity at night and during magnetic storms 21 p3790 A70-41362

Weak-scattering limit in thin screen model of interplanetary scintillations of radio sources involving solar wind fluctuations at Fresnel scale 22 p4104 A70-42996

Scintillation index correlation with mean wind velocity of jet streams 22 p4020 A70-43262

F region ionospheric disturbances size and shape from radio amplitude and phase scintillations in satellite transmission to ground stations 23 p4187 A70-43879

SCINTILLATION COUNTERS

Scintillation resolving power in radioactivity measurements, discussing mathematical principle of division of radioisotope concentration in biological experiments 01 p0040 A70-11404

Scintillation counters hodoscope system for studying spatial distribution of muon and muon-number fluctuations in extensive air showers 03 p0482 A70-13042

Light-gathering amplitude and intrinsic resolution of large-area flat scintillation detectors used for cosmic rays-nuclear interaction experiments at high energies 03 p0484 A70-13466

Light collecting properties of polystyrene scintillator designed for counting particles of electron-photon showers generated by high energy cosmic ray particles 05 p0846 A70-15944

Deuteron splitting by solar neutrinos for neutrino detection, describing deuterium scintillation detector characteristics 05 p0899 A70-15954

Scintillation spectrometer design for mass and energy spectra of elementary particles, discussing block diagram 05 p0846 A70-15962

Pulse characteristics of scintillator-photomultiplier-cathode ray tube channel for oscillographic recording of nanosecond pulses from neutron, gamma or X ray sources 08 p1496 A70-21218

Whole body counters as standard measuring devices in nuclear medicine and radiation protection, using scintillation detector principles 09 p1624 A70-22819

Satellite-borne scintillation spectrometers for medium and high energy electron and proton measurements 10 p1931 A70-24315

Cosmic ray muons continuous recordings, describing design and performance of plastic scintillators with photomultipliers 10 p1889 A70-24489

Cosmic gamma rays observation by balloon flight and satellite with scintillation detector, tabulating counting rates in pulse height channels relative to Crab Nebula 12 p2292 A70-27387

Particle spectrometer for Apollo measurements of trapped protons and electrons, using directional telescope composed of solid state and scintillation counters 12 p2232 A70-27404

Muon intensity meter for cosmic ray muon flux underground using scintillation telescope consisting of two coincidence counters 12 p2295 A70-28176

Scintillation and semiconductor counters - IEEE Conference, Washington, D.C., March 1970 14 p2586 A70-31001

Photomultiplier tubes for liquid scintillation equipment, emphasizing detection efficiency and coincidence background 14 p2587 A70-31005

NaI scintillation spectrometer response function matrices semiautomatic generation, using standard source spectra to obtain normalized Compton continua 14 p2587 A70-31006

Anthracene, polystyrene and stilbene for scintillation counters measuring cosmic ray protons, analyzing dosimetric properties 17 p3151 A70-35352

Liquid scintillator neutron spectrometer using pulse shape discrimination and two parameter analyzer 18 p3290 A70-36563

Light gathering nonuniformity in cylindrical plastic scintillator, analyzing detector signal amplitudes for various pulsed light source positions 20 p3629 A70-39318

Organic liquid scintillators with high transparency, describing optical and chemical properties 20 p3629 A70-39319

Scintillator-film neutron radiography converter combinations efficiency gain for small sources by cooling 24 p4376 A70-45751

SCORPIUS CONSTELLATION
X ray line emission from Sco X-1 using Monte Carlo estimates of spectral distribution of scattered photons in terms of Fe line and cosmic abundance 01 p0169 A70-10338

Sco X-1 high energy X ray emission intensity changes observed by balloon-borne telescope 01 p0169 A70-10346

Radial velocities determined from prism spectrograms for O and B stars in Milky Way field in Scorpius 02 p0369 A70-12062

X ray source Sco XR-1 proper motion using photometry, suggesting association with Scorpius-Centaurus complex of young disk stars 02 p0372 A70-12248

X rays from Sco XR-1 compared with galactic cosmic rays and solar Lyman alpha radiation to determine ionospheric ionization causing radio wave attenuation 06 p1134 A70-17443

Sco X-1 simultaneous X ray and optical flares correlation and X ray enhancements 08 p1561 A70-20900

Elongated neutral-hydrogen emission feature in Sco-Oph region, comparing with interstellar sodium lines for distance from sun 10 p1945 A70-24966

X ray scattering by interstellar grains in direction of Crab pulsar and Sco XR-1 10 p1933 A70-25044

Radial velocities of supergiant distant stars in southern Milky Way regions of I Sco Association 11 p2113 A70-26465

Scorpio X-1 and Taurus X-1 /Crab/ X ray flux effects on nighttime ionospheric radio transmission, discussing ion production and resulting electron density 14 p2631 A70-30541

Hard X rays from Sco X-1, discussing high energy excess with large temporal variations 15 p2795 A70-32772

Simultaneous measurement of optical and X ray emission from Scorpius X-1 and X ray diffuse background, using rocket-borne scintillation counter 17 p3157 A70-34831

H 2 regions in Sc galaxies NGC 628, 4254 and 5194 18 p3327 A70-37159

Sco X-1 X ray source properties in 16-111 keV energy interval, using balloon-borne detectors 19 p3505 A70-38116

Hard X ray sources energy spectra in 20-120 keV range by balloon flights, presenting Sco X-1 intensities 21 p3872 A70-40660

X ray intensity sudden changes in 29.9-52.3 keV range from Sco X-1, correcting for atmospheric attenuation 21 p3872 A70-40661

Sco X-1 X ray emission data from rocket-borne measurement, indicating Fe K-emission from high ionization states 21 p3873 A70-40667

Sco X-1 radio emission models, considering possible binary nature and thermal bremsstrahlung 21 p3875 A70-40685

Sco X-1 extar high energy radiation production, discussing relativistic electron synchrotron emission and magnetic fluctuations spectrum 21 p3878 A70-40709

Scorpius X-1 X ray line emission, discussing continuum and background counts and cosmic abundance of iron 22 p4094 A70-42931

Simultaneous X ray and optical observations of Scorpius XR-1, comparing rocket data from various flights 22 p4094 A70-42987

Daytime ionospheric effect of X ray flare from SCO XR-1, discussing LF radio wave intensity decrease 22 p4095 A70-43165

Interstellar matter in Scorpius constellation, discussing star counting, gas identification, etc 23 p4254 A70-44901

Sco XR-1 optical intensity power spectra oscillations searched for in pulsar frequencies and fundamental radial mode vibrations in white dwarfs and neutron stars 24 p4410 A70-45762

SCOUT LAUNCH VEHICLE
Scout missile destruct charge system premature operational response to high temperature environment caused by combustion gas leak during stage separation 03 p0550 A70-14140

SCR [RECTIFIERS]
U SILICON CONTROLLED RECTIFIERS

SCRAMBLING [COMMUNICATION]
Optimum interleavers realization procedure for reordering contiguous symbols sequence to satisfy minimum distance requirement for improving communication system performance 14 p2554 A70-31121

SCRAMJET ENGINES
U SUPERSONIC COMBUSTION RAMJET ENGINES

SCRAMJETS
U SUPERSONIC COMBUSTION RAMJET ENGINES

SCREEN EFFECT
Reflection and transmission characteristics of screens in duct obstructing shock propagating in unsteady compressible fluid, describing theoretical models and experimental detection 01 p0060 A70-10224

Vertical electric dipole transient response over circular ground screen, studying low angle radiation patterns 06 p1021 A70-17573

Effective potential of electron screening of Coulomb nuclei field leading to thermonuclear reaction rate increase using self consistent field method 07 p1346 A70-20206

Electric dipole emission near ideally conducting screen with variable surface impedance parallel strips, analyzing radiation pattern 09 p1636 A70-23140

Granularity spectrum of diffusing screen uniformly illuminated by normally incident coherent light, basing study on long and short distance visual observations 10 p1899 A70-24031

Asymmetric cross correlation functions in D and lower E region drift measurements interpreted in terms of moving screens 10 p1881 A70-24811

Radiation patterns of slots in flat and curved screens using open waveguide emission theory 13 p2378 A70-29305

Sound passage through rigid screen of arbitrary wave thickness with apertures, using linear algebraic equations 18 p3291 A70-36306

SCREENING
Subcontracting for cost optimal parts screening, discussing negotiations and reliability requirements 15 p2747 A70-32651

SCREENS
Vertical Hertzian doublet with large circular screen placed above earth, calculating radiation pattern, directive gain, efficiency and radiation resistance 09 p1637 A70-23152

Diffraction effects for bilinear screen with irregular apertures determined using correction weighting function for solution 09 p1639 A70-23668

Transmission coefficient for perforated screen related to orientation of rectangular and cross shaped

narrow openings and field polarization during normal wave incidence 12 p2191 A70-28174

Dielectric layer and screen heat loss effects on diffraction radiation in resonant waveguide 19 p3377 A70-37725

Planar conducting screen with periodic rectangular perforations, determining transmission and reflection coefficients and aperture field distribution 24 p4311 A70-45219

SCREW DISLOCATIONS

Shear moduli and lattice parameters effect on screw dislocation equilibrium in bimetallic medium of soft and hard phases 03 p0587 A70-13117

Steady creep process microscopic mechanisms, discussing creep due to glide of jogged screw dislocations, climbing of edge dislocations and stress directed vacancy diffusion 08 p1593 A70-21519

Double ended dislocation pileups and elastic cracks at bimaterial interface under screw, edge and shear modes 15 p2756 A70-31561

Elastic properties of dislocations in Ti basal, prismatic and pyramidal slip systems, discussing dilatational fields of edge and screw dislocations 17 p3115 A70-34385

Isotropic body screw dislocations, using finite elasticity approach 17 p3190 A70-35453

Elastic properties of complex screw dislocation arrays from equations for stress fields of dislocation segments 17 p3190 A70-35455

Superlattice stacking faults in plastically deformed nickel aluminate [gamma prime phase] due to interaction of antiphase boundary /APB/ type dislocation pairs 19 p3451 A70-37704

Half plane with stress-free surface deformed by protrusions or notches, deriving edge force or screw dislocation by linear elastic analysis 21 p3939 A70-42028

Stress fields of screw and edge dislocations in linearly elastic isotropic Cosserat continuum using stress functions 23 p4266 A70-44022

Cross slip between screw dislocations coplanar arrays in Ti-Al alloy, noting fringe pattern and bowing absence 24 p4359 A70-45248

SCREWS

Differential screw gauge for determining micrometer screw periodic errors and error components in level triers, using Rydberg method 04 p0693 A70-15488

SCRIBING**U SCORING****SCUTUM CONSTELLATION**

Delta Scuti stars, determining consistent absolute magnitudes by Stromgren intermediate band colors and Crawford photoelectric H beta indices 17 p3171 A70-35443

Neutral hydrogen observations in Sagittarius and Scutum spiral arms, examining circular galactic rotation by density wave theory kinematic models 18 p3331 A70-37197

SDP [COMPUTERS]**U SITE DATA PROCESSORS****SEA KNIGHT HELICOPTER****U CH-46 HELICOPTER****SEA ROUGHNESS**

Sun glitter on sea surface from space photographs, considering wind and sea conditions effect on shape and brightness of patterns 14 p2572 A70-30345

SEA STATES

Microwave radiometric temperature measurements generating curves relating sea state and surface temperature 12 p2215 A70-26903

Passive remote sensing in microwave spectra for oceanographic applications including sea state, pollution and sea ice properties 12 p2216 A70-26905

State of sea definition for hovercraft performance purposes, recommending Hovercraft Coastal Wind Wave Code 13 p2347 A70-29126

Criticism of theory for cosmogenic tritium produced oceanic He 3 excess 21 p3920 A70-41883

Sea surface temperature determination from satellite high resolution IR window radiation measurements by statistical histogram inference method 21 p3820 A70-42122

SEA WATER

Wind velocity longitudinal profile measurements in atmospheric boundary layer over rough sea surface using floating beacon and statistical analysis of airflow perturbations 04 p0715 A70-15253

Radar signal amplitude fluctuations reflected from disturbed sea water surface, noting wind induced waving stochastic nature influence 05 p0812 A70-16246

Electric and magnetic fields of waterspouts measured by instrumented U.S. Navy aircraft 06 p1101 A70-18582

Microwave radiometric techniques for continuous all-weather remote sensing of sea conditions from satellites, discussing foam and surface ripple effects [AIAA PAPER 70-318] 09 p1677 A70-22869

Sea surface temperature measurement over large areas using IR remote sensing system mounted on airborne platform 09 p1686 A70-23756

Metals, alloys and galvanic couples corrosion rates in synthetic seawater measured by polarization technique 10 p1887 A70-24044

PH variation effect on sea water on stress corrosion cracking behavior of Ti alloys 13 p2435 A70-29174

Radio waves attenuation anisotropy in sea ice by comparing vertically and horizontally polarized signals 14 p2546 A70-30132

Sea water temperature and salinity effects on smooth ocean surface radiation in centimeter range 18 p3250 A70-36968

Submarine basalt sea water alteration effects, examining Sr and rare earth concentrations, Ba enrichments or depletions and trace element data 19 p3413 A70-38015

SEALANTS**U SEALERS****SEALERS**

Defects development in cermet materials sealing elements in high O content gas flows of turboprop and turbojet engines 01 p0161 A70-10160

Chemical composition of cermet material for radial sealing of high temperature gas turbines, ensuring structural stability and oxidation resistance 01 p0124 A70-11621

Thermal stability of turbine sealant mica-ceramic materials containing boron nitride 04 p0712 A70-14467

Bonding and sealing of fluid amplifiers with epoxy resin dry-film adhesive, noting low rejects rate 12 p2164 A70-27075

Elastomeric seals and sealants selection for SST, describing tests in air, fuel vapors and hydraulic fluids at elevated temperatures 13 p2418 A70-28668

Inhibitive elastomeric sealing compounds and coating systems preventing aluminum alloy corrosion in aircraft 13 p2433 A70-28778

SEALING**NT SELF SEALING**

Sealing mechanism theory with face seal applications, taking into account load carrying capacity and no leakage pressure gradient [ASLE FICFS PREPRINT 18] 02 p0308 A70-12172

Load support and leakage from microasperity lubricated face seals, developing hydrodynamic lubricant films [ASLE FICFS PREPRINT 21] 02 p0308 A70-12174

Hydrodynamic sealing action resulting from helical grooving machined into shaft or lip of radial seal, describing pressure gradients role 08 p1507 A70-21268

Fluid sealing - ASLE-ASME Conference, Philadelphia, May 1969 13 p2416 A70-28609

Controlled leakage sealing of hydrodynamic bearing lubrication systems for space vehicles in synchronous orbit 16 p2923 A70-34158

One-step closure sealing of pressurized stainless steel capillary tubes by resistance pinch welding 21 p3832 A70-40789

Molybdenum disilicate and aluminum oxide coating sealing heat resistance tests 24 p4364 A70-46341

SEALS [STOPPERS]**NT HERMETIC SEALS****NT O RING SEALS****NT PLUGS****NT PUMP SEALS**

Electrical lead sealing in hydrostatic high pressure systems with gaseous pressure transmitting medium, considering piston cone seals, frozen oil seals, epoxy seals, etc 01 p0104 A70-10744

Spiral grooved turbulent screw seal /viscoseal/ analysis, combining results of spiral grooved journal bearing study with turbulent fluid film theory [ASLE FICFS PREPRINT 32] 02 p0308 A70-12169

Misalignment and eccentricity effect on face seal, discussing leakage dependence on phase angle [ASLE FICFS PREPRINT 15A] 02 p0308 A70-12171

Sealing mechanism theory with face seal applications, taking into account load carrying capacity and no leakage pressure gradient
[ASLE FICFS PREPRINT 18] 02 p0308 A70-12172

Lubrication and leakage control mechanics of face seals, considering liquid to vapor boundary within interface
[ASLE FICFS PREPRINT 22] 02 p0308 A70-12173

Noncontacting minimum leakage dynamic seals requiring liquid-vapor interface with leakage tolerance
[ASLE FICFS PREPRINT 40] 02 p0308 A70-12175

Eccentric face seal with tangentially varying film thickness, analyzing leakage flow proportional to eccentricity and surface waviness
[ASLE FICFS PREPRINT 15B] 02 p0308 A70-12176

Free molecular mass flow rate through vacuum seal separating two rarefied gas environments, using coupled integral equations formulated on kinetic theory
[ASME PAPER 69-WA/FE-18] 04 p0625 A70-14779

Allowable leakage guidelines for in-service aircraft hydraulic components, discussing causes and measurements, tabulating rates for static and dynamic seals
05 p0797 A70-15776

Back-up rings and special sealing devices performance qualification testing specifications
[SAE-ARP-979] 07 p1290 A70-18802

Lip and face seal lubrication used on rotating shafts operating in compartments with fluids under pressure
07 p1293 A70-18895

Hydrodynamic sealing action resulting from helical grooving machined into shaft or lip of radial seal, describing pressure gradients role
08 p1507 A70-21268

Sputtering method used for applying metalizing layer to ceramics in producing ceramic to metal seals
10 p1895 A70-24555

Model testing gas flow calculation in system emitting electron beam into atmosphere through supersonic gas seal
10 p1895 A70-24590

Hydromechanics and thermodynamics in mechanical radial face seal design
11 p2059 A70-25792

Book on mechanical seals design covering temperature and pressure effects, leakage and wear problems, etc
12 p2238 A70-26851

Hydraulic seals for fire resistant fluids in hydraulic equipment, describing computerized designs
13 p2416 A70-28610

Mechanical seals ringing sound relationship with heat transfer and interfacial conditions, noting sliding surfaces temperature effect
13 p2417 A70-28611

Thermohydrodynamic seals design, properties and performance compared with standard mechanical seals
13 p2417 A70-28612

Film cavitation between flat annular surfaces in face seal resulting from hydrodynamic pressure generated by misalignment and surface waviness
13 p2417 A70-28613

Self energized hydrostatic shaft seal operating with incompressible fluid in laminar flow regime, using general lubrication theory
13 p2417 A70-28614

Elastomeric seals and sealants selection for SST, describing tests in air, fuel vapors and hydraulic fluids at elevated temperatures
13 p2418 A70-28668

Friction and wear effects on leakage path in sliding seal interface
16 p2916 A70-33078

Dynamic seal effectiveness prediction, considering bearing and sealing pressure distributions, friction coefficient, flow characteristics, etc
[ASME PAPER 70-DE-53] 16 p2918 A70-33514

Liquid fluorine feed system valves, seals and seats, discussing design criteria for flight weight components
[AIAA PAPER 70-705] 16 p2844 A70-33564

Teflon bucket and Be-Cu cap seal against hydrostatic pressure, discussing applications for high pressure superconductivity measurements
18 p3262 A70-37097

Turbulent viscoseal with gas-liquid interface, using recirculation loop for gas ingestion reduction
[ASLE PREPRINT 70AM 5C-4] 19 p3439 A70-38804

Oil seals service life as function of friction horsepower
[ASLE PREPRINT 70AM 5C-1] 19 p3439 A70-38807

Postmechanical interface separation in elastically supported rotary face seals under input excitation
[ASLE PREPRINT 70AM 3C-3] 19 p3439 A70-38808

Dry face mechanical shaft seal operating on self generated graphitic film without boundary fluid lubrication
[ASLE PREPRINT 70AM 3C-2] 19 p3439 A70-38809

Low friction seal for axial loading piston in triaxial soil testing cells
23 p4199 A70-43873

Pneumatic actuator rod and piston head seals, examining materials at various temperatures, pressures and speeds
[SAE PAPER 700791] 24 p4294 A70-45855

SEAMS [JOINTS]
Bar butt current penetration welding, using HF continuous current seam welding process for joining finite length pieces
22 p4046 A70-43148

Materials for glass-metal compressed joints, tabulating stress and thermal expansion coefficients
22 p3999 A70-43447

SEAPLANES
Water tests with N 300 Naviplanes confirming flexible skirt concept regarding speeds and stability
08 p1435 A70-20622

Passenger seaplanes virtues and drawbacks, discussing bases, servicing, refueling, passenger conveyance, prospects, etc
23 p4137 A70-43887

SEARCH PROFILES
Correction method for single frequency search in extremal control of continuous quick response multivariable plants
04 p0662 A70-15434

Search optimization for object drifting in outer space, considering approximate location and speed
17 p3172 A70-35668

Optimal control of coordinate space cells inspection order during search for unknown number of objects
22 p3999 A70-42552

SEARCH RADAR
Phased array radar for automatic random search using pseudorandom sequences to generate random phase characteristics of currents together with suitable gating
12 p2183 A70-26984

Subclutter visibility /SCV/, resolution and interclutter of MTI or Doppler search radars in land, sea and weather clutter
12 p2188 A70-27940

Search radar antennas for monopulse direction finding with radiation pattern for sum and difference operation
15 p2704 A70-32674

SEARCHING
NT SEARCH PROFILES
Optimal strategy for searching for object hidden in box involving use of optimal return function
05 p0877 A70-16715

Search and rescue /SAR/ concepts behind advanced NAV systems, emphasizing flying ejection seat /AER-CAB/ for air to air self rescue
07 p1192 A70-19024

Noise effects on joint operation of signal follow-up system with search device using semi-Markov random technique
08 p1461 A70-20864

Visual search activity decrease observed as function of time-on-task for skilled and unskilled helicopter pilots, recording eye movements and blinks
09 p1628 A70-23463

Search duration distribution of two stage lock-on indicator scanning signal search systems, using regenerative random process and integral recovery equation
15 p2696 A70-31501

Optimal search algorithm for stationary object hidden in one of N regions with a priori probability
15 p2767 A70-31843

Eye movements during visual search and meaningless pattern discrimination
19 p3361 A70-38054

Iterative adaptation algorithms, using automatic search techniques for single and multiparameter systems
19 p3394 A70-38163

SEARCHLIGHTS
Xenon arc lamp searchlight performance and application during Apollo 8 launch
12 p2207 A70-27662

Vertical tropospheric turbidity distribution determination from intensity measurements of inclined searchlight beams
13 p2445 A70-29471

SEAS
NT MEDITERRANEAN SEA
Passive microwave observation from space of sea surface degraded by atmosphere
[AIAA PAPER 70-197] 06 p1010 A70-18087

Fraunhofer line discriminator /FLD/ used for airborne fluorometer applicable to marine and estuarine studies
09 p1681 A70-23350

SEASONAL VARIATIONS
U ANNUAL VARIATIONS
SEASONS
NT SUMMER
NT WINTER

Favorable air mass type and season for long cross country soaring flights over eastern U.S. determined from record analysis
09 p1718 A70-23062

Physiological reactions of humans to orthostatic heat tolerance and natural acclimatization in summer and winter using tilt-table test and bicycle ergometer
12 p2169 A70-27656

SEAT BELTS
Aircraft passenger tie-down failure, comparing injury patterns in various accidents to aid reconstruction
17 p3039 A70-35572

Aircraft crash protection with preinflated air bag added to conventional seat/lap belt tested with human sled subjects
23 p4140 A70-44456

Near fatal crash in T-33 aircraft, discussing protective clothing, seat harnesses, bodily position and mental attitude
23 p4153 A70-44497

SEATS
NT EJECTION SEATS
Radiography of spine in seated position, discussing aircraft seats, aeronautical ergonomics, etc
05 p0804 A70-15765

General aviation aircraft styling and interior developments, describing seat construction role in personalized aircraft production costs
[SAE PAPER 700232] 11 p1980 A70-25901

SECANTS
U TRIGONOMETRIC FUNCTIONS
SECONDARY AIR
U AIR
SECONDARY COSMIC RAYS
Secondary corpuscular stream effect on diurnal variations in cosmic ray intensity obtained from statistical analysis
01 p0172 A70-11524

Excess radiation in equatorial regions studied on-board Cosmos 137, noting contribution of primary particle multiplication to secondary radiation
01 p0192 A70-11542

High altitude balloon measurements of secondary gamma quanta intensity vertical distribution, using scintillation counter with CsI/Tl crystal
01 p0172 A70-11544

Angular distribution and production probability of secondary shower particles produced by high energy cosmic ray muons using scintillation counter facility
05 p0899 A70-15957

Electromagnetic structure of interplanetary space on basis of secondary cosmic ray intensity gradient annual variations as function of earth heliographic latitude
05 p0900 A70-15970

Cosmic gamma ray spectrum from secondary neutral pion production in p-p interactions, discussing delta isobar, fireball and nuclear interactions effects
11 p2106 A70-26707

Vertical secondary cosmic gamma spectra from primary nucleon and electron spectra, discussing effects of solar cycle and geomagnetic cut-off
18 p3308 A70-36500

Secondary cosmic ray muon inelasticity in high energy neutrino interactions for deep mine experiments, using lepton current
21 p3845 A70-41139

SECONDARY EMISSION
Spacecraft surface secondary electron emission effects on electron trap measurements in magnetosphere and solar wind, noting agreement with positive ion densities
03 p0561 A70-13994

Physical conditions required to explain observations of radio galaxies through electrons of secondary origin, considering spectral characteristics and evolution
04 p0742 A70-15716

Neutron flux measurements on Cosmos 53, equipment and calculation of secondary neutrons due to bombardment of satellite components
05 p0905 A70-17112

Secondary electron emission coefficients and energy distributions to investigate interaction between positive ions and Cu/Be dynodes of electron multiplier
07 p1344 A70-20127

Low energy ions incidence angle effects on secondary electron emission from molybdenum cylinders in low pressure plasma, noting role of Langmuir sheath around target
07 p1355 A70-20356

Fireball detection and discovery, investigating angular distribution of secondary particles using Van Hove and Amati theory
09 p1747 A70-23729

Foil decarbonization process monitored by mass spectrometry of secondary carbon ion emission
12 p2254 A70-27311

Pulsed electron beam irradiated dielectrics secondary electron emission in vacuum, emphasizing inelastic scattering
13 p2471 A70-29409

Solar Monitoring Experiment program, observing solar activity relation to large enhancements of lower stratosphere secondary radiation

15 p2792 A70-31656

Open type secondary electron multipliers, discussing circuitry, emission recording, component materials and performance

16 p2873 A70-33231

SECONDARY FLOW

Secondary velocities analysis in turbulent boundary layer in dihedral interior based on turbulence anisotropy and effects on wall pressure gradient

03 p0471 A70-14354

Secondary vortex generation in near wake of circular cylinders under forced oscillation, analyzing motion dependent transition regimes using hydrogen bubbles flow visualization

[AIAA PAPER 69-755] 06 p1032 A70-17212

Hydraulic loss and secondary circulation of fluid flow in three dimensional bend commercial conduits, discussing relationship to velocity distribution

10 p1871 A70-25094

Viscous incompressible fluid secondary steady state flow due to rotating spheroid, considering acceleration terms in Stokes linear equation solution

11 p2034 A70-25390

Wall shear stress distribution in rectangular ducts, discussing secondary currents and main flow prediction

11 p2035 A70-25779

Centrifugal impellers primary and secondary flows velocity distributions, determining vorticity generation

18 p3243 A70-36871

Secondary flow model for planetary boundary layer, considering flow as finite perturbation

21 p3813 A70-40904

Rocket roll control by secondary compressed air injection via slender fins inserted into nozzle convergent

21 p3931 A70-41953

Injection slot geometry effect on gas film cooling, discussing effect of secondary stream acceleration

21 p3952 A70-42084

Analytical evaluation of secondary flow injection effects on rocket engine performance including cold flow and simulated hot flow data

23 p4233 A70-44516

SECONDARY HARMONIC GENERATION

U HARMONIC GENERATIONS

SECONDARY INJECTION

Optimization of control forces in rocket nozzles produced by multipoint secondary gaseous injection

05 p0923 A70-15889

Pressure distribution on flat plate resulting from potential incompressible flow interaction between secondary jet and subsonic mainstream

07 p1190 A70-20415

Injectant stagnation temperature and molecular weight variation effect on flow field generated from secondary gas injection into supersonic stream

[AIAA PAPER 69-1] 09 p1733 A70-23217

Secondary peripheral air injection effects on subsonic airflow through slotted tube, discussing primary flow, flow separation, static and stagnation pressures and temperature changes

11 p2036 A70-26140

Flow disturbances and side forces in supersonic rocket nozzle due to gaseous secondary injection analyzed by semiempirical models

14 p2629 A70-30756

Mass flow rate and geometry effects on pressure recovery of conical diffusers with annular secondary injection at inlet

[ASME PAPER 70-FE-18] 16 p2835 A70-33631

Two dimensional sonic secondary fluid jet interaction with uniform primary supersonic stream in wind tunnel

[ASME PAPER 70-FE-33] 16 p2835 A70-33638

Turbine engine combustion chambers with various frontal devices, investigating burnout mechanism and heat yield in secondary air flow injection zone

19 p3489 A70-37246

SECONDARY RADAR

Secondary surveillance radar to operate autonomously with digital techniques and digital handling systems, discussing design and ATC applications

02 p0266 A70-11957

Defruiter suppressing nonsynchronous responses /fruits/ in secondary surveillance radar systems, discussing effects on target detection probability

02 p0263 A70-12786

Secondary radar application to assist ATC achieving air to ground communications reduction

08 p1541 A70-21020

Stable moored ocean platforms providing reliable VHF communications and secondary surveillance radar facilities for civil aviation operations over North Atlantic

09 p1723 A70-23035

SECONDARY WAVES

U S WAVES

SECRECTIONS

NT ENDOCRINE SECRECTIONS

NT HORMONES

NT INSULIN

NT SWEAT

Mathematical model for rats nonlinear time-varying glucocorticoid secretion control mechanism, obtaining time dependent characteristics of hypothalamic-hypophyseal complex

12 p2174 A70-26893

Structure and function of juxtaglomerular apparatus of kidneys controlling synthesis and secretion of renin

24 p4305 A70-46392

SECULAR PERTURBATION

U LONG TERM EFFECTS

SEDATIVES

Differential effect of hypobaric hypoxia on depressive characteristics of sodium barbital, sodium pentobarbital and chloral hydrate in rats and mice

04 p0631 A70-14680

SEDIMENTARY ROCKS

NT CARBONACEOUS ROCKS

NT LIMESTONE

NT SHALES

Hydrocarbon contents of two sediments from Scottish Carboniferous Formation, examining isoprenoid alkanes abiogenesis

01 p0041 A70-10038

Australasian microtektite compositional trends compared with critical plots enabling distinction between rocks formed by igneous sedimentary and vapor fractionation processes

06 p1150 A70-18477

Lunar seismogram response behavior in terms of power law model of sedimentary earth rock anelasticity

13 p2497 A70-29856

Lateral compression of rocks and global shells multilayers, using equations for buckling of single free stratum

18 p3255 A70-37076

Remote sensing of returning reflected and diffracted seismic waves illuminating layered rocks subsurface, discussing data visual display

22 p4018 A70-43085

SEDIMENTS

Reworking of deep-sea sediments as indicated by vertical dispersion of Australasian and Ivory Coast microtektite horizons, implying years of deposition

01 p0178 A70-10474

Gas chromatography and mass spectroscopy study of fatty acids and hydroxy acids in 5000 year sediment from English Lake District

02 p0252 A70-12507

Hydrocarbons and fatty acids distribution in living organisms, fossils, sediments and crude oils, discussing slow thermal maturation role and geological applications

02 p0252 A70-12520

Gas chromatographic-mass spectrometric identification of aliphatic hydroxy acids in plants and sediments

02 p0252 A70-12521

Erythrocyte sedimentation rate in chicken blood predictable by Stokes equation

02 p0238 A70-12547

Fatty acids and aliphatic hydrocarbons in 3.4 billion year old metamorphosed sediment, suggesting biological origin

03 p0475 A70-13820

Pleural space of dogs investigated by spheres injection of varying density and diameter, discussing sedimentation velocities

03 p0429 A70-14160

Hydrocarbon distribution of various algae and bacteria, discussing hydrocarbons diagenesis and biological transformations in sediments

06 p0997 A70-18401

Three dimensional unsteady and steady sediment distribution obtained by Monte Carlo simulation method, using stochastic hydrodynamics model for transport

07 p1255 A70-19103

Shallow water bottom biota, sediments and morphology determination by aerial and satellite photography

17 p3079 A70-35620

U SEEBECK EFFECT

SEEBECK EFFECT

Metallic thermoelectric materials, measuring electrical resistivities and Seebeck coefficients of binary Ni alloys

14 p2533 A70-30530

SEEDING (INOCULATION)

U INOCULATION

SEEDS

Antiradiation chemical substances for modifying radiation damage in peas during seed irradiation with fast neutrons

07 p1208 A70-19510

Spaceflight effects on dry crepis capillaris seeds in five day orbit, showing chromosome rearrangements and increased mutagenic sensitivity

10 p1811 A70-24323

Orbital space flight effects on dry barley seeds, noting increased intracellular rearrangements

10 p1811 A70-24324

Antiradiation chemical substances for modifying radiation damage in peas during seed irradiation with fast neutrons

11 p1988 A70-26109

Wheat seedlings cellular response to weightlessness during NASA Biosatellite II flight compared with simulated weightlessness effects

15 p2688 A70-31662

SEEKERS

U HOMING DEVICES

SEGREGATION

U SEPARATION

SEISMIC ENERGY

Meteoroid impacts as sources of seismic energy on moon, using projectile impact coupling to seismic waves in vacuum chamber experiment

04 p0751 A70-15056

Lunar elastic waves anomalous propagation, considering Apollo seismographic records and earth rocks specific dissipation function measurements

13 p2486 A70-28617

Vacuum effect on explosive coupling seismic energy considered in lunar geophysical experiment

16 p2896 A70-33092

Thermoelastic seismic-energy release as source mechanism for volcanic earthquakes, describing thermal microfracture tests

20 p3619 A70-39217

Isotropic finite strain expressions for compressional and shear velocities, noting no discrepancy with ultrasonic and seismic data

20 p3619 A70-39218

SEISMIC WAVES

NT LOVE WAVES

NT MICROSEISMS

NT RAYLEIGH WAVES

Optical wave front reconstruction principles applied to sonic and seismic wave holography for mapping earth subsurface structure

05 p0850 A70-16685

Seismic refraction profiles of ash flow in Valley of Ten Thousand Smokes, Alaska, obtaining P wave velocities

14 p2573 A70-30493

Body waves in lunar models, calculating travel times and amplitudes

14 p2638 A70-30674

Observational errors effects on surface waves resolution, describing shear velocity determination in crust and mantle from observed waves

16 p2897 A70-33647

Ionospheric acoustic wave propagation from seismic waves of Kurile Islands earthquake on 11 August 1969

17 p3075 A70-34569

Finite difference time integration method for computing seismic ray intensities

19 p3412 A70-37837

Seismic wave attenuation mechanisms emphasizing partial melting, grain boundary relaxation and high temperature internal friction background

19 p3416 A70-38440

Seismic measurements at inertial test facilities, considering vibration environment relevant to single degree of freedom gyroscope performance tests

[AIAA PAPER 70-951] 20 p3606 A70-39576

Seismic signal by Apollo 12 lunar module impact indicating deep layer of powder by signal propagation

21 p3920 A70-41894

Remote sensing of returning reflected and diffracted seismic waves illuminating layered rocks subsurface, discussing data visual display

22 p4018 A70-43085

Computer-based seismic data acquisition system using digital vibroseis process for eliminating low signal to noise ratio characteristics

22 p4038 A70-43092

SEISMOGRAPHS

NT LUNAR SEISMOGRAPHS

Displacement and velocity measurements using strain gauges, linear potentiometers and seismic transducers

15 p2743 A70-32799

Phase delay of solid earth tide, minimizing ocean and atmosphere loading by strain seismograph measurement

18 p3255 A70-37077

SEISMOLOGY

Neutron star vulcanism and seismicity, discussing neutron star volcano size and shape possibilities

04 p0753 A70-15070

Seismology as tool for investigation of planets, discussing earth rigidity, tides and long period oscillations

11 p2111 A70-26040

Seismic measurements of sonic boom induced ground vibrations for hazard to structures

12 p2227 A70-28078

Lunar seismogram response behavior in terms of power law model of sedimentary earth rock anelasticity

13 p2497 A70-29856

Anelasticity in lunar seismology, discussing low Q regolith layer model from Apollo 12 LP seismogram

13 p2497 A70-29857

SEISMOMETERS

U SEISMOGRAPHS SEIZURES

Low body temperature effects on convulsive activity elicited by hyperbaric oxygen in unrestrained unanesthetized rats
04 p0629 A70-14448

SELECTION

NT PERSONNEL SELECTION NT PILOT SELECTION

Computer program for automatically selecting redundant parts and redundancy types for various aerospace systems characteristics

01 p0103 A70-10488
Optimal selection of subsystems, minimizing mathematical expectation of output losses considering malfunctions

03 p0460 A70-13429
Nondestructive screen test efficiency, determining potential failures of electric components by Bayes theorem

15 p2748 A70-32659
Visual sensory storage item selection efficiency
19 p3363 A70-38321
Ni-Cd cell plates screening and selection by weight for reliability and uniformity improvement
21 p3760 A70-42147

SELECTIVE FADING

Frequency-time coded multichannel communication system error probability bounds to investigate frequency selective fading effect on performance
12 p2184 A70-27416

SELECTIVITY

Selectivity and pulsation sensitivity of electroacoustic transducers in turbulent flow under non-coherent reception of random pressure field

03 p0467 A70-13514
Solar installations optical properties selectivity increase by light-collecting surfaces mechanical treatment, describing plate grinding with abrasive powders
07 p1196 A70-19625

Umkehr observation days selectivity effects on calculated mean ozone distributions in layers 2 and 3
08 p1492 A70-21970
Two signal selectivity and permissible noise level of FM receiver with linear cascades and detector non-linearity effects
15 p2696 A70-31506

SELECTORS

Multiple tube manometer with selector switch for measuring flow channel wall pressures
23 p4194 A70-44000

SELENIDES

NT CADMIUM SELENIDES NT GALLIUM SELENIDES NT LEAD SELENIDES NT ZINC SELENIDES

Synthetic molybdenum diselenide oxidation kinetics between 375-530 C, determining isothermally reaction rate constants in dry air
[ASLE PREPRINT 69-LC-8] 02 p0321 A70-12537

Composition dependence of optical energy gap and diffuse reflectance in MnSe-CdSe solid solutions
16 p2960 A70-33094
Transition metal disulfides and selenides as solid lubricants, investigating sliding friction characteristics [ASLE PREPRINT 70AM 6E-1]
19 p3438 A70-38801

SELENIUM

Extended chain crystals of hexagonal Se temporary superheating before final melting, presenting melting equation

01 p0126 A70-10222
Selenium additions effect on structural steels transverse mechanical properties, emphasizing plasticity, shock resistance and machinability
07 p1310 A70-19750

Extended chain polymer crystals temporary superheating before final melting, discussing hexagonal selenium crystals data
11 p2069 A70-25803

Switching circuit with Se diode, comparing I-V characteristics with Se rectifiers
17 p3054 A70-35411

Photometric determination of Ti with diantipyrilmethane in steels containing Se
18 p3277 A70-36465

SELENIUM ALLOYS

Cd-Se and Cd-Te systems phase diagrams based on regular solutions theory, discussing molecular interaction energy dependence on composition
22 p4085 A70-42678

Amorphous semiconductor alloys in As-Se system, measuring DC and AC electrical conductivity dependence on temperature
24 p4390 A70-45657

SELENIUM COMPOUNDS

NT CADMIUM SELENIDES NT GALLIUM SELENIDES NT LEAD SELENIDES NT SELENIDES NT ZINC SELENIDES

Phase equilibria in Mn-S, Mn-Se and MnS-MnSe systems by X ray diffraction after preparation by annealing
02 p0249 A70-11652

SELENOGRAPHY

Selenodetic investigations based on lunar photographs with background stars, converting equatorial coordinates to orbital using Cracovian formulas
08 p1564 A70-20560

Selenodetic control systems orientation based on lunar features correlation with reference stars, considering ephemeris times corrections
08 p1572 A70-20941

Selenocentric coordinate system originating at center of mass, determining lunar figure center from photographs with reference stars
08 p1572 A70-20942

Selenodetic control system, considering photogrammetric networks, Apollo landing site, topographical maps, lunar photographs, etc
10 p1890 A70-24732

Selenodetic investigations based on lunar photographs with background stars, converting equatorial coordinates to orbital using Cracovian formulas
15 p2805 A70-32715

Selenodetic control systems orientation based on lunar features correlation with reference stars, considering ephemeris times corrections
15 p2806 A70-32753

Selenocentric coordinate system originating at center of mass, determining lunar figure center from photographs with reference stars
15 p2806 A70-32754

Lunar geomorphological charts of Mare Nubium northern part, considering structural features in equatorial band
19 p3517 A70-37984

Lunar geomorphological charts in Archimedes crater and Appenine and Haemus mountain region, examining duration and stages in Mare Imbrium depression development
19 p3517 A70-37986

Lunar maria distribution, explaining origin and characteristics by surface brightness
19 p3517 A70-37987

Small lunar crater structural characteristics and distribution
19 p3517 A70-37989

Lunar crater number and density vs diameter graph, showing rhythmical deviations from mean asymmetrical cosine curve
19 p3517 A70-37990

Lunar surface selenographic reference points tabulation, considering suitability for selenodetic measures
23 p4247 A70-44773

SELENOLOGY

Solar IR light brightness distribution reflected by volcanic covers compared with lunar observation data
04 p0744 A70-14439

Lunar density gradient, free oscillation and tides study inferring lunar atomic number similarity to Si and earth mantle
05 p0908 A70-16316

Enstatite luminescence response for bulk specimens, powders and individual grains, considering selenological implications
05 p0909 A70-16391

Mathematical techniques for selenodesy computer simulation program, solving problems arising from infinite series of spherical harmonics for lunar gravitational potential
06 p1152 A70-18498

Lunar interior electrical conductivity estimated using lunar interaction with solar wind and interplanetary electric and magnetic fields
06 p1153 A70-18544

Lunar origin and history, discussing evolution temperature, large and small craters and association with solar system evolution
08 p1581 A70-21822

Moon observation in megalithic times by means of menhirs
09 p1751 A70-22194

Soviet book on lunar physics covering exploration, topography, internal structure, etc
09 p1756 A70-22528

Lunar sinuous rilles formation by fluid flow mechanisms, discussing evidence for lava and rille formation by lava tube collapse
09 p1759 A70-22799

Selenology by traverse method, discussing equipment and mapping procedure
11 p2111 A70-26043

Book on moon covering motion, earth-moon system, internal structure, hydrostatic equilibrium, thermal history, global form, gravitation, topography, etc
12 p2298 A70-27096

Lunar physics expansion stemming from physical, geophysical and chemical experiments and measurements by manned and unmanned space flight
12 p2302 A70-27583

Solar light brightness distribution reflected by volcanic covers compared with lunar observation data
13 p2485 A70-28464

Lunar libration constants determination from Bessel to present, discussing data reduction methods, international cooperation and impact of lunar exploration
13 p2490 A70-28946

SELF ADAPTIVE CONTROL SYSTEMS

Book on stratigraphic view of lunar geology covering lunar craters and terrestrial analogs, remote sensing, material ages, surface interpretations and Apollo mission results
13 p2491 A70-29060

Lunar surface material composition in terra region from alpha scattering data on Surveyor 7, noting Si Na abundance
13 p2492 A70-29265

Lunar dimple craters formation by meteoritic erosion of concentric impact craters
15 p2807 A70-32850

Moon Surface Basic Points catalogs differences, estimating position dispersion by residuals of transformations
18 p3323 A70-37143

Apollo 11 lunar science - Conference, Houston, January 1970, Volume 2, Chemical and isotope analyses
21 p3903 A70-41560

Papers on lunar geology covering Tycho northeast rim, multiphase eruptions, basalt melts in simulated lunar environment and lava tubes in New Mexico
23 p4253 A70-44880

Lunar research via direct exploration, discussing lunar geology, cartography, selenodesy, gravific potential, rotation, etc
23 p4256 A70-45037

Book on lunar rocks covering pre-Apollo lunar scientific knowledge, apollo and future lunar mission planning, lunar mineralogy, petrology and geochemistry, etc
24 p4412 A70-46025

SELF ABSORPTION

Radio sources minimum observable diameter attributed to interstellar scattering and synchrotron self absorption
22 p4101 A70-42862

SELF ADAPTIVE CONTROL SYSTEMS

Control system main and self adaptive loops structural synthesis
01 p0053 A70-11043

Optimal use of adaptive renewal capability determined for first order time varying linear systems with quadratic performance index by exponential model of component failure
02 p0273 A70-12729

Soviet book on nonsearching gradient self adjusting system for determining error function gradient, using Liapunov method to study stability
04 p0661 A70-14677

Self adaptive servosystems operating with incomplete input signal information, proposing schemes for parameter adjustment by employing differential circuit containing frequency filters
07 p1239 A70-18734

Motion of second order autonomous quasi-linear system with disturbances, obtaining criterion for recognition of random forced and self oscillations
07 p1247 A70-20180

Liapunov direct method for synthesizing self adaptive model reference control system with simultaneously used passive /signal/ and active /parameter/ adjustment loops
08 p1480 A70-21018

Soviet papers on complex control systems covering hierarchical structures, accuracy and stability analysis, optimal and self adjusting control, etc
11 p2022 A70-25601

Asymptotic stability of multivariable autonomous control systems used Liapunov vector function method
11 p2083 A70-25606

Statistical linearization synthesis of nonlinear self adjusting systems with frequency filters and input signal under white noise
14 p2559 A70-30156

Transient response of self adaptive systems subjected to determinate or random signal mixed with additive noise
16 p2882 A70-33234

Frequency filters in nonlinear self adaptive system design for noncorrelated input and noise signals
18 p3234 A70-36119

Self adaptation algorithm of optimally fast acting system for variable parameter plant control
18 p3234 A70-36120

Sensitivity functions use in parametrically invariant self adjusting control systems
20 p3602 A70-39828

Self adaptive system with standard model, using direct loop amplification factor as controlled parameter
20 p3603 A70-39832

Self adjusting autopilot system based on invariance principle for stabilization against wind gusts
20 p3670 A70-39840

High performance aircraft self adaptive feedback control system, using airborne digital computer with inputs of elevator deflection and pitch rate for effectiveness identification
20 p3605 A70-40119

SELF ALIGNMENT

Harmonic linearization for nonsearching self adaptive automatic control systems described by nonlinear differential equations

22 p4001 A70-42835

Dynamic characteristics of autooscillatory nonlinear self adaptive systems under random noise, using statistical and harmonic linearization

22 p4003 A70-42884

Optimal self adaptive control systems with incomplete input information, ensuring minimum error dispersion

22 p4004 A70-42890

SELF ALIGNMENT

Initial quaternion for Cartesian time varying transformation matrix based on self alignment method of inertial analytic platform

11 p2072 A70-26150

Laser Doppler-shift velocimeter with self aligning optics, discussing performance parameters

16 p2926 A70-33143

Self alignment for gimballless inertial navigation system fixed base by generating computer programs from error signals derived from inertial sensors

16 p2946 A70-33302

Commercial aircraft strapdown inertial navigation systems, examining initial self alignment techniques

18 p3289 A70-36442

SELF BIAS

U BIAS

SELF CONSISTENT FIELDS

Self consistent field method to calculate effective dynamic characteristics of elastic media with filler for plane longitudinal wave propagation

02 p0388 A70-12485

Integral Hellman-Feynman formula applied to binding energy of molecular H and LiH, using SCF wavefunctions for atomic states

12 p2276 A70-27570

Iteration method for calculating self consistent fields in semiconductor surface inversion layers

22 p4085 A70-42745

SELF DEPLOYING SPACE STATIONS

U SELF ERECTING DEVICES

U SPACE STATIONS

SELF DIFFUSION

U DIFFUSION

SELF ERECTING ANTENNAS

U ANTENNAS

U SELF ERECTING DEVICES

SELF ERECTING DEVICES

Gearhead DC/AC electric motors with wet/dry lubricants, discussing selection criteria for spacecraft boom deployment

16 p2846 A70-34139

SELF EXCITATION

Self excited oscillators zero crossing times distribution for Markov process formulated as boundary value problem involving Kolmogoroff backward equation

01 p0143 A70-10891

Rotational motion of self excited symmetric gyroscopes applied to attitude control and nutation damping of space vehicles

01 p0143 A70-10929

Two degree of freedom gyroscopes stability with hydrodynamic grooved rotor bearings, describing parallel and conical whirling rotor oscillations

02 p0307 A70-12163

Frequency response linearity for self excited microwave oscillators with complimentary cavity derived, proposing parameters selection for widening voltage tunable frequency range

05 p0824 A70-16891

Stationary ring vortices in unbounded conducting fluid, investigating self excitation of magnetic field by vortices

13 p2461 A70-28965

Self excited cavity oscillators with tunnel and parametric diodes and nonequilibrium medium, noting single and multimodes, energy capabilities and frequency interactions

13 p3366 A70-29405

He-Ne laser memory, discussing induced oscillation excitation with radiation fed back to resonator by moving reflecting mirror

13 p2429 A70-29572

Self excited electron-phonon-spin spontaneous oscillations generation, deriving dispersion equation

16 p2878 A70-33779

Self excited systems limiting states with traveling wave, analyzing oscillator moving along string under tension

16 p2990 A70-33781

Mechanical systems spontaneous oscillation due to different critical velocities with and without arbitrarily small damping

18 p3338 A70-36430

Microwave self modulating GaAs diode laser, showing coupled external cavity resonator influence on intrinsic resonance frequency

18 p3269 A70-36733

Plasma anomalous diffusion relation to self excited LF oscillations

19 p3480 A70-38016

SELF FOCUSING

Argon CW lasers stationary thermal self focusing in various absorbing crystals and glasses

01 p0107 A70-10207

Gas laser beams short time constant and thermal self defocusing following small spot focusing on thin dye sample

01 p0109 A70-10431

Banana self focusing in water of laser beams with nonmonotonic intensity distribution, noting ruby laser experiment

02 p0312 A70-12260

Electromagnetic finite amplitude wave beams self action in magnetoactive plasma, noting nonlinear characteristics

03 p0448 A70-13411

Collapsing beam transition into self focusing light channel numerically analyzed allowing for Kerr effect saturation, multiphoton absorption and stimulated Raman scattering

04 p0650 A70-15285

Single mode neodymium laser second harmonic radiation self focusing resulting in filamentary fractures in solid dielectrics

06 p1080 A70-17496

Intense light beams self focusing in nonlinear media with quadratic Kerr effect, assuming spherical initial phase front after passing through condensing lens

07 p1296 A70-18720

Two photon photoconductivity of CdS crystals stimulated by ruby laser, showing emission self focusing during pumping

07 p1302 A70-20322

Self focusing antennas directive gain losses reduction for wave with jagged phase front impinging on linear array having passed through inhomogeneous atmosphere

09 p1648 A70-23163

Self focusing of ruby laser radiation in CdS single crystal, considering effect on crystal photoconductivity

12 p2248 A70-27540

Argon CW laser blue beam self focusing in methylene iodide, iodine and liquids under steady state conditions

12 p2248 A70-27545

Autofocus for variable magnification systems, discussing conjugate concepts and linkage and cam methods for enlargers and projectors

16 p2907 A70-33182

Resonant interaction and instability produced by nonlinear coupling of modulated wave and LF mode, stimulating self focusing of plasma waves

16 p2958 A70-33285

Thermal self focusing filaments observation in form of tracks in KDP and ADP crystals damaged by radiation from free emission mode laser

18 p3266 A70-36612

Self focusing schlieren observation in gas breakdown, discussing cubic polarizability of excited atoms in electron cascade due to laser pulses

21 p3835 A70-40594

Self focusing in nonlinear optics, discussing physical processes of wave propagation in dielectrics

22 p4074 A70-43207

SELF INDUCED VIBRATION

NT PANEL FLUTTER

NT SUBSONIC FLUTTER

NT SUPERSONIC FLUTTER

NT TRANSONIC FLUTTER

Nonlinear connected oscillations of vibrator and rigid bodies, analyzing plane-parallel and spatial motions, including elastic beams self excited oscillations

04 p0720 A70-15446

Self excited vibrations in balanced vertical shaft running on plain lubricated bearings, making numerical analysis of small perturbation transition to fully developed swirl

09 p1690 A70-22399

Parametric effect maser developed by maintaining self oscillations in static amplitude modulated magnetic field, noting application as magnetometer

11 p2063 A70-25947

Mechanical systems vibrations comprising tension couplings compensating misalignment between non-coaxial shafts

11 p2060 A70-26348

Self excited lateral vibration of poppet valve under positive and negative damping effects

11 p1983 A70-26420

Self induced intensity pulsations frequency stabilization and narrowing in continuously operating GaAs injection lasers

18 p3269 A70-36734

Self induced sustained light pulsations from GaAs injection lasers with tandem double section stripe geometry based on repetitively Q switched model

18 p3269 A70-36735

SELF LUBRICATION

Dry face mechanical shaft seal operating on self generated graphitic film without boundary fluid lubrication

[ASLE PREPRINT 70AM 3C-2]

19 p3439 A70-38809

SELF MANEUVERING UNITS

Extravehicular activity maneuvering devices, describing design and performance of Gemini project unit

21 p3929 A70-41075

SELF ORGANIZING SYSTEMS

Heuristic principles for self organization algorithm of cognitive automation system with active learning strategy

08 p1466 A70-20874

Automatic test equipment for different type of planes and relation to self organizing systems, considering airport implantation

10 p1970 A70-24476

Group Method of Data Handling based on heuristic self organization for solving complex system problems, with applications to random processes prediction

10 p1845 A70-24869

Adaptive extremal control systems operational stability, defining optimal convergence coefficient values for identifier and perceptron

14 p2559 A70-30175

Learning self learning relationship in image recognition, analyzing resolving function with minimum probability for erroneous recognition

14 p2553 A70-30420

Stochastic control optimization, examining self organizing approach for performance adaptive controller with asymptotic optimal properties

22 p4005 A70-43733

Heuristic self organizing systems role in technical cybernetics

24 p4321 A70-45645

SELF OSCILLATION

Second order dynamic systems stability, analyzing nonlinear and self excited oscillations by using two differential equations

01 p0146 A70-11604

Stability characteristics of two degree of freedom gyroscope having hydrodynamic grooved journal rotor bearings, discussing frequency of self excited oscillation

04 p0689 A70-14872

[ASME PAPER 69-LUB-H] Elastic bars self excited oscillations at audible frequencies, determining natural frequencies from analyzing sound

07 p1401 A70-18847

Motion of second order autonomous quasi-linear system with disturbances, obtaining criterion for recognition of random forced and self oscillations

07 p1247 A70-20180

Charged particle self oscillatory motion in plane condenser field, applying results to electrical measuring instruments theory

09 p1680 A70-23144

Steady state analysis of harmonic oscillations in HF synchronized transistor autooscillators, considering transistor inertial properties

09 p1649 A70-23341

Correlation functions of nonlinear auto-oscillatory system under nonstationary conditions determined by statistic linearization

11 p2022 A70-25341

Delayed feedback for LF periodic conditions/auto-oscillations/ in relay systems of cosmic flying apparatus stabilization

11 p2119 A70-25342

Readjustment algorithm for auto-oscillatory adaptive control system with variable structure, using harmonic linearization

11 p2022 A70-25343

Auto-oscillatory regimes in annular gas laser under coupling due to scattering, considering mode competition

11 p2064 A70-26811

Book on vibrations covering natural oscillations, damped and undamped oscillations, energy sources, forced vibrations, resonance and multiple degree of freedom systems

13 p2515 A70-29452

First harmonic precision improvement of dual input describing function, applying to self oscillation of nonlinear systems

14 p2560 A70-30625

Coupled open plane resonators system self oscillation intrinsic frequencies solution by numerical method, obtaining algorithm for characteristic equation roots

19 p3387 A70-37737

Self oscillatory operation of laser with bleachable light filters, solving power balance equations by computer algorithm

20 p3641 A70-39738

LF self excited oscillations in inhomogeneous afterglow magnetoplasma measured by Langmuir probe, noting dissipative drift instabilities

22 p4079 A70-42372

Multifrequency autooscillatory systems, comparing reflex klystron with He-Ne laser

22 p3995 A70-42404

Harmonic linearization equations for frequency and amplitude of self oscillations in nonlinear automatic control systems

22 p4001 A70-42832

Harmonic linearization method for nonlinear automatic control systems with finite automata, discussing self oscillating modes of operation

22 p4001 A70-42836

Self oscillations and dead zones of automatic control systems with variable structures, using harmonic linearization

22 p4001 A70-42837

Periodic solutions to complex nonlinear automatic control systems with initial deviations, considering system stability and self oscillation conditions

22 p4002 A70-42839

Dynamic characteristics of autooscillatory nonlinear self adaptive systems under random noise, using statistical and harmonic linearization

22 p4003 A70-42884

S band tunable free running high Q triode oscillator phase and frequency instability measurement based on delay lines applications

23 p4170 A70-43796

Auto-oscillatory regimes in annular gas laser under coupling due to scattering, considering mode competition

24 p4351 A70-45183

SELF REGULATING

U AUTOMATIC CONTROL

SELF REPAIRING DEVICES

Thermoelectric outer planet spacecraft (TOPS) project incorporating adaptable data handling system and self testing and repairing computer with triple redundancy subsystems

11 p1996 A70-25368

Onboard computers automatic reliability control with implementation of self repair, modeling by Markov processes nonhomogeneous in time

13 p2372 A70-28438

SELF SEALING

Crack self healing in aluminum foil-polyvinyl acetate sandwich structures

07 p1315 A70-18713

SELF STIMULATION

Rats under constant environmental conditions exhibiting circadian rhythmicity in rate of bar pressing with hypothalamic and septal reinforcing brain electrical stimulation

14 p2539 A70-30986

Steering behavior during learning as function of self generated stimuli by movement compared with stimulus tracking

20 p3580 A70-39674

SELSYNS [TRADEMARK]

U SERVOMOTORS

SEMICIRCULAR CANALS

Astronaut vestibular fitness determined from threshold labyrinthine tests on isolated horizontal and vertical semicircular canals

03 p0437 A70-14059

Vestibular semicircular canal excitation thresholds of experienced and candidate pilots for imposed angular accelerations

07 p1201 A70-18795

Oculogyral illusion provoked by angular accelerations during flying stationary and spiral turns in jet aircraft, considering semicircular canals stimulation

11 p1992 A70-26512

Vestibular threshold dependence on gravity, considering linear accelerations effect on canals sensitivity

14 p2539 A70-30916

Mathematical model for short term adaptation effects in human semicircular canal response to rotation, discussing nystagmus

18 p3216 A70-35940

Nystagmic response to directional inert shift of endolymph in semicircular canals in frontal plane head subject rotation

18 p3220 A70-36635

Electrokinetic model for semicircular canal transduction, focusing IR beam on exposed ampullae from posterior canals of Rana pipiens

21 p3765 A70-41696

Semicircular canals dynamic cross coupled responses to rotational movement, discussing mechanical model applicability

22 p3981 A70-43703

Semicircular canals-otoliths interactions for antagonistic and synergistic information

22 p3976 A70-43704

SEMICONDUCTING FILMS

Epitaxial PbSe films formation mechanism-defect structure relation using moire rotation method, discussing elastic strains, dislocations, boundary formation, etc

01 p0155 A70-10182

Book on thin film transistors microelectronics covering semiconductor physics, fabrication, analysis, applications and comparison with MOS transistors

01 p0052 A70-11329

Electrical conductivity of GaSe thin films developed in vacuum by electron bombardment as function of temperature

03 p0540 A70-13686

Ge films crystallinity deposited on Ge substrates in vacuum as function of deposition rate, substrate tem-

perature and thermal treatment and background O pressure

03 p0543 A70-14204

Vacuum deposited thin cadmium sulfide films semiconducting properties, discussing captured free carriers effects on temperature dependence of dark and photo current

05 p0893 A70-16543

Thin n-type Ge film electrical conductivity effect on ferromagnetic barium titanate single crystals as function of magnitude and sign of polarizing field

11 p2097 A70-25383

Nucleation and heteroepitaxial GaAs film growth on sapphire using electrical measurements, reflection diffraction and electron microscopy

11 p2098 A70-26393

Semiconductor diamond films electrical conductivity obtained by injecting various ions during isochronal stepwise annealing, studying activation energy values

12 p2286 A70-27479

Hall constant and carrier mobility in semiconductor diamond films doped by boron ion injection, observing temperature dependence of mobility

12 p2287 A70-27480

Piezoelectric field effect strain gage with semiconducting film for extremely small strains in electrically noisy background

[SESA PAPER 1676]

15 p2739 A70-32317

Thin film solar cells photosensitivity improvement by semiconductors with graded energy gap, describing construction techniques and electrical properties

15 p2678 A70-32420

Amorphous boron arsenide films deposited on Si substrates, measuring current voltage characteristics

15 p2785 A70-32584

Solar cells based on homogeneous diffusion p-n junctions in epitaxial GaAs films grown on Ge single crystal substrate

16 p2843 A70-33202

Surface growth morphology and crystallographic orientation of beta-SiC films formed by chemical conversion and heating

17 p3142 A70-34678

Adsorption influence on electrical and photoelectrical properties of CdSse thin films

17 p3143 A70-35674

Electrical properties of n-type GaAs epitaxial films grown by gas transport method

17 p3144 A70-35706

Electrical conductivity of thin semiconductor films for FETs, investigating excessive conductivity scattering

19 p3389 A70-38067

Thin films for semiconductor integrated circuits and solid state devices

19 p3389 A70-38195

Deformation effects on metallic and semiconductor thin films conductivity

19 p3488 A70-38199

Cadmium sulfide photocell development, noting plastic support base, film deposition and interconnection

19 p3358 A70-38480

Sensing elements piezoresistive Si and indium antimonide film sensing elements for high sensitivity pressure transducers and accelerometers, discussing airborne telemetry applications

19 p3431 A70-38538

Impurity distribution in diffused p-n junction in thin epitaxial film, calculating space charge region width and junction capacitance

20 p3685 A70-38967

NT TRANSISTOR AMPLIFIERS

NT TRANSISTORS

NT VARACTOR DIODES

Scanned laser microscope producing shadowgraph displays of IR transmittance variations attributed to defects in polished Si and GaAs semiconductor wafers

01 p0105 A70-10025

Output voltage stabilizers for thermal compensation in semiconductor power generating circuits, using stabilitor reference source

01 p0049 A70-10139

Planar Gunn effect devices using various surface electrode configurations, discussing limitations by breakdown on Ga arsenide exposed surface

01 p0049 A70-10287

Soviet papers on semiconductor solar energy converters covering design and tests for thermoelectric, thermionic and photoelectric units, properties, materials, etc

01 p0008 A70-10750

Hot junctions nonuniform heating influence on thermoelectric generator efficiency, taking into account temperature dependence of thermoelement materials properties

01 p0009 A70-10753

Light emission by solids, discussing injection lasers, luminescence semiconductor diodes, group 2 and 6 compounds, etc

01 p0160 A70-11288

Microwave generation and amplification using Gunn effect semiconductor devices

01 p0160 A70-11289

Book on GaAs components technology covering properties, fabrication and applications of GaAs semiconductor elements in electronics

02 p0350 A70-11734

Phase detector with two value output and pulsed input for measurement and control circuits, noting construction with semiconductor elements

02 p0266 A70-11900

Time sharing computer systems for data reduction from semiconductor strain gauges applied to FORTRAN IV programs

03 p0453 A70-12969

Generation-recombination noise theory extension to nonlinear devices applied to double injection diode in various operation modes

03 p0458 A70-14028

Semiconductors and devices for sensor applications, development history, materials requirements and future prospects

03 p0542 A70-14189

Photocell uses in semiconductor integrated circuit, discussing scanned arrays applications and economics

03 p0459 A70-14265

Four layer semiconductor device triggering by X or gamma radiation calculated by transport equations for electron and hole distribution motion and electric field distribution

04 p0657 A70-14731

Mathematical model based on equivalent electrical circuit for transient radiation analysis by computer /TRAC/ family of circuit analysis programs, simulating semiconductor devices

04 p0657 A70-14737

Semiconductor electronic devices applications in microelectronics, optical/dielectric electronics and photography and electron-acoustical phenomena and negative differential conductivity

05 p0822 A70-16863

Subminiature sensor element integrated with silicon semiconductor strain gages for simultaneous three dimensional measurement of acceleration components

06 p1069 A70-18434

Silicon semiconductor irradiated strain gages for precision measurement of low level strain

06 p1069 A70-18441

Electron irradiation for reducing thermal coefficient of resistance of Si strain gages, noting crystal orientation dependence of gage factor

06 p1070 A70-18442

Instability of semiconductor circuit with nonlinear current-voltage characteristics, showing potential negative differential conductivity effect

07 p1240 A70-19274

Plastic semiconductor devices encapsulation materials and fabrication techniques, considering device performance in various environments and military applications

08 p1468 A70-20626

Spatially inhomogeneous semiconductor structures dynamic characteristics, obtaining equations

08 p1474 A70-21207

Negative differential conductivity effects in Gunn domain GaAs semiconductors, discussing physical properties and microwave applications

08 p1556 A70-21303

Semiconducting components reliability test involving electrical parameters measurement following thermomechanical stresses

09 p1689 A70-22002

French microwave semiconductor technology in terms of basic research, technology studies, reliability and integrated circuits

09 p1739 A70-22602

Low power semiconductor diode rectifying test apparatus for analysis of fusing and shaping effects on dynamic current-volt and frequency characteristics

09 p1649 A70-23355

Broad band power amplification with Gunn effect diodes, describing frequency response and saturation characteristics and FM/AM noise spectrum measurements for reflection amplifier in X band

10 p1847 A70-23886

Silicon window with double carrier injection to achieve high power broadband microwave switching, obtaining power increase over p-i-n diodes

10 p1847 A70-23892

Spectrometer design for Helios solar probe using semiconductor detectors to identify particles separated by magnetic field

10 p1888 A70-24487

Electronic switching effects in amorphous semiconductors emphasizing mass memory for computers based on thin films of chalcogenides

11 p2017 A70-25524

Semiconductor strain gages/tensometers/ materials, fabrication and properties

11 p2054 A70-26429

Tensodiode effect in long plate-shaped semiconductors, noting bend direction effects on I-V characteristics

12 p2195 A70-27312

Semiconductor power controllers for switching aircraft electrical power supplies [SAE PAPER 700308]

12 p2195 A70-27451

HF quenched-domain mode (Q mode) Gunn effect oscillator in single frequency operation using signal analysis, obtaining instantaneous I-V transfer characteristics

12 p2202 A70-28162

Water contaminating effects on thin thermal oxide passivated silicon planar devices

13 p2361 A70-28930

Automatic dynamic response system for testing logic and semiconductor devices

13 p2379 A70-29693

Nd laser drilling and welding tool for microminiature electronic device fabrication

14 p2594 A70-30639

Scintillation and semiconductor counters - IEEE Conference, Washington, D.C., March 1970

14 p2586 A70-31001

GaAs Gunn devices oscillatory modes under various operating conditions

14 p2557 A70-31158

Regenerative semiconductor parametric amplifier saturation in forward current mode, assuming harmonic voltages /signal, pumping and difference frequencies/ action at p-n junction

15 p2708 A70-31522

GaAs slices efficiency as transferred electron devices, correlating impurity profiles with microwave performance

15 p2708 A70-31957

Thermal loads on semiconductors in solid state converters during short circuit and overload

15 p2709 A70-32205

Reliability physics role in kinetic studies of physical and chemical degradation and failure mechanisms in semiconductor devices

15 p2713 A70-32661

Semiconductor image detectors in photodiode and photoconductor forms, describing construction and operation modes

15 p2714 A70-32673

Ion implantation doping for MOS devices, discussing improved HF performance, integrated circuitry and threshold voltage selection

16 p2872 A70-33054

Mercury cadmium telluride photodetectors, analyzing gain, signal current and radiation limits

16 p2905 A70-33153

High sawtooth voltage generator with semiconductor triodes, giving circuit parameters and diagrams

16 p2873 A70-33212

Ultraminiature piezoelectric semiconductor pressure transducers for wind tunnel models

17 p3093 A70-35491

Microwave oscillator performance of InP three level transferred electron devices

17 p3048 A70-35874

Holographic projection to print etching patterns on semiconductor wafers, discussing development, basic principles and uses

18 p3233 A70-36773

B and P ions bombardment techniques for Si doping of multilayered transistor structures

19 p3385 A70-37268

Soviet papers on physics of semiconductors and semiconductor devices covering kinetic equation, electrical conductivity anisotropy, thermal emf, current carrier recombination, radiation flaws, etc

19 p3482 A70-37292

Four-terminal p-n-p-n small signal semiconductor tetrode amplifier operation principle and linear circuit applications

19 p3390 A70-38305

Miniature pressure transducers using piezoelectric or semiconductor elements

20 p3628 A70-39226

Semiconductor diodes, discussing characteristics and applications of Schottky barrier, varactor, tunnel, Gunn and field effect diodes, etc

20 p3600 A70-40500

Unmodulated microwave oscillations power stabilizer with semiconductor attenuator

21 p3796 A70-40635

Subminiature three directional cantilever beam accelerometer using semiconductor strain gages

21 p3824 A70-40861

Computer storage technology, discussing magnetic films, semiconductor cells, content addressable and read-only memories, etc

21 p3795 A70-41693

Double tunneling electrothermal initiation of threshold electronic switching in semiconducting glasses, discussing temperature profile and current density saturation effects

21 p3864 A70-42019

Iteration method for calculating self consistent fields in semiconductor surface inversion layers

22 p4085 A70-42745

Reprogrammable read-mostly memory (RMM)/ using integrated circuit array of amorphous and crystalline semiconductor devices, discussing design and applications

22 p3996 A70-42772

Semiconductor storage unit with decoding circuit, memory matrix and read-out amplifiers

22 p3996 A70-42847

Radiation-produced defects in silicon semiconductor devices, annealing gamma ray, electron and fast neutron damages

22 p4087 A70-43328

Semiconductor thermometer for skin temperature differences using resistance bridge, transistor amplifier and thermistors

23 p4150 A70-44317

Wideband wattmeter for measurement and analysis of power dissipation in semiconductor switching devices, considering occurrence of peaks, frequency dependency of average dissipation, etc

23 p4174 A70-44597

Electrical and electronic semiconductor device failures from metallurgical viewpoint

23 p4175 A70-44746

Current oscillations in external circuits of semiconductor with low surface recombination in parallel electromagnetic field

23 p4231 A70-45062

Soviet book on modulation-type frequency converters based on electromagnetic and semiconductor elements covering modulators static and dynamic characteristics, optimal operating conditions, etc

24 p4319 A70-45626

Si crystal microdefects influence on semiconductor device performance and reliability

24 p4391 A70-46015

IC metallization systems in semiconductor devices fabrication and packaging, assessing metals alternate to Al for electromigration difficulties avoidance

24 p4319 A70-46075

Semiconductor solar energy converter, deriving conditions for occurrence of photoconductivity quenching

24 p4391 A70-46325

Two-cascade amplifying circuits with current and voltage feedback for semiconductor precision devices

24 p4321 A70-46394

SEMICONDUCTOR JUNCTIONS

NT JOSEPHSON JUNCTIONS

NT N-N JUNCTIONS

NT N-P-N JUNCTIONS

NT P-I-N JUNCTIONS

NT P-N JUNCTIONS

NT P-N-P JUNCTIONS

NT P-N-P-N JUNCTIONS

NT SILICON JUNCTIONS

Current dependence of integral brightness and electroluminescence spectrum of ZnS-GaAs heterojunctions obtained by I vapor reaction in H flow

01 p0155 A70-10142

Electric characteristics and impurity distribution in GaAs-Ge heterojunctions obtained by deposition on p-type Ge

01 p0155 A70-10143

Semiconductor solar thermoelectric generator allowing thermoelement replacement during service including construction, bridging methods and characteristics

01 p0009 A70-10751

Current-voltage characteristics of cascaded solar thermoelectric generator, determining optimum hot junction temperature as function of radiation concentration

01 p0000 A70-10752

Current-voltage and current-temperature characteristics of alloyed p Ge-n Si heterojunctions, discussing current flow process complexity

02 p0350 A70-11667

Coordinate-sensitive photocells with heterojunctions between wideband semiconductors, noting increased longitudinal photovoltage

03 p0541 A70-13722

Low threshold injection lasers in IR and visible spectrum at room temperature employing AlAs-GaAs heterojunctions, noting use for CW mode

03 p0501 A70-13723

Piezojunction effect and applications in transducers, showing needle and mesa configurations as most promising methods

03 p0496 A70-14193

Center frequency shift prediction model for non-linear collector junction capacitance in transistor Class C amplifiers

04 p0660 A70-15343

Fabrication and electrical properties of p-ZnTe/n-InAs heterojunctions obtained by interface alloying, suggesting p-i-n structure from characteristics and capacitance behavior

06 p1125 A70-17123

Free current carriers activity in indirect magnetooptical junctions in quantized magnetic field

06 p1126 A70-17817

UHF and VHF stacked ferrite loaded junction circulators construction, improving cost to power performance

08 p1476 A70-21292

Electron tunneling into amorphous Ge films using Al-aluminum sesquioxide-germanium tunnel junctions, observing conductance dependence on bias voltage

09 p1739 A70-22918

Volt-ampere characteristics of metal-semiconductor contacts for Schottky barrier diodes, investigating suppression of minority carriers and frequency response

09 p1741 A70-23352

Semiconductor laser junction construction for increased gain making possible laser voice communication, optical intrusion alarms, laser pumping lamps and portable range finders

10 p1900 A70-24529

Germanium, silicon and gallium arsenide point contact and Schottky barrier diodes as submillimetric wavelength detectors and mixers

11 p2017 A70-25736

Epitaxial surface morphology layer electrical properties and autodoping at GaAs-Ge heterojunctions as function of substrate temperature, orientation and HCl concentration

11 p2098 A70-26392

Current flow across metal-semiconductor contacts via electron tunneling

12 p2285 A70-27254

Electroluminescence recombination emission spectra during avalanche breakdown in AlGaAs n-p and p-n heterojunctions

12 p2286 A70-27367

Minority carrier diffusion lengths on sides of copper sulfide-cadmium sulfide heterojunctions measured by light microprobes

13 p2471 A70-29709

Junction and contact regions in electronic devices using X ray microanalysis and electron probe

14 p2590 A70-30355

Metal-Ge n-type semiconductor tunnel junctions, discussing Sb and As doped units and conductance and barrier heights air cleavage effects

14 p2626 A70-30482

CW GaAs junction lasers bistable operation above delay transition temperature based on double acceptor trap theory

18 p3268 A70-36729

GaAs lasers with light propagation along curved junctions, discussing threshold current density variation with radius of curvature

18 p3269 A70-36738

Four-terminal p-n-p-n small signal semiconductor tetrode amplifier operation principle and linear circuit applications

19 p3390 A70-38305

Collection efficiency and spectral response calculations for semiconductor heterojunction solar cells

21 p3861 A70-40623

Heat treatment and photovoltaic properties of copper disulfide-cadmium sulfide heterojunctions, measuring I-V characteristics, capacitance and spectral response

21 p3862 A70-41911

Temperature and bias voltage dependence of zero bias tunneling structure in p-type GaAs-Au Schottky junctions

21 p3863 A70-41917

Semiconductor junction diode spontaneous emission sources, considering frequency-energy characteristics relationship

22 p4085 A70-42504

Semiconductor junctions passivation by silicon nitride insulation layers, discussing pyrolysis and cathode sputtering fabrication methods

22 p4087 A70-43444

Electron recombination effect on current transmission through insulator-semiconductor junction with large diffusion length of minority carriers

24 p4390 A70-45634

Thin film BiSb-oxide-BiSb tunneling junction I-V characteristics anomalies as function of temperature, magnetic field and bias voltage

24 p4390 A70-45662

SEMICONDUCTOR LASERS

NT GALLIUM ARSENIDE LASERS

Semiconductor laser active element radiation absorbing inhomogeneities effect on I-V characteristics, considering oscillation modes excitation

01 p0106 A70-10095

Semiconductor laser excitation by bremsstrahlung from electrons and gamma radiation from nuclear reactor

01 p0107 A70-10187

Semiconductor laser quantum mechanical rate equations derivation to determine temperature and current dependences of light output properties, indicating numerical calculations for GaAs

02 p0311 A70-11884

Kr, Xe and W-iodine lamps efficiencies for pumping Nd-doped YAG compared for use in high continuous power lasers

02 p0311 A70-11922

Refractive index perturbation from energy absorbed from long pulsed and Q switched Nd doped glass lasers, observing sonic waves generated by Q switched laser

03 p0498 A70-13156

Semiconductor injection laser modes, considering inhomogeneous lasing action levels over p-n junction area

03 p0499 A70-13410

Semiconductor laser-photodiode system used as optical logic elements for electronic circuits describing storage elements, dynamic trigger and multivibrator

03 p0499 A70-13456

Photostability of Nd-activated glass elements as function of dopant concentration and laser mode operation

05 p0858 A70-16266

Emission modulation in multifunctional injection laser-photodiode system used as optical memory, pulse generator, multivibrator and trigger

05 p0859 A70-16268

Semiconductor injection laser with large emitting area, discussing light absorption, waveguide channel formation as factors obstructing laser action

06 p1082 A70-17821

Injection laser theory taking into account radiative emission rates and spectral dependence, using two band semiconductor model

07 p1298 A70-19395

Exciton spectrum in semiconductor laser emission, investigating location in Brillouin zone and temperature dependence

07 p1298 A70-19478

Laser oscillation conditions for CdS crystal pumped by electron beam, using energy loss per unit length for calculations

07 p1298 A70-19681

Kinetic theory of laser emission on direct band-band semiconductor transitions

07 p1299 A70-19853

Doped semiconductor unsteady stimulated emission, solving kinetic reactions in multimodal approximation

07 p1357 A70-19862

Semiconductor laser signals coupling into thin optical platelet waveguides

07 p1301 A70-20019

Neodymium-doped glass bars laser amplification efficiency increased by using conical bar and divergent beam

07 p1302 A70-20096

Neodymium-tytrofluorite crystal laser free and Q switched operating characteristics

08 p1511 A70-20523

Dispersive resonator for near IR frequency control of neodymium-silicate glass laser

08 p1512 A70-20850

Neodymium-glass laser under action of electron beam investigated for population inversion

08 p1512 A70-21204

Unsaturable frequency discriminator influence in semiconductor laser feedback loop on laser emission spectrum

08 p1514 A70-21821

Semiconductor injection laser, analyzing light absorption by free carriers and gain characteristics

09 p1694 A70-22133

Neodymium/YAG laser emission characteristics, studying spectral selection at various excitation energy levels and output-pumping power relationship

10 p1899 A70-24261

Semiconductor laser junction construction for increased gain making possible laser voice communication, optical intrusion alarms, laser pumping lamps and portable range finders

10 p1900 A70-24529

Composite resonator for semiconductor laser to increase single mode power generation, determining optimal length of passive part

12 p2247 A70-27484

Temperature effects on injection semiconductor lasers optical gain and threshold current using energy spectrum model

12 p2247 A70-27485

Fabry-Perot resonator mirrors with local reflecting inhomogeneities within perimeter of single crystal wafer for application in optically coupled semiconductor lasers

13 p2427 A70-28884

Tunable diode laser for high resolution IR spectroscopy of sulfur hexafluoride absorption near carbon dioxide laser lines

13 p2430 A70-29832

Semiconductor laser emission at band-band transitions with free carriers participation under quantizing magnetic field, using kinetic equations

15 p2749 A70-31627

Optically pumped cadmium phosphide laser, obtaining IR coherent oscillation from Q switched Nd doped YAG laser excitation

15 p2751 A70-31985

Semiconductor lasers - IEEE Conference, Mexico City, December 1969

18 p3267 A70-36726

Semiconductor laser frequency modulation by ultrasonic waves, noting pressure variation effect on sideband resolution

18 p3269 A70-36736

InAs p-n junction laser electrical and optical characteristics during spontaneous and stimulated radiative recombination

18 p3269 A70-36739

Optically excited homogeneous bulk semiconductor lasers, examining quantum mechanical rate equations and monochromatic light field pump source

18 p3270 A70-36741

Electron gun for high current density electron bombardment of semiconductor lasers

20 p3641 A70-39482

Gas and semiconductor diode lasers construction and operation principles, discussing terminology, Boltzmann distribution function, excitation methods, population inversion, etc

20 p3643 A70-40535

Semiconductor platelet laser stimulated emission visual observation in unwanted reflected modes

21 p3838 A70-42022

Cadmium sulfide pulsed laser spectrum analysis, discussing laser output stabilization by mode selection and electron beam scanning

22 p4049 A70-42405

Thermoelectrically cooled GaAlAs injection laser illuminator, discussing optical-electronic interface problems and design and performance characteristics

22 p4052 A70-43603

Irradiation influence on emission power of GaAs laser excited by high energy electron beam

23 p4203 A70-45060

Threshold characteristics of injection and electron excitation semiconductor lasers having photoluminescence properties of n-type GaAs single crystals

23 p4203 A70-45065

Spectral and threshold emission from optically pumped semiconductor lasers as function of carrier type and concentration in GaAs single crystals

23 p4203 A70-45069

Internal Q switching deviation in gallium aluminum arsenides-GaAs single heterojunction lasers attributed to loss reduction at current pulse end

24 p4354 A70-45815

Pb-Sn-Te junction diodes prepared by Sb diffusion, investigating spontaneous and laserlike emission

24 p4355 A70-46086

SEMICONDUCTORS [MATERIALS]

NT ACCEPTOR MATERIALS

NT DONOR MATERIALS

NT METAL OXIDE SEMICONDUCTORS

NT MIS (SEMICONDUCTORS)

NT N-TYPE SEMICONDUCTORS

NT ORGANIC SEMICONDUCTORS

NT P-TYPE SEMICONDUCTORS

NT PHOTOCONDUCTORS

Electronic materials nondestructive evaluation techniques, describing analytic tests for chemical, structural, electrical and optical characteristics determination

01 p0085 A70-10023

Hot photoelectrons in semiconductor assuming short lived photoexcited current carriers, deriving expressions for energy distribution function of semiconductor current carriers

01 p0153 A70-10066

Frequency dependence of intraband absorption of electromagnetic waves by free current carriers in doped semiconductors

01 p0153 A70-10067

Hydrogen type exciton model applied to analysis of intermediate exciton state role in two quantum absorption in semiconductors

01 p0153 A70-10068

Glass formation region of chalcogenide semiconductor arsenic triselenide-antimony triselenide system and vitreous-crystalline transformation, investigating electrical and optical properties

01 p0153 A70-10085

Double injection in semiconductors at high current densities, discussing procedure yielding space charge and field distribution and voltage drop

01 p0154 A70-10123

Electrical properties of Si-doped GaAs p-n structures obtained by liquid phase epitaxy, considering charge buildup

01 p0155 A70-10132

SEMICONDUCTORS [MATERIALS]

Complex formation mechanisms and effects on impurity diffusion profiles in semiconductors

01 p0155 A70-10180

Light Raman scattering in semiconductors under constant magnetic field, studying electron-phonon spectrum characteristics

01 p0155 A70-10183

Energy spectrum of electrons and holes in semiconductors under strong electromagnetic wave field, calculating electron-phonon interaction Green function

01 p0155 A70-10184

Electron-hole pair quasi-linear fluctuations at recombination boundary in semiconductor crystal under crossed electric and magnetic fields

01 p0156 A70-10191

Gallium found suitable for doping cadmium/tin arsenide semiconductor, exhibiting hole-type conductivity

01 p0156 A70-10214

Periodic potential and residual Coulomb interaction effect on inelastic light scattering from electronic excitations in semiconductors, using diagrammatic perturbation theory

01 p0156 A70-10280

Space charge barriers AC impedance modification at metal/semiconductor contacts due to trapping

01 p0157 A70-10296

Electron mobility in single component aromatic hydrocarbons, considering crystals structures and electrical properties, energy dissipation and fluctuation, etc

01 p0158 A70-10517

Semiconductors as optical limiters for Q switched lasers, reporting temperature values for nonlinear absorption coefficients of Si, CdSe, CdTe and GaAs

01 p0158 A70-10563

Solution crystallization method to obtain gallium indium phosphide semiconductor alloys, discussing optical absorption thresholds and transitions

01 p0158 A70-10661

PbSe and GeTe cast and pressed samples thermoelectric properties before and after high energy gamma ray irradiation, using scintillation counter with photomultiplier

01 p0159 A70-10756

Bridging joints resistance effect on thermoelement efficiency, describing W and Co coatings deposition on GeTe based thermoelectric alloys

01 p0159 A70-10757

Variational methods for investigation of thermal and electrical properties of semiconducting materials, noting accuracy

01 p0159 A70-10759

Diamond-like glassy semiconductor compound of cadmium germanium arsenide, determining optical lattice vibrations from IR reflection spectra

01 p0160 A70-11599

Electrical domain instability in homogeneous hot electron semiconductors, discussing boundary conditions application to fluctuations

02 p0350 A70-11697

Book on GaAs components technology covering properties, fabrication and applications of GaAs semiconductor elements in electronics

02 p0350 A70-11734

Vacuum cleavage device for producing small area evaporated metal semiconductor contacts free from oxygen or other contamination

02 p0304 A70-12748

Energy distributions of emitted electrons from Si, GaP and ZnS semiconductors, determining relative core levels and Si valence band states optical density

03 p0537 A70-12879

Pinch characteristics of simple band structure semiconductors and nondegenerate electron gas during bimolecular current carrier recombination, determining hole pairs spatial and recombination spectral distribution

03 p0538 A70-13062

Current density and electron concentration fluctuations in semiconductors under electric field, obtaining theory of light scattering at hot electrons

03 p0539 A70-13405

Semiconductors low temperature electron energy losses due to inelastic electron scattering at neutral impurity donors shown to exceed scattering losses at phonons

03 p0539 A70-13423

Voltage-power sensitivity, response time, frequency limit and minimum registered power of hot carrier thermoelectric detectors calculated from characteristic semiconductor parameters

03 p0540 A70-13436

Magnetic field effect on recombination radiation intensity under pinch effect in semiconductor nondegenerate electron hole plasma with recombination time exceeding carrier lifetime

03 p0540 A70-13508

Electromagnetic wave propagation in semiconductors, considering effects of electric field, energy dissipation law and band structure

03 p0540 A70-13719

Onset conditions for galvanothermal current instability of Ge semiconductors as function of electric

field oscillations, carrier concentration and carrier-lattice temperature

03 p0541 A70-13724

Interband transitions and optical absorption edge analysis in indium telluride using dependence on photon energy

03 p0541 A70-13725

Low molecular weight organic semiconductors photoelectron UV emission spectra, studying electron energy distribution and optical ionization, dark bulk conductivity, etc

03 p0541 A70-13728

Semiconductors and devices for sensor applications, development history, materials requirements and future prospects

03 p0542 A70-14189

AsSbSI crystal production technology concerning substitution-type solid solution structure and photoconducting ferroelectric properties

04 p0729 A70-14409

Semiconductors low temperature photoconductivity fluctuations occurrence during energy relaxation probability by optical phonons

04 p0730 A70-14413

Electromagnetic waves amplification in semiconductor plasma with high electron concentration, analyzing equations describing waves drift instability

04 p0731 A70-15216

Memory exchange between pairs of electrodes amorphous semiconductors, discussing switch-on and unlocking

04 p0732 A70-15687

Vapor deposited GaN single crystals tested for electrical and optical properties, determining band gap energy, electron concentration, etc

04 p0732 A70-15688

Phenomenology theory on conduction and switching behavior of amorphous semiconductor diodes

05 p0891 A70-16021

Soviet book on microwave devices employing semiconductor diodes design and synthesis covering electric field effects, optimality criteria, tabular data, etc

06 p1019 A70-17536

Cascade capture of carriers in semiconductors with negatively charged dislocation explained by diffusion-type equation

06 p1126 A70-17818

P-n junction depth in semiconductors, using electron beam of scanning electron microscope

06 p1127 A70-17820

Hall effect measurements in liquid semiconductors and metals

06 p1127 A70-17919

Possible pairing without superconductivity at low carrier concentrations in bulk and thin film superconducting semiconductors

06 p1127 A70-18641

Excess titanium dioxide effect on electric resistance of semiconductive barium titanate ceramics suitable for posistors

07 p1355 A70-18654

Semiconductor compounds application as partial vapor pressure sensors of chemical elements, discussing electrical properties dependence

07 p1356 A70-19554

Probability of three photon band-band excitation of electron in semiconductors using S-matrix formalism, calculating absorption coefficient for two band approximation

07 p1356 A70-19795

Transparent semiconductor crystals breakdown under intense ruby laser radiation, noting threshold power correlation with forbidden region and pulse duration

07 p1357 A70-19856

Phonon spectrum of mixed semiconductor crystals based on AIII-BV and AII-BVI compounds, studying frequency spectrum as function of crystal composition

07 p1300 A70-19867

Hall effect and electric conductivity of cadmium arsenide at high temperatures as function of carrier concentration dependence on temperature and phase transformation

07 p1357 A70-20314

Diffusion coefficient of charged particles in HF stabilization of current-convective instability measured in Ge semiconductor electron hole plasma

07 p1355 A70-20365

Absorption and luminescence in complex molecules and semiconductors, describing particle distribution and Fermi quasi-levels dependence on temperature and excitation intensity

08 p1555 A70-20510

Literature on IV-VI semiconducting Pb compounds PbTe, PbSe, PbS and PbO, discussing PbTe-SnTe and PbSe-SnSe solid solutions

08 p1555 A70-20584

Switching and memory phenomena in semiconducting glasses, thin films and variable threshold metal-oxide-nitride-semiconductor MNOS transistor

08 p1556 A70-21304

Electrical properties of Si-doped GaAs p-n structures obtained by liquid phase epitaxy, considering charge buildup

08 p1556 A70-21408

Threshold switching and thermal filaments in thick specimen of amorphous semiconductors using IR spectrum viewer

08 p1477 A70-21540

Te nuclear magnetic resonance in amorphous semiconducting sample cycled between conducting and nonconducting states

08 p1557 A70-21697

Electron mobility transition in infinite system of random hard core scatterers relation to switching effect in semiconductors

08 p1549 A70-21840

Book on solar cells U.S. patent literature, discussing Si semiconductors, panel fabrication techniques, photoemissive devices, Cd, Ga and organic compounds, etc

09 p1612 A70-22050

Ion accelerator for doping semiconductors, discussing electronic bombardment of low pressure vapors, electrostatic extraction, focusing and mass spectrometer

09 p1649 A70-23325

Light-emitting integrated circuit semiconductor display devices with inherent memory permitting logic and optical output functions performed on surface

10 p1846 A70-23883

Wave amplification in semiconductors relationship to coupling between space charge wave and circuit wave based on coupled-mode theory

10 p1927 A70-24619

Silicon avalanche diodes contingencies effect on material choice

10 p1850 A70-24622

GeTe, SnTe and strontium titanate transition into superconducting state including induced superconductivity

10 p1928 A70-25028

Coulomb interaction during optical transitions between Landau subbands of Ge semiconductor valence and conduction bands in magnetic field, observing diamagnetic excitons

10 p1928 A70-25029

Acoustic wave amplification and generation in piezoelectric semiconductors and semimetals by superionic carrier drift currents

10 p1925 A70-25030

Phase equilibria and maximum melting compositions determinations for compound semiconductors by differential thermal analysis compared with vapor and high pressure techniques

11 p2098 A70-25812

High purity pinhole free films (parylene) applicability as barrier coating to keep semiconductor surface free from moisture, ions and contaminants

11 p2099 A70-26395

Metal-semiconductor transition in magnetite described on band model with electrons breaking symmetry by ordering in self induced Coulomb potential

12 p2283 A70-27239

Intense laser radiation effect on electrons interactions with acoustic and optical phonons and ionized impurities in semiconductors

12 p2246 A70-27360

Impurity centers thermal and autoionization and effective capture cross section dependent on free carrier concentration in GaAs under electric field, allowing for plasma shielding

12 p2285 A70-27361

Free carriers effective mass and relaxation time in semiconductors determined from IR spectra of light reflection

12 p2285 A70-27362

Doped semiconductors electronic state density in forbidden band, assuming fluctuations in impurities in form of homogeneous spheres with varying charges and radii

12 p2286 A70-27363

Light absorption coefficient frequency dependence related to interband transitions in highly doped semiconductors

12 p2287 A70-27487

Low resistance small area contacts on semiconducting metal oxides

12 p2288 A70-28057

Temperature dependence of electrical conductivity and optical properties of strontium titanate semiconductor single crystals doped with Ce and Nb

12 p2288 A70-28328

Finite amplitude stability of plasma column in weakly ionized gases and in semiconductor plasmas in longitudinal magnetic field

13 p2458 A70-28566

Electromagnetic waves propagation in semiconductors, allowing for nonlinear effects from field heating of carriers

13 p2469 A70-28877

Interband Faraday effect in doped semiconductors by quasi-classical approximation

13 p2469 A70-28878

Electromotive force appearance in fissionable material semiconductor during thermal neutrons irradiation

13 p2469 A70-28879

Free carriers mobility and concentration in microwave semiconductors measurable by two mode resonator over temperature ranges and magnetic fluxes

13 p2470 A70-28881

Plastic encapsulated semiconductors reliability test programs with emphasis on accelerated humidity-temperature method

13 p2377 A70-29259

Piezoelectric scattering effects on electron temperature and mobility in IIB-VIA semiconductor compounds with nonparabolic conduction band

13 p2471 A70-29373

Impurities effects on UV absorption in semiconductors, deriving kinetic type equation for two particle Green function

13 p2471 A70-29511

Degenerate pinch in bipolar electron-hole plasma in semiconductors

13 p2472 A70-29760

Landau and Doppler-shifted cyclotron damping effects on helicon-like and plasma excitations of many-valley semiconductors

13 p2472 A70-30016

Ionized impurity scattering in polar semiconductors by strong electric fields, using energy and momentum conservation equations in electron temperature approximation

13 p2472 A70-30017

Switching initiation in Ovonic, discussing temperature profile in semiconducting sandwiches as function of time and thermally forced double tunneling

14 p2626 A70-30333

Raman scattering cross sections in solid state semiconductor plasma in magnetic field from phonon fluctuations

14 p2621 A70-30485

Semiconductors as igniter material for ignitrons, tabulating electrical characteristics

14 p2590 A70-30640

Nickel-doped p- and n-type Ge hot electrons recombination characteristics in strong electric fields, examining electron capture cross section

15 p2782 A70-31628

Artificial B-doped semiconductor diamond crystals resistance temperature dependence, determining conductivity and luminescence spectra

15 p2782 A70-31630

IR photography extension into long wave region of spectrum, discussing contact sensitized and electrically controlled semiconductor photographic systems

15 p2734 A70-31632

Equilibrium and steady state Hall and thermoelectric effects in inhomogeneous semiconductor materials

15 p2783 A70-31760

Plasma reflection edge in thin film InAs semiconductors, calculating refractive index and extinction coefficient from free charge parameters

15 p2783 A70-31966

Third harmonic generation using hot electron nonlinearity characteristics of semiconductors, considering plane-polarized electromagnetic wave nonlinear interaction with sample

15 p2783 A70-31970

Semiconducting gallium arsenide LF oscillations, considering domain behavior and illumination effects

15 p2783 A70-31972

Energy bands shape effect on fluctuations in nonequilibrium low resistance semiconductor plasma

15 p2784 A70-32192

Electric conductivity, thermal emf and EPR spectra of oxide semiconductor glasses based on vanadium and phosphorus oxides, correlating unpaired electron and charge carrier concentrations

15 p2784 A70-32201

Semiconductors surface energy levels based on conductivity, metal-dielectric-semiconductor capacity and optics

15 p2785 A70-32765

Semiconductor surfaces electrical equilibrium, considering statistical occupation of surface energy and Fermi levels for given doping of bulk material

15 p2786 A70-32766

Fermi level for crystal with slowly changing impurity determinable by solving Poisson equation and by condition of electroneutrality

15 p2786 A70-32899

Nonisothermal measurement in semiconductors in presence of thermoelectric, thermomagnetic and galvanomagnetic effects

16 p2960 A70-32920

High voltage photoelectric generator containing semiconductor plates with series- and parallel-connected p-n junctions forming solid circuit for super-high light flux concentrations

16 p2843 A70-33201

Impurities solubility in semiconducting indium telluride with stoichiometric vacancies, verifying thermodynamic model by phase diagrams

16 p2960 A70-33224

Magneto-optics of semiconductors, taking into account intraband and interband effects with Faraday and Voigt field configurations

18 p3297 A70-35951

Band model of switching effects between conducting and high resistance states of amorphous semiconductors

18 p3297 A70-35952

Homogeneity criteria for semiconductor materials, considering variation coefficient, goodness factor and overshot density

18 p3298 A70-36468

Maxwell-Wagner migrational polarization resulting from free ions or electrons drift in dielectrics and semiconductors, considering relaxation time

18 p3298 A70-36595

Pinch effect in degenerate and nondegenerate electron hole plasma in semiconductors during bimolecular bulk recombination

18 p3298 A70-36620

Soviet papers on physics of semiconductors and semiconductor devices covering kinetic equation, electrical conductivity anisotropy, thermal emf, current carrier recombination, radiation flaws, etc

19 p3482 A70-37292

Kinetic equation in strong electric fields, describing current carrier behavior in semiconductors

19 p3483 A70-37293

Multivalley semiconductors electrical conductivity anisotropy, discussing redistribution and electron transfer under strong electric field

19 p3483 A70-37294

Radiation flaws in semiconductors, examining effects of gamma quanta, fast electrons and neutrons and heavy charged particles

19 p3483 A70-37295

Semiconductor capture level parameter determination, using thermostimulated conductivity

19 p3483 A70-37296

Ge and Si surface electrical properties, discussing conductivity, field effect, work function, current carriers, photoconductivity, photocurrent carrier capture, etc

19 p3483 A70-37297

Surface atom bonding configuration energy in two-center theory of large surface unit cells on semiconductors

19 p3483 A70-37544

High efficiency semitransparent III-V semiconductor photocathodes fabrication and operation

19 p3486 A70-37756

Carrier diffusion effect in large signal analysis of semiconductor avalanches in quasi-static approximation

19 p3387 A70-37768

Iron phosphate semiconducting glasses, determining electrical and magnetic properties dependence on thermal treatment

19 p3487 A70-37861

Solid state plasmas waves and oscillations in metals, semimetals and semiconductors, noting applications for microwave devices

19 p3479 A70-37944

Frequency dependent reversible switching characteristics of glass semiconductors, assuming current control

19 p3389 A70-38070

Photovoltaic effects in p-n junction semiconductors, discussing conduction and electro-optical mechanism in thermal equilibrium

19 p3488 A70-38476

Photovoltaic effects in semiconductors, considering excess load carrier transport and I-V characteristics

19 p3488 A70-38477

Ultrasonic surface waves amplification in piezoelectric crystal-Si semiconductor system, observing dependence on permittivity

19 p3488 A70-38675

Electrical conductivity of semiconductor diamonds made by alloying with Al under high pressure and temperature

19 p3488 A70-38728

InSb semiconductor, measuring small signal microwave conductivity for hot electron region at 9.4 GHz in high electric DC fields

19 p3488 A70-38747

Gunn effect in two-valley semiconductors with traps explained by model, assuming field-dependent trapping times and field-independent carrier generation rates

20 p3686 A70-39116

Semiconductors, ferrites and segnetoelectrics automatic temperature stabilization problem based on heat source energy conversion

20 p3597 A70-39255

Current fluctuations in polar semiconductors in strong electric field, taking into account semiconductor band structure

20 p3686 A70-39589

Current distribution and interband recombination emission in bipolar semiconductor crystal under pinch effect produced by external magnetic field

20 p3677 A70-39590

Transverse impedance in semiconductor surface layer, taking into account charge in diffusion region

20 p3686 A70-39594

Temperature dependence of titanium-zirconium oxide semiconductor compounds growth, using samples arc melted in purified He

20 p3687 A70-39631

Multiphoton absorption coefficient for semiconductors, using interband absorption method

20 p3687 A70-40020

Liquid and solid semiconductors thermal emf and electrical and heat conductivities measurement over wide temperature range

20 p3634 A70-40300

Wave instabilities in avalanche diode bulk semiconductors with negative field dependent drift velocity and carrier temperature, noting validity for gas plasma

21 p3863 A70-41915

Antiferro-, ferri- and ferromagnetic semiconductors properties, discussing narrow band electron correlation, electrostatic and magnetic polarons formation, etc

21 p3864 A70-42254

Current-controlled negative resistance and conductive memory state in Si-doped single crystal YIG wafers

22 p4085 A70-42331

Amorphous semiconductors optical absorption, thermoelectric effects and switching mechanisms characterized by energy band structure model

22 p4086 A70-42773

Current oscillations produced in finite-length electron hole semiconductors by strong electric and magnetic fields, discussing HF stabilization

22 p4084 A70-43469

Gunn oscillation stabilization in layered semiconductors based on space charge growth reduction via two-stream interaction between GaAs diode and passive bias semiconductor

23 p4230 A70-44196

Cubic monocrystalline semiconductor upper critical magnetic field, using correlation function method

23 p4231 A70-44926

Terminal compensation influence on radiative recombination in n- and p-type GaAs, observing emission band in photoluminescence and electroluminescence spectra

23 p4231 A70-45063

Ultrasonic absorption in SbSI segnetoelectric semiconductor as function of temperature, illumination and constant electric field strength, noting absorption coefficient rise near Curie point

24 p4389 A70-45207

SbSI semiconductor single crystal repolarization parameters temperature dependence, noting anomalies in permittivity, spontaneous polarization and dielectric loss tangent

24 p4389 A70-45208

Helicons and transverse optical phonons coupling in degenerate polar semiconductors investigated from electromagnetic linear response theory and field method

24 p4390 A70-45603

Amorphous semiconductor alloys in As-Se system, measuring DC and AC electrical conductivity dependence on temperature

24 p4390 A70-45657

Semiconductors with bipolar conductivity under electron-hole scattering, calculating plasma pinch effect on I-V characteristics

24 p4390 A70-45659

Light reflectance from optically inhomogeneous medium due to space charge near semiconductor surface

24 p4390 A70-45661

Solubility isotherms of alloying elements in Ge-Al-P semiconductor-acceptor-donor system at high temperatures

24 p4391 A70-46143

Hot electrons Faraday effect in many-valley semiconductors, considering constant energy surface ellipsoidal form

24 p4392 A70-46360

Franz-Keldysh and hot electron effects in interband absorption of semiconductors in external electric field

24 p4392 A70-46361

SEMIEMPIRICAL EQUATIONS

Mean stress effect on low cycle fatigue strength, deriving expression for completely reversed stress cycling

10 p1964 A70-25091

Viscous transonic flow past cascades by semiempirical approach, discussing pressure distribution, boundary layer parameters and compression shock

22 p4088 A70-42343

Sensitivity analysis of discrete filtering and smoothing algorithms, noting in-track motion of circular orbit satellite and marine inertial navigation

[AIAA PAPER 68-824] 03 p0459 A70-12913

Dominant and small parameters determination through sensitivity coefficients in heat transfer problem

[ASME PAPER 69-WA/AUT-4] 04 p0713 A70-14829

Two degree of freedom gyroscope sensitivity threshold during gimbal vibration with respect to casing

04 p0692 A70-15279

Sensitivity functions of nonlinear circuits obtained by calculation of dependent linear model responses, topologically equivalent to original circuit

05 p0824 A70-16125

Subjects sensitivity to differences in statistical distributions of locally defined element density and shape, using stochastically textured visual patterns

06 p0998 A70-17223

Open and closed loop time optimal systems compared with respect to sensitivity measure represented by terminal error norm

06 p1026 A70-17969

Haematocrit variations effect on electromagnetic blood flowmeter sensitivity, discussing blood specific impedance changes

07 p1217 A70-18951

Volt-watt sensitivity of dilatocapacitor types of thermal radiation receivers, noting low natural noise levels

07 p1284 A70-19815

Increasing sensitivity of tuning fork gyroscope by parametric signal amplification

07 p1289 A70-20297

Multibeam interferometer sensitivity restrictions due to diffraction effects on interference patterns near transparent inhomogeneities

08 p1493 A70-20540

Radiometers sensitivity increaseable by combining quasi-zero method with compensation circuits

08 p1495 A70-21053

Equivalent transformations method for minimizing electronic equipment sensitivity to circuit components value variations during operation

08 p1474 A70-21221

Monopole mass spectrometer mass range extension by voltage method, discussing sensitivity and mass scan time

08 p1497 A70-21537

Algorithm for evaluating nth order partial derivatives of network functions and corresponding sensitivity functions

08 p1467 A70-21643

Algorithm for controlled plant parameters determination based on sensitivity function calculation

09 p1653 A70-22145

Fatigue life cyclic sensitivity threshold with random nature statistically estimated on basis of maximum likelihood principle

09 p1776 A70-22618

Sensitivity of nondiffuse double exposure holographic interferometry with transparent medium increased via multiple beam passage through medium placed in optical cavity

09 p1682 A70-23360

Human operator transinformation sensitivity to display gain and forcing function bandwidth in rate control tracking task

10 p1823 A70-23896

Scalar measure of system sensitivity to plant parameter variations applied to design of linear lumped stationary multivariable feedback control systems

10 p1856 A70-25233

Linear systems optimal control problems with sensitivity considerations for restriction to linear feedback of output variables

11 p2026 A70-26235

Vector-matrix differential equation for second order sensitivity coefficients applied to trajectory optimization, modeling and compensation and guidance and control

11 p2029 A70-26324

Connecting wires length effect on sensitivity and current-voltage characteristics of sensors for dynamic values measurement, deriving integral electrical parameters

11 p2055 A70-26445

Cross sensitivity errors effect on stress determination by free-filament wire strain gages used at high temperature

11 p2058 A70-26838

Cryogenic Ge bolometers sensitivity variation and noise, noting radiation absorption by sensor and by coating

12 p2237 A70-28151

Rocket-borne flight testing of sensitive accelerometer developed to measure small forces applied to satellite or space probe surface

13 p2403 A70-28433

Magnetic induction sensors sensitivity for magnetotelluric surveying in geophysics

13 p2415 A70-30048

Savart interferometer for high sensitivity measurements of refractive index gradients using double exposure technique

14 p2583 A70-30400

Multivariable feedback control system, minimizing mean squared error and error sensitivity to random perturbations

14 p2560 A70-30622

SCAMP 2 program for statistical analysis of electronic circuit sensitivity to variations in parameters and DC input values

14 p2560 A70-30665

Output feedback control systems design, considering closed loop system sensitivity to plant parameters based on linear optimal control problem

16 p2885 A70-33324

Initial condition sensitivity functions in bang-bang and optimal control, considering discontinuous functions, perturbation equations, iteration algorithms terminal states, cost functions, etc

16 p2885 A70-33325

Relative sensitivities of polyethylene shielded net radiometers, noting role of reflective white paint partial covering

18 p3261 A70-37087

Grille spectrometer design, fabrication and adjustments, noting increased IR sensitivity over slit devices

19 p3421 A70-37358

Simultaneous generation of sensitivity functions for linear automatic control system with known characteristic differential equation

19 p3394 A70-37867

Low level time truncated signals measurement by narrow bandwidth synchronous time notch filters, discussing sensitivity

19 p3380 A70-38177

IMPATT diode microwave oscillator with modulated bias current, discussing amplitude and frequency modulation sensitivity, thermal effects and load parameters

19 p3390 A70-38363

Optimal control systems sensitivity analysis, discussing trajectory tracking

19 p3394 A70-38716

Automatic control system stability error analysis, discussing sensitivity and statistical dispersion analysis

[AIAA PAPER 70-985]

20 p3668 A70-39544

Sensitivity optimization for linear optimal control systems design, describing aircraft lateral-directional control case study

[AIAA PAPER 70-962]

20 p3600 A70-39567

Kalman filter sizing for air-launched tactical missile via covariance sensitivity matrix

[AIAA PAPER 70-954]

20 p3601 A70-39574

Small angle of rotation measurement of coherent radiation polarization plane, discussing technique for increasing sensitivity and accuracy

20 p3643 A70-39759

Sensitivity functions use in parametrically invariant self adjusting control systems

20 p3602 A70-39828

X ray astronomy proportional counters sensitivity, reducing higher energy radiation background contribution

21 p3821 A70-40653

Vibrating ribbon pressure gage sensitivity, discussing advantages

22 p4029 A70-42624

Holographic interferometry sensitivity augmentation by use of nonlinear properties of photoemulsion

22 p4038 A70-43140

Spectral sensitivity of freely moving human eye by determining threshold energy for correct choice between two monochromatically illuminated stimulus patches

22 p3972 A70-43412

Cactus high sensitivity accelerometer flight tests, discussing operation and experimental conditions

[ONERA-TP-875]

23 p4198 A70-44660

Closed loop synthesis algorithm and comparison to sensitivity of open loop system, noting applicability to optimal control

24 p4322 A70-46013

SENSITIZING

Photodecomposition of 1,4-dichlorobutane sensitized by n, pi singlet state of acetone as chemical process

NT PSYCHOSOMATICS

Male rats locomotor activity responses to altered photoperiods during exposure to varied-light artificial days

01 p0015 A70-10367

Mathematical models for perception and skilled action in man or machine, noting sensorimotor theory

01 p0034 A70-10498

Soviet book on higher cortical functions of man and disorders due to local brain injuries, describing methods for neuropsychological studies of motor functions

01 p0017 A70-10503

Neuron activity in somatosensory cortex region of guinea pigs and rats with intracortical connections severed by circular incision

01 p0030 A70-11470

Event probability and cost effects on performance in continuous motor task

03 p0436 A70-13771

Work and exercise conditions effect in early training stages of learning sensorimotor skill, considering different body positions

03 p0432 A70-14295

Mathematical model building for temporal human motor responses (reaction, movement, manipulation/ by response surface technology and statistical experimental design

[ASME PAPER 69-WA/BHF-5]

04 p0642 A70-14851

Biological model describing spacecraft operator sensorimotor activity in response to various spacecraft control stimuli, outlining computer algorithm

05 p0810 A70-17118

Rabbits sensorimotor and visual cortical responses during defensive conditioning to rhythmic light

07 p1197 A70-18695

Human motor reactions rhythmic system, relating reaction-skin-galvanic reflex to formation of successive conditioned connections

07 p1197 A70-18697

Symmetrical motor centers inequality significance in humans during interaction under conditions of successive innervations during exercise

07 p1213 A70-19790

Dogs spinal cord bioelectric activity monitoring by implanted electrodes, noting interelectrode resistances after prolonged operation

09 p1615 A70-22091

Monograph on systematically disturbed sensorimotor coordination, studying various parameters effects on eye-hand system recorelation

09 p1618 A70-22529

Air traffic vibration effects on human organs and sensations, considering blood circulation, lungs, eyes and muscles

09 p1625 A70-23007

Illusory visual signals experienced by pilots ascribed to aerodynamic forces interference with normal functional relationships between sensory systems

09 p1627 A70-23131

Human sensory-motor adaptation and aftereffects of exposure to accelerative forces using hand-eye coordination measurements

09 p1628 A70-23466

Startle auditory stimuli effects on motor performance and recovery characteristics from heart rate and skin conductance recordings

09 p1628 A70-23577

Motor performance effects on averaged sensory-evoked potentials in reaction time tasks

10 p1811 A70-24226

Transverse g-force tolerance and stability after prolonged hypodynamia in bed rest, noting effects of pharmaceuticals, physical exercise and prophylactic measures

10 p1817 A70-24695

Human movement speed and accuracy as function of age in pencil tapping between paper-drawn targets

10 p1817 A70-24711

Neurophysiological mechanism of motor activity during simple reaction time situation performance

10 p1818 A70-24724

Choice reaction time task involving right or left hand button pressing in monocular and binocular visual response to directional commands by colored lights

11 p1990 A70-25830

Aircraft pilot candidates reactions under simulated flight conditions tested using precision coordination

analyzer /PCA II/ and instrument coordination analyzer /ICA/

12 p2176 A70-27034

Continuous active work effects on human sensorimotor performance, comparing latency distributions in mass and spaced practice groups

12 p2178 A70-27046

Human temporal motor response models relating reaction, movement and manipulation time to stimulus, movement and manipulation information

14 p2540 A70-30248

Dogs spinal cord bioelectric activity monitoring by implanted electrodes, noting interelectrode resistances after prolonged operation

15 p2685 A70-32687

Physiological tests of sampled data hypothesis in human motor control system

16 p2851 A70-33323

Psychophysiological tests involving programmed memory device evaluating human memorization process and sensorimotor reactions to light signals

17 p3040 A70-35676

Evoked potentials in dogs sensorimotor cortex during defensive instrumental conditioning

18 p3221 A70-37213

Cerebrum electrical activity and myogenic tonus relation in subjects performing tasks in response to visual and acoustic stimuli

18 p3221 A70-37216

Electrophysiological characteristics of man during disorders in rhythmic system of conditioned motor reactions

18 p3221 A70-37217

Latent period of human motor reflex in telegraph key press testing in response to oral command

18 p3222 A70-37218

Heat stress effects on serial reaction time in subjects performing visual tasks

19 p3361 A70-38053

Reaction time intersensory facilitation relationship to single channel theories of attention and human performance

19 p3362 A70-38312

Longitudinal vibration effects on human reaction time and motor performance involving toggle switch and manual knob control in different working positions

22 p3977 A70-42871

Labyrinthine and sensory information role in driving, discussing car simulator, driver tests with impaired inputs, age factors, etc

22 p3976 A70-43708

Forebrain participation in motor response suppression reaction during stimulation of caudate nucleus in rats and cats, noting brain damage effects

24 p4299 A70-45836

SENSORS

Airborne sensor simulator using recorded imagery for target detection and recognition problems, discussing closed circuit TV

01 p0088 A70-10810

Terrain imaging radar applied to sensing earth resources

02 p0298 A70-12181

Meteorological satellite TV cameras development, discussing image sensors and tabulating characteristics

03 p0491 A70-13665

Semiconductors and devices for sensor applications, development history, materials requirements and future prospects

03 p0542 A70-14189

Meteor particles spatial density and energy characteristics on space vehicles, using luminescent sensors coupled with photomultiplier

04 p0744 A70-14445

Fluid oscillators for sensing and missile control, discussing performance, design, frequency variation and applications

[ASME PAPER 69-WA/FLCS-8]

04 p0626 A70-14845

Blood flow sensors based on electrical conductivity dependence on flow rate, discussing system instrumentation and experimental results

04 p0644 A70-15295

Laser alignment sensors for measurement and control of five degrees of freedom with increased sensitivity, faster recording and remote meter readout

06 p1083 A70-18591

Rectilinear oblique harmonic vibration effect on gyrocompass with torsional suspension

07 p1278 A70-18737

Temperature, pressure and flow direction probe in rotating fluid machines analysis

07 p1283 A70-19732

Sensors design for studying temperature fields and stressed state of structures

09 p1680 A70-23106

Systems engineering study of sensors in fighter aircraft avionics

11 p2081 A70-26501

Fluid sphere gyro satellite nutation sensor

11 p2057 A70-26504

Automated Weather Network and Environmental Survey Satellite /ESSA 9/ global weather sensing systems 11 p2033 A70-26505

Differential equations of motion of manometers in log instrument systems with allowance for viscous liquid in sensor and pulse line 12 p2234 A70-27567

Waveform estimation by adaptive combination of analog and hardlimited sensor signals 12 p2187 A70-27906

Meteor particles spatial density and energy characteristics on space vehicles, using luminescent sensors coupled with photomultiplier 13 p2485 A70-28470

Free nuclear precession sensor with rotating sample for performing measurements in nonuniform magnetic field 14 p2582 A70-30218

Flueric sensor for RF induced currents providing alternative to bridge wires as initiators of explosive charges 14 p2534 A70-30681

Displacement sensor based on interference fringes counting by laser interferometry 14 p2594 A70-30683

Contactless electromagnetic level sensor for liquid metal using eddy currents 14 p2587 A70-31011

Electro-optical sensor night time capabilities with laser illuminator, determining current per unit area from photocathode 16 p2907 A70-33183

Nonpenetrative reentry vehicle nose thickness ablation sensor using gamma radiation backscatter 17 p3094 A70-35519

Adiabatic calorimeter for heat flux sensor contact calibration, describing operational principles and design 18 p3257 A70-36115

Random values analog sensors classification based on physical, algorithmic and data reproduction techniques 20 p3593 A70-39917

Airborne integrated computerized ASW system, describing navigation, flight control, display and sensor subsystems 21 p3821 A70-40575

Flow difference sensor for aircraft hydraulic systems damage vulnerability reduction, discussing design, operation and flight tests results 21 p3750 A70-40786

Precision gimbaled sensor pointing system calibration data errors due to misalignments and inaccuracies in transducer readout 22 p4040 A70-43587

High pressure hydraulic fluidic vortex rate sensor feasibility, considering variable geometry sensor design, fabrication and tests [SAE PAPER 700788] 24 p4294 A70-45857

Spacecraft sensor trends from space station research and technology requirements regarding astronomy, biomedicine and biology, earth resources, etc [AIAA PAPER 70-1291] 24 p4418 A70-45974

Cryogenic fluid multipoint level sensing detector circuit using carbon resistors 24 p4339 A70-46200

Free nuclear precession sensor with rotating sample for performing measurements in nonuniform magnetic field 24 p4339 A70-46293

SENSORY DEPRIVATION

Visual restriction effects on critical flicker fusion threshold, loudness and pitch discrimination determined using reticular activating system 09 p1622 A70-23576

Sensory deprivation induced EEG changes, discussing duration effect on postisolation occipital alpha frequency 13 p2350 A70-29242

Mental performance changes due to extended exposure of man to sensory deprivation environment, discussing prevention and treatment methods 21 p3770 A70-41479

SENSORY DISCRIMINATION

NT BRIGHTNESS DISCRIMINATION

NT TACTILE DISCRIMINATION

NT VISUAL DISCRIMINATION

Comfort and thermal sensations and associated physiological responses during exercise at various ambient temperatures, noting effects on sensory estimates 01 p0031 A70-11648

Rats ability to discriminate slow rotation speeds, suggesting otolith organs and proprioceptors sensitivity role in discrimination 03 p0439 A70-14296

Acceleration cues removal effects on vehicular velocity perception, using movie technique to control visual cues 05 p0806 A70-16143

Subjective and objective measurement of sound impulses, pauses and intervals duration sensation, showing adjustment accuracy 09 p1618 A70-22763

Accumulator model for psychophysical discrimination, discussing stimulus presentation and sampling, parameter values estimation, response latencies, etc 10 p1827 A70-24767

Aged pilots hearing acuity using speech audiometry, noting discrimination loss for HF verbal sounds 11 p1990 A70-25669

All-or-none hypothesis of selective sensory attention, discussing simple stimuli, target detectability and switching time 15 p2681 A70-31790

Human vigilance paradigm and physiology, discussing relationships between vigilance, signal detection and animal discrimination 19 p3364 A70-38324

SENSORY FEEDBACK

Receptive fields in visual systems, discussing characteristics, size, geometry, adaptation effects, sensory interactions, etc 02 p0236 A70-12304

Human feedback and response mode in performing Bayesian decision task 02 p0237 A70-12382

Biological model describing spacecraft operator sensorimotor activity in response to various spacecraft control stimuli, outlining computer algorithm 05 p0810 A70-17118

Retinal receptors physiology involved in transforming visible radiant energy into sensory message 12 p2172 A70-28105

Tracking error correction time and proprioceptive reaction time, suggesting role of central mechanism without sensory feedback 17 p3036 A70-34606

Visual sensory storage item selection efficiency 19 p3363 A70-38321

Fluidically augmented artificial feel system for fighter and attack aircraft control, discussing improved handling qualities [SAE PAPER 700785] 24 p4294 A70-45859

SENSORY PERCEPTION

NT AUDITORY PERCEPTION

NT CONSCIOUSNESS

NT CRITICAL FLICKER FUSION

NT KINESTHESIA

NT OLFACTORY PERCEPTION

NT PROPRIOCEPTION

NT SPACE PERCEPTION

NT TACTILE DISCRIMINATION

NT TASTE

NT VERTICAL PERCEPTION

NT VIBRATION PERCEPTION

NT VISUAL DISCRIMINATION

NT VISUAL PERCEPTION

Mathematical models for perception and skilled action in man or machine, noting sensorimotor theory 01 p0034 A70-10498

Sensory and muscular factors interaction in space perception via empirical test of summative hypothesis derived from sensory tonic field theory 02 p0239 A70-12626

Perceptual selection and integration of sensory data conveyed to brain, explaining various optical illusions 10 p1827 A70-24766

Feline hypersexuality, aggression and perceptual disorientation resulting from p-chlorophenylalanine administration 12 p2167 A70-27271

Sensory function in multimodal signal detection forced choice experiment involving auditory, visual and auditory-visual stimuli 14 p2539 A70-31167

Thermal thermesthesiometer for skin heat sensitivity studies 19 p3368 A70-37806

Human sensory perception associated with breathing, comparing physical stimulus intensity with judgement of magnitude 19 p3365 A70-38370

Semicircular canals-otoliths interactions for antagonistic and synergistic information 22 p3976 A70-43704

Labyrinthine and sensory information role in driving, discussing car simulator, driver tests with impaired inputs, age factors, etc 22 p3976 A70-43708

SENSORY STIMULATION

Nerve cell response to change in chemical constitution of surroundings used to investigate animal periphery sensory mechanisms 01 p0033 A70-10497

Object carrying behavior of rats, using electrical stimulation of hypothalamic structures 02 p0237 A70-12395

Evoked potentials arising in entorhinal cortex of rabbits in response to stimulation of somatic nerves, light and sound 03 p0417 A70-13070

Somatosensory cortex removal effect on blocking action of skin stimulation on associative response to light flash in cats 03 p0420 A70-13430

Complex conditioned reflexes to three component visual-acoustic-tactile stimulus in dogs analyzed by secretary and thermoelectrical techniques 04 p0638 A70-15504

Human blinking reflex recorded by electromyography, studying latent period in response to stimulation by air stream 12 p2168 A70-27346

Skin receptors afferent discharge characteristics during vibrotactile stimulation 13 p2354 A70-29594

Nervous system response fluctuation measurement during perceptual and learning tasks in terms of signal to noise ratio of electrical and tactile stimuli 13 p2354 A70-29595

Vibrotactile display operational skill acquisition, discussing stimuli quality and spacing effects on lumen of temporal ordering of sensory events in haptic space 13 p2354 A70-29596

Antidiuresis associated with oral cavity stimulation during food ingestion by rats 13 p2355 A70-29813

Perception threshold in rapidly changing circumstances, discussing stimulus signals recognition 15 p2687 A70-32872

Visual and auditory reactions in dogs to alimentary stimuli before and after partial removal of cerebellum, noting complete recovery within month 15 p2687 A70-32892

Decision theory model evaluation based on experimental findings concerning relationship between stimulus intensity and reaction time 17 p3036 A70-34605

Vestibular thermal stimulation method using distilled water injected into ear, discussing nystagmus appearance and duration 19 p3367 A70-37355

Soviet monograph on secondary signaling system role in development of speech, thought, conditioned and unconditioned reflexes, human will and hypnosis, noting salivary gland function 19 p3359 A70-37407

Human spatio-temporal visual evoked response characteristics, showing potential gradient rotation in same period as input stimulus 19 p3360 A70-37845

Reaction time intersensory facilitation relationship to single channel theories of attention and human performance 19 p3362 A70-38312

Human sensory perception associated with breathing, comparing physical stimulus intensity with judgement of magnitude 19 p3365 A70-38370

Vestibular sinusoidal stimulation effects on compensatory tracking under various postures and display conditions 22 p3976 A70-43706

Peripheral stimulations of various modalities effect on neurons impulse activity in hippocamp dorsal area of rabbits, noting excitation and latent periods 23 p4145 A70-44311

Alpha and beta reciprocal hunger regulating systems localized in rats hypothalamus areas by varying injection sites of alpha and beta adrenergic drugs 24 p4304 A70-46233

SENTENCES

NT WORDS [LANGUAGE]

Automated Readability Index for technical materials weighting word and sentence length in multiple regression equation 24 p4308 A70-45510

SENTINEL SYSTEM

U.S. Safeguard plan suitability as hardpoint missile defense system, discussing technical controversy over Sentinel components 04 p0760 A70-14502

SEPARATED FLOW

NT BOUNDARY LAYER SEPARATION

Time dependent behavior of separated and un-separated unsteady flow of incompressible viscous and inviscid fluids without heat transfer 01 p0067 A70-11162

Supersonic flow separation at antisymmetrical delta wing edges, noting eddy layer and vertical velocity fields effects on aerodynamic characteristics 02 p0224 A70-12625

Cyclic changes in concentration produced in fluid flowing through fixed bed of solid adsorbent, governing separation by beds wave propagation properties 04 p0780 A70-14712

Laminar flow separation, reattachment and transition over downstream step, including visual observations of smoke filaments, velocity fluctuation measurements and velocity profiles [ASME PAPER 69-WA/FE-5] 04 p0667 A70-14784

Plume-induced flow separation effect on thermal environment using Saturn 5 film and instrument data, attributing heating rate increase to recirculated exhaust gases [ASME PAPER 69-WA/HT-18] 04 p0761 A70-14815

Vortex separation effects on elliptic bodies lift distribution, analyzing separated flow pattern

04 p0619 A70-15385

Hypersonic laminar separation of slip flow on slender cone with attached compression flares, using surface pressure measurements and Pitot surveys [DFVLR-SONDDR-26]

04 p0620 A70-15577

Three dimensional flow separations on upswept rear fuselages, using flow visualization and pressure measurement

05 p0790 A70-16097

Separated incompressible flow around wing profile, considering calculation of separated potential flow generation with given separation point

06 p0966 A70-17253

Base bleed fluid injection effect on steady separated flow past two dimensional bluff body, studying streamline pattern near object

06 p0967 A70-17518

Flow separation angle and loss coefficient in cascades with small aspect ratio blades under secondary vortex pair expansion over channel

06 p1130 A70-17858

Isoenergetic mixing and reattachment processes of two dimensional supersonic turbulent separated flow, modeling mixing process by constant pressure theory [AIAA PAPER 70-108]

06 p1037 A70-18039

Supersonic flow separation over rearward facing step, measuring upstream boundary layer, lip shock and shear layer formation by pitot probe and surface pressure survey

06 p0973 A70-18153

Laminar to turbulent boundary layer transition and separation on circular cylinder measured by heated end-window film sensor applicable to water flow

07 p1259 A70-19831

Diffusive separation of Ar 36 and 40 and He in axisymmetric supersonic jet taking into account pressure diffusion

08 p1431 A70-21027

Numerical techniques and solutions for compressible and incompressible laminar separated flows using time dependent finite difference equations

11 p2035 A70-25972

Off-centerline heating on lee surface of supersonic delta wing with separation and vortex initiation at leading edge

11 p1976 A70-25996

Convergent-divergent nozzle operation at low pressure ratios causing separation of internal flow, discussing stability and flow field

12 p2157 A70-28084

Hydrodynamic forces by oscillating foils in ideal incompressible fluid turbulent flow with stream separation

13 p2390 A70-29649

Blunt base heat transfer in axisymmetric supersonic separated flow in axisymmetric near wake tunnel, comparing to previous data

13 p2523 A70-29989

Book on flow separation covering steady/unsteady, turbulent and incompressible flows, base pressure, thermal effects, etc

16 p2833 A70-32913

Reactive stream separation high speed color photography for impinging streams of nitrogen tetroxide and hydrazine

16 p2998 A70-33605

Two dimensional incompressible isothermal laminar separation of Newtonian fluid in steady flow, obtaining velocity profiles

16 p2892 A70-33635

Vortices in axisymmetrically separated flows, comparing results of various experiments

16 p2894 A70-33895

Convective heat transfer at solid boundaries in separated and reattached subsonic and supersonic flows, considering booster base heating

17 p3007 A70-34484

Transitional flow separation upstream of compression corner at trailing edge of sharp leading edge flat plate

17 p3007 A70-34487

Laminar incompressible separating and reattaching flows, correlating finite difference solutions with experimentation

17 p3008 A70-34488

Analytic theory of unsteady separated flow effects on dynamics of heat sink type reentry bodies and elastic launch vehicles

17 p3008 A70-34489

Aerodynamics theory for separated flow effects on helicopter lift-drag capability, taking into account three dimensional flow and blade aerelasticity

18 p3205 A70-35956

Mathematical model of three dimensional separated flows with applications to small aspect ratio delta wing and flat plate

18 p3207 A70-36438

Axial flow compressor stage efficiency under rotary separation conditions, investigating dependence on flow rate

19 p3490 A70-37252

Hypersonic aerodynamic characteristics of sharp slender right circular cones at angles of attack, using

Newtonian impact theory modified for flow separation effects

[AIAA PAPER 70-979] 20 p3558 A70-39550

Supersonic flows with imbedded separated regions, emphasizing cavities with recompression against solid boundary layer

21 p3745 A70-41372

Transitional flow separation upstream of compression corner for two dimensional model relationship to attached flow and boundary layer transition on plate

21 p3746 A70-41864

Unsteady aerodynamic forces at stall flutter, applying vortex sheet theory to separated flow field around thin airfoil at high angle of attack

22 p3957 A70-42284

Twisted incompressible viscous fluid flow in conical diffuser described by differential equation system, considering flow velocity field and separation point

23 p4133 A70-44159

Two dimensional incompressible air flow past circular cylindrical body, investigating separation point control by suction and jet injection

24 p4288 A70-46010

Jet momentum for flow separation control of air past circular cylindrical surface

24 p4288 A70-46011

SEPARATION

Hydride segregation in Ti alloy weldments made with unalloyed Ti filler-metal, determining effect on mechanical properties

14 p2591 A70-30932

Solidification theory application to Ti alloys, predicting microsegregation in binary alloys

17 p3112 A70-34352

SEPARATORS

NT AIR FILTERS

NT DUST COLLECTORS

NT EVAPORATORS

NT FLUID FILTERS

Test chamber to simulate helicopter rotor downwash for engine inlet air particle separator optimization

01 p0056 A70-10676

Design parameter importance in centrifugal axial flow particle separator tubes performance from separator tube development program data

01 p0163 A70-10680

Hydrophobic-hydrophilic zero gravity liquid-gas phase separator for Apollo 11 flight life support system

[SAE PAPER 690638] 05 p0804 A70-15844

Materials for separator matrix of rechargeable hydrogen oxygen fuel cell, noting use of composite potassium titanate

09 p1612 A70-22045

Gravity effect on conical vortex separator, predicting body force effect on heavy fluid boundary layer flow for limiting condition determination

13 p2391 A70-29978

Water separation index modified /WSIM/ test for jet fuel surface active materials in relation to filter/separator performance

18 p3300 A70-36815

Liquid-gas separator design with reduced friction loss for MHD generators using two phase convergent-divergent nozzles

20 p3612 A70-40014

SEQUENCING

Loud and soft signal recognition task under information feedback of presentation schedules and sequence probabilities

16 p2854 A70-33974

Successful application development and implementation of data processing system, noting sequence, magnitude, manpower and time required

17 p3200 A70-35507

Sample images division into teaching and checking sequences in pattern recognition problems, determining coefficients based on statistical properties of set

19 p3382 A70-37449

Coordinate sequences for regions with complex geometries and various boundary conditions, using linear operators

19 p3460 A70-38940

Test selecting and sequencing for adaptive checkout processes, determining malfunctions

20 p3659 A70-40106

SEQUENTIAL ANALYSIS

Multichannel sequential detection of stationary signal, deriving analytical expressions for probabilities of erroneous solutions and mean duration of tests

07 p1227 A70-18762

DICAP system to analyze digital sequential switching circuits, studying simulation technique range and limitations of applicability

10 p1845 A70-24236

Discrete calculus of variations for optimal control involving use of discrete time sequence and functionals

10 p1910 A70-24702

Space vehicle on-line tracking with impulsive thrust maneuver by sequential estimation scheme, reducing radius measurement error

11 p2008 A70-26237

Binary-coded sequential acquisition spacecraft ranging system operating at weak signals using HF digital logic

11 p2009 A70-26252

Discrete sequential algorithms for bit synchronization implemented with digital computer for optimum data detection

12 p2184 A70-27249

Optimal singular controls made nonsingular for decreasing epsilon values by adding integral quadratic functional of control to cost functional

13 p2382 A70-29066

Gradient algorithm for sequential identification of features in dynamic linear systems

13 p2383 A70-29582

Adaptive optimization methods involving minimization of unknown function, determining new input location via sequential search

13 p2383 A70-29583

Quasi-optimal sequential detection of phase modulated signal of varying frequency on white noise background, using Markov theory

13 p2369 A70-29732

Maximum convergence function in image recognition using dynamic programming and sequential optimization

14 p2553 A70-30419

Sequential gradient restoration algorithm for optimal control requiring state, control and parameter to satisfy vector differential equation, initial and final conditions

14 p2561 A70-31099

Convolutional code decoder modeled as autonomous stochastic sequential machine, considering finite Markov chain theory for error probability

17 p3049 A70-34854

Multichannel sequential detection of stationary signal, deriving analytical expressions for probabilities of erroneous solutions and mean duration of tests

18 p2229 A70-37106

Bayes sequential detection test with constrained error probabilities, investigating properties of thresholds equations

21 p3787 A70-41333

Sequential experiments design and model discrimination, comparing Chernoff and Box-Hill approaches

22 p4064 A70-43527

Hologram rapid sequence recording, using scatter plate holographic system

23 p4198 A70-44947

Sequential decoder program for low weight codewords in binary convolutional code over one-half constraint length

24 p4313 A70-46065

Suboptimum sequential algorithm for recovery decoding errors in convolutional codes, using Hamming distance criterion

24 p4314 A70-46066

SEQUENTIAL COMPUTERS

Permanent memory faults effects on sequential machines finite-state behavior, considering masking role in synthesis of fault-tolerant sequential networks

11 p2072 A70-26220

Automatic ground based aircraft collision avoidance using combined associative processor- sequential computers

16 p2948 A70-33468

Sequential logic circuit synthesis using truth table, minimizing by Quine-McCluskey method

23 p4167 A70-44861

SEQUENTIAL CONTROL

Terminal area approach control sequencing, using digital computer to allocate identification mode and landing time slot

02 p0332 A70-11971

Optimal guaranteeing control for single switching representable in form of two different successive stages in time, ensuring invariance with respect to motion perturbations

07 p1332 A70-18664

Electronic modulo-M counter driven by HF pulse generator used for generating random numbers sequence

10 p1848 A70-23976

Statistical methods for feature selection and ordering, mode estimation and pattern classification in pattern recognition, describing sequential decision model

13 p2374 A70-29578

Spacecraft onboard computer for prelaunch targeting constants verification through checksum equation and error detection scheme, using generated number sequence

[AIAA PAPER 69-946] 14 p2599 A70-30769

Sequential circuit specification in terms of input/output pair strings, allowing programmed translation algorithm for automation of flow table construction

15 p2711 A70-32605

Linear sequential Kalman filter for time correlated noise without state augmenting and measurement differencing demanding less computer sizing

16 p2887 A70-33350

Dynamical theorems to control number of collisions for sequences in generalized Boltzmann equation, discussing binary collisions involving three molecules
21 p3852 A70-40946

Automatic and command multiple sequencer for spacecraft solar cell battery charger, providing switching logic by integrated circuits design
21 p3758 A70-42128

Pulse-time multistable state elements for automatic and remote control constructed from pulse sequence interactions with multiple frequency relations
22 p4005 A70-43567

SEQUENTIAL DETECTION
U SEQUENTIAL ANALYSIS

SERIES [MATHEMATICS]
NT ASYMPTOTIC SERIES
NT FOURIER SERIES
NT MACLAURIN SERIES
NT POWER SERIES
NT TAYLOR SERIES

Atmospheric dynamics nonlinear equations reduction to spectral form using generalized spherical functions series
01 p0135 A70-12023

Two variable expansion method applied to ordinary differential equation and two wave propagation problems, comparing results with matched asymptotic expansions and coordinate stretching methods
01 p0132 A70-11072

F 2 layer state prediction as function of solar activity by series expansion for describing space-time variations of monthly F 2 medians critical frequencies
01 p0083 A70-11547

Incompressible viscous fluid plane flow using series expansion
02 p0277 A70-11910

One dimensional diffusion equation serial solution implementation by hybrid computation, using equivalence between differential and integral equations
02 p0324 A70-12259

Coefficients of Legendre polynomial expansion of earth gravitational potential, using Stokes problem solution
03 p0474 A70-13344

Converging series solutions for conducting circular disk in radiation field of vertical and horizontal magnetic dipoles to determine reemitted field
03 p0448 A70-13432

HF expansions of harmonic solutions concentrated at waves propagating in inhomogeneous medium to dynamic equations in elasticity theory
04 p0767 A70-14499

Spherical harmonics expansion for earth surface and outer space geopotential by mapping earth surface onto sphere
05 p0837 A70-15926

Programming system for Poisson series manipulation on computer, writing subroutines in machine language
05 p0817 A70-16342

Series expanding velocity profile in parabolic cylinder functions describing nonlinear evolution of steady laminar incompressible wake from arbitrary initial profile
10 p1802 A70-24418

Adjointness in nonadjoint boundary value problems, extending Neuberger symmetry study to obtain expansion theorem for nonself adjoint p-point problems
10 p1910 A70-24606

Independent identically distributed random variables sequence, obtaining asymptotic expansion for large deviations of distribution function
10 p1910 A70-24799

Bessel generalized polynomial series convergence and summability on contour of convergence region
11 p2071 A70-25521

Thermal boundary layer similarity at extreme Prandtl numbers as series expansion, allowing for temperature distribution at wall
11 p2148 A70-25983

Arbitrary function expansion into series of Legendre functions by generalizing Weyl-Lebedev-Skalskaia integral transform
13 p2441 A70-29312

Boundary layer flow between nodal and saddle points of attachment, comparing matched series and finite difference methods
14 p2565 A70-30281

Computer program for two body problem literal series expansions using Kepler functions with Bessel and Poisson series operation
14 p2638 A70-30702

Coefficients of Legendre polynomial expansion of earth gravitational potential, using Stokes problem solution
14 p2573 A70-30719

Orthogonal expansion of multivalued functions for weights in threshold function realization
15 p2767 A70-31838

Series expansions convergence of solutions to boundary value problem for Navier-Stokes equations, introducing small parameter in boundary conditions
16 p2890 A70-33243

Linear system under ergodic random processes, determining optimal dynamic characteristics by approximation of spectral density by Laguerre series
16 p2944 A70-34280

Controlled libration point satellite limit cycle motion, deriving solution in infinite series by harmonic analysis
17 p3181 A70-35752

F 2 region critical frequency diurnal variation forecasting, using series expansion of natural orthogonal components
19 p3409 A70-37327

Center fed cylindrical half wavelength dipole antenna, computing radiation pattern by trigonometric expansion approximation for current distribution
19 p3388 A70-37869

Terrestrial ELF electromagnetic wave fields strength variation with distance over earth surface, using residue series zero-order term
19 p3380 A70-38405

German book on functional theory, Volume 6, tabulating theta and elliptic functions for application to applied physics, potential theory, fluid dynamics and oscillation theory
19 p3459 A70-38600

Kahan Babuska summation method variant in Triplex-ALGOL 60 for reducing roundoff errors in finite series calculation
19 p3385 A70-38678

Lunar ephemeris computerized analytical solution, considering literal expansions generation
20 p3705 A70-39479

Thin plane bars elasticity theory, constructing integrals of equations by asymptotic series expansion
20 p3726 A70-39881

Microwave antenna near field patterns analysis by spherical harmonic expansion, discussing validity conditions and convergence
21 p3796 A70-40556

Harmonic mixed boundary value problem with singularity, deriving approximate solution by dual series technique with conformal transformation and finite difference method
22 p4062 A70-42642

QUANTUM MECHANICS
SERIES EXPANSION
U SERIES [MATHEMATICS]
SERT [ROCKET TESTS]
U SPACE ELECTRIC ROCKET TESTS

SERT 2 SPACECRAFT
SERT 2 solar array power system in sun synchronous orbit, considering power conditioning and deployment technique
20 p3567 A70-40202

Power conditioning system for Hg ion thruster on SERT 2 spacecraft, considering performance, design, control circuits and arcing
20 p3568 A70-40216

SERT 2 spacecraft surface contamination by Hg ion thruster effluents, using solar cell sensors
20 p3690 A70-40217

SERT 2 measurements for spacecraft and ion beam potential as function of thruster and orbital parameters, using hot wire emissive probes
20 p3691 A70-40218

In-flight thrust measurement methods on SERT 2 ion thrusters, using accelerometer, electrical parameters and orbit change
20 p3691 A70-40219

SERT 2 spacecraft ion thruster ground tests and flight operation, tabulating performance data
20 p3691 A70-40220

SERT 2 for testing ion thruster reliability and operational characteristics, discussing design and mission objectives
20 p3716 A70-40221

Electric propulsion systems integration into SERT 2 spacecraft, discussing launch imposed environment, thrust vector control, thruster breakdown, power conditioning, etc
20 p3691 A70-40222

SERT 2 Hg thrust ion extraction, loss, production and energy balance within ionization chamber
20 p3693 A70-40244

SERUMS
Serologic evidence of immune mechanisms, including heart muscle antibodies in patients with idiopathic cardiomyopathy, showing no autoimmune disease in majority
01 p0014 A70-10276

Adrenocortical responses of military recruits to sub-tropical climate, making serum and urinary 17-OHCS measurements on subjects fasting, inactive and at thermoneutrality
01 p0032 A70-10359

LF ultrasound not producing irreversible denaturation of blood serum proteins but capable of modifying electrophoretic properties
07 p1206 A70-19470

Radial immunodiffusion for serum proteins quantitation adapted to capillary blood and compared with results for venous blood
07 p1214 A70-19932

Idiopathic myocardial disease patients investigated for serological anomalies and markers of immunopathology
09 p1621 A70-23301

Fasting and postprandial serum amino acid patterns of human males fed protein-free or protein-sufficient diets
09 p1621 A70-23399

Antigens existence shared by human blood serum and proteins of erythrocyte stroma established through RAHS absorption by stroma and subsequent microimmunoelectrophoresis of serum
15 p2687 A70-32900

Serum enzymes lactate dehydrogenase, creatine phosphokinase and isoenzymes in conditioned male after marathon run, noting little myocardium damage
21 p3766 A70-42158

Electrolyte changes after marathon running noting increase in serum sodium and serum potassium
24 p4302 A70-46108

SERVICE LIFE
Loads effects on refractory alloy fatigue strength and life at high temperatures, describing aircraft turbine blade tests
01 p0115 A70-10069

Dielectric overcoatings effect on Al interconnections electromigration in IC metallization, noting longer intervals between failures
01 p0153 A70-10083

Life-test sampling plan for electron tubes based on exponential failure distribution for reliability demand of military specifications
01 p0099 A70-10112

Hybrid boost bearing applied to jet engines thrust bearing life extension and to land turbine equipment for providing high overload capacity
01 p0101 A70-10389

Bonded solid lubricant films wear life equation for low contact stress conditions, determining optimal film thickness
01 p0102 A70-10397

Cost reductions achieved by space payload life extension through manned maintenance and increased transportation economies via refueling and improved space propulsion
01 p0196 A70-10844

Turbine blades durability and fatigue characteristics, plotting fatigue diagram from statistical tests
01 p0105 A70-11418

Machine parts fatigue behavior and service life, studying endurance margin under load cycles spectra below initial endurance limit
02 p0383 A70-11657

F-8 wing service life extension design techniques, emphasizing fatigue design curves and procedures
02 p3886 A70-11939

Safe-life and fail-safe structural design philosophies in fatigue damage and operating lifetime control
02 p3889 A70-12615

Service life analysis at randomly varying load - Conference, Muelheim-Ruhr, Germany, April 1969 [DFVLR-SONDDR-4]
02 p3931 A70-12851

Aircraft structures service life estimation, comparing results of serviceability tests, solo flight tests, programmed random load tests and linear defect buildup hypothesis
02 p0391 A70-12854

Sealed-off He-Cd laser construction, describing life test, noise, Cd transport characteristics and transverse magnetic field effect
03 p0501 A70-13582

Boeing 707 aircraft operational efficiency optimization by modification program to extend wing life
03 p0497 A70-14052

Nondestructive test procedures for maintaining and determining serviceability of penetrant inspection materials during use
05 p0844 A70-15780

Solar energy as spacecraft power source emphasized in operating life comparison with chemical, electrochemical and nuclear energy, discussing silicon solar cells
05 p0799 A70-17023

Molybdenum disulfide solid film lubricant with increased wear life developed from in situ conversion of electrodeposited molybdenum trioxide
06 p1091 A70-17339

SERT 2 thruster system performance over expected mission parameters, noting operational lifetime excess over mission requirements
07 p1364 A70-19702

Nickel-cadmium batteries rapid deterioration due to destructive demand pulse charging methods
08 p1439 A70-20706

Composite materials fatigue determinations providing curves of stress-strain magnitude vs usable life or time to failure, considering environmental effects in service for design criteria
08 p1531 A70-21895

Low noise TWT, discussing dynamic range, gain and phase tracking, environmental performance, life behavior and noise factor interrelations
09 p1644 A70-22233

Current-voltage characteristics and lifetime of thin film diodes on chalcogenide glass substrate with symmetrical and asymmetrical electrodes

09 p1647 A70-22751

Thermoelastic stresses in plates and shells in random temperature fields, studying influence on service life

09 p1778 A70-23084

Electrode structural parameters effect on polarization characteristics of air-hydrogen cells to obtain optimum performance, reliability and service life

10 p1831 A70-24471

Expansion bellows fatigue strength based on load and displacement measurements performed during low cycle model tests

10 p1965 A70-25299

Traveling wave tube amplifier performance in numerous orbiting communication satellites, emphasizing life test data

[AIAA PAPER 70-507] 11 p2015 A70-25406

TWT, obtaining life performance data from spacecraft, discussing distortion characteristics

[AIAA PAPER 70-505] 11 p2017 A70-25494

Molybdenum disulfide dry film lubricant wear life as film sintering process dependent on binder, additive or atmosphere chemical effects

11 p2058 A70-25571

Macroscopic internal stresses in plastics surfaces, discussing stress effect on plastic moulding service life, Knoop hardness test and charts

11 p2132 A70-25597

Components life determination from calculating cumulative damage using empirical stress amplitude distributions

11 p2133 A70-25844

Low cycle fatigue problems, environmental influence of operational differences on component life, life limits and controls for safe operation of jet engines [SAE PAPER 700207] 11 p2102 A70-25879

Generator regulator for Ni-Cd batteries capable of sensing temperature, reducing charge rate and limiting output to increase batteries life

[SAE PAPER 700212] 11 p1983 A70-25884

Service life and friction coefficient of molybdenum disulfide-silicon lubricating coating as function of load, sliding rate and vacuum level

11 p2060 A70-25943

Complex airframe design for economic and safe operation and long life using fatigue and fracture mechanics

[AIAA PAPER 70-512] 12 p2324 A70-27466

Space station design for long duration operation, considering optimum mix of redundancy, maintainability and checkout

12 p2313 A70-27743

First excursion failure survival probability of randomly excited structures, considering single degree of freedom linear oscillator under Gaussian white noise

12 p2327 A70-27819

Reliable and optimum cost power sources design for long life electronic digital communication equipment

12 p2166 A70-27927

Materials life estimation under irregular load sequences, discussing computational and graphical method, applications and test and computer equipment

13 p2513 A70-29162

Rotating disk service life and structural failure under creep, using Tresca yield and maximum stress criterion

13 p2514 A70-29290

Reliability relation to mean time between failures /MTBF/ relation for long life repairable equipment with limited life components

13 p2421 A70-29567

Turboprop aircraft engine service life extension, correcting deficiencies via accelerated tests based on relation between failure rate and usage

15 p2787 A70-31535

Decreasing failure rate /DFR/ with time in electronic systems operating in avionics applications

15 p2712 A70-32646

Wearout life and reliability of rate gyros from field service test data

15 p2748 A70-32668

Reliability-cost model to determine optimum failure rate for minimization of systems total life cycle cost [ASME PAPER 70-DE-43] 16 p3004 A70-33507

Life and confidence tests of miniature self contained flexure pivots in critical mechanisms

[ASME PAPER 70-DE-76] 16 p2918 A70-33522

Reliability life tests preventing sliding electrical contacts failure in space vehicles, discussing data dissemination

16 p2920 A70-33806

Space suit thermal insulation properties, wear durability and nonflammability improvements, reflecting techniques in fabricating cryogenic multilayer insulation systems

[AIAA PAPER 70-851] 16 p2939 A70-33918

Hazard plotting methods for analyzing service life data with different failure modes

16 p2921 A70-34024

Plastic structural components service life estimation based on creep diagrams and short time tests

16 p2941 A70-34323

Aircraft, helicopters and rockets aviation systems design and components service life problems, emphasizing maintenance intervals

17 p3100 A70-34686

Materials and noncontacting design for 50,000 hour lifetime electromechanical components, noting magnetically suspended motor

17 p3100 A70-34754

Boeing 747 aircraft JT9D engine deflections and removals during early service experience and maintenance

[AIAA PAPER 70-890] 17 p3019 A70-35807

Machine parts fatigue behavior and service life, studying endurance margin under load cycles spectra below initial endurance limit

19 p3547 A70-38430

Contact-relay circuits failure free operation probability, taking into account coil winding breakage

19 p3390 A70-38579

Redundant systems reliability under wearout conditions for active and standby units, including failure rates of sensing and switching devices

19 p3438 A70-38597

Oil seals service life as function of friction horsepower

[ASLE PREPRINT 70AM 5C-1] 19 p3439 A70-38807

Binder wetting relation to solid film lubricant wear life

[ASLE PREPRINT 70AM 5A-3] 19 p3439 A70-38810

Computer program for assessment and modification of mechanical component life predictions by discrete formulation of Bayes theorem

19 p3440 A70-38816

Long life reliability measurement for reentry and recovery systems, noting applicability to program monitoring, optimum resources allocation, etc

19 p3442 A70-38832

Long term life test and vacuum tests of high temperature resistojets using ammonia and hydrogen propellants

[AIAA PAPER 70-1136] 20 p3567 A70-40212

Colloid microthruster system life test, discussing design and steady state performance

[AIAA PAPER 70-1110] 20 p3692 A70-40233

Accelerated life testing, discussing accumulated damage for graphical procedure in normal conditions

[ASME PAPER 70-PROD-10] 21 p3832 A70-40871

Helicopter parts and assemblies fatigue life estimation and testing, discussing loading spectra, service conditions, etc

22 p4046 A70-43119

Aircraft turbine engines durability estimated from rotor blade minimum tip clearance measurements

22 p4092 A70-43529

Ni-Zn high energy secondary battery cycle life and discharge capability

22 p3966 A70-43540

German monograph on fiberglass, matrix and filler effect on service life of composites with low fiberglass content

24 p4365 A70-45084

Chemically treated rolled hard properties following long term use in air hygrometers

24 p4333 A70-45138

NDT for aircraft service life extension, discussing fatigue tests and crack detection

24 p4346 A70-45719

Aircraft structures service life estimation, using Ir-192 and Tm-170 gamma ray radiography

24 p4346 A70-45725

SERVICE MODULES

Nondestructive testing for Apollo Command and Service Module, describing requirements added to quality control scope

01 p0098 A70-10026

Apollo spacecraft hardware, command, service and lunar modules, discussing design factors and tests contributing to spacecraft reliability

[AIAA PAPER 69-1095] 01 p0194 A70-10618

Fuel cell assemblies as primary electrical source for Apollo command and service modules, discussing heat removal, water vapor control and transient performance

08 p1439 A70-20702

Apollo command and service modules from metallurgical viewpoint

09 p1766 A70-22792

Apollo service module engine design for maximum pilot safety, noting components redundancy

11 p2103 A70-26289

Apollo command and service modules environmental control system, discussing redesign of faulty hardware

[SAE PAPER 690618] 12 p2167 A70-27948

NDT techniques in manufacturing of Apollo command and service modules

13 p2420 A70-29243

Apollo service module retrograde motion due to propellants reorientation after reentry jettison predicted by digital simulation

[AIAA PAPER 70-1047] 19 p3534 A70-38862

SERVICES

Airfreight carriers secondary services from legal viewpoint

07 p1427 A70-18889

Computerized air transportation service including passenger name record, fare quotation, ticketing, etc

17 p3199 A70-34688

SERVO LOOPS

U FEEDBACK CONTROL

U SERVOCONTROL

SERVOACTUATORS

U ACTUATORS

U SERVOMOTORS

SERVOAMPLIFIERS

Soviet book on servo systems for radar automatic tracking and control stations covering static, dynamic and frequency characteristics, amplifiers and correction devices

09 p1654 A70-22597

Hydraulic regenerative servoamplifier system for electrohydraulic actuator design, discussing specifications and test results

09 p1614 A70-23686

SERVOCONTROL

Satellite tracking antennas servo design including adaptive and compensation methods and digital computer applications

01 p0011 A70-11453

Optimal servocontrol via nonquadratic performance index and linear plant dynamics obtainable as nonlinear function of error between controllable states and input vector

02 p0273 A70-12732

Servo systems for analog automatic reduction of time dependent photomechanical model materials fringe data in stress analysis

03 p0482 A70-12967

Static and dynamic characteristics of inertia load driving systems using electrohydraulic pressure and flow control servovalves

[ASME PAPER 69-WA/FLCS-15] 04 p0626 A70-14842

Weighting function of optimal correctable gyroscopic servosystem in random narrow band noise

05 p0880 A70-16225

Laboratory Electronic Servo Controller for structural fatigue tests, aircraft material tests, model position and velocity control in wind tunnels

06 p0989 A70-18606

Servo systems for analog automatic reduction of time dependent photomechanical model materials fringe data in stress analysis

07 p1286 A70-20040

Soviet book on servo systems for radar automatic tracking and control stations covering static, dynamic and frequency characteristics, amplifiers and correction devices

09 p1654 A70-22597

Procedures for conducting fatigue studies at high temperatures on servocontrolled testing machines using stress, axial, transverse or plastic strains

11 p2033 A70-26612

Telescope servocontrol system with low pointing error and drift rate, permitting extended time exposure photography of star or deep space probe

12 p2202 A70-26869

High temperature compressive creep tests at constant stress, describing strain measurement techniques and servocontrolled compressive equipment

12 p2206 A70-27214

Dynamic stability of multipoint servocontrol system actuating thin deformable primary mirror of orbiting telescope

12 p2203 A70-27413

Servocontrolled IR optometer providing electrical signal proportional to refractive power of human eye

12 p2237 A70-28123

Nonlinear servo system stability criteria based on plus or minus controlled data theory

13 p2381 A70-28939

Servocontrolled laser strainmeter based on Michelson-Morley interferometer, determining dynamic characteristics dependence on feedback loop filter type

16 p2925 A70-33022

Desensitized linear servo model following feedback control systems design using specific optimal control concepts

16 p2884 A70-33315

High strain fatigue machine with axial loading and servocontrol for short endurance testing

17 p3063 A70-35586

Steady forced regime stability in pulse frequency modulated servosystems, using Liapunov method

18 p3234 A70-36071

Hybrid fluidic heading reference system with negative feedback servo loop around vortex rate sensor

[ASME PAPER 70-FLCS-10] 22 p3963 A70-42417

- Amplitude instability in vibration testing systems, noting effects of bandpass filters in feedback loop of amplitude servo 22 p4006 A70-43250
- SERVOMECHANISMS**
NT SERVOAMPLIFIERS
NT SERVOMOTORS
 Position control of burning solid nonmetallized propellant strand in combustion bomb using closed loop servomechanism 01 p0215 A70-10830
 Satellite tracking antennas servo design including adaptive and compensation methods and digital computer applications 01 p0011 A70-11453
 Triple mode control strategy to provide near optimal stable transient response in variably loaded electrohydraulic servomechanisms 02 p0272 A70-12728
 Slide and sleeve type servovalves used in Boeing aircraft possessing chip shearing capability of 200 pounds axial force 02 p0229 A70-12863
 Harmonic equilibrium method applied in dynamic properties analysis of autopilot electrohydraulic servomechanisms stability 03 p0415 A70-13930
 Controllable light source for experiments on human pupillary servomechanism 04 p0642 A70-14633
 Pulse width modulated (PWM) electrohydraulic servo response characteristics from modulator transfer characteristic determination by Fourier series analysis of PWM signal [ASME PAPER 69-WA/AUT-2] 04 p0625 A70-14831
 Proportional controlled pneumatic servomechanisms analysis extended to include motion along stroke, considering position effect on stability 05 p0797 A70-15891
 Self adaptive servosystems operating with incomplete input signal information, proposing schemes for parameter adjustment by employing differential circuit containing frequency filters 07 p1239 A70-18734
 Dynamic mathematical model of proportional electromagnetic transducer in pneumatic servomechanisms derived by Lagrange-Maxwell method assuming circuit linearity 07 p1195 A70-18750
 Band polishing machines slave mechanisms and programmed controllers, describing helicopter longrons finishing process 07 p1291 A70-18829
 Simulator servo drive system dynamic requirements for single-axis manual control task using pilot models and computer [AIAA PAPER 70-355] 10 p1858 A70-24208
 Electrohydraulic fast response servosystem design and operation, describing nonlinear model based on component limitations 10 p1807 A70-24578
 Hydraulic piston-valve-type slave mechanism oscillations with rigid feedback and inertial load at actuated shaft, using harmonic linearization method 12 p2167 A70-28340
 Adaptive hydraulic servomechanism control systems synthesis by Liapunov direct method, noting parameter compensation effect on state error reduction 14 p2534 A70-30621
 Bang-bang control of electrohydraulic servomechanisms, approximating optimal control by quasi-optimal controls 16 p2887 A70-33685
 Scan platform servomechanical actuator for Mariner Mars 1969 spacecraft, emphasizing gear arrangement and train dynamics 16 p2845 A70-34108
 Solar power panel orientation servomechanism using passive elements without power consumption 16 p2846 A70-34130
 Dynamics of continuously operating linear servosystems stimulated by stochastic signals, using vectorial equation and impulse response matrix 16 p2944 A70-34295
 Servosystems with random input signals, obtaining optimal transfer function by variational calculus 17 p3056 A70-34617
 Doppler radar frequency tracker with servomechanism applicable to velocity computation of aircraft for self contained navigation 18 p3226 A70-36063
 High order servosystems approximation characterized by gain, time constant and dead time, discussing application to response prediction 19 p3394 A70-38503
 Electrochemical dimensional machining of complex profile components, using servosystem with feedback for interelectrode gap control 20 p3636 A70-39196
 Multichannel iterative servosystems operators for useful signals reproduction 20 p3603 A70-39836
- Hydraulic servomechanism stability and step response, considering unequal oil volume on either side of jack 24 p4292 A70-45159
- SERVOMOTORS**
 Approximate determination of termination hydraulic servomotors frequency characteristics with four way valves using piecewise straight lines on Bode diagram 01 p0007 A70-10034
 Servoactuator simulating vertical acceleration in F-104 simulator, duplicating other forces conventionally 02 p0229 A70-12864
 Amplification and contactless recording device with ferromagnetic servomotor controlled by low DC signals 05 p0848 A70-16364
 Electromechanical start-up time, inertia and synchronous electromagnetic moment of wave-type electric servomotor calculated by energy method 10 p1809 A70-25202
 F-111 aircraft wings unstable fore and aft oscillations in swept forward position ascribed to actuator motor drive rate variations 12 p2160 A70-27112
 Dynamic stability of multipoint servocontrol system actuating thin deformable primary mirror of orbiting telescope 12 p2203 A70-27413
 Parameters optimization of nonlinear electric servo actuator on basis of statistical criteria 14 p2559 A70-30157
 Stepper motor for pointing Surveyor spacecraft TV transmitting antenna and solar panel at earth and sun 16 p2845 A70-34110
 Servoactuator for stick force augmentation on light turboprop STOL aircraft at high angles of attack [AIAA PAPER 70-909] 17 p3019 A70-35821
 Closed loop automatic speed control system for working shaft of two stage alternating current electric servomotor, using invariance principle 20 p3564 A70-39849
 Liquid metal hydraulic servoactuation packages for flight control in high temperature environments without coolant systems 21 p3750 A70-40785
 Automated aircraft flight safety, concerning probabilities and onboard elimination of servomotor failures in hydraulic system due to fuel contamination 22 p3361 A70-42804
 Amplitude-phase characteristics of relay slave mechanisms with AC and DC motors under dynamic braking, using harmonic linearization 22 p4002 A70-42842
 Thyristor-servomotor temperature control unit, describing circuit and applications 22 p3996 A70-42850

SHADOWS
NT LUNAR SHADOW
NT PENUMBRAS
 Sunspot group of July 1966, studying umbrae structures relation to magnetic field 08 p1569 A70-20835
 Photometric profiles of Jupiter shadows cast by large natural satellites used as upper atmosphere probes 08 p1579 A70-21571
 Eckert shadow technique for radiation view factors applied to toroid inside shadow hemisphere 08 p1546 A70-21832
 Earth shadow effect on solar radiation pressure induced short periodic perturbations of satellite orbits 09 p1761 A70-23054

Earth shadow enlargement during 13 April 1968 lunar eclipse, discussing craters exit and entry in umbra

HOH lines existence in sunspot umbral spectrum

Peripheric umbra photometric analysis during lunar eclipses based on homogeneous observational material, revealing luminescence excited by solar corpuscular radiation

Cassegrain antennas design parameters using graphs for minimum blockage condition

Photoelectric spectra of photosphere and sunspot umbra and penumbra ranging from 3900 to 8000 Å

Large sunspot umbra continuum intensity, examining visible spectra

Umbral flash as magnetoacoustic wave, examining Ca II K line variations formation during adiabatic compression

Sunspot umbras and penumbras magnetically nonsplit lines measured photographically by spot contrast discriminator

SHAFTS [MACHINE ELEMENTS]

NT TURBOSHAFTS

Book on vibrational motions of straight and curved shafts, covering dynamic analysis for noncircular cross sections, applications to machine tools and vehicles design, etc

Elastoplastic stress concentrations calculations in notched strips and shafts under tension, bending and torsion, using approximate method

Mechanical systems vibrations comprising tension couplings compensating misalignment between non-coaxial shafts

Monograph on critical speeds of nonzero mass shaft supported at both ends by bearings with nonlinear elastic displacements

Self energized hydrostatic shaft seal operating with incompressible fluid in laminar flow regime, using general lubrication theory

Contour notch position effects on stress concentration in taper section of dumbbell shafts, using photoelastic shaft models and cyclic tests

Disk elements perpendicular mounting by rotation on vibrating shaft, obtaining orientation by centrifugal force

Axial stress at notch root of shafts under axially symmetric loading, utilizing integrated birefringent patterns in transmitted light at room temperature [SESA PAPER 1970]

Shear stress distribution in axially nonuniform circular shaft subjected to torsion, using finite difference approximations

Composite tail rotor driveshaft for next generation helicopter, discussing materials, fabrication and tests [AHS PREPRINT 451]

German monograph on form factors and torsion at shafts with longitudinal keyways under pure torsion

Dry face mechanical shaft seal operating on self generated graphitic film without boundary fluid lubrication [ASLE PREPRINT 70AM 3C-2]

Rigid cylinder rotation and flexible shaft torsion observation by holographic interferometry

SHAKERS

Single or repetitive shock pulses produced on electrodynamic and hydraulic shakers for shock testing on vibration machines

Electrohydraulic vibrators and shakers for testing aircraft systems, diesel engines and structural joints, describing design and operation

HF shaker for accelerometer calibration and resonance evaluation, discussing construction materials, accuracy and test results

Multiple head shaker systems theory as application of linear algebra, noting open loop control system with computer control of frequency, amplitude and phase

Digital electrodynamic vibration exciter control for sinusoidal, random and shock spectrum testing of aircraft, missiles and satellites

Aeroelastic test equipment for Concorde SST using harmonic method and electromagnetic shakers

Shock pulse reproduction on electrodynamic and hydraulic shakers for vibration testing, including SNAP 21 results

SHALES

Steranes and triterpanes identification from Green River shale by capillary gas liquid chromatography and mass spectrometry

Nitrogenous compounds from Colorado Green River Formation oil shale using high resolution mass spectrometry

SHALLOW SHELL EQUATIONS

Thin circular elastic ribs strengthened shallow shells, obtaining solutions in single series

Shallow shell theory, discussing equation kernels, reduction of boundary value problems to integral equations, potential theory application and transformation into Fourier series

Stress-strain state of perforated shallow shells with arbitrary curvature using Green matrices

Integral equations for antisymmetric shallow shell stress-strain state with crack, obtaining asymptotic solution in form of power series

Stress-strain state equations of shallow spherical shells in rectangular and polar coordinates, discussing reduction to plate and Cauchy-Riemann equations

Shallow flexible shells similarity conditions derived in dimensionless form, assessing error

Shallow elliptical planform shell under uniformly distributed normal load calculated with 'ritz and Bubnov-Galerkin variational methods

Donnell shallow circular cylindrical shell equation, obtaining approximate solution for stresses in infinitely long circular cylindrical shell with circular hole subjected to edge loading

Stress-strain state under bending of shallow spherical shell having form of circular rectangle with clamped edges

Clamped and simply supported shallow spherical shells buckling using computer programs

Thin elastic shallow shell static problem solved using numerical integration of differential equation

Heated isotropic shallow shells results extended to solving nonlinear problem in bending theory of orthotropic shallow shells clamped, heated and under pressure

Exact polynomial solution Saint Venant flexure of pretwisted rectangular plate treated as shallow hyperbolic paraboloid shell

Stressed state of shallow spherical shells of revolution undergoing large displacements reduced to Karman equation, solved by small parameter method

Stability and critical load algorithm for flexible shallow spherical and conical shells of revolution derived from variational equation

Shallow spherical shells stability under combined loading, hinging and edge clamping conditions, deriving strain energy expressions

Shallow spherical shell subjected to arbitrarily located concentrated normal force, discussing boundary effects on resulting stress distribution

Thermal stresses in shell with spherical and circular cylindrical sections, using thin shell approximations and shallow shell theory

Stress and buckling measurement of shallow cylindrical steel shells linked to thin plate using resistant strain gauges and high precision indicators

Revolving shallow shells steady creep equations solved by approximation adaptable to computer

Shallow spherical sandwich shells under concentrated forces, obtaining inhomogeneous equations solution by integral Hankel transforms

Shallow orthotropic shell of rectangular planform with edges under dynamic load, studying forced vibrations by anisotropic shell theory

Shallow spherical caps elastic buckling under uniform pressure, considering symmetric and asymmetric deformation modes

Nonlinear spinning shallow spherical shell equations solved for equilibrium stress and displacement distributions, discussing inertia loading

Shallow shells of variable thickness and curvature calculated using small parameter method based on functional analysis

Natural oscillation frequencies determined for shallow shells with hinged and clamped edges

Stress concentration on isotropic elastic circular cylindrical shallow shell using plane waves and spherical means method, obtaining periodic solutions convergence

Variable coefficient equations for free oscillations of shallow shells of variable thickness in Vlasov moment theory

Dynamic stability of shallow shells, taking into account longitudinal inertial forces and nonlinear geometry

Rectangular planform shallow cylindrical shell parametric vibrations using method applied to large bending vibrations of plates

Pairs existence of symmetrical equilibrium forms in nonlinear shallow shell under load applicable to nonshallow shells equilibrium

Shallow rectangular shell panels nonsymmetric nonlinear deflection states computed by finite difference equations iteration, discussing snap-through buckling loads

Partially loaded clamped plastic shallow spherical caps collapse loads and stress and velocity distributions

Carrying capacity of shallow shells of revolution, determining buckling stress and limiting equilibrium of shells with varying thickness under transverse load

Lower critical load for shallow rigidly convex shell expression refined by considering effect of rigid clamping of shell edge on buckling boundary deformation

Solutions existence for nonlinear partial differential equations describing orthotropic and nonlinear shallow shells under loads and temperature effects

Creep deflections and collapse times for supported thin shallow spherical shells under uniform pressure predicted using variational theorem

Finite element method using shallow shell stiffness matrix extended to cylindrical shell solution

Shallow spherical shells stress-strain state in multiply connected regions resting on Winklerian base

Clamped shallow spherical cap elastic buckling and initial postbuckling behavior under uniformly distributed load over circular region centered at apex

Shallow shell solutions complete with respect to finite simply connected surface region applied to circular cylindrical shells

Shallow shell theory partial differential equations, obtaining integral representations of general solutions

Linear compressive orthotropic stability theory for shallow-stiffened cylinders

Shallow shell theory, discussing equation kernels, reduction of boundary value problems to integral equations, potential theory application and transformation into Fourier series

Thermal stability of simply supported bimetallic shallow spherical shell, considering rotationally symmetric deflection modes

Natural oscillation frequencies in rectangular shallow shells weakened by cuts, using summary representations method for eigenvalues determination

Natural oscillation frequencies of shallow shells with mixed boundary conditions on clamped edges, using summary representations method

Reinforced shallow shells and plates stability beyond elastic limit, obtaining optimal parameters under compressive loads

Shallow shells displacement theory, representing solution in terms of analytical functions

Shallow shells of revolution under axisymmetrical loads, analyzing plasticity and creep by integral equations algorithm

15 p2817 A70-32164

Stability characteristics of elastic shallow shells of revolution in temperature field and under compression, reducing variational equation of bending by Ritz method

15 p2817 A70-32169

Nonlinear dynamic analysis of shells of revolution under symmetric and asymmetric loads, obtaining solutions for shallow cap buckling

16 p2994 A70-34229

Shallow shell finite element of triangular shape, noting application to static problems

17 p3184 A70-34908

Singular solutions to concentrated loads on shallow shell equations with quadratic middle surface

17 p3186 A70-34968

Solutions for normal and tangential displacements and concentrated forces on shallow cylindrical shells

17 p3186 A70-34969

Coupled integral equations for cutouts in shallow shells

17 p3186 A70-34970

Shallow shell theory boundary value problems, calculating stress concentration for domes and shells with holes

17 p3192 A70-35694

Critical load of shallow shell of revolution as function of geometric and material parameters

17 p3192 A70-35717

Dynamic axisymmetrical loading of thin elastic shallow spherical rigidly clamped dome, using variational method

18 p3341 A70-36582

Shallow conical shell stability under uniformly distributed pressure and concentrated force at apex for rigid and free clamping boundary conditions

18 p3341 A70-36589

Shallow spherical shell dynamics nonlinear problems solution with algorithm permitting use of straight lines method

18 p3341 A70-36590

Shallow shell solutions complete with respect to finite simply connected surface region applied to circular cylindrical shells

19 p3547 A70-38396

Stress concentration on isotropic elastic circular cylindrical shallow shell using plane waves and spherical means method, obtaining periodic solution convergence

20 p3719 A70-39385

Shallow shell theory partial differential equations, obtaining integral representations of general solutions

20 p3732 A70-40102

Flexible shallow shell with plastic inhomogeneity due to yield point-fast neutron flux relation, examining stability under uniform load

20 p3734 A70-40437

Donnell-Vlasov shallow shell equations error analysis

20 p3734 A70-40441

Stresses around circular hole in shallow conical shell under torsional load, using perturbations in parameters for curvature and cone angle

21 p3934 A70-40779

Infinite plates and shallow shells stability under doubly periodic surface loadings, using nonlinear analysis

24 p4421 A70-45283

Shallow arch clamped at ends and subjected to uniform lateral load, deriving nonunique equilibrium stability states

24 p4426 A70-46038

SHANKS

U JOINTS (JUNCTIONS)

SHANNON INFORMATION THEORY

U INFORMATION THEORY

SHAPED CHARGES

Pentolite spherical charge gaseous explosion products expansion into vacuum, using Taylor similarity solution for flow in detonation wave

15 p2774 A70-31764

SHAPES

NT CONVEXITY

NT ELLIPTICITY

NT LINE SHAPE

NT ROSETTE SHAPES

NT T SHAPE

Curved cylindrical panel flutter in presence of uniform compressive load, taking into account relationship between actual and ideal shape

01 p0202 A70-10946

Shape optimization of elastic rod compressed by force directed toward point on undeformed rod axis, deriving optimal bending line

05 p0937 A70-16373

Test specimen shapes for determining tensile, compressive and edge-wise shear properties of reinforced plastic laminates

08 p1529 A70-21878

Optimizing shape of elastic bar compressed by polar force obtained by determining functional extremum representing volume of bar at constant critical force

09 p1769 A70-22252

Heat treatment induced shape distortions measurements in maraging steel bars, plates and sheets, noting dependence on number of anneals and product form

14 p2595 A70-30544

Shadow moire method for comparing diffusely reflecting component against holographically recorded master shape, noting turbine blade measurement

17 p3088 A70-35025

Stiffness matrix correction for curved element deficient in rigid body motion

18 p3342 A70-36687

Electromagnetic field amplitude and phase scattering diagrams analysis for shape information capacity

21 p3785 A70-40637

SHARING

U COORDINATION

SHARP LEADING EDGES

Leading edge suction analogy for predicting low speed lift and drag-due-to-lift characteristics of sharp edge delta and related wing planforms

[AIAA PAPER 69-1133] 01 p0002 A70-10607

Convective heat transfer rates measured on cooled sharp leading edge flat plates at various angles of attack in hypersonic merged flow

[ASME PAPER 69-WA/HT-21] 04 p0614 A70-14813

Finite difference analysis of partial differential equations derived from Navier-Stokes equations in hypersonic leading edge problem in merged gas flow-layer regime

06 p0980 A70-18349

Nitrogen hypersonic transitional flow at adiabatic sharp flat plate leading edge, presenting density, flow-field shape and local rotational temperature for various regions

06 p0982 A70-18361

Surface pressures and shock wave shapes on sharp flat plates and wedges in rarefied hypersonic transition flow with emphasis on merged layer regime

06 p0982 A70-18362

Surface temperature effects on low Reynolds number hypersonic shock layer development over flat plate sharp leading edge

06 p0982 A70-18364

Continuum to free molecule hypersonic flow near flat plate sharp leading edge, studying Knudsen, Reynolds and Mach numbers effects

06 p0982 A70-18365

Kinetic theory applied to model of interaction between two gas flows colliding at sharp leading edge at different hypersonic speeds

10 p1800 A70-24139

Low Mach number aerodynamic sound generation by turbulent flow at sharp edged thin scattering half plane solved with Green function

10 p1802 A70-24521

Flow near leading edge of sharp insulated and cooled flat plates, using Monte Carlo direct molecular simulation

11 p1975 A70-25968

Electromagnetic field singularities near sharp edge relating to geometry scatter using for treating singularities in current distribution integral equations

12 p2183 A70-26977

Hypersonic near free molecule flow over flat plate with sharp leading edge, using linearized kinetic B-K-G equation for small thermal accommodation coefficient

15 p2673 A70-32796

Aerodynamic characteristics of thick sharp edged cropped delta and gothic wings, giving low lift-dependent drag

19 p3353 A70-38615

Slender wings of low aspect ratio and sharp leading edges, predicting inviscid maximum lift

21 p3743 A70-40585

SHATTERING

U FRAGMENTATION

SHEAR

Observational errors effects on surface waves resolution, describing shear velocity determination in crust and mantle from observed waves

16 p2897 A70-33647

SHEAR CREEP

Monograph on shear lag measurement in rectangular section beam subjected to bending or torque free from axial restraint, using inductance probe sensors

03 p0603 A70-14351

Flat plates thermal buckling calculations with allowance for transverse shear deformation effect, using Rieissner variational principle

04 p0773 A70-15091

Free in-plane flexural vibrations of circular rings, developing equation of motion to include shear deformation and rotatory inertia effects

08 p1592 A70-21473

Novozhilov complex transformation method extended to Timoshenko theory of elastic shells constructed with allowance for transverse shear deformation

21 p3941 A70-42237

SHEAR DISTURBANCES

U S WAVES

SHEAR FATIGUE

U SHEAR STRESS

SHEAR FLOW

Pitot tube measurements of mixing zone of turbulent shear flow, discussing velocity gradient effects

01 p0066 A70-11134

Nonlinear waves in parallel shear flows, discussing laminar flow breakdown due to free stream disturbances

02 p0277 A70-11876

Energy reversal zones in turbulent shear flows with asymmetric mean velocity distribution, implying zones of opposing shear

02 p0279 A70-12228

Integral method for turbulent shear flow based on momentum and moment-of-momentum equations and Cole velocity profile family, determining shear stress integral

02 p0282 A70-12329

Governing equations determined for turbulent boundary layer and quasi-parallel turbulent shear flows, taking into account effects of convection, diffusion, pressure, etc

02 p0285 A70-12348

Wave packet dynamics recapitulation and tentative application to turbulent shear flow

02 p0287 A70-12362

Shear velocity variation with depth in upper mantle for Basin and Range province of western North America, using S waves measurements

02 p0292 A70-12505

Statistical model of turbulent chemically reacting shear flows, analyzing wave number fluctuations effect and Couette flow

03 p0464 A70-12928

Shear moduli and lattice parameters effect on screw dislocation equilibrium in bimetallic medium of soft and hard phases

03 p0587 A70-13117

Velocity structure associated with motion of interface between turbulent and nonturbulent fluid at turbulent boundary layer edge, considering shear flows

03 p0470 A70-14240

Couette problem for Krook kinetic equation solution, considering shear stress variation at high plate velocities

04 p0672 A70-15228

Shear-dependent nearly isotropic turbulence energy spectrum theory, considering effects of viscous loss, shear production and inertial and velocity gradient transfer

04 p0674 A70-15520

Rotta differential equation for turbulent boundary layer flow with fixed profiles of length scale, shear stress and kinetic energy

06 p1035 A70-17694

Conservation equation for thermal energy in turbulent shear flow, including turbulence kinetic energy equation terms

[WSCI PAPER 69-43] 06 p1179 A70-17983

Shear generated atmospheric clear air turbulence growth and dependence on atmospheric instabilities calculated numerically by invariant model

[AIAA PAPER 70-55] 06 p1098 A70-18031

Aerodynamic forces for boundary layer profiles of flexible plate under transient motion in shear flow using computer programs

[AIAA PAPER 70-76] 06 p0972 A70-18122

Rarefied gas shear flow over infinite plane wall, using Boltzmann-Krook-Welander equation to determine compressibility effect on Knudsen layer

06 p1048 A70-18327

Turbulent shear flow kinematic characteristics determined by photographic method and flow visualization using vortex model

07 p1259 A70-19827

Viscoelasticity in shearing and accelerative flows by integral theory, discussing stress distribution and pressure drop

07 p1412 A70-20000

Turbulent Prandtl number and eddy viscosity distribution in thermally stratified turbulent boundary layer of air shear flow dependent on wall distance and thermal stability

08 p1599 A70-21581

Sheared frontal zones structure and stability, studying Richardson number limiting role in free atmosphere

08 p1492 A70-21971

Stably stratified atmospheric turbulent shear flow governing spectral equations asymptotic solutions for buoyancy subrange

09 p1659 A70-22372

Turbulent jet injection from circular opening into unbounded transverse shear flow, determining velocity distribution along axis

09 p1659 A70-22427

Shear flow of inviscid incompressible fluid past sphere, calculating secondary vorticity and upstream velocity distribution

09 p1664 A70-23680

Landau damping and stability of low density crossed field electron beams using analogy with inviscid shear flows

10 p1918 A70-23964

Plasma stabilizing effect of shear and magnetic flux minimum in asymmetric conductors and currents in helical stellarator winding

11 p2088 A70-25711

Shear flow near walls through cascade of untwisted blades, observing variation in lift coefficient across span

11 p1975 A70-25788

Nearly homogeneous turbulent shear flow for flow field structure, determining pressure/velocity tensor using wind tunnel

11 p2039 A70-26530

Momentum transport bounds in turbulent shear flow using variational methods

11 p2039 A70-26535

Nonlinear viscoelastic turbulence model with monotone increasing time scale to predict behavior in homogeneous shear and in pure strain

11 p2040 A70-26544

Complex viscosity relationship to steady state shearing in Maxwell Orthogonal Rheometer

11 p2041 A70-26560

Turbulent shear flow energy spectrum theory for unstratified fluid with arbitrary eddies-mean velocity gradient interaction

12 p2214 A70-28364

Crack extension by alternating shear indicated from slip line flow field comparison at sharp crack tip and blunted crack

13 p2432 A70-28606

Turbulent shear flow direct interaction equations simplification to differential equations amenable to computation

13 p2389 A70-29463

Cylinders and airfoils drag tests and simulation in two dimensional sheared flow, considering shapes optimization

13 p2342 A70-29893

Lower stratosphere temperature and wind periodic variations associated with shear flow gravity waves

14 p2601 A70-30124

Similarity and scaling between atmospheric and wind tunnel simulated shear flows near earth surface

14 p2602 A70-30369

Low aspect ratio wing aerodynamic characteristics in shear flow, noting forces dependence on flow velocity gradients

14 p2529 A70-31274

Viscometric Poiseuille or Couette flow kinematics, considering nonuniform shear rate

14 p2567 A70-31282

Shear flow turbulence effect on chemical reactions, considering two dimensional low speed turbulent mixing layer between high velocity cold gas and air at rest [AIAA PAPER 70-721]

16 p2855 A70-33493

Diffusion flame development in homologous turbulent shear flow, investigating flame structure and chemical reaction by statistical theory

16 p2997 A70-33499

Normalized Reynolds stress tensor in upstream region of fully developed turbulent shear flow as function of position, using inviscid linear model [ASME PAPER 70-FE-2]

16 p2891 A70-33626

Shear flow perturbations in inviscid incompressible stratified fluid of given density, comparing stability characteristics with jet flow

16 p2895 A70-34243

Turbulent shear flow asymptotic theory, discussing channel, pipe and two dimensional boundary layers

16 p2895 A70-34244

Electrostatic probe measurements of vortex streets growth in plasmas bounded shear flow [AIAA PAPER 70-758]

17 p1319 A70-34493

Turbulent gas flows shear turbulence structure at various Reynolds numbers in nonconducting channels with and without heat transfer under transverse magnetic field

17 p3141 A70-35245

Variational principle for turbulent shear flow between parallel plates, taking into account isothermal flow and Malkus theory

17 p3073 A70-35595

Aerofoil section characteristics in shear flows of arbitrary velocity profile calculated by Glauert image method

18 p3205 A70-35957

Turbulent shear flow velocity and kinetic energy distributions in tunnel

18 p3241 A70-36383

Initial condition effects on weak homogeneous turbulence with uniform shear, studying energy transfer and dissipation

19 p3403 A70-37537

Stability of thermal and inertial perturbations superimposed on unstably stratified plane parallel flow with variable vertical shear

19 p3462 A70-37753

Steady two dimensional incompressible shear flow, correlating velocity profiles with resistance distribution

19 p3406 A70-38350

Small viscosity and heat conductivity in solutions to critical layer in stratified shear flow

20 p3608 A70-39447

Trajectory equations for plane and three dimensional gas jets with arbitrary injection hole shapes in subsonic shear flow

22 p3960 A70-43365

Shear flow distribution equations in prismatic shells under constant shear loading

23 p2465 A70-43891

Miles-Howard theorem extension to gravitationally stratified compressible fluid containing parallel shear flow, considering stability against adiabatic perturbations

23 p4179 A70-43976

Rotational two dimensional steady shear flows of perfect incompressible fluid, considering channel flow characteristics for various wave modes

23 p4181 A70-44202

Laminar boundary layer wall shear and velocity profiles by N parameter integral method, using exponential

23 p4182 A70-44567

Inertia effects and suspension rheology for incompressible Newtonian fluid shear flow around neutrally buoyant rigid sphere

24 p4327 A70-46243

Two point hydrodynamic equation for molecular fluctuations divergent growth in classical shear flow via B-B-G-K-Y procedure and double series moment expansion

24 p4382 A70-46254

SHEAR LAYERS

Incompressible inviscid free shear layer stability with respect to spatially growing three and two dimensional disturbances, considering hyperbolic tangent velocity profile

03 p0468 A70-13786

Linearized velocity profiles for turbulent free shear layers using transverse shift and longitudinal motion equation [ASME PAPER 69-WA/APM-28]

04 p0668 A70-14904

Boundary layer momentum integral equations to predict shear layer behavior, developing method to avoid nonphysical constraint appearance [ASME PAPER 69-WA/APM-11]

04 p0669 A70-14916

Reattachment of supersonic jet with turbulent shear boundary layer abruptly expanding into axisymmetric parallel diffuser, using surface flow technique

04 p0619 A70-15323

Steady MHD shear layer velocity profiles using hot film anemometry

05 p0887 A70-15924

Supersonic flow separation over rearward facing step, measuring upstream boundary layer, lip shock and shear layer formation by pitot probe and surface pressure survey

06 p0973 A70-18153

Projectile penetration of Al alloys, noting melting during intense shear band formation

08 p1522 A70-21710

Dynamic shear modulus and depth of dominant layer of vibrating elastic medium, assuming foundation as isotropic stratum on rigid bed

10 p1957 A70-24481

Vibration equations for closed and open sandwich cylindrical shell with thickness-shear deformation in core and face layers compared with membrane theory

11 p2145 A70-26697

Mathematical model for describing flow in Hele-Shaw cell, predicting attached viscous shear layers in lifting body wake

13 p2338 A70-28818

Laminar incompressible free shear layers by method of weighted residuals for turbulent jets, obtaining velocity profiles for similarity and physical planes

20 p3613 A70-40286

SHEAR PROPERTIES

NT SHEAR STRENGTH

Fatigue crack propagation in metals exhibiting initial crystallographic shear mode followed by noncrystallographic tensile mode

01 p0198 A70-10101

Elastic orthotropic fiberglass reinforced plastic shells stability under axial compression, analyzing shear modulus influence

04 p0712 A70-14490

Shear modulus of sandwich structure tubular core derived by virtual work principle and matrix approach, comparing results with honeycomb core [DGLR-69-64]

04 p0774 A70-15156

Effective wave propagation velocities, bulk and shear moduli of elastic heterogeneous solids approximated by self consistent method

04 p0777 A70-15496

Shear testing and data reduction based on torsion analysis to obtain elastic shear constants of thin orthotropic Be sheets

04 p0664 A70-15552

Neutral sheet instabilities in magnetotail from collisionless plasma instabilities from shear magnetic field

05 p0887 A70-15911

Relativistic simple shear of slab of neo-Hookean material

05 p0929 A70-16067

Antiplane strain deformation problems concerning crack extension along circular interface separating materials with different shear moduli

05 p0931 A70-16091

Tensile and shear properties of blind fixed, blind floating and through types of bonded sandwich inserts, noting geometry and temperature effects

07 p1401 A70-18934

Internal friction and shear modulus of Co under dynamic and steady state conditions, discussing peak at alpha-epsilon transformation

07 p1306 A70-19073

Three dimensional finite element method for quasi-homogeneous laminate moduli, discussing interlaminar and in-plane shear properties

07 p1321 A70-19966

Shear and rotation limits on universe from X ray background, using Euclidean shear and vorticity models with open and closed geometries

08 p1561 A70-20901

Test specimen shapes for determining tensile, compressive and edge-wise shear properties of reinforced plastic laminates

08 p1529 A70-21878

Test methods for evaluating tensile, compressive, interlaminar shear and bearing strength properties of carbon yarns and flat and tubular composites

08 p1529 A70-21881

Split ring load test method for determining shear modulus of isotropic and composite materials

08 p1530 A70-21888

Rotatory inertia and shear deformation effects on structural vibrations of Timoshenko beams and frameworks using matrix formulation

09 p1770 A70-22257

Fiberglass reinforced plastic laminates shear characteristics determination, giving expressions for shear modulus and tangential stress

09 p1709 A70-22300

Free vibrations of plates and beams of pyrolytic graphite type materials, analyzing transverse shear deformation and rotary inertia [AIAA PAPER 69-55]

09 p1780 A70-23210

Contact stresses in elastic half plane with boundary connected to rod and moment applied at arbitrary point

10 p1965 A70-25324

Resonant frequencies and Young/shear moduli of unidirectional graphite epoxy composite beams under high modes of vibration

11 p2136 A70-26082

Shear buckling and uniaxial compression dependence on mechanical properties of clamped orthotropic plates, using Ritz method to compute bifurcation type loads

12 p2326 A70-27817

Cylindrical shells stability under axial compression by two dimensional Kirchhoff-Love applied theories, calculating critical stresses

12 p2328 A70-28282

Tantalum single crystals elastic constants temperature dependence, considering compressibility and shear properties

14 p2596 A70-30841

Human skull porous dipole layer shear and compressive properties, measuring static and dynamic strain rates

15 p2683 A70-32308

Composite beam testing concepts and interpretation under three and four point loading, noting shear deformation effect

16 p2989 A70-33385

Shear coupling effect in cylindrical bending of anisotropic composite laminates

17 p3182 A70-34558

Optimum fiber orientation for minimum weight boron/epoxy shear panel design

17 p3182 A70-34562

Longitudinal shear modulus of unidirectional fibrous composite, involving series solution of Laplace equation

17 p3183 A70-34564

Band structure contributions to elastic shear constants of hexagonal close packed metals, using optimized model potential

21 p3839 A70-40600

Unidirectional fiber reinforced composite longitudinal shear deformation, deriving effective shear modulus

22 p4060 A70-43681

Thin metal matrix composite rods elastic properties, examining Al-W system by Young and shear modulus measurements

22 p4061 A70-43687

SHEAR STRAIN

Unidirectional composite materials properties, discussing stiffer filaments effect on Young modulus and shear coupling constant relating shear strain to longitudinal strain

03 p0587 A70-13128

- Cylindrical two layer shells stability under compression and radial pressure, calculating compression and transverse shear strains in carrying layer and filler
03 p0592 A70-13443
- Shell shear strain determined by expanding displacement vectors into covariant power series of distance from middle surface
[DFVLR-SONDDR-23] 05 p0955 A70-17078
- Isotropic shells with shear deformations, investigating stress-strain relations in Cosserat continuum applied to plates
[DFVLR-SONDDR-23] 07 p1404 A70-19233

- Adhesion characteristics in composites, investigating correlation between short beam and torsion shear tests in glass and graphite reinforced epoxy materials
08 p1531 A70-21892
- Laminated anisotropic rectangular plates of boron-epoxy composite material, studying shear stability by potential energy and Ritz method
08 p1595 A70-21903
- Failure mode in shear loaded graphite filament reinforced epoxy composites dependent on interfacial bond strength
08 p1533 A70-21915
- Al-B composites mechanical properties, using heat treatments and transverse steel wires to increase matrix shear and transverse tensile strengths
09 p1701 A70-22551
- Thin shell design for minimum bending stresses and transverse shear for composite materials with low interlaminar shear strength
11 p2141 A70-26490
- Pulsars starquakes frequency relationship to solid crust shear strength based on Ruderman model, considering Crab Nebula
12 p2310 A70-27998
- Wool felt based carbon and graphite composite materials for orthogonally isotropic high shear strength compared with rayon felt based composites
13 p2437 A70-28776
- Stress rupture shear strength of fiberglass reinforced plastics under monotonic, prolonged and cyclic loading
15 p2766 A70-32853
- Shear and tensile joint strength measurements at fiber-polymer matrix interface, using pull-out test and debonding methods
16 p2937 A70-33372
- Ti explosive bonding and forming, examining peel and shear strengths on Ti clad steel plate
17 p3098 A70-34446
- Adhesive bond between steel wire and epoxy resin, investigating hydrostatic pressure effect on shear strength
17 p3123 A70-34623
- Unidirectional carbon fiber reinforced plastics /CFRP/ interlaminar shear strength measurements using short beam shear, notch overlap and solid rod torsion methods
20 p3653 A70-39203
- Graphite filament composite structure shear strength decrease with modulus increase, examining fiber microstructure effect on interlaminar properties by short beam shear test
20 p3654 A70-39206
- Hydraulic fluids and lubrication oils resistance to mechanical shear forces by ultrasonic method based on acoustically induced cavitation effects
20 p3655 A70-39718
- Composite material engineering problems, discussing tensile, compressive and shear strengths, design approaches, unidirectional properties and substance characterizations
20 p3651 A70-40027
- Directional dependence of elastic shear stiffness on cubic axes for Si, Cu and Mo, making polar plots of shear stiffness coefficients
21 p3850 A70-41909
- Internal friction and shear modulus of thin glass fibers of sodium silicate, aluminosodium silicate and nonalkaline aluminoborosilicate
22 p4059 A70-43135
- Graphite and carbon fiber surfaces, correlating Raman spectrum and shear strength of composite
22 p4060 A70-43680
- SHEAR STRESS**
- NT TORSIONAL STRESS**
- Elongation and combined shear stresses in incompressible creeping plane flows of viscoelastic lubrication for squeeze-film bearings
[ASME PAPER 69-LUB-22] 01 p0101 A70-10385
- Moments and shear forces in plate flexure represented by single valued stress functions of position, stating variational principle for compatibility
01 p0201 A70-10931
- Nonlinear dynamic beam response for classical and shear deformation theories, comparing stresses and deflections using traveling wave approach with finite difference schemes
01 p0206 A70-11147
- Growth rate and shear stress parameter of symmetric, turbulent, two dimensional and axisymmetric self preserving wakes and jets in streaming flow
02 p0223 A70-11861
- Integral method for turbulent shear flow based on momentum and moment-of-momentum equations and Cole velocity profile family, determining shear stress integral
02 p0282 A70-12329
- Turbulent boundary layers behavior prediction by strip integral momentum equation method, considering velocity profiles and shear stresses
02 p0282 A70-12332
- Extended mixing length method for computing turbulent shear stress distribution required in calculating two dimensional incompressible turbulent boundary layer
02 p0282 A70-12333
- Turbulent boundary layer development calculation by shear work integral method involving Reynolds number introduction procedure
02 p0283 A70-12336
- Shear stress transport equation derivation from turbulent energy equation based on properties of turbulent velocity fluctuations
02 p0284 A70-12346
- Three dimensional turbulent boundary layers on high aspect ratio bodies /swept wings/, discussing shear stress direction determination
02 p0286 A70-12354
- Static and cyclic stress distributions in buckling shear panel comprising flat plate of clad Cu-Al alloy
02 p0388 A70-12497
- Interlaminar shear stress and fabrication of high modulus graphite-reinforced epoxy matrix composites
03 p0515 A70-13119
- Microstructure of turbulent jet in concurrent flow, analyzing wake parameter and measuring profiles of pulsation velocity components and Reynolds shear stresses
03 p0409 A70-13871
- Stress distribution of thin walled structure of open section, considering warping and torsional bending, using calculus of variations
03 p0596 A70-14030
- Swenson shear fatigue crack model expanded to include mean stress effect on cyclic shear crack growth
[ASME PAPER 69-WA/APM-8] 04 p0772 A70-14918
- Fatigue crack incremental propagation under cyclic shear loading, developing discrete dislocation model for crack and plastic zones
[ASME PAPER 69-WA/APM-7] 04 p0772 A70-14919
- Couette problem for Krook kinetic equation solution, considering shear stress variation at high plate velocities
04 p0672 A70-15228
- Heat fluxes, shear stresses and pressures distribution at spike on body in supersonic flow from asymptotic solutions of Navier-Stokes equations
04 p0673 A70-15232
- Stress distributions in infinite elastic solids for shear loadings prescribed over coplanar circular regions, solving integral equations iteratively for coplanar penny-shaped cracks
05 p0928 A70-16057
- Geometrically linear anisotropic shell deformation under transverse shear applied to stability analysis of orthotropic shells of revolution sustaining axisymmetric stresses
05 p0933 A70-16212
- Static-geometric analogy of Kirchhoff-Love shell theory applied to Timoshenko complex equations allowing for transverse shear deformation
05 p0934 A70-16219
- Razor blade calibration and measurement of wall jet flow shear stress in turbulent boundary layer with secondary injection
05 p0833 A70-16504
- Static buckling load for beam with pinned ends and Wiegardt-type elastic foundation, considering shear stresses effect
05 p0955 A70-17105
- Modulus of rigidity and stress-strain state measured in square plate during shear produced by twisting
06 p1060 A70-17132
- Free molecular drag for flat plate with normal protuberance, determining flowfield distribution functions and stress components
06 p0981 A70-18357
- Cantilever cylindrical shell stability under shearing stresses created by transverse force applied to free end
07 p1403 A70-19116
- Blood-endothelial surface shear stress in artery inlet, considering asymmetric and radially symmetric plugging effects
07 p1220 A70-19248
- Elastic fields in bimaterial plate under uniform compressive and anti-plane shear loadings, finding stress distribution and induced interfacial shear stresses
07 p1412 A70-19957
- Geometrical-mechanical properties in terms of interlaminar shear stress of composite cantilever beams under end load
07 p1412 A70-19965
- Shear stress distribution in metal adhesive joints, discussing methods for calculating
08 p1504 A70-20892
- Shear stress in thick cylindrical closed shells subjected to plastic torsion determined from displacement distribution over thickness and generatrix
08 p1588 A70-21182
- Static pressure gradient influence on turbulent shear stresses and energy production in asymmetric wall jet flow
08 p1484 A70-21314
- End plugs bending moment and shear loads reduction during compression tests of composite orthotropic cylinders
08 p1594 A70-21889
- Fibrous reinforced composites influence in aircraft structural design based on DOD industry development programs, investigating interlaminar shear
08 p1595 A70-21899
- Calibration of shear sensitive cholesteric liquid crystals film, measuring shearing forces and scattering light intensity
09 p1656 A70-22992
- Gamma prime phase structure ordering effect on critical shear stresses of aging Ni-Al alloys and nimonic
09 p1707 A70-23195
- Turbulent three dimensional incompressible wall jets issuing into quiescent air ambient, tangent to and at surface of flat plate, investigating shear stress and flow field
09 p1661 A70-23215
- Irreversible viscosity decrease and thermal stability in polymer-containing lubricating oils under shearing forces effect
09 p1693 A70-23408
- Power-law stress-strain relation in plastic complex stressed state, showing identical strain hardening curves for shear and tension
10 p1957 A70-24280
- Lines of influence of bending moments and cutting force for straight beam using differential equation integration
10 p1959 A70-24777
- Wall shear stress distribution in rectangular ducts, discussing secondary currents and main flow prediction
11 p2035 A70-25779

Transient bending and shear stresses at clamped support of orthotropic circular cylindrical shells

11 p2135 A70-25985

Pressure gradient, wind structure and shearing stress in atmospheric boundary layer related by formulation based on quasi-parallelism and boundary condition at Ekman layer top

11 p2076 A70-26071

Interlaminar shear stresses analysis for laminated composites under generalized plane stress

11 p2136 A70-26080

Elastic-plastic shear cracks propagation in two phase composite materials using dislocation model, determining critical fracture strength

11 p2136 A70-26081

Air and salt water tensile and shear mode cracking of titanium alloy sheets examined with electron fractographs

11 p2067 A70-26099

Stress concentration around elastic spheroidal inclusions in isotropic elastic body under shear

11 p2140 A70-26483

Fiber reinforced composites under longitudinal shear loading, noting orthotropic nature and shear moduli assuming circular fibers

11 p2141 A70-26489

Elastic wedge under spatially uniform but time dependent shear tractions, studying shear stress and transient wave propagation

11 p2142 A70-26629

Mechanical properties in solids under dynamic incremental shear loading, discussing wave propagation tests on steel, Cu and Al

11 p2143 A70-26669

Wall shear stress distribution in noncircular ducts with steady incompressible fluid flow

12 p2209 A70-27217

Stress and strain in matrix of fiber reinforced material within elastic region, calculating interface shear stress for rectangular fiber

12 p2322 A70-27231

Secondary crack growth direction from preexisting crack under longitudinal shear loading

13 p2510 A70-28674

Preston tube errors in pipe flow wall shear stress determination due to velocity distribution deviations

13 p2387 A70-28848

Stress concentration coefficient around hole in isotropic nonlinear plate under shear, reducing solution to integrating fourth order differential equation

13 p2516 A70-29510

Computerized analysis of shear failure at initial fragment collision during trifragment rotor disk interaction with containment rings

14 p2563 A70-30870

Stress distribution in anisotropic cylindrical shell due to shearing force varying linearly and quadratically with depth on inner boundary

14 p2658 A70-30994

Incompressible turbulent boundary layer calculation based on shearing stress hypothesis, considering layer at flat plate, boundary conditions and velocity profiles

15 p2719 A70-31490

Energy dissipation during independent flexural-torsional vibrations of rods, noting alternating shear stress superposition effect on damping

15 p2813 A70-31530

Double ended dislocation pileups and elastic cracks at bimaterial interface under screw, edge and shear modes

15 p2756 A70-31561

Core shear deformations effects on stress, deflection and buckling load calculations for sandwich panels

15 p2815 A70-31931

Riemann-Hilbert problem for discontinuous coefficient solving mixed boundary value problems in infinite elastic strip, discussing shear stress along whole boundary

15 p2822 A70-32355

Shear stress distribution in axially nonuniform circular shaft subjected to torsion, using finite difference approximations

16 p2988 A70-33001

Optimum filament orientation for maximum strength in composite with combined normal and shear stresses

17 p3183 A70-34563

Failure prediction for interlaminar shear stress in filament wound rectangular plate

17 p3188 A70-35228

Axisymmetric mixed boundary problem for elastic infinite cone, obtaining solution by assuming zero shearing stresses

17 p3192 A70-35698

Energy dissipation in material under complex vibrations, noting role of summary shear stress

19 p3535 A70-37347

Fiber reinforced materials with oriented armoring, calculating stress strain state under transverse shear

19 p3454 A70-37348

Velocity distribution and shear stress measurements in three dimensional turbulent boundary layer approaching separation

19 p3405 A70-38021

Continuum bodies strain subjected to shearing stresses in incremental form based on slip theory of metals plasticity

19 p3549 A70-38668

Shear stress and velocity profiles in three dimensional mixing layer between grazing perpendicular streams

20 p3608 A70-39356

Polymeric materials yielding and fracture behavior under uniaxial and multiaxial fields, plotting octahedral shear stress

20 p3656 A70-39949

Turbulent shear stress correlation with turbulent kinetic energy for wake and circular jet flow conditions

20 p3613 A70-40277

Longitudinal shear crack propagation in random internal stress field, examining quasi-brittle rupture theory and cyclic loading

20 p3733 A70-40396

Wall jet turbulent flow regions with shear stress and mean velocity gradient of opposite sign, considering theoretical explanation

20 p3615 A70-40501

Brittle elastic material with wedge shaped void, calculating shear stresses during crack propagation generated by horizontally polarized shear wave

21 p3932 A70-40547

Impurity dependent critical resolved shear stress of magnesium oxide single crystals, using compression testing

21 p3862 A70-41910

Crack propagation in antiplane shear by opening semipenny shaped cracks straddling front at 45 deg

21 p3940 A70-42035

Turbulent heat/mass transfer from solid boundary with shear stress dependent on wall distance for various Schmidt or Prandtl numbers

21 p3953 A70-42088

Linear corrections formulas for shear stress and heat transfer coefficients associated with boundary layer blowing in binary gas mixture

21 p3748 A70-42207

Atmospheric environment effect on residual shear stress corrosion cracking of commercial Al-Zn-Mg alloys subjected to heat treatment regimes

22 p4052 A70-42307

Mechanical properties and internal stress fields in composite materials reinforced by glass fibrous filler under transverse shear

22 p4061 A70-43724

Two dimensional turbulent wake theory, considering shear stress and velocity distribution behind flat plate and circular cylinder

23 p4134 A70-44575

Finite beam element in bending, deriving shear deflection terms in stiffness matrix based on stress assumption

23 p4274 A70-44909

Rarefied gas plane Couette flow, calculating upper and lower bounds on shear stress

24 p4325 A70-45600

SHELL STABILITY

Axially compressed cylindrical shells with edge constraints, determining critical load from inelastic behavior considerations

01 p0205 A70-11141

Thin shells of revolution torsional vibration including bending terms and thickness considerations

01 p0205 A70-11142

Thin elastic shells parallel surface nonlinear tangential strains derived in terms of midsurface tangential and bending strain components

01 p0205 A70-11143

Thick walled incompressible hyperelastic dielectric sphere periodic oscillations, noting dielectric properties influence on amplitude and period

01 p0209 A70-11386

Plates and shells natural oscillations frequencies and modes, analyzing variational, asymptotic and numerical methods

01 p0210 A70-11412

Natural oscillation frequencies of closed circular orthotropic cylindrical shells having freely supported end faces, particularly with stringers

01 p0210 A70-11413

Carrying capacity of shells of revolution obtained with threads spun around metallic shell, including stresses during spinning process

01 p0210 A70-11414

Fiberglass reinforced plastic shells stability analysis, assuming weak shear resistance of shell material

02 p0390 A70-12808

Orthotropic cylindrical shell with initial deflection under long term effect of external hydrostatic pressure, solving bending problem

02 p0390 A70-12809

Internal hydrostatic or lateral pressure effect on deformations of infinitely long thin cylindrical isotropic shell subjected to equal concentrated radial loads

03 p0584 A70-12922

Cylindrical shells buckling under biaxial compression and transverse loads, examining critical loads dependence on shell parameters, end conditions and elastic properties

03 p0590 A70-13380

Cylindrical two layer shells stability under compression and radial pressure, calculating compression and transverse shear strains in carrying layer and filler

03 p0592 A70-13443

Natural oscillation frequencies of partially liquid-filled cylindrical shells determined by resonance method

03 p0592 A70-13444

Axial compressive forces influence on steel and Al cylindrical shell stability under external pressure

03 p0593 A70-13472

Rib-reinforced rectangular plate flutter in gas flow, considering shell stability, rib torsional rigidity, etc

03 p0593 A70-13498

Nonlinear flexural vibration properties of thin circular cylindrical shells with simply supported ends assuming deflection mode

03 p0594 A70-13549

High speed photography for instability onset and subsequent buckling process in photoelastic circular cylindrical shells under axial compression

03 p0594 A70-13659

Stress-strain state of arbitrarily cracked cylindrical shell under symmetric and asymmetric loading

03 p0594 A70-13736

Radial vibration of cylindrical shell of transversely isotropic material determined using finite Hankel transform

03 p0595 A70-13904

Thin shells of revolution plastic collapse under axisymmetric loads on basis of Tresca-Nakamura yield criterion, using computer algorithm

03 p0598 A70-14238

Far nonlinear postbuckling behavior of noncircular cylindrical shell under axial compression

03 p0598 A70-14241

Natural oscillations and flutter of three layer cylindrical shell in supersonic gas flow analyzed by semimomentless theory, discussing boundary value problems, damping effects, etc

03 p0600 A70-14301

Elastic orthotropic fiberglass reinforced plastic shells stability under axial compression, analyzing shear modulus influence

04 p0712 A70-14490

Natural circular frequencies of small axisymmetric vibrations of shells of revolution of arbitrary shape, using Rutishauser algorithm for eigenvalues

04 p0767 A70-14525

Pressure vessel deformation and stress analysis by matrix displacement method, considering solids and membrane shells under axisymmetric and asymmetric loading

[ASME PAPER 69-WA/PVP-3] 04 p0768 A70-14790

Elastic postbuckling behavior of axially stiffened and barreled cylindrical shells

[ASME PAPER 69-APM-U] 04 p0769 A70-14866

Free vibrations of reinforced elastic shell structures subject to constraints imposed by reinforcing elements, utilizing equivalent models without reinforcing elements

[ASME PAPER 69-WA/APM-25] 04 p0770 A70-14907

Thin orthotropic composite circular cylindrical shells buckling under axial and radial loads, satisfying end boundary conditions for clamped and simply supported shells

[ASME PAPER 69-WA/APM-21] 04 p0771 A70-14910

Stress analysis of shell loaded at free edge by concentrated forces and moments

04 p0772 A70-14920

Orthotropic axially compressed conical shell stability, evaluating lower critical load and postbuckling state

04 p0772 A70-14921

Thin walled plate simply supported on three edges, studying behavior following local stability loss

04 p0772 A70-14923

Soviet monograph on numerical determination of dynamic characteristics of plates and shells by method

of summary representations, covering oscillation and stability problems

Spherical shells axisymmetric equilibrium properties under uniformly distributed external compression

Initial deflection effect on elastic cylindrical shell stability under compression, finding critical load by determining limiting point in successive loading

Piston theory application to plates and shells stability in supersonic gas flows, considering critical velocities determination for asymmetric flows and oscillations

Thermal buckling of elliptic cylindrical shells assuming tangential temperature, constant axial pressure and conservation of elastic properties

Principal instability region of hinged cylindrical shell under dynamic loading

Clamped and simply supported shallow spherical shells buckling using computer programs

Circular cylindrical shells with axisymmetric imperfections tested under axial compressive load, studying imperfection amplitude and wavelength effects on minimum buckling load

Buckling of toroidal shells with reasonably uniform thickness distribution manufactured by casting epoxy resin material

Thin cylindrical circular shell and three layered plate, analyzing vibration and stability due to loads and temperature

Pseudocylindrical concave polyhedral shells proposed from postbuckling configurations analysis, considering rigidity and structural applications

Buckling equations for neutral equilibrium of arbitrary elastic shells specialized to uniformly loaded circular cylindrical shell with accuracy

Carrying capacity and deformation susceptibility of anisotropic fiberglass reinforced conical and cylindrical plastic shells under axial compression

Stability, critical load and strength algorithm for fiberglass reinforced cylindrical plastic shells under external load allowing for shear stresses

Geometrically linear anisotropic shell deformation under transverse shear applied to stability analysis of orthotropic shells of revolution sustaining axisymmetric stresses

Statistical stability of cylindrical fiberglass reinforced plastic shells under axial compression, showing breakdown loads vs radius/thickness ratio

Static-geometric analogy of Kirchhoff-Love shell theory applied to Timoshenko complex equations allowing for transverse shear deformation

Stability of clamped, hinged and elastically supported circular cylindrical shells under critical combined torsional and transverse pressure

Static and continuity equations of equilibrium of axisymmetric and periodic stressed states of rectilinear helicoidal shell derived for elasticity relations

Strain parameters and equilibrium equation of rib-reinforced thin shells, analyzing length, curvature and torsion variations using smooth shell analogy

Buckling of three layer cylindrical shells under steady creep conditions, deriving axisymmetric deformation

Stressed state of shallow spherical shells of revolution undergoing large displacements reduced to Karmann equation, solved by small parameter method

Stability and critical load algorithm for flexible shallow spherical and conical shells of revolution derived from variational equation

Revolving shells local stability developing boundary effect under normal and bending external loads solved by computer program

Shallow spherical shells stability under combined loading, hinging and edge clamping conditions, deriving strain energy expressions

Compressive forces eccentricity influence on circular cylindrical shell stability noting relation to bending moments

Isotropic elastic cylindrical shell stability under combined compressive and axisymmetric local loads, using equilibrium equations for shallow shells

Circular cylindrical shells stiffened by rings and stringers and subjected to periodic axial force, analyzing parametric instability

Asymmetric deformation of shells of revolution with variable thickness solved by asymptotic method in form of higher Fourier series harmonics

Membrane reinforced thin walled cylindrical shells stability as asymmetric contact problem in shell and plate theory

Thin shell buckling stressing maximum applied loads analysis for circular cylindrical shells with imperfect walls under axial compression

Stability analysis of deflected shallow thin walled elastic noncircular conical and cylindrical orthotropic shells using straight lines method

Thin walled cylindrical shells design for axisymmetric impulsive loads, calculating strains due to explosive forming in water

Displacement hybrid finite element models for analyzing shells with distributed loads

Nonlinear postbuckling equilibrium of thin cylindrical shell and axisymmetric buckling pressure of imperfect spherical shell calculated by Rayleigh-Ritz method

Thin walled cylindrical shell stability under stochastic lateral and axial compression loads using Liapunov method

Liquid propellant rocket nozzle configurations maximum stress and stability limits using computer program for composite ring-stiffened shells of revolution

Local axisymmetric dimple imperfection effects on buckling load of circular cylindrical shell under axial compression

Buckling-critical composite shell structures, describing pseudo T-rib stiffening and integrated composite design concepts

Thin circular cylindrical shells elastic equilibrium under loads producing deflection, elongation or contraction described by integrating equilibrium equations with constant coefficient

Stress-strain state equations for axisymmetrically loaded shells of revolution made of materials with variable moduli

Thin walled cylindrical shell stability with hollow filler under distributed external loads, determining critical loads

Conical shells stability under uniform pressure, studying varying thickness influence by variational stress and bending equation

Cantilever cylindrical shell stability under shearing stresses created by transverse force applied to free end

Notched cylindrical shells of nonuniform thickness using two dimensional photoelastic models mounted on elastic foundations

Shallow spherical caps elastic buckling under uniform pressure, considering symmetric and asymmetric deformation modes

Circular cylindrical shells creep buckling under nonuniform external loads, considering thermal effects and initial imperfections

Axially uniform stress and strain in cylindrical shells, discussing Saint Venant torsion and displacement relations

Segmented elastic shells of revolution supported by rings, studying buckling and vibration by matrix method

Plastic deformation of thin flexible axisymmetric shells under load, discussing tensile stresses

Natural vibration frequencies and mode shapes for laminated orthotropic shells of revolution using finite element method

Green matrices construction for joint shells by method of arbitrary constants variation, considering strained state symmetrical with joint lines

Circular cylindrical shells buckling under lateral and hydrostatic pressure using Donnell and Flugge equations, assuming membrane stress state for prebuckling deformation

Truncated conical shells buckling under hydrostatic pressure using Donnell equations, assuming membrane stress state for prebuckling deformation

Limiting equilibrium of axisymmetric shells consisting of alternating reinforcement layers separated by layers of homogeneous isotropic material

Initial perturbation effect of smooth cylindrical shells stability under critical axial compression noting deflection factor

Equilibrium of torque-free cylindrical shell vertically positioned and partly filled with liquid, obtaining solution for biaxial stress

Limiting equilibrium of shells of revolution with different yield points under tension and compression

Rib-reinforced cylindrical shells stability under longitudinal compressive loading, studying stress-strain state using network method

Strain energy method applied to stability analysis of short longitudinally reinforced cylindrical shells under axial compression

Soviet book on free, forced and parametric vibrations of thin walled shells containing liquid, gas and continuous elastic medium

Elastic body with incompressible fluid filled cavities, studying motion and stability by deriving motion equations starting from principle of least action

Rheological factors effect on deformation behavior of thin walled spherical shell made of strongly extensible elastically hereditary material and subjected to internal pressure

Stress-strain state of shells with positive Gaussian curvature under concentrated tangential loads, basing fundamental solution on two dimensional Fourier transform

Dynamic stability of shallow shells, taking into account longitudinal inertial forces and nonlinear geometry

Toroidal metallic shells stability under static loads, determining snap-through pressures in pressure chamber with nitrogen working gas

Rectangular planform shallow cylindrical shell parametric vibrations using method applied to large bending vibrations of plates

Prismatic thin walled shells with box type cross section under torsion using Vlasov variational method in conjunction with transfer matrices

Elastic/perfectly plastic hollow cylinder unloading under monotonic twist during torsion, considering sandhill-membrane analog validity

Circular cylindrical shell supported along generator under arbitrary forces using finite Fourier transform, simplifying results by Euler sum formula

Pairs existence of symmetrical equilibrium forms in nonlinear shallow shell under load applicable to nonshallow shells equilibrium

Eigenfrequencies of thin barrel shaped shells on simple supports, noting correspondence of ratio of radius to shell wall thickness

Cylindrical shells buckling under axial surface tensions using Donnell stability equations

Plastic growth of pressurized shell under cyclic thermal stresses superimposed on steady pressure load, investigating shake down using bending approximation

Temperature fields in cylindrical shell under axisymmetric heating, ensuring optimal stressed state

Algorithm for stress-strain state calculation of nonuniformly heated cylinder weakened by star-shaped cavity

Endurance limit of momentless shells of revolution under uniform internal pressure, deriving differential equations based on aging and creep theories

Layered conical shell creep under axisymmetric load and time dependent temperature field by iterating boundary integral equation

Buckling and postbuckling equilibrium behavior of fiber reinforced cylindrical shell under uniform axial compression

09 p1780 A70-23207

Buckling of elastic cylinders with rectangular cut-outs and reinforcements under axial or lateral loading, using modified Newton method
[AIAA PAPER 69-92]

09 p1780 A70-23208

Shallow rectangular shell panels nonsymmetric nonlinear deflection states computed by finite difference equations iteration, discussing snap-through buckling loads

09 p1780 A70-23209

Plastic buckling of eccentrically stiffened circular cylindrical shells with multiple isotropic layers under combined axial and lateral pressure, deriving stability criterion

09 p1780 A70-23213

Partially loaded clamped plastic shallow spherical caps collapse loads and stress and velocity distributions

09 p1781 A70-23230

Stress distribution in shells of revolution with variable elastic moduli, considering material rigidity and strain state

09 p1781 A70-23286

Elastic cylindrical shells stability under uniform pressure, calculating critical transverse load by finite-difference computer program

09 p1781 A70-23287

Carrying capacity of shallow shells of revolution, determining buckling stress and limiting equilibrium of shells with varying thickness under transverse load

09 p1781 A70-23288

Reinforced cylindrical shells stress-strain state under concentrated longitudinal loads, considering ribs of variable rigidity

09 p1782 A70-23289

Stress concentration at elliptical hole of arbitrary eccentricity in shallow sandwich shells with hard and soft fillers

09 p1783 A70-23385

Contour immobility effect on load carrying capacity of rigid plastic thin shells of revolution, establishing minimum reinforcement value for edge

09 p1783 A70-23388

Cylindrical shell critical load boundaries under uniform external stress and small torsion

09 p1783 A70-23389

Elastic ribs reinforced thin cylindrical shells stress-strain state under arbitrary load distribution allowing for rib spacing discreteness

09 p1784 A70-23590

Lower critical load for shallow rigidly convex shell expression refined by considering effect of rigid clamping of shell edge on buckling boundary deformation

09 p1784 A70-23594

Three dimensional deformation of finite circular cylindrical shell under plane shock wave solved in linear form

09 p1785 A70-23618

Axisymmetric free vibrations of orthotropic cylindrical shell loaded on ends by constant axial force, investigating nonlinear elasticity

09 p1785 A70-23625

Stress distribution in rib reinforced cylindrical shells under concentrated forces calculated using finite difference scheme

09 p1791 A70-23718

Asymmetric deformation of spherical shell by solving homogeneous differential equation in spherical functions, assessing approximation error

09 p1786 A70-23719

Reinforcing ribs eccentricity effect on closed circular cylindrical shell stability using strain energy method

09 p1786 A70-23720

Axial tensile stress effects on stability of cylindrical shell under nonuniform external pressure

09 p1786 A70-23721

Cylindrical shell stability under combined torsion and internal pressure, noting yield point effect on critical load, obtaining buckling-internal pressure relationship

09 p1786 A70-23722

Spherical isotropic shells motion equations solved in terms of associated Legendre functions, considering surface loads and body forces

10 p1953 A70-23876

Solutions existence for nonlinear partial differential equations describing orthotropic and nonlinear shallow shells under loads and temperature effects

10 p1954 A70-24019

Finite deformations of flexible inelastic orthotropic shells of revolution for generalized plastic flow and deformation theories

10 p1955 A70-24079

Eccentricity and clamping effects on stability and critical pressure of ring-reinforced cylindrical shells under internal pressure

10 p1956 A70-24248

Energy dissipation in free oscillations of multilayer shells consisting of alternating rigid elastic layers and soft fillers, deriving equations of motion

10 p1956 A70-24249

Transverse vibrations of rods, plates and shells based on hyperbolic, circular and Bessel functions

10 p1959 A70-24586

Natural frequencies and mode shapes of vibrating shells and shell combinations determined using variational finite difference method in conjunction with Hamilton principle

10 p1961 A70-25056

Forced vibrations of cylindrically curved multispan shell structures, using transfer matrix methods

10 p1962 A70-25062

Rapid expansion of thin walled aluminum alloy cylinders under pulsed magnetic field pressure using high speed streak camera oscillography

10 p1964 A70-25120

Truncated, structurally orthotropic and round conical shell oscillations taking into account reinforcing ribs eccentricity

10 p1964 A70-25195

Homogeneous boundary value problems in stability theory of circular cylindrical shells axisymmetric equilibrium state

11 p2129 A70-25396

Eccentrically stiffened thin circular cylindrical shell stability under torsion emphasizing exact finite formulas derivation

11 p2129 A70-25561

Random displacement fields in thin circular cylindrical shells with initial imperfections under axial compression using statistical analysis

11 p2129 A70-25562

Stability loss in cylindrical shell under axial compression, noting critical load reduction by local axisymmetric depression

11 p2130 A70-25566

Clamping edges effect on critical parameters of cylindrical orthotropic shell under axial compression using undetermined Lagrange multipliers

11 p2130 A70-25567

Shells equilibrium with large plastic deformations, discussing stability under uniaxial/biaxial tension and physical models for material mechanical properties

11 p2130 A70-25569

Tapered spherical shell under constant initial pressure calculated for strength, stiffness and durability on digital computer using numerical algorithm

11 p2134 A70-25846

Load carrying capacity of isotropic rigid-plastic shells of revolution with different yield points under tension and compression applied to spherically coupled cylinders

11 p2134 A70-25932

Characteristic equation roots for circular cylindrical shells deformation under edge load

11 p2135 A70-25960

Stiffened cylindrical shells under internal pressure numerically analyzed based on C-5A fuselage material parameters

11 p2135 A70-25961

Creep deflections and collapse times for supported thin shallow spherical shells under uniform pressure predicted using variational theorem

11 p2135 A70-25963

Initial geometric imperfections effect on buckling and postbuckling behavior of laminated composite cylindrical shells under axial compression, considering reinforcing fiber orientations

11 p2135 A70-25986

Dynamic buckling of shell or arch structure determined from response of two degrees of freedom structure to step load application

11 p2138 A70-26158

Stresses and displacements determinations in spherical shells under concentrated loads, considering transverse shear deformation effect

11 p2139 A70-26347

Buckling load calculations for axially compressed circular cylindrical shells under relaxed boundary conditions

11 p2140 A70-26484

Cylindrical shells plastic flow buckling under radially inward impulsive loading, showing mode number dependence on shell length

11 p2140 A70-26486

Stability analysis of ring-stiffened orthotropic, multilayered shells of revolution under axisymmetric torsionless loads by digital computer

12 p2320 A70-27143

Shells of revolution under combined thermal and mechanical loading, presenting analytical basis of BOSOR 3 digital stress analysis program

12 p2320 A70-27144

Thermal buckling theory for multilayered stiffened cylindrical shells under various combined loads

12 p2321 A70-27149

Axially stiffened and barreled cylindrical shells elastic postbuckling behavior, considering effects of stringer and load eccentricities

12 p2321 A70-27175

Thin walled tubes plastic instability under combined internal pressure and axial load for open and closed end conditions

12 p2322 A70-27216

Blunted spherical shells stability under hydrostatic pressure by reducing equilibrium equations to differential

12 p2322 A70-27333

Thin cylindrical shells elastic buckling under uniform axial compression, considering Kirchhoff-Love hypotheses in critical stress determinations

12 p2324 A70-27396

Glass-plastic thin cylindrical shells carrying capacity dependence under axial and external loads on combinations of longitudinal and transverse reinforcing layers

12 p2259 A70-27527

Polymer shells lasting stability mathematical simulation, discussing similarity criteria of nonlinearly and hereditarily elastic materials

12 p2259 A70-27528

Transversely isotropic shells stability with respect to subcritical deformation under axial compression using three dimensional linearized equations, determining critical loads

12 p2324 A70-27529

Clamped shallow spherical cap elastic buckling and initial postbuckling behavior under uniformly distributed load over circular region centered at apex

12 p2326 A70-27814

Fiberglass plastic cylindrical shells stability against creep under prolonged hydrostatic pressure, obtaining critical loading times

12 p2328 A70-28278

Structural strength of fiberglass plastics reinforced conical shells, using impregnation technique of dry package under pressure

12 p2328 A70-28280

Transversely isotropic hollow spherical shell with elastic filler, analyzing stability

12 p2328 A70-28281

Cylindrical shells stability under axial compression by two dimensional Kirchhoff-Love applied theories, calculating critical stresses

12 p2328 A70-28282

Laminated glass fiber reinforced cylindrical shell stability resting on hinged supports under axial compression

13 p2514 A70-29285

Critical loads and stability of isotropic cylindrical shells under uniformly distributed longitudinal compression loads based on network method

13 p2514 A70-29287

Stability loss of nonreinforced and reinforced cylindrical shells under external pressure

13 p2514 A70-29294

Elastic material filled cylindrical, segmented toroidal and conical shells thermal stability, allowing for stiffer eccentricity

13 p2516 A70-29523

Linear compressive orthotropic stability theory for shallow-stiffened cylinders

13 p2518 A70-30022

Thermal stability of simply supported bimetallic shallow spherical shell, considering rotationally symmetric deflection modes

14 p2657 A70-30845

Thin spherical shell postbuckling behavior with constrained rigid boundary under edge load, using deep and shallow shell theory

14 p2658 A70-30848

Curved finite element for shells of revolution based on minimum potential energy principle, discussing stiffness and equilibrium of domed and branched shells

14 p2659 A70-31130

Stress distribution in spirally corrugated shell under torsional deformation, calculating twisting moment for stiffness

14 p2661 A70-31327

Reinforced shells of revolution carrying capacity upper limit subjected to internal adiabatic ideal gas flow

15 p2814 A70-31534

Strength and critical load determination for spherical shells with reinforced hole under internal pressure based on stress-strain state analysis during deformations

15 p2814 A70-31543

Natural oscillation frequencies in rectangular shallow shells weakened by cuts, using summary representations method for eigenvalues determination

15 p2814 A70-31585

Shells of revolution zero moment stressed state calculation by analytical functions, solving boundary value problem for edge loading

15 p2814 A70-31587

Stress-strain state of catenoid, cylindrical and spherical shells of revolution, emphasizing catenoid shell bending problem

15 p2815 A70-31648

Elastic shells of revolution stability and critical loads, discussing moment stress state and edge effect

15 p2816 A70-32158

- Reinforced shallow shells and plates stability beyond elastic limit, obtaining optimal parameters under compressive loads 15 p2816 A70-32159
- Bifurcation stability in geometrically nonlinear shells of revolution under transverse loads, considering tension and compression deformation 15 p2817 A70-32168
- Stability characteristics of elastic shallow shells of revolution in temperature field and under compression, reducing variational equation of bending by Ritz method 15 p2817 A70-32169
- Cylindrical shells upper critical loads calculation based on linearization of nonlinear shell theory equations 15 p2818 A70-32181
- Computer program for limit analysis of rotationally symmetric shells, generating yield point load upper and lower bounds and velocity profile 15 p2822 A70-32351
- Cylindrical shells under axial compression, using elastic stability analysis for critical loads prediction 15 p2822 A70-32512
- Gravitational instability and collapse of thin spherical shell of charged fluid, using energy conservation law 16 p2952 A70-33787
- Combined internal pressure and axial loading influence on aeroelastic stability of thin walled cylindrical shell in supersonic flow field 16 p2991 A70-33851
- Stability analysis of anisotropic cylindrical shells under combined loadings using inverse operators 16 p2994 A70-34246
- Polycarbonate thin walled cylindrical shells mechanical and material stability under torsion 17 p3127 A70-34656
- Solutions for normal and tangential displacements and concentrated forces on shallow cylindrical shells 17 p3186 A70-34969
- In-plane boundary conditions effect on axially compressed conical shell stability under low buckling loads, using linear Donnell-type theory 17 p3186 A70-34971
- Radial vibration frequency variation with wall thickness in hollow spherical shells, tabulating and plotting results 17 p3186 A70-34978
- Membrane and bending stresses at crack tip in cylindrical shell weakened by elliptic hole with major axis perpendicular to shell axis 17 p3186 A70-34981
- Axially loaded cylindrical shells prebuckling deformation behavior measurement by holographic interferometry 17 p3086 A70-35012
- Double curved shell membrane stress calculation under arbitrary load, using stress functions 18 p3338 A70-36373
- Stress-strain equilibrium of thin isotropic elastic shells of revolution loaded along meridian 18 p3340 A70-36577
- Matrix filtering method for stability solutions of shells and plates by finite difference method 18 p3341 A70-36580
- Stability of circular cylindrical shell reinforced by elastic rings at edges under longitudinal compression 18 p3341 A70-36581
- Shallow conical shell stability under uniformly distributed pressure and concentrated force at apex for rigid and free clamping boundary conditions 18 p3341 A70-36589
- Thin circular cylindrical shell stability subjected to axisymmetric thermal pulse, describing buckling process by mathematical model 18 p3342 A70-36641
- Thin walled cylindrical shell stability under axial compression edge load beyond limit of proportionality 19 p3534 A70-37243
- Carrying capacity of nonshallow rectangular shells, showing corner dependent collapse 19 p3535 A70-37345
- Core-filled thin cylindrical shell under radial ring and band pressure loads, using Boussinesq-Neuber stress function and Flugge shell theory 19 p3543 A70-38247
- Blast loaded cylindrical shell collapse hinge dynamic instability prediction by mathematical model 19 p3545 A70-38334
- Clamped spherical shells under concentrated, distributed and ring loadings, analyzing large axisymmetric deflections for prebuckled and postbuckled states 19 p3545 A70-38336
- Straight thin walled elliptical cylindrical shells stability in pure bending, solving boundary value problem 19 p3550 A70-38683
- Elastic body with incompressible fluid filled cavities, studying motion and stability by deriving motion equations starting from principle of least action 20 p3672 A70-39376
- Radial and shearing stresses in hollow composite sphere due to thermoelastic strain nucleus 20 p3719 A70-39602
- Cylindrical shells dynamic stability under uniform radial pressure 20 p3722 A70-39786
- Thin shells of revolution static and dynamic stability under symmetric loads, presenting eigenvalue algorithm for boundary value problems 20 p3725 A70-39863
- Elastic shell stability criterion during short duration dynamic loading 20 p3725 A70-39864
- Spherical shell equilibrium states dynamic calculation method applied to thin plates nonlinear theory statistical problems 20 p3725 A70-39871
- Stability loss in linear approximation by thin elastic shell of revolution with negative Gaussian curvature 20 p3726 A70-39872
- Structurally closed orthotropic circular cylindrical reinforced shell stability, developing approximate method to obtain various boundary conditions 20 p3727 A70-39886
- Homogeneous boundary value problems in stability theory of circular cylindrical shells axisymmetric equilibrium state 20 p3732 A70-40100
- Flexible shallow shell with plastic inhomogeneity due to yield point-fast neutron flux relation, examining stability under uniform load 20 p3734 A70-40437
- Rapid expansion of thin walled aluminum alloy cylinders under pulsed magnetic field pressure using high speed streak camera oscillography 20 p3735 A70-40513
- Circular cylindrical shell stability under axial compressive load, analyzing buckling process by high speed photographic recording of photoelastic isoclinic pattern changes 20 p3735 A70-40528
- Concentrated lateral loads effect on elastic stability and moment carrying capacity of circular cylindrical shells in bending 21 p3932 A70-40544
- Dynamic stability of cylindrical shell with small curvature under static or periodically variable axial pressure loads 21 p3932 A70-40554
- Vibration of combined cylindrical shells via Lagrangian minimization regarding unknown boundary values 21 p3934 A70-40897
- Elastic-plastic axisymmetric shells of revolution, analyzing large deflection and yielding for internal and external pressures by finite element method 21 p3937 A70-41738
- Circular cylindrical shell with annular orthotropic elastic core, analyzing stress wave propagation under pressure pulse 21 p3938 A70-41740
- Thin cylindrical shell under nonaxially symmetric concentrated stationary radial loading, calculating random responses and stability 21 p3940 A70-42051
- Nonlinear flexural vibration of thin circular cylindrical shells with clamped ends, using method of averaging for stability 22 p4112 A70-42517
- Axisymmetric vibrations of cylindrical shell with concentric circular plates at each end, obtaining Lagrangian of combined system 22 p4115 A70-42843
- Transient elastic vibrations of air and liquid filled cylindrical shells under radial impact, using shadow-optical cinematography [SMPT PREPRINT 107] 22 p4031 A70-43030
- Circular cylindrical shell with varying thickness under circumferential load and radial pressure, calculating critical load 22 p4117 A70-43354
- Flutter of elastic current-carrying shell containing incompressible inviscid nonconducting fluid flow 22 p4117 A70-43383
- Limiting pressure for isotropic plastic plates and spherical shells with stress dependent yield, using flow theory 22 p4120 A70-43717
- Spherical shell nonaxisymmetrical deformation under varying loads, relating parameters, Poisson coefficient and complex function 23 p4267 A70-44168
- Cylindrical shell stability under off-center compression loads applied to end faces, determining collapse conditions 23 p4268 A70-44169
- Thin walled shells structural vibration, buckling and stress analysis by computer methods, discussing shell theory and design 23 p4271 A70-44704
- Gradient minimization and higher order discrete elements application to shell buckling and vibration eigenproblems, using 48 degree of freedom Bogner cylindrical panel element 23 p4271 A70-44705
- Rectangular and triangular grids with variably sized mesh elements for finite difference analysis of shell structures 23 p4272 A70-44709
- Plastic postbuckling and imperfection sensitivity of spherical shells under axisymmetric bifurcation 23 p4272 A70-44714
- Second approximation for limit loads due to imperfection sensitivity of axisymmetric elastic shell structures with unique harmonic buckling modes 23 p4273 A70-44720
- Computer program for geometrical nonlinear static and dynamic structural analysis of arbitrarily loaded shells of revolution 23 p4273 A70-44724
- Stress, buckling and vibration analysis of shells of revolution by numerical integration and finite difference methods, summarizing computer programs 23 p4273 A70-44725
- Approximation method for large deflection analysis of impulsively loaded rigid plastic circular plates and symmetric shells 23 p4275 A70-44943
- Curved element approximation of orthotropic axisymmetric thin shells under axial loads 24 p4419 A70-45152
- Axisymmetrically imperfect spherical thin shell stability analysis, comparing results with theory of initial postbuckling behavior 24 p4421 A70-45282
- Infinite plates and shallow shells stability under doubly periodic surface loadings, using nonlinear analysis 24 p4421 A70-45283
- Truncated spherical shells nonlinear axisymmetric buckling calculation from equilibrium equations 24 p4421 A70-45284

SHELL THEORY

- Interior shell equations compared with classical shell theory, considering helicoidal, spherical and circular cylindrical geometry 01 p0200 A70-10542
- Anisotropic shells and plates dynamic field equations derived, taking into account mechanical forces and nonuniform temperature field 01 p0200 A70-10553
- Finite element method for thin shells using specialized form of Reissner variational principle for stresses and displacements 01 p0208 A70-11184
- Longitudinal wave motion in rods, plates and shells based on three dimensional equations and asymptotic expansion 01 p0209 A70-11365
- Boundary conditions at reinforced edge of shell by separating solution into zero moment stress and edge effect solutions 01 p0209 A70-11407
- Rotating compressor vanes vibration frequencies and modes using shell theory, considering Coriolis forces and rotation rates effects 01 p0211 A70-11427
- Green function type solutions of shell equations by small parameter technique for case of free terms consisting of Dirac delta function 01 p0212 A70-11565
- Nonlinear boundary value problem algorithm in shell theory 01 p0212 A70-11566
- Asymptotic dynamic theory for elastic cylindrical shells incorporating thickness effects, considering longitudinal wave propagation in infinite length shell 02 p0385 A70-11877
- Shells of revolution having arbitrary stiffness distribution and subjected to arbitrary loads and temperatures 03 p0583 A70-12916
- Zero-moment theory boundary value problem of shells of revolution with negative curvature under tangential static and geometrical conditions imposed on ends 03 p0589 A70-13337
- Shallow shell theory, discussing equation kernels, reduction of boundary value problems to integral equations, potential theory application and transformation into Fourier series 03 p0589 A70-13338
- Nonlinear theory for thin elastic shells with small strains and rotations, analyzing nonzero Gaussian curvature 03 p0594 A70-13622
- Thin elastic laminar shells nonlinear physical theory assuming Love-Kirchhoff hypothesis validity, rigidly connected layers and nonlinear mechanical behavior 04 p0765 A70-14419
- Nonlinear thin shell theory kinematics generalized in terms of physical strain and surface deformation and geometry 04 p0766 A70-14450
- Shell theory resolving equations transformation to second order partial differential equations suited for solution by numerical algorithms of network method 04 p0767 A70-14495

Spherical caps axisymmetric static and dynamic buckling under load, using axisymmetric nonlinear elastic shell theory approximation and finite difference equations
[AIAA PAPER 69-89] 04 p0778 A70-15587

Static-geometric analogy of Kirchhoff-Love shell theory applied to Timoshenko complex equations allowing for transverse shear deformation
05 p0934 A70-16219

Finite element method for large displacement elastic-plastic analysis of plates and shells, using geometric stiffness matrices and stress-strain relationships
05 p0943 A70-16809

Stress analysis of curved tubes capable of accounting for all end effects based on shell theory equations
05 p0944 A70-16811

Lower bound limit analysis of symmetrically loaded thin shells of revolution having arbitrary meridional profiles, demonstrating methods for pressure vessel problems
05 p0944 A70-16815

Axisymmetric deformation of shells of revolution with variable thickness solved by asymptotic method in form of higher Fourier series harmonics
05 p0945 A70-16853

Shell shear strain determined by expanding displacement vectors into covariant power series of distance from middle surface
[DFVLR-SONDDDR-23] 05 p0955 A70-17078

Dynamics of composite, sandwich and stiffened shell type structures with various geometries
06 p1160 A70-17158

Buckling behavior of elliptical cylinders under normal pressure using linear thin shell theory and Galerkin method, compared with test results
[AIAA PAPER 70-105] 06 p1169 A70-18038

Hybrid finite element analysis for combination of axisymmetric shell and linear displacement triangular ring elements
[AIAA PAPER 70-137] 06 p1169 A70-18052

Seminfinite simply supported cylindrical shell transient response due to axisymmetrically engulfing step pressure wave, investigating moving load critical velocity
[AIAA PAPER 70-18] 06 p1170 A70-18063

Equations for general shells of revolution reduced to simultaneous fourth order ordinary differential equations for stress and displacement functions
07 p1401 A70-18892

Uniform thickness thin helicoidal shell stress-strain state with middle surface in asymptotic lines, assuming parameters governed by one dimensional law
07 p1402 A70-19055

Isotropic shells with shear deformations, investigating stress-strain relations in Cosserat continuum applied to plates
[DFVLR-SONDDDR-23] 07 p1404 A70-19233

Elliptic cylinders buckling under normal pressure analyzed on polyvinyl chloride sheet models
07 p1406 A70-19304

Shell elastic constants for multilayered sandwich cylinders using Donnell approximation
07 p1406 A70-19326

Nonlinear thermodynamic theories of plates, elastic shells and rods derived from three dimensional theory of classical continuum mechanics
07 p1414 A70-20172

Axisymmetric elastoplastic deformation theory for elastic cylindrical shell using Saint Venant yield condition, obtaining expressions for strain components, longitudinal deformation, etc
07 p1415 A70-20185

Natural axisymmetric vibrations of cylindrical shell with hollow filler, analyzing motion by shallow shell and elasticity theory dynamic equations
07 p1415 A70-20191

Shallow shells of variable thickness and curvature calculated using small parameter method based on functional analysis
07 p1416 A70-20193

Variable coefficient equations for free oscillations of shallow shells of variable thickness in Vlasov moment theory
08 p1586 A70-21011

Thin shells of revolution natural oscillation frequencies approximation based on shell subdivision into series of cylindrical shells
08 p1588 A70-21194

Cylindrical and flat shells equilibrium equations representation using stress, deflection or tangential displacement functions
08 p1591 A70-21442

Transient radial temperature distributions in cylindrical shells via Carslaw and Jaeger procedure involving binomial theorem and asymptotic expansions of Bessel function
08 p1599 A70-21588

Flügge characteristic equation approximate roots for closed cylindrical shell compared with Donnell equation solution
08 p1593 A70-21625

Theorem for highest statically admissible multiplier for plates and shells, noting association with stress field satisfying yield equality at all cross sections
08 p1595 A70-21977

Linearly exact displacement and strain variations in transverse coordinate within shell structure
09 p1781 A70-23233

Elastic shell theory, deriving dynamic bidimensional equations from tridimensional elasticity equations asymptotic integration
10 p1959 A70-24793

Shell dynamics equations role in natural frequencies, determining dynamic response with damping allowance
10 p1960 A70-25052

Axisymmetric elasticity theory problem solution for hollow finite cylinder with symmetrical end loading, employing stress function
11 p2128 A70-25388

Noise-flutter interrelation in flight vehicle flexible plate and shell configurations immersed in fluid flow
11 p2132 A70-25726

First order differential equations for unsymmetrical bending of shells of revolution
11 p2135 A70-25978

Free vibration characteristics of circular cylindrical shells of finite length, utilizing Flügge equations
11 p2135 A70-25997

Finite element method using shallow shell stiffness matrix extended to cylindrical shell solution
11 p2138 A70-26159

Monograph on shells of revolution and prismatic shells of arbitrary cross sectional shape with arbitrary load covering partial shells, programs, boundary condition methods, etc
11 p2141 A70-26600

Nonlinear thin shell theory equations reduced to equations in unknowns with boundary conditions
11 p2143 A70-26653

Asymmetric stiffened shell structure analysis by finite element method, introducing constant transverse shear model concept
11 p2144 A70-26677

Axisymmetrically loaded shells of revolution with displacement behavior defined by fourth order differential equations, discussing finite difference method suitability for solution
11 p2144 A70-26679

Large deflection analysis of elastic-plastic shells of revolution by computer program based on nonlinear theory and multisection method of numerical integration
12 p2320 A70-27147

Polymer shells lasting stability mathematical simulation, discussing similarity criteria of nonlinearly and hereditarily elastic materials
12 p2259 A70-27528

Equilibrium equations for thin multilayer shells with variable thickness, assuming simultaneous work without friction under loads
12 p2325 A70-27556

Slender cylindrical shell loaded by internal pressure analyzed using numerical procedure developed for digital computer
13 p2512 A70-28981

Discretized linear theory of arbitrary shell forms
13 p2513 A70-29151

Geometrical theory of nonlinearly elastic inhomogeneous flexible shells, deriving variational equation in terms of displacement component and stress function
13 p2514 A70-29288

Shallow shell solutions complete with respect to finite simply connected surface region applied to circular cylindrical shells
13 p2517 A70-29758

Shallow shell theory partial differential equations, obtaining integral representations of general solutions
13 p2517 A70-29764

Zero-moment theory boundary value problem of shells of revolution with negative curvature under tangential static and geometrical conditions imposed on ends
14 p2657 A70-30715

Shallow shell theory, discussing equation kernels, reduction of boundary value problems to integral equations, potential theory application and transformation into Fourier series
14 p2657 A70-30716

Shell homogeneity theory, considering uniform states, spheres and circular cylinders
14 p2600 A70-31280

Reticulated shell structure buckling using approximate equivalent shell and discrete analysis of individual beams
15 p2816 A70-32007

Sinusoidal stress and strain in elastic shells of revolution, reducing linear theory to simultaneous second order differential equations
15 p2816 A70-32008

Shallow shells displacement theory, representing solution in terms of analytical functions
15 p2817 A70-32160

Closed spherical shell, demonstrating effects of concentrated forces at poles
15 p2818 A70-32170

Addition theorems for cylindrical functions, discussing applications to shell stress analysis and three dimensional elasticity theory
15 p2819 A70-32187

Zero moment/membrane/ theory for anisotropic thin walled shells, deriving expressions for stress-strain states and displacements under torsion
15 p2824 A70-32894

Normally intersecting closed cylindrical shells subjected to internal hydrostatic pressure, using Donnell shell theory
16 p2990 A70-33678

Membrane stresses on nonspherical domes with axisymmetric loads
16 p2990 A70-33743

Shells of revolution nonlinear finite element analysis by matrix displacement method, including higher order strain energy terms
16 p2991 A70-33885

Strain compatibility equations for continuous shells from physical and mathematical considerations
16 p2991 A70-33893

Stability analysis of anisotropic cylindrical shells under combined loadings using inverse operators
16 p2994 A70-34246

Canonical variational principle for boundary condition contractions in elastic shell theory
17 p3182 A70-34545

Turbine blades vibrations based on thick curved shell theory, deriving element from isoparametric solid
17 p3187 A70-34989

Thin elastic shells linear theory, examining three dimensional stress distribution and displacement field
17 p3191 A70-35608

Axisymmetric torsion by terminal loads of elastic shells of revolution, investigating energy inequalities for assessing quality of approximate solution of thin shell problem
18 p3335 A70-36058

Curved finite elements for shell calculations, obtaining potential energy of internal forces
18 p3337 A70-36369

Shell theory for shear deformations in covariant notation involving displacement power series expansion
18 p3337 A70-36371

Zero moment theory for stress-strain state of thin walled anisotropic shells with nonuniform moduli under simultaneous torsion and tension
18 p3340 A70-36578

Shallow spherical shell dynamics nonlinear problems solution with algorithm permitting use of straight lines method
18 p3341 A70-36590

Soviet book on theory of shell and plate type thin walled structural elements stability covering strength, boundary value problems, oscillations, design, etc
19 p3535 A70-37401

Linear micropolar elasticity theory of shells and plates, considering transverse shear and normal strains and rotary inertia
19 p3538 A70-37793

Anisotropic axisymmetric elastic shell theory including transverse stress effects, with application to orthotropic cylinder
19 p3545 A70-38337

Open and multiply connected closed sections of varying thicknesses, solving for unrestrained torsion
19 p3545 A70-38339

Shallow shell solutions complete with respect to finite simply connected surface region applied to circular cylindrical shells
19 p3547 A70-38396

Nonhomogeneous shell theory, considering load carrying surfaces with constitutive equations independent of shell curvature
20 p3719 A70-39619

Medium thickness shells under thermal creep using Saint Venant semiinverse method
20 p3722 A70-39787

Optimal variable shell thickness, describing numerical solution as function of forces, moments and thickness
20 p3725 A70-39865

Thin shell theory elastic coupling conditions, discussing stress-strain and edge effect states
20 p3726 A70-39875

Hollow shell theory equations for complex stress-strain states, using complex transform method
20 p3726 A70-39880

Circular cylindrical shells theory based on Novozhilov equation, deriving auxiliary formulas for strain and displacement characteristics in terms of stress function
20 p3727 A70-39888

Thin elastic shells displacement vector and strain boundary conditions determination from stress-strain relations
20 p3728 A70-39896

Fiber reinforced composite shell structures stress-strain relations, noting membrane and flexural variables coupling in constitutive relations
20 p3729 A70-40034

Shallow shell theory partial differential equations, obtaining integral representations of general solutions
20 p3732 A70-40102

Circular rib reinforced cylindrical shells, analyzing error due to Kirchhoff-Love hypothesis
20 p3734 A70-40435

Donnell-Vlasov shallow shell equations error analysis
20 p3734 A70-40441

Closed circular cylindrical shell nonlinear problem solvability extended to anisotropic sandwich shell, using mean deflection theory
21 p3933 A70-40601

Buckling analysis of stiffened noncircular cross section cylindrical shells constructed by circular arcs and straight line segments
21 p3934 A70-40922

Membrane theory of shells, reducing equilibrium equations to single second order partial differential equation through transformation in terms of stress function derivatives
21 p3939 A70-42031

Novozhilov complex transformation method extended to Timoshenko theory of elastic shells constructed with allowance for transverse shear deformation
21 p3941 A70-42237

Hollow spheres and hemispheres nonlinear axisymmetric deformation, using shell theory reduced to two point boundary value problem for differential equations
22 p4112 A70-42288

Nonlinear shell theory formulated in Lagrangian stress and moment resultants, deriving equilibrium equations
22 p4118 A70-43545

Circular cylindrical shell under longitudinal line load, deriving closed form solution in Fourier series
22 p4118 A70-43547

Symmetrical bending of isotropic elastic half-strip with free longitudinal edges and end displacements, indicating use for plate and shell theory
22 p4118 A70-43568

Shear flow distribution equations in prismatic shells under constant shear loading
23 p4265 A70-43891

Two dimensional shell equations derivation from three dimensional elasticity theory, considering rotationally symmetric bending of shells of revolution
23 p4265 A70-43942

Simplified Sanders-Koiter linear thin shell equations with uncoupled stress-strain relations for arbitrary, nonzero Gaussian curvature, catenoidal and helicoidal midsurface geometries
23 p4269 A70-44399

Arbitrary shells large deflection transient response, using finite difference computer program
23 p4272 A70-44710

Thin shell structural analysis by doubly curved arbitrary quadrilateral finite element, using Kirchhoff theory and cubic polynomial for membrane displacements
23 p4272 A70-44711

Numerical methods for mixed boundary value problem of axisymmetric shells of revolution, using truncated series expansion and finite difference expressions
23 p4272 A70-44712

Mixed formulations for finite element shell analysis based on flat and curved elements
23 p4272 A70-44713

Shell analysis based on discretization into one, two and three dimensional configurations, comparing finite difference, numerical integration and finite element methods
23 p4272 A70-44715

Nonlinear material and geometric behavior of shell structures studied by Eulerian and Lagrangian approaches
23 p4273 A70-44718

Nonlinear shell analysis by finite difference energy method, using BOSOR3 and STAGS computer programs
23 p4273 A70-44723

Rotating spherical shell equations as initial value problem, noting maximum convective heat transport at equator
23 p4249 A70-44805

Corrugated plates, closed cylinders and developable shells nonlinear elastic analysis, deriving boundary conditions
23 p4275 A70-44913

Matrix-vector computer program for three dimensional perspective projection and shell analysis in FORTRAN IV
24 p4419 A70-45155

SHELLS [STRUCTURAL FORMS]
NT ANISOTROPIC SHELLS
NT CIRCULAR SHELLS
NT CONICAL SHELLS
NT CORRUGATED SHELLS

NT CYLINDRICAL SHELLS
NT DOMES [STRUCTURAL FORMS]
NT ELASTIC SHELLS
NT HEMISPHERICAL SHELLS
NT LIQUID FILLED SHELLS
NT METAL SHELLS
NT ORTHOTROPIC SHELLS
NT RADOMES
NT REINFORCED SHELLS
NT SPHERICAL CAPS
NT SPHERICAL SHELLS
NT THIN WALLED SHELLS
NT TOROIDAL SHELLS

Shells with holes using Neumann method, obtaining Fredholm alternative for singular integral equations
03 p0589 A70-13347

Computer programs for numerical analysis of shell structures, considering series expansion, numerical integration, finite differences and finite elements
04 p0768 A70-14787

Shell directional antennas operational behavior at 2 and 4 GHz and mechanical properties
04 p0660 A70-15661

Thermoelastic stresses in plates and shells in random temperature fields, studying influence on service life
09 p1778 A70-23084

Monograph on shells of revolution and prismatic shells of arbitrary cross sectional shape with arbitrary load covering partial shells, programs, boundary condition methods, etc
11 p2141 A70-26600

Stress analysis of plane, shell and three dimensional structures using finite element method
12 p2315 A70-26886

Deep shells formation by high pressure methods, discussing fluid, mechanical edge pressure and friction aided extrusion techniques
12 p2240 A70-27080

Wave propagation in finite length revolving shells, describing advantages of modal superposition method generated by finite element computer program
12 p2317 A70-27124

Mechanics of solid structures including shells and beams, considering three dimensional behavior laws in plasticity and creep
14 p2656 A70-30294

Shells with holes using Neumann method, obtaining Fredholm alternative for singular integral equations
14 p2657 A70-30721

Curved finite element for shells of revolution based on minimum potential energy principle, discussing stiffness and equilibrium of domed and branched shells
14 p2659 A70-31130

Positive/negative curvature shells local stresses due to concentrated loads and heat sources, deriving approximate solutions
15 p2817 A70-32161

Arbitrary shaped shell structures analysis by finite element method, using curved shell elements approach
16 p2988 A70-33289

Pressurized shells of revolution loaded axisymmetrically, formulating equations for calculation of displacements, forces and stresses
18 p3338 A70-36406

Book on thermoelasticity covering thermal stresses in disks, plates, shells and bodies of revolution under steady and unsteady temperature fields
19 p3541 A70-37974

Book on structural analysis by finite difference calculus covering elastic and elastoplastic states, vibration and buckling of beams, gridworks, plates and shells
19 p3548 A70-38599

General purpose computer programs for shell structural analysis, using finite element modeling and displacement methods
23 p4271 A70-44707

Finite element structural analysis/FESTRAN/ computer program predicting static structural response of plate and shell structures
23 p4272 A70-44717

SHELTERS
NT Nonsteady flow past duct junctures, investigating ventilation system of underground bomb shelter for blast wave passage prevention
11 p2036 A70-26139

SHIELDING
NT ELECTROMAGNETIC SHIELDING
NT ELECTROSTATIC SHIELDING
NT HEAT SHIELDING
NT MAGNETIC SHIELDING
NT RADIATION SHIELDING
NT RADIO FREQUENCY SHIELDING
NT REENTRY SHIELDING
NT SOLAR RADIATION SHIELDING
NT SPACECRAFT SHIELDING

Screening devices to control heat supplied to spacecraft, discussing mathematical model to determine effective emission
07 p1392 A70-18816

Bumper materials effect on two component hypervelocity impact shields performance, noting material density influence
07 p1310 A70-19713

Radial distribution of plasma parameters for thermionic converters with electrode shielding by plane sapphire rings, showing lateral surface effect
10 p1808 A70-25124

Radial distribution of plasma parameters for thermionic converters with electrode shielding by plane sapphire rings, showing lateral surface effect
20 p3568 A70-40517

SHIFT REGISTERS
Beam-lead substrate package for six stage TTL shift register, discussing metallization systems for interconnections and beams
02 p0271 A70-12846

Pseudonoise sequence generation with 3-tap linear feedback binary shift registers, citing reduction theorems
11 p2025 A70-26224

Integrated analog shift register circuits computer aided design, using insulated gate field effect transistor/IGFET/
15 p2711 A70-32597

Analog shift register for use as delay line and digital filter, discussing applications to radio astronomy
18 p3261 A70-37088

SHIMS
U COMPENSATORS

SHIPS
NT AIRCRAFT CARRIERS
NT SUBMARINES

Operational requirements of shipping for satellite communication systems, discussing distress cases, satellite navigation systems, information distribution traffic control, etc
03 p0522 A70-13605

Electroexplosive devices (EED) in electromagnetic environments, discussing principles of warship safety
03 p0549 A70-14129

Integrated man machine shipboard maintenance systems design, describing computerized model based on information flow network
08 p1465 A70-20665

Energy dissipation effect on complex parametric resonance and stability of two rotor gyrocompass on ship in motion
13 p2408 A70-29295

SHOCK
Blood volume and circulation rate in dogs subjected to traumatic shock and hemorrhage under high mountain conditions
07 p1198 A70-18708

Oxygen transport, arterial resistance and consumption in normovolemic and hypovolemic dogs in hemorrhagic shock
24 p4302 A70-46106

SHOCK ABSORBERS
Thermal damping in gas-filled composite materials during impact loading due to heat transport, discussing role in impact energy dissipation
04 p0712 A70-14867

Vibration damping of oil hydraulic system using bladder type accumulator composed of rubber, measuring frequency response of shock absorber
06 p0988 A70-17140

Foamed-in-place polyurethane for form fitting pilot helmet shock absorbing liner noting medical applications
07 p1218 A70-19015

Optimum control for shock absorber of elastic body solved by graph analytic method
09 p1727 A70-22535

Shock absorbing forces for absorber with one degree of freedom optimized for given acceleration during periodic disturbances by variational method
09 p1727 A70-22537

Optimum damping and stiffness in nonlinear single degree of freedom systems, discussing protection from ground and velocity shock during landing impact
11 p2145 A70-26695

Unmanned spacecraft landing shock absorption by hybrid pneumatic configuration having hard surfaced footpad with dual pneumatic bag attenuator
12 p2312 A70-27115

Honeycomb shock absorbers, noting landing gear applications
13 p2512 A70-28772

Surveyor spacecraft landing shock absorbers design and performance assessment by digital computer simulation
16 p2922 A70-34123

Passive shock isolation, describing environments, excitation types, equations of motion, etc
21 p3934 A70-40915

Parachute decelerator towline energy absorber shock attenuation characteristics, discussing drop test results
21 p3752 A70-41815

Rubber mount vibration and shock isolation problems, discussing dynamic response to reaction forces and force concentration
23 p4269 A70-44330

Spacecraft landing gear shock attenuation systems using crushable honeycomb, draw-die tubes and retrorocket skirt jet
23 p4262 A70-44695

SHOCK DIFFUSERS
U DIFFUSERS

SHOCK DISCONTINUITY

U SHOCK WAVE ATTENUATION SHOCK DISCONTINUITY

Oblique unsteady shock wave structure propagating at large Mach numbers in plasma cylinder under steady magnetic field, showing particle velocity profile discontinuity

01 p0064 A70-10999

Monograph on MHD waves covering theories for weak discontinuities, wave propagation in inhomogeneous media and behavior in magnetic fields

06 p1114 A70-17275

Progressive shock waves propagation, reflection and transmission through sudden changes in pipe cross sectional area, obtaining boundary conditions for quasi-steady junction flow

09 p1664 A70-23738

Quasi-transverse constant profile wave in finite elasticity with isothermal shock at discontinuity compared to Whitham breakdown

10 p1956 A70-24191

Stagnation point position as function of gas thermodynamic state behind detached shock for spherical segment at incidence in three dimensional hypersonic flow

12 p2159 A70-28247

One dimensional steady state flows and discontinuities in radiation gas dynamics, neglecting radiation pressure, viscosity and heat conduction

13 p2387 A70-28937

Time and spatial evolution of shock and expansion wave evolution from density discontinuity for gas with repulsive delta function interaction between particles

13 p2388 A70-29224

Hydromagnetic shock waves structure, investigating resistive, viscous and thermal conduction dissipation effects on discontinuities

17 p3140 A70-34928

Viscous heat-conducting one dimensional piston driven gas flow, assuming sharp shock discontinuity

17 p3075 A70-35890

Jump relations for shocks in anisotropic collisionless magnetized plasma

21 p3856 A70-41267

Plane parallel transonic flow with curved compression shock discontinuity in supersonic region, obtaining solution by indeterminate coefficients and hypergeometric functions

21 p3748 A70-42212

SHOCK FRONTS

Multiple pulsations mechanism during detonation spherical wavefront propagation in channels with various cross sections, noting volume effect

01 p0060 A70-10135

Critical detonation diameter as function of concentration and dimensions of inhomogeneities in explosive, assuming chemical reaction generated behind detonation front

01 p0217 A70-11005

Gas motion and heating by radiation behind shock wave front, noting ionization and radiation absorption occurrence

01 p0068 A70-11570

Electrical conductivity of air behind incident and reflected shock wave fronts as function of temperature and Mach numbers measured by electrode method

01 p0095 A70-11622

Detonation front macroscopic properties, Mach configurations, shock spacing, etc, considering effects of tube walls and nonlaminar flow

02 p0278 A70-12026

Transient energy transfer during expansion of plane layer of radiating gas bounded by strong shock, assuming LTE and perfect inviscid nonconducting gas

02 p0279 A70-12230

Adiabatic invariance of action integral for motion in nonregular fields, explaining charged particles motion through magnetic shock front in interplanetary space

02 p0359 A70-12788

Periodic shock fronted longitudinal pressure wave effect on instantaneous heat flux rates at tube end wall

02 p0400 A70-12860

Vibrational energy exchange between molecules during collision behind normal shock front as function of wave velocity

03 p0468 A70-13873

Ionization study of gas discharge parameters behind shock wave front produced by moving plasma pulse interaction with immovable gas discharge plasma

03 p0535 A70-14361

Detonation front structure stability in gases, discussing spin detonation, transverse waves, perturbation, etc

07 p1418 A70-18751

Shock front stability under free flow in electromagnetically driven shock tubes, determining critical hydrodynamic Reynolds number

08 p1482 A70-21529

Transparent gas radiation behind strong shock wave front with small pressure gradient due to energy losses

08 p1486 A70-21986

Accelerating shock wave fronts by detonating passive triethyl and hexogen using high speed photography

09 p1658 A70-22103

Carbon dioxide molecules dissociation along tube length, measuring temperature drop behind shock front at various pressures and 4300 K

09 p1730 A70-22172

Plane one dimensional motion of shock wave with moving inner boundary investigated for given shock wave front position and gas mass and energy

09 p1659 A70-22432

Shock wavefront configurations before inclined obstacles in supersonic flow, studying inclination angle role

09 p1604 A70-22443

Spectroscopic technique measuring OH concentrations behind shock waves by measuring absorption of OH lines, using water cooled RF powered lamp

09 p1683 A70-23512

Ionization front interactions in interstellar gas, investigating expanding planar H II region and contact discontinuity in H I region

10 p1937 A70-23975

Hydrodynamic energy flow down horizontal tunnel from nuclear explosive detonated underground, recording shock front luminosity and time of arrival

10 p1857 A70-23985

Microfluctuations frequency and wavelength of electromagnetic, electric and magnetic field distributions in plasma shock wave front found consistent with ion-acoustic origin hypothesis

10 p1925 A70-25031

Electron temperature distribution behind strong shock wavefront in air measured by electrostatic probe and compared to results of spectral line inversion method

10 p1871 A70-25114

Electric field structure at shock wave front propagating in weakly ionized gas under Ramsauer effect

10 p1871 A70-25121

Distance separating shock wave front of contact surface between motor and target gases in electromagnetic shock tube, discussing surface instabilities

11 p1977 A70-26467

Ionization kinetics of Ar, Xe and Hg monatomic gas behind shock wave front at high temperatures

12 p2210 A70-27319

Vertical propagation of short acoustic waves from harmonic source in inhomogeneous atmosphere, calculating shock front width and heating rate

12 p2264 A70-27519

Stellar upper atmospheric shock wave motion, discussing emission spectra interpretation and temperature gradients

13 p2493 A70-29395

Shock waves structure in radiating gases at high temperatures, taking into account radiation anisotropy in shock front

15 p2720 A70-31645

Shock wave front propagation instability in decreasing density medium, applying to stellar structure

16 p2890 A70-33200

Electron-acoustic, ion-acoustic and electromagnetic plane waves coupling at shock front in two fluid ionized viscous plasma

16 p2958 A70-33282

Elastoviscoplastic medium filled half space motion under pressure front moving along surface with time varying velocity, analyzing penetrating wave fronts form

16 p2990 A70-33780

Attenuation, refraction and multiple reflection effects on light reflection from shock front at near grazing incidence

16 p2953 A70-34271

Plane normal shock front diffraction along free interface between half planes of homogeneous fluids at rest, using method of characteristics and Whitham technique

17 p3074 A70-35886

Magnetic probes effectiveness study of electron heating behind shock wave front in plasma, measuring electron temperature

18 p3294 A70-36149

Supersonic conductive gas recombination fronts for arbitrarily oriented magnetic field, allowing for dissipative coefficients

18 p3294 A70-36255

Electron temperature and concentration profiles behind shock front from IR emission and absorption simultaneous measurement, applying method to xenon ionization and recombination processes

19 p3402 A70-37443

Optical reflection measurement at grazing incidence from shock front at Mach 1.94 in air at atmospheric pressure

20 p3674 A70-40167

Solar wind flow behind shock fronts from Mariner 5 and Explorer 34 spacecraft

20 p3701 A70-40422

Electric field structure at shock wave front propagating in weakly ionized gas under Ramsauer effect

20 p3685 A70-40514

Vertical propagation of short acoustic waves from harmonic source in inhomogeneous atmosphere, calculating shock front width and heating rate

21 p3818 A70-41167

Axisymmetric detached shock before blunt body in hypersonic monatomic gas flow, obtaining radiative ionization patterns in cold precursor

21 p3950 A70-41731

Pressure field behind shock wave after interaction with nonuniform density region, describing shock front shape

21 p3810 A70-41964

Ionization kinetics of Ar, Xe and Hg monatomic gas behind shock wave front at high temperatures

21 p3854 A70-42061

Detonation front position determination in explosive by photoelectric technique

22 p4121 A70-42341

Analytic shock front velocity as function of initial parameters in continuous inhomogeneous medium, verifying propagation through rarefaction wave

22 p4010 A70-42687

Turbulent collisionless plasma shocks formation, wave front steepness and explanation for earth bow shock

23 p4225 A70-44183

SHOCK HEATING

Solar corona heating by shock waves, considering chromosphere and solar wind physical properties, heat flow channeling, etc

02 p0361 A70-11750

Chemical kinetics in reaction zone of shock heated hydrogen-carbon monoxide-oxygen mixtures, measuring density field behind normal shock wave by optical interferometry

02 p0250 A70-12022

Propane oxidation reaction and ignition delay times [AIAA PAPER 68-633]

03 p0603 A70-12909

Electron relaxation in shock heated Ar plasma estimated by measuring radiation intensity at various frequencies

03 p0535 A70-14363

Thermochemical relaxation influence on shock heated plasma gases via heat transfer experiments on ionized Ar, molecular nitrogen and carbon dioxide

03 p0536 A70-14366

High temperature thermal transport and ionization relaxation in Ar from measurements by thin film surface thermometer in high pressure shock tube end wall

04 p0787 A70-15607

Bronzite, hypersthene and amphibole chondrites examined by X ray diffraction for inert gas retention ages relationship to shock and reheating

05 p0912 A70-16448

Stagnation point heating in hypersonic gas flow past blunt bodies, considering radiative transfer effects on shock wave temperature and density distribution, wave separation, etc

06 p0985 A70-18557

Shock heated molecular beams of argon, oxygen and mixtures with helium, measuring particle velocities and gas dissociation

09 p1733 A70-23180

Temperature, pressure and electron density measurements behind reflected shocks in gas driven diaphragm shock tube compared with Rankine-Hugoniot predictions

10 p1967 A70-23960

Shock-heated noble gases total ionization times, considering recombination and atom-atom and atom-electron collisions

12 p2274 A70-26856

Primitive earth prebiological organic synthesis via amino acids shock heating in atmosphere-simulating gas mixture, suggesting energy sources from atmospheric entry

12 p2167 A70-27269

Vertical propagation of short acoustic waves from harmonic source in inhomogeneous atmosphere, calculating shock front width and heating rate

12 p2264 A70-27519

Multiband radiative cooling effect on enthalpy distribution behind incident wave in cylindrical shock tube for air, using differential approximation

14 p2663 A70-30268

Hypersonic flow of shock heated plasma past axisymmetric blunt body and onboard magnetic source, using numerical method

17 p3008 A70-34491

Magnetic probes effectiveness study of electron heating behind shock wave front in plasma, measuring electron temperature

18 p3294 A70-36149

Plane wall surface sublimation under radiation from shock wave heated gas

18 p3348 A70-36721

Heat fluxes from shock-heated gas to shock tube wall and wedge surface as function of Mach number, using platinum resistance thermometers

20 p3613 A70-40343

Vertical propagation of short acoustic waves from harmonic source in inhomogeneous atmosphere, calculating shock front width and heating rate

21 p3818 A70-41167

Plasma heating by ionizing shock waves reflected by transverse magnetic field barrier, discussing discontinuity resolution
21 p3857 A70-41381

Shock waves strength and frequency in solar atmosphere heating deduced by empirical model, integrating radiative losses over height
21 p3925 A70-42188

Heating and extension of solar chromosphere and corona via shock waves generated by piston below convection zone surface
21 p3925 A70-42189

Energy deposition in solar corona associated with momentum transfer from heating wave in transition region, discussing wave pressures
21 p3925 A70-42190

Fluid dynamics nonlinear equations for thermally driven motions in compressible, isothermal gravitational solar atmosphere, considering flow discontinuities and heat conduction
21 p3925 A70-42191

Lower chromosphere shock wave heating, analyzing density scale height effects
22 p4105 A70-43001

Radiative cooling of shock heated air in cylindrical shock tubes, calculating enthalpy profiles for nonadiabatic air flow
23 p4282 A70-44586

SHOCK LAYERS

Modified shock layer theory for predicting hypersonic internal flow in axisymmetric converging duct with attached shock at leading edge
02 p0276 A70-11854

Approximate solutions for radiative heat transfer in shock layer, considering discontinuity role
[ASME PAPER 69-WA/HT48] 04 p0667 A70-14800

Gas dynamics of intense explosion with expanding inner contact surface in Newtonian limit, discussing shock layer reattachment
04 p0619 A70-15322

Viscous shock layer at hypersonic blunt body stagnation point, applying finite difference and nonlinear overrelaxation methods to seven species air model
04 p0620 A70-15539

Inviscid hypersonic blunt body flow of hydrogen-oxygen mixtures in shock layer stagnation region
06 p0968 A70-17555

Surface temperature effects on low Reynolds number hypersonic shock layer development over flat plate sharp leading edge
06 p0982 A70-18364

Shock layer thickness in supersonic inviscid gas flow past blunt bodies, calculating boundary layer near stagnation point
09 p1603 A70-22442

Friction drag on thin pyramidal lobed bodies in supersonic flow, analyzing detached shock region and body geometry function
09 p1606 A70-23612

Electric arc shape moving at hypersonic speed investigated by Newtonian pressure distribution for thin shock layer
11 p2090 A70-25992

Solid particle motions in dusty gas in inviscid hypersonic shock layers of slender wedges and cones and stagnation regions of cylinders and spheres
12 p2156 A70-27827

Interplanetary shock waves layer formation in collisionless medium, using bulk transport parameters for dissipation requirement
12 p2308 A70-27885

Radiant shock layer in hypersonic air flow past blunt bodies, showing effects on temperature field and density
12 p2159 A70-28245

Transonic scaling effects for shock boundary layer interaction on circular and two dimensional airfoil models, discussing separation and reattachment
[AIAA PAPER 70-541] 13 p2339 A70-29008

Viscous shock layer equations of laminar hypersonic flow past blunt body at moderate to high Reynolds numbers
13 p2343 A70-29952

Shock slip analysis of merged layer stagnation point air ionization, clarifying effects of reaction rates, species diffusion, etc
13 p2343 A70-29987

Supersonic rarefied flow over sharp flat plate with merged shock layer and free molecular-continuum transition, using electron beam fluorescence
14 p2529 A70-31028

Blockage ratio effect on supersonic zone with shock layer interaction on nonlifting circular arc airfoils at transonic speeds in wind tunnels
16 p2835 A70-33674

Experimental and numerical nonequilibrium shock layer around cones in hypersonic pure oxygen flows with simultaneous rotational, vibrational and dissociation relaxation
[AIAA PAPER 69-136] 16 p2894 A70-33858

Electron concentration profiles in blunt nose vehicle shock layer during atmospheric near orbital entry at high altitudes, using finite rate chemistry
16 p2837 A70-33865

Inviscid air nonequilibrium shock layer properties correlation based on plenum entropy, predicting composition of downstream converging-diverging nozzle expanding air flow
[AIAA PAPER 70-866] 16 p2838 A70-33909

Viscous absorbing emitting shock layer in blunt body stagnation region, calculating skin friction and radiative heat transfer
[AIAA PAPER 70-868] 16 p2999 A70-33911

Continuum radiative flux from nonisothermal stagnation shock layer of nongray atomic gases, employing ionization edges and bound free spectral forms
[AIAA PAPER 70-837] 16 p3001 A70-33932

Nonreacting and chemically reacting laminar flows, calculating equilibrium, nonequilibrium and ideal gas laminar boundary and viscous shock layers over hyperboloid
[AIAA PAPER 70-808] 17 p3005 A70-34456

Near equilibrium shock layers nonequilibrium radiation emission calculation, noting application to Mars entry conditions
[AIAA PAPER 70-773] 17 p3007 A70-34481

Nonequilibrium air ionization in hypersonic viscous shock layers in flow about axisymmetric blunt bodies
17 p3008 A70-34501

Shock layer and combustion in supersonic flows about conical bodies at various angles of attack
17 p3012 A70-35894

Viscous hypersonic flow around nonslender bodies with mass supply at small Reynolds numbers, using thin shock layer model
18 p3206 A70-36259

Nonuniform external flow near blunt body stagnation point in diverging hypersonic thin shock layer
18 p3206 A70-36267

Nonequilibrium ionized hypersonic flow over blunt body at low Reynolds number, using thin shock layer assumption in analysis
18 p3208 A70-36689

Shock layer microwave radiation measurements during reentry flight of spherical nose cone, determining effective plasma temperature
[AIAA PAPER 69-183] 18 p3208 A70-36694

Thin radiating shock layer about axisymmetric blunt bodies, investigating energy-momentum transport coupling
21 p3950 A70-41746

Radiative transfer upstream absorption effect on inviscid stagnation region shock layer radiation
23 p4133 A70-44551

Inviscid rotational supersonic flow near three dimensional stagnation point, examining solutions for compatibility with vortical shock layer boundary conditions
23 p4183 A70-44692

SHOCK LOADS

NT BLAST LOADS

Coherent precipitates effect on explosive shock hardening of pure nickel and Inconel alloy sandwich assemblies determined from simultaneous shock loading at specific pressures
01 p0116 A70-10107

Dynamic response to step transverse loads of viscoelastic annulus of constant Poisson ratio in plane strain, analyzing work and spring-dashpot model
[ASME PAPER 69-LUB-23] 01 p0101 A70-10384

Al double crystals mechanical properties improvement after shock loading, studying surface and dislocation structures and active slip planes number
01 p0124 A70-11449

Naturally and artificially shocked iron meteorites, analyzing microstructure and alterations induced by pressure wave and high temperatures
02 p0377 A70-12506

Statistical measurements of deformation structures and refractive indices in experimentally shock loaded quartz specimens with different crystallographic orientations
02 p0292 A70-12509

Mechanical responses and residual defect structures in brass and stainless steel following explosive shock loading and cold reduction by rolling
03 p0507 A70-13139

Shock wave compression of single olivine crystals and specimens from chondritic meteorites, observing planar deformation microstructures
07 p1391 A70-20353

Static and shock kink bands in biotite deformed by metamorphism, meteorite impact, nuclear explosion and laboratory experiments
09 p1665 A70-22053

Interaction between bodies and spherical detonation wave, measuring force pulse transfer to immobile cylinder and flow patterns past flying blunt body
09 p1659 A70-22186

Uniaxial strain pulse propagation through various materials loaded uniformly with step function pressure by gas dynamic shock wave reflection
09 p1783 A70-23449

Three dimensional deformation of finite circular cylindrical shell under plane shock wave solved in linear form
09 p1785 A70-23618

Supersonic axial flow compressors, studying shocks shared by rotor and stator to obtain high efficiency
11 p2101 A70-25819

Unmanned spacecraft landing shock absorption by hybrid pneumatic configuration having hard surfaced footpad with dual pneumatic bag attenuator
12 p2312 A70-27115

Shock deformation effects on strengthening and microstructure of Ti and Ti-Mo alloys
17 p3120 A70-34420

Impulsive loading of structures via light-initiated sprayed explosives
17 p3059 A70-35162

Impulse loading of rings using magnetically accelerated flyer plates
17 p3187 A70-35163

Dynamic response to step transverse loads of viscoelastic annulus of constant Poisson ratio in plane strain, analyzing work and spring-dash model
[ASME PAPER 69-LUB-23] 19 p3435 A70-37607

Erasure fission tracks in soda-lime glass, tektite, biotite and apatite by shock loading, determining dynamic pressure and associated temperature effects
19 p3414 A70-38035

Dynamic response of distended carbon materials to shock loading defined by measuring equation of state, unloading behavior and spallation strength
20 p3657 A70-40263

Apollo 11 lunar soil and breccia shock metamorphism, examining plastic deformation structures in plagioclase, pyroxene and olivine
21 p3897 A70-41520

Shock metamorphism, grain size and mineralogy of lunar surface regolith materials
21 p3901 A70-41543

Shock metamorphism in lunar microbreccias and loose regolith materials, assuming crater formation by meteorite impacts
21 p3902 A70-41551

Preferred disorder and shock histories of chemical group 4A meteorites from metallographic and X ray diffraction, discussing preterrestrial shock loading
21 p3920 A70-41940

Annealing response of explosively shock loaded Ni, thoria-Ni, Chromel-A, Inconel 600 and thoria-Chrome, noting activation temperature inverse relation with stacking fault free energy
23 p4204 A70-43883

Solid cloth personnel parachutes opening forces, discussing loading conditions, flight path shock parameters, mass ratio variations and elasticity of system
[AIAA PAPER 70-1167] 23 p4137 A70-43992

SHOCK MEASURING INSTRUMENTS

Manganin piezoresistive shock gauge constant current supply using inductor and termination technique eliminating shunting
02 p0303 A70-12737

Mechanical shock accelerometer calibration by light frequency Doppler shift measurement using laser interferometer and single sideband carrier insertion circuit
08 p1493 A70-20602

Impact accelerations measurement for shock pulse amplitude and duration, describing system for direct reading
11 p2055 A70-26447

Shock wave and surface velocity measurements in exploding foil testing by streak photography with image converter camera
21 p3824 A70-40863

Optical FM system with laser interferometer and sideband carrier circuit for measuring mechanical shock by Doppler shift
23 p4193 A70-43964

SHOCK RESISTANCE

NT IMPACT RESISTANCE

Design reliability of through-bulkhead initiator explosive train using parametric test program data, discussing shock transmission and acceptor charge sensitivity energy balance
03 p0549 A70-14124

Bioelectronic equipment shock hazards reduction by current limiting diodes use in signal and ground leads
06 p0998 A70-17285

Selenium additions effect on structural steels transverse mechanical properties, emphasizing plasticity, shock resistance and machinability
07 p1310 A70-19750

Elastic post stability under longitudinal impact on rigid support, considering loading/unloading phases for calculating shock half wave length and critical rate
08 p1591 A70-21443

Materials selection for vibration or shock control based on cost, resonance frequency, strength, weight, etc
13 p2513 A70-29218

Ruggedized spacecraft mechanisms for severe shock environments
16 p2922 A70-34121

Ceramic composite materials structural application, improving brittleness and thermal shock resistance via reinforcing refractory fibers
[ICAS PAPER 70-40] 23 p4267 A70-44138

SHOCK SENSITIVITY

U SHOCK RESISTANCE

SHOCK SIMULATORS

Flight Impact Simulator for simulating bird strikes and bird-proofing of aircraft

16 p2888 A70-33290

Simple high level shock machine producing trapezoidal and terminal peak sawtooth pulses with Al honeycomb impact material

19 p3396 A70-37832

SHOCK SPECTRA

Transition probabilities for diatomic oxygen Schumann-Runge bands determined from shock tube emission studies

02 p0344 A70-12658

High speed sampling used with digital computer providing response shock spectrum data

08 p1481 A70-20610

Dynamic structures design optimization subject to shock spectrum, describing conversational type computer program

16 p2989 A70-33501

Equipment shock test model, using impedance method for spectrum analysis

16 p2992 A70-33988

Shock function response and Fourier spectra relationship, using Fourier transform for equation of motion solution

19 p3456 A70-37381

Shock waves strength and frequency in solar atmosphere heating deduced by empirical model, integrating radiative losses over height

21 p3925 A70-42188

SHOCK TESTS

Conditioned suppression after differential training, discussing shock tests on rats with safe and danger signals

01 p0036 A70-10794

Laser beam technique applied to thermal shock testing of metal disks, using solid state laser, compared to predicted results

01 p0113 A70-11058

Test method for inertial impact sensor switches subjected to multiple and varied shock inputs, using high energy detonators

03 p0494 A70-14128

Design and qualification test criteria for components derived by enveloping peaks of shock response spectra in ground tests of missile stages explosive separation

05 p0922 A70-15849

Impact tube test to find empirical equation for correcting effect of shear in displacing effective pressure center in viscous flow

06 p1052 A70-18383

Single or repetitive shock pulses produced on electrodynamic and hydraulic shakers for shock testing on vibration machines

06 p1030 A70-18438

Hypoxia effect on retrograde amnesia / recent memory loss/ in albino rats subjected to shock and decompression treatments

08 p1441 A70-20477

Force controlled vibration for shock tests, discussing feasibility and merits for simulation testing

12 p2205 A70-27099

Equipment shock test model, using impedance method for spectrum analysis

16 p2992 A70-33988

Shock pulse reproduction on electrodynamic and hydraulic shakers for vibration testing, including SNAP 21 results

21 p3804 A70-40865

Shock and bump testing for dynamic mechanical environments effects encountered by vehicle equipment and components

23 p4195 A70-44331

SHOCK TUBES

NT SHOCK TUNNELS

Rumanian book on shock tubes covering facility construction, gas flow, electronic measuring equipment, etc

01 p0059 A70-11379

Strong shocks and high temperature gases production using multistage gaseous detonation driven shock tube

02 p0274 A70-11855

Shock tube measurements of ionization relaxation times behind shock waves in air at shock Mach numbers from 8 to 17

03 p0471 A70-14360

Plasma unsteady one dimensional flow behind shock wave front in shock tube MGD channel, deriving differential gas dynamics equations

04 p0726 A70-14540

Air-glass particle suspensions flows in shock tubes, deriving effective drag coefficients from simultaneous particle concentration and pressure measurements

04 p0667 A70-14778

Flow fields construction for normal shock waves with nonequilibrium chemical reactions reflected from shock tube end wall

04 p0674 A70-15537

Precursor electron densities measured in nitrogen and air ahead of shock waves, noting shock tube wall reflectivity

04 p0694 A70-15565

Absorption coefficient 5-step model applied to shock tube measurements of end wall radiative heat transfer behind reflected shock waves in air

04 p0787 A70-15606

Shock tube research covering shock structure, atomic and molecular physics, radiation, plasma flows, shock waves in solids and boundary layers

06 p1028 A70-17517

Shock tube chemistry including ideal and nonideal behavior, instrumentation techniques, etc

06 p1005 A70-17727

Free electron formation ahead of strong shock waves traveling into nitrogen-oxygen mixtures in shock tube, observing electron densities

[AIAA PAPER 70-83] 06 p1065 A70-18029

Light emission and gas phase ignition of homogeneous solid propellants under shock tube conditions

[AIAA PAPER 70-120] 06 p1128 A70-18042

Impact tube test to find empirical equation for correcting effect of shear in displacing effective pressure center in viscous flow

06 p1052 A70-18383

Pressure history at end wall of electromagnetic shock tube measured during shock wave reflection by piezoceramic gage

06 p1031 A70-18505

Free piston compression with sonic flow outlet for determining orifice size by matching with bounce parameters

07 p1249 A70-19334

Real gas behavior effect on shock tube temperature and pressure flow nonuniformity for range of Mach numbers

07 p1257 A70-19337

Heat transfer measurement in ionized high temperature gas flows with discharge shock tube and thermal sensors

07 p1283 A70-19663

Carbon dioxide gas dynamic layer in shock tube facility, measuring shape, time, output energy, beam diameter, etc

07 p1301 A70-20021

Dimensionless strength parameter in determining bursting pressure of ductile metal diaphragms in square section shock tubes

08 p1481 A70-21034

Kinetics of homogeneous nitrogen dioxide-carbon monoxide atom transfer reaction in single pulse shock tube, carrying out product analysis by vapor phase chromatography

08 p1455 A70-21263

Shock front stability under free flow in electromagnetically driven shock tubes, determining critical hydrodynamic Reynolds number

08 p1482 A70-21529

Ternary detonation wave configurations calculated by shock polar method using methane-oxygen and hydrogen-oxygen mixtures in shock tubes

09 p1658 A70-22101

Current diffusion from magnetic piston into postshock gas upstream observed in electromagnetic shock tube

09 p1736 A70-23185

Laminar boundary layers behavior in shock tube flows behind primary moving shock wave using perturbation method

09 p1662 A70-23281

Kerr cell-shuttered high speed stigmatic spectrograph for shock tube electron density distribution measurement

09 p1682 A70-23503

Air shock tube driven by exploding mixture of propane and oxygen investigated for shock overpressure variation with distance

10 p1863 A70-23992

Gas viscosity high temperature measurement method in shock tube using boundary layer equations for velocity and static temperature distributions

10 p1867 A70-24151

High intensity shock wave propagation and generation of high enthalpy hypersonic flow studied to determine IMF-2 hypersonic shock tube performance limit

10 p1871 A70-24795

Time dependence of shock wave attenuation at multiple reflection in shock tube after diaphragm burst, using damped vibration solution

11 p2034 A70-25495

Remote controlled diaphragm exploding device associated with shock tube for MHD generator

11 p2090 A70-26170

Distance separating shock wave front of contact surface between motor and target gases in electromagnetic shock tube, discussing surface instabilities

11 p1977 A70-26467

CO dissociation kinetics in Ar and mixtures of O in Ar by shock tube study using vacuum UV absorption

12 p1810 A70-26857

Optimal conditions for obtaining dense low temperature cesium plasma in shock tube with heating calculated by Debye theory

12 p2278 A70-27327

Electromagnetic inductive shock tube design and wave velocity, electron temperature and plasma conductivity measurements

12 p2206 A70-27400

Shock ionized xenon electrical conductivity measurement at high temperatures as function of Mach number, noting equilibrium effects

12 p2281 A70-27807

Flush-mounted electrostatic probes behavior in shock tube over wide range of freestream conditions and bias voltage

12 p2236 A70-27810

Electromagnetic shock tube demonstrations of electrode spark breakdown, strong shock behavior, plasma conductivity and hypersonic shock flow over blunt body

13 p2404 A70-28623

Hypersonic test equipment, describing flight simulating hypervelocity wind tunnels, firing tunnels and shock wave tubes

13 p2384 A70-28927

Reverse flow in plasma generated in conical electromagnetic shock tube and reflected from downstream bulkhead, noting stabilization effects

13 p2469 A70-29974

Turbulent mixing at contact surface in driven shock wave in shock tube with bursting diaphragm for He-Ar test gas mixtures

14 p2566 A70-31030

Two diaphragm combustion shock tube for plasma radiation energy transfer, describing development, performance, make-up and testing

15 p2779 A70-32019

Electromagnetic diaphragm for use in shock tubes, describing construction and operation

15 p2741 A70-32440

Shock tube orifice effect on gas flow velocity and pressure drop, using pressure probes and Jenny friction formula

17 p3069 A70-34699

Pressure histories of burning modes in combustion driven shock tube using ignition of stoichiometric hydrogen-oxygen mixture with He dilution

17 p3195 A70-34922

Forcing time functions prediction for structures under shock tube test, relating aerodynamic parameters to mechanics terminology

17 p3060 A70-35180

Shock tube flow of dissociating oxygen with chemical relaxation using Lax method

17 p3070 A70-35243

Film condensation rates of vaporized substance in shock tube during passage of shock wave, formulating quasi-one dimensional problem

18 p3239 A70-36244

Unsteady two dimensional gas flow calculation axisymmetric shock tube of variable cross section, using numerical method

18 p3240 A70-36275

Heat transfer rates in short flow duration facilities /shock tubes/ from surface temperature measurement of solid exposed to flow

18 p3348 A70-36715

Carbon monoxide oxidation by molecular oxygen in incident shock waves, accounting for chain branching in shock tubes

19 p3374 A70-38271

Event-triggered high speed spectrograph shutter, studying shock tube plasmas

20 p3630 A70-39484

Shock tube high temperature air viscosity from laminar boundary layer heat exchange data

20 p3608 A70-39633

Shock tube with diffuser in low shock wave Mach number range, considering gas flow models to relate wave intensity to initial conditions in chambers

20 p3606 A70-39820

Shock tube facility with high explosive driver for reentry flow conditions simulation of manned planetary flights

21 p3804 A70-40849

Microsecond response bolometer for measuring thermal radiation fluxes in shock tube, discussing design, calibration and performance

21 p3824 A70-40859

Shock tube measurements of bimolecular reaction rates in branched chain hydrogen-carbon monoxide-oxygen system, monitoring flame band emission

21 p3773 A70-41314

Turbulent boundary layers produced by nonuniform shock tube flow, considering effects on chemical kinetic measurements

21 p3807 A70-41315

Optimal conditions for obtaining dense low temperature cesium plasma in shock tube with heating calculated by Debye theory

21 p3860 A70-42068

Computerized nonequilibrium thermochemical gas dynamic solutions for nozzle, shock tube and stream tube flow with arbitrary species and kinetic reactions numbers

22 p3982 A70-42762

Image orthicon detection and recording system adapted for spectroscopic measurements in shock tube emission studies

23 p4197 A70-44469

- Subsonic Ludwig/simple expansion/tube as shock tube for aerodynamic testing, examining flow characteristics 23 p4182 A70-44578
- MPD experiments in inductive hydrodynamic shock tube with round cross section and radial magnetic field 24 p4322 A70-45798
- Clean shock tube maintaining high gas purity level for Ar plasma spectroscopy 24 p4388 A70-46271
- SHOCK TUNNELS**
- Wall roughness effects on model heat transfer in high Reynolds number shock tunnel milliseconds flow using thick film fast response calorimeter 06 p1070 A70-18446
- Simultaneous high speed shock tunnel data acquisition system using single tape recorder, analog or digital readout and computerized reduction 06 p1031 A70-18604
- Shock tunnel preflight assessment of Apollo Block 2 command module base heating 07 p1394 A70-19722
- Dissociative-recombination rate coefficient measured for dissociative recombination reaction in inviscid nozzle flow of reflected shock tunnel, using high temperature and pressure nitrogen 09 p1737 A70-23225
- Arc driven shock tunnel operation with expansive area change at main diaphragm, evaluating flow characteristics 09 p1657 A70-23279
- Superradiant pulsed 5401 A neon laser for interferograms of gas flow through nozzles in shock tunnel 15 p2750 A70-31763
- Hypersonic nozzle ignition phenomenon in reflected shock wind tunnel 19 p3352 A70-38170
- Noble gas mixture large shock tunnel driven linear MHD generator, examining electron density, operating characteristics and electrical properties 20 p3682 A70-40012
- Combustion driven shock tunnel applied to tailored interface operating conditions, controlling mass flow into tube by throttling plates 22 p4006 A70-42765
- Contoured nozzle shock tunnel condensation point, determining flow supercooling over specified pressure range 23 p4182 A70-44588
- SHOCK WAVE ATTENUATION**
- Plane double front detonation wave attenuation by pursuing rarefaction waves, analyzing oscillations, onset mechanism and stability during transition to Chapman-Jouguet mode 08 p1485 A70-21633
- Time dependence of shock wave attenuation at multiple reflection in shock tube after diaphragm burst, using damped vibration solution 11 p2034 A70-25495
- Shock wave extinction point within plane steady upstream flow with uniform entropy and limit velocity 21 p3808 A70-41441
- Shock wave damping by perforated walls in gas channel, visualizing curved fronts with 24-spark HF camera [SMPT PREPRINT 104] 22 p4032 A70-43031
- Plane shock wave decay by interaction with simple wave, solving nonisentropic equations of gas dynamics 23 p4179 A70-43969
- SHOCK WAVE CONTROL**
- Supersonic transport sonic boom theory and effect reduction, discussing Whitham rule, bow shock, overpressure, engine and aircraft design and shock wave control 16 p2843 A70-34263

- Combustion chamber traveling oscillating shock wave as driving mechanism of high amplitude axial mode solid rocket combustion instability 02 p0353 A70-12009
- Hydrodynamic structure of multifront detonation waves produced in gases by primary shock interaction with transverse disturbances 02 p0278 A70-12027
- Combustor geometry and heat release effects on supersonic combustor thrust efficiency, considering shock-free, normal and oblique shock situations 02 p0354 A70-12043
- Atomic and electron densities measurements in shock wave interactions with magnetic fields, using interferometric and spectroscopic method 03 p0529 A70-12876
- Thin elastic cylindrical panel motion induced by plane acoustic shock wave analyzed by integrating nonlinear motion equations using finite difference scheme 03 p0524 A70-13377
- Reaction of three dimensional shock wave with turbulent boundary layer in supersonic flow around plate 03 p0409 A70-13876
- Interface instability between gases due to shock wave increased linearly with time 04 p0673 A70-15245
- Rocket nozzle originated oblique shock waves effect on near-field plume impingement flows, heat transfer and pressure distribution 04 p0737 A70-15421
- Numerical results for perturbed downstream flow field resulting from entropy wave interaction with normal shock and oblique shock generated by wedge flow 05 p0835 A70-16788
- Reflected waves development during shock waves collision and during shock collision with constant temperature wall, using Monte Carlo method 06 p1109 A70-17520
- Far and near field solutions of plane steady transonic flow past thin airfoil including imbedded shock waves using small disturbance theory [ALAA PAPER 70-188] 06 p0969 A70-18056
- Combustion processes and ignition criteria in shock wave ignition of liquid fuel drop in oxidizing atmosphere 06 p1180 A70-18142
- Static pressure, temperature profiles, heat transfer and optical data for turbulent boundary layer-shock interaction with/without injection [ALAA PAPER 70-91] 06 p1042 A70-18210
- Cone bluntness effect on merging onset and downstream flow in merged region at Mach 8 and various Reynolds numbers 06 p0980 A70-18352
- Supersonic oblique shock wave reflection on turbulent boundary layer, considering layer separation and pressure effects 07 p1255 A70-19210
- Hydromagnetic wave interaction with magnetopause and bow shock, considering solar wind turbulence and magnetopause tail stability 07 p1270 A70-20070
- Interaction between bodies and spherical detonation wave, measuring force pulse transfer to immobile cylinder and flow patterns past flying blunt body 09 p1659 A70-22186
- Water vapor high temperature dissociation kinetics in dilute mixtures with argon in shock waves 09 p1629 A70-22319
- Interaction shock shape prediction for gaseous and liquid injection in supersonic flow, using solid body and complementary models 09 p1662 A70-23244
- Laminar boundary layers behavior in shock tube flows behind primary moving shock wave using perturbation method 09 p1662 A70-23281
- Shock deformation of single crystal biotite /lepidomelane/ imbedded in impedance matching NaI, relating kinking intensity to peak pressure and pulse duration 09 p1670 A70-23375
- Shock wave interactions effect on propagation in ducts with gradual or sudden change in cross section, using schlieren spark photography 09 p1664 A70-23735
- Shock wave initiated two dimensional time dependent ducted flows in nonuniform regions using fluid-in-cell method, discussing density, pressure and energy distributions 09 p1665 A70-23740
- Upstream influence distance estimation associated with critical pressure rise in two dimensional shock-boundary layer interactions based on Lighthill subsonic inner boundary layer concept 10 p1862 A70-23840
- Initial blast wave axisymmetric shock-on-shock interaction for blunt bodies moving supersonically at zero angle of attack solved in Taylor series 10 p1797 A70-23954
- Gas stream velocity field produced by shock wave impinging against wing moving at supersonic speed 10 p1799 A70-24124
- Plane shock wave interaction with supersonic blunt body, considering pressure-time studies for stagnation point of flow 10 p1801 A70-24145
- Strong shock wave reflection from rigid wall at high shock velocities, studying effect on flow structure 10 p1922 A70-24152
- Oblique blast wave interaction with small bend along plane wall analyzed for diffraction using conformal transformation and complex variable techniques 10 p1869 A70-24524
- Solar cosmic rays interaction with interplanetary shock waves, discussing chromospheric eruptions 13 p2476 A70-28959
- Inert gas ionization behind shock wave at high Mach numbers, using electrical conductivity and continuum emission measurements 13 p2388 A70-29380
- Shock wave interaction with burning liquid fuel droplets in gaseous oxygen atmosphere, observing wave amplification due to mass combustion rate increase 13 p2522 A70-29424
- Solar wind interaction with earth, moon, planets and comets, using hypersonic fluid analog involving shock wave interactions 14 p2631 A70-30360
- Shock and simple wave interactions, using quasi-linear equations for forward facing wave overtaking forward facing shock 14 p2567 A70-31283
- Collisionless shocks structure in turbulent wave-particle interactions, obtaining ion distribution function 16 p2959 A70-33970
- Hypersonic cruise vehicles viscous interactions areas, examining compression corners, shock interactions, laminar and turbulent flow, boundary layer separation, etc [ALAA PAPER 70-781] 17 p3007 A70-34475
- Cloud droplet agglomeration by weak shock waves, discussing growth mechanism 17 p3067 A70-34549
- German monograph on shock wave diffraction at spheres and cylinders 17 p3071 A70-35377
- Fast response transducer for measuring transient pressures due to shock interaction 17 p3093 A70-35484
- Cumulative jets during shock induced collapse of air cavities in thin fluid layers, using high speed motion picture photography 17 p3074 A70-35742
- Shock wave diffraction by moving thin wing over flat terrains, discussing aircraft blast encounter 18 p3205 A70-36195
- Conical shock wave-turbulent boundary layer interaction data obtained for adiabatic wall conditions at supersonic free stream Mach numbers, including suction effects 18 p3241 A70-36448
- Shock wave attenuation and reflection effects on turbulent hypersonic wakes in ballistic ranges 18 p3237 A70-36708
- Thermal decomposition of nitrogen tetroxide and nitrogen dioxide induced by shock waves, examining temperature effects 19 p3373 A70-38265

- Pressure field behind plane shock wave interacting with curved boundary
19 p3406 A70-38447
- Supersonic boundary layer interaction with shock wave produced by wedge slope
20 p3557 A70-39139
- Flow rate, momentum and energy perturbations during gas motions through shock wave, discussing acoustic waves impinging from supersonic region
20 p3612 A70-39815
- Manganin in wire and thin foil geometries, measuring shock piezoresistance coefficient as function of deformation
20 p3687 A70-40166
- Large scale flare associated solar wind disturbances observed by Vela satellites, noting prolonged elevated flow speed after shock
21 p3881 A70-41080
- Loads induced by terminal shock boundary layer interaction on cone-cylinder bodies, discussing angle of attack effect
21 p3746 A70-41863
- Pressure field behind shock wave after interaction with nonuniform density region, describing shock front shape
21 p3810 A70-41964
- Elastic cylindrical shell transient response to plane acoustic shock wave traveling through light fluid medium
22 p4114 A70-42647
- Heat transfer from turbulent boundary layer interacting with shock and expansion waves in supersonic flow
23 p4134 A70-44573

SHOCK WAVE LUMINESCENCE

- Strong radiating shock wave structure and reflection at rigid wall, investigating flow velocity, density and temperature changes
05 p0956 A70-15788
- Transparent gas radiation behind strong shock wave front with small pressure gradient due to energy losses
08 p1486 A70-21986
- Radiant shock layer in hypersonic air flow past blunt bodies, showing effects on temperature field and density
12 p2159 A70-28245
- Ionization relaxation behind reflected luminous shock front in argon plasma flow interaction with magnetic fields, using spectroscopic and streak interferometric observations
19 p3479 A70-37814

SHOCK WAVE PROFILES

- Chapman-Enskog expansion for Boltzmann equation solution, using PLK method to obtain higher approximations for shock wave structure
01 p0063 A70-10923
- Moving gas with thermodynamic relaxation process, discussing bulk viscosity and application to shock structure calculations
01 p0063 A70-10927
- Topological properties of plane flow in subsonic region behind smooth shock wave in uniform supersonic flow, discussing shock wave convexity
01 p0068 A70-11580
- Shock wave structure determination in simple monatomic gas, using statistical counting and successive approximation algorithm
01 p0068 A70-11601
- Shock wave shapes in hypersonic flow past blunt conical nosed circular cylinders, using analogy with Savic perturbed hypersonic blast wave theory
02 p0277 A70-11862
- Shock wave shapes over axisymmetric power law bodies in hypersonic flow, noting asymptotic flow theory implications
03 p0406 A70-12946
- Ionization and electron temperature dependence on shock wave structure in partially ionized hydrogen plasma allowing for luminescent energy losses
03 p0465 A70-13060
- Shock wave structure in quasi-neutral weakly ionized plasma using Mott-Smith functions
03 p0535 A70-14362
- Sound wave propagation in liquid containing gas bubbles allowing for relative motion of bubbles and liquid, deriving steady shock wave structure
04 p0671 A70-14991
- Shock wave width and temperature expressions for argon-helium mixture
04 p0672 A70-15223
- Rocket exhaust plume size determined from schlieren photographs during wind tunnel tests, noting agreement with Hill-Habert theory
04 p0736 A70-15417
- Strong radiating shock wave structure and reflection at rigid wall, investigating flow velocity, density and temperature changes
05 p0956 A70-15788
- Gas dynamics theory with nonequilibrium radiative and collisional ionization applied to strong normal shock wave structure
05 p0831 A70-15870
- Second order wave structure theory for shock wave system from body in supersonic flight analyzed for planar flows
05 p0790 A70-16797

- Weak shock thicknesses with turbulent scattering as dissipative mechanism compared with magnitude in sonic boom flight tests and explosions
[AIAA PAPER 70-54] 06 p1042 A70-18190
- Molecular beam continuum model to determine structure of shock waves in diatomic gases, comparing calculated profiles with measurements in nitrogen
06 p1050 A70-18338
- Kinetic theory study of shock wave structure in rotationally relaxing diatomic gases
06 p1050 A70-18339
- Kinetic model equation for shock structures in rotationally relaxing gas with internal degrees of freedom
06 p1050 A70-18340
- Normal hypersonic shock wave structure in diatomic gas, measuring density by electron beam fluorescence technique
06 p1050 A70-18341
- Normal shock wave structure in binary gas mixtures of chemically inert monatomic molecules, using kinetic theory moment method
06 p1051 A70-18343
- Shock structure in binary gas mixture, discussing governing equations and Chapman-Enskog procedure
06 p1051 A70-18344
- Least squares method to determine shock thickness at arbitrary Mach number from Boltzmann equation for rigid sphere rarefied gas
06 p1051 A70-18345
- Shock wave structure in He-Ar mixture velocity and temperature profiles based on kinetic model equations
06 p1051 A70-18346
- Surface pressures and shock wave shapes on sharp flat plates and wedges in rarefied hypersonic transition flow with emphasis on merged layer regime
06 p0982 A70-18362
- Shock wave profiles in rarefied gas expansion flows, using static and impact pressure probes
06 p1052 A70-18386
- Uniform supersonic flow with receding shock wave past smooth profile
07 p1187 A70-18674
- Liquid rocket motors with concentrated combustion, studying nonlinear longitudinal instabilities with shock waves in combustion chambers
07 p1362 A70-18917
- One dimensional steady neutral shock wave structure, using expanding Boltzmann equation distribution function in terms of Hermite polynomials
07 p1260 A70-19984
- Hydromagnetic ionizing shock wave structure in electromagnetic fields, using model composed of strong adiabatic shock to translational equilibrium followed by ionization initiation
07 p1351 A70-19985
- Shock wave structure in binary mixture of monoatomic gases based on integral kinetic equations, using iteration process
08 p1483 A70-21086
- Hypersonic spherical gas expansion into finite pressure region with transition from supersonic to subsonic flow in shock wave, discussing structure and pressure effects
09 p1658 A70-22116
- Shock wavefront configurations before inclined obstacles in supersonic flow, studying inclination angle role
09 p1604 A70-22443
- Shock wave configurations across compression cascades in transonic approach flow
09 p1604 A70-22657
- Shock wave structure nonequilibrium kinetic model using Boltzmann and Navier-Stokes equations
09 p1662 A70-23306
- Plane, cylindrical and spherical blast waves structure with ionization at local thermodynamic equilibrium analyzed using successive approximation to non-similar solution
10 p1967 A70-23991
- Reflected shock wave structure and velocity at rigid wall, assuming radiative heat transfer as dissipative process
10 p1967 A70-24018
- Bidimensional curved weak shock wave structure, deducing transonic equation from Navier-Stokes equations
10 p1800 A70-24138
- Vibrational and dissociation relaxation effects on plane shock wave structure and supersonic flow around blunt bodies
10 p1801 A70-24150
- Quasi-transverse constant profile wave in finite elasticity with isothermal shock at discontinuity compared to Whitham breakdown
10 p1956 A70-24191
- Plane exponential reactive shock waves following piston impact on gamma-law gas solved by similarity method, including Whitham conditions and shock acceleration
10 p1967 A70-24194
- Expanding arch structure of type 2 solar radio burst observed with Culgoora radioheliograph
11 p2105 A70-25749

- High purity beryllium dynamic tests determining Hugoniot equation of state, shock profile and spall threshold/onset of microcracking/ for elastic pulses
[AIAA PAPER 69-360] 11 p2066 A70-25964
- Thermal shock waves structure and effective temperature in stellar atmospheres taking into account absorption effects and possible isothermicity
12 p2306 A70-27861
- Shock patterns for simple caret wings generating specific flow patterns
13 p2509 A70-28542
- Satellite plasma diagnostics for electric and magnetic fields and fine structure of collisionless shocks in solar wind plasma flows and interplanetary shocks
13 p2481 A70-30069
- Radiating gas flow about pointed bodies, investigating shock curvature at wedge or cone tip and straight shock waves flow field downstream
14 p2663 A70-30267
- Strong shock waves profiles in monatomic perfect gases by Monte Carlo simulation, obtaining maximum density slope thicknesses
14 p2567 A70-31031
- Uniform supersonic flow with receding shock wave past smooth profile
15 p2671 A70-31466
- Periodic shock waves amplitudes and profiles, investigating longitudinal nonlinear oscillations of gas excited in closed tube
15 p2719 A70-31482
- Shock waves structure in radiating gases at high temperatures, taking into account radiation anisotropy in shock front
15 p2720 A70-31645
- Collisionless shock waves in magnetized plasma as function of Alfvén-Mach number, measuring electron temperature jump on wave front spectroscopically
15 p2779 A70-32116
- Transonic compression grid functions, considering shock wave configurations
16 p2836 A70-33752
- Hypersonic internal flow investigation by differential equation numerical integration, determining shock shape and surface pressure
16 p2838 A70-33881
- Mach disk structure in free low density expanding supersonic jet from static pressure probe measurements
17 p3068 A70-34696
- Shock wave and viscous layer structures ahead of blunt body in rarefied hypersonic flow, using continuum theory
17 p3009 A70-34698
- Hydromagnetic shock waves structure, investigating resistive, viscous and thermal conduction dissipation effects on discontinuities
17 p3140 A70-34928
- Normal shock structure in thermally perfect gas, using perturbation methods
17 p3070 A70-35244
- Multiplying factors role in iterative solution of shock wave structures with large radiation-convection ratios
17 p3075 A70-35888
- Electrostatic turbulence in bow shock magnetic structures observed by OGO 5, explaining turbulence as ion acoustic or Buneman mode due to two stream instability
18 p3311 A70-36006
- Pressure distribution shock pattern and impact wave resistance in frictionless plane parallel and source shaped supersonic flow
18 p3207 A70-36385
- Viscoplastic solids, computing plane shock wave propagation structure from nonlinear constitutive relations
18 p3338 A70-36435
- Explosive phase of solar flares in nonuniform atmosphere, determining explosion energy and shock wave front shape for various times
20 p3699 A70-39463
- Entropy layer in hypersonic flows, determining body configuration from shock wave shape described by coordinates power function
21 p3743 A70-40610
- Hypersonic flat and biconvex conical wings, calculating yaw effects on shock shape and pressure distribution
21 p3761 A70-40918
- Collisionless shock wave geometry, determining dispersion relation for ion acoustic waves propagating in plasma
21 p3856 A70-41082
- Shock waves and solitons structure propagating oblique to magnetic field in warm plasma based on two-fluid equations
21 p3857 A70-41382
- Dual satellite magnetic field and plasma measurements of earth bow thick pulsation shock by Vela 3A and Explorer 33
22 p4013 A70-42470
- Time dependent shock wave structure, considering shock tube flow as initial and boundary value problem
22 p4009 A70-42516

- Large scale magnetic field and spiral shock pattern of Galaxy, using density-wave theory 22 p4103 A70-42981
- Numerical model of light diffraction on plane shock waves at optical phase jump region for shadow and schlieren techniques [SMPT PREPRINT 97] 22 p4035 A70-43058
- Cylindrical converging shock waves generation, propagation and structure at high pressures 22 p4012 A70-43431
- Relaxation gas dynamics, discussing vorticity and drag generation by relaxation, linearized theory and shock waves structure 23 p4178 A70-43889
- Two dimensional steady flow around slender profiles at free transonic stream with curved compression shocks, approximating by hodographic method 23 p4131 A70-44023
- Collisionless plasma shock wave structures from geophysical and astrophysical phenomena standpoint, describing tarantula experiment 23 p4225 A70-44184
- Heat transfer and shock wave shapes about blunt slender cones in viscous-inviscid coupling hypersonic flow 23 p4134 A70-44569
- Shock curvature at wedge or cone tip in radiating gas flow, noting differences between radiative and chemically coupled gas dynamics 23 p4135 A70-44638
- Rocket engine nozzle with wall-mounted obstacle, examining shock front shape, pressure distribution and side force characteristics 23 p4234 A70-44684
- Upstream gas photoionization caused precursor ionization effects on MHD switch-on shock structure 24 p4382 A70-45106
- Normal shock waves structured by nonequilibrium radiative and electron-atom collisional ionization, using generalized radiation model 24 p4324 A70-45290
- Shock wave structure calculation in liquids containing gas bubbles, taking into account compression wave steepening by convection 24 p4326 A70-45783
- ## SHOCK WAVE PROPAGATION
- Multiple pulsations mechanism during detonation spherical wavefront propagation in channels with various cross sections, noting volume effect 01 p0060 A70-10135
- Shock wave structure in two phase media with temperature and velocity gradients and possible phase transitions 01 p0060 A70-10147
- Reflection and transmission characteristics of screens in duct obstructing shock propagating in unsteady compressible fluid, describing theoretical models and experimental detection 01 p0060 A70-10224
- Steady one dimensional flow in gas filled cylindrical tube, studying shock induced compression wave generated by sudden piston acceleration 01 p0062 A70-10804
- Pressure oscillograms and schlieren photographs of shock wave amplification during interaction of cellular flame of gas mixtures in cylindrical combustion chamber 01 p0217 A70-11014
- Calorimetric measurement of electron temperature in collisionless shock wave propagating in plasma column, discussing role of H beta line Stark broadening 01 p0153 A70-11589
- Arc phenomena for producing interaction effects, discussing reflected shocks rarefaction waves and gas dynamics 02 p0345 A70-11863
- Radiation effects on postshock gas state, noting shock wave optical thinness dependence on radiative cooling and photon flight time 02 p0277 A70-11867
- Axial mode shock wave oscillations in end-burning solid rocket motor, obtaining periodic solutions for flow properties, solid temperature and burning rate 02 p0353 A70-12010
- Interstellar media under action of supernova or nova, solving Navier-Stokes equations of hydrogen plasma for motion during shock wave formation 03 p0564 A70-13221
- Acoustic and shock waves propagation in multicomponent media, assuming uniform speed for components and complex density dependence of media on pressure 03 p0465 A70-13329
- Ionizing shock wave propagation into magnetic field from Ar gas flow characteristics in electromagnetic shock tube 03 p0532 A70-13548
- Nonequilibrium zone radiation intensity profiles behind strong shock waves in air determined for specific wavelengths and shock velocities 03 p0535 A70-14364
- Reflected shock wave velocity, boundary layer disturbance and wall ionization measurements using thin film resistance thermometers 04 p0666 A70-14537
- Flow viscosity and heat conduction effects on shock wave propagation in bent channel with weak Mach reflection 04 p0671 A70-15013
- Solar flare duration effect on propagation and modification of forward-reverse shock pair between sun and 1 AU, using equations of motion for spherically symmetric flow 04 p0740 A70-15104
- Precursor electron densities measured in nitrogen and air ahead of shock waves, noting shock tube wall reflectivity 04 p0694 A70-15565
- Sonic boom propagation in still atmosphere with vertical temperature gradient, using graphical method of determining rays for aircraft motion 05 p0791 A70-15786
- Sonic boom research, considering exposure pattern development, propagation in inhomogeneous atmosphere and effects on structural responses 05 p0796 A70-16795
- Doppler shift of laser beam reflected from shock wave measuring velocity through optical mixing 05 p0852 A70-16993
- Self similar flow patterns arising during cylindrical shock and detonation waves propagation in gas at rest, considering MGD shock waves 06 p1119 A70-17516
- Kinetic relaxation and Boltzmann equations for studying shock waves propagating in gas composed of rigid ideally elastic spherical molecules without internal degrees of freedom 06 p1036 A70-17756
- Radioheliograph observations at 80 MHz of directive shock wave propagation in solar corona 06 p1144 A70-18007
- Free electron formation ahead of strong shock waves traveling into nitrogen-oxygen mixtures in shock tube, observing electron densities [AIAA PAPER 70-83] 06 p1065 A70-18029
- Pressure-time history in spherical shock waves flow field at low ambient pressures recorded with piezoelectric transducers, showing shock strength decrease 06 p1052 A70-18385
- Single or repetitive shock pulses produced on electrodynamic and hydraulic shakers for shock testing on vibration machines 06 p1030 A70-18438
- Pressure history at end wall of electromagnetic shock tube measured during shock wave reflection by piezoceramic gage 06 p1031 A70-18505
- Sonic booms propagation in nonhomogeneous atmosphere, outlining effects on intensity and range for transport and military fighter aircraft 07 p1190 A70-18779
- Strong explosion model for analyzing shock wave propagation after chromospheric flare allowing for quasi-radial motion of unperturbed solar wind 07 p1367 A70-19489
- Gaseous detonation transverse wave propagation and measurement from smoked foil records 07 p1424 A70-20006
- Interstellar media under action of supernova or nova, solving Navier-Stokes equations of hydrogen plasma for motion during shock wave formation 08 p1580 A70-21654
- Two temperature gasdynamics for binary gas mixtures of differing molecular weight components, analyzing ultrasound and shock wave propagation 08 p1486 A70-21808
- Accelerating shock wave fronts by detonating passive trotyl and hexogen using high speed photography 09 p1658 A70-22103
- Plane shock wave stability propagating in external magnetic field determined by temperature dependence of medium electrical conductivity 09 p1658 A70-22168
- Laser heating of plasma, motion pattern and shock wave parameters during absorption burst in solid body vapor, using numerical analysis 09 p1695 A70-22181
- Book on sonic boom effects covering shock waves generation and propagation, elastic structures response to dynamic loads, structural damage, etc 09 p1695 A70-22203
- Shock wave interactions effect on propagation in ducts with gradual or sudden change in cross section, using schlieren spark photography 09 p1664 A70-23735
- Progressive shock waves propagation, reflection and transmission through sudden changes in pipe cross sectional area, obtaining boundary conditions for quasi-steady junction flow 09 p1664 A70-23738
- Longitudinal shock wave oblique reflection in nonlinear harmonic elastic material in terms of wave propagation 10 p1956 A70-24097
- Shock wave and gas flow structure at constant Mach number past three dimensional blunt bodies, applying method for unsteady flow 10 p1799 A70-24127
- Super sonic booms occurrence and propagation, discussing aircraft operating conditions for prevention of effect on ground 10 p1805 A70-24130
- Symmetrical, asymmetrical and three dimensional sonic flows past finite obstacle, investigating regions upstream and downstream from shock waves for airflow 10 p1800 A70-24134
- Velocity and temperature distribution behind shock waves in hydrogen plasma measured to determine factors responsible for discrepancies in Rankine-Hugoniot conditions 10 p1867 A70-24149
- Shock propagation from point explosion energy source into cold exponential atmosphere with radiative heat transfer in rear of shock front 10 p1869 A70-24525
- High intensity shock wave propagation and generation of high enthalpy hypersonic flow studied to determine IMF-2 hypersonic shock tube performance limit 10 p1871 A70-24795
- Electric field structure at shock wave front propagating in weakly ionized gas under Ramsauer effect 10 p1871 A70-25121
- Cylindrical shock wave two dimensional propagation in conducting plasma in magnetic field, assuming isentropic flow along streamline 11 p2091 A70-26174
- Shock wave reflection into ideal gas flow with linear density variation analyzed for flow field 12 p2211 A70-27832
- Interplanetary shock waves layer formation in collisionless medium, using bulk transport parameters for dissipation requirement 12 p2308 A70-27885
- Shock wave formation and propagation analyzed by hydrodynamic model of two directional traffic flow based on continuity equations and velocity-density empirical relations 12 p2212 A70-28196
- Piston formed weak steady shock wave propagation in relaxing gases, investigating via characteristics method [DFVLR-SONDDR-38] 12 p2212 A70-28206
- Plane acoustic shock wave vertical propagation in gravity-stratified atmosphere with temperature gradient, using homogeneous perturbation velocity [DFVLR-SONDDR-35] 12 p2212 A70-28209
- Heat transfer and flow stabilization dependence on initial shock wave reflection from conducting wall 12 p2213 A70-28228
- Plane electrostatic shock waves propagation in plasma with electrons in potential equilibrium and collision free ions 13 p2461 A70-28730
- Shock wave multiple ionization in hydrogen with impurities, discussing intensity and duration effects on electron temperature profile and ion concentrations 13 p2388 A70-29369
- Adiabatic index effect on shock waves reflection, emphasizing critical angle dependence on incident wave intensity 13 p2388 A70-29416
- Initial pressure and pressure ratio effects on shock wave velocity evolution in shock tube 13 p2389 A70-29630
- Interplanetary shock wave properties in solar wind, determining propagation velocity, transit times proton density, proton and electron temperatures 13 p2481 A70-30066
- Acoustic and shock waves propagation in multicomponent media, assuming uniform speed for components and complex density dependence of media on pressure 14 p2566 A70-30709
- Self similar one dimensional flow behind plane shock propagating in exponentially decreasing atmosphere, considering radiation mean free paths and radiative heat transfer 14 p2567 A70-31032
- Critical Mach numbers for transverse resistive shock waves as function of fluid/magnetic pressure ratio compared with cold plasma theory 14 p2623 A70-31036
- Monograph on nozzle design effect on starting process initiated by plane shock wave in reflected shock tunnel 15 p2672 A70-31692
- Unloading shock waves propagation in elastoplastic medium, investigating strain hardening effect on shock strength decay, residual strains and radial stresses 15 p2815 A70-32002
- Shock wave propagation during moving pulsed plasma interaction with stationary gas discharge plasma 15 p2780 A70-32197

- Strong explosion model for analyzing shock wave propagation after chromospheric flare allowing for quasi-radial motion of unperturbed solar wind
15 p2795 A70-32734
- Hypervelocity impact generated shock propagation based on governing differential equations, using fluid mechanical model for perfect gas and real fluid
15 p2824 A70-32788
- Equation of state of solids measured by shock wave techniques, considering elastic-plastic flow in plane wave geometry
15 p2824 A70-32789
- Shock wave front propagation instability in decreasing density medium, applying to stellar structure
16 p2890 A70-33200
- Shock wave propagation through giant star atmosphere, using approximate analytical method

08 p1433 A70-21238
- Shock ionized Ar flow properties estimation using alignment charts
08 p1551 A70-21324
- Water vapor dissociation in dilute mixtures with Ar behind shock waves, studying OH concentrations using flash-absorption technique
08 p1548 A70-21355
- Initial deceleration of solar wind positive ions upstream of earth bow shock determined fromOGO 5 high time resolution plasma measurements
08 p1562 A70-21377
- Nonlinear relativistic wave velocity distribution within spherical nucleus bounded by shock wave in superdense gas determined by Cauchy problem
08 p1484 A70-21403
- Supernovae hydrodynamics, discussing early light curves energy requirements and shock wave dynamics in terms of neutrino diffusion
09 p1749 A70-21992
- Supersonic air jet structure in central shock wave region affected by both Mach number and flow rarefaction
09 p1734 A70-22185
- Massive blowing from porous cone with embedded shock wave in supersonic flow, assuming inviscid and conical injected flow field
09 p1662 A70-23216
- Inviscid hypersonic small disturbance theory applied to flow behind concave and convex exponential shock waves, determining supporting two dimensional airfoil surfaces
09 p1605 A70-23220
- Lunar limb weak solar wind shock due to conducting crust-interplanetary magnetic field interaction
09 p1764 A70-23485
- Electron and proton temperature differential near earth bow shock determined from plasma probe measurements by Vela 4B satellite
09 p1670 A70-23486
- Charged particles velocity profile across shock determined by induction velometry, considering eddy currents effects on induced potential gradient
09 p1738 A70-23677
- Flow parameters behind shock waves calculated, determining amount of condensate evaporation and error in pressure measurements due to evaporation
09 p1607 A70-23711
- Blast wave eigenvalues in asymptotic expansions approximation for hypersonic flows past blunt bodies
10 p1797 A70-23953
- Two-stream and cross-stream effects on nonlinear wave stability with shock in collisionless plasma
10 p1921 A70-23967
- One dimensional fluid flows with shock waves described by constructing discontinuous solution for gas dynamic equations, using successive approximation
10 p1866 A70-24113
- Shock and thermodynamic phenomena of real gases near critical points, discussing specific volume and specific enthalpy increases
10 p1867 A70-24136
- Radiating shock wave reflection from rigid wall studied for velocity and structural changes, assuming unsteady and one dimensional flow
10 p1867 A70-24140
- Shock pressure and impulse caused by Q switched laser light absorption, considering temperature dependence of EM radiation penetration depth
10 p1900 A70-24422
- Supersonic transports bow and rear shock pressure jump lower bounds for various physical constraints
10 p1805 A70-24558
- Stationary collisionless shock waves in hot initial plasma produced by theta pinch discharge, discussing magnetic field, density and electron temperature profiles
10 p1924 A70-24697
- Head wave distance from body determined for slender pointed profile in subsonic region of transonic flow
10 p1803 A70-24780
- Auroral motions determined by absorption onsets pattern and infrasonic wave morphology
10 p1880 A70-24803
- Laboratory simulation for shock waves around earth, moon and Venus based on artificial solar wind and magnetic dipole interaction study
10 p1948 A70-25182
- Chemical kinetics of carbonyl fluoride thermal decomposition in argon and nitrogen diluent behind shock waves, using IR monitoring method
11 p1995 A70-25824
- Chemical kinetic model for photoexcitation and photoionization of cold argon ahead of strong shock wave, predicting electron and excited atom concentrations
[AIAA PAPER 68-666] 11 p2090 A70-25953
- Laminar boundary layer behind normal shock wave with vaporization and combustion, obtaining profiles on analog computer
11 p2148 A70-25967
- Gas passing through shock wave, investigating constitutive relations for stress and heat flux using Maxwell moment method
11 p2036 A70-26015
- Trans-Alfvénic ionizing shock waves stability in absorption of rotational Alfvén disturbances
11 p2090 A70-26023
- Modified laser Michelson interferometer for probing highly transient plasmas occurring behind incident shock waves in shock tubes
11 p2052 A70-26369
- Plasma density and velocity required for simulating solar wind flow over magnetosphere /bow shock/ in plasma wind tunnel
11 p2032 A70-26372
- Methane oxidation behind reflected shock waves between 1350-1900 K, measuring pressure, chemiluminescence and 3067 Å absorption of OH radical
11 p2150 A70-26380
- Lambda type pseudoshock /shock during supersonic flow deceleration to subsonic in duct/, investigating mechanism by schlieren photography
11 p2037 A70-26408
- Shock waves in unsteady aortic blood flow at systole beginning, considering aorta elastic properties and shock formation distances
11 p1992 A70-26479
- Reaction rate constants in heated mixture of hydrogen, carbon dioxide and Ar behind shock waves measured by IR spectroscopy
12 p2274 A70-26891
- Monograph on acoustic theory for determining frictional pressure drop effect on gas state behind reflected wave in shock tube
12 p2209 A70-27000
- Central shock and target displacement of underexpanded supersonic jets with obstacle at nozzle exit, using Toepler schlieren photographs
12 p2156 A70-27293
- Lunar limb shock wave observed by Explorer 35 satellite defined with respect to solar wind flow direction, discussing formation mechanism
12 p2302 A70-27594
- Vibrational dissociation relaxation effects on chemical reactions, molecular energy and thermal quanta in air flow behind direct shock wave
12 p2213 A70-28232
- Electromagnetic shock tube demonstrations of electrode spark breakdown, strong shock behavior, plasma conductivity and hypersonic shock flow over blunt body
13 p2404 A70-28623
- Correction to Smyrn results for perturbation pressure in interaction field behind plane shock diffracted by supersonically moving thin yawed wedge
13 p2338 A70-28822
- Collisionless electrostatic shock generation conditions, simulating homogeneous counterstreaming plasmas by computer
13 p2462 A70-29110
- Fast time-resolved spectra of earth bow shock electrostatic turbulence based on broadband analog electric data fromOGO-5
13 p2396 A70-29111
- Shock waves in partially ionized gas discharge argon plasma, recording potential jump at wavefront
13 p2388 A70-29419
- Q switched ruby laser pulses nonlinear absorption by partially ionized plasma behind reflected shock wavefront, observing absorptivity dependence on light intensity
13 p2429 A70-29420
- High Mach number viscous flow past cylinder with cylindrical shock wave
13 p2391 A70-29970
- Simultaneous equations for motion location, speed and direction in acoustic tracking of supersonic objects, recording shock wave times of arrival with microphone system
13 p2450 A70-29988
- Electron and positive ion velocity distributions measurements near earth bow shock by electrostatic analyzer on Vela 4B satellite
13 p2481 A70-30068
- Explosion analogy to study hypersonic flow region behind shock wave including boundary layer at blunt body surface
14 p2528 A70-30711
- Shock wave diffraction at wedge moving at supersonic velocity, solving Hilbert space formulated for constant parameter flow
14 p2528 A70-30712
- Turbulent mixing at contact surface in driven shock wave in shock tube with bursting diaphragm for He-Ar test gas mixtures
14 p2566 A70-31030
- Solar wind interaction with planetary ionosphere, considering flow behavior across bow MHD shock
14 p2647 A70-31073
- Internal shock waves in axisymmetric flowfield of perfect gas past blunt cone, noting roles of Mach number and cone half angle
15 p2672 A70-31592
- Type 2 and 4 solar radio emission, showing bursts exciting by common shock wave ejected from flare region
15 p2794 A70-32620
- Tungusk meteorite atmospheric shock waves obtained from simulation experiments based on forest damage
15 p2806 A70-32756
- Ions energy spectra in plasma heated by shock wave, using passive corpuscular diagnostic technique
15 p2781 A70-32821
- Collisionless shock waves model in solar wind plasma, discussing instability and energy dissipation
15 p2795 A70-32825
- Hemisphere model flow field investigations in low density plasma wind tunnel, considering flow regimes of transition and shock formation
15 p2673 A70-32838
- High temperature combustion wind tunnels for investigating gas and liquid fuel combustion stabilized by shock waves in supersonic flow
16 p2996 A70-32991
- Shock wave stability in plane steady flow at uniform entropy and limiting velocity
16 p2890 A70-33101
- Monograph on steady shock waves in one dimensional frictionless gas flows with thermodynamic relaxation, using continuum mechanics
16 p2891 A70-33294
- Axisymmetric detached shock preceding blunt body immersed in hypersonic monatomic gas flow, considering radiative ionization in cold precursor by differential approximation
16 p2839 A70-34252
- Flowfields behind reflected shock waves, predicting end-wall radiative heat transfer and radiative gas dynamic coupling effects
17 p3065 A70-34480
- Time dependent characteristics of dense argon plasma formed by pulsed lasers, measuring shock wave front velocity with streak camera
17 p3104 A70-35083
- Automatic shock spectrum synthesizer/analyzer for shock testing of field environments
17 p3059 A70-35175
- Shock waves in supersonic conical nozzle flow due to secondary gas injection, using conical lens for flow visualization
17 p3011 A70-35236
- Solar atmosphere shock waves frequency and strength, computing radiative energy losses of chromospheric models
17 p3174 A70-35865
- Electrostatic turbulence in bow shock magnetic structures observed byOGO 5, explaining turbulence as ion acoustic or Buneman mode due to two stream instability
18 p3311 A70-36006
- Shadow photography applied to Mach reflections in argon, carbon dioxide and Freon 12 in shock tube, using Huygens principle for transfer mechanism
18 p3205 A70-36148
- Thermal dissociation mechanism of diatomic molecules in inert diluent behind shock wave, assuming distribution function described by Fokker-Planck equation
18 p3292 A70-36242
- Radiative energy loss and wall sublimation effects on gas flow parameters behind reflected strong plane shock wave, taking into account small disturbances
18 p3348 A70-36673
- Disk shaped galaxy stationary spiral shock pattern, examining gas cloud gravitational collapse for star formation
18 p3331 A70-37198
- Plasma properties across bow shock and in magnetosheath as function of supersonic solar wind
19 p3494 A70-37481
- Solar energetic charged particles interaction with earth bow shock and magnetopause
19 p3494 A70-37482
- Magnetic and electric field changes across earth bow shock and magnetosheath, discussing Pioneer 8 andOGO-5 data
19 p3494 A70-37483
- Interplanetary shock wave of 26 February 1969, discussing association with solar flares
19 p3513 A70-37517
- Energetic storm particle events observation, noting association with solar protons and interplanetary shock waves
19 p3496 A70-37518

Existence theorem for piecewise-continuous solutions of waves and shocks in relativistic MHD, using Riemann manifold

19 p3477 A70-37579

Cosmic rays shock from small mass supernovae explosions

19 p3507 A70-38128

Low temperature underexpanded supersonic gas plasma jets behind shock wave, analyzing rarefaction and viscosity effects on parameters distribution

19 p3352 A70-38185

Heat transfer behind shock wave in air, oxygen or carbon dioxide flow past wedge, determining thermal fluxes vs wave velocity

19 p3405 A70-38188

Carbon monoxide oxidation by molecular oxygen in incident shock waves, accounting for chain branching in shock tubes

19 p3374 A70-38271

Steady sub and supersonic flow calculations behind receding shock wave, using finite difference scheme

20 p3611 A70-39803

Shock tube with diffuser in low shock wave Mach number range, considering gas flow models to relate wave intensity to initial conditions in chambers

20 p3606 A70-39820

Wedge angle large amplitude slow oscillations in hypersonic and supersonic flows, examining attached bow shock

20 p3559 A70-40288

Weak steady shock waves formation in relaxing binary gas mixture, discussing vibrational specific heat temperature dependence

20 p3614 A70-40350

Shock waves formation in rarefied plasma investigated by Thomson scattering of ruby laser light

20 p3643 A70-40388

Current driven ion wave plasma turbulence in collisionless shock, measuring frequency and wave number spectra by shock front light scattering

20 p3685 A70-40497

Hypersonic flow pattern past windward side of triangular wing with supersonic leading edges, joining potential and vortex regions behind shock wave

21 p3743 A70-40609

Magnetosheath turbulence generation by hydromagnetic waves amplification carried by solar wind through earth bowshock, computing refracted and incident energy fluxes ratio

21 p3815 A70-41059

Inner magnetosheath large amplitude hydromagnetic waves, discussing power spectrum, earth bow shock and solar wind

21 p3816 A70-41083

Shock wave excitation of type 2 and moving type 4 solar bursts from Culgoora radioheliograph and spectrograph recording

21 p3891 A70-41181

Spherical radiation drive shock wave similarity solution, discussing time function, velocity, radial dependence and density

21 p3948 A70-41245

Shock and expansion waves formation by moving piston based on kinetic theory of gases, solving Bhatnagar-Gross-Krook equation by numerical method

21 p3808 A70-41377

Ion sound system one dimensional hydrodynamic equations, examining formation and interaction of nonlinear ion acoustic shock waves

21 p3857 A70-41384

Plane stationary shock wave reflection from rigid concave wall at low Mach numbers

21 p3811 A70-42204

Accelerated supersonic motion of plate with attached shock wave at finite angle of attack in ideal gas, using perturbed nonstationary motion equations

21 p3748 A70-42209

Relaxation behind shock waves in air, calculating radiation spectral distribution for comparison with shock tube experimental data

21 p3812 A70-42219

Hot electrons bunch spread deceleration in collisionless plasma, discussing stationary moving jump formation similar to shock wave

22 p4077 A70-42299

Comet Schwassmann-Wachmann I brightness variations due to interplanetary shock waves in solar wind

22 p4097 A70-42475

Stereo synchrotronic shadowgraph system for explosively projected shock wave, using streak camera

[SMPT PREPRINT 114] 24 p4031 A70-43027

Interferometric investigation of rapidly variable frequency dependent phase objects, using ruby laser waves

[SMPT PREPRINT 26] 22 p4034 A70-43049

Curved shock waves regular and Mach reflection in steady supersonic flow at plane wall

[ICAS PAPER 70-11] 23 p4180 A70-44122

Plane transonic flow around airfoils, using hodograph based methods for shock free flow and finite difference methods for flow with shock waves

[ICAS PAPER 70-12] 23 p4132 A70-44123

Turbulent collisionless plasma shocks formation, wave front steepness and explanation for earth bow shock

23 p4225 A70-44183

Internal shock waves in axisymmetric flow field of perfect gas past blunt cone, noting poles of Mach number and cone half angle

23 p4133 A70-44276

Local thermal equilibrium validity for electron temperature and density determination in reflected shock waves in He plasma, comparing laser scattering and spectroscopic methods

23 p4229 A70-44986

One dimensional collisionless electron-proton plasma, obtaining exact electrostatic shock solution to Vlasov and Poisson equations

24 p4382 A70-45107

Finite amplitude longitudinal shock waves in nonlinear hyperelastic materials, deriving solutions for various shock types in accordance with second law of thermodynamics and Lax stability criterion

24 p4420 A70-45265

Type 2 solar radio burst shock wave exciter velocity from dynamic spectrograms, relating correction to shock strength gradient

24 p4401 A70-45322

Time dependent inviscid transonic flow past two dimensional and axisymmetric bodies, presenting numerical procedures including imbedded shock waves as discontinuities

[AIAA PAPER 70-1322] 24 p4288 A70-45943

Contact region structure with viscosity, conduction and radiative transfer effects applied to plane shock wave reflection from heat conducting wall

24 p4326 A70-46001

Cold boundary layer effect on chemical kinetic parameters behind reflected shocks in single-pulse shock tube

24 p4323 A70-46044

SHOOTING STAR AIRCRAFT

U T-33 AIRCRAFT

SHORT CIRCUITS

Waveguide master short circuit devices reflection coefficient measurements by microcalorimeter

09 p1638 A70-23322

Thermal loads on semiconductors in solid state converters during short circuit and overload

15 p2709 A70-32205

Insulator wall temperature effect on supersonic nonequilibrium MHD generator channel under open and short circuit conditions

20 p3681 A70-39994

SHORT HAUL AIRCRAFT

V/STOL aircraft for short haul transportation, discussing speed, noise, reliability, economy, etc

[SAE PAPER 700333] 18 p3214 A70-36797

V/STOL short haul air transportation program in western U.S., assessing public acceptance and economic viability

[AIAA PAPER 70-888] 19 p3552 A70-37394

Yak-40 business jet design and flight characteristics

21 p3755 A70-42174

Short haul jet transport aircraft design, discussing Computer Aid Design, Airline System Simulator and Traffic Demand Predictor computer programs

[ICAS PAPER 70-28] 23 p4284 A70-44105

Short haul intercity center facilities air transportation traffic alleviation by VTOL aircraft, emphasizing performance, ground facilities, system operation and economics

[AIAA PAPER 70-1243] 24 p4290 A70-45914

U.S. western region short haul air transportation, discussing demand, modal split, STOL and VTOL aircraft, avionics and ground systems

[AIAA PAPER 70-1284] 24 p4322 A70-45915

Short haul transportation needs in multimodal transportation systems planning, discussing modeling in Northeast Corridor Project

[AIAA PAPER 70-1265] 24 p4431 A70-45925

Short haul metropolitan air transportation, considering systems engineering as unifying technology

[AIAA PAPER 70-1281] 24 p4373 A70-45927

ATC, air navigation facilities and airport design requirements for short haul transportation system

[AIAA PAPER 70-1288] 24 p4323 A70-45973

SHORT TAKEOFF AIRCRAFT

STOL aircraft configurations optimization including cost effectiveness, considering propulsive lift systems

[AIAA PAPER 69-1131] 01 p0162 A70-10609

Area navigation and automatic data communications in air traffic control proposed for New York area STOL aircraft operations and Boeing 747 aircraft

[AIAA PAPER 69-1054] 01 p0138 A70-10640

Turbobfan VTOL or STOL intercity transports noting lift engines, noise, aircraft design and interior

[AIAA PAPER 69-1039] 01 p0005 A70-10645

STOL ports in city environments, discussing elevated building design, assisted takeoff and landing equipment and Navy operational safety potential

01 p0057 A70-10715

Three dimensional navigation and guidance system for transport aircraft to alleviate operational problems, noting application to STOL aircraft

02 p0334 A70-11983

Touring aircraft, discussing vibration and noise reduction, instrumentation, STOL aircraft, etc

02 p0227 A70-12663

STOL in northeast corridor, discussing technology applications, economics, requirements for progress, industry, government regulations and decision making

[SAE PAPER 690418] 03 p0608 A70-12897

VTOL technical problems relating to military and civil transport applications, discussing sensitivity to mission requirement variations including design costs, noise levels, etc

05 p0797 A70-17077

California future transport complex, considering STOL and ESTOL /extremely short takeoff landing aircraft/ design requirements

06 p0985 A70-17197

STOL/VTOL airports design, location and complementary ground access transport

06 p1028 A70-17324

High lift devices design and operation problems in short and vertical takeoff

07 p1189 A70-19874

VSTOL and STOL transport development concerning aircraft types, air traffic control and navigation, airports, etc

07 p1194 A70-20250

STOL touring aircraft propeller design and aerodynamics, discussing takeoff runs, landing runs, high lift, downwash, ground effects, etc

08 p1435 A70-20628

Harrier engine nozzle actuation system role in short ground takeoff run facility, discussing pneumatic system, air motor servo unit and pilot control

09 p1610 A70-22606

Hybrid simulation, determining vehicle and performance parameters on longitudinal flying qualities of STOL transport in power approach configuration

[AIAA PAPER 70-387] 10 p1806 A70-24918

Air transport and European cooperation involving supersonic transports, jumbo jets and STOL aircraft

12 p2334 A70-26966

Jet powered Ultra STOL aircraft engine selection, considering effects of engine size, wing loading, thrust loading, etc

[SAE PAPER 700266] 12 p2161 A70-27435

Economic factors in developing STOL and VTOL metroflight service, proposing evolutionary process beginning with short term demonstration

[SAE PAPER 700313] 12 p2335 A70-27454

STOL aircraft noise level certification based on aircraft type, landing and takeoff paths and airports

[SAE PAPER 700325] 12 p2161 A70-27459

American Airlines-McDonnell Douglas intermetropolitan STOL evaluation tests, noting microwave landing guidance system

[SAE PAPER 700336] 12 p2161 A70-27464

Harrier short takeoff fighter aircraft cockpit design, describing layout, lighting, warning and escape systems, etc

12 p2162 A70-27888

VTOL and STOL design and operation, discussing noise and vibration reduction

13 p2344 A70-28544

Servoactuator for stick force augmentation on light turboprop STOL aircraft at high angles of attack

[AIAA PAPER 70-909] 17 p3019 A70-35821

STOL takeoff trajectory optimization for heavily loaded helicopter, using optimal control theory

17 p3021 A70-35841

STOL navigation systems, evaluating Vector Analog Computer, Decca Omnitrac IIB and inertial system

18 p3289 A70-36513

STOL systems 1975 technical and economic characteristics in terms of passenger market, aircraft design, terminal facilities and ATC capability

[SAE PAPER 700311] 18 p3350 A70-36812

Propulsion system impact on military/commercial STOL transport aircraft commonality, taking into account augmented jet flap and externally blown flap powered lift wing concepts

[SAE PAPER 700269] 18 p3214 A70-36819

Four-seat two-engine STOL propeller passenger and sport aircraft design and performance

19 p3355 A70-37371

Avionics role in STOL air transportation operational capabilities in congested air traffic environment

19 p3466 A70-38238

STOL system traffic analysis simulation model for interurban transportation system as tool for flight hardware evaluation

22 p4007 A70-43731

Wheel force and roll moment nonlinearities effect on light STOL aircraft handling qualities during approach

[ICAS PAPER 70-55] 23 p4139 A70-44151

STOL operations from city centers, discussing safety requirements, navigation and guidance systems, airport criteria, etc

23 p4140 A70-44174

STOL aircraft augmentor wing concept, examining noise suppression, flight research vehicle program and application to turboprop production aircraft

[SAE PAPER 700812] 24 p4290 A70-45903

Commercial STOL aircraft propulsion systems from
airline viewpoint, emphasizing subsystem design, en-
gine selection, thrust deterioration and maintainability
[SAE PAPER 700810] 24 p4395 A70-45904

Satellite based navigation/air traffic control infor-
mation systems for short range STOL air carrier air-
craft
[AIAA PAPER 70-1338] 24 p4373 A70-45930

STOL aircraft guidance and control, discussing area
navigation utilization, multiple airways, data links and
ground ATC computers
[AIAA PAPER 70-1334] 24 p4373 A70-45934

STOL aircraft low speed handling characteristics
described via approach and landing profiles, power
requirements, wind effects, etc
[AIAA PAPER 70-1332] 24 p4291 A70-45936

STOL aircraft FAA airworthiness standards and
certification rules, examining noise, control systems,
all weather operation, fire protection, handling qual-
ities and performance
[AIAA PAPER 70-1331] 24 p4291 A70-45937

Commercial STOL aircraft takeoff and landing
physical parameters relationships based on wind tun-
nel and flight tests
[AIAA PAPER 70-1238] 24 p4292 A70-45959

STOL aircraft field length, terminal area per-
formance and minimum handling qualities require-
ments for safe and efficient operations
[AIAA PAPER 70-1240] 24 p4292 A70-45960

Highlift and blown wing types slow speed STOL air-
craft, comparing pilot training requirements with jet
airline flying
[AIAA PAPER 70-1282] 24 p4292 A70-45971

STOL aircraft operational constraints, considering
economics, short haul market characteristics, com-
munity acceptance, speed, propulsion system,
takeoff/landing performance and maneuverability
[AIAA PAPER 70-1283] 24 p4374 A70-45972

SHORT WAVE RADIATION
NT DECIMETER WAVES
NT MICROWAVES
NT MILLIMETER WAVES
NT SUBMILLIMETER WAVES
Coherent short wave and UV radiation generation
using continuous ion gas laser, discussing efficiency,
stability and feedback effects 01 p0108 A70-10356

Polarization level of outgoing short wave radiation
calculated along solar vertical in aerosol containing
multiply scattering atmosphere 06 p1097 A70-17829

Short wave radar tracking of comets, considering
tail type criteria for signal reflection 07 p1379 A70-19040

D and lower E region absorption of short waves,
studying absorption distribution with height 07 p1263 A70-19153

Field strength determination at reception point for
long range short wave paths, taking into account mul-
tiple ray paths and antenna radiation patterns 07 p1237 A70-20435

Short wave radiation model of single layer stratus
and stratocumulus cloud based on actinometric
soundings of lower troposphere 08 p1537 A70-21104

Vertical short wave albedo profiles in lower tropo-
sphere under cloudiness and clear sky using ac-
tinometric sounding 08 p1537 A70-21105

Short wave radiation fluxes inclusion in
hydrodynamic model of general atmospheric circula-
tion based on aircraft sounding data and aerostatic ob-
servations 12 p2263 A70-27512

Soviet book on solar short wave radiation effects on
ionosphere, covering solar atmosphere and spectra,
ionospheric ion concentration vertical distribution, etc
13 p2487 A70-28649

Thermospheric heating and conversion efficiency of
short wave radiation as functions of solar radiation
spectral flux, atmospheric components concentration
and elementary processes cross sections 14 p2569 A70-30212

Spectrometer model for short wave radiation in at-
mosphere, measuring sky brightness, polarization and
total solar flux 14 p2583 A70-30413

Angular structure of outgoing short wave radiation
field measured from Cosmos satellite for clear and
cloudy skies and various sun heights 18 p3286 A70-36965

Short wave calibration system for net pyrriadiome-
ters, using source with intensity and spectral distribu-
tion comparable to solar radiation 20 p3628 A70-39147

Short radio wave propagation over single jump lines
in F sub zero F 2 gradient presence, examining max-
imum usable frequency increase 23 p4162 A70-44076

Thermospheric heating and conversion efficiency of
short wave radiation as functions of solar radiation
spectral flux, atmospheric components concentration
and elementary processes cross sections 24 p4331 A70-46287

SHORT WAVE RADIO TRANSMISSION
Vertical probe observations of short radio waves
propagation through sporadic E at various frequencies
and path lengths 01 p0084 A70-11553

Normal mode helical antennas performance in medi-
um and short wave regions, discussing advantage over
log periodic antennas and maximum radiation angle
achieved by phase shift 02 p0270 A70-12735

Short wave signal field strength measurement errors
by frame antenna, outlining correction procedure 11 p2003 A70-25552

Mutual correlation coefficients for signal level
changes during short wave space diversity reception
and radio wave propagation over two midlatitude
paths 14 p2546 A70-30145

F 2 layer effects on ionospheric short wave scatter-
ing lines for operating frequencies above MUF 14 p2547 A70-30231

Tetrode for single sideband short wave transmitter,
discussing design, characteristics and intermodulation
distortion reduction 17 p3054 A70-35412

Short wave propagation above F2 maximum usable
frequency, observing field intensity and SNR seasonal
and diurnal variations 18 p3226 A70-36092

Short wave ionospheric scatter propagation, observ-
ing interference and crowding in 16-23 MHz and rela-
tionship to F 2 layer maximum usable frequency 18 p3227 A70-36093

Short wave signal field strength measurement errors
by frame antenna, outlining correction procedure 21 p3786 A70-41302

F 2 layer effects on ionospheric short wave scatter-
ing lines for operating frequencies above MUF 24 p4316 A70-46306

SHOT NOISE
Poisson shot noise process relationship with con-
tinuous stochastic intensity as sample function 12 p2203 A70-27418

Shot noise effect in antennas to measure electric
charge density fluctuations in plasma, noting thermal
equilibrium with Maxwellian distribution function 13 p2371 A70-29920

Shot, thermal, induced gate and flicker noise in var-
ious solid state devices and lasers 21 p3792 A70-42112

SHOT PEENING
Shot delivery per second per unit area from ejector
nozzle during shot peening, determining ideal delivery
rates for shot of various sizes 07 p1291 A70-18830

Surface mean deformation state under shot peening
found equal to deformation under single indentation 07 p1292 A70-18835

Boeing 747 wing panels shot peening process,
discussing machine, control technique and operational
requirements 19 p3437 A70-38498

SHOULDERS
Photoelastic stress analysis of shouldered shafts
with keyways in shanks under direct loading and tor-
sion, including keyway and shoulder fillet stresses 02 p0388 A70-12496

SHRINKAGE
Heat resistant coatings in high temperature gas
flow, studying external layer deformation kinetics dur-
ing shrinkage 03 p0483 A70-13250

Alloy specimen shortening due to aging during
stress relaxation under vibration 07 p1304 A70-18820

Computer analysis of degree of constraint against
butt joint transverse shrinkage, using finite element
method for stress analysis 12 p2239 A70-26854

Heat resistant coatings in high temperature gas
flow, studying external layer deformation kinetics dur-
ing shrinkage 19 p3428 A70-38468

SHROUDED BODIES
U SHROUDS
SHROUDED PROPELLERS
Ducted propellers design with flow accelerating and
retarding nozzle analyzed by impulse theory 12 p2155 A70-26876

Shrouded propeller diffusers, considering diffusion
effects on propulsion performance 16 p2970 A70-33754

Fenestron shrouded tail rotor for SA 341 Gazelle
helicopter eliminating ground contact during approach
and landing 23 p4140 A70-44322

Ducted propeller subsonic rotational flow with free
boundaries, presenting second-order partial dif-
ferential equation solution without linearizing assump-
tions 24 p4287 A70-45269

SHROUDED TURBINES
Turbine rotor and stator blades twist inaccuracies in
assembly due to shroud induced stresses and blade
root mountings clearances 07 p1291 A70-18827

Centrifugal force induced stressed state in gas tur-
bine blades using photoelastic analysis, emphasizing
stress distribution at shroud holes 07 p1403 A70-19118

Shrouded aircraft engine turbine blades vibration
stresses found minimum by setting up paired blades
with fixed tension along shroud 10 p1964 A70-25288

Gas turbine shrouded rotating disk system with rad-
ial outflow of air coolant, investigating fluid dynamics,
pressure distribution and frictional moment
[ASME PAPER 70-GT-6] 18 p3208 A70-36862

SHROUDS
Compression spring mechanisms for separation of
spacecraft and shrouds, summarizing design charac-
teristics 16 p2921 A70-34116

Heat transfer characteristics of flows between high
speed rotating disk and parallel stationary shroud,
discussing experimental facility and procedures
[ASME PAPER 70-GT-20] 18 p3349 A70-36865

SHUNTS
U BYPASSES
U CIRCUITS
SHUTDOWNS
NERVA engine operational cycle and performance,
discussing startup, thrust buildup and shutdown 17 p3135 A70-35653

SHUTTERS
Solar energy converter with shutter, determining
light pulse power from solar light intensity and expo-
sure time 07 p1196 A70-19624

Electro-optical shutter for optical pumping experi-
ments using Kerr cell controlled by high voltage modu-
lator 07 p1286 A70-19972

Shutter thermal control for Helios solar observation
satellite, considering closed and open conditions 13 p2505 A70-28769

Nd-glass laser operation in giant pulse mode with
passive or optomechanical shutter, noting applications
16 p2929 A70-34211

SIC [COEFFICIENT]
U STRUCTURAL INFLUENCE COEFFI-
CIENTS
SICKNESSES
NT ALTITUDE SICKNESS
NT DECOMPRESSION SICKNESS
SID [IONOSPHERIC DISTURBANCES]
U SUDDEN IONOSPHERIC DISTURBANCES
SIDE-LOOKING RADAR
NT RADAR IMAGERY
Holographic relationship of coherent optical
processing applications to coherent or side- looking
radar, discussing seismic holography concept 01 p0086 A70-10414

Microwave holography, discussing zone plate lens
design, coherent side-looking radar, large antennas,
three dimensional radar display applications 01 p0086 A70-10415

Target velocity effects on resolution of synthetic
aperture side-looking radar 02 p0268 A70-12582

Synthetic aperture airborne side-looking radar using
coherent optical data processor, discussing system
configuration and operation 02 p0263 A70-12632

Airborne sidescan radar for fix-point navigation at
low flight altitudes involving computerized sensing
evaluated for operator performance 08 p1541 A70-21563

K band SLR /side-looking radar/ imagery mapping
tropical lowland vegetation compared to photographic
coverage 10 p1879 A70-24747

Side-looking radar used to produce high resolution
imagery of Panamanian province under persistent
cloud cover 10 p1882 A70-25045

Airborne side-looking radar antenna optimal
directional characteristics analysis from viewpoint of
maximum surveillance range 10 p1843 A70-25139

Satellite coherent side-looking imaging radars
producing radar maps with photographic-type quality
11 p2005 A70-26038

SIDEBANDS
Radiation from nonlinear polarization sideband in
Ar lasers, discussing anomalous beat notes and mode
locking phenomena 06 p1083 A70-17949

Thermospectrometric investigation of stimulated
Raman lines in benzene to identify generation modes,
observing optical sideband effect at 8050 A 13 p2425 A70-28712

Semiconductor laser frequency modulation by ul-
trasonic waves, noting pressure variation effect on
sideband resolution 18 p3269 A70-36736

- Sideband frequency disturbances at analog data magnetic storage using frequency modulation
20 p3586 A70-39706
- Diffraction theory of sideband holography with transmission objects, discussing geometrical construction of image location and disappearance conditions
21 p3830 A70-41998
- Phase recovery in vestigial sideband /VSB/ data transmission, deriving carrier acquisition time required to achieve satisfactory error rate for coherent demodulation of PAM
21 p3793 A70-42178

SIDELOBE REDUCTION

- Radiation patterns of scanning antenna using digital phase shifters to obtain suitable phase distribution to move sidelobes into invisible region
05 p0822 A70-16676
- Circular antenna arrays synthesis, minimizing peak sidelobe level by dynamic programming
06 p1022 A70-18021
- Parallel wire antenna arrays analysis and design, emphasizing directive power gain maximization and sidelobe reduction
08 p1471 A70-20789
- Electro-optical analogies application to sidelobe reduction of radar antenna illumination patterns and optics far field diffraction patterns in terrain image formation
09 p1631 A70-22009
- Linear antenna array synthesis by variational calculus, minimizing sidelobe level for fixed input powers and field strengths
09 p1644 A70-22404
- Sidelobe suppression for satellite reflector antennas by heavy taper, blockage compensation and active zone techniques, noting net antenna gain enhancement [AIAA PAPER 70-427]
11 p2016 A70-25476
- Radiation patterns of phased array scanning antenna using digital phase shifter, reducing peak sidelobe level
13 p2380 A70-29785
- Asymmetrical element spacings in thinned antenna arrays, obtaining symmetrical radiation patterns with low sidelobe levels
14 p2556 A70-30689
- Linear and circular apertures sum and difference radiation patterns for minimum sidelobe power
19 p3375 A70-37280
- Optical aperture tapering for attenuating sidelobe impairing LF signals detection
20 p3639 A70-39089
- Ultrasonic pulse emitter with interference-free near field and sidelobe suppression for materials testing
24 p4343 A70-45685

SIDELOBES

- Direction finding characteristics of nonlinear antenna, including current determination and optimal angle for sidelobe level
06 p1023 A70-18561
- Polygonal-aperture antennas side radiation distribution
09 p1648 A70-23153
- Line source antenna arrays containing random dissimilarities in waveguide cross section analyzed for phase errors to determine sidelobe deterioration
11 p2018 A70-26177
- Optimal pulse compression time-invariant filter for signal reception with sidelobe constraints under white noise in radar and communications systems
11 p2025 A70-26218
- Pencil-beam antenna idealized patterns derived from maximum gains and operating wavelengths, discussing sidelobes
12 p2195 A70-27247
- Central sidelobes of multifrequency radar signals ambiguity functions, discussing code composition and auxiliary modulations
12 p2185 A70-27686
- Optimum synthesis of complex signals, using autocorrelation function side peak level effect on false alarm probability
13 p2369 A70-29733
- Optimal synthesis of filters maximizing peak-sidelobe ratio of arbitrary zone of mutual ambiguity function
13 p2369 A70-29734
- Amplitude distribution selection in antenna aperture in presence of phase amplitude errors from relation between sidelobe level probabilistic and phase amplitude errors characteristics
16 p2873 A70-33241
- Binary coded radar signal autocorrelation function main-to-sidelobe ratio improvement, using echo signal processed in mismatched filter
17 p3043 A70-34590
- Quasi-equispaced traveling wave slot arrays with below sidelobe crosspolarization, considering computer designed X band prototype
21 p3800 A70-42050

SIDERITE METEORITES

U VISUAL PERCEPTION
SIGNAL ANALYSIS

- Geomagnetic field influence on extensive air shower radio emission, discussing frequency dependency and signal polarization
01 p0069 A70-10281
- Electronic polarimeter using signal sampling technique and feedback to measure periodic retardation changes
02 p0297 A70-11918
- Ionspheric electron concentration irregularities via satellite signal scintillation analysis, using radio wave diffraction theory
02 p0258 A70-12562
- Book on microwave theory and applications covering transmission line theory, microwave measurement, signal sources and analysis, network analysis, etc
03 p0455 A70-13001
- Zero crossings of signal harmonic function with normal phase distribution, deriving relations with spectrum and modulating process parameters
03 p0447 A70-13289
- Spectrum parameters analysis of signal in form of radio pulses sequence with harmonic angular modulation
03 p0448 A70-13511
- Sampled signal and associated sequence with identical Fourier transforms, noting applications to digital spectral analysis onboard spacecraft
03 p0449 A70-13538
- CW and radar type RF signal effects on electroexplosive devices sensitivity in bridgewire heating mode
03 p0550 A70-14142
- Limits on signal amplitude, spectrum, derivatives and modulus of variations
03 p0453 A70-14283
- Read theory application to LF operation of avalanche diodes under large signal conditions
04 p0656 A70-14720
- Signal amplitude and Doppler shift statistical characteristics calculated from sounding data on scattering at lower ionospheric discontinuities
04 p0650 A70-15284
- Backscattered signal power density distribution along equivalent propagation path of delayed components, determining reflecting layers characteristics from echo signal phase
04 p0654 A70-15728
- Radar signals synthesis using steepest descent for minimizing Hermitian form
05 p0812 A70-16247
- Complex control follow-up systems in transient modes, suggesting synthesis for transfer function of control signal coupling
06 p1023 A70-17775
- Statistical analysis of dynamic plant based on steady signal, showing numerical determination of operator by least squares method
07 p1226 A70-18726
- Hilbert transform as operator in function space defined on harmonic analysis groups, noting application to noise stability, modulation and signal detection
07 p1235 A70-19644
- Noise effects on joint operation of signal follow-up system with search device using semi-Markov random technique
08 p1461 A70-20864
- Optimal control frequency signals for automatic spacecraft docking
08 p1582 A70-21180
- PWM-PAM and PTM-PAM systems analysis, deriving formulas for output signal shape determination
08 p1480 A70-21226
- Ionspheric electron content estimated from measurements of Faraday rotation of VHF signals from geostationary satellite
08 p1489 A70-21388
- Signal properties of VHF satellite-to-aircraft communications link, discussing results of ATS tests
08 p1463 A70-21779
- Multilevel quantum systems interaction with electromagnetic fields at frequencies near quantum transitions using small signal analysis
09 p1695 A70-22256
- Quasi-linear estimator algorithms to achieve both optimal nonlinear filtration and signal interpolation resulting in significant gain of estimate accuracy
09 p1633 A70-22408
- Ionspheric electron content and distribution determination from Explorer 22 satellite signal amplitude recordings, considering wave propagation and polarization and Faraday effect
09 p1633 A70-22530
- Nonlinear phase distortion measurement in microwave limiters under dynamic conditions using two tone test signal
09 p1647 A70-22714
- Signal properties and measurement accuracy of noncontacting optical heterodyne velocity sensing method used in differential Doppler velocity measurements
09 p1678 A70-22926

Vertical incidence /VI/ F layer ionograms, magnetograms and signal amplitude data obtained during annular eclipse of 23 November 1965

- 09 p1671 A70-23494
- Synchronous harmonics generation of sinusoidal signal with given frequency for vibration analysis of linear and nonlinear structures
10 p1860 A70-24550
- Remote sensor input radiation at aperture, signals within and sensed data processing by computer techniques, noting automatic image interpretation
10 p1841 A70-24733
- Functional model of signal analysis and pulse sequence conversion in nervous system at periphery of hearing
10 p1827 A70-25127
- Polar ionosphere inhomogeneous electron concentration by analyzing satellite signal amplitude fluctuations received by spaced interferometers
11 p2042 A70-25528
- Signal amplitude and intensity fluctuations after laser amplification, considering P representation for density operator
11 p2063 A70-25867
- Atmospheric turbulent boundary layer velocity signals correlation with lognormal distribution
11 p2076 A70-26531
- Steady state large signal computer model for junction-gate field effect transistors below pitch-off
11 p2019 A70-26711
- Satellite signal scintillation spectrum analysis by digital filtering of magnetic tape recording
11 p2012 A70-26718
- Seismic analysis of lunar module impact and missile-earth impact, comparing recorded signal parameters
11 p2118 A70-26748
- Steady state EPR signal I kinetic behavior in wild type Chlamydomonas reinhardtii and in mutant strain AC-206 lacking cytochrome 53
12 p2168 A70-27468
- Waveform estimation by adaptive combination of analog and hardlimited sensor signals
12 p2187 A70-27906
- HF quenched-domain mode /Q mode/ Gunn effect oscillator in single frequency operation using signal analysis, obtaining instantaneous I-V transfer characteristics
12 p2202 A70-28162
- Output signal spectrum analysis for nonlinear active element in presence of distorted modulating voltage
12 p2191 A70-28342
- Statistical characteristics and energy spectra of pulse code signals in data transmission estimated by matrix methods
13 p2364 A70-28871
- Signal decoder for barium USA Germany /BUG/ project command reception system, discussing Ba ion cloud propagation and expansion along geomagnetic field
13 p2367 A70-29557
- A priori initial phase distribution influence on optimal nonenergetic parameter estimation of rectangular narrow band radio signals on white noise background
13 p2369 A70-29730
- Optimum synthesis of complex signals, using autocorrelation function side peak level effect on false alarm probability
13 p2369 A70-29733
- Signal-arrival-time invariance and SNR resolution of discretely analog filters matched to complex radio signals
13 p2380 A70-29736
- Entire functions for analysis and representation of distant atmospherics, using concentrated spectrum and zero coordinate readings
14 p2569 A70-30210
- Backscattered signal power density distribution along equivalent propagation path of delayed components, determining reflecting layers characteristics from echo signal phase
14 p2550 A70-30812
- Signal analysis from Russian Cosmos, Proton and Soyuz satellites, showing pulse width and pulse code telemetries
14 p2551 A70-30975

- Scientific satellites pulse height analyzer and associated threshold detection and logic circuitry
16 p2900 A70-33062
- Real time swept sine wave spectrum analyzer using time compression to change filter bandwidth as function of control signal
17 p3059 A70-35166
- Mechanical and acoustic vibrations signals analyzer, noting automatic or manual operation
17 p3054 A70-35417
- Portable hybrid automatic sleep analyzer for on-line EEG and EOG processing
17 p3040 A70-35606
- Digital correlator errors due to quantization by levels, designing analyzer of slow processes
20 p3594 A70-39922
- SIGNAL DETECTION**
- NT CORRELATION DETECTION**
- Chirped pulses observation by heterodyning single frequency Q switched carbon dioxide laser with stable CW local oscillator and beat signal display on oscilloscope
01 p0109 A70-10433
- He-Ne gas laser simultaneous oscillation detection based on output power modulation due to variable path length element placed in cavity
01 p0109 A70-10434
- Signal discrimination from sequence of interference and noise by determining parameter value probability density using random process
01 p0044 A70-11024
- Intermittent vs continuous noise effects on signal detection measures during audio visual checking task performance
01 p0039 A70-11167
- Atmospheric density profiles based on laser radar return from ruby laser detected by photomultiplier
01 p0079 A70-11220
- Subjects trained in visual monitoring task with autoinstructional device, showing higher signal detection rate than group trained by practice alone
02 p0247 A70-12380
- Transient response role in limiter-discriminator detection of binary FSK signals, comparing resulting and optimum error probabilities
02 p0258 A70-12421
- Azimuth information transmission by PCM signals with equal repetition and scanning frequencies, investigating antenna characteristics
02 p0270 A70-12619
- Detection efficiency compared for system containing clipper circuit and quasi-optimal linear system for video pulse signal with additive noise background
03 p0446 A70-13201
- Temporal position of pulse signals measured by multichannel storage devices, discussing interference immunity and required storage time
03 p0448 A70-13435
- Fluctuating radio signals optimal two step detection on Gaussian noise background applicable to coherent superposition of signals reception
03 p0448 A70-13454
- Third harmonic generation detection for strongly absorbing media in reflection with neodymium-glass mode-locked laser, measuring nonlinear susceptibilities of semiconductors and metals
03 p0501 A70-13649
- Signal detection theory analysis indicating within-session changes in human willingness to respond in visual monitoring task, considering optimal decision behavior
03 p0435 A70-13766
- Slitless system using interference filter, fixed Fabry-Perot etalon and automatically controlled etalon for recording spectral information for efficient light detection
04 p0685 A70-14523
- Sinusoidal signal detection in Gaussian noise band by zero crossing method, discussing signal frequency position and SNR
04 p0648 A70-14705
- Pulsed radar fluctuating echo digital-detection and false alarm probabilities assuming Rice signal distribution with noise
04 p0649 A70-15065
- Signal detectability improvement by taking logical union of thresholded power of sensor outputs sum and thresholded power of sensor outputs difference
04 p0651 A70-15326
- Light signals frequency converters and amplifiers applied to detection problems
05 p0813 A70-16264
- Monopulse radar signal detection efficiency with fully polarized reception taking into account target with fluctuating polarization
05 p0813 A70-16270
- Coding and signal selection for data relay satellite interrogation channel serving many low-powered unattended user terminals
06 p1006 A70-17347
- Optical heterodyne quantum detector response, calculating signal to noise ratios
06 p1008 A70-17524
- Lateralization and detection of signals under antiphasic noise masking measured at various SNR levels
06 p1106 A70-17597
- Optimal colors for target and rescue markers, discussing influence on signal detection, response and identification
06 p1002 A70-17713
- Three frequency heterodyne system for acquisition and tracking of radar and communications signals, noting applicability in optical and microwave ranges
06 p1010 A70-17948
- Optimal nonparametric amplitude and phase methods for synthesizing signal detection systems invariant to noise distribution and noise-signal combination
07 p1226 A70-18684
- Optimal signal detection with random phase on Gaussian noise background, estimating error probabilities
07 p1226 A70-18685
- Optimal receiver synthesis for signal detection on background noise resulting from nonlinear filtration of Gaussian noise
07 p1226 A70-18760
- Multichannel sequential detection of stationary signal, deriving analytical expressions for probabilities of erroneous solutions and mean duration of tests
07 p1227 A70-18762
- Quantum statistical decision theory for detection and estimation of signals in random noise
07 p1333 A70-18919
- Maximum likelihood receiver [MLR] to detect pulsed signal propagated through turbulent medium, assuming optical propagation over long path in atmosphere
07 p1227 A70-19146
- Short coherent laser radar detection of backscattered signal in measuring Doppler shift due to atmospheric temperature
07 p1297 A70-19368
- Optical data processing systems with spatial filters for two dimensional signals detection, using film nonlinearities to record Fourier transform hologram
07 p1287 A70-20094
- Frequency locked loop optimization, showing advantages in frequency shift keying detection and FM signal demodulation
08 p1460 A70-20808
- Threshold extension techniques using impulse noise detection and elimination implemented at phase lock loop demodulator output
08 p1460 A70-20811

Time resolved photoelectric light detection, discussing photoelectric emission probability time dependence and radiation interaction with bound charge
09 p1726 A70-22232

Two stage detection effectiveness in presence of signal fluctuations in partly dependent or independent stages
09 p1633 A70-22417

Pulse duration, time and amplitude of pulse modulation, discussing device, detection circuit and statistical error analysis
09 p1639 A70-23697

Prolate spheroidal wave functions applied to detection Fredholm equation for band-limited noise and signals
09 p1640 A70-23803

Differential luminance sensitivity of human eye using signal detection theory, correlating discrimination and detection results with electrophysiological data
10 p1812 A70-24599

System configuration requirements and detectability performance characteristics analysis for optimizing array reception of multipath
11 p2018 A70-26264

Rayleigh and m fading signals spectral location in additive white Gaussian noise, allowing predetermined or variable channel observation time
11 p2010 A70-26268

Signal selection for phase coherent and incoherent additive noise channels to maximize receiver correct decision probability
11 p2010 A70-26327

Light-induced electron paramagnetic resonance signal detected in *Anacystis nidulans*
11 p1989 A70-26847

Signal transduction with differential pulse width modulation applied to data acquisition processes
13 p2405 A70-28812

Radio sources scintillation due to scattering medium with refractive index irregularities under detection of finite bandwidth receiver
13 p2365 A70-29148

Asymptotically optimal signal detection algorithms for statistical systems synthesis
13 p2369 A70-29726

Noise level influence on optimal recognition of non-stationary random processes in white noise
13 p2369 A70-29729

Quasi-optimal sequential detection of phase modulated signal of varying frequency on white noise background, using Markov theory
13 p2369 A70-29732

Book on millimeter and submillimeter waves covering generation, transmission, components and detection
14 p2548 A70-30426

Temporal wave echoes and Landau damping in collisionless plasma using signal averaging and time delay techniques
14 p2622 A70-30687

Decision directed receiver with unknown a priori probabilities, obtaining tight bound on runaway for binary and multiple signal detection
14 p2554 A70-31117

Nonsingular detection and likelihood ratio for random signals in white Gaussian noise
14 p2551 A70-31118

Nonparametric rank tests detection performance for signals in Gaussian noise, considering radar application
14 p2551 A70-31119

Rank ordered statistics for optimum detection of binary pulsed signals in white noise and DC drift
14 p2551 A70-31122

Sensory function in multimodal signal detection forced choice experiment involving auditory, visual and auditory-visual stimuli
14 p2539 A70-31167

Wideband PCM/FM discriminator detection, predicting effects of predetection and postdetection filtering on system performance
14 p2558 A70-31192

Hard limiting bandpass limiter output signal to noise ratio in PM signal detection calculated using probability density function
14 p2552 A70-31194

Optimum decision rule/likelihood ratio/algorithm for random signals detection in Gaussian noise, using pseudo Bayes approach
15 p2703 A70-32560

Digital data detection in presence of noise and double sided intersymbol interference, deriving error rates for known and stochastic signals
15 p2703 A70-32561

Plane wave random signals arrival angle maximum likelihood estimation for multiple antenna systems
15 p2704 A70-32594

Perception threshold in rapidly changing circumstances, discussing stimuli signals recognition
15 p2687 A70-32872

Angle modulated carrier acquisition and demodulation, developing baseband model for behavior of output signal from phase lock loop
16 p2864 A70-33481

Loud and soft signal recognition task under information feedback of presentation schedules and sequence probabilities
16 p2854 A70-33974

Incoherent Manchester coded FSK system performance based on optimal signal detection theory, plotting instantaneous frequency vs time
16 p2866 A70-34074

Digital simulation of linear filter, investigating noise and rounding errors effects on decoding signals from lunar and interplanetary probes
17 p3049 A70-34612

Cosmic ray air showers UHF emission detection at 500 MHz
17 p3151 A70-34850

Binary data system parameters sudden change detection by noisy observation based on Bayes criterion
17 p3056 A70-34856

Sine wave discrete components detection from complex spectrum with random noise, evaluating errors
17 p3059 A70-35168

Monaural detection and filtering of sinusoidal signals in noise, using amplitude model
17 p3033 A70-35610

Simultaneous optimal detection and parameter estimation of signals in noise, considering multiple solution, learning and image recognition
18 p3228 A70-36597

Optimal receiver synthesis for signal detection on background noise resulting from nonlinear filtering of Gaussian noise
18 p3229 A70-37104

Multichannel sequential detection of stationary signal, deriving analytical expressions for probabilities of erroneous solutions and mean duration of tests
18 p3229 A70-37106

Optical aperture tapering for attenuating sidelobe impairing LF signals detection
20 p3639 A70-39089

Frequency discriminators output voltages under action of fluctuating signal and noise with arbitrary energy spectrum
20 p3584 A70-39254

Amplitude modulated optical band signal detection, comparing optimal direct photodetection and super-heterodyne receivers sensitivities
21 p3785 A70-40633

Visual vigilance task with standard, binary or rating procedures as response indicators based on signal detection theory, noting relationship to psychophysical procedures
21 p3761 A70-40743

Statistical pattern recognition and threshold learning in signal detection of noisy binary pulses
21 p3794 A70-41332

Bayes sequential detection test with constrained error probabilities, investigating properties of thresholds equations
21 p3787 A70-41333

FM threshold extension for system performance improvement, comparing impulse noise elimination, correlation detection and delta modulation signal processing techniques implemented at demodulator output
21 p3787 A70-41334

Optical communications system for transmission and detection of PCM word pattern at gigahertz rates, discussing optical and electrical modulation
21 p3788 A70-41339

Wideband detection of FSK transmissions in three component two path channel, obtaining channel bit error probability
21 p3792 A70-42176

Wideband detection of frequency uncertain M-ary frequency shift-keyed (MFSK) transmission in Gaussian noise, deriving symbol error rate for limiting SNR cases
21 p3792 A70-42177

Recursive signal detection scheme, obtaining SNR by derivative approximation
22 p3984 A70-42317

One, two and three dimensional array receiving systems, determining signal detectability characteristics by spatial filtering variation
22 p3986 A70-42527

Random signal detection on uncorrelated Gaussian noise background with unknown intensity, discussing detector performance
22 p3986 A70-42553

Fluctuating light pulse packet detection by inertialess photodetector, deriving optimal algorithm
22 p3987 A70-42554

Optimal heterodyne receiver for laser signals element-by-element wavefront detection
22 p3987 A70-42558

Fluctuating light pulses detection and arrival time estimation for heterodyne reception
22 p3987 A70-42560

Light signals detection on noise background, comparing algorithms based on nonparametric statistics
22 p3989 A70-42569

Adaptive channel equalization approach leading to adaptive detector for slowly time varying channel
22 p3989 A70-43172

Multilevel FSK system with limiter discriminator followed by low pass filter as demodulator, calculating error rates for comparison with other analyses
23 p4161 A70-44003

Varian HA-100 spectrometer eliminating phase change by compensation network in synchronous audio detector reference signals
23 p4199 A70-44949

SIGNAL DETECTORS

Telemetry signal processor for diversity signals for performing as optimum maximal ratio predetection combiner
02 p0266 A70-11747

Binary digital radar signal detectors optimization for radiation pattern of $\sin x/x$ radar antenna and for non-fluctuating target
02 p0255 A70-11899

Transmission channel nonlinearity effect on signal detector performance for signal received by synthesized antenna indicating SNR change
04 p0659 A70-15287

Divided photoelectric cell position sensitive detectors in laser alignment systems, obtaining independent signals for displacements in orthogonal directions
06 p1081 A70-17624

Atmospheric pressure waves generated by high energy disturbance in South Pacific, using ionospheric Doppler signals correlated with ground-level pressure signals
08 p1490 A70-21646

Earth horizon signal sensors on spin stabilized satellites using micron filters for cloud signal rejection
09 p1686 A70-23757

Analog integrating moving window detector performance analysis for use with scanning pulse radar allowing for antenna radiation pattern and detection process dynamic characteristics
11 p2009 A70-26262

Noise threshold performance of suboptimum PPM telemetry receivers using slicer for detector
11 p2010 A70-26273

Analog computer simulation of command signal detectors for reconstruction of transmitted binary character from noisy binary coded signal
13 p2385 A70-29560

FM detector without normalization useful for low S/N reception of FSK and PSK in telemetry systems
13 p2367 A70-29589

Optimal noncoherent detector for fluctuating radar signals of noise background
13 p2369 A70-29727

Optimal coherent radar detector for signals with unknown amplitude and background noise intensity
13 p2369 A70-29728

Millimeter and submillimeter wave receivers, describing detectors, mixers, low noise amplifiers and radiometers
14 p2549 A70-30448

FM optical signals detection, using Fabry-Perot interferometer with air gap between mirrors
15 p2733 A70-31523

Heterodyne conversion transducer large signal internal parameters dependence on heterodyne, signal amplitudes and intermediate voltage
16 p2873 A70-33240

Electron spin-echo device as programmable linear matched filter for PN modulated carrier waveforms detection
16 p2864 A70-33480

Radio receiving system for pulses detection from cosmic ray extensive air showers, discussing sensitivity and noise temperature
16 p2911 A70-33788

Microwave radiometric receiver, analyzing video detector saturation effects on linearity
16 p2880 A70-34075

Frequency locking and control of autodyne oscillating NMR detector for signal averaging
21 p3827 A70-41454

Adaptive AC null detector with tuned compression amplifier used for oscilloscope display drive
21 p3828 A70-41469

Optimal detectors for two signals with fluctuating amplitudes and arbitrary mutual coherence, discussing distribution function processing
22 p3987 A70-42556

Nd-glass mode-locked laser with KDP crystal frequency doubling and pulse selection with Pockels cell
23 p4201 A70-44476

SIGNAL DISCRIMINATORS

U SIGNAL DETECTORS

SIGNAL DISTORTION

FM/FM telemetry systems waveform distortion measurement technique based on minimum rms error between input and output signals
01 p0044 A70-10941

Rms error for reproduction of satellite signal transmitted through continuous Gaussian channel assessed by numerical calculation
01 p0046 A70-11513

Nonlinear distortion in switching transistor mixer predicted by modifying analysis used for diode modulator and mixer circuitry
02 p0268 A70-12423

Ionospheric electron concentration irregularities via satellite signal scintillation analysis, using radio wave diffraction theory

02 p0258 A70-12562

Transversal equalizer for wideband radar systems distortion reduction

02 p0261 A70-12578

Rate distortion function for class of sources, proving positive and negative sides of Shannon encoding theorem for noisy channels

02 p0266 A70-12611

Microwave holography using probe scanning, analyzing causes of distortion and effects on image reconstruction

02 p0302 A70-12618

Autocorrelation function distortion in pseudorandom signal with limited spectrum at RC filter output

03 p0446 A70-13202

Troposphere effects on low incident Explorer 22 satellite signal amplitude, noting role of diffraction

03 p0449 A70-13611

Transistor behavior prediction at threshold of large signal conditions, using nomographs to evaluate maximum drive levels before distortion onset

03 p0452 A70-13966

Narrow bandwidth FM signal distortion during multiplication in lossless varactor multiplier calculated, using equivalent circuit of frequency doubler

03 p0452 A70-14040

Vertical gyroscope with nonlinear compensation circuit under random distortion of signal spectral composition

05 p0880 A70-16223

Wideband transversal coaxial cable delay lines used for improving radar systems target recognition by eliminating misleading signals and distortion

05 p0822 A70-16723

Distribution function distortions produced in counting devices due to simultaneous arrival of particles, correcting errors

06 p1064 A70-17830

Ionospheric distortion of linearly FM radio signals used for sounding, considering signal characteristics in distortion equations

07 p1268 A70-19459

Signal design for Gaussian noise and intersymbol interference immunity, discussing bandlimited signals and maximum likelihood detection technique

08 p1460 A70-20813

Matched filter SNR behavior under time and frequency domains distortion and random distortion, deriving design equations for energy loss coefficients

08 p1474 A70-21223

Nonlinear circuits reducing nonlinear distortions in amplifiers, discussing wideband nonlinear distortion compensating circuits

09 p1643 A70-22131

Distortion-compensation circuit theory, considering voltage-frequency characteristics and varactor controlled oscillator nonlinearities of frequency modulators

09 p1632 A70-22235

Distortion of electromagnetic pulse undergoing total internal reflection in inhomogeneous isotropic plasmas in lower ionosphere

09 p1639 A70-23672

Error probability degradation for digital satellite communication systems, employing multiphase signal sets distorted by bandlimited filtering

10 p1836 A70-24342

Geometric distortions in ESSA 7, Surveyor 7 and Mariner 4 TV systems caused by scale distortion, discussing stability of systematic component in magnitude and shape

10 p1890 A70-24727

TWT, obtaining life performance data from spacecraft, discussing distortion characteristics [ALAA PAPER 70-505]

11 p2017 A70-25494

Pursuit tracking during disturbance signal as function of human performance in man machine system

12 p2266 A70-27198

Electromagnetic pulse distortion with Gaussian envelope in longitudinally inhomogeneous anisotropic ionized media to investigate radio wave communication with ionospheric propagation

12 p2189 A70-27962

Output signal spectrum analysis for nonlinear active element in presence of distorted modulating voltage

12 p2191 A70-28342

Binary code distortion in relative phase telegraphy signals under wideband and correlated noise

13 p2364 A70-28870

Wideband FM signals transionospheric propagation, calculating output spectrum, signal to distortion ratios and signal to noise ratios

13 p2367 A70-29588

Off-axis nonlinear holograms, defining spurious distortion and SNR

14 p2588 A70-31206

Multimode and dispersive distortion of short quasinonochromatic pulses in earth-ionosphere VLF channel

16 p2858 A70-32930

Image distortion in reconstructions from phase only holograms, noting savings in collection and processing of acoustic holographic data

16 p2915 A70-34324

Gaussian source model of image, deriving rate distortion function under mean square error criterion

17 p3049 A70-34857

Tetrode for single sideband short wave transmitter, discussing design, characteristics and intermodulation distortion reduction

17 p3054 A70-35412

Ionospheric distortion of linear FM radio signals used for sounding, considering signal characteristics in distortion equations

18 p3250 A70-36933

HF ballistocardiograms resonance distortions correction, using electrical selective filters

19 p3369 A70-38210

Synthetic aperture radar receivers, discussing cross-product term suppression in correlation detection for image distortion reduction

20 p3585 A70-39392

Low latitude F region irregularities from scintillations of beacon satellite signals

20 p3624 A70-40486

Frequency division multiple access satellite communication system, calculating bandwidth variations effects on intermodulation distortion

21 p3787 A70-41328

Triangle and sine waveforms generation, discussing reduced peak and crossover distortion and extended frequency operation

22 p3989 A70-42923

Adaptive channel equalization approach leading to adaptive detector for slowly time varying channel

22 p3989 A70-43172

VLF signal phase and amplitude changes associated with PCA events and South Atlantic Geomagnetic Anomaly

22 p4023 A70-43292

Signal and noise properties of degenerate and quasidegenerate nonreciprocal parametric amplifiers without circulators

22 p3990 A70-43423

Microwave transmission over elevated line-of-sight path, measuring phase front distortion between pairs of paths

22 p3991 A70-43580

Line-by-line and two dimensional image processing performance, considering transmission rates and distortion

23 p4160 A70-43762

Intermodulation distortion reduction in four frequency parametric converter by low impedance path

23 p4169 A70-43785

Time varying signals sampling, noting role of frequency in distortion

24 p4311 A70-45433

Signal distortion dependence on sampling frequency during continuous signals restoration

24 p4312 A70-45440

SIGNAL ENCODING

Digital log-linear companding technique for nonuniform quantization of speech and image signals

01 p0044 A70-10784

Coding and signal selection for data relay satellite interrogation channel serving many low-powered unattended user terminals

06 p1006 A70-17347

Divided attention utility for monitoring information processing during encoding, retention and recall of words

07 p1224 A70-20047

Physical formula for information content in communication signals based on receiver observation concept, noting role of channel properties and encoding

10 p1844 A70-25223

Optimum symbol sequence interleavers realization taking into account storage capacity and encoding delay

11 p2014 A70-26246

THEMIS source encoding systems research program to investigate inherent quantizing noise and degradation of analog to digital conversion

11 p2014 A70-26255

Pattern recognition with time interval modulation information coding /TIMIC/, considering channel capacity of switching device, similarity with nervous system, etc

11 p2010 A70-26267

Fourier and Hadamard transformation codings for multidimensional data channel noise immunity and bandwidth reduction

11 p2011 A70-26329

Frequency-time coded multichannel communication system error probability bounds to investigate frequency selective fading effect on performance

12 p2184 A70-27416

Central sidelobes of multifrequency radar signals ambiguity functions, discussing code composition and auxiliary modulations

12 p2185 A70-27686

Digital signals transmission codes comparison for transient response by reducing channel bandwidth to obtain error probability

13 p2372 A70-28899

Q-ary /n, k/ cyclic code and subcode generations and weight distributions relationship

14 p2554 A70-31123

Practical codes in digital space communication systems, reviewing Shannon information theory theorems

15 p2698 A70-31963

Fibonacci codes polarized and partial error detection and correction capabilities

15 p2707 A70-32702

Incoherent Manchester coded FSK system performance based on optimal signal detection theory, plotting instantaneous frequency vs time

16 p2866 A70-34074

Data transmission from information sources over communication channels with limit imposed on attainable reliability, discussing coding theorem of information theory

16 p2871 A70-34259

Pulse coding system for average evoked EEG potential data acquisition and analysis, describing pulse generation circuitry and computer implemented logic

20 p3578 A70-38985

Coding forms in radar signals in terms of ambiguity function trend, combining pulse compression with discriminating possibilities in Doppler frequency

21 p3792 A70-41988

Information transmission and coding theory - Conference, Tashkent, Uzbek SSR, September - October 1969, Section 1, Data transmission theory, Methods of coding and decoding

22 p3985 A70-42490

Information transmission techniques by discrete amplitudes and increments, comparing effectiveness for noise rejection

22 p3986 A70-42495

Pulse counting and encoding system on rocket-borne spectrophotometer for starlight collected by primary telescope mirror

22 p4038 A70-43174

Radio signal source encoding, investigating error exponent

23 p4159 A70-43755

Line-by-line and two dimensional image processing performance, considering transmission rates and distortion

23 p4160 A70-43762

SIGNAL FADEOUT

U SIGNAL FADING

SIGNAL FADING

NT SELECTIVE FADING

Book on communication and information theories application to fading dispersive communication channels, discussing tropospheric scatter, HF ionospheric links, moon bounds, etc

02 p0253 A70-11700

High altitude telemetry plasma attenuation for hypersonic blunt nose slender reentry bodies [AIAA PAPER 70-220]

06 p1010 A70-18088

Oblique radio ray tracing at 2-10 MHz and application to signal strength calculation, concentrating on digital techniques

07 p1230 A70-19162

Signal polarization and fading near LUF, describing spatial variations of wave amplitude in terms of angular spectrum

07 p1230 A70-19168

Doppler technique for HF ionospheric radio signal fading, observing frequency spreading during flutter fading conditions in low geomagnetic latitudes

07 p1231 A70-19169

Effective LUF fade-out and fade-in times seasonal and diurnal variations for oblique ionospheric propagation paths, noting sunspot number effects

07 p1233 A70-19180

Winter midlatitude electron density trough from length fluctuation of Faraday signal fading period of satellite Explorer 22, noting characteristic seasonal variation

07 p1270 A70-20034

Time-frequency correlation function for fading communication channel between transmitter and receiver sites, using AM transmissions as probing signals

08 p1458 A70-20796

Fading effect on error probability of multi-hop PCM radio system, noting domination by worst hop

08 p1458 A70-20797

Intermodulation noise performance of FM FDM trunk radio systems in two path fading situations, calculating noise/power ratio and baseband enhancements

09 p1632 A70-22237

Two stage detection effectiveness in presence of signal fluctuations in partly dependent or independent stages

09 p1633 A70-22417

Microwave signal fading in Venus atmosphere due to turbulence, discussing atmospheric dielectric permittivity variance

09 p1764 A70-23484

Interstellar gas electron number density fluctuations effect on pulsar signals in terms of frequency dependent dispersion, noting long wavelength disturbances

09 p1764 A70-23609

Ionospheric electron content diurnal, latitudinal variations and equivalent slab thickness determined from observing satellite signals Faraday fading

10 p1874 A70-24426

Signal attenuation and bandwidth limitations imposed by atmospheric hydrometeors on communications satellite systems above 10 GHz, discussing Comsat measurement programs

11 p1997 A70-25408

Rayleigh and m fading signals spectral location in additive white Gaussian noise, allowing predetermined or variable channel observation time

11 p2010 A70-26268

Stratospheric water vapor measurement by submillimeter wave sounding, considering signal fluctuations due to scattering by high cirrus clouds

11 p2077 A70-26619

Fluctuations of polarization induced fading periods in short wave transmissions of Soviet earth satellites, showing relation to ionospheric inhomogeneities

11 p2047 A70-26788

Atmospheric water effect on satellite communications in UHF region and above, discussing signal attenuation

13 p2364 A70-28782

Mutual correlation coefficients for signal level changes during short wave space diversity reception and radio wave propagation over two midlatitude paths

14 p2546 A70-30145

Forward and backscattering meteor radio echo intensity variations during decay under molecular and turbulent diffusion, recombination and trapping

14 p2635 A70-30313

Book on microwave propagation physics covering unbounded homogeneous medium, terrain effects, uniform refractivity gradient, nonstandard refractivity, fading, etc

14 p2551 A70-30953

Prolonged upper ionospheric observations from Sputnik 3, Transit 4A and Explorer 22 signals Faraday fading and phase shifts, showing electron content dependence on solar activity

15 p2731 A70-32093

Probability density function of specularly fading signal plus noise for frequency shift keying and pulse radar systems

16 p2865 A70-34040

Optimal incoherent signal reception in discrete information transmission systems with fluctuation and concentration noise, including Rayleigh fading

18 p3228 A70-36600

SHF and EHF waves simultaneous propagation over slant line-of-sight overwater path, comparing phase variations and fading for signal coherence

20 p3588 A70-40301

Correlation distance of VHF fading from irregularities in equatorial ionosphere, using NASA STADAN in Chile

20 p3590 A70-40487

Synchronous satellites VHF signal fading attributed to high latitude scintillations, noting intensity at night and during magnetic storms

21 p3790 A70-41362

Optical communication in turbulent media, investigating error rate for binary single path fading channels by photocount detection

21 p3837 A70-41935

SIGNAL FADING RATE

Rapid fading intensity distribution formula for analysis of aperture phase and amplitude errors influence on antenna arrays directional characteristics

03 p0456 A70-13463

Field amplitude distribution parameter in long distance tropospheric communications based on fading depth

15 p2696 A70-31512

SIGNAL FLOW GRAPHS

Signal flow graph, obtaining numeric and symbolic expressions for network function in terms of component parameters and sensitivity coefficients

06 p1026 A70-18420

Loops and paths in Mason signal flow graph of linear systems using algorithm with remote time shared digital computation

07 p1238 A70-18842

Matrix graph concept to unify signal-flow, flow- and N-graph technique approaches to representation and evaluation of matrices and linear algebraic equations

07 p1238 A70-19676

Reliability engineering for complex systems of multiple repairable parts based on analysis involving signal flow graphs and Markov renewal processes

09 p1691 A70-22574

SIGNAL GENERATORS

NT FREQUENCY SYNTHESIZERS

NT FUNCTION GENERATORS

Radar signals optimal synthesis characterized by ambiguity surfaces minimized over predetermined regions of ambiguity plane, noting weighted error criterion role

04 p0651 A70-15328

Signal format for eight station Omega network, considering integrating /DR/ receiver and concept combining time multiplex and frequency multiplex signals

09 p1722 A70-23031

Error functional minimization in class of current distribution relay functions noting applications to linear antennas and FM signals synthesis

09 p1637 A70-23154

Carbon dioxide laser frequency stabilization, using plasma tube impedance variations generating error signal

10 p1901 A70-24946

Pseudonoise sequence generation with 3-tap linear feedback binary shift registers, citing reduction theorems

11 p2025 A70-26224

Sum and difference frequency signals generated and propagated by mixing carbon dioxide laser and millimeter wave klystron outputs in GaAs loaded waveguide

12 p2250 A70-28098

Optimum synthesis of complex signals, using autocorrelation function side peak level effect on false alarm probability

13 p2369 A70-29733

Multipurpose pulse generator design for 1 Hz-100 MHz frequency range and adjustable rise and fall times

14 p2557 A70-31162

Sawtooth waveform generator using linear discharge of capacitor

15 p2714 A70-32701

Optical quantum amplifier frequency characteristics dependence on broad spectral composition amplified signal intensity and resonator parameters

15 p2754 A70-32862

Microwave IC methods applied to solid state signal sources design, using varactor tuned transistor oscillators, resistive isolation pads, amplifiers and frequency multipliers

16 p2872 A70-33069

CRT symbol generators design for high speed computer data display as function of electro-optical and human operator constraints

16 p2850 A70-33133

Silicon avalanche transit time diodes as CW microwave generators and amplifiers

16 p2876 A70-33404

Transient signal generation during large amplitude ultrasonic pulse propagation through carbon tetrachloride

16 p2952 A70-34097

Unrestrained oscillator under action of external synchronous signal, deriving differential synchronization equation

17 p3051 A70-34614

Pressure sensors for large frequency and amplitude measurement, discussing calibration with square signal generator

18 p3262 A70-37210

Thyristor circuit for storing or generating digital control signals, considering reliability at high noise levels

19 p3385 A70-37377

Algorithmic random process pseudorandom number generator composed of analog computer elements, evaluating stability

20 p3594 A70-39918

Pulsed signal synthesis from three dimensional function of indeterminacy, incorporating source distance, velocity and acceleration

22 p3988 A70-42562

Linear differential equation solution associated with FM signal generation, presenting analytical methods for FM and AM components

22 p4063 A70-43209

Spectrum generator with step recovery diode multiplier, discussing line spacing, energy and phase coherence

22 p3990 A70-43485

Klystron microwave signal generator power stabilization using compact low consumption integrated circuits

23 p4170 A70-43797

SIGNAL MEASUREMENT

Pulse methods for measuring correlation function of incoherent scattered signal, calculating bit estimator errors for large and small SNR

01 p0045 A70-11088

Phase fluctuations measurements of obliquely incident signal reflected from ionosphere performed over distance of 1300 km, showing amplitude dependence

01 p0046 A70-11533

Backscatter radar signal phase determination from amplitude data, measuring phase and amplitude in laboratory

05 p0815 A70-16507

Wobbulator measurement of Q factor of microwave resonator cavities using double modulated klystron signal

05 p0822 A70-16528

Large scale ionospheric inhomogeneities anisotropy, dimensions and drift velocities from simultaneously measured irregular refraction

05 p0841 A70-16739

Acoustic impedance method for nondestructive testing exploiting phase defect of signal from piezoelectric transducer

06 p1074 A70-18629

Nonlinear complexing problem in measuring random signal, proposing optimal data processing algorithm with minimum error variance criterion

09 p1654 A70-22542

Ionospheric fine structure from signal broadening measurements on ionograms, including scattering region algorithm

11 p2044 A70-25553

Biased measurement of angular coordinates of phase modulated signals under meter input quantization

11 p2012 A70-26806

DC signals measurement in automatic control circuits, ensuring transformer isolation by use of transistorized amplifier

12 p2196 A70-27682

Wideband stochastic signals for radar range and velocity measurements using polarity coincidence correlation technique

12 p2188 A70-27942

Sinusoidal signal harmonics measurement to determine nonlinear resistance junction I-V equation, discussing applications to circuit analysis

12 p2204 A70-28132

Remote signal measurement and analysis in hazardous environment by command terminal utilizing manual or computerized control

12 p2201 A70-28134

Subpolar ionosphere electron concentration measurements for both hemispheres during solar activity by Faraday effect signal recordings from satellites

14 p2570 A70-30223

Asymmetrical transient attenuation effects of bridge circuit phase discriminator on accuracy of phase difference measurements

15 p2707 A70-31508

Radar ducting effects on propagation at microwave frequencies, recording signal strength as function of transmitter to receiver range

16 p2858 A70-32927

Point to point and radar return attenuation measurements at SHF through clear air and rain

16 p2858 A70-32928

Mathematical-physical parametric model of satellite geodetic laser range accuracy, false alarm and count probabilities, correlating with retroreflector signal strength

16 p2863 A70-33166

Actuating signal at sampling instants determined in phase plane by Mullin-Jury method for sampled data feedback containing quantizer and zero order hold circuit

16 p2886 A70-33336

Intensity interferometer for weak noise-like signal power measurement in presence of additive Gaussian noise

17 p3089 A70-35265

Spectral densities of input and output signals of discretely continuous systems as function of comparison moment

18 p3233 A70-36069

Ionospheric scatter communications channel phase frequency characteristics measuring method, considering probability density function

18 p3256 A70-36091

Effective reflection height measurement accuracy for pulsed vertical ionospheric sounding, using interference method

18 p3227 A70-36106

Pulsed signal amplitude and delay time measurement in presence of interfering /reverberated/ signals and steady noise

19 p3375 A70-37285

Ionospheric refraction during radio wave propagation using space diversity recordings of Faraday and Doppler effects for coherent signals from geophysical rocks

19 p3407 A70-37306

Occupied bandwidth definition and measurement based on probability density function computation for radio transmitter spurious, harmonic and fundamental emissions

19 p3380 A70-38176

Low level time truncated signals measurement by narrow bandwidth synchronous time notch filters, discussing sensitivity

19 p3380 A70-38177

Signal measurement and processing in thermal vacuum and space simulation tests of Azur and Dial satellites

19 p3400 A70-38298

Phase shift direct and balance measurement procedures between signals over wide frequency range classified by conversion schemes
19 p3391 A70-38702

Lunar surface specific effective radio signal scattering area measured by Luna 9 and 13, describing signal fluctuations
21 p3884 A70-40838

Ionospheric fine structure from signal broadening measurements on ionograms, including scattering region algorithm
21 p3819 A70-41303

Threshold SNR for signal frequency meter based on zero number count method, determining reliability
22 p3985 A70-42401

Radio wave reflection properties in 16-3000 kHz range calculated from D and E region models for comparison with measurement
22 p3989 A70-43164

Deterministic vs stochastic signals for equipment and installations short cycle reliability tests over service life during changing environments
23 p4166 A70-44332

Photon-coupled biomedical amplifier for measuring and recording physiological signals
23 p4155 A70-44848

X band horn antennas precision phase center measurement technique for high resolution system applications
23 p4176 A70-44966

Subpolar ionosphere electron concentration measurements for both hemispheres during solar activity by Faraday effect signal recordings from satellites
24 p4331 A70-46298

SIGNAL MIXING

Frequency measurement for HCN laser at 0.357 and 0.311 mm wavelength by mixing signal with backward wave tube harmonics
03 p0500 A70-13464

Two frequency electron beam modes produced by O-type TWT at simultaneous input of HF signals of different amplitudes and frequencies
05 p0824 A70-16894

Microwave mixer design to increase dynamic range applied to communications and video systems
07 p1243 A70-20216

Optical and electronic mixing in avalanche photodiode during variable amplitude signal demodulation in optical heterodyne receiver, considering conversion losses
07 p1243 A70-20282

FM feedback demodulator performance model using mixer-correlator, showing cross correlation receiver design
08 p1479 A70-20810

Resistive parametric mixing in GaAs oscillators at microwave frequencies resulting in negative mobility at signal frequency
10 p1849 A70-24231

IF combinator for broadband transhorizontal radio relay transmission improvement by providing optimum SNR
11 p2020 A70-26821

Sum envelope zero crossings determination for steady normal noise plus random amplitude signal
13 p2370 A70-29742

Far IR second harmonic generation and frequency mixing in CdTe using pulsed water vapor laser
15 p2751 A70-31983

Nonlinear effects of harmonic generation and mixing in lithium niobate microwave acoustic surface wave delay lines measured using laser light deflection
19 p3485 A70-37698

Harmonic generation and small signal mixing in thin magnetic films subjected to static and time varying fields, generating output voltage expressions
21 p3864 A70-42012

SIGNAL NOISE

U SIGNAL TO NOISE RATIOS

SIGNAL PROCESSING

Moving targets automatic identification by radar signals digital processing, describing radar echoes properties, moving window detector system and circuits design
01 p0137 A70-10358

Flying spot scanners evaluation as image processing devices, discussing scan patterns effect on video signal
01 p0089 A70-10817

Observation process optimization in system described by linear differential equations of motion reducible to optimal control problem
01 p0047 A70-11574

Telemetry signal processor for diversity signals for performing as optimum maximal ratio predetection combiner
02 p0266 A70-11747

Acoustooptical processing for amplification of weak radar echoes, describing design and operation of modulators, correlators, filters, etc
02 p0266 A70-12630

Book on radar design principles-signal processing and environment covering target detection in presence of noise, atmospheric effects, pulse techniques, etc
02 p0270 A70-12662

Signal waveform algorithmic construction with optimal autocovariance properties, using isosum integer partitions, applied to clustered multipath distribution measurement
02 p0263 A70-12773

Demodulation of signals modulated with respect to wave period, deriving spectral width of pulsed period modulation
03 p0446 A70-13200

Pulse signals optimal filtration in superregenerative receiver and resulting SNR effect
03 p0456 A70-13203

Electronic transistorized harmonic signal integrator operating in connection with static-dynamic bridge
03 p0493 A70-13975

Subcritical wavelengths processing of solar radio emission, allowing for antenna radiation pattern distortion due to surface defects
04 p0745 A70-14498

Nonadaptive processor to detect coherent radar pulse trains with uniform amplitude in clutter- plus-noise environment
04 p0651 A70-15334

Differential equations for minimum variance linear filter separating signals from additive correlated noise, using discrete time optimum formulas
04 p0663 A70-15586

[AIAA PAPER 69-73]

Optimum signals for phase locked or delay locked loops determined as function of signal to noise ratio
06 p1023 A70-17523

Pulse rate techniques for signal processing and computation, considering feedback circuits, discussing stochastic rates, sampled systems and digital differential analyzer
06 p1027 A70-18510

Clutter symmetry as indication of matching optimum signal filter pair, comparing mismatched and matched systems
06 p1013 A70-18626

Equivalent scheme for tunnel diode oscillator operating mode and parameters effect on LF modulating signal phase correlations
07 p1241 A70-19287

Multichannel correlator for turbulent signal processing in real time scale using natural delay
07 p1284 A70-19832

Signal processor with ratio-squared predetection combining for adaptive antenna array, discussing radiation patterns for coherent and incoherent signal and noise sources
07 p1242 A70-20066

Discrete analog filters circuits for optimal noncoherent processing of phase manipulated signals
08 p1456 A70-20571

Phase locked loop method for waveshaping rectangular wave frequency modulation signals in phase coherent VLF-FSK systems, reducing transient effects and adjacent channel interference
08 p1459 A70-20803

Signal design for Gaussian noise and intersymbol interference immunity, discussing bandlimited signals and maximum likelihood detection technique
08 p1460 A70-20813

Linear signal converter analysis using topological method and coordinate transformation
08 p1480 A70-21231

Compatible single sideband transmission realized using iterative signal processing method and ideal band limited channels
08 p1464 A70-21781

LSI Mark 3 airborne Omega system with computerized signal processing for navigation parameters, discussing system features and flight test results
09 p1719 A70-22190

Nonlinear complexing problem in measuring random signal, proposing optimal data processing algorithm with minimum error variance criterion
09 p1654 A70-22542

Optimal inertialess nonlinear filters synthesis with various optimality criteria for signal distributions differing from normal
09 p1654 A70-22543

Optical signal processing using circular array and spatial frequency filtering to yield azimuthal distribution of sources
09 p1678 A70-22969

Optical processing of signals from circular aerial arrays involving use of spatial filter
09 p1678 A70-22970

Tape recorder performance characteristics relevant to signal types handled, considering phase response and envelope delay
09 p1679 A70-22975

Vacuum tube signal frequency converters for meteorological telemetry measurements including blocking oscillators, multivibrator and fantastron
09 p1718 A70-23332

Digital image processing applied to picture generation, intensity and geometric manipulation, spatial frequency operations and image analysis
09 p1682 A70-23507

[JPL-TR-32-1482]

Signal converter for centimeter band-DC voltage transformation, noting applications to microwave power measurement by digital computers
09 p1650 A70-23629

SIGNAL PROCESSING

Textured gray-scale imagery by computer simulating lunar display
09 p1642 A70-23771

Collection of papers on digital signal processing covering digital filter synthesis, Fourier transforms, algorithms, etc
11 p2003 A70-25575

Surface acoustic wave delay lines using interdigital transducers based on piezoelectrics with applications in VHF and UHF signal processing
11 p2005 A70-26165

Radar signal quick indication and extrapolation for terminal guidance control of Mars soft lander, reducing radar lock on loss sensitivity and engine spurious noise throttling
11 p2080 A70-26210

Processing system for tape recorded signals with nonelectrical varying parameters
11 p2056 A70-26456

Optimal phase-manipulated signals synthesis from autocorrelation function using algorithm
11 p2012 A70-26804

Superlayer structure in turbulent boundary layer on flat plate obtained by statistical processing of signals from hot-wire probes
12 p2209 A70-27226

Pipeline fast Fourier transform signal processor for digital spectrum analysis of wideband radars
12 p2186 A70-27904

Navigation satellite systems, analyzing error sources in signal processing and propagation developing computer programs
13 p2447 A70-28429

Weather radar signal processing and data recording at National Severe Storms Laboratory (NSSL), providing reduction in echo variations due to relative motion of precipitation elements
13 p2363 A70-28774

Air-damped capacitance accelerometers and velocimeters in data acquisition systems using signal processing
13 p2405 A70-28813

Earth colorimetry data improvement by separating signals of each bandwidth on one photographic emulsion or TV tube
13 p2406 A70-28987

Portable autonomous EEG analyzer for processing brain biopotentials without use of computer hardware and qualified personnel
13 p2360 A70-29522

Sum envelope zero crossings determination for steady normal noise plus random amplitude signal
13 p2370 A70-29742

Real time signal processor for correlation and spectrum analysis, displaying results on cathode ray oscilloscope
13 p2370 A70-29817

Threshold sensitivity of pulsed optical radar with discrete signal storage, considering different operating modes
13 p2370 A70-29871

Physical signals continuous to discrete transformation by analog to digital conversion, considering coding process and transfer functions
14 p2554 A70-30679

Microwave channelizing filters input ports interconnection techniques for signals sorting into contiguous frequency bands
14 p2558 A70-31319

Wideband pulse signal synthesis and optimal filtration by dispersive ultrasonic delay lines, estimating potential noise stability for analog data transmission
15 p2696 A70-31502

Noise rejection and spurious reception probability in optimal channel for continuous sequenced signal with undetermined arrival and overlapping spectra
15 p2696 A70-31509

Digital sampled data demodulation, discussing methods of obtaining quadrature channels from single signal
15 p2703 A70-32579

High pulse repetition rate digital systems signal processing using Gunn effect diodes
15 p2710 A70-32583

Optimal perturbation signal waveform linearizing nonlinear transfer characteristic of image sensing receptor array
15 p2705 A70-32725

Holographic recording of wideband pulsed carrier electric signals in Fourier transform, Fraunhofer, Fresnel and image formats
16 p2903 A70-33136

Drosograph high brilliance display device for rapid line-pattern projections and optical signal processing
16 p2906 A70-33179

Upper bound determination for errors due to signal quantization in multirate digital control system through state variable or z transform formulations
16 p2867 A70-33306

Acoustic and magnetic surface waves technologies for radar signal processing
16 p2874 A70-33390

Optimum carrier phase delay estimation for one way ranging aircraft navigation, investigating receiver signal processing

16 p2947 A70-33449

General purpose parallel processor design for avionics, considering radar signal processing

16 p2910 A70-33467

Walsh functions and spectrum for signal processing, discussing computer compatibility

16 p2864 A70-33483

Fast Fourier digital processor for real time filtering of radar signals, discussing applications as Fourier transform system

16 p2870 A70-33738

Binary coded radar signal autocorrelation function main-to-sidelobe ratio improvement, using echo signal processed in mismatched filter

17 p3043 A70-34590

Signal processing antennas, discussing synthetic and multiplicative arrays for coherent radar airborne mapping

17 p3052 A70-35078

Optimal temporal and spatial-temporal resolution for unknown parameter of interfering signal on white noise background

17 p3048 A70-35680

Discrete signals synthesis optimal with respect to given criterion, determining ambiguity function extremum

19 p3374 A70-37270

Radio wave holography with unequal reference to signal frequency, recording linear object with superheterodyne receiver

19 p3420 A70-37290

Radar tracking of meteors with slow drift velocity, improving accuracy via echo frequency multiplication

19 p3514 A70-37644

DC-to-sinusoidal inverter employing PWM waveform, analyzing circuit parameters effect on harmonic content

19 p3358 A70-37854

Signal conditioner for expanded range pressure measurements from reentry vehicles via transducer zero shift suppression and output signal compression

19 p3426 A70-37899

PGM noisy high bit rate processing system, describing preprocessor, bit detector and synchronizer

19 p3379 A70-37903

Signal measurement and processing in thermal vacuum and space simulation tests of Azur and Dial satellites

19 p3400 A70-38298

Signal processing by differential data and common mode amplifiers and active filters, emphasizing low level transducers

19 p3431 A70-38529

Optimal synthesis of linear active RC filters with controlled source, using feedforward and feedback weighted signals

20 p3596 A70-39163

Multichannel iterative servosystems operators for useful signals reproduction

20 p3603 A70-39836

Uncontrolled plant dynamic characteristics analysis based on signal recordings, using black box without input method

20 p3705 A70-39909

Analog communication optimal nonlinear modulation scheme design for large SNR through transformation into inner product functions

20 p3587 A70-39973

Satellite wideband transmission of ionosphere data, monitoring amplitude and phase of phase-coherent CW signals from geostationary satellite

20 p3590 A70-40483

FM threshold extension for system performance improvement, comparing impulse noise elimination, correlation detection and delta modulation signal processing techniques implemented at demodulator output

21 p3787 A70-41334

Strapdown redundant experimental sensor inertial navigation package containing gyros and accelerometers, discussing signal real time processing by digital computer

[AIAA PAPER 69-851]

21 p3849 A70-41858

Digital filtering of sampled narrowband sinusoidal signal embedded in wideband white noise, assessing hard clipping effect on performance by simulation on digital computer

21 p3791 A70-41948

Discretization interval in discrete analog filters for optimal processing of complex radar signals, estimating systematic errors

22 p3984 A70-42393

Optico-acoustic autocorrelator for linear FM signals spatial compression, discussing design and performance

22 p3984 A70-42398

Multichannel correlation filter devices for processing periodic fluctuating signals in noise background

22 p3987 A70-42557

Recurrent adaptive methods for verification of multialternative hypotheses in stepwise signal processing

22 p3993 A70-42565

Multiparameter eddy current test methods, describing test coil output signal amplification, demodulation and recombination

22 p4028 A70-42592

Harmonic linearization method for periodic regimes in discrete nonlinear automatic control systems performing signal quantization with respect to level or time

22 p4001 A70-42833

Active filter operation, examining angle modulated signal at input by various approximation methods

22 p3997 A70-43130

Coherent reference for demodulating double sideband suppressed carrier (DSB-SC) signals in presence of frequency detuning, using squaring or Costas loop

22 p3990 A70-43326

PCM/NRZ signal band-limiting effect on bit error probability, using sample detector

22 p3990 A70-43339

Multiple range bin radar distribution-free detection procedure based on observation ranks without elaborate equipment

22 p3991 A70-43578

Vestibular message flow regulation by central nervous system, describing afference, inhibition and copy formation

22 p3976 A70-43705

Varied-frequency signals separation using bridge circuits for splitting process resulting in unchanged phase ratio and changed amplitude ratio

23 p4159 A70-43759

Signal processing methods application to myoelectric studies of muscular fatigue, employing surface electrodes

23 p4151 A70-44378

Electronic equipment automatic testing systems signal routing and switching trees and matrices design, emphasizing modular approach

23 p4173 A70-44540

High performance military aircraft missile command and control signal data processor microelectronics packaging, using integrated and printed circuit modules

23 p4174 A70-44542

Low cost microwave antenna-receiver for satellite FM TV signal reception at SHF and conversion for standard sets

23 p4164 A70-44645

Time varying signals sampling, noting role of frequency in distortion

24 p4311 A70-45433

Signal distortion dependence on sampling frequency during continuous signals restoration

24 p4312 A70-45440

Analog three dimensional electrical signal multiplier circuit based on Hall effect, considering division and square root extraction

24 p4319 A70-45484

Multifunction programmable digital filter design performing bandpass, bandstop, comb, nonlinear phase and matched filtering of signals

24 p4319 A70-46082

Digital to analog converters for signal processing in CRT character and sweep generation, programmable power supplies, resolver positioning, shaft angle conversion, etc

24 p4326 A70-46083

SIGNAL RECEPTION

NT SYMBOLS

NT TELEVISION RECEPTION

EMI /electromagnetic interference/ antennas relative received voltage vs height above ground as functions of effective length, impedance, etc

01 p0042 A70-10087

HF radio waves propagation between antipodal transmitter and receiver, discussing diurnal variations and reception over polar caps and water

01 p0045 A70-11103

Ionospheric discontinuities drift velocities from diversity reception data indicating no dependence on solar activity

01 p0083 A70-11531

Channel constraints on multiple access systems obtained from airborne propagation tests via satellites, studying disparities in received signal strength

02 p0260 A70-12569

Mean signal response time relationship to nonaging foreperiod

02 p0239 A70-12627

Recognition problem in multipositional symmetrical channel solved by special separation of observational space with preference to signal arriving at reception point

03 p0446 A70-13197

Pulse signals optimal filtration in superregenerative receiver and resulting SNR effect

03 p0456 A70-13203

Fluctuating radio signals optimal two step detection on Gaussian noise background applicable to coherent superposition of signals reception

03 p0448 A70-13454

Transmission channel nonlinearity effect on signal detector performance for signal received by synthesized antenna indicating SNR change

04 p0659 A70-15287

Horizontal atmospheric surface layer propagation path for 3370 A UV signal, studying reception distances for given SNR

05 p0812 A70-16242

Incoherent reception of wideband signals transmitted through multibeam channel with changing random parameters

05 p0812 A70-16248

Signal parameter quasi-optimal estimation during reception on background of normal noise with unknown correlation function

06 p1009 A70-17671

Optimal receiver synthesis for signal detection on background noise resulting from nonlinear filtration of Gaussian noise

07 p1226 A70-18760

Continuous signal a posteriori distribution density formed on basis of learning sequence with no a priori information about signal and noise statistics

07 p1226 A70-18761

Polarization- and space-diversity reception techniques for radio links based on diffraction from ionized meteor trails

07 p1378 A70-18990

Narrow band limiter influence on SNR at FM reception output by computer simulation using threshold pulse model

07 p1227 A70-19124

Radio signal reception beyond normal horizon by partial reflection from elevated layer in troposphere calculated by computer

07 p1234 A70-19218

Nonenergetic parameter estimation of signal during optimal reception with random amplitude fluctuation in normal background noise using maximum probability function

08 p1461 A70-20868

Phase coordinates conditional probability density statistical characteristics from continuous reception of random information, deriving differential equations

08 p1479 A70-20998

Acousto-optic receiver and spectrum analyzer for electromagnetic signals in VHF-UHF range

08 p1463 A70-21780

Astronomical high resolution radio interferometers design with autonomous reception, analyzing sensitivity of data processing correlation devices

09 p1647 A70-23132

Polarization diversity reception effects on VHF telemetry signal from low altitude satellites

10 p1832 A70-23919

Transient analysis of transistor under large input signal accounting for minority carrier life and base collector capacity

10 p1849 A70-24383

Reaction time dependence on sound signal probability determined by temporal structure of signal presentation

10 p1818 A70-24713

Numerical payoff influence on reaction time to second stimulus in subjects receiving successive signals at short intervals

10 p1818 A70-24715

Pulsar radio emission reception with improved SNR based on periodic variation of average reception frequency with time

10 p1948 A70-25165

Physical formula for information content in communication signals based on receiver observation concept, noting role of channel properties and encoding

10 p1844 A70-25223

Signal frequency capture probability vs frequency search rates and AFC loop parameters determined in phase locked oscillator

11 p1996 A70-25349

Optimal pulse compression time-invariant filter for signal reception with sidelobe constraints under white noise in radar and communications systems

11 p2025 A70-26218

System configuration requirements and detectability performance characteristics analysis for optimizing array reception of multipath

11 p2018 A70-26264

Signal selection for phase coherent and incoherent additive noise channels to maximize receiver correct decision probability

11 p2010 A70-26327

Emission spectrum of neon-helium laser receiving Doppler shifted signal from moving mirror, showing memory effect due to beat harmonics

12 p2246 A70-27352

Dynamic tracking filter response analysis for FM reception using equivalent circuit method

12 p2200 A70-28054

Noise stability of optimal binary detection receiver of rectangular-pulse and discrete pseudorandom signals under nonideal synchronization

13 p2364 A70-28869

Satellite based random Doppler environmental measurement technique for Global Atmospheric Research

Program /GARP/, receiving signals from balloons, buoys and land stations 13 p2407 A70-29176

Nonlinear optimal filtration and adaptive quasi-coherent reception of Markov signals on white noise background 13 p2369 A70-29731

Noise rejection during synchronous quasi-coherent radio signal reception with binary narrow band linear filter used for voltage shaping 13 p2369 A70-29737

AM signal reception on strong AM noise background, describing theoretical receiver design 13 p2370 A70-29740

Mutual correlation coefficients for signal level changes during short wave space diversity reception and radio wave propagation over two midlatitude paths 14 p2546 A70-30145

Vertical ionospheric electron concentration profiles, horizontal gradients and integral component from Doppler and Faraday signal recording on geophysical rockets, using diversity reception 14 p2569 A70-30205

Sporadic E layer space diversity reception data from stations 20 km apart, noting horizontal ionization gradient effect 14 p2571 A70-30234

Correlation characteristics of turbulent motions in atmospheric meteor region, discussing diversity and single point reception methods 14 p2572 A70-30329

Correlation apparatus for ionospheric drift measurement by spaced receivers using closed loop of magnetic tape 14 p2550 A70-30741

Optimum adaptive reception for binary sequences, using posteriori probability density function computing device synthesized from correlator, instantaneous nonlinearity and multiplier 14 p2552 A70-31188

Electronically tracking antenna system for satellite reception in VHF range suitable for unmanned receiving stations 14 p2558 A70-31196

Noise rejection and spurious reception probability in optimal channel for continuous sequenced signal with undetermined arrival and overlapping spectra 15 p2696 A70-31509

Radar echo signal amplitude probability distribution during fully polarizational reception 15 p2696 A70-31517

Clutter signals in radar receiver antenna, determining autocorrelation function and spectral power density 15 p2701 A70-32466

Dipole and loop antennas in isotropic compressible plasma under wave incidence, using reciprocity theorem for receiving voltages and maximum powers 16 p2957 A70-32982

Laser range finding to satellite equipped with retroreflectors, noting accuracy dependence on signal strength 16 p2925 A70-33021

Discrete signals optimal reception by lowering synchronization requirements for communications or radar purposes 16 p2863 A70-33242

Multiple sensor arrays phase difference estimation, assuming Gaussian signal and noise statistics 16 p2866 A70-34064

Optimal incoherent signal reception in discrete information transmission systems with fluctuation and concentration noise, including Rayleigh fading 18 p3228 A70-36600

Optimal receiver synthesis for signal detection on background noise resulting from nonlinear filtration of Gaussian noise 18 p3229 A70-37104

Continuous signal a posteriori distribution density formed on basis of learning sequence with no a priori information about signal and noise statistics 18 p3229 A70-37105

Frequency synchronization channel pulse fluctuations effect on noise stability of binary signal reception 20 p3587 A70-40145

Signal frequency capture probability vs frequency search rates and AFC loop parameters determined in phase locked oscillator 20 p3589 A70-40461

Wave polarization effects on ionospheric radio wave transmission and reception 21 p3790 A70-41361

Information transmission and coding theory - Conference, Tashkent, September-October 1969, Section 2, Statistical theory of signals and noise, Optimal reception methods 22 p3986 A70-42551

Optimal reception of phase manipulated signal on noise background with unknown statistics and information parameter a priori probabilities 22 p3987 A70-42561

Algorithms for analog wideband signals optimal reception in presence of strong Gaussian noise 22 p3988 A70-42568

Emission spectrum of neon-helium laser receiving Doppler shifted signal from moving mirror, showing memory effect due to beat harmonics 22 p4052 A70-43596

Low cost microwave antenna-receiver for satellite FM TV signal reception at SHF and conversion for standard sets 23 p4164 A70-44645

Vertical ionospheric electron concentration profiles, horizontal gradients and integral component from Doppler and Faraday signal recording on geophysical rockets, using diversity reception 24 p4330 A70-46280

Sporadic E layer space diversity reception data from stations 20 km apart, noting horizontal ionization gradient effect 24 p4331 A70-46309

SIGNAL REFLECTION

Phase fluctuations measurements of obliquely incident signal reflected from ionosphere performed over distance of 1300 km, showing amplitude dependence 01 p0046 A70-11533

Ionospheric propagation experiments to measure radio echo height changes, observing correlation between LF signal reflection and MF transmitter power 04 p0650 A70-15132

Equation for disturbance of ILS localizer signals by reflection from flat hangar wall, discussing computer program 04 p0652 A70-15344

Polarization nature and changes evaluation of radio echo signals reflected from polar auroras 04 p0682 A70-15730

Ionospheric probe for simultaneous measurement of radio signal reflection coefficient and amplitude-frequency characteristics 04 p0684 A70-15746

Radio wave scattering and brightness on uneven interface, determining frequency spectrum of signal reflected from surface assuming uniformly moving receiver 05 p0813 A70-16261

Correlation function of auroral reflection radio signals with allowance for polar ionospheric scattering and pulse signal transmission and reception 05 p0841 A70-16741

Electromagnetic-acoustic probe for remote wind velocity sensing and radar range performance 06 p1071 A70-18509

Short wave radar tracking of comets, considering tail type criteria for signal reflection 07 p1379 A70-19040

Reflection coefficient for radio wave pulse reflected from ionosphere with large scale fluctuations in electron density, compared to empirical data for reflecting surface irregularities 07 p1231 A70-19170

Ionospheric reflection coefficients from vertical and oblique incidence pulse amplitude data, discussing night conditions effect on Ottawa pulse transmissions 07 p1232 A70-19176

Recording technique for measuring short period variations of radio signal reflections altitudes from ionosphere applicable to fast ionospheric processes 07 p1277 A70-20454

Polarized light electroreflection from GaAs single crystal, noting useful signal linear dependence on electric field 08 p1556 A70-21124

Angular coordinate during multilevel quantization of radar signal reflected from scintillating body on Gaussian noise background, applying maximum probability method 11 p1996 A70-25347

Meteor trail angular dimensions determined by frequency scanning method involving minimum points on reflected signal characteristics 11 p2107 A70-25556

True height of reflection determination for oblique sounding data interpretation, considering method error 14 p2547 A70-30230

Ionized meteor trail radio signal reflections, observing duration and echo quantity random deviations and activity coefficient at specified times 14 p2636 A70-30318

Ionospherically reflected HF radio signal frequency spread measurement involving phase difference crossings counting between antennas 14 p2550 A70-30743

Polarization nature and changes evaluation of radio echo signals reflected from polar auroras 14 p2575 A70-30814

Ionospheric probe for simultaneous measurement of radio signal reflection coefficient and amplitude-frequency characteristics 14 p2576 A70-30830

Snow field mapping with K band radar imagery determining signal return difference with surrounding

terrain, noting role of volume scattering and old snow structure 14 p2578 A70-31238

S band telemetric signals reception transmitted by Apollo 12 during occultation behind lunar disk, discussing lunar surface reflectivity 15 p2699 A70-32290

Speech signals reflection in nervous system, constructing functional perception model for signals conversion into phonetic patterns 15 p2687 A70-32870

Radar and DC pulse signatures of multiple reflection from dry, damp and wet earth for vertical and horizontal polarization 16 p2861 A70-32977

Long range tropospheric radio wave propagation, calculating signal impulse function and time lag between diffraction and reflection 17 p3048 A70-35678

External SHF signal effects on multifrequency spectrum of reflex klystron coupled with long waveguide 17 p3055 A70-35682

Delay time between beams reflected from different parts of meteor trail, using phase invariant and frequency scanning methods 19 p3512 A70-37313

Angular coordinate during multilevel quantization of radar signal reflected from scintillating body on Gaussian noise background, applying maximum probability method 20 p3589 A70-40459

Meteor trail angular dimensions determined by frequency scanning method involving minimum points on reflected signal characteristics 21 p3892 A70-41306

Two echo complex signature in group path vs time records by ionospheric traveling disturbances 21 p3820 A70-42243

E region electron concentration profiles, using ground sounding equipment allowing accurate signal reflection altitude measurements 23 p4190 A70-44078

Atmospheric horizontal stratification and UV transmittance by signal reflection from satellites 23 p4191 A70-44268

True height of reflection determination for oblique sounding data interpretation, considering method error 24 p4316 A70-46305

SIGNAL STABILIZATION

Signal stabilization and performance of nonlinear sampled data systems, suggesting oscillations injection at input 06 p1026 A70-17970

Two mode gas laser behavior under external signal action showing mode locking possibility by combination frequencies due to medium nonlinearity 07 p1296 A70-18764

Terrestrial interface at SPADE terminals for converting international telephone exchange differences into common signaling format [ALAA PAPER 70-413] 11 p1997 A70-25407

Conditionally stable feedback control systems with saturation, comparing large signal stabilization methods 16 p2884 A70-33313

Two mode gas laser behavior under external signal action showing mode locking possibility by combination frequencies due to medium nonlinearity 18 p3271 A70-37108

SIGNAL TO NOISE RATIOS

IF optimum bandwidth for maximizing output SNR in FM receiver with barrier to noise ratio below discriminator threshold 01 p0051 A70-11119

CW laser ranging systems power and signal to power ratio characteristics, finding possible advantages over pulsed systems 01 p0114 A70-11321

Error probability, signal to noise ratio and average signal level for coherent heterodyne and photon limited laser communication systems, using Poisson distributions 02 p0255 A70-11914

Signal to noise ratio for optical heterodyne with inhomogeneous partially coherent signal and local oscillator fields, using phase-quadrature description 02 p0255 A70-11915

Linear system response to random signal inputs, deriving SNR and noise figure equations using autocorrelation and spectral analysis concepts 02 p0257 A70-12193

Multielement active/passive antenna systems maximum SNR value obtained by determining conditions satisfied by parameters 03 p0456 A70-13092

Detection efficiency compared for system containing clipper circuit and quasi-optimal linear system for video pulse signal with additive noise background 03 p0446 A70-13201

Pulse signals optimal filtration in superregenerative receiver and resulting SNR effect 03 p0456 A70-13203

Local criteria and geometric integration for stable transmitter power level selection in group of radio stations ensuring adequate SNR

03 p0446 A70-13237

Binary systems noise resistance with various cross correlation functions and indefinite moment of arrival

03 p0448 A70-13512

Intrinsic noise of passive waveguide multipoint with losses, obtaining mean values and wave correlation functions using scattering matrix

04 p0655 A70-14402

Phase feedback demodulation technique to analyze telemetry performance degradation caused by voice interference in modes of Apollo communication system, providing linear detection scheme

[AAS PAPER 69-609] 04 p0648 A70-14660

Sinusoidal signal detection in Gaussian noise band by zero crossing method, discussing signal frequency position and SNR

04 p0648 A70-14705

Transmission channel nonlinearity effect on signal detector performance for signal received by synthesized antenna indicating SNR change

04 p0659 A70-15287

Radar false return probability relationship to noise, investigating moving window detectors

04 p0652 A70-15341

Differential equations for minimum variance linear filter separating signals from additive correlated noise, using discrete time optimum formulas

[AIAA PAPER 69-73] 04 p0663 A70-15586

Horizontal atmospheric surface layer propagation path for 3370 A UV signal, studying reception distances for given SNR

05 p0812 A70-16242

SNR for IR photovoltaic semiconductor cell generalized for astronomical case, noting stars approximation to black body radiators

05 p0849 A70-16645

Optimum signals for phase locked or delay locked loops determined as function of signal to noise ratio

06 p1023 A70-17523

Optical heterodyne quantum detector response, calculating signal to noise ratios

06 p1008 A70-17524

Lateralization and detection of signals under antiphasic noise masking measured at various SNR levels

06 p1106 A70-17597

Output autocorrelation properties of ideal limiters driven by binary deterministic signal plus stationary zero-mean Gaussian noise

06 p1013 A70-18625

Optimal nonparametric amplitude and phase methods for synthesizing signal detection systems invariant to noise distribution and noise-signal combination

07 p1226 A70-18684

Optimal signal detection with random phase on Gaussian noise background, estimating error probabilities

07 p1226 A70-18685

Continuous signal a posteriori distribution density formed on basis of learning sequence with no a priori information about signal and noise statistics

07 p1226 A70-18761

Quantum statistical decision theory for detection and estimation of signals in random noise

07 p1333 A70-18919

Narrow band limiter influence on SNR at FM reception output by computer simulation using threshold pulse model

07 p1227 A70-19124

Return Beam Vidicon (RBV) system compatibility with requirements for Earth Resources Observation Satellite (EROS), featuring high resolution image sensor for decreasing signal noise

07 p1280 A70-19231

Digital data transmission over discrete time Gaussian channel with noisy feedback, investigating error-exponent/reliability and finite SNR

07 p1235 A70-19362

Magnetic field filtration into time-variable and constant parts, using signal to noise analogies

07 p1266 A70-19440

Signal to noise ratios and fluctuation spectrum of photomultiplier illuminated by laser passing through laser amplifier, noting population level effect

07 p1300 A70-19869

Delay locked closed loop system with and without signal clipping in noisy /Gaussian/ environment applied to radar, sonar and seismic propagation

07 p1242 A70-19997

Signal processor with ratio-squared predetection combining for adaptive antenna array, discussing radiation patterns for coherent and incoherent signal and noise sources

07 p1242 A70-20066

Phase and amplitude modulated signals transmission over band limited channel disturbed by additive white Gaussian noise

07 p1237 A70-20195

Gain-to-noise temperature ratio /G/T/ optimization by dish antenna shaping for nonuniform aperture field distribution

08 p1471 A70-20790

Extremal statistics for signal and noise error probabilities estimation and computer simulation of digital feedback communication systems

08 p1459 A70-20800

White noise and nonlinear effects in telemetry RF links, analyzing received process to phase coherent receiver

08 p1460 A70-20823

Noise effects on joint operation of signal follow-up system with search device using semi-Markov random technique

08 p1461 A70-20864

Circuit analysis of pulse integrator and square-law receiver used as optimal filter during incoherent radio pulse reception on background fluctuating noise

08 p1461 A70-20865

Supersonic flight vehicle plasma sheath effect on effective range of onboard radar installation, discussing SNR

08 p1461 A70-20869

Matched filter SNR behavior under time and frequency domains distortion and random distortion, deriving design equations for energy loss coefficients

08 p1474 A70-21223

Large carrier to noise ratios in FM receivers as function of correlation between Gaussian and impulse shot noise /clicks/

08 p1463 A70-21776

Threshold characteristics of compression line demodulator obtained from output SNR

09 p1631 A70-22017

Pulse signal transmission rate increase by transient processes compensator, discussing stability relation to signal to noise ratios

09 p1639 A70-23696

Signal detection in correlated noise with two stage prewhitening and matched filter system

10 p1833 A70-24220

SNR and system error rate prediction for coherent nonlinear satellite channels based on bounding techniques

10 p1836 A70-24341

Radar transmission SNR formula concerning fluctuations with respect to working frequency

10 p1840 A70-24478

Pulsar radio emission reception with improved SNR based on periodic variation of average reception frequency with time

10 p1948 A70-25165

Angular coordinate during multilevel quantization of radar signal reflected from scintillating body on Gaussian noise background, applying maximum probability method

11 p1996 A70-25347

Communication satellite repeater design requirements to achieve adequate SNR for varying rain and cloud attenuation

[AIAA PAPER 70-498] 11 p1998 A70-25425

Optical heterodyning of Doppler shifted signal with minimal instrumental spectral broadening and high SNR, applying to turbulence structure measurement by CW laser

11 p2062 A70-25630

Multiple access to communication satellite by limiting repeater, considering model of n signals plus band limited white Gaussian noise in zero memory device

11 p2008 A70-26229

Rayleigh and m fading signals spectral location in additive white Gaussian noise, allowing predetermined or variable channel observation time

11 p2010 A70-26268

FM/FM telemetry threshold carrier SNR and receiver IF bandwidth optimization through computer program

11 p2014 A70-26272

Phase velocity and direction estimation of unknown signal propagating across two dimensional array in dispersive waveguide, showing dependence on SNR

11 p2018 A70-26274

Optimum transmitter strategy and receiver gain for linear feedback communication in nonstationary additive noise

11 p2011 A70-26328

Digital filters response errors due to signal amplitude quantization, resulting from analog-to-digital conversion and arithmetic operations

11 p2029 A70-26333

RF amplifier design procedure for maximum stable gain with minimum noise figure

11 p2019 A70-26715

Multiplicative modulation noise of helium-neon traveling wave laser amplifier at micron wavelength

11 p2020 A70-26816

IF combinator for broadband transhorizonal radio relay transmission improvement by providing optimum SNR

11 p2020 A70-26821

Electromagnetic differential flowmeter design and performance, considering SNR

12 p2231 A70-27162

Performance characteristics of quadriphase PSK communication system with noisy reference signal, formulating error probability

12 p2187 A70-27907

Noise stability of optimal binary detection receiver of rectangular-pulse and discrete pseudorandom signals under nonideal synchronization

13 p2364 A70-28869

Binary code distortion in relative phase telegraphy signals under wideband and correlated noise

13 p2364 A70-28870

Delta modulation with slope-overload prediction, showing signal to noise ratio improvement from computer simulation

13 p2365 A70-29146

Computer modeling of nonlinear phase automatic frequency control systems under noise and oscillating disturbance

13 p2383 A70-29303

Analog computer simulation of command signal detectors for reconstruction of transmitted binary character from noisy binary coded signal

13 p2385 A70-29560

Wideband FM signals transionospheric propagation, calculating output spectrum, signal to distortion ratios and signal to noise ratios

13 p2367 A70-29588

FM detector without normalization useful for low S/N reception of FSK and PSK in telemetry systems

13 p2367 A70-29589

Stationary phase error variance for second order phase locked loop for low signal to noise ratios

13 p2383 A70-29590

Digital transition tracking symbol synchronizer improving SNR without lowering loop bandwidth

[JPL-TR-32-1488] 13 p2367 A70-29591

Optimal coherent radar detector for signals with unknown amplitude and background noise intensity

13 p2369 A70-29728

Signal-arrival-time invariance and SNR resolution of discretely analog filters matched to complex radio signals

13 p2380 A70-29736

Noise rejection during synchronous quasi-coherent radio signal reception with binary narrow band linear filter used for voltage shaping

13 p2369 A70-29737

Noise rejection for optimal reception of incoherent binary signals in one beam Rayleigh dispersion radio channel under ionospheric electron density fluctuations

13 p2369 A70-29738

Noise effect on single band modulation receiver using phase automatic frequency control for carrier wave at arbitrary SNR

13 p2370 A70-29739

AM signal reception on strong AM noise background, describing theoretical receiver design

13 p2370 A70-29740

Statistical linearization synthesis of nonlinear self adjusting systems with frequency filters and input signal under white noise

14 p2559 A70-30156

FM limiter-discriminator followed with ideal bandpass filter, deriving output signal to noise ratio

14 p2558 A70-31189

Hard limiting bandpass limiter output signal to noise ratio in PM signal detection calculated using probability density function

14 p2552 A70-31194

Off-axis nonlinear holograms, defining spurious distortion and SNR

14 p2588 A70-31206

Coherent or spatially incoherent light recordings of Fourier transform holograms, investigating resolution cells film grain and signal to noise ratio

14 p2588 A70-31207

Demodulators threshold performance for satisfying carrier to noise ratios requirement of Intelsat 4 system

14 p2552 A70-31352

Two signal selectivity and permissible noise level of FM receiver with linear cascades and detector nonlinearity effects

15 p2696 A70-31506

Hologram superposition on photosensitive surface for multiimage successive recording, examining resolution, SNR, etc

15 p2734 A70-31596

Cascade digital filter computerized design with favorable signal to noise ratio, considering round-off errors

15 p2709 A70-32465

Digital data detection in presence of noise and double sided intersymbol interference, deriving error rates for known and stochastic signals

15 p2703 A70-32561

Filter parameter estimation in serially correlated measurement noise, using recursive least squares analysis

15 p2704 A70-32591

Augmented state variable method of nonlinear discrete system identification with noise corrupted input observations

15 p2704 A70-32592

- Radiometer employing frequency domain coding of noise-like signal spectrum, comparing with Dicke system
16 p2871 A70-32926
- Model probability distribution for hybrid phase locked loop derived by Fokker-Planck techniques, providing superior performance for all SNR
16 p2882 A70-33038
- Broadband and narrowband pulse signal noise electromagnetic interference prediction techniques for filter or shielding parameters evaluation
16 p2862 A70-33065
- Solid state spectrum centered receiver for eliminating externally generated pulse type interference between radar sets
16 p2862 A70-33066
- Laser ranging and tracking for high velocity targets, discussing SNR considerations, ambiguity resolution, error analysis, measurement centroid and target acquisition
16 p2862 A70-33165
- Airborne electro-optical imaging sensor subsystems performance optimization, comparing mathematical and graphical methods for providing maximum SNR
16 p2906 A70-33172
- Low light intensities measured using photon counting method, comparing signal to noise ratio with lock-in method
16 p2911 A70-33524
- Probability density function of specularly fading signal plus noise for frequency shift keying and pulse radar systems
16 p2865 A70-34040
- Radar detection range determination by parametric method based on SNR formula
16 p2866 A70-34062
- Direction finder for point source signals, discussing mathematical model for random noise in space, S/N performance and equipment design
17 p3042 A70-34586
- Intensity interferometer for weak noise-like signal power measurement in presence of additive Gaussian noise
17 p3089 A70-35265
- Loudspeaker optimal arrangement for speech intelligibility in aircraft crew compartments, discussing apparent SNR improvement
17 p3039 A70-35564
- Monaural detection and filtering of sinusoidal signals in noise, using amplitude model
17 p3033 A70-35610
- Optimum spectral control of nonlinear plant, using Newton iteration and linear programming
18 p3234 A70-36075
- Frequency filters in nonlinear self adaptive system design for noncorrelated input and noise signals
18 p3234 A70-36119
- Asymptotic transmitting capacity of continuous channel with intense independent and additive noise
18 p3228 A70-36598
- Lower reliability estimates for block codes of binary channels with feedback noise
18 p3235 A70-36599
- Threshold extension capabilities of phase lock loop and FM feedback demodulators, calculating output SNR for broadband systems
18 p3229 A70-36784
- Magnetic field filtration into time-variable and constant parts, using signal to noise analogies
18 p3249 A70-36914
- Signal to noise ratios for metastable and ion detection of excited neutral molecules in beam
18 p3262 A70-37096
- Continuous signal a posteriori distribution density formed on basis of learning sequence with no a priori information about signal and noise statistics
18 p3229 A70-37105
- Two dimensional phase distribution function of mixture of Gaussian noise with amplitude modulated signal
18 p3229 A70-37110
- Mechanical parametric amplification, improving SNR of acoustic systems in hostile environments
19 p3422 A70-37695
- Signal processing by differential data and common mode amplifiers and active filters, emphasizing low level transducers
19 p3431 A70-38529
- RF communication signal to noise improvement by time variant tracking filter with high Q superconductive resonant cavity
19 p3391 A70-38892
- Electronic correlation signal analysis for localizing noise sources, detecting signals against background noise
20 p3601 A70-39650
- Signal modulation by pulse ratio variation in magnetic tape channel, discussing SNR characteristics
20 p3586 A70-39707
- Analog communication optimal nonlinear modulation scheme design for large SNR through transformation into inner product functions
20 p3587 A70-39973
- Angular coordinate during multilevel quantization of radar signal reflected from scintillating body on Gaussian noise background, applying maximum probability method
20 p3589 A70-40459
- Two dimensional and volume diffuse signal beam dielectric holograms, calculating and measuring diffraction efficiency and signal to noise ratio
21 p3835 A70-40717
- Statistical confidence levels for frequency analysis, detecting peak sinusoid for desired signal to noise ratio
21 p3825 A70-40867
- Digital filtering of sampled narrowband sinusoidal signal embedded in wideband white noise, assessing hard clipping effect on performance by simulation on digital computer
21 p3791 A70-41948
- Single picosecond mode-locked laser pulse selection and multiple pass amplification device, obtaining high energy and signal to noise ratio
21 p3838 A70-42023
- Wideband detection of frequency uncertain M-ary frequency shift-keyed /MFSK/ transmission in Gaussian noise, deriving symbol error rate for limiting SNR cases
21 p3792 A70-42177
- Dynamic noise performance equivalence of phase locked or double superheterodyne tracking loops, using noise free external generator
21 p3793 A70-42180
- Transient behavior of first order phase locked loop in presence of noise, solving Fokker-Planck equation for loop dynamics by numerical integration
21 p3802 A70-42181
- Photographic processing methods for high efficiency low noise phase holograms on silver halide emulsions
22 p4025 A70-42286
- Recursive signal detection scheme, obtaining SNR by derivative approximation
22 p3984 A70-42317
- Threshold SNR for signal frequency meter based on zero number count method, determining reliability
22 p3985 A70-42401
- Random signal detection on uncorrelated Gaussian noise background with unknown intensity, discussing detector performance
22 p3986 A70-42553
- Multichannel correlation filter devices for processing periodic fluctuating signals in noise background
22 p3987 A70-42557
- Optimal reception of phase manipulated signal on noise background with unknown statistics and information parameter a priori probabilities
22 p3987 A70-42561
- Radar signal synthesis in noise with good range resolution for rapidly fluctuating targets, using ambiguity function
22 p3988 A70-42566
- Signal accuracy prediction in nonlinear steady or unsteady continuous and discrete automatic control systems in random noise, using statistical linearization
22 p4003 A70-42883
- Optimal nonlinear filtration for continuous automatic data transmission with radio signal under white, narrow band and Markov noise
22 p4004 A70-42891
- Computer-based seismic data acquisition system using digital vibroseis process for eliminating low signal to noise ratio characteristics
22 p4038 A70-43092
- Signal and noise properties of degenerate and quasi-degenerate nonreciprocal parametric amplifiers without circulators
22 p3990 A70-43423
- VHF omnidirectional problem /VOR/ receiver, considering noise reduction problem and active filter importance to signal improvement and system accuracy
22 p3992 A70-43586
- Signal shape optimization by minimizing dispersion in temporal position estimates for radio pulse in presence of additive white noise
23 p4161 A70-43961
- Multiplicative noise reduction during transmission of analog signals over tropospheric microwave relay links
23 p4162 A70-44090
- Hologram superposition on photosensitive surface for multimage successive recording, examining resolution, SNR, etc
23 p4195 A70-44280
- Communication system signal to noise ratio requirements, determining minimum signal power level
23 p4163 A70-44297
- Quantum noise in narrow-band ring laser, noting mode amplification of weak monochromatic signals
23 p4202 A70-45056
- Multiplicative modulation noise of helium-neon traveling wave laser amplifier at micron wavelength
24 p4317 A70-45188
- SNR of moving diffuser illuminated by laser light, considering image plane and Fresnel field observations
24 p4354 A70-45670
- Quantum detector with impinging EM field, discussing photoelectron counting distribution and signal with white noise
24 p4312 A70-46051
- Weak noise and threshold effects on estimation error for nonlinear PM systems
24 p4312 A70-46053
- Optimal noiseless linear information feedback estimation for additive white Gaussian noise channels, applicable to digital transmission
24 p4313 A70-46064
- Output signal/quantization noise ratio, dynamic range and transmission error effects for syllabically companded delta-sigma modulator systems
24 p4320 A70-46152

- Dual frequency ranging within narrow bandwidth of VHF communications satellite repeater for transmitted signals correction of ionospheric refraction error
01 p0043 A70-10781
- Rms error for reproduction of satellite signal transmitted through continuous Gaussian channel assessed by numerical calculation
01 p0046 A70-11513
- Electrical signaling civil aircraft systems, discussing design and integrated maneuver demand controls
02 p0224 A70-11835
- Earth space signal propagation characteristics obtained by satellite-borne radio interferometer provide phase information in addition to amplitude for improving navigation accuracy
02 p0260 A70-12567
- Wideband satellites bandwidth and aperture limits direct measurement based on ground monitoring of CW signals, taking into account ionospheric dispersion
02 p0261 A70-12577
- Superrefractive layer development at 3000 ft during radio refractive index profile measurements by microwave refractometer carried on aircraft, producing enhanced signals
02 p0261 A70-12591
- Airplane navigation based on VHF ranging between aircraft and geostationary satellite, examining errors by unknown propagation characteristics of signal in ionosphere
02 p0262 A70-12594
- Radar pulse scattering from ionized media including nuclear explosion fireballs and high speed reentry vehicle wakes, analyzing to retrieve backscattered pulse signal envelope
02 p0262 A70-12602
- Signal orientation insensitive filter for pattern recognition
02 p0266 A70-12701
- Faraday rotation observations on Explorer 22 signals at two receiving stations, discussing comparative evaluation procedures and results
03 p0472 A70-12874
- Optimal selection of centralized communication network of combined radial and linear structures minimizing disconnected peripheral points
03 p0446 A70-13238
- Reduced multipoint equivalent scattering parameters derivation by matrix method, determining load reflection coefficients effect on signal attenuation and phase shift
03 p0458 A70-14038
- PCM signal transmission testing over radio links with two level phase modulation
03 p0452 A70-14282
- Physical model to study coaxial or triaxial cable systems interaction with ionizing radiation fields, emphasizing effects governing induced signals
04 p0658 A70-14746
- Integrodifferential equation solved for plane wave reflection and transmission by random medium assuming homogeneous background refractive index
04 p0649 A70-14970
- Small scale disturbances and radio wave scattering effects on signal transmission and radiophysical observations in ionosphere
04 p0653 A70-15723

Transmission equipment of Pleumeur-Bodou space communication installation including modulators, converters and amplifiers for telephone and TV carriers
05 p0819 A70-15986

Current carrier motion and diffusion capacity in p-n junctions with highly doped regions under large variable signal
05 p0892 A70-16197

Horizontal atmospheric surface layer propagation path for 3370 A UV signal, studying reception distances for given SNR
05 p0812 A70-16242

Group delay characteristics curvature in radio relay systems, analyzing crosstalk in picture- sound and beamed multiplex signal transmission by nonlinear distortion method
05 p0815 A70-16774

Rate of change of radio ray path length for transionospheric satellite VHF signals determined from Doppler and Faraday effect analyses
06 p1008 A70-17578

HF signals propagation through auroral curtain investigated for scattering or blanketing effects, discussing ground scatter echo cut-off caused by sporadic E layer
06 p1011 A70-18538

Communication satellite transponders design, cost, reliability, manufacturing, testing and future developments
07 p1241 A70-19620

Monograph on time measurements covering time scales, intervals, natural and artificial clocks, frequency standards, time and time signal transmission
07 p1283 A70-19664

Dynamic calculation of oscillating liquid filled elastic cavity on elastic kinematic system under random load, using random signals transmission theory
07 p1416 A70-20194

Phase and amplitude modulated signals transmission over band limited channel disturbed by additive white Gaussian noise
07 p1237 A70-20195

Time-frequency correlation function for fading communication channel between transmitter and receiver sites, using AM transmissions as probing signals
08 p1458 A70-20796

Binary, ternary and multilevel digital signals transmission codes emphasizing PCM signals
09 p1631 A70-22038

Inertialess nonlinear quadrupole output of oscillations modulated by normal noise, analyzing correlation functions
09 p1637 A70-23159

Amplitude modulation of microwave signals propagated through periodically varying plasma
09 p1639 A70-23673

Time correlation telemetering systems design, describing structural scheme
11 p2004 A70-25929

Digital computer simulation of Bake concept as related to tropospheric CW signal scatter measurement
11 p2009 A70-26240

Phase velocity and direction estimation of unknown signal propagating across two dimensional array in dispersive waveguide, showing dependence on SNR
11 p2018 A70-26274

Memoryless input discrete noisy channels essential equivalence to white Gaussian channel for rates above capacity using extreme value theory
11 p2010 A70-26326

Atmospheric turbulence effects on line-of-sight electromagnetic wave propagation, deriving signal statistics for nonvalid weak scattering solutions case
11 p2012 A70-26764

Large capacity long distance transmission by circular waveguides, describing artery frequency modulation and equipment for multiplexed telephone messages transmission
12 p2194 A70-27233

Microwave signals covariance and spectra calculation for amplitude and phase fluctuations propagated over line-of-sight path through turbulent atmosphere
12 p2189 A70-27963

Navigation satellite systems, analyzing error sources in signal processing and propagation developing computer programs
13 p2447 A70-28429

Digital signals transmission codes comparison for transient response by reducing channel bandwidth to obtain error probability
13 p2372 A70-28899

Analog computer simulation of command signal detectors for reconstruction of transmitted binary character from noisy binary coded signal
13 p2385 A70-29560

Wideband FM signals transionospheric propagation, calculating output spectrum, signal to distortion ratios and signal to noise ratios
13 p2367 A70-29588

Small scale disturbances and radio wave scattering effects on signal transmission and radiophysical observations in ionosphere
14 p2550 A70-30807

Quantum mechanical communication system with thermal noise disturbance, analyzing reliability function and channel capacity
14 p2551 A70-31120

Mean first passage signal time in one shot electronic system as function of threshold level
14 p2552 A70-31198

Control and guidance theories for biological problems, discussing signal transfer of linear control units and mathematical approaches
15 p2689 A70-31741

High power TWT for satellite communications ground stations, including Intelsat experience
17 p3054 A70-35282

Spatial signal transmission through open resonator determination based on resonator integral equation, extending to dielectric lens with finite Fresnel diffraction number
18 p3259 A70-36480

Asymptotic transmitting capacity of continuous channel with intense independent and additive noise
18 p3228 A70-36598

Atmospheric aerosols, fog and rain effects on signal transmittance and backscatter at 3400-10600 A
18 p3248 A70-36751

Gas flow velocity measurement by thermal signal emitted from thin wire fed with modulated known frequency current
19 p3406 A70-38673

Centimeter wave transmitting and receiving equipment for studying nanosecond pulse propagation
20 p3632 A70-39627

Pulse ratio modulation analysis based on information theory, emphasizing magnetic tape channel capacity optimal utilization in signal transmission
20 p3586 A70-39708

Superradiation signal stationary pulse excitation, describing quantum statistical theory of condensed media and gases, forced induction, signals and echoes
20 p3642 A70-39756

Transmission power formula for satellite to ground station and slant ranges calculations
21 p3785 A70-40755

Cosmos 142 satellite measurements VLF radio signals transmitted through ionosphere by ground based stations
21 p3786 A70-40836

Triboelectric noise in mechanically flexed low level signal cables for piezoelectric transducers with high gain amplifiers
21 p3825 A70-40866

Optical communications system for transmission and detection of PCM word pattern at gigahertz rates, discussing optical and electrical modulation
21 p3788 A70-41339

Wideband high speed PCM/AM optical communication system using mode locked He-Ne laser, noting simultaneous signal transmission and bit rate
21 p3789 A70-41354

Seismic signal by Apollo 12 lunar module impact indicating deep layer of powder by signal propagation
21 p3920 A70-41894

Noise effect on signal parameter control in linear measurement devices
22 p3984 A70-42394

Global rescue alarm net /GRAN/ using satellites for relaying distress signals, eliminating current line of sight restrictions
23 p4143 A70-44455

Optimum input pulse signal synthesis for transmission through lossless homogeneous isotropic plasma, using matched filter theory
23 p4228 A70-44962

Carrier frequency transfer of amplitude modulated signal at two coupled transitions in traveling wave gas laser
23 p4202 A70-45055

Output signal/quantization noise ratio, dynamic range and transmission error effects for syllabically companion delta-sigma modulator systems
24 p4320 A70-46152

SIGNALS

Signaling system for communication satellites demand assignment, considering error control, unit negative acknowledgement, system parameters selection, control signals, etc
10 p1837 A70-24347

Soviet book on pseudorandom signals theory and application covering shape selection, generation, system noise, etc
22 p3985 A70-42456

SIGNATURE ANALYSIS

Gravitational field signatures for planetary fine structure analysis, describing lunar orbiter, selenodyssey experiment and gravity field and earth gravity field satellite observation
11 p2111 A70-26029

Signature theory application to space mission planning and archeological project
11 p2051 A70-26034

ERTS multispectral scanner with optimal sensitivity and resolution for agricultural scenes signature analysis
12 p2229 A70-26941

Overpressure, rise time and wave period of sonic boom signatures at ground level from unaccelerated supersonic overflights
14 p2530 A70-30608

Visible polarization signature for remote sensing of soil surface moisture, noting invariance to partial shadowing in plowed or rough soils
15 p2724 A70-31667

Target signature concept of spectral, spatial, temporal, and polarization effects to develop electromagnetic signatures against background, considering remote sensor system design
16 p2910 A70-33437

Electrical, electronic, electromechanical, pneumatic and hydraulic subsystems failure pattern determination, discussing sensing techniques in signature analysis
16 p2917 A70-33505

Secondary effect signatures for potential failure detection in jet aircraft engine compressor blades
16 p2918 A70-33517

Ecological potentials in spectral signature analysis, using laboratory leaf and soil spectral reflectance data
17 p3078 A70-35612

Vortex signature recognition from radial velocity field by Doppler radar
20 p3664 A70-40067

Two echo complex signature in group path vs time records by ionospheric traveling disturbances
21 p3820 A70-42243

Nondestructive tests for performance levels, discussing signature analysis as methodology
24 p4338 A70-45736

NT YTTRIUM-IRON GARNET
 Chondrite-normalized lanthanide pattern of silicate inclusion of Woodbine iron meteorite, showing differences from mesosiderite phase and chondrite 01 p0177 A70-10340
 Oxides and silicates universal equations of state based on experimental data including elastic properties, density, mean atomic weight relations and geophysics interpretations 02 p0294 A70-12778
 Interstellar polarization by graphite-silicate grain mixtures, observing variability in wavelength dependence of polarization for various models 03 p0577 A70-14218
 Silicate enamel coating formulas for application on titanium exhibiting adequate adhesion 05 p0872 A70-16599
 Heat resistant silicate enamel coatings to protect steels and alloys against high temperature gas corrosion, studying properties by various methods 05 p0872 A70-16600
 Silicates thermal conductivity-Debye temperature relationship from thermal conductivity and acoustic data, applying to earth conductivity measurements 09 p1665 A70-22054
 Synthetic silicate liquid viscosity with lunar rock composition compared with volcanic rock on earth 10 p1938 A70-24074
 Crystal-chemical and geophysical implications concerning earth mantle phase transitions from beta magnesium silicate crystal structure 11 p1994 A70-25333
 Composition and monoclinic parameters of chromium sulfide mineral brezniaite in metal matrix and silicate inclusions of Tuscon meteorite using electron microprobe 11 p2110 A70-26004
 Total nitrogen content determination in silicate samples of rocks, synthetic silicate standards, NBS steels and meteorites using inert carrier-gas extraction-gas chromatography 13 p2362 A70-29497
 Weekeroo Station iron meteorite silicate inclusions chemical composition compared to chondrites 13 p2497 A70-29858
 Comet Bennett 1969i photometric observations, showing blackbody-like continuum at short wavelengths with sharp peak due to silicate grains 14 p2642 A70-30895
 Lunar, meteoritic and terrestrial silicate rock chemical individuality based on atomic ratios 15 p2799 A70-31896
 Metal-silicate rock friction in ultrahigh vacuum of lunar environment 17 p3101 A70-34760

Interstellar silicate absorption in IR spectra, discussing existing observations 17 p3157 A70-34840
 Thermal release profiles and retention coefficients of injected argon ions for silicates and iron simulating meteoritic materials 19 p3474 A70-38601
 Silicate inclusions in iron meteorites analyzed by microprobe and classified according to phase assemblages, compositions and textures 20 p3701 A70-38981
 Quartz- and silicate-graphite mixtures carbothermal reduction in vacuum at 1400 C 20 p3583 A70-40425
 Interstellar silicate absorption bands four color photometric observations in galactic direction, using metal mirror telescope 20 p3713 A70-40431
 Interstellar spherical dust particles from meteoritic silicates and dirty ice, calculating optical properties and scattering functions 21 p3889 A70-41147
 Lunar crystalline rock static and dynamic deformation, examining regolith and silicates textures and structures 21 p3897 A70-41515
 Trace phyllosilicates in Apollo 11 soil sample and rock, using electron microscopy and diffraction studies 21 p3897 A70-41518
 Lunar petrology of silicate melt inclusions from Apollo 11 rock samples, discussing heating experiments 21 p3902 A70-41548
 Earth-moon system formation theory, discussing condensation from terrestrial hot extended silicate atmosphere 22 p4098 A70-42548
 Weak superstructure line patterns of ternary phases with TiFeSi and ordered iron phosphides by single crystal, Guinier powder and diffractometer techniques 24 p3459 A70-45249
 Neutron activation determined concentrations of Ni, Ga, Ge and Ir in iron meteorites with silicate inclusions 24 p4401 A70-45376
 Hydrus Cu-Ca silicate mineral (kinoite) from Arizona occurring as single crystals and veinlets 24 p3429 A70-45459
 Chemical composition and degree of thermodynamic equilibrium reflected in ferromagnesian silicates of chondrites 24 p4411 A70-45793
 Molybdenum disilicate and aluminum oxide coating sealing heat resistance tests 24 p4364 A70-46341

SILICIDES
 Free energies of formation determined for tantalum silicides from EMF measurements on cells with solid thorium-yttria electrolytes 01 p0041 A70-10084
 Silicide-coated columbium alloys reuse capabilities under flight conditions, considering coating local damage and emittance [AIAA PAPER 70-279] 07 p1315 A70-20388
 Ti tetrachloride, Si tetrachloride and hydrogen gas mixtures flow over heated graphite substrates, describing Ti silicides formation 09 p1703 A70-22646
 Preoxidation treatment alleviating silicide pest in protective coatings for refractory metals, discussing effectiveness against high temperature oxidation 13 p2434 A70-29082
 Molybdenum trisilicide-tantalum trisilicide and molybdenum trisilicide-tungsten trisilicide interdiffusion for molybdenum disilicide protective coating on Ta and W surfaces 21 p3840 A70-42056
 German monograph on sintered molybdenum silicide recrystallization following high temperature heating in oxidizing atmosphere 24 p4367 A70-45575

SILICON
NT SILICON ISOTOPES
 Scanned laser microscope producing shadowgraph displays of IR transmittance variations attributed to defects in polished Si and GaAs semiconductor wafers 01 p0105 A70-10025
 Si cleaved crystal nature on basis of Auger spectra, discussing impurity stabilization 01 p0159 A70-11175
 High energy dopant ion implants into silicon, discussing implantation profiles and electrical conductivity for use in type conversion and electrical junctions 04 p0730 A70-14727
 Silicon effect on stress corrosion resistance of low alloy high strength steels in NaCl solution for different tensile strength ranges 04 p0707 A70-15272
 Electron microprobe determinations of Si concentrations in metal of iron meteorites, showing weak evidence for Si presence in earth core 05 p0921 A70-17094

Meyer-Neldel rule interpretation of distribution width parameter dependence on activation energy annealing of defects in irradiated Si 06 p1106 A70-17925
 Reactive scattering from solid surfaces, discussing atom beam reaction of O with heated Ge and Si single crystals 07 p1342 A70-20117
 Integrated circuit film and hybrid technologies in microelectronics, discussing role of monolithic Si arrays 09 p1645 A70-22632
 Relative transition probabilities of Si I and II determined from emission spectra obtained by injecting SiCl₄ vapor into argon plasma jet 09 p1737 A70-23315
 Silicon window with double carrier injection to achieve high power broadband microwave switching, obtaining power increase over p-i-n diodes 10 p1847 A70-23892
 Silicon avalanche diodes contingencies effect on material choice 10 p1850 A70-24622
 Planar Ge and Si diodes application in pulsed bridge elements, investigating current-voltage and resistance-voltage characteristics 11 p2015 A70-25350
 Dopant effect on dislocation mobility in elastically loaded silicon crystal using internal friction and modulus defect measurements 11 p2099 A70-26394
 Electron bombardment produced clustered displacements, paired vacancies and interstitial atoms in Si, discussing possible mechanism for developing defects 11 p2142 A70-26638
 Epitaxial Ge deposits on Si control by Kikuchi pseudolines, considering surface polish, crystallinity and substrate orientation 13 p2470 A70-28957
 Silicon and alpha-alumina support interface reactions during nucleation-coalescence and after epitaxial growth, investigating electrical properties 13 p2470 A70-28958
 Gold impurity photovoltaic effect in silicon, determining optical cross section for transition 14 p2627 A70-30528
 B, In or Ga doped Si photosensitivity dependence on sample temperature, supply voltage and illumination intensity, determining optimal operating conditions 15 p2782 A70-31631
 Ge and Si hemispherical emittance, showing doping and temperature effects 15 p2784 A70-32055
 Average triton energy required to produce electron-hole pair in silicon measured, describing precision charge calibration of amplifier system 15 p2784 A70-32396
 Hydrogen effect on impurity redistribution in heteroepitaxial Si layers on sapphire substrate 15 p2785 A70-32529
 Micro-Hall device as tool for evaluating epitaxial silicon in integrated circuit processing 15 p2710 A70-32573
 K-band high power Si avalanche diode oscillators, discussing decrease in pulse peak power output on basis of quenched plasma effect 16 p2880 A70-34260
 Cone crack closure in brittle solids, discussing optical and X ray studies on glass and silicon during unloading 17 p3183 A70-34621
 UV stellar spectra absorption, considering silicon and carbon opacity effect on Balmer discontinuity and Paschen continuum 17 p3159 A70-34880
 Lithium-like line spectra in Mg, Al and Si observed with grazing incidence spectrometer and low inductance microfarad spark source 17 p3138 A70-35720
 Silicon elastic constant measurement by Debye-Sears effect, using He-Ne laser source 18 p3298 A70-36952
 Silicon-containing pyrocarbon, relating microhardness to microstructure 18 p3279 A70-37220
 Ge and Si surface electrical properties, discussing conductivity, field effect, work function, current carriers, photoconductivity, photocurrent carrier capture, etc 19 p3483 A70-37297
 Heavy cosmic ray abundance attributed to thermal nucleosynthesis during silicon burning at high temperature and density 19 p3507 A70-38132
 Si photocells fabrication, reliability and energy conversion efficiency 19 p3358 A70-38479
 Epitaxially grown Si contact for area reduction of MOS transistor circuits 20 p3596 A70-39099
 Ionospheric Si and SiO ions equilibrium interconversion during Leonid meteor shower 20 p3621 A70-39351

- Mo-Si system phase diagram by X ray, microstructural and thermal differential analyses, identifying eutectic, peritectic and eutectoid equilibria
20 p3649 A70-39773
- Lithium-diffused silicon, investigating heat treatment and electron irradiation effects on electrical resistivity at high temperatures
20 p3687 A70-40164
- Annealing properties of radiation damage in lithium-diffused silicon, formulating kinetic equation to describe processes associated with recovery and instability
20 p3687 A70-40165
- Helium-like resonance, intercombination and forbidden transitions of Ca, Si and S lines during 3b solar flare decay
20 p3700 A70-40420
- Planar Ge and Si diodes application in pulsed bridge elements, investigating current-voltage and resistance-voltage characteristics
20 p3600 A70-40462
- Apollo 11 lunar rocks and fines oxygen, Si and Al content determination by neutron activation analysis
21 p3774 A70-41566
- Apollo 11 lunar rocks and soil hydrogen, C and Si concentration and isotopic composition
21 p3774 A70-41568
- High resistivity single crystal silicon wafers induced IR absorption measurement, using Nd doped glass laser
21 p3837 A70-41916
- Holographic recording on n-type Si single crystal surface by photoanodic engraving
22 p4026 A70-42332
- Silicon line collisional broadening by electrons and hydrogen atoms, discussing Stark effect and van der Waal interactions
22 p4076 A70-42861
- Rb and Cs ions implanted Si analyzed by Hall effect and sheet resistivity measurements and channeling techniques
22 p4087 A70-43143
- Radiation-produced defects in silicon semiconductor devices, annealing gamma ray, electron and fast neutron damages
22 p4087 A70-43328
- Silicon precipitation in nonrefined annealed Al, examining heat treatment effects
22 p4057 A70-43550
- Electron radiation damaged Si, investigating p type defect concentration effect on isochronal temperature in annealing by fractionation experiment
23 p4231 A70-44887
- Si crystal microdefects influence on semiconductor device performance and reliability
24 p4391 A70-46015
- Si-carbide composites electrical conductivity from temperature and thickness dependence, obtaining volt-ampere characteristics via computer method
24 p4391 A70-46154
- SILICON ALLOYS**
- Size distribution of Ni-Si particles precipitated from Si solid solution in Ni measured as function of concentration, aging time and temperature
02 p0317 A70-12320
- Cracks development in hydrogenated silicon iron, investigating plastic strain relation and brittle rupture propagation
06 p1165 A70-17580
- Ce-Ni-Si system X ray and microstructural analysis, constructing phase diagram for Ce contents of 0-33.3 wt percent
08 p1555 A70-21115
- Silicon containing alpha matrix Ti alloy with high creep strength and stability at elevated temperatures, studying processing and heat treatment effects on properties
08 p1509 A70-21853
- Si-Ge air-vacuum thermocouples for thermoelectric conversion, describing construction materials, mechanical and electrical properties, radiative heat transfer operation, etc
10 p1807 A70-24896
- Thermoelectric generators design, discussing Si-Ge air-vac thermocouple configurations, compression modules, thermal losses, etc
10 p1808 A70-24897
- Protective coatings with Si-Zr alloys for graphite, discussing wettability, spreading kinetics and impregnation
13 p2439 A70-29503
- Ti-Si eutectic alloys unidirectional solidification by zone melting
19 p3450 A70-37375
- Phase diagrams and nonvariant equilibria points of Ti-Si alloys subjected to prior annealing, determining phase transformations, decomposition and other properties as function of temperature
22 p4057 A70-43350
- Self flammability temperature of binary alloy Al-Si powders in aerosol state as function of chemical and phase compositions
23 p4205 A70-44046
- Eutectic and hypereutectic Al-Si alloy quench modification by rapid solidification, investigating microstructure and mechanical properties
24 p4362 A70-46183
- Si content and chip treatment effects on drilling machinability of Al-Si alloys
24 p4349 A70-46199
- SILICON CARBIDES**
- Tensile tests of heat treated silicon carbide coated B filament reinforced metals, discussing fiber strength and interfacial stability
01 p0117 A70-10483
- Oxidation resistance of mixed silicon nitride and silicon carbide refractory materials at high temperatures
03 p0514 A70-12979
- Mechanical properties of Al composites reinforced with alpha-silicon carbide sintered whiskers, discussing voids, fiber breakage and orientation effects
03 p0506 A70-13113
- N-type layer formation with ion implanted nitrogen or Sb in p-type alpha-SiC, evaluating electrical characteristics, discussing junction devices formed
04 p0732 A70-15685
- Kinetics of attack of SiC in monoatomic mixtures of N and O generated by microwave discharge dissociation
07 p1421 A70-19332
- Silicon carbide whiskers end structure using field emission patterns
08 p1528 A70-21551
- Al alloy matrix composites with beta-SiC whiskers reinforcement, evaluating tensile and fatigue properties
08 p1523 A70-21856
- Crystal growth of 2H silicon carbide showing temperature profile along susceptor as affecting factor
09 p1739 A70-22498
- Al-Si and Cu-Ti eutectic alloys showing good ohmic contacts to SiC
10 p1927 A70-23990
- Silicon carbide whiskers properties and applications compared with other reinforcing fibers
11 p2070 A70-26340
- High temperature kinetics of pyrolytic silicon carbide oxidation and nitridation in dissociated gases
13 p2361 A70-29077
- Metallic base fiber and particulate composites, emphasizing silicon carbide, sapphire, boron and graphite filaments
14 p2597 A70-31168
- Boron, silicon carbide and graphite fibers surface properties
16 p2937 A70-33376
- Surface growth morphology and crystallographic orientation of beta-SiC films formed by chemical conversion and heating
17 p3142 A70-34678
- Epitaxial beta SiC film formation on SiC by reactive evaporation or sputtering at low temperature
17 p3144 A70-35906
- Electrical conduction and surface properties of beta-SiC films obtained by heating Si wafer in presence of hydrocarbon
19 p3485 A70-37685
- SiC whiskers X ray diffraction studies of crystal structure, suggesting single crystal permanent deformation at ambient temperatures
19 p3455 A70-37941
- Temperature effect on friction coefficient of boron and silicon carbides, using similar wear pairs in vacuum
23 p4205 A70-44044
- High cutoff negative resistance silicon carbide diodes, noting temperature independent current-voltage curve
23 p4176 A70-45067
- SILICON COMPOUNDS**
- NT ALUMINUM SILICATES
NT CALCIUM SILICATES
NT ENSTATITE
NT FELDSPARS

NT SILICON DIOXIDE
NT SILICON NITRIDES
NT SILICON OXIDES
NT SODIUM SILICATES
NT YTTRIUM-ALUMINUM GARNET
NT YTTRIUM-IRON GARNET
- SiH molecular absorption lines in solar disk spectrum, determining maximum equivalent widths and oscillator strength
06 p1143 A70-17996
- Ti tetrachloride, Si tetrachloride and hydrogen gas mixtures flow over heated graphite substrates, describing Ti silicides formation
09 p1703 A70-22646
- Protective coatings for silicon photosensitive elements to reflect incident energy at wavelengths not participating in conversion into electricity
15 p2677 A70-31599
- Free radical coupling of silyl peroxides in reinforced plastics, laminates and adhesives
16 p2937 A70-33377
- SILICON CONTROLLED RECTIFIERS**
- Silicon controlled diodes application to pulse modulation circuits of radar transmitters
09 p1631 A70-22016
- Si controlled thyristors applied to pulse modulators in ionospheric stations
18 p3233 A70-37043
- Neutron irradiation effect on unijunction transistors and SCRs, developing damage prediction technique
19 p3388 A70-37848
- SILICON DIOXIDE**
- NT QUARTZ
- Reinforced plastics high silica and quartz history, properties, uses, costs and pricing, tabulating sources and presenting product recommendations and cost comparisons
05 p0873 A70-16608
- Luminescence of powdered silica and basalt bombarded by atomic hydrogen, relating spectral distributions dependence on ion energy to luminescence
10 p1942 A70-24647
- Selective optical coatings of alternate Ni and silicon dioxide layers, describing optical and spectral characteristics of black mirror
12 p2272 A70-27307
- Position sensitive planar photocells based on silicon-silicon dioxide systems, discussing photoelectromotive force generation mechanism, light intensity and load characteristics
18 p3297 A70-36236
- Silica marker motion in sintering of loose spherical copper powder aggregates
20 p3647 A70-39109
- Compressive and rarefaction shock wave propagation in polymethyl methacrylate, fused silica and sapphire, using laser interferometer measurements
22 p4031 A70-43020
- SILICON FILMS**
- Mo-Si epitaxial planar Schottky barrier diodes, describing reverse I-V characteristics improvement by edge leakage effects elimination
01 p0052 A70-11174
- Two step B vacuum diffusion from boron oxide into Si surface using evacuated tube and N atmosphere
05 p0891 A70-15791
- Epitaxial beta-SiC films formation on sapphire by chemical conversion
06 p1127 A70-17946
- Service life and friction coefficient of molybdenum disulfide-silicon lubricating coating as function of load, sliding rate and vacuum level
11 p2060 A70-25943
- Surface field effect, contact potential and photoconductivity measurements on p- and n-type heteroepitaxial single crystal silicon films on sapphire
13 p2470 A70-29372
- Surface growth morphology and crystallographic orientation of beta-SiC films formed by chemical conversion and heating
17 p3142 A70-34678
- Photon capture cross sections for surface silicon electronic states using IR photoconductivity measurements
17 p3144 A70-35707
- SILICON ISOTOPES**
- Elastic and inelastic scattering of proton beams from magnesium and silicon isotopes, using optical model
04 p0723 A70-15637
- Critique of paper on diffusion in Si isotopes and excess vacancies generation by motions of diffusion induced dislocations
08 p1553 A70-21696
- Inverted coexistence possibility of spherical and deformed states in Si 28 and S 32 nuclei
17 p3137 A70-34518
- SILICON JUNCTIONS**
- MOS structure electrical characteristics dependence on silicon/silicon dioxide interfacial energy and electric charges, considering fabrication difficulties
02 p0350 A70-12541
- HF admittance and noise in forward-biased majority carrier Ge-Si n-n heterojunctions and Schottky barrier
03 p0539 A70-13159
- Solid state digital pressure transducer incorporating Si diaphragm with piezoresistive sensing elements for computerized supersonic and subsonic data applications
03 p0496 A70-14194
- Silicon photodiode arrays with total active area noting element isolation
03 p0459 A70-14195

- Neutron induced defect clusters in high field space charge region of Si p-n junctions, noting rate of volume damage dependence on electric field strength
04 p0730 A70-14728
- Resistivity, temperature and injection level dependence of minority carrier lifetime in neutron irradiated p- and n-type Si
04 p0730 A70-14729
- Neutron irradiation effect on space charge limited current of electrons in high purity silicon, noting SCLC sensitivity in detecting traps and changes
04 p0731 A70-14730
- Gas discharge avalanche breakdown in Si semiconductor, analyzing microplasmas, ionization coefficients, p-n junction voltage, electron and light emissions
04 p0731 A70-15494
- High efficiency oscillator using avalanche square wave diode, considering case of silicon p-i-n diode
05 p0819 A70-15815
- Photosensitivity and scanning of planar Si photodiode image detector arrays, using most ring counter and shift register
10 p1846 A70-23881
- Silicon diodes pulse operated in avalanche resonance pumped modes for producing stable microwave amplification
10 p1847 A70-23889
- Silicon L-band avalanche diodes as high power pulsed microwave sources, discussing fabrication, circuit requirements, radar applications, etc
10 p1852 A70-24893
- Ionization gage with reverse biased silicon carbide p-n junction hot electron emitter as source
12 p2231 A70-27263
- Thyristor tetrode silicon controlled switches (SCS), considering unijunction transistors and pulse generator circuits
13 p2377 A70-29115
- High resistivity Si electron drift velocity measurement by exciting surface barrier diode with subnanosecond superradiant laser pulses
14 p2594 A70-30924
- Position sensitive planar photocells based on silicon-silicon dioxide systems, discussing photoelectromotive force generation mechanism, light intensity and load characteristics
18 p3297 A70-36236
- Etching effects on mesa profiles and edge breakdown of silicon avalanche diodes at high power and temperatures, using scanning electron microscope
19 p3389 A70-37971
- Semiconductor silicon power diodes nondestructive quality control, discussing optimal sampling procedures
20 p3595 A70-38969
- Crystal orientation dependence of thermal resistance and gage factor in electron irradiated n-type silicon strain gages
21 p3824 A70-40862
- Optimum junction area for maximum microwave output power of silicon IMPATT diodes for X band operation
23 p4167 A70-43775
- SILICON NITRIDES**
Oxidation resistance of mixed silicon nitride and silicon carbide refractory materials at high temperatures
03 p0514 A70-12979
- Memory technology based on electrically alterable nonvolatile silicon nitride variable threshold transistor
16 p2868 A70-33458
- MIS structures with silicon nitride film deposited by RF glow discharge, observing doping increase in epitaxial substrate
17 p3055 A70-35873
- Semiconductor junctions passivation by silicon nitride insulation layers, discussing pyrolysis and cathode sputtering fabrication methods
22 p4087 A70-43444
- SILICON OXIDES**
NT MUSCOVITE
NT QUARTZ
NT SILICON DIOXIDE
Ion implantation for reducing space charge buildup in thermal oxides on silicon exposed to ionizing radiation
04 p0731 A70-14743
- Silicon oxide films coated satellite aluminum surfaces solar absorptivity and thermal emissivity, noting suitability as temperature control coatings
09 p1613 A70-23514
- Water contaminating effects on thin thermal oxide passivated silicon planar devices
13 p2361 A70-28930
- Spectrum of bright IR object VY Canis Majoris, noting absorption feature attributed to SiO molecules in stellar atmosphere
17 p3154 A70-34540
- Ionospheric Si and SiO ions equilibrium interconversion during Leonid meteor shower
20 p3621 A70-39351
- Oxidized Si surface recombination rate measurement by electric field effect, noting electron bombardment effects on electrical properties
22 p3998 A70-43443
- Low temperature stars SiO IR spectral band identification based on rotation-vibration spectrum calculation
24 p4411 A70-45777
- SILICON POLYMERS**
NT SILICONES
NT SILOXANES
SILICON RADIATION DETECTORS
Threshold and frequency relaxational radiation detectors, discussing operation and sensitivity of p-n-p silicon photothyristor and luminosity dependent devices
09 p1649 A70-23356
- Silicon high resistivity surface barrier detectors fabrication for nondestructive tests, discussing long term sensitivity and calibration
10 p1893 A70-24169
- Alpha particles radiation damage effects in silicon surface barrier detector
14 p2584 A70-30511
- SILICON RECTIFIERS**
U CRYSTAL RECTIFIERS
SILICON SOLAR CELLS
U SOLAR CELLS
SILICON TRANSISTORS
Noise source model of Si planar diffused bipolar IC transistors in operational amplifiers, noting base-emitter junction burst noise
02 p0257 A70-12192
- Burst noise in forward biased silicon diodes and transistors, discussing measurements on gate controlled devices
03 p0458 A70-14029
- Silicon bipolar transistors primary photocurrent calculation using manufacturers data
04 p0657 A70-14736
- Microwave Si transistors with overlay and interdigital geometries and integrated circuit design considerations for power amplifiers, power oscillators and frequency multipliers
05 p0819 A70-16149
- Silicon monolithic integrated circuits technology for radiation environment near nuclear detonation
09 p1647 A70-23076
- Double diffused epitaxial silicon bipolar microwave transistor design, fabrication and performance evaluation, including scattering parameters vs frequency for common-emitter amplifier
13 p2379 A70-29592
- Hysteresis in MOS transistors attributed to trapped charge carriers on oxide near silicon oxide interface
14 p2555 A70-30338
- UHF Si p-n-p transistors with low noise and high gain for small signal applications
14 p2557 A70-31161
- Memory technology based on electrically alterable nonvolatile silicon nitride variable threshold transistor
16 p2868 A70-33458
- B and P ions bombardment techniques for Si doping of multilayered transistor structures
19 p3385 A70-37268
- High voltage MOST silicon integrated circuits, using dielectric isolation and field plate techniques
21 p3798 A70-41214
- Reverse curvature silicon transistor linearizer for hot-wire and thin-film constant temperature anemometers for aorta blood flow velocity measurements
21 p3827 A70-41458
- Metal nitride oxide silicon (MNOS) integrated circuit transistor, reviewing characteristics, operation mechanisms and applications
21 p3800 A70-42113
- Silicon MOSTs LF noise model, discussing noise and gate voltages and trapping efficiency of surface states
22 p3996 A70-42916
- SILICONE RUBBER**
Elastomeric silicone ablator reinforced by carbon cloth or fibers for Venus entry heat protection [AIAA PAPER 70-201]
06 p1157 A70-18086
- SILICONES**
NT SILOXANES
Phenolics and silicones characteristics, history, chemical composition, available forms, impregnation process, manufacture, productivity, electrical applications and temperature resistance
05 p0873 A70-16603
- Temperature distribution in heated horizontal layer of high Prandtl number silicone fluids at high Rayleigh numbers confined between rigid parallel conducting plates
07 p1418 A70-18647
- Vertical heat transfer in silicone oil by single row convection cells, correlating cell number to transport rate and Rayleigh number
09 p1612 A70-22052
- Silicone products with low outgassing characteristics for spacecraft applications, discussing fluids, compounds and elastomers
10 p1906 A70-23914
- Gas transfer through silicone elastomer capillaries wall in variable pressure chamber
14 p2541 A70-30386
- Synthetic fluids as lubricants, examining physicochemical properties of polyglycols, silicones and esters
16 p2917 A70-33421
- Hotshot wind tunnel performance improvement by coating arc chamber with silastene to retard heat loss and metal pollution
17 p3057 A70-34774
- SILICONIZING**
Siliconizing of Mo in medium with silicon chloride, comparing reaction probabilities for various heating methods
17 p3102 A70-35392
- SILOXANES**
Polysiloxanes morphology crystallized isothermally from melt using electron microscopy, noting fracture ease increment with molecular weight decrease
03 p0517 A70-14203
- Polyurethane propellant binders burning rate, studying siloxane moiety effects
07 p1358 A70-19330
- Lunar fines hydrochloric acid hydrolyses examination by gas-liquid chromatography indicating presence of organosiloxanes
21 p3779 A70-41627
- Temperature and long term effects on volatility of perfluoroalkyl ether and polysiloxane greases [ASME PAPER 70-HT-31]
22 p4058 A70-42435
- SILVER**
Rare gas scattering from Ag surfaces calculated up to earth satellite energy values
06 p1112 A70-18275
- Trapped Ag atoms production in silver nitrate ice by gamma irradiation, discussing reaction enhancement by fluoride ion
09 p1631 A70-23445
- Epitaxy of Ag deposited on Ni, observing irreversible crystallographic order transition from metastable nominal orientation by LEED
10 p1927 A70-24076
- Silver/polytetrafluoroethylene water-repellant air-breathing cathodes for fuel cells with alkaline electrolytes, discussing pressure compatibility
10 p1829 A70-24454
- Oscillations of longitudinal magnetostriiction in silver and copper single crystals at low temperature
11 p2098 A70-25619
- Frenkel pairs and interstitial hydrogen atoms observed in thin silver films after proton bombardment
12 p2253 A70-27209
- Annealed compressed ground synthetic mica and silver dust composite materials, analyzing physicomechanical properties
12 p2260 A70-28319
- Ag species paramagnetic relaxation in gamma-irradiated frozen aqueous solutions and in frozen methanol, relating spin-lattice relaxation to isotropic coupling
14 p2544 A70-30117
- Filament orientation and fabrication variables effect on Ag matrix-W fiber composite mechanical properties
15 p2756 A70-31569
- Alumina particles marker transport in Ag wires during early sintering as function of plastic deformation by slip
15 p2745 A70-32392
- Cu and Ag low alloying effect on Al single crystals elastic limits and first deformation stages
20 p3644 A70-38960
- Crystal growth in polycrystalline Au, Ag and Au-Ag thin films annealing, observing by electron microscopy and electron diffraction
24 p4391 A70-45672
- Thin epitaxial Ag films on mica, measuring electrical resistivity strain dependence
24 p4391 A70-46266
- SILVER ALLOYS**
Age hardenable monolithic spring material composed of Ag-Pd-Cu alloys for make-break electrical contact
13 p2376 A70-28839
- Phase relations in system Ag-Fe-S in 700-1200 C range at various vapor pressures by quenching and differential thermal analysis, observing liquid-immiscibility fields
22 p4053 A70-42732
- SILVER COMPOUNDS**
NT SILVER HALIDES
NT SILVER IODIDES
NT SILVER NITRATES
Thermogravimetric analysis (TGA) of gadolinium-doped silver carbonate decomposition, obtaining activation energy, preexponential factor and reaction order
15 p2694 A70-32074
- ESR spectrum of gamma irradiated cycloheptatriene silver perchlorate, indicating free radicals and trapped electrons
19 p3374 A70-38272
- Silver fluorination kinetics, taking temperature and pressure effects into account
22 p3983 A70-43416
- SILVER HALIDES**
NT SILVER IODIDES

SILVER IODIDES

- High resolution silver halide photoemulsions by holographic resolvemetry using Ne-He laser to obtain interference patterns
01 p0095 A70-11633
- Computer generated displays and USAF equipment design for operational command and control systems, discussing Ag halide film technique
05 p0847 A70-16185
- Photolytic reactions mechanism in photochromic glass with silver halide crystals formed during glass manufacture, discussing properties and applications
08 p1499 A70-21683
- Efficiency, low noise and photochromic effects suppression in bleached silver halide holography with various films
20 p3627 A70-39097

SILVER IODIDES

- Ice nucleating properties of dust particles above 80 km compared with soil and AgI particles
01 p0081 A70-11296
- Complex dielectric constant of alpha-AgI measured in microwave region and far IR, noting sample positioning
16 p2960 A70-33225
- Solid state batteries based on highly conducting solid electrolyte rubidium silver iodide, testing discharge performance
22 p3966 A70-43543

SILVER NITRATES

- Trapped Ag atoms production in silver nitrate ice by gamma irradiation, discussing reaction enhancement by flouride ion
09 p1631 A70-23445

SILVER OXIDE ZINC BATTERIES

U SILVER ZINC BATTERIES

- High impact Ag-Zn cell design for space missions instrument package landing, considering heat sterilization and minimum operational capability
21 p3757 A70-41013

SIMICOR (IMAGE CORRELATOR)

U IMAGE CORRELATORS

SIMILARITIES

U ANALOGIES

SIMILARITY THEOREM

- NT LAGRANGE SIMILARITY HYPOTHESIS
Shallow flexible shells similarity conditions derived in dimensionless form, assessing error
03 p0592 A70-13450

- Pressure gradient calculation in three dimensional laminar boundary layer, using method of local similarity
03 p0468 A70-13869

- Structural similarity hypothesis for fully developed turbulence in smooth circular tubes, using intensity correction procedure
04 p0665 A70-14453

- Kinetic theory of thermal conduction in collisionless Knudsen gas in arbitrary closed systems with various geometries, establishing similarity law
[ASME PAPER 69-WA/HT-20] 04 p0783 A70-14814
- Turbulent boundary layer model using two region characterization for eddy viscosity and similarity solution taking into account interfacial conditions
[ASME PAPER 69-WA/AFM-27] 04 p0668 A70-14905

- Boundary layer equations closed form similarity solutions for laminar jet of compressible pseudoplastic fluid, discussing velocity transverse behavior
04 p0671 A70-15053

- Von Karman transonic similarity law applied to flow through plane turbine blade cascades
[DGLR-69-24] 04 p0616 A70-15183

- Small disturbance theory for internal conical inlet hypersonic flows, using method of characteristics for similarity law verification
[AIAA PAPER 70-127] 06 p0969 A70-18048

- Liquid rocket engine combustion processes determined by injector design using similarity principles
07 p1362 A70-19919

- Atmospheric boundary layer wind and temperature analysis according to similarity scheme for mathematical modeling of atmosphere
08 p1540 A70-21974

- Self similarity concept relevance to atmospheric turbulence demonstrated from ground and airborne observational data
09 p1717 A70-22373

- Thermal boundary layer similarity at extreme Prandtl numbers as series expansion, allowing for temperature distribution at wall
11 p2148 A70-25983

- Harmonic fields with boundary flow losses, discussing similarity on basis of dimensional analysis and pi theorem
12 p2271 A70-26877

- Similarity theory in design of isofunctional electric converters, relating input-output criteria
14 p2533 A70-30374

- Similarity equations for rotating flow near disk, using Navier-Stokes equations for case of complicated boundary conditions
18 p3239 A70-36223

- Power law fluid flow past suddenly accelerated wall, applying group theory to similarity solutions
19 p3406 A70-38444

- Radiative gas dynamic equations similarity representation with spherical symmetry, constructing numerical examples for strong explosions and implosions
20 p3609 A70-39657

- Self similar formulations for motion of radiating-absorbing perfect gas symmetric flow
21 p3954 A70-42202

- Two dimensional transonic cascade flow, using Von Karman similarity law
22 p4089 A70-42347

- Similarity rules for sinusoidal gust loads on thin two dimensional wing in nonstationary subsonic flows
23 p4131 A70-43970

- Incompressible laminar swirling jet flow, obtaining similarity solution for Navier-Stokes equations
23 p4184 A70-44982

- Stability of self-similar flows of second kind near critical point
24 p4327 A70-46004

SIMILITUDE LAW

- Similarity laws in hypersonic flow of real gas around slender blunted bodies, particularly bodies with rough lateral surface
03 p0409 A70-13866

- Equivalence class technique to compute measure of similitude between two vehicles based on radar signature in terms of scattering matrix elements
[AAS PAPER 69-607] 04 p0648 A70-14656

- Small disturbance and similitude applicability to internal hypersonic conical flows in edge shock and Busemann inlets
09 p1606 A70-23245

SIMULATED ALTITUDE

- Human alveolar-arterial oxygen differences during rest, sleep and exercise in initial hypoxia induced by simulated high altitude exposure
03 p0429 A70-14161

SIMULATION

- NT ACOUSTIC SIMULATION
NT ALTITUDE SIMULATION
NT ANALOG SIMULATION
NT ATMOSPHERIC ENTRY SIMULATION
NT COMPUTERIZED SIMULATION
NT CONTROL SIMULATION
NT DIGITAL SIMULATION
NT ENVIRONMENT SIMULATION
NT EXHAUST FLOW SIMULATION
NT FLIGHT SIMULATION
NT LANDING SIMULATION
NT RHEOELECTRICAL SIMULATION
NT SOLAR SIMULATION
NT SPACE ENVIRONMENT SIMULATION
NT THERMAL SIMULATION
NT WEIGHTLESSNESS SIMULATION

- Image quality effects on human performance in simulation, discussing time sharing strategies and task difficulty factors
01 p0036 A70-10809

- Visual simulation limitations, discussing parallax error correction in display system, wraparound system, image generation, TV and motion picture film systems
01 p0036 A70-10813

- Climatological cloud type statistics for simulating earth sensing mission data output as function of sensor field of view and spatial resolution
[AIAA PAPER 70-196] 06 p1065 A70-18098

- Time-similar and isotropic geodetic curves simulating paths of test bodies in Riemann space corresponding to gravitational field
06 p1107 A70-18564

- Model characteristics selection for dynamic system behavior simulation, studying characteristics variability extent without changing trajectory behavior dependence on parameter space
08 p1544 A70-20953

- Earth storable liquid propellants combustion products simulation by combustion of gaseous fuel and oxidizer combination, discussing elemental composition and thermodynamic considerations
08 p1557 A70-21622

- Cosmic ray air showers simulation, discussing high energy nuclear interaction and linear relation of primary particle energy to number
09 p1744 A70-22048

- Traffic simulation in telephone network via communication satellite with presassigned and demand assigned circuits
10 p1838 A70-24356

- Random process represented in canonical expansion form simulated by method of prognosis of reliability
11 p2022 A70-25344

- Simulation studies for first GARP global experiment, discussing data redundancy, measured and derived data, sampling, etc
18 p3285 A70-36785

SIMULATOR TRAINING

U TRAINING SIMULATORS

SIMULATORS

- NT COCKPIT SIMULATORS

NT LUNAR ORBIT AND LANDING SIMULATORS

- NT SHOCK SIMULATORS
NT SOLAR SIMULATORS
NT SPACE SIMULATORS
NT SPACECRAFT CABIN SIMULATORS
NT TRAINING SIMULATORS
NT VIBRATION SIMULATORS

- Photooptical techniques in simulators - Conference, South Fallsburg, N.Y., April 1969
01 p0057 A70-10807

- U.S., U.S.S.R. and European space environment simulation chambers accommodating assembled spacecraft for thermal tests, describing design and characteristics
07 p1249 A70-19659

- Deterministic and stochastic simulation models for obtaining optimal solution in operations research by trial and error
08 p1464 A70-20579

- U.S., U.S.S.R. and European space environment simulation chambers accommodating assembled spacecraft for thermal test, describing design and characteristics
15 p2718 A70-32696

- Simulation devices in engineering feasibility studies emphasizing prototypes role
[ASME PAPER 70-DE-50] 16 p2918 A70-33512

- Space motion simulators for Azur satellite, considering satellite attitude related to sun
19 p3400 A70-38296

- Airfreighters maintenance and reliability simulation, modeling specific aircraft designs via input data selection
19 p3357 A70-38835

- Myocardium bioelectric activity electrocardiogram simulator, describing block diagram and operation
22 p3979 A70-43553

SIMULTANEOUS EQUATIONS

- Simultaneous equations of longitudinal impact bending, introducing temporal and spatial transformations regarding dispersive wave characteristics in elastic rod
03 p0591 A70-13428

- Computational methods of homogeneous ill-conditioned and singular simultaneous linear equations
04 p0714 A70-15096

- Least squares iterative method for solving simultaneous linear equations having singular coefficient matrix
04 p0714 A70-15450

- Equations for general shells of revolution reduced to simultaneous fourth order ordinary differential equations for stress and displacement functions
07 p1401 A70-18892

- Simultaneous partial integrodifferential equations for transverse oscillations of uniform short beams
07 p1406 A70-19306

- Mixed system of simultaneous linear differential equations under general boundary conditions, deriving numerical solution in Chebyshev series
09 p1711 A70-22288

- Simultaneous singular integral equations approximate solution in orthogonal polynomials
10 p1909 A70-24603

- Simultaneous equations for motion location, speed and direction in acoustic tracking of supersonic objects, recording shock wave times of arrival with microphone system
13 p2450 A70-29988

- Linear second order equation systems decoupling transformation, noting applications to structural feedback, flutter and control systems
16 p2943 A70-33891

- Iterative solutions for systems of nonlinear equations and discretization of elliptic differential equations
21 p3845 A70-40736

- Nonlinear differential equations system under small perturbation, considering uniqueness for autonomous unperturbed system
22 p4062 A70-42969

- Nonlinear differential equation systems overall stability, using qualitative methods
23 p4211 A70-44092

- Differential equation systems with Jordan form block-triangular matrix, discussing homeomorphic mapping
23 p4211 A70-44093

- Differential equations with integrable coefficients, proposing asymptotic integration for second order system
24 p4370 A70-46031

SIMULTANEOUS IMAGE CORRELATOR

U IMAGE CORRELATORS

SINE

U TRIGONOMETRIC FUNCTIONS

SINE WAVES

- Dynamic stability of simply supported column of linear viscoelastic materials under sinusoidal loading
01 p0206 A70-11148

- Plane sinusoidal wave propagation through material reinforced with parallel fibers, using integral formulation for multiple scattering in infinite slab
01 p0130 A70-11187

Sinusoidal signal detection in Gaussian noise band by zero crossing method, discussing signal frequency position and SNR

04 p0648 A70-14705

Digital microcircuits for one kva three phase DC-AC inverter control to generate sinusoidal 400 Hz output using HF bridge chopper techniques

04 p0628 A70-15340

Linear damping of sinusoidal oscillation in plasma, solving linearized Vlasov equation by integration along particle trajectories

05 p0888 A70-16304

Sinusoidal modulated HF pulse signal, deriving parametric envelope and power density function

10 p1833 A70-24086

Force input and thoraco-abdominal strain due to sinusoidal motion of electrohydraulic shake table over 2-14 Hz range imposed on human body

13 p2359 A70-29438

Wheatstone structure impedance bridges, describing balancing method in sinusoidal alternating regime

16 p2872 A70-35106

Double acoustical resonators transient response to excitation by single sine wave, presenting pressure magnification factors as function of frequencies

17 p3135 A70-34521

Real time swept sine wave spectrum analyzer using time compression to change filter bandwidth as function of control signal

17 p3059 A70-35166

Sine wave discrete components detection from complex spectrum with random noise, evaluating errors

17 p3059 A70-35168

Long term geomagnetic pulsations (PC5) with sinusoidal waveforms, using IGY data

17 p3080 A70-35642

Pulling force during motion of sinusoidally deformed flat profile, taking into account trailing edge vortices

18 p3241 A70-36280

Long period duration digital sinusoidal voltage generator, presenting schematic diagram and theoretical and operational characteristics

19 p3385 A70-37376

Statistical confidence levels for frequency analysis, detecting peak sinusoid for desired signal to noise ratio

21 p3825 A70-40867

Transistorized DC to AC converter providing sinusoidal output to power automatic spacecraft control devices via pulse width modulation

22 p3994 A70-42309

Quasi-harmonic friction induced near sinusoidal form vibration, calculating amplitude dependence on sliding velocity

22 p4044 A70-42445

Triangle and sine waveforms generation, discussing reduced peak and crossover distortion and extended frequency operation

22 p3989 A70-42923

SINGLE CRYSTALS

NT WHISKERS [SINGLE CRYSTALS]

Nonlinear optical properties of lithium niobate single crystals, considering optically induced index inhomogeneity and second harmonic generation

01 p0157 A70-10422

Intrinsic/extrinsic stacking fault pairs observed during creep of single crystals of gamma prime precipitation hardened Ni-base alloy, developing viscous slip model

01 p0119 A70-10731

Stress-strain effect on dislocation densities of cylindrical Mg single crystals deformed by torsion basal slip compared to tension test

01 p0122 A70-11236

Alloying additions effect on plastic deformation anisotropy in GaAs single crystals, determining dislocation activation energies from creep tests

01 p0160 A70-11606

Temperature effects on tensile deformation mechanism of Mo single crystals, investigating stress-strain characteristics and slip geometry

02 p0316 A70-11699

CuCl single crystal refractive index measurement at room temperature using V-block refractometer

02 p0350 A70-12453

Epitaxial growth of Cu vapor deposited on W single crystal /110/ surface using low energy diffraction, Auger electron and work function techniques

03 p0538 A70-13100

Strain hardening on single crystals of aging Ni-based alloys with ordered separated phase

03 p0505 A70-13104

GaAs n-type single crystals thermoreflectance spectra at various energies

03 p0541 A70-13721

Electrical properties thermally induced irreversible changes in CdSb single crystals measured as function of current intensity and flow

03 p0542 A70-13751

Niobium ditelluride single crystals production with purity dependent on initial materials, discussing X ray structural and chemical analysis and electrical properties

03 p0542 A70-13753

Schottky barrier FET fabrication using epitaxial growth of single crystal GaAs on insulating sapphire substrate

04 p0660 A70-15364

Vapor deposited GaN single crystals tested for electrical and optical properties, determining band gap energy, electron concentration, etc

04 p0732 A70-15688

Normal incidence reflectance of BeO single crystals, analyzing data by Kramers-Kronig inversion for dielectric function and energy loss function

05 p0891 A70-16047

Plasticity theory of single crystals based on dislocations behavior, considering only plane and elastic strains

05 p0928 A70-16061

Beryllium single crystals deformation under high pressures at room temperature similar to deformation under atmospheric pressure at elevated temperatures

05 p0863 A70-16203

Single crystal Ge surface etching characteristics using laser beam reflection pattern

05 p0860 A70-16656

Electrical properties of unipolar barium titanate single crystals involving hysteresis loops plotting

05 p0894 A70-17024

Electron transmission diffraction patterns of thin monocrystal films using Ar laser

06 p1080 A70-17444

Niobium single crystals annealed in ultrahigh vacuum, studying stress-strain behavior, secondary slip geometry and slip line morphology

06 p1090 A70-18493

Plastic zone around propagating fatigue crack in Cu single crystals, using transmission electron microscopy and X ray topography

06 p1171 A70-18494

Absorption spectra of single crystals TbAlG and DyAlG garnets, investigating Verdet constant dependence on ion concentration

07 p1355 A70-18705

Molybdenum rolling-deformed single crystals recovery and recrystallization using diffraction electron spectroscopy

07 p1307 A70-19550

Soviet collection of articles on single crystals of rare and high melting point metals

07 p1307 A70-19606

Carbides content determination in Mo single crystals by metallographic method, establishing relation between brittle-ductile transition temperature and carbon content

07 p1308 A70-19607

Vanadium single crystals substructure on different planes to growth direction using X ray diffraction

07 p1308 A70-19608

Cylindrical Mo single crystals during cyclic heating, studying characteristic dislocation changes at various stages of thermal fatigue

07 p1308 A70-19609

Oriented single crystals properties obtained from Mo powder subjected to compacting, annealing in hydrogen and electron beam zone melting

07 p1308 A70-19610

Size effect on structure and mechanical properties of thin wire made of Mo single crystals deformed in recrystallized state

07 p1308 A70-19611

Structure and mechanical properties of Mo single crystals grown from gas phase using metallographic and X ray analysis

07 p1308 A70-19612

Rolling texture and recrystallization of Mo single crystals and deformation effect on texture formation using X ray transmission technique

07 p1309 A70-19613

Molybdenum single crystals orientation effect on thermal resistance to argon plasma flow

07 p1309 A70-19614

Tracks shape associated with dislocation motion during etching of Mo single crystals

07 p1309 A70-19639

Single crystal carbides as high temperature structural materials, noting titanium carbide properties and strength-to-density ratio of B-doped crystals

07 p1312 A70-19883

Synthesis procedure for single crystal transition metal diborides, using high pressure capability in controlling stoichiometry

07 p1313 A70-19895

Dislocation velocity-stress exponent for Nb single crystals calculated from strain rate sensitivity measurements of effective flow stress

07 p1314 A70-20011

Gruneisen parameter for metal and semiconductor single crystals obtained from measuring one dimensional thermoelastic response during exposure to pulsed electron beam

07 p1357 A70-20020

Reactive scattering from solid surfaces, discussing atom beam reaction of O with heated Ge and Si single crystals

07 p1342 A70-20117

N-type InAs single crystals optical properties with various carrier concentrations at 1-6 mu wavelengths and 300-78 K temperatures, studying absorption spectra

08 p1555 A70-20512

C-axis single crystalline sapphire filament tensile and fracture tests

08 p1514 A70-20647

Gadolinium ions in zinc tungstate single crystals, studying low symmetry effects on EPR spectrum

08 p1556 A70-21120

Plastic properties of tungsten carbide single crystals at room temperature, determining slip system crystallographic orientations

08 p1520 A70-21557

Low energy electron diffraction pattern from surface steps and facets resulting from recrystallization of Re single crystal

08 p1557 A70-21602

Subboundary migration in Mo, W and W-Re alloy single crystals subjected to cyclic heating, using metallographic technique involving electrolytic polishing and special etching

09 p1701 A70-22297

Rhenium single crystals basal plane surface properties using LEED and Auger electron spectroscopy, describing gas adsorption studies

09 p1739 A70-22526

Creep deformation in single crystals of gamma prime precipitation hardened nickel base alloys at intermediate temperatures

09 p1705 A70-22809

Transverse Dember effect in elastically bent Ge single crystal illuminated by light beam, considering EMF distribution and photocell application

09 p1740 A70-23191

Shock deformation of single crystal biotite /lepidomelane/ imbedded in impedance matching NaI, relating kinking intensity to peak pressure and pulse duration

09 p1670 A70-23375

Mo single crystals creep behavior temperature and stress dependences using X ray analysis

09 p1708 A70-23543

Mo single crystals dislocation substructure strain dependence after creep using etch pitting techniques

09 p1708 A70-23544

Nb-W single crystal low temperature thermally activated deformation, observing slope change in temperature dependence curves of flow stress and strain rate sensitivity

09 p1708 A70-23572

High temperature creep of prestrained molybdenum single crystals as function of physical treatment and crystal orientation

10 p1902 A70-23860

Oscillations of longitudinal magnetostriction in silver and copper single crystals at low temperature

11 p2098 A70-25619

Chemisorption on Mo single crystal surfaces observed by LEED techniques, discussing bcc planes and adsorbed gases

12 p2181 A70-27256

Self focusing of ruby laser radiation in CdS single crystal, considering effect on crystal photoconductivity

12 p2248 A70-27540

Cleavage cracks initiation and propagation in basal plane of Be single crystals, determining propagation energy as function of temperature, purity and alloying

12 p2256 A70-27614

Ohmic contacts for gallium arsenide single crystals, describing fabrication technique and IV characteristics

12 p2202 A70-28187

Raman spectrum of lithium formate monohydrate single crystal in polarized He-Ne laser light, discussing crystal structure

13 p2425 A70-28714

Deformation, mechanical properties and processes during recrystallization annealing of nickel and alloys single crystals

13 p2433 A70-28761

Nonoriented cadmium silicon arsenide single crystals optical properties, determining spectral distribution of IR absorptivity for various photon energies

13 p2470 A70-28883

Fabry-Perot resonator mirrors with local reflecting inhomogeneities within perimeter of single crystal wafers for application in optically coupled semiconductor lasers

13 p2427 A70-28884

Lead ion effects on single crystal zinc dissolution and electrodeposition in alkaline solutions investigated microscopically

13 p2361 A70-28928

Surface field effect, contact potential and photoconductivity measurements on p- and n-type heteroepitaxial single crystal silicon films on sapphire

13 p2470 A70-29372

Plastic deformation of Mo-Re single crystals produced by electron beam zone refining, investigating

ing lattice frictional stress, activation volume temperature variation, etc

13 p2436 A70-29562

Nb single crystal faces electron work functions and comparison of thermionic emission patterns with Ba-Nb system

14 p2625 A70-30162

Plastic deformation of Be single crystals under hydrostatic pressure, considering resolved shear stresses on glide systems

14 p2595 A70-30334

Au films nucleation and growth on single crystal graphite substrates in ultrahigh vacuum, using transmission electron microscopy for examination

14 p2627 A70-30499

Bulk n-type InP single crystal transferred-electron oscillators, investigating current instabilities

14 p2556 A70-30686

Methyl-nitroazobenzene-sulphenyl cyanide unit cell dimensions and space group by single crystal oscillation, rotation and Weissberg X ray diffraction photographs

14 p2581 A70-31300

Single crystal W and W alloys dislocation structures as function of strain, temperature and dilute alloys addition, using electron microscopy

15 p2756 A70-31563

Artificial B-doped semiconductor diamond crystals resistance temperature dependence, determining conductivity and luminescence spectra

15 p2782 A70-31630

Twinned lamella formation in Nb single crystals, examining slip and shear roles in surface tilt formation

15 p2761 A70-32382

Work hardening properties of Ni single crystals of various orientations during intermittent and continuous plastic deformation

15 p2762 A70-32394

Yield strength of Nb-O single crystal solid solutions as function of temperature

15 p2763 A70-32808

Fermi level for crystal with slowly changing impurity determinable by solving Poisson equation and by condition of electroneutrality

15 p2786 A70-32899

GaAs microwave devices including diffused varactor, Schottky barrier and Gunn diode, discussing single crystals preparation and epitaxial growth layers

16 p2873 A70-33293

Metallographic observations on slow crack growth in Be monocrystals suggesting explanation for transition regions

16 p2933 A70-34275

Beta-Ti and Ti-Cr single crystals elastic moduli, determining A ratio temperature dependence

17 p3115 A70-34380

Titanium and Ti-Al single crystals microscopic plastic deformation features, slip modes and dislocation substructures

17 p3116 A70-34389

Single and polycrystalline indium arsenide preparation methods and quality control

17 p3143 A70-35119

Barium fluorides single crystals compression, investigating stress-strain behavior and dislocation mobility

19 p3483 A70-37339

Deformed single crystals of high purity Al of different orientation with respect to growth during recrystallization

19 p3450 A70-37373

Plastic deformation of melted Al-Mg single crystals, using dynamic tensile testing

19 p3450 A70-37374

Ferrite single crystals physical properties - Conference, Krasnoyarsk, U.S.S.R., June-July 1969

19 p3484 A70-37621

Ferrite single crystals physical properties - Conference, Krasnoyarsk, U.S.S.R., June-July 1969

19 p3485 A70-37626

Single crystal ferrite thin film microwave parameters measurement, examining susceptibility in weak magnetic fields and ferromagnetic resonance

19 p3485 A70-37628

Single crystal yttrium ferrite garnet intrinsic electromagnetic radiation as function of coupling coefficient between specimen and waveguide

19 p3485 A70-37630

High vacuum effects on creep properties of single crystal low carbon nickel base superalloy

19 p3451 A70-37705

Elastic constants of ZnTe and ZnSe single crystals over 77-300 K range, using ultrasonic pulse echo method

19 p3486 A70-37761

Hydrostatic pressure derivatives of adiabatic elastic moduli of single crystal zirconium, noting high temperature Gruneisen-thermal expansion deviation

19 p3486 A70-37763

CdS conversion by cation exchange to single crystal CuS, examining phases structural relationship

19 p3486 A70-37766

Single crystalline mercury elastic constants calculated from propagation velocity measurements of polarized sound waves

19 p3486 A70-37770

Elastic-plastic behavior of fine grained fcc polycrystals based on single crystal slip data, satisfying displacement compatibility, equilibrium condition, etc

19 p3538 A70-37792

Phase equilibrium of Fe-rich Fe-Al alloys using single crystal X ray diffraction

19 p3452 A70-37838

Fe rich Fe-Al alloys single crystals, determining three dimensional order and atomic displacements coefficients by X ray diffuse scattering

19 p3452 A70-37839

Electrophysical properties of refractory and rare earth metallic single crystals, discussing work function, transition temperature, resistivity and superconductivity

19 p3454 A70-38731

Electronic absorption spectra of single crystal praseodymium acetate tetrahydrate in natural and polarized light

19 p3488 A70-38742

Cu and Ag low alloying effect on Al single crystals elastic limits and first deformation stages

20 p3644 A70-38960

Solidification and composition model of macroscopic freckles in nickel base superalloys single crystals

20 p3646 A70-39101

Nb-Ta and Nb-Mo alloys single crystal solid solution strengthening as function of composition, temperature and strain rate

20 p3646 A70-39105

Creep resistant Ni-base superalloys ductility and thermal shock resistance improvement by precision casting technique, producing columnar grain and single crystal structures

20 p3648 A70-39415

Nucleation processes associated with thermal decomposition sites formation in ammonium perchlorate single crystals, using optical and electron microscopy

20 p3582 A70-39494

Nb single and polycrystalline thermal properties at high temperatures

20 p3648 A70-39639

Radicals induced in thymine monohydrate single crystals by ionizing radiation

20 p3583 A70-40455

Deflagration rate measurements by high speed cinematography of ammonium perchlorate single crystals under various ambient temperature and pressure conditions

20 p3688 A70-40468

Sn and tetraethylammonium ions effects on Zn electrodeposition on Zn single crystals in aqueous KOH, using scanning electron microscopy

21 p3772 A70-40726

Crystallography of euhedral single crystals from lunar troilite indicating hexagonal forms consistent with high temperature NiAs type structure

21 p3898 A70-41522

Apollo 11 lunar rock plagioclases crystallography, obtaining single crystal X ray diffraction patterns by Buerger precession method

21 p3903 A70-41555

Hydrogen adsorption and coadsorption with oxygen on W single crystal surface measured by mass spectroscopy and low energy electron diffraction method

21 p3862 A70-41887

Impurity dependent critical resolved shear stress of magnesium oxide single crystals, using compression testing

21 p3862 A70-41910

High resistivity single crystal silicon wafers induced IR absorption measurement, using Nd doped glass laser

21 p3837 A70-41916

Electron tunneling through p-type GaAs point contacts on Pb single crystals at liquid He temperatures

21 p3864 A70-42017

Single crystal and pyrolytic graphite, examining spin split Landau levels, Fermi energy changes and anomalous g shifts

21 p3854 A70-42110

Orientation and applied stress effects on pure Nb-6W bcc single crystals yield stress, discussing thermal activation strengthening and crystal dislocations

22 p4052 A70-42318

Current-controlled negative resistance and conductive memory state in Si-doped single crystal YIG wafers

22 p4085 A70-42331

Radiation induced free radicals in thymidine single crystals, attributing electron spin resonance spectral observations to nature of various radicals

22 p3981 A70-42348

Mo single crystals tensile properties at different orientations, noting asymmetric slip in plastic behavior

22 p4056 A70-43155

Superconductivity and crystalline structure of laminar solid solutions of niobium-selenide-niobium-telluride single crystals

22 p4088 A70-43464

Short range order and Fermi surface effects in copper-rich Cu-Al alloys single crystals from X ray scattering measurements

23 p4204 A70-43886

YIG single crystals piezo-optical effect and magnetic double refraction, describing stress measurement technique

23 p4230 A70-43931

Columnar grain and Ni alloy single crystal gas turbine engine components resistant to high temperatures produced by precision casting, using directional solidification

23 p4207 A70-44857

Cubic monocrystalline semiconductor upper critical magnetic field, using correlation function method

23 p4231 A70-44926

Threshold characteristics of injection and electron excitation semiconductor lasers having photoluminescence properties of n-type GaAs single crystals

23 p4203 A70-45065

Spectral and threshold emission from optically pumped semiconductor lasers as function of carrier type and concentration in GaAs single crystals

23 p4203 A70-45069

SbSI semiconductor single crystal polarization parameters temperature dependence, noting anomalies in permittivity, spontaneous polarization and dielectric loss tangent

24 p4389 A70-45208

Ti single crystals plastic deformation in axial compression at high temperatures

24 p4358 A70-45239

Stress dependent creep rate in nickel based superalloy single crystals

24 p4359 A70-45289

Single crystal piezoelectric materials growth characteristics and wave propagation properties for surface acoustic wave applications

24 p4367 A70-45399

Formation and radiative recombination of free excitonic molecules in CuCl single crystals via Q switched ruby laser excitation

24 p4353 A70-45604

Vanadium carbide single crystals superconductivity from upper limit on electron phonon interactions at 30 mK

24 p4391 A70-46252

Solid solution hardening of single crystal Ta base alloys, measuring critical shear stress at various temperatures

24 p4365 A70-46370

SINGLE SIDEBAND DEMODULATION

U SINGLE SIDEBAND TRANSMISSION

SINGLE SIDEBAND MODULATION

U SINGLE SIDEBAND TRANSMISSION

SINGLE SIDEBAND RECEIVERS

U SINGLE SIDEBAND TRANSMISSION

SINGLE SIDEBAND TRANSMISSION

Flight configured single sideband telemetry accuracy determined by digitally computed frequency response

06 p1012 A70-18600

Compatible single sideband transmission realized using iterative signal processing method and ideal band limited channels

08 p1464 A70-21781

Noise effect on single band modulation receiver using phase automatic frequency control for carrier wave at arbitrary SNR

13 p2370 A70-29739

Tetrode for single sideband short wave transmitter, discussing design, characteristics and intermodulation distortion reduction

17 p3054 A70-35412

SINGLE STAGE ROCKET VEHICLES

NT AGENA D ROCKET VEHICLE

NT AGENA ROCKET VEHICLES

NT ARCAS ROCKET VEHICLES

NT BLACK KNIGHT ROCKET VEHICLE

Rocket sled launching for reusable single stage-to-orbit ballistic transport system, noting increased payload capacity and global application

09 p1767 A70-23434

Minimum-time transfer trajectories between close planar orbits, using single stage thrust-limited rocket

23 p4444 A70-44624

Single stage reusable ballistic space shuttle, featuring minimum payload mass ratios and high propulsive efficiency

23 p4262 A70-44686

SINGLE-PHASE FLOW

Single phase flow problem in heated vertical prismatic channel, using dimensional analysis from conservation equations with boundary layer approximation

21 p3954 A70-42170

SINGULAR INTEGRAL EQUATIONS

Singular integral equation applied to elasticity theory of composite beam with or without cavity under torsion

04 p0765 A70-14416

Three dimensional elastostatics problems solution method using singular integral equations solvable numerically for surface tractions and displacements of fully mixed boundary value problem 05 p0926 A70-15912

Inverse boundary value problems for supercavitating bodies, deriving singular integral equations using Prandtl acceleration potential method 07 p1254 A70-19076

Direct boundary value problem for supercavitating profile with finite cavity, deriving singular integral equations by Prandtl acceleration potential method 07 p1254 A70-19077

Stress rate boundary value problem formulation for elastoplastic body by singular integral equations 07 p1405 A70-19258

Elastic contact between bodies in presence of friction or adhesion by reducing singular integral equations to Fredholm equation 08 p1585 A70-20958

Matrix multidimensional singular linear integral equation applied to electromagnetic radiation transfer through stratified atmosphere 09 p1711 A70-22349

Second order elliptic differential equations solution involving Dirichlet problem reduced to equivalent singular integral equations 10 p1908 A70-23923

Simultaneous singular integral equations approximate solution in orthogonal polynomials 10 p1909 A70-24603

Jacobi conditions for singular optimization problems by transforming singular accessory minimum problem into nonclassical nonsingular form, considering optimal control theory applicability 16 p2885 A70-33331

Numerical quadrature of singular functional equations, tabulating integral functions, Cauchy principle values and integral transformations for optimal error function 18 p3280 A70-36219

Singular integral equations of elasticity theory, formulating boundary value problem for discontinuous plane stresses 18 p3337 A70-36370

Singular integral equation formulation for torsion from membrane analogy, obtaining boundary value problem solution by computer program 20 p3718 A70-39000

Elastic contact between bodies in presence of friction or adhesion by reducing singular integral equations to Fredholm equation 20 p3719 A70-39381

Steady state radiative heat transfer through gray gas in spherical cavity, solving transport equation by singular integral equations for uniform heat generation 23 p4283 A70-44784

Propeller blade aerodynamic characteristics at zero advance ratio, reducing singular integral equation to nonsingular form for computer solution 23 p4136 A70-44993

SINGULARITY [MATHEMATICS]

Elliptic restricted three body problem singularities dynamical meaning and character, presenting regularization transformations for equations of motion 03 p0576 A70-14074

Two dimensional wave diffraction problems involving discontinuity line, analyzing instability behavior of geometrically induced singularities by applying integral transform on Helmholtz equations 03 p0525 A70-14199

Surface singularities method for calculating incompressible potential flow about bodies of revolution with arbitrary thickness ratio and angle of attack 03 p0410 A70-14322

Computational methods of homogeneous ill-conditioned and singular simultaneous linear equations 04 p0714 A70-15096

Singularities arising during collisions in restricted n-body problem elimination, discussing Jacobi integral and finite-mass body configuration 04 p0714 A70-15354

Binary star formation using singular solution of Kepler problem in general theory of relativity 04 p0755 A70-15355

Least squares iterative method for solving simultaneous linear equations having singular coefficient matrix 04 p0714 A70-15450

Singularity method applied to two and three dimensional potential flow described by Poisson, Helmholtz or related partial differential equations 05 p0832 A70-16114

Motion near collision singularity in perturbed two body problem, applying method to boundedness proof for Sperting cluster energy 05 p0909 A70-16339

Correctness of Meixner assumption of scattered light field singularity near grating edge due to diffraction 05 p0816 A70-16879

Potential flow over rocket contour containing bends calculated by polygonal distribution of singularities on axis of body of revolution, determining friction effects 06 p0964 A70-17239

Optimality conditions determined for control involving trajectory with singular component equations of motion 06 p1024 A70-17813

Singular element technique effect on hydrodynamic and aerodynamic problems solutions, presenting potential flow problems and application to wings and propellers 07 p1188 A70-19133

Cosmological solution of Einstein gravitational equations with singularity in time 07 p1381 A70-19361

Dynamic characteristics approximation in transfer functions class with singularity at infinity 07 p1327 A70-19806

Singularity for absolute zero of time suggested for beginning of universe by Einstein relativity theory 07 p1336 A70-19922

Space-time singularities of gravitational collapse and cosmology indicated by timelike or null geodesic incompleteness 08 p1575 A70-21353

Einstein gravitational equations general solution having physical singularity with respect to time 08 p1546 A70-21424

Self similar and steady state flows near singularities, studying flow stability by partial differential equations 10 p1863 A70-24071

Physical singularity reduced to imaginary by introducing arbitrary function in form of perturbation into gravitational equations general solution 10 p1917 A70-25032

Two and three dimensional potential flow analysis using finite element technique based on method of singularities 11 p2042 A70-26681

Regularity domain and singularity location of stream function of transonic two dimensional compressible fluid flow, using integral operators 12 p2260 A70-26972

Electromagnetic field singularities near sharp edge relating to geometry scatter used for treating singularities in current distribution integral equations 12 p2183 A70-26977

Rotation effect on singularities in general relativity from local observer standpoint, inquiring into gravitational collapse in ideal fluid 12 p2271 A70-26978

Singular and nonsingular cosmological models validity for general relativity allowing for cosmic dust 12 p2300 A70-27394

Axisymmetrical stress tensor singularity convergence of rigidly clamped circular plate, showing identity of plane stressed state transcendental equations 12 p2325 A70-27558

Singularities of boundary layer conditions on parabolic cylinder in homogeneous incompressible viscous flow with leading edge, using Weyl integral equation 12 p2210 A70-27559

Optimal singular controls made nonsingular for decreasing epsilon values by adding integral quadratic functional of control to cost functional 13 p2382 A70-29066

Uniform function defined throughout plane with isolated singularities at finite distance, obtaining solution uniqueness proof 13 p2389 A70-29626

Singular perturbation problems in theory of differential equations with almost periodic coefficients 14 p2599 A70-30847

German monograph on planar straight cascades in incompressible frictionless potential flow, basing method on singularity method integral equation reversal 16 p2839 A70-34081

Singular solutions to concentrated loads on shallow shell equations with quadratic middle surface 17 p3186 A70-34968

Stress concentration on axisymmetric annular wings calculated using method of singularities 18 p3207 A70-36377

Damped vibrations of single-mass elastic systems, determining E function singularity effect on dynamic characteristics 18 p3341 A70-36587

Singularities of solutions of partial differential equations, discussing smallest convex set in manifold with differential operator 19 p3457 A70-37680

Nonlinear differential equations solutions in power series with indefinite coefficients, determining type of singular points 20 p3658 A70-39766

Singular points in elasticity theory solved by correct boundary value problem and homogeneous solutions theorem 20 p3728 A70-39894

Schwarzschild solution singularity elimination using Lorentz transform 20 p3673 A70-39998

Boundary value problems for linear ordinary differential equations with singularities, determining eigenvalues by computer oriented method 20 p3659 A70-40134

Jacobi-type conditions for singular optimization problems obtained by transformation to nonsingular form adaptable to linear quadratic optimal control theory 20 p3659 A70-40262

Equal thickness singularity interference fringe networks behavior in singularities region of photoelasticity 21 p3941 A70-42260

Harmonic mixed boundary value problem with singularity, deriving approximate solution by dual series technique with conformal transformation and finite difference method 22 p4062 A70-42642

Systematic approach to construction of finite elements, discussing choice of generalized coordinates useful in problems involving singularities 22 p4116 A70-43208

Gravitational equations with oscillatory physical singularity, noting Bianchi type IX homogeneous metric 22 p4063 A70-43477

Metric evolution in oscillatory mode of approach to singularity in homogeneous cosmological models in asymptotic region, showing Kasner epoch dependence on perturbation 22 p4075 A70-43478

Dirichlet problem with singularities for plane with cutouts along circumference, determining analytical function 23 p4211 A70-44239

Singular and nonsingular optimal control problems, deriving sufficient conditions for nonnegativity of second variation 23 p4213 A70-44908

German monograph on airfoil and wings aerodynamic coefficients calculations, showing advantages of analog computers based on singularity theory and distance functions 24 p4287 A70-45097

SINKS

NT HEAT SINKS

SINTERED ALUMINUM POWDER

Fabrication technique effect on tensile and plastic properties of semifinished sintered Al powder products at room temperature and 600 C 06 p1076 A70-17848

SINTERING

Rhenium powder sintering activated by palladium additions producing low porosity 01 p0117 A70-10158

Book on powder metallurgy treating characterization of powders, compaction, sintering and engineering considerations and applications 02 p0316 A70-11735

Titanium carbide sintering under continuous heating in Ar atmosphere, studying ultrasonic waves effects on compaction process 04 p0696 A70-14463

Optimal temperature for sintering of compact titanium carbide in Ar atmosphere 04 p0697 A70-14468

Residual free energy effects on ferrites density and structure after sintering, using powders obtained by thermal decomposition of solid solutions of salts 07 p1355 A70-18703

Reduction temperature effects on molybdenum powders sinterability noting dispersion role 08 p1517 A70-21145

Yttrium iron garnet sintering and grain growth rates dependence on yttrium/iron ratio [ACS PAPER 16-BE-68F] 09 p1740 A70-22982

High intensity ultrasonics for changing solids properties, discussing effects on metal powder sintering, yield strength, fatigue life, crystallization rate, etc 09 p1728 A70-23348

Molybdenum disulfide dry film lubricant wear life as film sintering process dependent on binder, additive or atmosphere chemical effects 11 p2058 A70-25571

Isotropic Be billet fabrication by gas pressure consolidation and pressureless sintering techniques 12 p2252 A70-26888

Porous Ti powder sintering process activation energy determination, noting influence of oxides solution in surface layer of Ti particles 12 p2254 A70-27283

Sintering processes using boundary porosity in welded Nb bicrystal for model of final stages 13 p2434 A70-29081

Powder metal parts induction sintering, comparing performance with conventional method 13 p2420 A70-29249

Alumina particles marker transport in Ag wires during early sintering as function of plastic deformation by slip 15 p2745 A70-32392

Tungsten fiber reinforced copper based composite material, investigating moulding and sintering conditions effect on mechanical properties 19 p3450 A70-37454

Silica marker motion in sintering of loose spherical copper powder aggregates 20 p3647 A70-39109

SINUSES

- Dry and water-saturated sintered fiber metal wick thermal conductivity, obtaining semiempirical correlations for solid and fluid phases and void fraction 21 p3945 A70-41041
- Photoelastic stress measurement of metal powder particles during sintering, using two dimensional models 21 p3935 A70-41410
- Sintered boron-alloyed Mo electron beam welding behavior examined by texture-revealing color etching method 21 p3833 A70-41411
- Titanium diboride particles contact surface increase during sintering in vacuum as function of temperature 23 p4205 A70-44042
- Chemical diffusion kinetics of zirconium silicates formation during sintering under pressure, noting activation energy estimation 24 p4367 A70-45479
- German monograph on sintered molybdenum silicide recrystallization following high temperature heating in oxidizing atmosphere 24 p4367 A70-45575
- Sintered material density-sound velocity relation, deriving ultrasonic wave propagation time dependence 24 p4360 A70-45731

SINUSES

- Arrhythmia resembling atrial flutter simulated in dogs by coronary sinus and left atrial pacing and in man by coronary sinus pacing 02 p0240 A70-12696

SINUSOIDS

U SINE WAVES

SITE DATA PROCESSORS

- Flight test programs site selection method using computer program analysis of magnetic tape weather records [AIAA PAPER 70-397] 10 p1806 A70-24908

SITES

- NT LANDING SITES
- NT LAUNCHING SITES
- NT LUNAR LANDING SITES
- Big Bear Solar Observatory, discussing site selection, observatory construction and telescope optical system 12 p2205 A70-26864

SITTING POSITION

- Forward and rearward facing passenger seats effects in postdecompression emergency descent of high speed high altitude aircraft 03 p0437 A70-14061
- Radiography of spine in seated position, discussing aircraft seats, aeronautical ergonomics, etc 05 p0804 A70-15765
- Human nostril airflow resistance during supported sitting and lateral recumbency and crutch pressure, discussing ipsilateral nasal congestion mechanisms 08 p1448 A70-21874
- Vertebral injury prediction of seated human subjected to caudocephalad acceleration, suggesting consideration for head and torso forward flexion and external restraints effects 09 p1627 A70-23462
- Heart rate variations due to influence of body position rapid changes, emphasizing oxygen consumption in crouching position 17 p3024 A70-34591

SIZE (DIMENSIONS)

- Far and near side lunar crater chains regularities in distribution and size 03 p0574 A70-13879
- Gravity and size effects on film boiling from horizontal cylinders, recommending formulas for wavelength and minimum heat flux predictions [ASME PAPER 69-WA/HT-12] 04 p0784 A70-14821
- Tektite size restricted by thermal stress limit on diameter and aerodynamic load limit on length 05 p0916 A70-16831
- Moon illusion on basis of perceived size relativity, discussing dependence on objective characteristics of visual field 09 p1752 A70-22248
- Frequency-size distribution of Martian and lunar craters and oases, suggesting common mode of origin 09 p1765 A70-23810
- Oxidizer particle size and binder type effects on nonacoustic combustion instability of solid propellants [AIAA PAPER 69-175] 12 p2332 A70-27804
- Low pressure deflagration limit dependence on strand size in terms of cross section dimensions for composite ammonium chlorate propellant [AIAA PAPER 69-144] 13 p2473 A70-29955
- Size effects on impact energy disposition in plastically deformed thick steel specimens at shelf temperature, using similitude laws 15 p2760 A70-32332
- Lunar fragmental debris physics from Surveyor observations, examining size-frequency distribution 20 p3707 A70-39956
- Electrode size effects on combustion driven MHD generator performance, examining voltage losses, gas boundary layer temperature and surface conditions 20 p3566 A70-40005

- Design component size index as function of various system demands, using Monte Carlo method 21 p3846 A70-41870

SIZE DETERMINATION

NT PRECIPITATION PARTICLE MEASUREMENT

- Human size-selective neurons indicated by aftereffect from successive viewing of striped patterns with different spatial frequencies 01 p0035 A70-10724
- Long baseline interferometry used to improve radio telescopes resolving power in measuring quasar diameters 01 p0183 A70-10885
- Perceived size relation to retinal size under reduced observation conditions compared with size-distance invariance hypothesis for binocular and monocular observations 01 p0025 A70-11051
- Vertical concentration and size distribution determinations for aerosols in stratosphere, suggesting volcanic origin 02 p0294 A70-12842
- Venusian cloud layer radius, discussing error in determination of occultation level height of regulus by venus 03 p0574 A70-13881
- Scanned CRT display optimum spot size in relation to raster pitch, assuming Gaussian luminance distribution 04 p0691 A70-15136
- Solar powered communications spacecraft weight, electrical power and communication capacity models for optimizing size and launch vehicle fractionation 04 p0763 A70-15347
- Optimum second stage sizes for Blue Streak first stage for maximum payload injection into various orbits, tabulating sizes and payloads 05 p0924 A70-16589
- Liquids particulate contamination sizing and counting by membrane filtration, specifying procedures and apparatus used [SAE-ARP-598A] 07 p1195 A70-18804
- Orifice diameter for low Reynolds number flowmeter dependent on pipeline diameter tolerances 08 p1482 A70-20684
- Long baseline interferometer observations of radio sources for size determination, tabulating measured fringe visibility 08 p1578 A70-21547
- Baseline measurements of Jupiter decametric radiation providing upper size limit to coherent and incoherent sources 09 p1755 A70-22512
- Angular size measurement for galactic X ray sources in Sagittarius region using modulation collimator aboard sounding rocket 09 p1744 A70-22521
- Electro-optical technique for size distributions of cloud and precipitations particles using linear array of photodetectors 10 p1912 A70-23929
- Ultrasonic echography for ventricular size determination, calculating stroke volume and valvular regurgitation severity 10 p1820 A70-24938
- Heart dimension measurement by miniature implantable ultrasonic sonomicrometer, describing system design and operation 12 p2174 A70-26897
- Discrete radio sources angular size determination by two antenna interferometry 12 p2299 A70-27378
- Radio meteor train initial radius determination, discussing radio echo observation method 12 p2309 A70-27977
- Angular size of high energy X ray source in Crab Nebula from balloon-borne X ray modulation collimator 14 p2631 A70-30789
- Book on psychophysical analysis of visual size-distance perception and physiological optics 15 p2688 A70-31575
- Quasar 3C 298 angular dimensions and 3C 273 scintillating component at 60 MHz based on mean quasi-periods shifts of scintillations 15 p2808 A70-32885
- Optical heterodyne interferometer for stellar diameter measurements 16 p2925 A70-33025
- Jovian planets polar and equatorial diameters and lateral dimensions of Saturn rings by optical measurements 16 p2979 A70-34034
- Fraunhofer holography for recording small particles to determine size distribution without disturbing sample 17 p3086 A70-35016
- Physical and electrical sizes in large antennas, discussing paraboloid reflectors, arrays, slot antennas, etc 17 p3053 A70-35079
- Vortex core diameters calculation methods for axisymmetric angular momentum flows 17 p3074 A70-35750

- Vesta diameter and albedo determination by IR emission measurements, allowing for roughness and rotation 17 p3173 A70-35758

- Constrained viscoelastic layer optimal length for vibration damping of metallic structures 19 p3536 A70-37696
- Equidistance effects on human size and distance perception in visual alley 19 p3368 A70-37771
- Radio sources angular dimensions estimation based on shifts in histograms of scintillation quasi-periods 19 p3525 A70-38766
- Water droplet size measurement by forward light scatter holography, evaluating reconstructed wave front by Fresnel transform 20 p3628 A70-39132
- Ultrasonic pulse echo flaw detection, relating defect size to echo amplitude 20 p3636 A70-39192
- Kalman filter sizing for air-launched tactical missile via covariance sensitivity matrix [AIAA PAPER 70-954] 20 p3601 A70-39574
- Cyg-X-1 X ray source angular size and position measurements by balloon-borne collimator 21 p3873 A70-40665
- Total energies of stars with velocities perpendicular to galactic plane, examining absolute luminosities, galaxy size and local gravitational potential 21 p3890 A70-41162
- Tank collection and spectrophotometric tests in determining aluminum oxide particle size produced by small rocket engine 21 p3867 A70-41727
- Solar radio to optical radius ratio calculated from residual flux measurements during 7 March 1970 solar eclipse 22 p4097 A70-42466
- Radio sources minimum observable diameter attributed to interstellar scattering and synchrotron self absorption 22 p4101 A70-42862
- H II regions density-size relationship, using emission measurements and radio data 22 p4109 A70-43746
- Defect size estimation, using ultrasonic angle beam probes and distance-gain-size/DGS/ diagram 24 p4343 A70-45689
- Photographic measurement of droplets size, velocity and number during sprayed liquid fuel combustion, using Xe flash bulbs 24 p4429 A70-46008

SIZE PERCEPTION

U SPACE PERCEPTION

SIZE SEPARATION

- Dispersion/peak broadening/in gel chromatography measured with nonporous and porous column packings, suggesting diffusion controlled separation with linear permeation isotherm 12 p2181 A70-27474

SIZING [SEPARATION]

U SIZE SEPARATION

SIZING [SHAPING]

- Electrical discharge machining showing close tolerance sizing capability on honeycomb panels 02 p0310 A70-12665
- Hard alloy mixture shaping by free vibrational compacting of powders 07 p1296 A70-19801

SKELETON

U MUSCULOSKELETAL SYSTEM

SKEWNESS

- Clamped skew plates of orthotropic material under transverse load analyzed by stationary potential energy method and compared with isotropic case 01 p0205 A70-11140

SKID LANDINGS

- Recommended design practices to assure good brake system performance with compatibility for skid control equipped aircraft 01 p0007 A70-11457

- Steerable landing gear system consisting of freely castoring corotating wheel nose gear, tiltable axle and main gear skids for lifting body spacecraft [AIAA PAPER 69-790] 13 p2344 A70-28514

SKIDDING

- Turbine technology application to high speed roller bearing design, considering reduction of roller skidding and skewing 13 p2419 A70-28918

- Fluid film lubricated, thrust loaded, angular contact ball bearing high speed performance, predicting skidding by isothermal Newtonian behavior in ball to raceway contact [ASME PAPER 70-LUBS-7] 22 p4045 A70-42452

SKIN [ANATOMY]

NT EPIDERMIS

NT EPITHELIUM

- Typically administered vitamin A radioprotective effect on postradiation skin reactions 01 p0029 A70-11402
- Skin sensitivity representation in cats cerebellar cortex during electrocutaneous stimulation in chronic experiment, providing information on afferent system 03 p0417 A70-13216

Somatosensory cortex removal effect on blocking action of skin stimulation on associative response to light flash in cats

03 p0420 A70-13430

Thermal protection rating systems for clothing fabrics based on pain and blister effects in human skin

03 p0438 A70-14064

Nonextension lines characteristic to human skin utilized to provide natural mobility and minimal ballooning in full pressure suits noting mapping, testing, construction, etc

[ASME PAPER 69-WA/AUT-22]

04 p0642 A70-14826

Nervous system influence on erythema radiation reactions from soft X ray irradiation, discussing blood supply effect

06 p0993 A70-17430

Laser eye and skin hazard evaluation from viewpoints of threshold effect levels and worst case assumptions

07 p1219 A70-19224

Esthesiometric analysis of cutaneous thermoreceptors reaction dependence on heat production rates of human organisms

07 p1206 A70-19472

Permeability disturbances in skin capillaries of rabbits and rats following exposure to Sr90-Y90 beta radiation

09 p1619 A70-22789

Hydrogen peroxide infusion effect on skin remission following exposure to ionizing radiation on rabbit legs

09 p1619 A70-22791

Monograph on measurement and regeneration of water vapor loss of human skin, studying protective qualities of horny layer

10 p1812 A70-24598

Skin receptors afferent discharge characteristics during vibrotactile stimulation

13 p2354 A70-29594

Skin and tissue mechanical characteristics response to vibratory stimulation, considering effects on physiological and psychophysical tactile sensitivity measurements

13 p2354 A70-29598

Intermittent forced inspirations or expirations effects on venous tone and blood flow in human skin vessels

17 p3024 A70-34595

Nonextension lines characteristic to human skin utilized to provide natural mobility and minimal ballooning in full pressure suits noting mapping, testing, construction, etc

17 p3036 A70-34951

Skin simulation for thermal radiation protection studies, considering fused silica and epoxy resin filled with Al powder

18 p3225 A70-37093

Isopotential surface maps for body surface potential relation to ECG and Frank vectorcardiogram during QRS stages in children

20 p3571 A70-39368

Body composition and weight changes estimation after physical exercise by prediction equations based on skinfold and girth measurements

21 p3766 A70-42155

Live skin tissue electrical parameters changes due to laser radiation, showing coagulative necrosis by histomorphological studies

23 p4150 A70-44313

SKIN [STRUCTURAL MEMBER]

Beaded-doubler reinforced skin design concept for Improved HAWK Missile wing, considering compression stress, weight, cost and field service characteristics

02 p0380 A70-11946

Fatigue life of stiffened skin panels under acoustic loading of wideband frequencies to achieve structural resistance optimization

[DGLR-69-63]

04 p0774 A70-15140

Aircraft skin heating by lightning, discussing possibility of exceeding jet fuel vapor ignition temperature

07 p1195 A70-20402

Forced vibration of rib-skin structures under random pressure and heavy damping using wave group theory

10 p1963 A70-25066

Corrugated skins solar absorbance and IR emittance computed for spacecraft thermal design, analyzing other nondiffusive radiative enclosures

11 p2150 A70-26352

Moving skin boundary layer control on airfoil achieved by moving wetted surface in streamwise direction

[AIAA PAPER 70-881]

17 p3010 A70-34808

Airframe skin panels adhesive bonding in wide-bodied jet transports, emphasizing fuselage fatigue and corrosion resistance

[SAE PAPER 700863]

24 p4349 A70-45875

SKIN FRICTION

NT AERODYNAMIC DRAG

NT FRICTION DRAG

NT SUPERSONIC DRAG

NT VISCIOUS DRAG

Density and heat transfer effects on compressible turbulent boundary layers used to investigate velocity and temperature profiles, skin friction, Mach number and Reynolds number

01 p0003 A70-10936

Local skin friction measurement on model in blow-down hypersonic wind tunnels using floating element transducer, giving results for flat plate and wedge

[ONERA-TP-756]

03 p0463 A70-13629

MHD boundary layer separation near rear stagnation point with magnetic field normal to wall solved by series expansion, calculating skin friction by numerical quadratures

03 p0469 A70-14182

Suction influence on skin friction fluctuations of MHD flow along infinite flat wall using Navier-Stokes equations

05 p0886 A70-15787

Friction on fuselage surface layer under static and instantaneous loads without allowance for oscillation

05 p0856 A70-17015

Skin friction law for compressible boundary layer allowing calculation of coefficient of friction for isothermal walls with heat transfer

06 p1033 A70-17232

Air floated skin friction balance adaptable for cylindrical and plane surfaces

06 p1076 A70-17625

Skin friction and heat transfer on flat plate in high velocity laminar motion with mass transfer for any free stream and injected gas combination

06 p1176 A70-17689

Unheated solid starting length effect on skin friction and heat transfer characteristics in incompressible transpired laminar boundary layer on flat plate

06 p1035 A70-17691

Heat transfer coefficients for heat exchangers rotating in air at various velocities computed from skin friction coefficients in laminar and turbulent flow regime

06 p1177 A70-17701

Hyperboloids and paraboloids in flow of Reynolds number 22-65000 and Mach number 10, discussing viscous interactions effects on pressure, drag and skin friction

[AIAA PAPER 70-182]

06 p0976 A70-18240

Laminar viscous flow past semfinite flat plate parallel to uniform stream, solving Navier-Stokes equation to determine local skin friction coefficient

09 p1663 A70-23581

Skin friction near flat plate trailing edge at high Reynolds number by linearizing velocity profile

10 p1801 A70-24159

Boundary layer transition detection at supersonic speeds using thin film gages to infer local laminar and turbulent supersonic skin friction

11 p2035 A70-25970

Coupled effects of transverse curvature and pseudoplasticity on skin friction characteristics of slender circular cylinder in laminar power law fluids

11 p2038 A70-26493

MHD boundary layer flow past yawed flat plate in presence of pressure gradient, determining skin friction expansion terms

13 p2461 A70-28804

Two component piezoelectric skin friction force transducer for hypersonic flow tunnel

13 p2405 A70-28815

Two dimensional turbulent boundary layer with pressure gradient, calculating velocity distribution and local skin friction by Pohlhausen method

13 p2391 A70-29672

Supersonic skin friction measurements in grit type boundary layer transition trips with zero heat transfer

13 p2343 A70-29969

Viscous absorbing emitting shock layer in blunt body stagnation region, calculating skin friction and radiative heat transfer

[AIAA PAPER 70-868]

16 p2999 A70-33911

Force-balance principle application to pressure and skin friction measuring instruments, discussing construction, operation and performance

17 p3089 A70-35171

Skin friction variation and boundary layer separation for rotating axisymmetric body, using two layer model

17 p3011 A70-35240

Local skin friction law for turbulent boundary layers in incompressible flow, applying rule for compressible flow conditions

17 p3075 A70-35922

Free convection boundary layer on two dimensional or axisymmetric body with sudden temperature increase, determining skin friction and heat transfer coefficients

18 p3346 A70-36487

Skin friction measurement in supersonic flows by thin film heated element method, describing thermal boundary layer properties

18 p3243 A70-36710

Two dimensional turbulent boundary layer computation using two parameter family of velocity profiles and skin friction law

21 p3806 A70-40921

Heat transfer and skin friction in quasi-steady axisymmetric turbulent pipe flow of incompressible fluid with variable physical properties

21 p3808 A70-41375

Slender axisymmetric power-law missile bodies with minimum ballistic factor, using Newton-Busemann centrifugal theory with skin friction

21 p3746 A70-41756

Time-mean velocity and skin friction of laminar boundary layer near two dimensional stagnation point with oscillating oncoming flow

22 p4010 A70-42686

Pressure gradient effect on skin friction coefficients taking into account Mach, Reynolds and Stanton numbers

23 p4183 A70-44629

SKIN FRICTION DRAG

U FRICTION DRAG

SKIN RESISTANCE

Heart rate and skin conductance measurements during attention-direction tasks involving proprioceptive stimuli position on environmental acceptance and rejection continuum

01 p0026 A70-11166

Inhomogeneous plasma cylinder skin effect, surface impedance, radiation transport and mean noise temperature

07 p1347 A70-19107

Stripline skin effect in digital equipment transmitting fast rising pulses

15 p2708 A70-31828

SKIN TEMPERATURE [BIOLOGY]

Skin and hypothalamic temperature inputs for behavioral regulation of hypothalamic temperature of rats

01 p0020 A70-10725

Human thermoregulatory responses as function of peripheral thermoreceptors during imposed negative heat load in different ambient environments

01 p0024 A70-10977

Spinal cord and skin temperature effects on tension-extension diagrams in cats red and pale muscles

02 p0236 A70-12092

Thermal comfort in disparate environments, discussing human subjects skin mean temperature and body water loss

03 p0429 A70-14158

Cardiovascular responses to sustained high skin temperature in resting men noting dizziness, impaired vision and extracutaneous vasodilatation

03 p0429 A70-14162

Human skin temperature variations in supramuscular areas under physical activity and rest

04 p0638 A70-15505

Synchronous variations in skin and muscle temperatures of musculus gastrocnemius and flexor carpi in human subjects performing intermittent physical exercises

04 p0639 A70-15506

Skin-muscle temperatures ratio variations in dogs during periods of activity and rest

04 p0639 A70-15508

Physical exercise and rest regime evaluation by thermoelectric method recording skin temperature above gastrocnemius muscle

04 p0640 A70-15513

Human finger tips skin temperature periodical variations process and influencing factors using electronic analog model

10 p1823 A70-25306

Blood flow redistribution during sustained high skin temperatures of men in supine position

12 p2169 A70-27654

Thermal thermesthesiometer for skin heat sensibility studies

19 p3368 A70-37806

Cutaneous liquid crystal temperature sensors for thermographic patterns of angina pectoris induced by treadmill exercise

19 p3364 A70-38361

Body surface cooling level and rate effects on psychomotor performance tested at various levels of mean weighted skin temperature [MWST]

20 p3573 A70-39675

Human peripheral blood flow rewarming in cold ambient temperature, examining skin, rectal and tympanic membrane and oxygen uptake

20 p3576 A70-40327

Mean skin temperatures of human body by 10 point method, using cold and hot exposure data

22 p3978 A70-42874

Semiconductor thermometer for skin temperature differences using resistance bridge, transistor amplifier and thermistors

23 p4150 A70-44317

SKIN TEMPERATURE [NON-BIOLOGICAL]

Aircraft skin heating by lightning, discussing possibility of exceeding jet fuel vapor ignition temperature

07 p1195 A70-20402

Unsteady temperatures determination of integral plate consisting of skin with uniformly positioned longitudinal webs

13 p2518 A70-28478

Thin walled spherical shell spacecraft solar heating in planetary surface proximity, considering skin temperature distribution

21 p3944 A70-41019

SKIRTS

Multiple skirt air cushion vehicle /ACV/ pitch and heave dynamic characteristics, describing mathematical modeling and analog computer simulation

04 p0624 A70-15389

Water tests with N 300 Naviplanes confirming flexible skirt concept regarding speeds and stability

08 p1435 A70-20622

SKUA ROCKET VEHICLES

Skua meteorological rocket system for synoptic stratospheric sounding, describing system, launch preparation, firing and flight characteristics

07 p1395 A70-20253

Measurement physics of resistance wire temperature sensing system used in Skua rocket sounding system

07 p1396 A70-20262

SKULL

NT CRANIUM

Mechanical properties of human skull specified for construction of physical and mathematical models

02 p0243 A70-12097

Vibration mode response and impact time sensitivity of mechanical impedance of human skull, relating head injury factors

15 p2682 A70-31934

Human skull porous dipole layer shear and compressive properties, measuring static and dynamic strain rates

15 p2683 A70-32308

SKY

NT NIGHT SKY

SKY BRIGHTNESS

Sky brightness distribution data to determine shape of aerosols scattering as function of wavelength

02 p0292 A70-12435

Scattering functions from sky light spectra measurements on high mountain for various sun altitudes, obtaining color value functions

02 p0359 A70-12776

Sky background brightness temperature measurement at 408 MHz by pyramidal horn antenna

03 p0496 A70-14344

Altitude variation of mesospheric daytime sky brightness from earth based measurements of twilight sky brightness, noting inconsistency in calculations based on standard atmospheres

06 p1053 A70-17207

Radiometric investigation of energy brightness distribution over clear, cloudy and variable sky at micron wavelengths

06 p1056 A70-17835

Illumination of zenith region of sky before and during solar eclipse of September 1968 measured by luxometer

08 p1573 A70-20950

Absolute sky brightness temperatures measured with horn antennas and Dicke receivers, indicating spectrum change due to galactic nonthermal radiation

12 p2309 A70-27893

Night sky visible brightness at minus 19 degrees declination from July 1965-June 1966 in Tsumeb, South West Africa

14 p2581 A70-31390

Illumination of zenith region of sky before and during solar eclipse of September 1968 measured by luxometer

15 p2806 A70-32762

Earth atmosphere transmission coefficients determination by relation between transparency and daytime sky brightness, noting limits of applicability

16 p2899 A70-34180

Automatic spectroelectrophotometer for measuring sky spectrum brightness at 6910-4040 Å, determining point of minimum brightness

16 p2899 A70-34182

Atmosphere spectral transparency and stability spectrophotometric studies based on measuring solar aureole brightness

16 p2899 A70-34183

Twilight sky brightness measurements at 5200 Å for estimating upper atmospheric dust component, discussing error rates

16 p2899 A70-34184

Night sky brightness in UV and visible region by photoelectric photometers on Cosmos 51 and 213 satellites

17 p3163 A70-34901

Upper atmosphere temperatures from vapor cloud diffusion, eliminating errors from bright sky background at twilight

17 p3076 A70-34940

Sky brightness scattering indicatrix in effective atmospheric layer free from underlying surface multiple scattering and reflection distortions

18 p3248 A70-36634

Horizon sky UV spectral radiance, noting solar position and cloud cover effects

18 p3248 A70-36752

Rayleigh scattering in atmosphere, determining brightness dependence on altitude, latitude and season

18 p3251 A70-36979

Earth aerosol layer formation mechanism, giving atmospheric brightness measurements in terms of dust particles density and size

18 p3251 A70-36981

Zodiacal light observations at elongation angles from sun, examining surface brightness, color index and polarization degree by balloon-borne instruments

18 p3318 A70-37012

Galactic radio corona existence, measuring northern galactic hemisphere sky brightness and cosmic ray distributions

18 p3322 A70-37129

Daylight sky brightness at different wavelengths by airborne photometer, investigating statistical characteristics

19 p3460 A70-37419

Atmospheric scattering indicatrices from daytime sky brightness balloon measurements in presence of cloud cover

19 p3460 A70-37420

SKY RADIATION

NT AIRGLOW

NT DAYGLOW

NT GEOCORONAL EMISSIONS

NT NIGHTGLOW

NT TWILIGHT GLOW

Absorption band observation near 0.43 mu in solar spectra and scattered radiation of sky, determining nontelluric origin

01 p0084 A70-11613

Depth and shape of 0.94 micron water vapor absorption band for clear and cloudy skies, noting radiation distortion for dark dense clouds

04 p0690 A70-15024

Solar and sky far IR radiation in upper atmosphere, estimating precipitable water quantities and low absorption regions

04 p0681 A70-15521

Light intensity and polarization in twilight sky atmosphere at solar depressions

07 p1263 A70-19047

Vertical short wave albedo profiles in lower troposphere under cloudiness and clear sky using actinometric sounding

08 p1537 A70-21105

UHF telescopic survey of southern sky for studying galactic plane in absorption

08 p1578 A70-21536

Day sky Fraunhofer lines filling-in /Ring effect/ considered from analogous effects in surface albedo, suggesting role of Rayleigh wings

10 p1947 A70-24992

Sky radiation scattering and polarization functions for various solar altitudes at Lomnitzer Peak observatory

12 p2294 A70-27674

Atmospheric sodium concentration in twilight and daytime sky from D1 and D2 line intensities in twilight

13 p2399 A70-29239

Circumsolar sky radiation effect on pyrheliometric measurements, considering atmospheric scattering and turbidity

13 p2400 A70-29660

Polar auroral hydrogen emission intensity dependence on K index of geomagnetic activity

14 p2569 A70-30213

Solar, clear sky and overall radiation characteristics, calculating incidence of light and radiation in room interiors

15 p2732 A70-32461

Multispectral UV sky mapping and heavenly body intensity measurement onboard OAO 2 satellite

17 p3179 A70-35264

Galactic or extragalactic origin of diffuse X ray background, reporting sky survey results

21 p3875 A70-40688

Diffuse background of 2-20 keV X rays over Scorpius to North Galactic Pole sky band by rocket measurements

21 p3876 A70-40693

Mechanical passive cone angle amplifier for spinning sounding rockets for IR sky scanning, solving equations of motion for system

21 p3931 A70-41905

Lyman alpha sky background measurements by Mariner 6 UV spectrometer

22 p4094 A70-42932

OAO 2 for UV telescope sky mapping and spectrophotometric measurements of celestial bodies

23 p4261 A70-44666

Battery operated electronic servo governed photoelectric polarimeter for airborne measurements of skylight polarization, discussing design and operation principles

23 p4199 A70-45006

Polar auroral hydrogen emission intensity dependence on K index of geomagnetic activity

24 p4331 A70-46288

SKY WAVES

LUF /lowest useful frequency/ prediction for HF sky wave communication, emphasizing prediction methods using computers

07 p1229 A70-19156

Signal strength of sky waves and noise levels near LUF, suggesting importance of changing mode structure

07 p1229 A70-19158

Ray tracing techniques applied to night sky wave medium frequency propagation, modifying program for absorption and polarization coupling losses

07 p1230 A70-19164

MF signals sky wave propagation, studying roles of geomagnetic dip and propagation direction at various latitudes

10 p1832 A70-23997

Sky wave amplitudes analysis recorded at D region height by loop and short whip antennas during 7 March 1970 solar eclipse

16 p2898 A70-33833

D region LF and VLF sky waves opposite phase perturbation behavior

23 p4162 A70-44006

SKYCRANE HELICOPTER

U CH-54 HELICOPTER

SKYLAB PROGRAM

Skylab test program taking into account program requirements, test management concepts and identification subsystems, status, performance review and control

19 p3441 A70-38820

Skylab scientific space station, discussing crew living quarters and supplies, artificial atmosphere and manned solar observatory

20 p3713 A70-39481

Post Apollo space research, discussing Saturn Workshop /Skylab/, Nerva nuclear rocket engine and international cooperation

21 p3956 A70-41496

Skylab Orbital Workshop fabrication experiments under space environment conditions, discussing weightlessness and vacuum effects on various manufacturing techniques

22 p4046 A70-43075

Life support systems for biological flight experiments on Biosatellite project and Skylab A mission

23 p4154 A70-44665

Apollo and Skylab photographic systems, describing equipment and missions

24 p4333 A70-45360

Skylab experiments, spacecraft facilities and project status, discussing operations, crew functions and weight of structure, systems, consumables and related storage

24 p4416 A70-45913

Skylab mission in 1972, describing orbital workshop configuration and three man crew integration for operational experiments

24 p4417 A70-45939

SKYLARK

U SKYLARK ROCKET VEHICLE

SKYLARK ROCKET VEHICLE

Thrust vector control application to Skylark vehicle to eliminate wind and thrust misalignments effects

13 p2503 A70-28676

Upper atmospheric sounding rocket Skylark engine, attitude control and payload components modifications for increasing versatility and performance

13 p2503 A70-28678

Skyark sounding rocket telemetry data reduction system providing attitude analysis

13 p2363 A70-28680

Three axis star pointing attitude control system for stabilized Skylark sounding rocket program

13 p2447 A70-28687

RESY parachute recovery for payloads launched by Skylark high altitude sounding rocket, noting flotation system and location aids

13 p2505 A70-28771

Atmospheric temperature vertical distribution measurement using sounding balloon and Skylark rocket

15 p2725 A70-31846

SLABS

Relativistic simple shear of slab of neo-Hookean material

05 p0929 A70-16067

Transient thermal stresses in restrained-in-bending slab with surfaces heated and cooled with finite heat transfer coefficients

10 p1964 A70-25095

Isotropic slab with implanted elastic circular disk, analyzing stress-strain state due to torsional and bending moments

15 p2824 A70-32895

Microwave properties of uniformly magnetized slabs filling cross section of rectangular lossless waveguide operating in specific modes

17 p3050 A70-34584

Slab melting under hot spots, obtaining starting solutions

18 p3346 A70-36491

- Thermoelastic stresses in infinite anisotropic slab due to temperature field variations along thickness and length
19 p3539 A70-37872
- Passive type stable test platforms /slabs/ covering configurations, foundations, vibration isolation, environmental effects, etc
[AIAA PAPER 70-960] 20 p3605 A70-39569
- Initial value transport of monoenergetic neutrons migrating in slab with infinite reflectors for isotropic scattering as function of material properties
21 p3854 A70-41999
- SLAGS**
Elastoplastic properties of welded joints containing slag inclusions defects, determining sizes radiographically
24 p4347 A70-45734
- SLANT**
U SLOPES
SLANT PERCEPTION
U SPACE PERCEPTION
SLATER ORBITALS
One and two center Coulomb, hybrid and exchange integrals contributing to orbit-orbit interaction in diatomic molecules evaluated for Slater orbitals combinations
03 p0528 A70-14010
- Energy levels predicted for various electron orbital configurations in Fe V by Slater parameters
10 p1944 A70-24953
- Threshold photoionization cross sections for homonuclear diatomic N molecules calculated from Slater orbitals and Coulomb waves
11 p2086 A70-25833
- Molecular orbital wave functions for water molecule, using minimum set of Slater orbitals
14 p2544 A70-30119
- Electron excitation cross sections for light atoms using Slater wave functions and Born-Bethe approximations
21 p3853 A70-41393
- SLEDS**
NT ROCKET PROPELLED SLEDS
SLEEP
NT HYPNOSIS
Synchronizing and desynchronizing systems for cerebral electrical activity, noting roles in sleep and wakefulness mechanisms
03 p0417 A70-13073
- Unrestrained chimpanzees cortical and subcortical electrical activity during sleep recorded by telemetry and compared with human beings and other mammals
03 p0432 A70-14347
- Wake-sleep rhythm of spacecrews for operational capacity to maintain constant watch of spacecraft, suggesting recreation of terrestrial time cycle in space
05 p0799 A70-15766
- Sleep biphasic paradoxical stage in cats, correlating brain structures electroencephalographic data with various somatic and vegetative signs
12 p2173 A70-28345
- Sleep-wakefulness cycle electroencephalogram of auditory and visual portions of neocortex and hippocampus activity in cats, using spectral analysis and integration
14 p2536 A70-30185
- Collection of articles on fatigue, sleep and dreams covering mechanisms, biochemistry, pathological physiology, etc
15 p2680 A70-31743
- Sleep intensity and stages from EEG studies concerning rapid eye movements, vegetative nervous system, heart/respiration rate, blood pressure, body temperature and stomach motility
15 p2680 A70-31743
- Portable hybrid automatic sleep analyzer for on-line EEG and EOG processing
17 p3040 A70-35606
- Human sleep pattern changes due to acute sleep-waking cycle reversal
20 p3569 A70-38990
- Nocturnal headache relationship to REM sleep stage from EEG, EOG and EMG data
20 p3569 A70-38994
- Desynchronized sleep phase in cats, discussing activation and hippocampal theta and hippocampal delta rhythm predominance stages
20 p3574 A70-40171
- Click-evoked potentials in rat auditory cortex, medial geniculate body, reticulate formation and hippocampus during natural sleep and waking
21 p3761 A70-40917
- EEG dynamics during normal and altered human sleep-wakefulness regimens
22 p3971 A70-43137
- Automatic detection of K-complex waveforms in sleep electroencephalograms, using pattern recognition
23 p4151 A70-44379
- Human cortisol intermittent secretion during early morning sleep and sleep-wake cycle, examining adrenal activity
24 p4305 A70-46410
- SLEEP DEPRIVATION**
Prolonged wakefulness effect on human work capacity in isolated chamber, determining physical, intellectual and sensory capacities
05 p0809 A70-17117
- Airline pilots sleep patterns during worldwide east-west routes, considering modification by irregular duty periods and time zone adaptation
15 p2689 A70-31882
- Prolonged REM sleep deprivation effect on gamma-aminobutyric acid concentration in mice

- Sliding electrical contacts in vacuum and space - Conference, Virginia Polytechnic Institute, September-October 1969 16 p2919 A70-33805
- Reliability life tests preventing sliding electrical contacts failure in space vehicles, discussing data dissemination 16 p2920 A70-33806
- Literature review of sliding electrical contacts in space vehicles, covering heavy aromatic hydrocarbons, molybdenum disulfide and other lubrication materials 16 p2920 A70-33807
- Sliding electrical contacts for unmanned scientific satellites, discussing Nimbus AVCS camera iris motors 16 p2920 A70-33809
- Slip ring assemblies for spacecraft devices, evaluating sliding electrical contact industry technological capabilities 16 p2920 A70-33811
- Heat conduction from sliding solids, discussing restrictions effect on temperature field near interface 17 p3197 A70-35543
- Sliding bodies contact surfaces stable roughness magnitude by molecular-mechanical friction and wear fatigue theories 24 p4341 A70-45489

SLIDING FRICTION

- Sliding friction and adhesion mechanisms theories based on thermodynamics, noting frictional heat and adhesive joints [ASME PAPER 69-LUB-4] 01 p1013 A70-10398
- Unlubricated wear characteristics of polyimide resin sliding against carbon steel in air, noting effects of surface temperature, bearing pressure and velocity 01 p1013 A70-10448
- Inertia effect of electrically conducting lubricant on load capacity of hydromagnetic inclined slider bearing under magnetic field 01 p1014 A70-11389
- Friction and surface damage between clean metal hemispheres and flats at low sliding speeds and 25 K room temperature range 01 p1015 A70-11393
- Sliding steel specimens anomalous friction behavior in vacuum, noting friction-time plot dependence on oxide film rupture, load, environmental pressure, etc 02 p0321 A70-12534
- Calculus of variations used for determining optimum one dimensional MHD slider bearing with bounded control variables [ASME PAPER 69-WA/LUB-2] 04 p0698 A70-14771
- Optimum one dimensional Rayleigh gas slider bearing, calculating step location, pressure and load capacity for range of bearing numbers [ASME PAPER 69-WA/LUB-1] 04 p0698 A70-14772
- Sliding wear of bearing Al lubricated with polyphenyl ethers in boundary region tested by pin and cylinder wear machine producing continuous record 05 p0854 A70-15910
- Polytetrafluoroethylene wear tested by rubbing cylindrical rod flat ends against glass plates, determining sliding contact pressure effects 06 p1077 A70-18403
- Sliding friction and wear of polytetrafluoroethylene ball bearing filled with graphite investigated for irradiation effects 06 p1077 A70-18404
- Lubricating oils viscosity deterioration during sliding motion in machines determined by quantitative evaluation 09 p1693 A70-23407
- Sliding bearings with nonNewtonian lubricants, noting pressure gradient change effect caused by speed fluctuation and material constants 10 p1893 A70-24015
- Stress measurement in discontinuous layered medium subjected to perpendicular load under sliding friction, using photoelastic interferometric models 11 p2131 A70-25587

Hydraulic driving system stick-slip prevention by acceleration and transient velocity feedback compensation techniques

11 p2060 A70-26407

Surface sliding friction interactions in aluminum alloys friction welding

12 p2239 A70-26855

Fretting and fretting fatigue in metal-metal contacts, showing friction as important parameter

12 p2253 A70-27110

Friction and wear of Ni sliding on Ni, Cu on Cu and Au on Au tested in vacuum at room temperature with constant load

12 p2242 A70-27229

Polyurethane and metal surface layers deformation related during sliding friction in presence of liquid media, noting friction coefficient- deformation relation

12 p2244 A70-28284

Sliding rigid conical indenter friction experiments over work hardenable metal flats in high adhesion conditions, observing forces, stresses and deformation modes

13 p2421 A70-29548

Oxygen interlayer diffusion effects on wear change during gliding friction of normalized steel samples

15 p2743 A70-31636

Antifriction and wear properties of iron fluoride materials and white cast iron under sliding friction in air and vacuum

15 p2743 A70-31637

Gas formation by sliding friction of self lubricating Teflon with carbon black on steel in ultrahigh vacuum, using mass spectrometry

15 p2745 A70-32446

Friction and wear effects on leakage path in sliding seal interface

16 p2916 A70-33078

Sliding friction effects of nonlinear asymmetric supports on turbine engine rotor-shaft stability

18 p3301 A70-36799

Optimum one dimensional Rayleigh gas slider bearing, calculating step location, pressure and load capacity for range of bearing numbers

19 p3436 A70-37617

Calculus of variations used for determining optimum one dimensional MHD slider bearing with bounded control variables

19 p3436 A70-37620

Transition metal disulfides and diselenides as solid lubricants, investigating sliding friction characteristics

19 p3438 A70-38801

Quasi-harmonic friction induced near sinusoidal form vibration, calculating amplitude dependence on sliding velocity

22 p4044 A70-42445

Sliding bodies contact surfaces stable roughness magnitude by molecular-mechanical friction and wear fatigue theories

24 p4341 A70-45489

Energy absorption and dissipation in friction brakes, investigating brake lining polymer binder contribution through molecular reorientation, crystallinity increase and entropy decrease

24 p4342 A70-45585

Refractory materials surface behavior under friction, discussing microscopic nature of wear and surface deterioration due to thermal fatigue, fusion and material transfer, etc

24 p4342 A70-45595

SLIP

Mo single crystals tensile properties at different orientations, noting asymmetric slip in plastic behavior

22 p4056 A70-43155

SLIP BANDS

U EDGE DISLOCATIONS

SLIP FLOW

Navier-Stokes equations for compressible gas, generalizing viscous channel flow of heat conducting gas to slip flow of rarefied gas

01 p0068 A70-11579

Magnetic boundary layer equations applied to flow past stationary circular cylinder and sphere, showing graphical variation of slip velocity with angle

03 p0471 A70-14334

Hypersonic blunt body heat transfer prediction, including coupled effects of real gas behavior and slip boundary conditions

04 p0614 A70-14809

Hypersonic laminar separation of slip flow on slender cone with attached compression flares, using surface pressure measurements and Pitot surveys

04 p0620 A70-15577

Axisymmetric motion of viscous heat conducting gas by constructing indirect analog of Poiseuille gas flow, applying results to slip flow regime

06 p1048 A70-18325

Thermal slip velocity of gas in infinite temperature gradient tangential to solid wall, basing calculation on linearized Boltzmann kinetic equation

06 p1049 A70-18332

Surface diffusion slip velocity in binary gas mixture above solid surface, basing calculation on distribution functions determined from Boltzmann equation

06 p1049 A70-18333

Meksyn asymptotic method of integrating boundary layer equations applied to ordinary differential equations for slip flow past seminfinit plate

06 p0979 A70-18348

Slip flow of nitrogen gas through long circular tubes, measuring mass flow, pressure drop and cross sectional velocity profiles

06 p1051 A70-18368

Velocity profile at entrance of two dimensional channel immersed in rarefied slow moving uniform flow with slip at walls

06 p1052 A70-18384

Temperature dependence of microplastic yield and flow stress and transient creep responses of gamma prime phase

08 p1522 A70-21709

Magnetic field and conducting walls effect on laminar steady MHD Couette flow of electrically conducting incompressible viscous rarefied gas in slip regime

08 p1553 A70-21764

Dual flow turbojet engine rotor slip constraints during turning, investigating turbine blade strength, thrust deviation, fuel consumption and compressor stability

10 p1930 A70-24285

Rarefied gas flow in slip regime through cylindrical tube assuming parabolic velocity profile

14 p2565 A70-30263

Rarefied gas slip flow coefficients calculations at nonuniformly heated surface, demonstrating relationship between temperature and isothermal slip coefficients

15 p2776 A70-31478

Low speed rarefied slip flow over wedge by asymptotic method of boundary layer equations integration, obtaining velocity profiles for various angles

17 p3010 A70-34973

Rarefied gas dynamics at different Knudsen numbers, discussing elements of kinetic theory and analyzing free molecular and slip flows

17 p3070 A70-35037

Kinetic effects of Barnett equations and slip conditions for continuous dense gas flows at small Knudsen numbers

18 p3239 A70-36256

Two dimensional MHD couette flow in slip regime, considering constant suction on stationary plate to determine transverse magnetic effects

20 p3677 A70-39047

Steady compressible supersonic planar flow of viscous heat conducting fluid under linearization freestream conditions, describing slip flow past finite flat plate

20 p3557 A70-39228

Local heat transfer between heated circular cylinder and air in transverse slip flow at low Reynolds and Mach numbers

21 p3945 A70-41035

Wall recombination heat transfer in rarefied flow with velocity slip near leading edge

21 p3952 A70-42083

Rarefied gas heat conduction between concentric cylinders in slip regime, obtaining perturbed temperature and density variations

23 p4284 A70-44985

SLIPSTREAMS

Axisymmetric helium jet transition to turbulent flow in air slipstream, measuring temperature and velocity profiles

09 p1660 A70-22439

Helicopter rotors flow conditions by digital computer, investigating slipstream configuration

16 p2836 A70-33761

SLITS

Stress-strain relations for rigidly sealed orthotropic planes with finite number of slits

03 p0592 A70-13447

Electromagnetic field sources in two dimensional problem of diffraction by slit

03 p0526 A70-14355

Actively participating bounding surfaces effect on free molecule flow through slit or annular orifice situated in wall separating different pressure regions

[ASME PAPER 69-WA/APM-26]

04 p0668 A70-14906

Plane E-polarized wave diffraction by slit in conducting screen using Fredholm integral equations of second kind

08 p1461 A70-21004

Stress-strain state of infinite isotropic plate weakened by curvilinear slit

13 p2514 A70-29293

Elastoplastic equilibrium of thin infinite plate with periodic slit system along straight line under tension, investigating localized plastic deformation domains

20 p3721 A70-39769

Light intensity distributions within successive slits imaged by transmission gratings, using theory for spatial moire fringe blurring

23 p4217 A70-43819

Plane wave diffraction by infinite strips and slitte planes, obtaining asymptotic expansions valid for HF

24 p4426 A70-46019

SLOPES

NT GLIDE PATHS

Slopes distribution over finite span on planetary surface excavated by primary impact craters, including typical lunar mare crater densities

01 p0178 A70-10443

Noontime ground surface temperature relationship to exposure and slope angle for meadows and woodland, using airborne IR pyrliometer

06 p1054 A70-17415

Slope failure erosional and mass wastage forms identification, characteristics and distribution based on large scale aerial photography depicted by remote sensor returns

12 p2217 A70-26913

Wind velocity components on nonuniformly heated plane slope with linear periodic temperature function

14 p2602 A70-30165

Integral radiation fluxes incident on sloping and horizontal surfaces compared under cloud covers of various intensities

14 p2603 A70-34048

Macaulay method extended for slope and deflection of statically indeterminate beams, rewriting design equations into index notation for computer programming

[ASME PAPER 70-DE-2]

16 p2989 A70-33419

SLOSHING

U LIQUID SLOSHING

SLOT ANTENNAS

Monograph on radio telescopes covering developments from simple parabolic reflectors to computer based image forming instruments

01 p0046 A70-11250

UHF shallow-cavity crossed-slot aircraft antenna for satellite to air communications

02 p0269 A70-12585

Equatorial patterns measurement of plasma covered axially slotted cylindrical antenna, describing discharge tube, facility and Langmuir probe survey of tube electron density

02 p0269 A70-12590

Antenna biasing with DC field to improve power handling capacity tested on U-slot and helical antennas

02 p0269 A70-12595

Surface function and impedance distribution for unilateral surface wave antenna excitation by slot emitter above surface impedance segment

04 p0655 A70-14403

Aperture electric field bounds presented for TE, TM and TE/TM excitation over azimuthally symmetric slotted cylinder subject to constraint of specified radiated power

04 p0649 A70-14969

Variational principle used in microwave breakdown predictions for rectangular aperture antenna

05 p0824 A70-16988

Rectangular-slot antenna pair self and mutual admittances in inhomogeneous plasma layer on slender conical body, calculating VSWR and isolation

06 p1020 A70-17565

Element pattern derived for circular arrays of axial slits on large perfectly conducting cylinders, comparing properties with planar arrays

06 p1021 A70-17571

Rectangular waveguides broad wall longitudinal slot equivalent networks, noting series/parallel function dependence on slot length

07 p1240 A70-19221

Far field synthesis for calculating excitation pattern of waveguide-excited aperture antenna arrays

07 p1243 A70-20325

Equivalent circuit for radiation admittance of infinite planar array of phased rectangular waveguide apertures

09 p1646 A70-22692

Bounds on near electric field outside rectangular slot in conducting ground plane applied to microwave breakdown limitation

09 p1646 A70-22696

Effective noise temperature of planar aperture antennas in lossy inhomogeneous plasma slabs calculated by computer

09 p1646 A70-22704

Waveguide slot antenna with electrical control of field polarization from linear to circular and beam scanning over wide sector

09 p1652 A70-23652

Solid dielectrics permittivity measurement using beam deflection phenomenon in multislot waveguide antenna

09 p1652 A70-23656

Variational principle in electromagnetics to produce linear algebraic equations with Rayleigh-Ritz procedure for application to dielectrically coated slot antenna

12 p2198 A70-27957

Impedance in coaxial line generated by tee-fed waveguide slot antenna, using equivalent circuit

12 p2198 A70-27966

Waveguide slot array operation in different frequency bands generating independent radiation patterns, utilizing orthogonal dominant modes propagation 12 p2199 A70-27967

Leaky waveguide radiation patterns with periodic loading slots along axis 13 p2377 A70-29105

Radiation patterns of slots in flat and curved screens using open waveguide emission theory 13 p2378 A70-29305

Radiation pattern theory for primary aperture antenna with two secondary radiators 13 p2378 A70-29547

Aperture antennas planar finite array, calculating excitation pattern for prescribed surface current distribution 14 p2557 A70-31160

Asymmetric phase error in antenna circular apertures, emphasizing beam squint resulting from distortion of paraboloidal reflector 16 p2859 A70-32942

Admittance measurements of rectangular or circular waveguide fed aperture antennas illuminating displaced metal plate 16 p2872 A70-32963

Wedge diffraction analyses of TE sub 10 mode slot radiation characteristics on circular and elliptical cylinder, considering boundary value solutions existence 16 p2861 A70-32965

Amplitude distribution selection in antenna aperture in presence of phase amplitude errors from relation between sidelobe level probabilistic and phase amplitude errors characteristics 16 p2873 A70-33241

Radiation from simple slots in moving dispersionless dielectric, using Minkowski electrodynamics 17 p3043 A70-34984

Microwave antenna with aperture in infinite conducting plane, analyzing radiation patterns, scattering and diffraction 17 p3043 A70-35053

Continuous line source, array or aperture antennas of linear rectangular or circular shape, discussing radiation patterns synthesis methods 17 p3044 A70-35057

Radiation patterns and impedance properties of slot antenna in ground plane, slot on cylinder and sphere and waveguide slot arrays 17 p3051 A70-35064

Physical and electrical sizes in large antennas, discussing paraboloid reflectors, arrays, slot antennas, etc 17 p3053 A70-35079

Shadow current method for asymptotic solution to two dimensional problem of electromagnetic wave far diffraction field on ideally conducting plane with infinite rectilinear slot 18 p3227 A70-36142

Open plane slotted waveguide excitation by current carrying filament, using long wave approximation 19 p3377 A70-37726

Electromagnetic wave propagation perpendicular to slots of plane dielectric filled waveguide used as slow wave system and antenna 19 p3386 A70-37728

Microwave aperture antenna in finite size ground plane, calculating radiation pattern distortion by superposition of boundary value and wedge diffraction solutions 20 p3599 A70-40314

Aperture antennas admittance calculation, considering upper bound on error involved in approximating finite ground plane conductivity by perfect conductivity 20 p3599 A70-40316

Aperture antenna pattern beamwidth decrease in near field with increasing scan angle 21 p3796 A70-40559

Quasi-equispaced traveling wave slot arrays with below sidelobe crosspolarization, considering computer designed X band prototype 21 p3800 A70-42050

Cylindrical slot antennas radiation patterns in plane perpendicular to axis, discussing field emission and angular position of each slot for phase multiplier 22 p3997 A70-43131

Nonradiating higher order modes on shielded slot lines for TM and TE cases, using series matching and Wiener-Hopf technique 22 p3990 A70-43420

Dielectric covered narrow radiating slots in rectangular waveguide broad face, calculating impedance from equivalent circuits 23 p4175 A70-44952

Annular aperture /slot/ antenna driven by coaxial line, calculating input admittance and complete near field radiation distribution 23 p4176 A70-44954

Planar conducting screen with periodic rectangular perforations, determining transmission and reflection coefficients and aperture field distribution 24 p4311 A70-45219

SLOTS
NT WING SLOTS

Foreign gas injection and slot geometry influencing film cooling effectiveness 01 p0219 A70-11182

Ideal fluid flow past sphere in rectangular duct and slot solved in series form in spherical functions 04 p0666 A70-14605

Liquid flow through cylindrical slot of constant and variable thickness, calculating flow variations 06 p1034 A70-17630

Slot burner laminar flame front stability loss ascribed to increased slot dimensions and angles between velocity vector and flame front 08 p1598 A70-21208

Slot line wavelength, impedance, transitions and tolerances measured at S band using different dielectric constant materials 08 p1475 A70-21282

Slot transmission line applicability to miniature ferrite phase shifter design exploiting elliptically polarized H field existence 08 p1475 A70-21283

Laminar boundary layer separation noting effect of mass slot suction 09 p1662 A70-23236

Plane turbulent wall jet from small slot, investigating velocity distribution dependence on slot inclination 13 p2388 A70-29448

Self similar dynamic problems in two dimensional elasticity theory for slot with point source in boundless body 13 p2517 A70-29763

Supersonic slot cooling for surface protection at hypersonic speeds using contoured axisymmetric nozzle with streamlined body 14 p2663 A70-30257

MHD induction generator efficiency, investigating winding slot finite spacing and width effects 14 p2533 A70-30531

Incompressible two dimensional potential flow analysis with compressibility effects for thick highly cambered multibodies in cascade, noting slotted compressor blade performance 14 p2529 A70-31023

Radiation pattern of conducting strip excited by linear slot parallel to strip edges, deriving asymptotic solution 16 p2863 A70-33239

Hydraulic characteristics of flow through miniature slot orifices for rocket engine injectors, observing stability of effluent liquid streams 16 p2891 A70-33566

MHD induction generator efficiency reduction due to finite winding slots spacing and width 20 p3565 A70-39987

Self similar dynamic problems in two dimensional elasticity theory for slot with point source in boundless body 20 p3732 A70-40101

SLOTTED ANTENNAS U SLOT ANTENNAS SLOTTED WIND TUNNELS

Upwash interference on oscillating wing in slotted wall wind tunnels, analyzing acceleration and velocity potentials using small wing theory 04 p0621 A70-15605

Optimal V/STOL wind tunnel interference study of slotted tunnel walls, including porosity and height to width ratio effects 07 p1251 A70-20407

V/STOL testing wind tunnel section with solid vertical and slotted horizontal zero interference walls 18 p2327 A70-36461

Calibration tests in transonic wind tunnel with two and four sided perforation section 19 p3353 A70-38475

Low speed airfoil two dimensional testing in wind tunnel with slotted wall, examining lift, drag and pitching moments 23 p4132 A70-44119

SLOW NEUTRONS U THERMAL NEUTRONS SLUDGE

Sludge removal from electrolyte in electrochemical machining by settling system, discussing temperature control, flow requirements, concentration control and balance system 10 p1893 A70-23859

SLURRY PROPELLANTS

Slurry-cast filled nitrocellulose plastisols as solid propellants, discussing compositions, performance and applicability to beryllium fuel 07 p1360 A70-19907

SLUSH

Liquid and slush hydrogen gravimetric flow calibration system for research in slush generation, slush fluid mechanics and flow instrumentation 06 p1031 A70-18449

Slush and water hazards on runways, discussing investigation and amelioration methods 11 p2030 A70-25356

Hydrogen slush characteristics, discussing advantages of liquid-solid mixture over liquid hydrogen, production methods, aging effects, transfer and pumping losses, storage, instrumentation, etc 23 p4232 A70-45075

SLV (SOFT LANDING VEHICLES) U SOFT LANDING SPACECRAFT SM-65 MISSILE

U ATLAS LAUNCH VEHICLES
SMALL ASTRONOMY SATELLITES
Small Astronomy Satellite /SAS/ program providing Explorer class Scott launched satellite capability for astronomical observations 08 p1581 A70-20608

SMALL PERTURBATION FLOW

Small amplitude perturbations in interstellar medium, discussing order of magnitude estimates of properties of cosmic rays, thermal gas, dust and magnetic field 03 p0575 A70-14016

Premixed compression initiated supersonic combustion, noting sensitivity to small perturbations in inlet flow variables 07 p1421 A70-19318

[AIAA PAPER 68-995]
Small disturbance and similitude applicability to internal hypersonic conical flows in edge shock and Busemann inlets 09 p1606 A70-23245

Small linear disturbance and stability of potential unsteady motion of finite mass of liquid with free boundary 10 p1866 A70-24111

Rigid body mode of viscous incompressible fluid flow response to small perturbations of rotating spherical container, applying torque interaction 10 p1868 A70-24196

Plane Couette oscillating flow stability to small disturbances under composed unsteady velocity at high Reynolds number 10 p1868 A70-24197

Small plane perturbations stability losses in uniform rectilinear motion of nonguided deformable rocket, using slender bodies pressure theory 10 p1950 A70-24528

Inviscid incompressible conducting fluid flow past body in aligned magnetic field at low magnetic Reynolds number, discussing small perturbations evolution 11 p2041 A70-26623

Two phase convex corner flows of particle imbedded inviscid incompressible fluid using small perturbations method 14 p2565 A70-30279

Steady plane relativistic flow small irrotational perturbation theory determining subsonic, transonic and supersonic approximation 14 p2566 A70-30472

Integral equation for transonic small disturbance flow applied to plane flows over lifting airfoils 15 p2673 A70-32768

Three dimensional inviscid small perturbation compressible flow past lifting axial compressor rotor at subsonic and transonic speeds 18 p3208 A70-36691

Viscous dielectric incompressible fluid cylinder capillary stability under small axisymmetric disturbances and axial electric field, deriving perturbed fluid flow equations 19 p3406 A70-38351

Boundary layer transition under small trim-dimensional perturbations interacting with excitations from wall 24 p4327 A70-46206

SMEAR

Edge smear in far field holography as function of interference orders, using short-cut trace technique 09 p1684 A70-23532

SMELL

U OLFACTORY PERCEPTION SMITH CHART

Microwave transistors parameters measurement by scattering /S/ parameter method for characterizing noise, gain and dynamic range, reading input and output impedances from Smith chart 19 p3386 A70-37692

SMOKE

Smoked-foil technique for transverse wave quantitative study in condensed-phase explosives 03 p0606 A70-13814

Standard method for aircraft engine exhaust smoke measurement for air pollution control 12 p2290 A70-27429

[SAE PAPER 700250]
Smoke chamber measurements of opacity developed in polymer pyrolysis or combustion, including Materials Smoke Obscurity Index /MSOI/ 20 p3736 A70-39404

Chemical and physical factors effect on smoke evolution from polymers 20 p3736 A70-39405

Aircraft gas turbine engine smoke emission measurement, discussing test equipment and procedure standardization 20 p3689 A70-39720

Aerodynamic holder stabilized smoke flames to avoid intermittent flaming and thick puffs for incinerator air pollution reduction 21 p3942 A70-40887

SMOKE ABATEMENT

- Flammability resistance and smoke emission characteristics of aircraft interior fire retardant materials under ambient and increased temperature and zero ventilation conditions
[AIAA PAPER 70-400] 10 p1908 A70-24905
- Aircraft smoke emission reduction and elimination by engine modifications 14 p2628 A70-30190
- Reduced smoke combustion chambers for jet aircraft engines tested in full scale JT8D engine 24 p4396 A70-46387

SMOKE TRAILS

- Missile impact location visual identification by marker system using pyrotechnic aboard to produce dense white smoke detectable to unaided eye, including flight test 03 p0582 A70-14104
- Three camera method for studying upper atmosphere winds via smoke trails providing wind velocity, earth coordinate data and error indication 14 p2607 A70-30572
- Lagrange time scale of air turbulence from photographic measurements of smoke aerosol particle dispersion in horizontal direction across mean wind 19 p3460 A70-37416
- Smoke, chaff and flare distress signals design and operation for search and rescue operations 23 p4143 A70-44494

SMOOTHING

- NT DATA SMOOTHING
- SMU [MANEUVERING UNITS]
- U SELF MANEUVERING UNITS

SNAKING

- U LATERAL OSCILLATION

SNAP

- NT SNAP 8
- NT SNAP 19
- NT SNAP 27
- NT SPACE POWER UNIT REACTORS
- SNAP reactor control system mechanisms development for operation in space environment 16 p2951 A70-34163
- TSE-SNAP reactor neutron radiation leakage, comparing Monte Carlo calculations with experimental and analytical determinations 20 p3671 A70-39156
- Space nuclear power system design and operation related to safety, discussing SNAP flights 22 p4071 A70-43192

SNAP 8

- Liquid metal pump design and performance in SNAP 8 Mercury Rankine and Advanced Rankine fluid power systems, including containment materials and corrosion effects 04 p0718 A70-15641
- Al radiator with thin stainless steel tube liner using liquid metal coolant tested for heat rejection system of SNAP-8 Rankine cycle power system [AIAA PAPER 70-855] 16 p3000 A70-33922
- Ta oxygen concentration effects on corrosion resistance to NaK in SNAP 8 boilers 16 p2932 A70-34202

SNAP 19

- SNAP 19 radioisotope fueled thermoelectric power supply orbital performance on Nimbus 3, ascribing power output decrease to decreasing generator output currents [AIAA PAPER 70-480] 11 p2120 A70-25435
- SNAP 19 radioisotope thermoelectric generator module for Viking Lander and Pioneer applications, discussing design requirements, environmental and mission constraints, life, performance and reliability characteristics, etc 22 p4071 A70-43195

SNAP 27

- Reinforced graphite cloth composite for reentry heat shielding of SNAP 27 isotopic heat sources, describing structure, thermal and mechanical properties and ablative characteristics 07 p1332 A70-18933
- Apollo lunar surface experiment package-SNAP 27 program, discussing mission profile, design and performance characteristics 22 p4071 A70-43194
- SNAP 27 thermoelectric generator for Apollo Lunar Surface Experiments Package [ALSEP/ 24 p4377 A70-46385

SNATCHING

- U SPACECRAFT RECOVERY

SNOW

- Localized numerical weather forecasts via interpolation from primitive equation model outputs, analyzing winter season results in terms of snow prediction 06 p1098 A70-18241
- Particle size distributions used in analyzing snow size spectra and radar reflectivity 11 p2004 A70-25651
- Potential gradient effect on charge separation mechanism during interaction of polarized snow crystals with ice sphere 15 p2769 A70-31445

SNOW COVER

- Meteorological satellites TV pictures processing for hydrological information, emphasizing snow photographs interpretation 14 p2601 A70-30138
- Snow field mapping with K band radar imagery determining signal return difference with surrounding terrain, noting role of volume scattering and old snow structure 14 p2578 A70-31238

SNOWPLOW EFFECT

- U PLASMA DYNAMICS

SOAPS

- Thin soap membranes shape determined by photogrammetric method, using stereo camera and fluorescent light 10 p1891 A70-24735

SOARING

- Favorable air mass type and season for long cross country soaring flights over eastern U.S. determined from record analysis 09 p1718 A70-23062
- Glider pilots flight above cloudstreets in clear sky, discussing situation for wave soaring over flat ground 10 p1805 A70-24583

SOCIAL FACTORS

- Psychosocial factors in myocardial infarction and sudden death, considering possible causes of fatal cardiac arrhythmia 04 p0635 A70-15462
- Research problems resulting from observational methods in social-psychological studies, discussing categorization systems and coding reliability 05 p0802 A70-16668
- Impression formation model extended to personality traits, noting curvilinear relationship between probability and liking ratings 05 p0803 A70-16670
- National Space Program relevance to human society, discussing solar system exploration, applications in meteorology, communication, etc 09 p1792 A70-22041
- Remote sensing and privacy rights, noting political and social trends toward privacy protection 10 p1971 A70-24744
- Communication satellite technology impacts on potential socio-economic developments of emerging nations of Asia, Africa and South America [AIAA PAPER 70-473] 11 p2152 A70-25426
- Global commercial communications satellite system arrangements, considering evolutionary political, economic and technological developments within INTELSAT context [AIAA PAPER 70-446] 11 p2152 A70-25478
- Elementary flight training study in Royal Netherlands Air Force for improving pilot selection, discussing instructor and social science roles 12 p2176 A70-27030
- Aerospace technology and system analysis application possibilities to urban social and economic planning problems 14 p2670 A70-31191
- Educational TV system via satellite, discussing social benefits for Spanish speaking countries in South America 23 p4285 A70-44602
- Wide-bodied and SST aircraft impact on airport design based on economic, social and environmental considerations [AIAA PAPER 70-1269] 24 p4323 A70-45970

SOCIAL ISOLATION

- Time sense in human subjects kept in caisson or cave isolation determined as function of upper brain stem paraconsciousness 01 p0041 A70-11474
- Cardiovascular system, neuromuscular activity and mental fitness of subjects performing physical and mental assignments with prescribed work-rest schedule during confinement 03 p0425 A70-13895
- Closed life support systems tests, describing effects of long term /one year/ confinement of three human subjects 04 p0641 A70-14565
- Sensory deprivation induced EEG changes, discussing duration effect on postisolation occipital alpha frequency 13 p2350 A70-29242
- Human operators psychological response to unforeseen information received during routine activity in prolonged solitary isolation 17 p3038 A70-35362

SOCIOLOGY

NT SOCIAL FACTORS

- Aeronautics and astronautics sociopolitical aspects, discussing German scientific and industrial organization, American-European technology gap, taxation for research, etc [DGLR-69-1] 04 p0788 A70-15181
- Systems analysis approach to problem solving, discussing application to sociological and educational considerations 17 p3130 A70-35297

SODALITE

- Sodalites color centers creation by electron beam, discussing application in dark trace cathode ray storage display tubes 19 p3379 A70-38048
- Inorganic photochromic and cathodochromic recording materials, examining transition metal doped strontium titanates, rare earth doped calcium fluorides and Fe or S doped sodalite 22 p4088 A70-43601

SODIUM

- NT LIQUID SODIUM

- H ion increased activity effect on sodium transport across short circuited turtle bladder 02 p0234 A70-11730
- Age data on high sodium tektites from Australia showing distinct fall 03 p0576 A70-14089
- Antarctic twilight Na emission abundance and concentration in lower E region, discussing meteor ablation models 05 p0836 A70-15819
- Na abundance in terrestrial upper atmosphere, solving steady state continuity and momentum equations for Na atoms and ions 05 p0840 A70-16475
- Dye laser tuned to sodium D line used for measuring ionospheric atomic sodium 08 p1492 A70-21757
- Sodium night airglow analyzed by Chapman mechanism, considering nocturnal intensity seasonal behavior and location in upper atmosphere 10 p1873 A70-23829
- Sodium balance effect on intrarenal distribution of blood flow in normal man determined with Xe washout method 10 p1810 A70-24005
- Atmospheric sodium concentration in twilight and daytime sky from D1 and D2 line intensities in twilight 13 p2399 A70-29239
- Systemic hypoxia effect on renal tubule sodium reabsorption in anesthetized mongrel dogs [AMRL-TR-69-135] 13 p2353 A70-29435
- Thermal and electrical resistances of Na at low temperatures measured by germanium thermometers and galvanometer amplifier 14 p2617 A70-31021
- Sodium dayglow seasonal and diurnal variations observed with Zeeman cell photometer 14 p2579 A70-31253
- Sodium and potassium dayglow seasonal and diurnal variations using resonance cell technique and sky polarization effect 14 p2580 A70-31263
- Na I 5889 A pressure broadening by high temperature neutral He, allowing damping constant direct measurements 18 p3318 A70-37013
- Closed coupled partial wave calculation of cross section for fine structure transitions in Na in collisions with He 19 p3372 A70-37541
- Sodium line in meteor spectrum, determining electron temperature and number of atoms as velocity and height function 19 p3514 A70-37600
- Atmospheric free Na atoms layer measurement during twilight and throughout night by laser radar 19 p3413 A70-37999
- Sodium behavior in young and old late type stars, examining relation to iron abundance in F, G and K dwarf and giant stars 21 p3887 A70-41114
- Nightglow Na-D lines excitation, attributing emission to Chapman mechanism 22 p4023 A70-43294
- Lethal and sublethal radiation dosage effects on cellular Na and K distribution in rat brain, liver, kidneys and muscular tissues 23 p4145 A70-44314
- High purity Be preparation by Kroll process using Na as reductant, noting mechanical properties and ease of conversion to powder 24 p4341 A70-45242

SODIUM ALLOYS

- High temperature gas turbine blades cooling by liquid Na-K alloy [ONERA-TP-872] 22 p4125 A70-43458

SODIUM CHLORIDES

- Q switched ruby laser light effect on absorption spectra of NaCl crystals 10 p1902 A70-25221
- Interstitial Cl molecule formation in NaCl lattice, computing strain field and energetics by energy minimization technique based on point ion lattice model 14 p2544 A70-30352
- Vaporization characteristics of solids for relationship between chemical bonding and sublimation mechanism emphasizing NaCl, CdS and GaAs 14 p2545 A70-30906

Polycrystalline NaCl-KCl solid solution alloy, considering high temperature creep under constant compression stress 16 p2961 A70-33275

SODIUM COMPOUNDS

NT SODIUM CHLORIDES

NT SODIUM IODIDES

NT SODIUM SILICATES

Ferroelectric sodium nitrite single crystals LF linear electro-optical coefficients as function of temperature 01 p0154 A70-10104

Oxygen uptake increase following sodium L-lactate isomer infusion into anesthetized dogs 02 p0233 A70-11721

NaLi molecular and ionic electronic states, discussing valence formulation, Hartree-Fock calculations, wave functions, excited state potential, etc 15 p2776 A70-31728

Sodium oxybutyrate effects on brain tissue oxidation during hypoxia in mice 15 p2686 A70-32851

Adiabatic microwave power meter design using sodium thiosulfate phase transformations 19 p3422 A70-37743

Ni base alloys sulfidation kinetics, examining roles of sodium/sulfur compounds-substrate interactions in accelerated oxidation 20 p3651 A70-40072

SOIL MAPPING

Soil characteristics influence on soil thermal regime related to thermal IR imagery and subsurface soil conditions 03 p0474 A70-13555

Photographic and IR multiband spectral discrimination for rock and soil mapping from orbiting ERTS satellites [AIAA PAPER 70-303] 09 p1668 A70-22882

Crop species and soil conditions identification from space by comparison of multivase and multiemulsion photography, assigning standard signature to optical fields 10 p1879 A70-24745

Geopedological features derivation from satellite measurements, discussing Nimbus 2 data and grid print maps 12 p2217 A70-26914

Engineering soils mapping by multispectral techniques, describing image interpretation by visual means, densitometric measurements and automatic spectral response classification 12 p2220 A70-26932

Soil characteristics determination from black and white, color and IR aerial photographs 14 p2577 A70-30980

Map making for Soviet soil fertilization, discussing map symbols and scale 19 p3407 A70-37275

SOIL MECHANICS

Ice nucleating properties of dust particles above 80 km compared with soil and AgI particles 01 p0081 A70-11296

Surveyor 7 lunar surface sampler, obtaining soil and rock data 04 p0752 A70-15064

Lunar surface mechanical properties from Surveyor spacecraft interactions with soil/exclusive of surface sampler/ 14 p2644 A70-31055

Apollo 11 lunar rock and soil mechanical behavior and physical characteristics, discussing color, specific gravity, density, shapes and adhesive and cohesive properties 21 p3913 A70-41646

Sand bed stability under shear flow of low Froude number 24 p4330 A70-45980

SOIL SCIENCE

Nitrification reactions in soil with constant ammonium solution entry rate and nitrifying organisms, considering ion concentrations as functions of time and distance 02 p0252 A70-12518

Photoelectric polarimetry of samples of lunar maria, terra, lavas and chemicals for wavelength dependence

of polarization, comparing to Mercury, Mars and asteroids 03 p0576 A70-14082

Remote sensor capability in land use, urban and soil moisture analysis data acquired by NASA Earth Resources Program [AAS PAPER 69-575] 04 p0676 A70-14641

Aerial photographs interpretation methodology based on soil sciences taking into consideration reference level of photointerpreter 07 p1284 A70-19778

Ground wave electric field intensity prediction model in EMC applications, discussing soil conditions and polarization effects 07 p1336 A70-20217

Geopedological features derivation from satellite measurements, discussing Nimbus 2 data and grid print maps 12 p2217 A70-26914

Dipole and monopole antenna radiation patterns, considering effects of soil conductivity and elevation above ground 12 p2199 A70-27979

Cotton plant leaves from high saline soil area, observing chlorophyll content on color photographs 14 p2576 A70-30977

Visual reflectance of wet soils, attributing darkening to internal reflection of radiation in water layer enveloping soil particles 14 p2577 A70-31236

Sampling error origin and magnitude during soil temperature measurements, noting dependence on weather character and season 15 p2731 A70-32459

Martian soil thermal conditions at south pole, considering polar cap annual variations and carbon dioxide sublimation 15 p2802 A70-32492

Lunar soil characteristics, analyzing sample from Apollo 11 mission 18 p3316 A70-36892

Assay procedures for extraction and determination of N-acetylglucosamine in soil 18 p3226 A70-36959

Physical model of lunar soil prior to Apollo 11 landing, discussing meteoritic shock formation of powdery soil 18 p3320 A70-37080

Apollo 11 and 12 results tabulated for soil packing characteristics, composition and rare gas analysis data 18 p3332 A70-37223

P32 labeled organic phosphate esters in water extracts of soil 20 p3615 A70-38979

Soil science and climatology in Central Europe archeological site location by aerial photography 21 p3826 A70-41402

Tranquility Base lunar soil origin, establishing component nature, size distribution, density, mineralogy, constructional or destructional history 21 p3897 A70-41519

Lunar soil sample preparation and monitoring for viable microorganisms presence 22 p3978 A70-42973

Low friction seal for axial loading piston in triaxial soil testing cells 23 p4199 A70-43873

Martian soil thermal conditions, considering polar cap annual variations and carbon dioxide sublimation 23 p4240 A70-43914

SOILS

NT CLAYS

NT LUNAR DUST

NT LUNAR SOIL

NT SANDS

Soil characteristics influence on soil thermal regime related to thermal IR imagery and subsurface soil conditions 03 p0474 A70-13555

Martian soil surface anomalies observed from polarimetric analysis of light diffused by Hellas region 10 p1943 A70-24708

Visible polarization signature for remote sensing of soil surface moisture, noting invariance to partial shadowing in plowed or rough soils 15 p2724 A70-31667

Radar and DC pulse signatures of multiple reflection from dry, damp and wet earth for vertical and horizontal polarization 16 p2861 A70-32977

Ecological potentials in spectral signature analysis, using laboratory leaf and soil spectral reflectance data 17 p3078 A70-35612

SOLAR ACTIVITY

NT FACULAE

NT SOLAR FLARES

NT SOLAR PROMINENCES

NT SOLAR STORMS

NT SPICULES

NT SUNSPOTS

Interplanetary space investigation by HEOS 1 satellite during maximum solar activity, discussing orbital apogee, mission and technical requirements 01 p0186 A70-11113

- Jacchia 1965 model discrepancies in solar and geomagnetic activity and semiannual effects observed in satellite drag measurements at 150-200 km and 700-1500 km
01 p0077 A70-11204
- Solar activity indices and upper atmospheric density interrelationship from Explorer 1 satellite observations, showing statistical variations
02 p0356 A70-11762
- Data collection for ionospheric disturbances, geomagnetic field, radio wave intensity, cosmic rays and solar activity
02 p0290 A70-12125
- F region irregularity drift, morphology and generation in magnetosphere, discussing ionospheric structure at different latitudes and solar activity association
02 p0293 A70-12572
- Electron gyrofrequencies computed from split pair bursts in 1966 compared with results from type II bursts in 1967
04 p0738 A70-14510
- Long range solar flare forecasting noting correlation between planetary conjunctions and proton events [AAS PAPER 69-624]
04 p0740 A70-14658
- Forbush effect on intensity of neutron component of cosmic rays during quiet sun period
05 p0897 A70-15795
- Solar and geomagnetic activity daily parameters persistence, discussing autocorrelation function, variance spectra, sunspot numbers, radiation flux, etc
05 p0906 A70-15877
- Solar particle events 1966 /August-September/ in McMath region 8461
05 p0901 A70-16426
- Solar activity centers life history in terms of radio emission and Ca plage intensity, noting radio emission decay faster than plage intensity
05 p0911 A70-16440
- IQSY 27-day recurrence sequence for 1964 solar and terrestrial activity, considering geomagnetic, auroral and ionospheric disturbances correlation with plage
05 p0841 A70-16646
- Solar activity study based on solar X ray spectra observation, considering flare mechanism
05 p0903 A70-16719
- Flares and fast processes interrelation with active region stationary filaments, filament field magnetic envelope explosion stimulation of surges, plasma stream ascents, etc
05 p0904 A70-16910
- Periodicities in solar activity variation from correlation spectral analysis, establishing monotonically decreasing component and secular variations in activity
05 p0918 A70-16913
- NASA solar particle alert network /SPAN/ operated by Manned Spacecraft Center giving 24 hr coverage of solar activity at optical and radio frequencies
06 p1029 A70-18013
- Solar activity model for simulating scheduling of observation experiments for Apollo Telescope Mount missions [AIAA PAPER 70-32]
06 p1145 A70-18121
- Horizontal ionospheric drift over Northern Hemisphere during low solar activity, studying spatiotemporal distribution patterns of drift parameters
07 p1266 A70-19438
- East-west dissymmetry in solar activity center births for solar cycles XII-XIX, noting independence of latitude and invariance throughout last eight cycles
08 p1567 A70-20599
- Contraction and expansion in solar region producing synchrotron emission of relativistic electrons to explain solar burst behavior
08 p1560 A70-20841
- Solar meter wave emissions enhancement or emission centers, comparing radio and optical coronal enhancements
08 p1576 A70-21402
- Corona green /5303 A/ and red /6374 A/ lines during minimum solar activity in 1964, discussing N-S and E-W asymmetries and intensities
09 p1750 A70-22100
- Solar activity forecasting using normalized sunspot curves deduced from 200 years of observations, discussing parameters of running 11 year cycle
10 p1949 A70-25287
- Solar active regions in chromosphere and corona observed by EUV spectroheliometer aboard OSO-4 spacecraft, discussing ion formation and temperatures
12 p2303 A70-27705
- Toroidal solar field emergence to surface forming magnetic field of active region
13 p2493 A70-29392
- Electron density, characteristic dimensions and vertical density gradient of coronal enhancements in white light, observing elliptical cross section
13 p2479 A70-30004
- Solar activity predictions for earth upper atmosphere models emphasizing linear repression method
14 p2638 A70-30565
- Planetary tidal force effect on solar activity cycle, showing amplitude proportionality to solar and gravity center deviation
14 p2649 A70-31199
- Solar activity during Proton Flare Project Retrospective Interval 1969, discussing empirical flare forecasting methods
15 p2794 A70-32292
- Orbiting solar telescope design for solar disturbances location and monitoring in H alpha line
16 p2907 A70-33188
- Type 3 solar bursts classification, measuring diameter, lifetime and position
17 p3151 A70-35581
- Horizontal ionospheric drift over Northern Hemisphere during low solar activity, studying spatiotemporal distribution patterns of drift parameters
18 p3249 A70-36912
- Wolf numbers monthly fluctuations, giving histogram of fluctuation amplitude distribution
18 p3323 A70-37137
- Interrelated satellite observations related to solar events - ESRO Conference, Noordwijk, Netherlands, September 1969
19 p3491 A70-37471
- ESRO-1, ESRO-2 and HEOS-1 simultaneous observation of solar event of 25 February 1969, describing satellite and experiments
19 p3531 A70-37496
- Whistler density variability correlated with solar activity during IQSY
19 p3462 A70-37924
- Temperature and radio brightness distributions in active regions and upper chromosphere during minimum activity periods
19 p3522 A70-38557
- Solar radio flux variations prediction for various activity levels based on random functions theory
19 p3522 A70-38558
- Solar radio emission flux as activity index, analyzing permissible deviations from recommended wavelength
19 p3522 A70-38559
- Soviet papers on solar activity covering solar stations, flares, coronal data, etc
20 p3699 A70-39460
- Supergranular network time and shape changes, examining correlations with solar rotation, activity and cycles
21 p3885 A70-40954
- Solar active regions at millimeter wavelengths, discussing brightness temperature, background radiation, electron density, optical thickness, polarization and chromospheric magnetic fields
21 p3886 A70-40960
- Solar active region radio spectrum during 12 November 1966 eclipse, discussing flux, magnetic field effects, temperature and electron density
21 p3886 A70-40961
- Solar X-ray spectra of active regions, examining emission lines, fluxes electron temperature and density and transitions
21 p3879 A70-40963
- Oso-4 far UV observations of solar chromosphere and corona active regions
21 p3925 A70-42187
- Solar optical and radio activity observation in 1968, noting optical-radio data correlation
22 p4095 A70-43259
- Solar X-ray data from rocket and satellites, discussing hot dense plasmas and correlation with H alpha flares, calcium plages and microwave emission
22 p4096 A70-43300
- Geomagnetic Sq variation examination, using field expansion into natural orthogonal component series
23 p4188 A70-44063
- Quiet sun and new moon brightness temperature measurements at 3.3 and 5.7 mm wavelengths, giving radiometric maps
23 p4241 A70-44254
- Sunspot number prediction from solar cycles statistical analysis
23 p4254 A70-44902
- Solar activity research, discussing optical facilities, photoelectric magnetographs, magnetic field measurement, solar cycles and flares, etc
23 p4256 A70-45034
- Solar VHF radio spectra indicating type 4 burst activity associated with type 3 formation
24 p4401 A70-45318
- Mm wavelength radiometer for recording solar activity and radiation attenuation in atmosphere as function of time
24 p4315 A70-46236
- SOLAR ACTIVITY EFFECTS**
- Hypothetical magnetic configurations in presence of Coriolis forces from convective cell hydromagnetic activity in solar plasma, considering dynamos with increasing magnetic field
01 p0173 A70-10133
- Upper atmosphere temperature lag behind solar decimeter flux 27 day variation maximum attributed to varying solar EUV heating
01 p0070 A70-10404
- Underground and surface telescope measurements of second harmonic of primary cosmic ray daily variation and upper solar modulation limit
01 p0170 A70-10405
- Geomagnetic micropulsations relation to magnetospheric boundary location on sun-earth line, noting influence of solar wind pressure variations
01 p0071 A70-10412
- Hydrodynamic explanation of upper atmosphere perturbation effects on tropospheric circulation, discussing experiments for solar activity effects on atmospheric dynamics
01 p0073 A70-10582
- Atmospheric density variations during solar maximum and minimum, discussing solar corpuscular stream and EUV radiation
01 p0075 A70-10594
- Sq data acquisition and analysis, noting automatic standard observatories using nuclear magnetometers and ionospheric current information from instrumented rockets
01 p0075 A70-10597
- Polar magnetic disturbances during IQSY characterized by SP field superposed on Sq field generated by ionospheric dynamo
01 p0075 A70-10599
- Regular/irregular micropulsations variations during solar cycle, noting possible magnetospheric contraction and solar wind velocity influence
01 p0075 A70-10600
- Atmospheric density variations in thermosphere determined from braking satellite data, discussing correlation with solar activity and temperature variations
01 p0077 A70-11202
- Exospheric temperature variations by Thompson scatter technique, considering solar and geomagnetic activity effects
01 p0078 A70-11209
- Spread F echoes occurrence variations over solar cycle, observing range and frequency splitting type during maximum and minimum sunspot years
01 p0080 A70-11222
- Mariner 2 measurements of geomagnetic field and interplanetary plasma parameters, analyzing interaction between interplanetary medium and magnetosphere during decreased solar activity
01 p0192 A70-11520
- Ionospheric discontinuities drift velocities from diversity reception data indicating no dependence on solar activity
01 p0083 A70-11531
- Geomagnetic micropulsations fluctuations during solar activity cycle showing changes in excitation frequency with change in corpuscular fluxes parameters
01 p0083 A70-11539
- F 2 layer state prediction as function of solar activity by series expansion for describing space-time variations of monthly F 2 medians critical frequencies
01 p0083 A70-11547
- Geomagnetic field pulsations frequency changes in relation to geomagnetic and solar activity level
01 p0084 A70-11559
- Hydrodynamic approximation to interplanetary gas motion influenced by solar flare caused perturbations
01 p0192 A70-11586
- Transient Faraday rotation of S-band telemetry carrier observed during Pioneer 6 occultation by solar corona, correlating with decametric solar radio bursts
02 p0369 A70-12059
- Pioneer 6 radio signal spectrograms during solar occultation, noting solar event effects on bandwidth
02 p0369 A70-12060
- Balloon measurements of cosmic ray alpha particle flux in upper atmosphere over Japan to obtain solar modulation effects data
02 p0357 A70-12122
- Cosmic ray protons, He nuclei and electrons solar modulation by betatron deceleration mechanism during interplanetary space passage
02 p0357 A70-12123
- Solar eclipse effects in equatorial F region electron density, noting data analysis method for reexamining existing measurements
02 p0290 A70-12157
- Solar activity effect on ionospheric total electron content via Explorer 22 observations, discussing relationship to solar elevation angle
02 p0292 A70-12561
- Solar phenomena effect on VHF communications between synchronous satellite relay and earth ground stations
02 p0259 A70-12566
- Corpuscular sources geoeffectiveness related to position on solar disk at maximum flare activity
03 p0569 A70-13359
- Visible solar hemisphere circumstances for 28 January 1967 and ground level cosmic rays enhancement not preceded by intense H alpha flares
03 p0558 A70-13590
- Pressure changes in troposphere and lower stratosphere after strong solar flares analyzed statistically for Northern Hemisphere
03 p0476 A70-13909

Secular variation in F region ionization response to sunspot number, noting dominant component as cosine term equal to four sunspot cycles

04 p0678 A70-14972

Solar flare duration effect on propagation and modification of forward-reverse shock pair between sun and 1 AU, using equations of motion for spherically symmetric flow

04 p0740 A70-15104

Hysteresis effect on cosmic ray modulation and gradient ionization near solar minimum from measurements made near earth with OGO 1 and 3 ion chambers

04 p0740 A70-15106

Solar and geomagnetic effects on variations in physiological tests using alimentary reflex of dogs

04 p0639 A70-15512

Tropospheric periodic responses to chromospheric flares, analyzing stations atmospheric pressure power spectra

04 p0742 A70-15524

Magnetic storms frequency and levels coincidence with solar activity variations

04 p0682 A70-15734

Diurnal fluctuations of quiet F 2 region intensity at midlatitude based on vertical probe observations during solar activity minimum

04 p0684 A70-15745

Cosmic rays neutron component solar-diurnal variations as function of solar activity using magnetically quiet data

05 p0898 A70-15941

Geophysical-solar phenomenological interrelationships, considering earth rotation and nutation, sunspot area, earthquake energy, etc

06 p1056 A70-17636

Nighttime radio wave absorption in ionosphere during moderate solar activity based on echo observations

06 p1056 A70-17840

Solar asymmetries associated with sun motion toward apex related to formation of N-S asymmetries of geomagnetic storms

06 p1144 A70-18011

Spatial properties of solar wind during maximum and minimum activity inferred from sodium D-line emissions for cometary nuclei

06 p1136 A70-18012

Space forecasting system to predict solar radiation bursts and effects on earth

06 p1136 A70-18023

Spectral characteristics of B and S components of solar radio emission from statistical data, investigating dependence on 11-yr cycle and minimum solar activity

07 p1378 A70-19031

Polarization and absorption of radio waves in ionosphere using Appleton-Hartree equations, calculating LUF as function of sunspot number

07 p1229 A70-19160

Field strength predictions for expected returns from backscatter ionospheric soundings, predicting ionospheric propagation modes and losses during sunspot minimum

07 p1229 A70-19161

LOF observations of long distance transequatorial step frequency radio circuits in Pacific Area during sunspot minimum period

07 p1232 A70-19174

Midlatitude F 2 perturbations from vertical sounding stations data during solar activity minimum, discussing F 2 region critical frequency variation

07 p1266 A70-19450

F 2 small scale inhomogeneities drift relation to current systems of dynamo region, discussing solar activity effects on ionospheric conductivity

07 p1267 A70-19452

Ionospheric radio wave absorption and geomagnetic perturbations correlated with solar activity variations

07 p1267 A70-19457

Electron production in lower ionosphere by solar cosmic rays, calculating rates by computer as function of nuclear charge number, energy spectrum and height

07 p1373 A70-20348

Geomagnetic storms data compilation (1957-1964), showing solar activity effect on solar corpuscular stream velocity

07 p1373 A70-20436

Solar modulation of low energy galactic cosmic ray protons, proposing diffusion-convection model with time dependent diffusion coefficient

08 p1561 A70-20906

E layer atmospheric circulation model for meteor zone, noting solar thermal radiation role

08 p1575 A70-21215

Hypothetical magnetic configurations in presence of Coriolis forces from convective cell hydromagnetic activity in solar plasma, considering dynamos with increasing magnetic field

08 p1576 A70-21409

Atmospheric regions interactions concerning stratosphere, mesosphere, troposphere, etc, noting solar activity effects

08 p1490 A70-21428

Diurnal vertical shifts of constant electron concentration levels in D region, considering effects of chromosphere, nuclear explosions, solar eclipses, etc

08 p1490 A70-21430

Solar wind and Venus topside ionosphere interaction, discussing charged particle density, temperature and pressure distribution

08 p1578 A70-21550

Solar continually changing features / brightenings, darkenings, condensations and groupings/ associated with solar activity, emphasizing sunspot number formulas

09 p1751 A70-22197

Solar activity analysis emphasizing sunspots, magnetic disturbances and bursts data

09 p1752 A70-22199

Cosmic ray intensity variation correlated with amplitude changes in 27 day variation during solar cycle 18

09 p1745 A70-22740

Solar wind magnitude and variability effects on geomagnetic activity and cosmic ray intensity modulation from satellite observations

09 p1745 A70-23272

Solar corpuscular streams effect on meteoric particles behavior in circular orbit around sun, determining lifetime on basis of mass loss due to pulverization

09 p1763 A70-23382

Soviet book on solar activity influence on earth natural processes covering atmospheric circulation and pressure, air temperature, precipitations and hydrological changes

09 p1719 A70-23471

Predawn enhancement morphology and variations of 6300 A airglow, discussing solar declination and activity effect

10 p1873 A70-23831

Neutral atomic oxygen auroral and nebular emissions in twilight airglow, suggesting photodissociation of molecules by sunlight

10 p1873 A70-23832

Cosmic ray particle abundance in upper atmosphere during minimum solar activity estimated by nuclear photographic emulsions on balloon flight

10 p1932 A70-24438

Daily horizontal intensity spectrum for equatorial observatories, computing power densities near 27 day variation during high, moderate and low solar activity

10 p1875 A70-24440

Geomagnetic field secular variation and cyclic components amplitudes separation by digital filters, observing seasonal and solar activity effects

10 p1880 A70-24808

Seasonal changes in thermospheric composition in middle latitudes, investigating molecular oxygen density and solar activity effects

10 p1881 A70-24817

Midlatitude sporadic E layer critical frequencies dependence on solar activity using vertical ionospheric sounding data, observing ionization correlation

10 p1882 A70-25197

Cosmic layer in lower ionosphere investigated by 164 kHz frequency absorption at night, discussing solar activity effects

10 p1934 A70-25198

Nocturnal E layer electron density profile dependence on solar activity

10 p1885 A70-25265

Nocturnal F layer electron density profile and temperature dependence on solar activity

10 p1885 A70-25266

Air and solar activity electrical parameters relationship, observing ionizing radiation increase in upper atmosphere during solar activity

10 p1885 A70-25268

Ionospheric waves positive phases and disturbances related to solar activity variations and cosmic ray modulations

10 p1885 A70-25270

Dawn chorus frequency relation to solar activity, showing correlation to mean geomagnetic activity

10 p1886 A70-25282

F 2 layer midday ionization level annual variation gradient, noting gradient latitudinal distribution dependence on solar activity level

11 p2042 A70-25532

F 2 layer critical frequencies rms deviations approximate dependences on latitude and solar activity for computer calculation of long-range ionospheric forecasts

11 p2043 A70-25549

Sun effect on anomalous frequency shift in 21 cm absorption spectrum in Taurus A

11 p2108 A70-25659

Solar active centers interaction effects on spot growth and proper motion

11 p2109 A70-25743

Mars upper atmosphere semiempirical model, reducing density uncertainties by allowing for solar cyclic variations

11 p2111 A70-26031

Energy spectra and composition of heavy nuclei in primary cosmic rays during low solar activity by nuclear emulsion stacks exposure in balloon flights

11 p2105 A70-26295

Corpuscular sources geoeffectiveness related to position on solar disk at maximum flare activity

11 p2118 A70-26724

Ozonosphere heating between 20-60 km during high solar activity, determining positive heating rate gradient directions and maximum heating altitude

12 p2223 A70-27514

Solar and lunar daily geomagnetic variations, correcting harmonic components calculated values

12 p2303 A70-27673

Long term ionospheric absorption measurements in Japan from IGY through IQSY using A1 method, discussing annual and diurnal variations correlation with solar activity

12 p2226 A70-28059

Long term ionospheric absorption measurements in Northern Hemisphere from IGY through IQSY, discussing annual and diurnal variations correlation with solar activity

12 p2226 A70-28060

Interplanetary magnetic field intensity and geomagnetic activity level correlation with 27-day solar activity cycle based on Venera 4 and Mariner 5 data comparison

12 p2310 A70-28263

Low latitude atmospheric vertical density variations, comparing solar and geomagnetic activities effects

12 p2227 A70-28264

Solar activity effects on midlatitude upper atmosphere corpuscular radiation intensity via rocket sounding

12 p2296 A70-28266

Soviet book on solar short wave radiation effects on ionosphere, covering solar atmosphere and spectra, ionospheric ion concentration vertical distribution, etc

13 p2487 A70-28649

Oxygen 18 concentration in Greenland ice core correlation to solar activity index, indicating earth temperature control by solar activity

13 p2489 A70-28909

Solar flare proton induced radioactivity in Apollo 11 lunar surface material compared with stony meteorite data, noting cobalt 56 concentration

13 p2489 A70-28910

Pc-periods dependence on geomagnetic latitude during active sun years, using IGY data

13 p2395 A70-28943

Visual aurora properties attributed to magnetic storm following solar flare, using multiple channel photometer measurements

13 p2478 A70-29231

Solar wind effect on structure of magnetic field in magnetosphere and interplanetary space, noting interaction with moon

13 p2498 A70-30051

Inclined backscatter sounding of ionosphere in individual channels of multichannel radio link, analyzing data during minimum solar activity

14 p2547 A70-30149

Subpolar ionosphere electron concentration measurements for both hemispheres during solar activity by Faraday effect signal recordings from satellites

14 p2570 A70-30223

Solar activity variations effects on equation parameters, describing nighttime F2 ionization levels dependence on geographical latitude

14 p2570 A70-30224

Geomagnetic field influence on annual F 2 layer longitudinal ionization at midlatitudes, relating solar activity level

14 p2570 A70-30225

Geomagnetic storm intensity nonuniform relationship to 27 day and 11 year cycles

14 p2571 A70-30240

Book on thermal and gravitational atmospheric tides covering solar oscillations, lunar air tides, upper air data, ozone radiation absorption, etc

14 p2573 A70-30633

Lunar tide in ionospheric D region absorption near magnetic equator, noting annual variation relationship to sunspots

14 p2574 A70-30747

Carbon and sulfur reactions with solar hydrogen atoms in Apollo 11 lunar samples accounting for isotopic composition of fine-grained basaltic rocks

14 p2545 A70-30791

Magnetic storms frequency and levels coincidence with solar activity variations

14 p2575 A70-30818

Diurnal fluctuations of quiet F 2 region intensity at midlatitude based on vertical probe observations during solar activity minimum

14 p2576 A70-30829

Jupiter decimeter radiation long term variations from flux density measurements, suggesting correlation with solar activity

14 p2648 A70-31087

Solar Monitoring Experiment program, observing solar activity relation to large enhancements of lower stratosphere secondary radiation

15 p2792 A70-31656

Magnetospheric protons and electron energy spectra time and magnetic activity dependence during solar maximum

15 p2792 A70-31671

Atmospheric density near 180 km /1968-1969/ from orbit of satellite 1967-31A /ATS 2/, noting weak dependence on solar activity and correlations to geomagnetic disturbances

15 p2724 A70-31680

Superposed effects in solar quiet daily variations of geomagnetic horizontal component, using Lerwick and Eskdalemuir data

15 p2728 A70-31991

F 2 layer afternoon and evening ionization maxima dependence on season, zenith angle and solar activity

15 p2730 A70-32084

F 1 layer formation and ion production rates related to F layer stratification, atomic oxygen, zenith angle and solar activity periods

15 p2730 A70-32086

Proton Flare Project 1969, reporting synoptic observations of sun and solar terrestrial effects

15 p2794 A70-32291

Polar cap disturbance of 7 June 1969 due to small proton enhancement, describing detection by trans-polar VLF phase measurement

15 p2794 A70-32295

Solar Proton Flare Project 1969, summarizing observations and solar activity-terrestrial event correlation for June retrospective interval

15 p2794 A70-32296

Negative sudden phase anomaly /SPA/ in VLF radio transmission, noting solar X ray flux intensity and zenith angle effects

15 p2699 A70-32297

Atmospheric transmission variability related to solar constant variations

15 p2801 A70-32371

Galactic cosmic rays eleven year modulation, determining modulating region L depth from dynamical phase lag between changes in cosmic ray intensity and solar activity

17 p3150 A70-34833

Ionospheric E layer formation, investigating role of solar X ray control by electron production rate and density calculations

17 p3151 A70-34943

Radio sources angular broadening by solar wind turbulence used for solar corona probe

18 p3311 A70-36003

Ionospheric cosmic noise absorption diurnal and seasonal variations at Alma-Ata during IQSY, noting chromospheric flares effects

18 p3306 A70-36089

Electric fields in lower ionosphere during solar activity minimum above magnetic equator, using vertical profiles of ionospheric current magnetic fields and electron concentration

18 p3246 A70-36098

Ionospheric radio wave absorption measurements, noting winter anomaly during maximum solar activity year

18 p3227 A70-36101

Periodic cosmic ray variations near Southern magnetic pole related to chromospheric flares

18 p3307 A70-36102

Vertical secondary cosmic gamma spectra from primary nucleon and electron spectra, discussing effects of solar cycle and geomagnetic cut-off

18 p3308 A70-36500

Midlatitude F 2 perturbations from vertical sounding stations data during solar activity minimum, discussing F 2 region critical frequency variation

18 p3249 A70-36924

F 2 small scale inhomogeneities diff relation to current systems of dynamo region, discussing solar activity effects on ionospheric conductivity

18 p3249 A70-36926

Ionospheric radio wave absorption and geomagnetic perturbations correlated with solar activity variations

18 p3250 A70-36931

Residual solar modulation of relativistic cosmic ray nuclei in galaxy over eleven years, observing magnitude at solar activity minima

18 p3309 A70-37009

Electron temperature in 500-1000 km range during minimum solar activity based on Alouette satellite data and atmospheric model, observing latitudinal variation

18 p3254 A70-37029

F 1 layer occurrence probability as function of mean monthly WU numbers at midlatitudes, noting solar activity effect

18 p3254 A70-37032

Ionization-recombination parameters variation as function of season and solar activity, using diurnal changes of F 2 layer maximum electron concentration

18 p3254 A70-37034

Solar activity sudden perturbations effect on earth pressure field and atmospheric circulation

19 p3460 A70-37315

Ionization rate experimental profiles during maximum solar activity compared with calculations, showing additional source of ionization in E region

19 p3409 A70-37322

Global diurnal variations in F 2 layer seasonal anomaly during high and low solar activity, noting corpuscular radiation role

19 p3491 A70-37326

Vertical electron density profile variations during ionospheric perturbations in years of solar activity maximum and minimum

19 p3409 A70-37328

Solar flares associated interplanetary and terrestrial phenomena by satellite, space probe and rocket observation, investigating solar wind disturbances, geomagnetic storms, ionospheric effects, etc

19 p3493 A70-37472

Solar wind disturbances associated with solar activity observed by spacecraft probing interplanetary space, considering geomagnetic activity classes

19 p3494 A70-37478

Trapped particle population changes associated with solar events, discussing solar wind discontinuity effects on magnetosphere

19 p3495 A70-37487

Interplanetary magnetic field measurements by Pioneer 8 during 25 February 1969 solar activity, discussing geomagnetic storms, cosmic rays, shock fronts and ionospheric disturbances

19 p3513 A70-37501

Energetic storm particle events observation, noting association with solar protons and interplanetary shock waves

19 p3496 A70-37518

ESRO 1 satellite and ground observations of energetic auroral electrons angular distribution during solar event, using Geiger counters

19 p3412 A70-37519

Cosmic ray electron and positron differential energy spectra during solar quiet times from OGO- 5 satellite observations in interplanetary space

19 p3502 A70-38096

Quiet time intensity increases and long term solar modulation of interplanetary low energy electrons, using IMP observations

19 p3502 A70-38097

Cosmic ray positrons and negatrons differential energy spectra and solar modulation, using balloon-borne magnetic spectrometer

19 p3503 A70-38100

Cosmic ray positrons and negatrons differential intensities near north geomagnetic pole from balloon flight measurements, noting solar modulation effects

19 p3503 A70-38102

Pc-1 pulsations during solar activity maximum and minimum, discussing diurnal, seasonal and cyclic variations

19 p3416 A70-38586

Solar UV radiation contributing to ionization in higher ionospheric layer over Dushanbe during partial solar eclipse of 20 May 1966

19 p3417 A70-38786

Solar eclipse effects on E and F layers, discussing photoionization rate, electron density and temperature, plasma diffusion, electric fields, etc

19 p3418 A70-38903

Annular solar eclipse of 20 May 1966 effects on ionosphere, discussing regions virtual heights, critical frequency variations, ion production rates, etc

19 p3419 A70-38917

Soviet papers on relations between earth troposphere phenomena and solar activity covering geomagnetic and stratosphere perturbations, warmings and circulation, solar cycles, etc

20 p3618 A70-39181

Explosive and diffuse stratospheric warmings over Arctic attributed to solar activity and stratospheric circulation

20 p3618 A70-39184

Polar stratospheric winter explosive warmings correlated with solar high energy charged particles injections

20 p3618 A70-39185

Solar activity effects on Northern Hemisphere atmospheric temperature, mapping gradients for 11 year solar cycle

20 p3662 A70-39188

Twenty two year solar activity cycle effect on earth climate, plotting odd and even 11 year cycle curves for pressure and temperature

20 p3662 A70-39189

Solar activity effects on mean anomalies in repeatability of types of atmospheric circulation epochs and stages

20 p3662 A70-39190

Primary cosmic ray intensity variation during solar activity half cycle, expressing diffusion coefficient as function of sunspot group number

20 p3696 A70-39279

Cosmic ray 27 day variations during solar activity minimum, noting unipolar magnetic regions role

20 p3696 A70-39280

Cosmic ray intensity decreases and Forbush effects energy spectra during various solar activity periods

20 p3696 A70-39281

Midlatitude atmospheric neutron density height dependence during minimum solar activity

20 p3697 A70-39285

Cosmic ray neutron semidiurnal variations day and night components with respect to geomagnetic and solar activity

20 p3697 A70-39288

Cosmic ray intensity variation during maximum meteor showers periods detected on earth, noting relationship to solar activity

20 p3697 A70-39294

Lyman alpha geocoronal emission rate as function of altitude at midnight during solar minimum, solving radiative transfer equations

20 p3619 A70-39329

Neutral atmosphere continuity equation of ionization and equation of motion in F 2 region for different seasons in various solar activity epochs

20 p3623 A70-40478

Solar activity effects on ionospheric total electron content seasonal variations over Tortosa, using BE-B satellite data

20 p3624 A70-40482

Lower ionospheric structure and electromagnetic resonance phenomena, describing radio equipment for solar activity effects studies

21 p3812 A70-40620

Anomalous nighttime ionospheric total electron content increases seasonal and solar cycle dependences attributed to ionization sources due to electrodynamic drifts

21 p3815 A70-41061

Atmospheric neutron flux increase during solar proton event, measuring flux and energy spectrum of particles by balloon sounding

21 p3881 A70-41076

Solar wind free electron number density measurement by Pioneer 6 spacecraft after solar proton flare, constructing plasma cloud models

21 p3881 A70-41079

Pc 1 geomagnetic micropulsation statistics for middle latitudes, discussing solar cycle and annual variations in occurrence rates

21 p3817 A70-41088

F 2 layer midday ionization level annual variation gradient, noting gradient latitudinal distribution dependence on solar activity level

21 p3819 A70-41282

F 2 layer critical frequencies rms deviations approximate dependences on latitude and solar activity for computer calculation of long-range ionospheric forecasts

21 p3819 A70-41299

Optical solar observatory for investigation of solar activity and impact on earth environment, discussing site selection and equipment

22 p4005 A70-42349

Solar wind properties correlated with geomagnetic activity, discussing interplanetary discontinuities, shock waves, flare associated disturbances and geomagnetic activity sequences

22 p4022 A70-43288

Solar and geomagnetic events for maximum solar activity year 1968, correlating magnetic storms

22 p4022 A70-43290

E region winds response to solar radiation variations, including geomagnetism role

23 p4186 A70-43848

Cosmic ray 11-year variation pattern change in 19th and 20th solar activity cycles determined by latitude expeditions spectrum analysis

23 p4237 A70-44071

E region additional ionization source during solar activity maximum, analyzing ion production function and electron concentration

23 p4190 A70-44077

Jupiter flux density changes at 2695 MHz correlated with 10.7 cm solar activity, suggesting magnetic anomaly explanation

23 p4246 A70-44751

Lyman alpha radiation scattering intensity during solar radiation period, discussing dependence of interstellar hydrogen density in interplanetary space on solar EUV

23 p4237 A70-44753

Solar flare effects in ionosphere observed at Lindau, collating with heavy geomagnetic storm

23 p4237 A70-44876

Jupiter red spot darkness parameter and solar activity as clue to Jupiter-solar relationship

24 p4402 A70-45391

Solar corpuscular flux and visible solar spot area correlation with geomagnetic planetary index for 27-day intervals, considering relationship to earth satellites motion

24 p4408 A70-45547

Echo 1 satellite orbital acceleration correlated with solar activity, determining atmospheric density from drag observations using PERLO computer program

24 p4408 A70-45552

Cosmic ray electrons solar modulation, considering diffusion-convection theory

24 p4397 A70-45769

Subpolar ionosphere electron concentration measurements for both hemispheres during solar activity by Faraday effect signal recordings from satellites

24 p4331 A70-46298

Solar activity variations effects on equation parameters, describing noontime F 2 ionization levels dependence on geographical latitude

24 p4331 A70-46299

- Geomagnetic field influence on annual F 2 layer longitudinal ionization at midlatitudes, relating solar activity level 24 p4331 A70-46300
- Geomagnetic storm intensity nonuniform relationship to 27 day and 11 year cycles 24 p4332 A70-46315
- ### SOLAR ATMOSPHERE
- Velocity distribution and optical depth of line formation in solar atmosphere using blue and red wing filtergram and numerical experiment 01 p0175 A70-10241
- Angular momentum conservations for solar gas confined by closed field lines or outflowing along open magnetic field lines 01 p0176 A70-10251
- MHD model for microwave solar circular polarization bursts interpretation, suggesting Alfvén wave disturbances in solar atmosphere 01 p0168 A70-10254
- Coarse structure of solar atmosphere from observations of quiet sun, discussing contradictions with existing models 03 p0570 A70-13592
- One dimensional magnetograph scans studying photospheric velocity oscillations and supergranulation, noting downward flows coincident with chromospheric network 03 p0570 A70-13593
- Zeeman-split Fraunhofer line profiles for pure absorption lines determined taking into account solar atmosphere elliptical birefringence 03 p0570 A70-13595
- Solar photospheric Fe abundance determined from IR supermultiplet line spectra, considering LTE effects 04 p0749 A70-14597
- Heat transport conduction mode and earth as heat sink in solar atmosphere, discussing mesopause coldest region, turbulence and solar plasma-earth electromagnetic interactions 04 p0677 A70-14644
- Solar atmospheric structure near sunspots by spectrophotometry, presenting observational and theoretical sunspot magnetic and velocity field data 04 p0754 A70-15351
- Solar limb brightening in various ranges, suggesting obtaining temperature distribution during solar eclipse 05 p0911 A70-16436
- Solar atmosphere granular convective velocity field determination methods, using realistic assumptions for typical granulation size and seeing parameter 06 p1142 A70-17990
- Solar Cd abundance, using spectrograph and synthetic spectral line computer program 06 p1143 A70-17995
- Electromagnetic acceleration and energy losses of charged chromospheric-coronal plasma electrons and protons in unsteady magnetic fields of sunspots 07 p1384 A70-19417
- Turbulence in quiescent prominences relationship to shock waves in upper atmosphere 08 p1570 A70-20840
- Effective depths of formation of absorption lines in solar atmosphere used for magnetic field recording 08 p1570 A70-20842
- Nitrogen dioxide presence in solar atmosphere from balloon-borne spectrometer observations, presenting graph of sunset solar spectrum 08 p1575 A70-21262
- Radiative relaxations of chromospheric oscillations generated by granule, assuming isothermal atmosphere and linearizing equations of motion 08 p1576 A70-21395
- Fe abundance in solar photosphere, evaluating various determination methods 09 p1753 A70-22382
- Europium isotope ratio in solar atmosphere equal to terrestrial using spectral line profiles analysis 09 p1757 A70-22727
- Homogeneous model solar photosphere in strict radiative equilibrium with depth-dependent line blanketing by neutral and ionized metals 09 p1757 A70-22728
- Small scale motions in solar photosphere and chromosphere using solar spectrograms 09 p1757 A70-22729
- Solar chromosphere dark and bright mottles mean lifetime from photographs, identifying with spicules 09 p1757 A70-22733
- Solar and solar system planetary atmospheres including interplanetary space filled with solar wind 10 p1942 A70-24611
- Supergranules /convective cells/ development shown in quiet sun filtergrams of H alpha chromospheric network taken above Arctic Circle 11 p2109 A70-25741
- Rotation law and circulation velocities in solar hydrogen convection zone under anisotropic turbulent velocity 12 p2302 A70-27588
- Violet K2 emission in H and K line cores of solar calcium ions using atmospheric model in state of motion 12 p2303 A70-27701
- Soviet book on solar short wave radiation effects on ionosphere, covering solar atmosphere and spectra, ionospheric ion concentration vertical distribution, etc 13 p2487 A70-28649
- Radiative energy transport effect on temperature distribution in conduction heated plane layer applied to solar chromosphere 13 p2488 A70-28716
- Chromospheric flares electron concentration and structure from half widths and Balmer lines numbers 13 p2493 A70-29394
- Solar thermal convection model, examining effects of rotation about vertical axis 13 p2496 A70-29839
- Solar chromospheric fine structure from high resolution photographs 13 p2497 A70-29849
- Venus spin-orbit resonance resulting in consistent inferior conjunction with earth, suggesting solar atmosphere tidal influence 14 p2650 A70-31216
- Hydrogen abundance in Jupiter atmosphere quadrupole line used in comparing jupiter and solar atmosphere C/H ratios 14 p2650 A70-31221
- Gravitational atmosphere thermally driven motions, noting expansion towards lower density regions in solar chromosphere 15 p2804 A70-32619
- Coronal structures' relationship to chromospheric features in H alpha and Ca II K 16 p2977 A70-33843
- Solar atmosphere structure and chemical composition by UV spectrum analysis 17 p3161 A70-34892
- Temperature distribution of solar atmosphere, discussing solar models 17 p3169 A70-35382
- Chromospheric spicules fine structure recorded on H alpha spectrograms and filtergrams from high altitude coronagraph 17 p3174 A70-35863
- Solar atmosphere shock waves frequency and strength, computing radiative energy losses of chromospheric models 17 p3174 A70-35865
- Ba II emission lines in solar chromosphere, examining excitation and ionization equilibrium and resonance line intensities by eclipse observations 18 p3317 A70-37010
- Solar envelope unstable gravitational mode model, considering spherical harmonics by numerical integration and asymptotic representation 19 p3523 A70-38688
- Solar atmospheric hydrodynamic response to stationary random forces homogeneous over horizontal planes, discussing common energy argument, various models and photospheric oscillation 19 p3523 A70-38690
- Solar chromospheric Fe abundance, considering f-value effects 19 p3524 A70-38697
- Non-LTE line blanketed solar model atmospheres with various temperature distributions 20 p3703 A70-39020
- Solar atmosphere vortex ring observation in H alpha light /2 December 1969/ 20 p3703 A70-39022
- Explosive phase of solar flares in nonuniform atmosphere, determining explosion energy and shock wave front shape for various times 20 p3699 A70-39463
- Particle ejections in solar atmosphere and chromosphere structure, discussing dark halo exhibited by H alpha line in active region 20 p3699 A70-39464
- H alpha chromospheric network lifetime from time lapse photographs 20 p3711 A70-40409
- Supergranular network time and shape changes, examining correlations with solar rotation, activity and cycles 21 p3885 A70-40954
- Oso-4 far UV observations of solar chromosphere and corona active regions 21 p3925 A70-42187
- Shock waves strength and frequency in solar atmosphere heating deduced by empirical model, integrating radiative losses over height 21 p3925 A70-42188
- Heating and extension of solar chromosphere and corona via shock waves generated by piston below convection zone surface 21 p3925 A70-42189
- Fluid dynamics nonlinear equations for thermally driven motions in compressible, isothermal gravitational solar atmosphere, considering flow discontinuities and heat conduction 21 p3925 A70-42191
- Solar chromosphere spicules acceleration via supersonic jet formed by magnetic field under gravity and Melon seed effect 21 p3925 A70-42192
- Shock waves formation and dynamic characteristics in transition region response to infalling material from solar flares 21 p3883 A70-42193
- Solar chromosphere elements abundances methods, suggesting Fe differences origin in Fe I and Fe II inconsistencies 21 p3925 A70-42194
- Solar spectra isodentitraces indicating transition zones between and on sides of spicules in sheaths 21 p3926 A70-42197
- Solar atmosphere three dimensional microstructure observation, considering hypothesis linking flares to magnetic field 22 p4107 A70-43450
- Solar photosphere negative viscosity phenomenon, examining Rossby wave on differentially rotating isothermal spherical shell of nonconducting inviscid ideal gas 22 p4109 A70-43748
- Solar atmosphere radiation and structure, discussing continuum and line spectra, solar rotation, chromosphere, spicules, etc 23 p4256 A70-45035
- Solar center-limb observations of line brightness and Doppler shift fluctuations for Mg b lines 24 p4399 A70-45302
- Solar chromosphere model convective instability, considering temperature and magnetic field effects 24 p4399 A70-45303
- Giant cell regular structures in solar atmosphere, using magnetic synoptic charts of solar activity 24 p4400 A70-45305
- Vertical supergranular motions in solar atmosphere from multichannel magnetograph observations 24 p4400 A70-45306
- Nonspherical wave excitation in solar atmosphere in presence of toroidal magnetic field 24 p4400 A70-45312

- Aircraft auxiliary systems and spacecraft power supplies, considering fly-by-wire control actuators, pyrotechnics and stowable solar array 20 p3564 A70-39669
- SERT 2 solar array power system in sun synchronous orbit, considering power conditioning and deployment technique [AIAA PAPER 70-1159] 20 p3567 A70-40202
- Solar panel flexibility effect on attitude control of solar electric spacecraft for deep space mission [AIAA PAPER 70-1140] 20 p3716 A70-40209
- Power loss due to cumulative meteoroid impacts on solar cells during extended planetary missions, investigating hypervelocity particle impacts into glass [AIAA PAPER 70-1139] 20 p3567 A70-40210
- Collection efficiency and spectral response calculations for semiconductor heterojunction solar cells 21 p3861 A70-40623
- Silicon solar cell specifications and cost reduction without output or reliability loss 21 p3756 A70-41008
- Silicon solar cell array interconnector design based on analysis of stresses caused by thermal expansion and vibrational motion 21 p3756 A70-41009
- Solar arrays for Venus-Mercury flyby, evaluating temperature and power performance 21 p3756 A70-41010
- Solar cell/battery systems for spacecraft, discussing power system evaluator, NiCd thermal control, lightweight rigid panels design, etc 21 p3757 A70-41011
- Regulated spacecraft solar array mathematical model for high voltage power supply regulator analysis 21 p3757 A70-41208
- Solid state switches for operating ion thrusters directly from high voltage solar cells, noting satellite weight saving 21 p3798 A70-41215
- Automatic and command multiple sequencer for spacecraft solar cell battery charger, providing switching logic by integrated circuits design 21 p3758 A70-41218
- Buck-boost main bus voltage regulator for solar array battery space power system 21 p3758 A70-41219
- Solar cell array maximum power point in scientific satellites via closed loop conductance matching regulator 21 p3758 A70-41220
- Solar cell array peak power tracker and battery charger for Airlork Vehicle coupling Apollo spacecraft and Saturn IVB stage to form manned orbiting workshop 21 p3759 A70-41221
- Copper disulfide-cadmium sulfide thin film solar cell degradation under simulated low orbit conditions, investigating thermal stress 21 p3759 A70-41313
- High voltage solar arrays, considering plasma power losses dielectric stresses design, fabrication and testing [AIAA PAPER 70-1137] 21 p3759 A70-41780
- High voltage solar array with integral power conditioning, discussing weight factors, panel design and layout, mechanization, performance prediction, etc [AIAA PAPER 70-1158] 21 p3759 A70-41787
- Silicon solar cell design optimization for near solar missions, discussing electrical characteristics and performance obtainable under various solar radiation conditions 22 p3964 A70-42496
- CdS thin film solar cells, describing manufacture for increased degradation resistance 22 p3966 A70-43537
- High voltage solar array operational problems in earth orbit environment, discussing conducting surfaces, power loss, plasma effects, leakage, etc 22 p3967 A70-43544
- Cu and Ni doped n-p and p-n silicon solar cells, examining radiation damage and isochronal annealing properties 24 p4294 A70-45810
- Apollo 11 deployed solar cells, investigating degradation of surface properties and thermal control due to lunar module ascent effects 24 p4295 A70-46262
- SOLAR CHROMOSPHERE**
U CHROMOSPHERE
U SOLAR ATMOSPHERE
SOLAR COLLECTORS
NT SOLAR REFLECTORS
- Direct solar radiation concentration by paraboloid mirrors, analyzing energy transport and distribution functions, based on statistically distributed imperfections of reflecting surfaces 01 p0010 A70-10762
- Absorber positioning inaccuracy influence in concentrating solar unit mirror on unit energy parameters, discussing defocusing 01 p0010 A70-10763
- Solar installations optical properties selectivity increase by light-collecting surfaces mechanical treatment, describing plate grinding with abrasive powders 07 p1196 A70-19625
- Nonsliding rotary electrical connector for conducting current and signals from satellite solar panel [AIAA PAPER 70-458] 11 p2016 A70-25453
- Design requirements for solar cells and arrays as function of illumination, orbit, geometry and type of stabilization, space environment, etc 13 p2349 A70-29554
- Space environment simulators and test facilities for solar cells and arrays, describing solar and magnetic field simulators and universal battery charger 13 p2385 A70-29555
- Flexible antennas and solar panels effect on dynamic behavior and control system response of dual spin spacecraft 21 p3931 A70-41855
- SOLAR CONSTANT**
Solar constant measurement by Eppley normal incidence pyrheliometers on high altitude balloons 08 p1501 A70-21920
- Solar constant dependence on Wolf number and variations in transmission factor from balloon observations of radiation balance vertical distribution 14 p2568 A70-30126
- Atmospheric transmission variability related to solar constant variations 15 p2801 A70-32371
- Engineering standard for solar constant and zero air mass solar spectral irradiance from high altitude measurements 17 p3077 A70-35161
- Solar constant measurements by high altitude balloon sounding, noting anomalous turbidity in upper atmospheric layers due to nuclear explosions and volcanic eruptions 20 p3703 A70-39375
- SOLAR CONVERTERS**
U SOLAR GENERATORS
SOLAR CORONA
Coronal gas pressure boundary conditions on model upper chromosphere, determining temperature and hydrogen density assuming hydrostatic equilibrium 01 p0175 A70-10243
- Solar corona red and green lines during 30 May 1965 total eclipse, discussing indicated radial, turbulent and displacement velocities 01 p0176 A70-10249
- Solar corona magnetic field determination from photospheric magnetic field line-of-sight component observations, describing various mathematical methods 01 p0176 A70-10250
- Coronal electron densities and magnetic fields determined from K-coronameter and type 4 radio burst data 01 p0168 A70-10255
- Photography and photometry of solar corona during 25 February 1952 and 22 September 1968 eclipses, discussing photographic weighting techniques 01 p0181 A70-10576
- Solar corona heating by shock waves, considering chromosphere and solar wind physical properties, heat flow channeling, etc 02 p0361 A70-11750
- Coronal emission lines wide slit photometry systematic error analysis and suggested error elimination by varying observation method 02 p0373 A70-12375
- Aerosol size distribution from data on atmospheric spectral transmittance and solar corona brightness spectral and angular variations 02 p0292 A70-12434
- Dynamic electric field in solar coronal exosphere on basis of kinetic and hydrodynamic theories, giving estimate of solar wind 02 p0359 A70-12609
- Transition probabilities computed for spectral lines due to magnetic quadrupole radiation, discussing deexcitation of excited atoms in solar corona 02 p0359 A70-12706
- Solar corona photographs for isophotes during solar eclipse of 22 September 1968 revealing chromospheric flare and prominences 03 p0569 A70-13362
- Ar X and Ar XIV identification in solar corona and unidentified coronal lines origin, discussing Fe and Ni transitions from metastable levels 03 p0571 A70-13598
- Solar wind acceleration and coronal plasma heating above plage regions from spectra of solar radio echoes, computing temperature rise and energy input 04 p0740 A70-15049

Excitation of ground configuration of Fe XIII for density and temperature range in solar corona, using proton collisions, electron collision strengths, etc
05 p0902 A70-16434

Coronal features rotation rates as function of latitude and height above limb from autocorrelation analyses of K-coronameter observations
05 p0902 A70-16435

Solar radio emission intensity-solar flare index and 5303 A coronal line intensity-proton flare numbers relations
05 p0911 A70-16438

Neutral Ne emission line in visible solar spectrum during bright events in inner corona, noting 1958 outburst of RS Oph
05 p0920 A70-16944

Solar corona at sunspot maximum observed during 22 September 1968 total solar eclipse, noting coronal streams unpredicted by magnetostatic model
06 p1138 A70-17278

Radioheliograph observations at 80 MHz of directive shock wave propagation in solar corona
06 p1144 A70-18007

Steady spherical plasma flow from sun analyzed by equations of solar corona hydrodynamical model
07 p1378 A70-19033

Excitation, ionization and recombination rates for charged ions during collisions with electrons in solar corona assuming Maxwellian electron distribution
07 p1384 A70-19409

Galactic cosmic rays intensity long term modulation, studying roles of solar corona, solar wind and interplanetary electromagnetic field
07 p1369 A70-20075

Kinetic temperature estimate for solar corona based on time profile of type 3 bursts
08 p1565 A70-20565

Solar system origin theory emphasizing brother star approaching nebula for instability of boundary layer
08 p1568 A70-20638

F corona heliocentric dust cloud model to account for temperature variations with particle size and optical properties, computing thermal emission
08 p1571 A70-20907

Stellar gas ejection processes in corona-interplanetary plasma system, proposing hydrodynamic model with frequent collision region having finite radius
08 p1573 A70-21060

Solar corona and interplanetary plasma structure and dynamics, calculating solar wind velocity as function of distance from sun
08 p1576 A70-21397

Solar and stellar convection regions and coronas using photospheric models, taking into account molecule formation
08 p1581 A70-21953

Corona green /5303 A/ and red /6374 A/ lines during minimum solar activity in 1964, discussing N-S and E-W asymmetries and intensities
09 p1750 A70-22100

Allowed and forbidden transitions probability in isoelectron sequences of solar corona, using scale factor method and variational wave functions
09 p1751 A70-22155

Solar chromosphere-corona transition region properties, discussing temperature increase within very thin layer and inferring temperature-density structure from emission line intensities
09 p1752 A70-22246

Solar corona heating, discussing theories of Schwarzschild, Schatzman, Alfven, Osterbrock, Uchida, Whitaker and Kuperus
09 p1757 A70-22686

Solar equatorial XUV limb brightening for resonance lines of Li-like ions from OSO-4 observations interpreted by coronal model
09 p1757 A70-22732

Excitation equilibrium relative populations calculations for Fe, Ni and Ca ions under solar coronal conditions
09 p1757 A70-22735

Solar eclipse coronal polarization and intensity measurements, discussing equipment, calibration, photometric reduction and results
09 p1757 A70-22736

Solar U-burst radiospectrographic observations, investigating disturbing trajectories and longitudinal distribution in combination with model coronal condensation
09 p1758 A70-22737

Solar corona pulsating metric radio emissions, indicating phenomena as type 4 radiation phases
09 p1758 A70-22738

Probability coefficients computation for transitions between energy levels of ion A XIV in solar corona
09 p1761 A70-23060

Outer corona brightness and polarization during total solar eclipse from satellite photographs
10 p1947 A70-24988

Spectroscopy in astrophysical research, discussing solar corona chemical elements, forbidden lines and temperature determination
10 p1948 A70-25181

Solar corona magnetic field estimated from type II bursts correlated with photospheric, chromospheric and geophysical phenomenon
10 p1934 A70-25275

Solar outer corona brightness distribution from rocket observation with scanning devices during solar eclipse, estimating error
11 p2107 A70-25397

Electron and proton excitation of forbidden transition lines in Ca XV ground configuration determined for coronal densities and temperature
11 p2109 A70-25742

Solar corona photographs for isophotes during solar eclipse of 22 September 1968 revealing chromospheric flare and prominences
11 p2118 A70-26727

Solar wind structure as function of corotating coronal inhomogeneities determined using perturbation equations for spherical polar coordinate system
12 p2292 A70-27179

Solar active regions in chromosphere and corona observed by EUV spectroheliometer aboard OSO-4 spacecraft, discussing ion formation and temperatures
12 p2303 A70-27705

Coronal condensation spectra during 4 February 1962 total eclipse, determining abundances, ionization equilibria, electron densities, etc, from Fe and Ca XV lines analysis
12 p2303 A70-27712

Coronal structure prediction for 7 March 1970 solar eclipse, using model for 22 September 1968 eclipse
12 p2304 A70-27718

Solar flares responsible for Faraday rotation events observed in passage of Pioneer 6 radio signal through solar corona
12 p2295 A70-28023

Coronal condensations temperature and electron density measurements at meter wavelengths and in white light
13 p2488 A70-28717

Hydrodynamic equations to obtain transformation coefficient for HF weakly damped waves in magnetoactive plasma, applying to solar corona
13 p2463 A70-29227

Upper atmospheric temperature-gravitational potential relationship for sun, earth and several planets
13 p2495 A70-29765

Solar radar echo characteristics, discussing coronal compressional waves and refraction by plasma clouds and moving plasma irregularities
13 p2370 A70-29852

Electron density, characteristic dimensions and vertical density gradient of coronal enhancements in white light, observing elliptical cross section
13 p2479 A70-30004

Solar catadioptric coronagraph design free from chromatic image defects
15 p2737 A70-32041

Polarization characteristics of solar radio waves reflected from coronal waves in meter wavelength range
15 p2802 A70-32485

Solar coronal streamers, considering disk locations, evolution, classification and morphological model
15 p2804 A70-32621

Solar stray light, determining spread function, limb profile and aureole at various wavelengths
15 p2795 A70-32625

Kinetic temperature estimate for solar corona based on time profile of type 3 bursts
15 p2805 A70-32720

Solar corona predicted and observed structure compared during eclipse of 7 March 1970
16 p2977 A70-33837

Coronal observations from Aerobee 150 rocket after total solar eclipse of 7 March 1970 in Mexico, combining coronagraph flight record with ground photography
16 p2977 A70-33839

Doppler temperature and motion of solar corona from ionized Fe line using Fabry-Perot interferometer
16 p2977 A70-33841

Outer corona during 7 March 1970 eclipse, discussing distance dominance of K corona
16 p2977 A70-33842

Coronal structures relationship to chromospheric features in H alpha and Ca II K
16 p2977 A70-33843

Plasma wave radiation by electron stream in active solar corona, obtaining spectrum and growth rate
16 p2979 A70-34189

Gaseous disk in equatorial plane of solar nebula, determining dimensions from accretional theory for planets formation
17 p3172 A70-35584

Solar wind velocity profile in rapid acceleration of coronal plasma from type I, III and V bursts
17 p3152 A70-35745

Cerenkov plasma waves generation by fast electron streams in solar corona and conversion into EM waves
17 p3173 A70-35768

Slow and fast coronal expansion phenomena associated with solar flares
17 p3152 A70-35869

Ions acceleration and motion in corona and solar wind, discussing equation derivation, He abundance, nonMaxwellian distribution functions, minimum flux estimation, etc
17 p3152 A70-35870

Coronal magnetic bottle at ten solar radii from Faraday rotation measurements of occulted spacecraft radio source
17 p3174 A70-35871

Solar corona structure on 22 September 1968 using radio astronomical and optical eclipse data
18 p3313 A70-36607

Solar wind velocity variations showing relationship with electron density excess and localized region temperature of corona
19 p3512 A70-38693

Solar eclipse microwave spectral observations for coronal condensation sources characteristics of solar radio emission slowly varying component, discussing ionospheric recombination coefficients
19 p3531 A70-38910

Coronal data comparison based on 5303 A line intensities and distribution with respect to position angles
20 p3704 A70-39461

Electric fields influence on emission lines shape of multiply charged ions in coronal plasma, discussing kinetic temperature
20 p3704 A70-39462

Solar outer corona brightness distribution from rocket observation with scanning devices during solar eclipse, estimating error
20 p3710 A70-40089

Upper atmospheric temperature-gravitational potential relationship for sun, earth and several planets
20 p3710 A70-40090

Solar corona current free magnetic field distribution relationship to plasma density structure
20 p3712 A70-40415

Coronal streamers structure and evolution from photographic and K-coronameter data, indicating photospheric bipolar magnetic regions as origin
20 p3712 A70-40416

Solar corona streamer and interstreamer regions, examining geometrical and dynamic structure by energy transport process
20 p3712 A70-40417

Solar X-ray corona during eclipse of 7 March 1970, using Aerobee rocket photographs
20 p3713 A70-40430

Solar radio pulsations, observing modulation of coronal microwave, X ray and type III emission
21 p3880 A70-40965

Taurus A 21 cm radiation anomalous frequency decrease during occultation by sun attributed to particle streams propagating in solar corona
21 p3886 A70-41064

Radio observations of limb darkening and structure of solar corona at 80 MHz
21 p3890 A70-41177

Radioheliograph observations of solar outbursts involving MHD waves propagation along curved paths in corona at 80 MHz
21 p3891 A70-41178

Two dimensional positions of fundamental and harmonic type 2 solar bursts, using coronal streamer plasma and backward refracted radiation model
21 p3891 A70-41179

Position scatter of 80 MHz sources of type 3 solar bursts reflecting outer corona structure
21 p3891 A70-41182

Chromosphere-corona transition region - Conference, Boulder, Colorado, August 1969
21 p3924 A70-42182

Transition region structure between chromosphere and corona, discussing temperature, theoretical models, energy balance and magnetic fields from far UV data
21 p3924 A70-42183

Chromosphere-corona transition region model from limb-disk optically thin line intensities
21 p3924 A70-42184

OSO-4 far UV observations of solar chromosphere and corona active regions
21 p3925 A70-42187

Heating and extension of solar chromosphere and corona via shock waves generated by piston below convection zone surface
21 p3925 A70-42189

Energy deposition in solar corona associated with momentum transfer from heating wave in transition region, discussing wave pressures
21 p3925 A70-42190

Solar coronal and photospheric iron abundances from absorption forbidden lines, discussing discrepancy with permitted lines
21 p3925 A70-42195

Vertical oscillations in solar temperature minimum suggested as acoustic-gravity waves modes dependent on height at chromosphere-corona interface
21 p3926 A70-42196

Transition zone height in corona-chromosphere interface from high resolution disk spectra near limb
21 p3926 A70-42198

One fluid solutions for solar wind with reduced electron heat conduction in agreement with observed characteristics at corona base 22 p4093 A70-42472

Pulsar pulse arrival time fluctuations, examining solar coronal nature by angular broadening, scintillation and turbulence spectrum 22 p4101 A70-42935

Polarization characteristics of solar radio waves reflected from coronal waves in meter wave length range 23 p4240 A70-43909

Coronal shock growth as source of thermal solar X ray bursts associated with optical events 24 p4401 A70-45320

Solar wind two fluid model with boundary conditions describing electron and proton behavior in expanding corona 24 p4397 A70-45770

SOLAR CORPUSCULAR RADIATION

NT SOLAR PROTONS

Secondary corpuscular stream effect on diurnal variations in cosmic ray intensity obtained from statistical analysis 01 p0172 A70-11524

Geomagnetic micropulsations fluctuations during solar activity cycle showing changes in excitation frequency with change in corpuscular fluxes parameters 01 p0083 A70-11539

Corpuscular sources geoeffectiveness related to position on solar disk at maximum flare activity 03 p0569 A70-13359

Solar interior temperature measurement by Cl, Ga and Li isotopic detectors of solar neutrinos, discussing effectiveness and upper temperature bound 05 p0899 A70-15951

Solar neutrino detectors calibration with artificial neutrino sources produced by reactors, electron and proton accelerators 05 p0846 A70-15953

Night lower ionosphere at midlatitudes additional ionization ascribed to solar corpuscular fluxes 06 p1135 A70-17839

Electric field in earth magnetotail via Explorer 33 and 35 satellite observation of solar electrons above 50 keV energy 06 p1058 A70-18528

Solar particles penetration to lower ionospheric heights at low latitudes indicated from proton flux measurements by Explorer 33 satellite and Calcutta station 07 p1366 A70-18849

Solar corpuscular fluxes directional distribution time dependent changes effect on lower ionospheric electron production rates 07 p1373 A70-20344

Geomagnetic storms data compilation /1957-1964/, showing solar activity effect on solar corpuscular stream velocity 07 p1373 A70-20436

Solar cosmic rays development, discussing corpuscular radiation of flare origin, radio noise, geomagnetic activity and intensity measurements 09 p1745 A70-23128

Solar corpuscular streams effect on meteoric particles behavior in circular orbit around sun, determining lifetime on basis of mass loss due to pulverization 09 p1763 A70-23382

Satellite mounted device for detecting and recording 20-110 Mev solar neutrons 10 p1889 A70-24488

Solar corpuscular fluxes angular characteristics, derived from observational data analysis, showing circular or elliptical transverse cross sections 11 p2104 A70-25545

Corpuscular sources geoeffectiveness related to position on solar disk at maximum flare activity 11 p2118 A70-26724

Solar neutrino flux measurement based on neutrino capture by large chlorine mass and subsequent Ar 37 decay in low noise environment 12 p2293 A70-27389

Low energy solar flare electrons scatter-free propagation through interplanetary medium, considering rise, decay and travel times 13 p2477 A70-29194

X ray and proton flux measurement during solar flare of 29 September 1968 by balloon-borne detectors 14 p2633 A70-31310

Solar flare particle flux equilibrium anisotropy and convection in solar wind 15 p2793 A70-31901

Solar neutrino fluxes, calculating capture rates and primordial helium abundance 17 p3151 A70-34847

Electron correlations and solar neutrino counts, correcting frequency independent Thomson cross section 18 p3308 A70-36485

Peripheric umbra photometric analysis during lunar eclipses based on homogeneous observational material, revealing luminescence excited by solar corpuscular radiation 18 p3319 A70-37055

Nitrogen dioxide and molecular oxygen ions densities in lower ionosphere as function of solar corpuscular radiation 19 p3409 A70-37325

Global diurnal variations in F 2 layer seasonal anomaly during high and low solar activity, noting corpuscular radiation role 19 p3491 A70-37326

Solar energetic charged particles interaction with earth bow shock and magnetopause 19 p3494 A70-37482

Solar particle observations over polar caps, considering spatial and angular distribution measurements 19 p3494 A70-37484

Interplanetary magnetic field during solar particle event of 25 February 1969 from Heos 1 measurements 19 p3495 A70-37500

High energy solar electrons observed by HEOS-A1 satellite, discussing semitransparent barrier existence at distance from sun 19 p3497 A70-37521

Ammonium molecules dissociation and ionization in comet atmospheres due to solar corpuscular and photon radiation 19 p3514 A70-37642

Solar wind and flare energetic particles properties and interactions, surveying interplanetary magnetic field, planetary bow shock waves, neutrons, neutrinos, etc 19 p3511 A70-38418

Solar neutrinos flux upper limit determination, describing detection equipment and procedures 19 p3511 A70-38486

Geomagnetic perturbation indices indicating different solar corpuscular streams and heliogeophysical properties 20 p3618 A70-39182

Polar stratospheric winter explosive warmings correlated with solar high energy charged particles injections 20 p3618 A70-39185

Solar B8-Be8 decay neutrinos energy spectrum and absorption cross sections calculation 20 p3698 A70-39307

Solar corpuscular fluxes angular characteristics derived from observational data analysis, showing circular or elliptical transverse cross sections 21 p3882 A70-41295

Solar high energy particles penetration into ionospheric heights at equator, analyzing optical flare and solar proton data from ATS-1 and Explorer 34 23 p4235 A70-43816

High energy solar neutron flux via balloon measurement of flux difference from solar direction and from symmetrical direction about zenith 23 p4236 A70-43881

Helios solar observation satellite equipment design study for solar plasma low energy particles onboard measurements 23 p4262 A70-44844

Solar neutron flux density relation to solar flare of 28 September 1968, using high altitude balloon-borne neutron detector 23 p4238 A70-44925

Solar corpuscular flux and visible solar spot area correlation with geomagnetic planetary index for 27-day intervals, considering relationship to earth satellites motion 24 p4408 A70-45547

SOLAR COSMIC RAYS

Iron group nuclei abundance relative to oxygen determined for solar cosmic ray event of 2 September 1966 01 p0167 A70-10042

Secondary corpuscular stream effect on diurnal variations in cosmic ray intensity obtained from statistical analysis 01 p0172 A70-11524

Solar flare cosmic rays confinement to definite solar magnetic field sectors using Laplace transformation 03 p0560 A70-13977

IMP F solid state detector data on 13 day solar proton event at low energy, considering cosmic rays anisotropy and interplanetary magnetic field 04 p0738 A70-14512

Solar cosmic ray dose rate and total dose magnitude predictions based on Epeak and isotropic diffusion models 04 p0742 A70-15584

Drift, anti-Fermi retardation, convective transfer and diffusion effects on solar cosmic ray energy spectrum in earth orbit proximity 05 p0898 A70-15943

Venus-earth carbon dioxide atomic parameters used to determine ionization and optical emission rates in Venus upper atmosphere resulting from solar cosmic rays 05 p0901 A70-16276

Energy spectrum time dependence of solar cosmic ray event of 28 January 1967 measured in Northern Hemisphere, discussing particle diffusion and magnetic trap 05 p0902 A70-16459

Solar cosmic ray flare /28 January 1967/ observed by neutron monitors, determining emission and particle spectrum at atmosphere boundary 05 p0903 A70-16752

Solar cosmic rays diffusion enclosure in interplanetary space magnetic boundary suggested from balloon, satellite and ground observations of solar flare neutron component 05 p0904 A70-16753

X ray and H alpha emissions associated with solar proton flares, correlating rise time with solar cosmic rays 06 p1137 A70-18547

Solar wind, using data on solar and galactic cosmic rays in interplanetary space 07 p1366 A70-19030

Electron production rate enhancement by solar cosmic rays in lower ionosphere, considering particle distribution and polar cap absorption 07 p1369 A70-20153

Electron production in lower ionosphere by solar cosmic rays, calculating rates by computer as function of nuclear charge number, energy spectrum and height 07 p1373 A70-20348

Solar flare cosmic ray rigidity spectrum determination based on ratio of relative enhancements, assuming isotropic arrival of particles at earth 09 p1744 A70-22489

Solar cosmic rays development, discussing corpuscular radiation of flare origin, radio noise, geomagnetic activity and intensity measurements 09 p1745 A70-23128

Solar cosmic ray ionization of upper atmosphere, calculating electron production rate distribution 10 p1934 A70-25199

Solar cosmic rays interaction with interplanetary shock waves, discussing chromospheric eruptions 13 p2476 A70-28959

Proton cosmic ray flare development and spatial structure, discussing magnetic field annihilation process for particle energy and photon ejection 13 p2476 A70-29046

Solar cosmic rays entry into magnetosphere, showing entrance on smoothly connected field lines 13 p2480 A70-30059

Anisotropic solar cosmic rays in inhomogeneous medium, investigating shell effect on propagation by one dimensional model 15 p2795 A70-32624

Statistical accuracy of standard muon azimuthal semicubic telescope for solar cosmic rays, discussing rms error 18 p3256 A70-36103

Solar cosmic rays satellite observation, considering flare associated, recurrent and storm particle events and active center associated energetic particles 19 p3493 A70-37474

Low energy solar and galactic cosmic rays propagation in interplanetary medium observed by Zond and Venus space probes, discussing shock waves retardation 19 p3493 A70-37475

Solar cosmic ray protons and electrons increase during 23 February-5 March 1969 observed by Venus 5 and 6 space probes, discussing interplanetary medium disturbance 19 p3495 A70-37504

Solar cosmic rays emission spectrum for 23 February 1956 flare, taking into account nucleon diffusion coefficient dependence on particle rigidity and distance to sun 20 p3697 A70-39287

Solar cosmic rays diurnal and semidiurnal variations modulation by noncoincidence between earth rotation axis and normal to ecliptic plane 20 p3697 A70-39289

Supersonic transport radiation hazards to flight crew, passengers and population, discussing dosages, probabilities, solar cosmic ray encounters, warning systems, etc 20 p3700 A70-39923

SOLAR CYCLES

NT SUNSPOT CYCLE

Two layer truncated harmonic model of Rossby wave dynamo for solar cycle, accounting for maintenance and reversal of magnetic fields 01 p0174 A70-10238

Atmospheric density variations during solar maximum and minimum, discussing solar corpuscular stream and EUV radiation 01 p0075 A70-10594

Regular/irregular micropulsations variations during solar cycle, noting possible magnetospheric contraction and solar wind velocity influence 01 p0075 A70-10600

Solar brightness variations observed photometrically, discussing periodicity, sunspot locations, photosphere and subsurface rotations, etc 01 p0186 A70-11273

Geomagnetic micropulsations fluctuations during solar activity cycle showing changes in excitation frequency with change in corpuscular fluxes parameters 01 p0083 A70-11539

Cosmic ray variations concepts with reference to 11, 22 and 80-90 year solar cycles Wolf number variations

03 p0568 A70-13355

Interplanetary magnetic field during solar cycle rise and minimum based on Explorer 33 magnetometer measurements

03 p0575 A70-13999

Eleven year cosmic ray variation and solar activity cycle analysis, showing variation amplitude dependence on both numbers and heliolatitudinal distribution of sunspots

04 p0742 A70-15718

Spectral characteristics of B and S components of solar radio emission from statistical data, investigating dependence on 11-yr cycle and minimum solar activity

07 p1378 A70-19031

East-west dissymmetry in solar activity center births for solar cycles XII-XIX, noting independence of latitude and invariance throughout last eight cycles

08 p1567 A70-20599

Cosmic ray intensity variation correlated with amplitude changes in 27 day variation during solar cycle 18

09 p1745 A70-22740

Cosmic ray diurnal anisotropy, demonstrating two-solar-cycle variations for nucleonic component

09 p1746 A70-23478

Seasonal variation of spread F near magnetic equator, showing relationship with solar cycle at different geographic locations

10 p1881 A70-24818

Cosmic ray variations concepts with reference to 11, 22 and 80-90 year solar cycles Wolf number variations

11 p2118 A70-26720

Ionospheric electron content at temperate latitudes during solar cycle increasing phase by radio beacon satellite, discussing diurnal, seasonal and latitudinal variations

12 p2225 A70-27892

High energy proton flux variations in inner belt during solar cycle and magnetic storm, using satellite and balloon measurements

13 p2483 A70-30091

Morphology of thermal and energetic particles in inner magnetosphere during geomagnetic disturbances and solar cycles

14 p2630 A70-30358

Eleven year cosmic ray variation and solar activity cycle analysis, showing variation amplitude dependence on both numbers and heliolatitudinal distribution of sunspots

14 p2632 A70-30802

Planetary tidal force effect on solar activity cycle, showing amplitude proportionality to solar and gravity center deviation

14 p2649 A70-31199

Residual solar modulation of relativistic cosmic ray nuclei in galaxy over eleven years, observing magnitude at solar activity minima

18 p3309 A70-37009

Solar X ray emissions from quiet and active sun compared with radio flux to investigate production mechanisms

19 p3512 A70-38909

Solar activity effects on Northern Hemisphere atmospheric temperature, mapping gradients for 11 year solar cycle

20 p3662 A70-39188

Twenty two year solar activity cycle effect on earth climate, plotting odd and even 11 year cycle curves for pressure and temperature

20 p3662 A70-39189

Interplanetary magnetic field large scale structure from cosmic ray intensity secular variations during solar activity cycle

20 p3696 A70-39276

Stellar matter density and composition in proton-proton cycle, applying results to real solar model

20 p3698 A70-39308

Spot groups longitude distribution in 11 year solar activity cycle in Northern and Southern Hemispheres based on correlation functions, observing period variation

20 p3704 A70-39466

Supergranular network time and shape changes, examining correlations with solar rotation, activity and cycles

21 p3885 A70-40954

Ionospheric electron content measurement during solar activity cycle, noting temporal and spatial variations

22 p4020 A70-43159

Butterfly diagram for describing latitude distribution of sunspots during solar cycle, considering representation methods

22 p4106 A70-43264

Temporal sequence correlation between surges and associated flares during solar cycle

22 p4095 A70-43265

Soft solar X rays cyclic variation from satellite observation, noting relation to sunspot group magnetic field complexity

22 p4096 A70-43301

Cosmic ray 11-year variation pattern change in 19th and 20th solar activity cycles determined by latitude expeditions spectrum analysis

23 p4237 A70-44071

SOLAR DISK

U SUN

SOLAR ECLIPSES

Chromospheric slitless spectrograms at 1962 eclipse, discussing Balmer-Paschen line intensities, continuum data, reduction and source error

01 p0175 A70-10244

Slitless spectrograms of chromosphere obtained during 1962 eclipse to determine H level populations decrements, self absorption in Balmer lines and chromosphere model

01 p0175 A70-10245

Solar corona red and green lines during 30 May 1965 total eclipse, discussing indicated radial, turbulent and displacement velocities

01 p0176 A70-10249

Photography and photometry of solar corona during 25 February 1952 and 22 September 1968 eclipses, discussing photographic weighting techniques

01 p0181 A70-10576

Near limb solar IR brightness distribution observed during total solar eclipse of 12 November 1966 in Argentina by sounding rocket photometers

01 p0186 A70-11271

Optical and radioastronomical observations of 1966 solar eclipse, discussing data and instruments

01 p0191 A70-11472

Solar and lunar disks instant of contact during solar eclipse determined by chord measurements, comparing three methods for successive time intervals

01 p0191 A70-11473

Heat sources in E region from electron temperature data analysis recorded by rockets during eclipses in July 1963

01 p0082 A70-11491

Solar eclipse effects in equatorial F region electron density, noting data analysis method for reexamining existing measurements

02 p0290 A70-12157

Solar corona photographs for isophotes during solar eclipse of 22 September 1968 revealing chromospheric flare and prominences

03 p0569 A70-13362

D layer radio absorption during solar eclipse of 22 September 1968 attributed to two solar X-ray sources

03 p0559 A70-13602

Solar corona at sunspot maximum observed during 22 September 1968 total solar eclipse, noting coronal streams unpredicted by magnetostatic model

06 p1138 A70-17278

Viking Mars orbiter/lander mission planning, studying sun, earth and star occultations sensitive mission characteristics

[AIAA PAPER 70-62]

06 p1146 A70-18193

Atmospheric ozone content and mass effect on solar radiation flux measured during total solar eclipse of 22 September 1968

07 p1275 A70-20310

Illumination of zenith region of sky before and during solar eclipse of September 1968 measured by luxometer

08 p1573 A70-20950

May 1966 solar eclipse effects on sporadic E layer, including ionizing radiation decrease relation to boundary and blanketing frequencies decrease

08 p1490 A70-21432

Solar eclipse coronal polarization and intensity measurements, discussing equipment, calibration, photometric reduction and results

09 p1757 A70-22736

Vertical incidence /VI/ F layer ionograms, magnetograms and signal amplitude data obtained during annular eclipse of 23 November 1965

09 p1671 A70-23494

Outer corona brightness and polarization during total solar eclipse from satellite photographs

10 p1947 A70-24988

Solar outer corona brightness distribution from rocket observation with scanning devices during solar eclipse, estimating error

11 p2107 A70-25397

Critical review of Meisel paper on solar X ray source identification using D layer ionization behavior during eclipse

11 p2109 A70-25750

Solar corona photographs for isophotes during solar eclipse of 22 September 1968 revealing chromospheric flare and prominences

11 p2118 A70-26272

Coronal condensation spectra during 4 February 1962 total eclipse, determining abundances, ionization equilibria, electron densities, etc. from Fe and Ca XV lines analysis

12 p2303 A70-27712

UV flash spectra of total solar eclipse of 7 March 1970 obtained by Aerobee 150 rocket

12 p2304 A70-27717

Coronal structure prediction for 7 March 1970 solar eclipse, using model for 22 September 1968 eclipse

12 p2304 A70-27718

Two dimensional structure of 20 May 1966 noise storm from solar eclipse data obtained at ground stations

13 p2493 A70-29390

Solar limb integrated brightness distribution in continuous spectrum during 20 May 1966 solar eclipse

13 p2498 A70-30003

Lower ionosphere radio reflection during solar eclipse of 22 September 1968

14 p2571 A70-30237

LF signals phase determination during solar eclipse of 22 September 1968, noting frequency shift magnitude

14 p2547 A70-30238

Solar eclipse of March 1970 observation by sounding rockets, discussing ionospheric and meteorological measurements

14 p2586 A70-30800

F region electron and ion densities, temperatures and plasma velocities computed for eclipse at Wallops Island on 7 March 1970

15 p2726 A70-31866

Electron density measurements by partial reflection and rocket techniques during 20 May 1966 solar eclipse, showing agreement below 82 km height

15 p2726 A70-31869

Moon shadow solar eclipse encounter probability for high altitude satellite in circular earth orbit

15 p2803 A70-32502

Illumination of zenith region of sky before and during solar eclipse of September 1968 measured by luxometer

15 p2806 A70-32762

Equatorial F 2 region response during solar eclipse of 7 March 1970, emphasizing ionization production and loss, transport processes and electron temperature

16 p2897 A70-33826

Solar radiation intensity at Lyman alpha wavelength and X ray spectrum before and during solar eclipse of 7 March 1970

16 p2972 A70-33827

Atmospheric temperature and wind data before, during and after solar eclipse of 7 March 1970, using ARCAS meteorological rockets

16 p2977 A70-33828

F region electron content and recombination times during solar eclipse of 7 March 1970, using Faraday rotation technique

16 p2897 A70-33829

Ionospheric electron content measurement during solar eclipse of 7 March 1970, using VHF radio waves from geostationary satellites

16 p2897 A70-33830

Ionospheric electron density during solar eclipse of 7 March 1970, using Faraday rotation measurements of geostationary satellites VHF transmissions

16 p2898 A70-33831

D region electron density variations during solar eclipse of 7 March 1970, using wave interaction technique

16 p2898 A70-33832

Sky wave amplitudes analysis recorded at D region height by loop and short whip antennas during 7 March 1970 solar eclipse

16 p2898 A70-33833

D region electron energy loss factor during solar eclipse of 7 March 1970, using wave interaction technique

16 p2898 A70-33834

F region integrated electron density response during solar eclipse of 7 March 1970, using Faraday rotation of linearly polarized signals from ATS 3

16 p2898 A70-33835

Gravity wave generation during solar eclipse confirmed by satellite observation on Faraday rotation angle of ionospheric VHF transmissions

16 p2898 A70-33836

Solar corona predicted and observed structure compared during eclipse of 7 March 1970

16 p2977 A70-33837

Solar UV flash spectrum by spectroheliographs flown aboard Aerobee 170 mission during total solar eclipse

16 p2977 A70-33838

Coronal observations from Aerobee 150 rocket after total solar eclipse of 7 March 1970 in Mexico, combining coronagraph flight record with ground photography

16 p2977 A70-33839

Ground based photographic experiments using portable equipment during 7 March 1970 solar eclipse in North Carolina

16 p2977 A70-33840

Outer corona during 7 March 1970 eclipse, discussing distance dominance of K corona

16 p2977 A70-33842

Photospheric magnetic fields by magnetograph during and one week before and after eclipse of 7 March 1970

16 p2977 A70-33844

Solar radio spectrum and history of McMath 607 plage region during eclipse of 7 March 1970, considering residual emission

16 p2977 A70-33845

- Radio observations of chromospheric brightness temperature distribution during solar eclipse of March 1970 16 p2977 A70-33846
- H alpha filtergrams of sun during solar eclipse of 7 March 1970, showing bright plage area 16 p2980 A70-34226
- Shooting star shower and solar eclipse frequencies correlation with long term climatic changes 17 p3168 A70-35310
- Solar corona structure on 22 September 1968 using radio astronomical and optical eclipse data 18 p3315 A70-36607
- Geometric relations for contact moments of solar eclipse, using crescent cord photographic measurements 18 p3315 A70-36610
- Ba II emission lines in solar chromosphere, examining excitation and ionization equilibrium and resonance line intensities by eclipse observations 18 p3317 A70-37010
- Solar eclipse of 7 March 1970 in Mexico, discussing characteristics, research program, equipment and photographs 18 p3318 A70-37046
- E layer electron concentrations, effective recombination coefficient and ionization sources during solar eclipse, noting soft X radiation intensity 19 p3408 A70-37310
- Color film /XRC/ application in Mexico during solar eclipse of 7 March 1970, showing little color and tone distortion 19 p3423 A70-37751
- Solar eclipse of 20 May 1966, analyzing radio observations 19 p3521 A70-38554
- Solar eclipse of 22 September 1968, analyzing radio observations 19 p3521 A70-38555
- Solar radio emission intensity distribution across disk during eclipse, constructing relative RF spectrum of uncovered region 19 p3522 A70-38556
- Solar UV radiation contributing to ionization in higher ionospheric layer over Dushanbe during partial solar eclipse of 20 May 1966 19 p3417 A70-38786
- Solar eclipses and ionosphere - NATO Conference, Lagonissi, Greece, May-June 1969 19 p3417 A70-38901
- Ionospheric effects in solar eclipse compared with full sun conditions at same elevation angle, emphasizing E, F and D regions ion and electron composition 19 p3418 A70-38902
- Solar eclipse effects on E and F layers, discussing photoionization rate, electron density and temperature, plasma diffusion, electric fields, etc 19 p3418 A70-38903
- Earth exospheric plasma distribution, relating solar eclipses effects to geophysical phenomenon 19 p3418 A70-38904
- Ozone concentration variations in upper atmosphere during solar eclipses 19 p3418 A70-38906
- Ionospheric rocket measurements during solar eclipse of 12 November 1966, observing electron and ion density decrease 19 p3418 A70-38907
- Solar spectral intensity distribution and ionizing radiation spatial emission patterns during eclipse, discussing effects on ionosphere 19 p3418 A70-38908
- Solar eclipse microwave spectral observations for coronal condensation sources characteristics of solar radio emission slowly varying component, discussing ionospheric recombination coefficients 19 p3531 A70-38910
- Solar eclipse measurements in 1-30 mm range, examining chromosphere, flares and radio emission 19 p3531 A70-38911
- D region electron density profiles during solar eclipse from X ray rocket and satellite observations 19 p3419 A70-38913
- D region electron densities during 20 May 1966 solar eclipse, using partial reflection and rockets 19 p3419 A70-38914
- Ionospheric electron content measurements during 20 May 1966 solar eclipse by Beacon S-66 satellite 19 p3419 A70-38915
- E and F region electron density response to incident radiation intensity on upper atmosphere during solar eclipses 19 p3419 A70-38916
- Annular solar eclipse of 20 May 1966 effects on ionosphere, discussing regions virtual heights, critical frequency variations, ion production rates, etc 19 p3419 A70-38917
- Ionospheric observations of solar eclipse of 20 May 1960, using panoramic probe 19 p3419 A70-38918
- Ionospheric ionization minimum delay and F region alpha variation during solar eclipse 19 p3419 A70-38919
- Vertical electron concentrations in upper F region during solar eclipses in South Atlantic from satellite observation 19 p3419 A70-38920
- Atmospheric ozone content during May 1966 solar eclipse, noting solar disk darkening effect on measurements 20 p3615 A70-39031
- Solar eclipse effects on equatorial F 2 layer by transient solutions of time dependent continuity equation, calculating electron concentrations 20 p3622 A70-39453
- Solar outer corona brightness distribution from rocket observation with scanning devices during solar eclipse, estimating error 20 p3710 A70-40089
- Solar X-ray corona during eclipse of 7 March 1970, using Aerobee rocket photographs 20 p3713 A70-40430
- Solar active region radio spectrum during 12 November 1966 eclipse, discussing flux, magnetic field effects, temperature and electron density 21 p3886 A70-40961
- Astronomical events observed in 1970 by amateur astronomers, discussing sun and moon eclipses and planets visibility 21 p3886 A70-41074
- Earthshine bright parts relationship to average brilliance of sun during total eclipse 21 p3893 A70-41445
- Solar eclipse calculation and prediction, discussing relationship between possible forms and earth-moon orbital configurations 21 p3924 A70-42173
- Solar radio to optical radius ratio calculated from residual flux measurements during 7 March 1970 solar eclipse 22 p4097 A70-42466
- Solar radio burst observation before 7 March 1970 solar eclipse, tabulating spectrum data 22 p4095 A70-43266
- Lower atmosphere gravity wave motions due to cooling by solar eclipse shadow 23 p4185 A70-43845
- IR observation of chromospheric Ca II K-line during total eclipse of 7 March 1970 24 p4401 A70-45314
- Solar limb photographic, isodensity and isophotal data for eclipse of 7 March 1970 from coronagraph observations, noting coronal green line and prominence activity 24 p4402 A70-45389
- Lower ionosphere radio reflection during solar eclipse of 22 September 1968 24 p4332 A70-46312
- LF signals phase determination during solar eclipse of 22 September 1968, noting frequency shift magnitude 24 p4316 A70-46313
- SOLAR ENERGY**
- Solar energy concentrator with truncated conical mirror and toroidal lens to illuminate cylindrical thermoelectric generators or radiation pumped lasers 01 p0010 A70-10760
- Optical measurements of mirrors reflectance and solar radiation transmittance to solve problems specific to solar energy engineering by standard optical equipment 01 p0010 A70-10765
- Stannic or cobalt oxide film coated glasses optical and energy characteristics determined for potential use in solar energy engineering 01 p0159 A70-10766
- Reflected solar energy measurements by ATS satellites applied to meteorological research, emphasizing high areal resolution and dynamic range of cameras 01 p0094 A70-11297
- Solar energy as spacecraft power source emphasized in operating life comparison with chemical, electrochemical and nuclear energy, discussing silicon solar cells 05 p0799 A70-17023
- Localized high energy flaring of active center monitored with time-associated radio bursts in spot umbrae 08 p1561 A70-20905
- Solar energy exchange with radiator surface recessed within specular axisymmetric cylindrical spinning cavity, using deterministic ray tracing scheme 11 p2150 A70-26353
- Solar, nuclear, chemical and thermal energy sources for short and long duration exploration on moon 14 p2634 A70-30195
- Solar energy direct conversion into electricity, surveying photoelectric, thermoelectric and thermoemissive methods 15 p2677 A70-31598
- Biological conversion of solar energy, discussing photosynthesis and nonphotosynthesis mechanisms 15 p2688 A70-31600
- Solar energy - Conference, Athens, September 1969 15 p2677 A70-32418
- Thermal EM field as function of coherent states, outlining quantum theory for thermal radiation and solar energy 15 p2678 A70-32423
- Passive sun trackers using solar energy activated bimetal helix thermal heliotrope 16 p2846 A70-34131
- Solar atmospheric hydrodynamic response to stationary random forces homogeneous over horizontal planes, discussing common energy argument, various models and photospheric oscillation 19 p3523 A70-38690
- Solar flare parameters, statistical relationships and energy estimates from optical characteristics 20 p3699 A70-39465
- Ratio between mechanical energy flux in nonmagnetic region and magnetic region associated with solar chromospheric mottles 20 p3712 A70-40414
- SOLAR ENERGY ABSORBERS**
- High temperature solar energy converter cavity absorbers geometry, considering absorption parameters of radiation reflected by concentrator 01 p0010 A70-10761
- Absorber positioning inaccuracy influence in concentrating solar unit mirror on unit energy parameters, discussing defocusing 01 p0010 A70-10763
- Solar energy absorbers and thermal storage devices for high temperature energy conversion to electric power by thermionic or thermoelectric method 01 p0010 A70-10764
- Orbital mission solar energy power conversion system, discussing heat transfer processes for storage feasibility 21 p3951 A70-41852
- SOLAR FACULAE**
- U FACULAE**
- SOLAR FLARES**
- Solar X ray flare regions size, structure and localization from Cosmos 166 and 230 heliograph observations 01 p0168 A70-10252
- Radioheliograph observations of position and motion of type 2 and 4 radio sources during flares based on proton model 01 p0168 A70-10256
- Meter wave type 3 solar radio waves associated with solar X ray flares, discussing sudden enhancements of LF field strength due to D layer ionization enhancement 01 p0168 A70-10257
- Sudden cosmic noise absorption /SCNA/ in polar cap during 7 July 1966 solar proton flare, estimating SCNA latitudinal distribution and protons magnetic cut-off boundary 01 p0172 A70-11527
- Hydrodynamic approximation to interplanetary gas motion influenced by solar flare caused perturbations 01 p0192 A70-11586
- Extreme UV spectral line intensity enhancement during class 3 flare related to abundance of radiating element 02 p0358 A70-12205
- Time lag of commencement of PCA effect behind occurrence of Y-shaped phase of solar flares, tabulating data for several flares and particle effects 02 p0358 A70-12373
- Chromospheric flares, loop prominences and filament activation and dissipation attributed to decelerated annihilation of prominence field in upper active region 03 p0557 A70-13218
- Corpuscular sources geoeffectiveness related to position on solar disk at maximum flare activity 03 p0569 A70-13359
- Flare rising from behind solar limb deoculated by simultaneous recording by OSO III X ray detector and photoheliograph 03 p0558 A70-13589
- Visible solar hemisphere circumstances for 28 January 1967 and ground level cosmic rays enhancement not preceded by intense H alpha flares 03 p0558 A70-13590
- Azur satellite launching project by NASA and Germany, describing orbit for investigating earth inner radiation belt, auroral zone and solar flares 03 p0580 A70-13797
- Pressure changes in troposphere and lower stratosphere after strong solar flares analyzed statistically for Northern Hemisphere 03 p0476 A70-13909
- Solar flare cosmic rays confinement to definite solar magnetic field sectors using Laplace transformation 03 p0560 A70-13977
- Magnetic fields neutral lines length as indicator of solar flare productivity 03 p0561 A70-14001
- Fe I line enhancement in flare of 7 August 1958 interpreted as selective excitation effect, discussing similarity to late type dwarf stars observations 04 p0739 A70-14598
- Long range solar flare forecasting noting correlation between planetary conjunctions and proton events [AAS PAPER 69-624] 04 p0740 A70-14658

Solar flare duration effect on propagation and modification of forward-reverse shock pair between sun and 1 AU, using equations of motion for spherically symmetric flow

04 p0740 A70-15104

Solar microwave and soft X ray radiation emission correlation to determine flare peak temperature and solid angle

04 p0741 A70-15126

Tropospheric periodic responses to chromospheric flares, analyzing stations atmospheric pressure power spectra

04 p0742 A70-15524

Solar radio emission intensity-solar flare index and 5303 A coronal line intensity-proton flare numbers relations

05 p0911 A70-16438

Flare radiation influence on high photospheric and low chromospheric lines in H alpha, H and K regions

05 p0902 A70-16439

MM wave outbursts of 1 and 2 November 1968, discussing wavelength dependence of flux density

05 p0912 A70-16441

Lyman alpha flux observed by satellite-borne ion chambers during solar flare of 20 March 1966

05 p0902 A70-16442

High energy solar flare data from neutron monitor stations supplemented by low energy data from interplanetary space probes Pioneer 6 and 7

05 p0902 A70-16443

Solar flare alpha to proton flux ratios on 23 May 1967 observed following interplanetary disturbances, suggesting electric fields as cause of modulations

05 p0902 A70-16444

Cosmic ray intensity preceding Forbush effects as function of chromospheric flares solar longitude and solar wind velocity

05 p0903 A70-16730

Solar cosmic ray flare /28 January 1967/ observed by neutron monitors, determining emission and particle spectrum at atmosphere boundary

05 p0903 A70-16752

Solar cosmic rays diffusion enclosure in interplanetary space magnetic boundary suggested from balloon, satellite and ground observations of solar flare neutron component

05 p0904 A70-16753

Flares and fast processes interrelation with active region stationary filaments, filament field magnetic envelope explosion stimulation of surges, plasma stream ascents, etc

05 p0904 A70-16910

Spectral characteristics of solar proton flare on 2 September 1966 noting light intensity variations

05 p0904 A70-16911

Extreme UV flashes of solar flare observed by sudden ionospheric frequency deviations compared with energetic X rays observations

05 p0905 A70-16981

Solar proton flare dose rates, discussing tissue-equivalent-ionization-chamber (TEIC) data usefulness in analyzing possible dose received by man behind shielding

06 p1134 A70-17265

Solar flare H alpha brightness measurement from photograph taken through birefringent filter, deriving flare morphological changes from isophotes

06 p1135 A70-18004

High energy neutrons searched for during solar flares by balloon flights, giving upper limits for gamma ray and neutron fluxes

06 p1136 A70-18008

Solar flare induced interplanetary shock and helium enriched driver gas observed on 13 February 1967, discussing wind velocity and plasma acceleration

06 p1152 A70-18526

X ray and H alpha emissions associated with solar proton flares, correlating rise time with solar cosmic rays

06 p1137 A70-18547

Kilston comet 1966b brightness correlated with solar flares occurrence

07 p1379 A70-19041

Solar flare protons motion in sun radial magnetic field, considering protons interaction with interplanetary field inhomogeneities

07 p1366 A70-19427

Solar proton flares radiometric measurement on-board Molniya 1 satellite, detecting intensities in outer regions of magnetosphere

07 p1366 A70-19428

Strong explosion model for analyzing shock wave propagation after chromospheric flare allowing for quasi-radial motion of unperturbed solar wind

07 p1367 A70-19489

H alpha brightening areas related to sunspot magnetic fields configuration and solar proton flares

07 p1369 A70-20072

Diurnal variations of cosmic ray neutrons following solar proton flares, proposing anisotropic diffusion model for phase and amplitude

07 p1372 A70-20342

Cosmic rays sudden intensity increases during proton flares of 28 January 1967 and 7 July and 2 September 1966, plotting proton density vs pressure

07 p1374 A70-20445

Particle properties and solar flare radiation hazards for passengers in supersonic flight

08 p1435 A70-20632

Localized high energy flaring of active center monitored with time-associated radio bursts in spot umbrae

08 p1561 A70-20905

Solar microwave bursts with double structure, discussing single frequency observations and flare patrols, time variations of flux density and brightness

08 p1561 A70-21259

Chromospheric flares, loop prominences and filament activation and dissipation attributed to decelerated annihilation of prominence field in upper active region

08 p1562 A70-21651

Solar flare cosmic ray rigidity spectrum determination based on ratio of relative enhancements, assuming isotropical arrival of particles at earth

09 p1744 A70-22489

Solar cosmic rays development, discussing corpuscular radiation of flare origin, radio noise, geomagnetic activity and intensity measurements

09 p1745 A70-23128

Solar x-ray flare of 17 August 1966, describing rocket-borne instruments and measurements

09 p1746 A70-23479

Heliocentric longitude intensity profiles of protons associated with solar flare of 5 February 1965, discussing data from Mariner 4 and IMP 2

09 p1746 A70-23480

Flare star burst energy from radio telescope observations compared with solar flares

10 p1936 A70-23916

Circular polarization time dependent reversals during simultaneous microwave solar bursts at different phases, considering relations to coincident flares

10 p1932 A70-24626

Solar flares period, core and physical nature of areas by measurements at millimeter wavelengths, discussing radio source center

10 p1934 A70-25277

Type 4 solar radio bursts compared with flare observations, geophysical effects and satellite monitors data to detect proton flares spectra

10 p1934 A70-25278

Solar flare videometer for measuring flare area and peak and integrated intensity in real time

11 p2104 A70-25744

Hard X-ray pulse identification with formation of brilliant kernel /11-12 September 1968/ flare by comparison with optical data

11 p2104 A70-25746

Optical and radio homologues of solar flares, studying correlation from astronomical telescope pictures

11 p2105 A70-25747

Onset, mass motion and flash phase in 2b solar flares observed in filtergrams spanning H alpha line

11 p2105 A70-25748

Oblique shock initiated by 7 July 1966 proton flare in solar wind observed by satellite magnetometers outside magnetosphere

11 p2105 A70-26562

Zeeman effect on solar flares metallic lines splitting

11 p2106 A70-26592

Statistical analysis of latitude distribution of magnetically classified sunspot groups and associated flares

11 p2106 A70-26646

Corpuscular sources geoeffectiveness related to position on solar disk at maximum flare activity

11 p2118 A70-26724

Solar flare relation to local magnetic field in active regions, discussing sunspot and weak field measures

12 p2297 A70-26986

VLF and ELF EM wave propagation in earth-ionosphere cavity during solar flares

12 p2183 A70-27189

Microwave solar bursts intensity and polarization measurements at 17 GHz, discussing chromospheric flares and X ray emission

12 p2293 A70-27592

Solar flares of 6 and 8 July 1968 correlation regarding electromagnetic radiation emission, radio flux, corpuscular radiation, etc

12 p2294 A70-27708

Emission asymmetry of solar limb flares, inferring luminescent layer contraction-expansion from spectral qualitative analysis

12 p2294 A70-27859

Solar flares responsible for Faraday rotation events observed in passage of Pioneer 6 radio signal through solar corona

12 p2295 A70-28023

Solar flare proton induced radioactivity in Apollo 11 lunar surface material compared with stony meteorite data, noting cobalt 56 concentration

13 p2489 A70-28910

Spectrograph design and specifications for solar radio flare structure, obtaining constant sum frequency by heterodyne conversion

13 p2406 A70-28948

Proton cosmic ray flare development and spatial structure, discussing magnetic field annihilation process for particle energy and photon ejection

13 p2476 A70-29046

Solar flares number decrease near central meridian noting no sunspot decrease

13 p2477 A70-29047

Visual aurora properties attributed to magnetic storm following solar flare, using multiple channel photometer measurements

13 p2478 A70-29231

Chromospheric flares electron concentration and structure from half widths and Balmer lines numbers

13 p2493 A70-29394

Geoactive ionizing radiation emitted by solar flares having metallic spectral lines of various brightness intensities

14 p2630 A70-30219

X ray and proton flux measurement during solar flare of 29 September 1968 by balloon-borne detectors

14 p2633 A70-31310

Solar proton flare of 2 September 1966, discussing Abastuman observatory photographic observations and radio noise emission changes

15 p2792 A70-31618

Report to COSPAR on Czechoslovakian space research /1969/ covering satellite telemetry and tracking, proton flares, aeronomy, etc

15 p2829 A70-31710

Solar flare particle flux equilibrium anisotropy and convection in solar wind

15 p2793 A70-31901

Intercoms 1 satellite for observing solar UV and X-ray emission in solar flares prediction

15 p2738 A70-32145

Proton Flare Project 1969, reporting synoptic observations of sun and solar terrestrial effects

15 p2794 A70-32291

Solar activity during Proton Flare Project Retrospective Interval 1969, discussing empirical flare forecasting methods

15 p2794 A70-32292

Solar radio burst satellite observation during Proton Flare Project, giving dynamic spectra

15 p2794 A70-32293

Sudden phase anomaly (SPA) in VLF radio wave propagation during Proton Flare Project, noting corresponding solar X-ray flux intensity enhancement

15 p2794 A70-32294

Solar Proton Flare Project 1969, summarizing observations and solar activity-terrestrial event correlation for June retrospective interval

15 p2794 A70-32296

Type 2 and 4 solar radio emission, showing bursts excitation by common shock wave ejected from flare region

15 p2794 A70-32620

Low energy electron emission during solar flares relation to radio and X ray emission

15 p2795 A70-32622

Strong explosion model for analyzing shock wave propagation after chromospheric flare allowing for quasi-radial motion of unperturbed solar wind

15 p2795 A70-32734

Iron line emission at 1.9 A during solar flares observed by OSO-4 proportional counter spectrometer

17 p3150 A70-34836

Solar UV spectrum variations due to flares and solar activity diurnal variations from satellite spectrometry

17 p3161 A70-34894

Solar flare radiation protection requirements, considering bulk and plasma radiation shielding

17 p3040 A70-35647

Slow and fast coronal expansion phenomena associated with solar flares

17 p3152 A70-35869

Proton flares showing enhancement of ionospheric absorption and complex magnetic disturbances

18 p3306 A70-36087

Periodic cosmic ray variations near Southern magnetic pole related to chromospheric flares

18 p3307 A70-36102

Solar flare protons motion in sun radial magnetic field, considering protons interaction with interplanetary field inhomogeneities

18 p3309 A70-36901

Solar proton flares radiometric measurement on-board Molniya 1 satellite, detecting intensities in outer regions of magnetosphere

18 p3309 A70-36902

Solar flares associated interplanetary and terrestrial phenomena by satellite, space probe and rocket observation, investigating solar wind disturbances, geomagnetic storms, ionospheric effects, etc

19 p3493 A70-37472

Flare associated high energy photon and particle fluxes characterized by short rise times and longer lasting decays, discussing plasma emissions

19 p3493 A70-37473

Solar cosmic rays satellite observation, considering flare associated, recurrent and storm particle events and active center associated energetic particles

19 p3493 A70-37474

Solar particle events forecasting based on classification scheme, discussing proton active regions

19 p3493 A70-37476

- Solar flare of 25 February 1969 ground observations comparison to satellite data, measuring magnetic fields, radio emission, sunspots, ionospheric effects, etc 19 p3513 A70-37497
- Solar flare of 25 February 1969 at soft X ray frequencies by ESRO 2 satellite observation 19 p3495 A70-37499
- Interplanetary magnetic field during solar particle event of 25 February 1969 from Heos 1 measurements 19 p3495 A70-37500
- Solar wind discontinuity during solar flare from Heos A measurements, observing shock wave propagation 19 p3495 A70-37502
- Proton spectra and time history in interplanetary space during solar flare by satellite observation, investigating particle flux by shock waves 19 p3495 A70-37503
- Solar protons directional and omnidirectional measurements during particle event of 25 February 1969 by Heos 1 spacecraft, indicating particle diffusion in interplanetary space 19 p3496 A70-37506
- Cosmic ray electron and low energy proton fluxes by satellite-borne detector during solar flare of 25 February 1969 19 p3496 A70-37507
- Solar protons distributions in 1-30 MeV range over northern polar cap during 25 February 1969 solar event by ESRO 1 satellite 19 p3496 A70-37508
- Protons and alpha particles energy spectra during 25 February 1969 solar event from Centaur rocket measurements 19 p3496 A70-37509
- Protons and alpha particles energy spectra following solar flares of 24-25 February 1969 from rocket measurements, estimating proton mean free path 19 p3496 A70-37510
- Electron density measurements by rocket observation during PCA after solar flare of 25 February 1969, deriving effective loss rates in terms of recombination model 19 p3496 A70-37511
- D region positive ion density during solar proton event by Arcas rocket-borne cylindrical electrostatic probe 19 p3411 A70-37512
- Magnetospheric thermal plasma electron density measurement during solar flare byOGO-5 satellite 19 p3411 A70-37513
- Interplanetary shock wave of 26 February 1969, discussing association with solar flares 19 p3513 A70-37517
- Low energy solar protons observation by Esro 1 satellite during solar flare of 25 February 1969 19 p3497 A70-37520
- Syrovtaskii mechanism of high energy particle production near neutral line of magnetic field, noting solar flares occurrence conditions 19 p3478 A70-37581
- Solar flare of 30 October 1968, describing sunspot development 19 p3497 A70-37973
- Solar wind and flare energetic particles properties and interactions, surveying interplanetary magnetic field, planetary bow shock waves, neutrons, neutrinos, etc 19 p3511 A70-38418
- Solar eclipse measurements in 1-30 nm range, examining chromosphere, flares and radio emission 19 p3531 A70-38911
- Solar X ray emission during flares from ionospheric absorption measurements, discussing continuous ionograms method 19 p3512 A70-38912
- Dwarf Me stars flare spectra, examining hydrogen recombination layer and impulse heating of photosphere 20 p3702 A70-39013
- Stratospheric cosmic ray intensity increases unassociated with chromospheric flares 20 p3696 A70-39278
- Solar cosmic rays emission spectrum for 23 February 1956 flare, taking into account nucleon diffusion coefficient dependence on particle rigidity and distance to sun 20 p3697 A70-39287
- Explosive phase of solar flares in nonuniform atmosphere, determining explosion energy and shock wave front shape for various times 20 p3699 A70-39463
- Solar flare parameters, statistical relationships and energy estimates from optical characteristics 20 p3699 A70-39465
- Solar flares catalog with patrol time given on graphs, tabulating principal characteristics 20 p3700 A70-39467
- Solar proton intensity measurement during flare by satellite Proton 3 apparatus 20 p3700 A70-39729
- Solar soft X ray flare spectra of 16 November 1967, examining electron temperatures and emission lines by OSO-4 20 p3700 A70-40419
- Helium-like resonance, intercombination and forbidden transitions of Ca, Si and S lines during 3b solar flare decay 20 p3700 A70-40420
- Correlated microwave bursts between adjacent active regions associated with solar flares 20 p3700 A70-40421
- Umbra flash as magnetoacoustic wave, examining Ca II K line variations formation during adiabatic compression 21 p3885 A70-40958
- Solar flaring on 25 April 1968, examining radio H alpha and X ray emission, magnetic field configuration and temperatures 21 p3879 A70-40959
- Solar flare relation to radio emission at 3.3 mm, discussing sunspots, temperature gradients and magnetic fields 21 p3879 A70-40962
- H alpha flares occurrence in plages with little or no spots 21 p3880 A70-40964
- Soft X-ray enhancement during solar flares due to coronal condensation temperature increase 21 p3880 A70-40969
- Particle acceleration phase in solar flare development, discussing H alpha maximum, hard X ray burst and bremsstrahlung 21 p3880 A70-40971
- Large scale flare associated solar wind disturbances observed by Vela satellites, noting prolonged elevated flow speed after shock 21 p3881 A70-41080
- Nuclear particle tracks in Apollo 11 samples due to galactic cosmic rays and solar flares relationship to dynamic surface processes 21 p3914 A70-41648
- Fe-group cosmic ray exposure tracks in Apollo 11 lunar rock interior, erosion rate and solar flare paleontology 21 p3917 A70-41673
- Shock waves formation and dynamic characteristics in transition region response to infalling material from solar flares 21 p3883 A70-42193
- Temporal sequence correlation between surges and associated flares during solar cycle 22 p4095 A70-43265
- Solar atmosphere three dimensional microstructure observation, considering hypothesis linking flares to magnetic field 22 p4107 A70-43450
- Solar flare effects in ionosphere observed at Lindau, collating with heavy geomagnetic storm 23 p4237 A70-44876
- Solar neutron flux density relation to solar flare of 28 September 1968, using high altitude balloon-borne neutron detector 23 p4238 A70-44925
- Solar flares X ray emission polarization measured by Thomson scattering instrument on Intercosmos-1 satellite 24 p4396 A70-45321
- H alpha solar spray-like prominence ejected in association with bright limb flare, determining knots trajectories and velocities from coronagraph observations 24 p4396 A70-45323
- Solar flare microwave spectra from coherent plasma emission mechanism 24 p4396 A70-45390
- Class 1b solar flare X ray examination, using rocket-borne liquid N cooled solid state detector 24 p4397 A70-45767
- Solar X-ray flare temperature and emission measure profiles usingOGO 5 satellite detector, interpreting energy dispersion of peak times 24 p4397 A70-45768
- Geoactive ionizing radiation emitted by solar flares having metallic spectral lines of various brightness intensities 24 p4398 A70-46294
- SOLAR FLUX**
- Simultaneous filtergrams of velocity and intensity field of central solar disk obtained in blue and red wings of Fraunhofer line 01 p0175 A70-10242
- Stellar X ray sources quanta fluxes estimation based on solar coronal emissions analysis 02 p0360 A70-12793
- Surface roughness effects on radiant heat transfer rate of isolated plane surface with uniform temperature illuminated by collimated solar flux 06 p1172 A70-17178
- Solar radiation flux observation-prediction discrepancies due to Fraunhofer line absorption, studying Balmer continuum as atmospheric model criterion 06 p1148 A70-18451
- Atmospheric ozone content and mass effect on solar radiation flux measured during total solar eclipse of 22 September 1968 07 p1275 A70-20310
- Electric field sense and magnitude determination from lunar particle shadows in solar electron fluxes 13 p2492 A70-29196
- Precision radiometry of electromagnetic energy transfer in atmospheric and space physics emphasizing solar and terrestrial radiative fluxes measurements 13 p2409 A70-29652
- Daily amplitude variability of equatorial electrojet current related to solar extreme ultraviolet radiation /XUV/ influx 15 p2727 A70-31873
- Radiatively interacting adjoin plates in presence of collimated solar flux, considering surface roughness effects on equilibrium temperature distribution [AIAA PAPER 70-817] 16 p3002 A70-33946
- Non-LTE effects on flux and center to limb variation of solar spectrum at 1500-1680 A 17 p3169 A70-35384
- Solar chromosphere model evaluation using sensitivity of flux emission in Lyman continuum 17 p3170 A70-35386
- Solar proton events classification system based on solar flux logarithm 19 p3493 A70-37477
- Solar equatorial limb brightening at quiet sun from solar disk scanning statistical analysis 20 p3712 A70-40418
- Solar radio to optical radius ratio calculated from residual flux measurements during 7 March 1970 solar eclipse 22 p4097 A70-42466
- Phase delay between thermospheric neutral temperature and neutral density, considering frequency dependent time response to solar heat input 23 p4187 A70-43858
- SOLAR FLUX DENSITY**
- NT SOLAR CONSTANT
- Absolute calibration method for daily solar flux density discrepancies measurements at UHF, describing equipment and error analysis 01 p0168 A70-10259
- Nimbus 3 satellite observations of near UV solar flux intensity and variability, describing instrumentation and measurement of radiation producing molecular oxygen photodissociation 02 p0291 A70-12295
- Lyman alpha flux observed by satellite-borne ion chambers during solar flare of 20 March 1966 05 p0902 A70-16442
- Solar radio observations tabulated for radioelectric flux density and behavior for three hour periods, average diurnal results, etc 10 p1940 A70-24414
- Sunspot minimum intensity dependence on area, including correction for blurring or image motion, scattered light and line absorption 13 p2496 A70-29846
- IR balloon observations of absolute solar brightness and stratosphere transparency, discussing BCA and HSRA models 17 p3078 A70-35580
- Solar radio U burst second branch low relative intensity, contradicting previous theory for trajectories 21 p3880 A70-40966
- Near earth solar UV flux measurement by Spades satellite, discussing nonrandom variations and Ca plage regions 21 p3881 A70-41078
- Solar spectral irradiance measurements at different altitudes, using multichannel radiometers 22 p4013 A70-42599
- SOLAR FURNACES**
- High temperature solid-solid reactions and solid-liquid or condensed phase-gas equilibria, using solar furnace 14 p2545 A70-30907
- Solar furnaces in space for treatment of high purity products in space vacuum, discussing design and operational problems 15 p2717 A70-31802
- Temperature measurement of products in solar furnace by IR pyrometers, considering interference filters, reflections parasitic effects, etc 15 p2740 A70-32424
- Parabolic solar furnace for chemical manufacture of impurity sensitive materials in orbiting spacecraft 21 p3804 A70-41001
- High temperature solar furnace for investigating heat resistant protective coatings thermal stability 24 p4350 A70-46331
- SOLAR GENERATORS**
- NT SOLAR CELLS
- GaAs and Si photocell batteries powered by solar radiation, investigating temperature dependence of efficiency I-V characteristics and optimal power 01 p0007 A70-10177
- Soviet papers on semiconductor solar energy converters covering design and tests for thermoelectric, thermionic and photoelectric units, properties, materials, etc 01 p0008 A70-10750
- Semiconductor solar thermoelectric generator allowing thermoelement replacement during service including construction, bridging methods and characteristics 01 p0009 A70-10751

Current-voltage characteristics of cascaded solar thermoelectric generator, determining optimum hot junction temperature as function of radiation concentration

01 p0009 A70-10752

Cascaded thermoelements with high figure of merit for increasing solar thermoelectric generator efficiency, noting high temperature materials effect

01 p0158 A70-10754

Solar energy absorbers and thermal storage devices for high temperature energy conversion to electric power by thermionic or thermoelectric method

01 p0010 A70-10764

Selective glass coatings applications in solar thermoelectric generators working without radiation concentrators

01 p0011 A70-10767

Solar photoelectric power ion propelled probe of asteroid region, describing design and mission planning

[AIAA PAPER 69-1105] 02 p0382 A70-12529

Electric propulsion technology status for auxiliary and solar electric prime propulsion applications

[AIAA PAPER 69-1107] 02 p0356 A70-12530

Solar powered electric propulsion systems for automated missions throughout solar system by extending range of Atlas Centaur-Titan 3-C launch vehicles

[AIAA PAPER 68-1120] 04 p0736 A70-15401

Photoelectric composite multicell solar generator, deriving empirical equation for external I-V characteristic

07 p1196 A70-19623

Solar energy converter with shutter, determining light pulse power from solar light intensity and exposure time

07 p1196 A70-19624

Protective coatings for silicon photosensitive elements to reflect incident energy at wavelengths not participating in conversion into electricity

15 p2677 A70-31599

Solar thermoelectric generator /STEG/ with two stage converter, discussing weight factors and efficiency

15 p2678 A70-32425

Solar electric spacecraft for interplanetary missions including asteroid belt survey, Jupiter flyby and out-of-elliptic survey

[AIAA PAPER 70-645] 16 p2981 A70-33531

High voltage solar arrays for ion engines, discussing spacecraft propulsion, electric generation, insulation integrity, cell degradation and current leakage

[AIAA PAPER 70-1138] 20 p3567 A70-40211

Orbital mission solar energy power conversion system, discussing heat transfer processes for storage feasibility

21 p3951 A70-41852

Semiconductor solar energy converter, deriving conditions for occurrence of photoconductivity quenching

24 p4391 A70-46325

SOLAR GRAVITATION

Jupiter capture of comets with parabolic orbits taking into account solar gravitational influence

05 p0905 A70-15757

Solar oblateness and gravitational quadrupole moment related under assumption of magnetic and velocity fields absence in surface layers, including rotation effects

08 p1570 A70-20902

General relativity equations of gravitation consistent with empirical data, discussing curvature tensor, scalar gravitational waves and solar mass difference

08 p1577 A70-21419

Solar attraction effects on zero-mass body planar motion near triangular earth-moon libration points, obtaining variational equations of motion

09 p1754 A70-22477

Satellite motion in lunar orbit by von Zeipel method, considering perturbations due to nonspherical lunar gravity field and earth and solar attraction

10 p1939 A70-24186

Einstein theory applied to sample modeling of planetary orbits and light beams touching sun in solar gravitational field

10 p1939 A70-24268

Solar charge effects on Mercury perihelion motion, relativistic light deflection and gravitational red shift, using Reissner-Nordstrom solution

11 p2107 A70-25395

Space probe trajectory near second order integration under influence of solar oblateness and gravitation

14 p2635 A70-30288

Radio source 3C279 position during October 1969 occultation by sun, determining SHF deflection in solar gravitational field

16 p2972 A70-33049

Solar potassium resonance line shape and gravitational red shift, using atomic beam technique

17 p3173 A70-35861

Einstein theory applied to sample modeling of planetary orbits and light beams touching sun in solar gravitational field

19 p3520 A70-38393

Solar envelope unstable gravitational mode model, considering spherical harmonics by numerical integration and asymptotic representation

19 p3523 A70-38688

Planetary orbiter parameters long term variations under central body oblateness, solar and atmospheric drag perturbations

[AIAA PAPER 70-1055] 19 p3528 A70-38870

Space-time Riemann metric for scalar-tensor gravitational theories with arbitrary omega parameter

22 p4104 A70-42991

Solar rotation, discussing oblateness, solar wind torque, main sequence stars rotating core, gravitational quadrupole moments and Li and Be depletion

23 p4252 A70-44829

SOLAR HEAT FLOW

U HEAT FLUX

U SOLAR FLUX

SOLAR HEATING

Projector with paraboloid mirror solar radiation condensing lens for studying heat resistant materials mechanical properties at high temperatures

01 p0055 A70-10179

Nonlinear flow conductance and convective terms effects on planetary thermospheres heating diurnal variations, emphasizing solar EUV heating

01 p0178 A70-10413

Solar corona heating by shock waves, considering chromosphere and solar wind physical properties, heat flow channeling, etc

02 p0361 A70-11750

Spacecraft components temperature response predicted in nonstandard solar orientation

04 p0786 A70-15432

Solar heating determination by using transmission factors derived for atmospheric constituents together with spectral irradiance curves outside atmosphere

08 p1573 A70-21032

Solar corona heating, discussing theories of Schwarzschild, Schatzman, Alfvén, Osterbrock, Uchida, Whitaker and Kuperus

09 p1757 A70-22686

Solar radiation heated boilers efficiency and operational temperature range improved by application of coatings, noting surface absorption properties

11 p2148 A70-25930

Criticism of hypothesis regarding solar flash heating mechanism creating glaze within lunar craterlets at Apollo 11 landing site

13 p2489 A70-28912

Optimum overlap design of thin walled tubular extendible spacecraft structures under solar heating in zero-g environment

14 p2657 A70-30762

Total solar radiation calculation for inclined and horizontal surfaces, noting application to solar heating

15 p2774 A70-31803

Heat stress levels in cockpit of AH-1G Hueycobra helicopter parked in sunlight with closed canopy, using sweating copper mannikin

15 p2689 A70-31881

Thin walled spherical shell spacecraft solar heating in planetary surface proximity, considering skin temperature distribution

21 p3944 A70-41019

Temperature distribution in rotating thin cylindrical shell with line conduction discontinuity under solar heating, evaluating tubular elements thermal bending on spinning spacecraft

21 p3951 A70-41875

Transient heating by solar radiation of semitransparent solid medium and adjoining fluid, establishing criteria for maximum fluid temperature

22 p4123 A70-42598

Thermospheric heating by solar radiation in Schumann-Runge continuum, taking height and atmospheric components distribution into account

23 p4188 A70-44060

Chromospheric heating in magnetic field above supergranular cell boundaries, using geometric optics method for energy transport by hydromagnetic shock waves

24 p4400 A70-45304

Uranus and Neptune millimeter wave observations, showing brightness temperatures in excess of black body equilibrium temperatures derived from solar heating

24 p4403 A70-45398

Al alloy sheets with multicolor protective coatings, measuring surface temperature under solar radiation

24 p4428 A70-45434

SOLAR INSTRUMENTS

NT SPECTROHELIOGRAPHS

Solar magnetograph modified to simplify calibration, using polarimeter with special exit slit geometry

11 p2057 A70-26650

OSO 1-6 spacecraft design, payloads and performance for continuous solar observation, discussing instrumentation and Delta launch vehicle characteristics

14 p2638 A70-30691

Photometric calibration changes in EUV solar satellite instruments during orbital operation

15 p2373 A70-32045

Solar spar telescope of Lockheed Solar Observatory with closed tube protection from dust and wind

16 p2911 A70-33794

SOLAR LIMB

Triatomic hydrogen ion role in solar photosphere opacity implied from limb darkening and specific intensity data

11 p2104 A70-25739

Solar limb brightening of XUV lines of carbon, nitrogen, oxygen and silicon ions in chromospheric-coronal transition region

11 p2108 A70-25740

Emission asymmetry of solar limb flares, inferring luminescent layer contraction-expansion from spectral qualitative analysis

12 p2294 A70-27859

Solar limb integrated brightness distribution in continuous spectrum during 20 May 1966 solar eclipse

13 p2498 A70-30003

Solar stray light, determining spread function, limb profile and aureole at various wavelengths

15 p2795 A70-32625

Polar and equatorial limb darkening related to solar rotation and thermal flow, using photospheric models

15 p2807 A70-32812

Solar limb image vibrations, establishing quantitative comparisons between statistical characteristics of fluctuations and weather conditions on propagation path

16 p2979 A70-34179

Solar limb intensity distribution in Lyman alpha line, computing LTE departures

17 p3162 A70-34895

Non-LTE effects on flux and center to limb variation of solar spectrum at 1500-1680 Å

17 p3169 A70-35384

Fe II line behavior in plages near solar limb

17 p3174 A70-35866

Hour-angle and declination center-to-limb profiles of quiet sun 3.3mm brightness temperature distribution

17 p3174 A70-35868

Antenna systems with minimum angular resolving power for solar limb radio sources recording, using data from solar meridian passage

19 p3522 A70-38563

Solar equatorial limb brightening at quiet sun from solar disk scanning statistical analysis

20 p3712 A70-40418

Quantitative measurement of solar limb image motion and blurring, noting role of telescope aperture

20 p3634 A70-40424

Sunspot intensity profiles near solar limb, observing center side penumbra photosphere border

21 p3885 A70-40957

Solar equatorial limb brightening of far UV resonance lines of lithium-like N V, O VI, Ne VIII, Mg X and Si XIII ions, interpreting oso-4 data with coronal model

21 p3924 A70-42185

Solar far UV limb brightening of C III, N III, N IV, O III, O IV and Si IV lines in chromospheric-corona transition region, correcting coronal model for spicule effects

21 p3925 A70-42186

Instrumental and atmospheric observational problems regarding dark mottles, fibrils and H alpha solar limb photographic interpretations

21 p3926 A70-42199

Continuum polarization at solar limb at various wavelengths, using source functions

23 p4246 A70-44754

Solar limb emission spectrum between 300-2803 Å, using Skylark rocket instrumentation

24 p4399 A70-45301

Solar center-limb observations of line brightness and Doppler shift fluctuations for Mg b lines

24 p4399 A70-45302

Solar limb photographic, isodensity and isophotal data for eclipse of 7 March 1970 from coronagraph observations, noting coronal green line and prominence activity

24 p4402 A70-45389

SOLAR MAGNETIC FIELD

Solar structural periodicities in quiescent prominences and filaments, considering plasma instability and supporting magnetic field characteristics

01 p0176 A70-10248

Solar corona magnetic field determination from photospheric magnetic field line-of-sight component observations, describing various mathematical methods

01 p0176 A70-10250

Coronal electron densities and magnetic fields determined from K-coronameter and type 4 radio burst data

01 p0168 A70-10255

Solar magnetic field investigated with parallel beam from coelostat mounting falling on magnetograph slit of solar telescope, noting field polarity change periodicity

01 p0177 A70-10347

Penumbra forms and magnetic polarity distribution relationship in sunspot groups

01 p0184 A70-10955

- Solar mean magnetic field relation to sector structure of interplanetary magnetic field, discussing Explorer 33 and 35 observations 02 p0371 A70-12206
- Radiative energy transport in sunspot region via model computations, obtaining reduced subphotospheric flux estimates for given magnetic field 02 p0372 A70-12254
- Joule dissipation model for sunspot magnetic field, discussing field fine structure and lifetime 02 p0373 A70-12374
- Magnetic structure of type 4 solar outburst from continuous record of 80 MHz image and polarization 03 p0558 A70-13587
- Solar flare cosmic rays confinement to definite solar magnetic field sectors using Laplace transformation 03 p0560 A70-13977
- Magnetic fields neutral lines length as indicator of solar flare productivity 03 p0561 A70-14001
- Solar atmospheric structure near sunspots by spectrophotometry, presenting observational and theoretical sunspot magnetic and velocity field data 04 p0754 A70-15351
- Magnetic vector directions over sunspot near central meridian passage measured, showing axisymmetric arrangement 04 p0758 A70-15697
- Solar magnetic discontinuity fluxes analyzed by studying 27-day cosmic ray and geomagnetic activity variations using linear filtration method 05 p0900 A70-15969
- Mass loss role in early despinning of sun without magnetic field braking effect, considering present surface vs core rotating velocity 05 p0913 A70-16569
- Flares and fast processes interrelation with active region stationary filaments, filament field magnetic envelope explosion stimulation of surges, plasma stream ascents, etc 05 p0904 A70-16910
- Granular and intergranular region solar magnetic field difference detection attempt from line profiles, noting equivalent width increase in ionized Cr line 06 p1142 A70-17989
- Photospheric magnetic flux quantization away from sunspots, studying nonsunspot field strength distribution 06 p1142 A70-17992
- Magnetic and velocity fields in unipolar sunspot, discussing fluctuations associated with penumbral and umbral fine structures 06 p1144 A70-18002
- Solar magnetic field spectroheliographic mapping, discussing detection levels, resolution, applications, etc 06 p1148 A70-18454
- Sunspot magnetic field structure, determining vector field from longitudinal component perspective effect observations 06 p1149 A70-18457
- Electromagnetic acceleration and energy losses of charged chromospheric-coronal plasma electrons and protons in unsteady magnetic fields of sunspots 07 p1384 A70-19417
- Solar flare protons motion in sun radial magnetic field, considering protons interaction with interplanetary field inhomogeneities 07 p1366 A70-19427
- H alpha brightening areas related to sunspot magnetic fields configuration and solar proton flares 07 p1369 A70-20072
- Sunspot group of July 1966, studying umbrae structures relation to magnetic field 08 p1569 A70-20835
- Solar magnetic field strength determination from various absorption lines, considering Rowland intensity, line lower level excitation potential, optical depth, etc 08 p1569 A70-20836
- Faculae and flocculi intensity relationship to orientation of magnetic fields in solar photosphere and magnetosphere 08 p1560 A70-20837
- Longitudinal magnetic field measurement along H alpha line of solar prominence 08 p1560 A70-20838
- Darkening and brightening of disturbed spot on sun surface determined by abnormal stress in seen layers due to magnetic and velocity fields 08 p1570 A70-20903
- Sunspots photospheric layers magnetic field structure, analyzing anomalous Zeeman pi-components in umbra 09 p1757 A70-22685
- Magnetic field and gas thermal conductivity effects in analysis of solar wind as one dimensional, steady and spherically symmetric flow 09 p1745 A70-22687
- Penumbral magnetic field strength on basis of photoelectric spectra of undisturbed photosphere 09 p1757 A70-22730
- Magnetic fields model for quiescent solar prominences with helical structure 09 p1757 A70-22734
- Solar magnetic field measurement emphasizing circular and total polarization characteristics 10 p1939 A70-24275
- Comets ionized shells, studying plasma expansion in corpuscular solar wind magnetic field 10 p1940 A70-24372
- Solar corona magnetic field estimated from type II bursts correlated with photospheric, chromospheric and geophysical phenomenon 10 p1934 A70-25275
- Solar magnetograph modified to simplify calibration, using polarimeter with special exit slit geometry 11 p2057 A70-26650
- Solar flare relation to local magnetic field in active regions, discussing sunspot and weak field measures 12 p2297 A70-26986
- Solar radio types I and III sources spatial distribution of circular polarization and coronal magnetic field configurations in active regions 12 p2294 A70-27710
- Proton cosmic ray flare development and spatial structure, discussing magnetic field annihilation process for particle energy and photon ejection 13 p2476 A70-29046
- Statistical heliographic latitude dependence of dominant polarity of interplanetary magnetic field, using photospheric synoptic chart 13 p2492 A70-29195
- Magnetic field spatial structure in sunspot with photospheric bridge, using photographic observations of solar spectrum lines 13 p2493 A70-29391
- Toroidal solar field emergence to surface forming magnetic field of active region 13 p2493 A70-29392
- Solar magnetic and brightness fields simultaneous measurement by multiimage spectroheliograph 13 p2496 A70-29844
- Photosphere model and magnetic field gradient effects on line contours and magnetographic calibration curves, using nonlinear source function 13 p2496 A70-29845
- Sunspot electric current density accounting for magnetic field abrupt reversal 13 p2496 A70-29848
- Galactic, stellar and solar magnet fields origin, considering fluid motions role 14 p2641 A70-30876
- Sunspot electric current evaluation from analyzing transverse component of magnetic field, discussing difficulties and errors in data reduction 15 p2804 A70-32615
- Line formation in solar magnetic fields with allowance for absorption emission and scattering processes, discussing Hanle effect and atomic level polarization 15 p2804 A70-32617
- Photospheric magnetic fields by magnetograph during and one week before and after eclipse of 7 March 1970 16 p2977 A70-33844
- Magnetic flux measurements in quiescent solar filaments and adjacent photosphere using magnetograph observations 17 p3157 A70-34837
- Chromospheric photoelectric magnetograms with high resolution H alpha pictures for deriving magnetic field directly from filtergrams 17 p3096 A70-35864
- Coronal magnetic bottle at ten solar radii from Faraday rotation measurements of occulted spacecraft radio source 17 p3174 A70-35871
- Solar flare protons motion in sun radial magnetic field, considering protons interaction with interplanetary field inhomogeneities 18 p3309 A70-36901
- Sunspot spectrograms analysis, observing wavelength shift in Zeeman triplet circular components and magnetic splitting inequality under different circular polarizations 18 p3322 A70-37136
- Magnetic field variations and structures in interplanetary space relationship to sun, discussing photospheric field lines random walk transport 19 p3494 A70-37480
- Solar magnetic field origin and behavior, discussing hydromagnetic dynamos, cyclonic convection and generation times 20 p3706 A70-39927
- Sun photographs with violet interference filter, determining photospheric magnetic fields position by cospatial network 20 p3634 A70-40410
- Photospheric pore magnetic field model, investigating pore-sunspot distinctions 20 p3711 A70-40411
- Photoelectric polarimetry of dark unipolar type H sunspot in terms of value and direction of magnetic field vector 20 p3712 A70-40413
- Ratio between mechanical energy flux in nonmagnetic region and magnetic region associated with solar chromospheric mottles 20 p3712 A70-40414
- Solar corona current free magnetic field distribution relationship to plasma density structure 20 p3712 A70-40415
- Coronal streamers structure and evolution from photographic and K-coronameter data, indicating photospheric bipolar magnetic regions as origin 20 p3712 A70-40416
- Photospheric magnetic field differential rotation using synoptic charts for autocorrelation technique 21 p3885 A70-40951
- Solar photosphere vertical velocities and horizontal wave propagation, discussing magnetic fields, phase coherence and behavior and oscillations 21 p3885 A70-40952
- Solar flaring on 25 April 1968, examining radio H alpha and X ray emission, magnetic field configuration and temperatures 21 p3879 A70-40959
- Solar flare relation to radio emission at 3.3 mm, discussing sunspots, temperature gradients and magnetic fields 21 p3879 A70-40962
- Dynamic spectra and two dimensional radioheliograph maps of solar U bursts at 80 MHz consistent with electron streams along loops in coronal magnetic field 21 p3891 A70-41183
- Soft solar X rays cyclic variation from satellite observation, noting relation to sunspot group magnetic field complexity 22 p4096 A70-43301
- Solar atmosphere three dimensional microstructure observation, considering hypothesis linking flares to magnetic field 22 p4107 A70-43450
- Solar activity research, discussing optical facilities, photoelectric magnetographs, magnetic field measurement, solar cycles and flares, etc 23 p4256 A70-45034
- Chromospheric heating in magnetic field above supergranular cell boundaries, using geometric optics method for energy transport by hydromagnetic shock waves 24 p4400 A70-45304
- SOLAR NEBULA**
U SOLAR CORONA
SOLAR NOISE
U SOLAR RADIO EMISSION
SOLAR OBSERVATORIES
NT OSO
NT OSO-B
NT OSO-I
- Sunspot motion statistics for 1965-1967 from observatory data, complementing electron-corona differential rotation and spectroscopic measurements 03 p0571 A70-13597
- High altitude observatory solar magnetograph installation modifications including computer control, improved Zeeman effect observation instrument, etc 04 p0691 A70-15037
- Sacramento Peak Observatory vacuum tower solar telescope and auxiliary instrumentation, providing flexibility in data collection and system adjustment by computer control 04 p0663 A70-15273
- Solar observatory at San Fernando Valley, describing evacuated aperture reflecting telescope function and design, data recording cameras, etc 09 p1688 A70-23772
- Big Bear Solar Observatory, discussing site selection, observatory construction and telescope optical system 12 p2205 A70-26864
- Heliostationary spacecraft for solar observation near libration point between sun and earth, discussing attitude stabilization by solar pressure 17 p3178 A70-35254
- Optical solar observatory for investigation of solar activity and impact on earth environment, discussing site selection and equipment 22 p4005 A70-42349
- Solar optical and radio activity observation in 1968, noting optical-radio data correlation 22 p4095 A70-43259
- SOLAR ORBITS**
NT PERIHELIONS
- Solar motion effects on planetary orbits, discussing preferred coordinate systems of scalar theory of gravitation 01 p0186 A70-11104
- Solar system various natural members examination for suitability to relativistic pericentron motion investigation 02 p0373 A70-12255
- Artificial satellites in short period highly eccentric solar orbits of arbitrary inclination for solar gravitational quadrupole moment measurement to test general relativity 06 p1139 A70-17552
- Heliocentric low thrust spacecraft trajectory analysis using two-variable asymptotic expansion method [AIAA PAPER 70-214] 06 p1145 A70-18064
- Asteroid families and jet streams, searching for regularities and resonances in mean family elements 06 p1151 A70-18491

- Planetary satellites perturbation by sun for elliptical solar orbit, applying Zeipel method to equations of motion 09 p1754 A70-23480
- Solar system planetary mean motions calculation from characteristic equations roots at equilibrium points of restricted three body problem, using Taylor series solution 09 p1760 A70-23915
- Solar corpuscular streams effect on meteoric particles behavior in circular orbit around sun, determining lifetime on basis of mass loss due to pulverization 09 p1763 A70-23382
- Einstein theory applied to sample modeling of planetary orbits and light beams touching sun in solar gravitational field 10 p1939 A70-24268
- Small natural vibrations effect of solar sail-propelled system on heliocentric orbit motion 10 p1950 A70-24319
- Quaternum representation of general relativity applied to geodesic equation and planetary motion, noting difference from Einstein formulation 10 p1944 A70-24859
- Planetary motion zero-rank effects numerical integration, using Hill secular perturbation method and trace of dyadics 14 p2639 A70-30704
- First vector integral of planetary motion different from moment of momentum and Runge-Lenz integrals 15 p2806 A70-32797
- Heliostationary spacecraft at L2 point for solar wind observation, describing mission, instrumentation and spacecraft design 17 p3168 A70-35252
- Heliostationary spacecraft for solar observation near libration point between sun and earth, discussing attitude stabilization by solar pressure 17 p3178 A70-35254
- Perturbative effects of Jupiter moons on spacecraft flyby and postencounter heliocentric trajectories, noting precision targeting [AIAA PAPER 69-932] 18 p3316 A70-36680
- Einstein theory applied to sample modeling of planetary orbits and light beams touching sun in solar gravitational field 19 p3520 A70-38393
- Planetary theory construction to second order of disturbing masses, applying to motions of any set of two or three planets in solar system 19 p3523 A70-38687
- SERT 2 solar array power system in sun synchronous orbit, considering power conditioning and deployment technique [AIAA PAPER 70-1159] 20 p3567 A70-40202
- Titius-Bode law conclusions regarding solar system planetary distances numerical relations, considering planetary evolution 22 p4101 A70-42863
- ### SOLAR PHYSICS
- Solar-terrestrial physics, Terrestrial aspects - IQSY and COSPAR Conference, London, July 1967 01 p0071 A70-10577
- Radiative energy transport in sunspot region via model computations, obtaining reduced subphotospheric flux estimates for given magnetic field 02 p0372 A70-12254
- One dimensional magnetograph scans studying photospheric velocity oscillations and supergranulation, noting downward flows coincident with chromospheric network 03 p0570 A70-13593
- Block diagrams of three stage device for extracting radioactive Ar from perchloroethylene considered for solar nucleus studies 05 p0845 A70-15933
- Time variation of gravitational constant on structure of central solar region and neutrino luminosity 05 p0899 A70-15952
- Gas pressure and pressure stratification in sunspot, using curve of growth analysis 05 p0911 A70-16432
- Limb effect of solar Fraunhofer lines determined by telescope equipped with autocollimated type diffraction spectrograph 05 p0918 A70-16912
- Sunspot magnetic field structure, determining vector field from longitudinal component perspective effect observations 06 p1149 A70-18457
- International data exchange guide for solar terrestrial physics, including listing of stations active during International Years of Active Sun 07 p1377 A70-18937
- Steady state spherically symmetrical ejection of multicomponent plasma from sun determined with hydrogen approximation, considering ion composition 07 p1391 A70-20418
- Solar wind ejection, analyzing regions of heat conducting fluxes and laminar patterns 08 p1561 A70-21059
- Monograph on solar wind covering solar physics, space observation methods, solar system interactions, etc 09 p1745 A70-23475
- Soviet collection of papers on solar and stellar physics covering degenerate gases, variable stars, energy sources, stellar atmospheric and shell models, star clusters, etc 11 p2114 A70-26576
- Book on space physics covering earth radiation belts, atmosphere, ionosphere, and magnetosphere, solar structure and composition, interplanetary space, etc 12 p2309 A70-27973
- Glancing incidence extreme UV telescopes optical design in solar physics applications, employing surfaces of revolution 15 p2736 A70-32029
- Report on ASA meeting in Pasadena February 1969 covering solar observation program, solar temperature inversion, solar spin-down, etc 19 p3518 A70-38014
- Carbon-nitrogen-oxygen isotope bi-cycle function in solar evolution, noting first cycle role in solar energy release and neutrino production 20 p3698 A70-39306
- Astronomy - Conference, Canberra, Australia, December 1969 21 p3890 A70-41176
- Photospheric metallic line profiles numerical experiment, investigating physical processes causing shape and asymmetry change 22 p4101 A70-42866
- ### SOLAR PLASMA (RADIATION)
- #### U SOLAR WIND
- #### SOLAR POSITION
- Solar activity effect on ionospheric total electron content via Explorer 22 observations, discussing relationship to solar elevation angle 02 p0292 A70-12561
- Cosine dependence of F1 critical characteristics on solar zenith angle discriminating alpha neutralization and mixed alpha-beta deionization 06 p1057 A70-17841
- Ionospheric absorption at oblique incidence during IQSY, studying seasonal and diurnal variations as solar zenith angle function 06 p1009 A70-17905
- Solar asymmetries associated with sun motion toward apex related to formation of N-S asymmetries of geomagnetic storms 06 p1144 A70-18011
- Sun-pointing spinning spacecraft attitude control by solar radiation pressure using paddle arrangement without power, sensor and moving parts requirement 11 p2123 A70-26145
- Sky radiation scattering and polarization functions for various solar altitudes at Lomitzer Peak observatory 12 p2294 A70-27674
- Negative sudden phase anomaly (SPA) in VLF radio transmission, noting solar X ray flux intensity and zenith angle effects 15 p2699 A70-32297
- Low latitude boundary of ionospheric absorption during winter anomaly showing enhancement dependence on solar zenith angle 21 p3815 A70-40944
- Position tracking of SOMEX superpressure balloons by solar angle method 24 p4372 A70-45423
- ### SOLAR POWER GENERATION
- #### U SOLAR GENERATORS
- #### SOLAR POWER SOURCES
- #### U SOLAR GENERATORS
- #### SOLAR PROBES
- Flight test results of attitude control device for TACITE rocket probe to explore solar disk and neighborhood [ONERA-TP-762] 03 p0523 A70-13626
- Electrical power system adaptable to intermediate solar probes, discussing thermoelectric, thermionic, photovoltaic systems and battery for energy storage [ASME PAPER 69-WA/SOL-5] 04 p0625 A70-14753
- Surface coating optical and thermal properties investigated in preparation for HELIOS solar probe [DGLR-69-46] 04 p0762 A70-15163
- Tangential thrust, constant acceleration trajectories for close solar probe missions using low thrust electric engines 06 p1137 A70-17177
- Space research in terms of earth environment in space, discussing near-earth spacecraft role in solar, magnetospheric and ionospheric studies 08 p1488 A70-21344
- Spectrometer design for Helios solar probe using semiconductor detectors to identify particles separated by magnetic field 10 p1888 A70-24487
- Solar probe Helios data processing and transmission system, describing block diagram, PCM/PSK/PM telemetry and transmitter 13 p2367 A70-29558
- Space probe trajectory near second order integration under influence of solar oblateness and gravitation 14 p2635 A70-30288
- American-German solar probe HELIOS mission parameters for interplanetary and close proximity solar research, discussing spacecraft building and launching 15 p2801 A70-32281
- German-American HELIOS solar probe for solar wind, interplanetary magnetic field and cosmic rays 16 p2987 A70-34343
- Helios solar probe magnetic field measurements, discussing magnetometer systems, interplanetary magnetic field implications, shock waves, magnetic storms, etc 21 p3923 A70-42172
- Solar probe trajectory optimization, using Venus gravitational field for braking 23 p4243 A70-44506
- Helios solar probe for automated spacecraft exploration of interplanetary space near sun, considering design, mission planning and U.S.-German cooperation 23 p4245 A70-44689
- Helios solar observation satellite equipment design study for solar plasma low energy particles onboard measurements 23 p4262 A70-44844
- Astronomical observations from outside terrestrial atmosphere, discussing vehicles and equipment for solar and stellar research, rocket and balloon data, etc 23 p4257 A70-45043
- ### SOLAR PROMINENCES
- Solar structural periodicities in quiescent prominences and filaments, considering plasma instability and supporting magnetic field characteristics 01 p0176 A70-10248
- Chromospheric flares, loop prominences and filament activation and dissipation attributed to decelerated annihilation of prominence field in upper active region 03 p0557 A70-13218
- Solar protuberance radiation polarization in Ca I 4227 A line, discussing depolarization and electron-and photoexcitation 07 p1384 A70-19416
- Population of P level He excitation in solar prominences in H luminescence regions, noting ionization-recombination mechanism by UV radiation 08 p1564 A70-20555
- Longitudinal magnetic field measurement along H alpha line of solar prominence 08 p1560 A70-20838
- Turbulence in quiescent prominences relationship to shock waves in upper atmosphere 08 p1570 A70-20840
- Sunspots narrow and double K lines probable emission by quiescent type prominences 08 p1575 A70-21372
- Chromospheric flares, loop prominences and filament activation and dissipation attributed to decelerated annihilation of prominence field in upper active region 08 p1562 A70-21651
- Magnetic fields model for quiescent solar prominences with helical structure 09 p1757 A70-22734
- Limb-SD type ascending prominences direction and velocity correlated to flares and solar radio emission 12 p2303 A70-27707
- Sudden disappearance of large quiescent prominence on solar disk with subsequent brightenings, using photospheric and gravitational model 13 p2497 A70-29850
- Solar prominences monochromatic images in He I D3 and He II 4686 lines allowing for contamination in 4686 images 15 p2803 A70-32614
- Solar coronal streamers, considering disk locations, evolution, classification and morphological model 15 p2804 A70-32621
- Population of P level He excitation in solar prominences in H luminescence regions, noting ionization-recombination mechanism by UV radiation 15 p2805 A70-32710
- Magnetic flux measurements in quiescent solar filaments and adjacent photosphere using magnetograph observations 17 p3157 A70-34837
- Solar prominences thermal and dynamical stability in terms of optically thin plasma supported by magnetic field against gravity 17 p3174 A70-35867
- Solar flare of 30 October 1968, describing sunspot development 19 p3497 A70-37973
- Coronal streamers structure and evolution from photographic and K-coronameter data, indicating photospheric bipolar magnetic regions as origin 20 p3712 A70-40416
- Moving type 4 solar burst on 1 March 1969 observed at 80 MHz, discussing plasma cloud associated with prominence 21 p3880 A70-40967
- Coherent motion effects on brightness of clouds moving above photosphere, describing H alpha Doppler brightening and Lyman alpha Doppler dimming in solar prominences 24 p4400 A70-45313

H alpha solar spray-like prominence ejected in association with bright limb flare, determining knots trajectories and velocities from coronagraph observations

24 p4396 A70-45323

SOLAR PROPULSION

Solar electric spacecraft field interaction with space plasma affecting collection and interpretation of scientific data, emphasizing required system configurations and constraints

[AIAA PAPER 69-1106] 01 p0162 A70-10601

Advanced reconnaissance electric planetary spacecraft /AREPS/ concept for repeated coverage of Mars or Venus surface, using solar- photovoltaic system

[AIAA PAPER 69-253] 01 p0196 A70-10837

Electric propulsion technology status for auxiliary and solar electric prime propulsion applications

[AIAA PAPER 69-1107] 02 p0356 A70-12530

Solar electric propulsion /SEP/ for automated planetary missions, discussing system characteristics, capabilities and costs

[AIAA PAPER 69-1103] 02 p0382 A70-12531

Solar powered communications spacecraft weight, electrical power and communication capacity models for optimizing size and launch vehicle fractionation

[AIAA PAPER 69-252] 04 p0763 A70-15412

Spacecraft design, trajectory and mission analyses for multipurpose solar electric propulsion missions, emphasizing modular ion engine and fixed attitude spacecraft designs

[AIAA PAPER 70-212] 06 p1145 A70-18081

Small natural vibrations effect of solar sail-propelled system on heliocentric orbit motion

[AIAA PAPER 70-24319] 10 p1950 A70-24319

Hollow cathode ion thruster and lightweight power conditioner of solar-electric propulsion system for unmanned deep space probes

[AIAA PAPER 70-648] 16 p2966 A70-33546

Solar electric propulsion system performance consisting of thrusters with thrust vector aligning actuators, switching network and flight type power conditioner

[AIAA PAPER 70-1120] 20 p3688 A70-39687

Algorithm for trajectory analysis in closed loop terminal guidance of solar electrically thrusted interplanetary spacecraft

[AIAA PAPER 70-1152] 20 p3670 A70-40203

Optimized trajectories and spacecraft for solar-electric missions to asteroids, using chemical booster for injection

[AIAA PAPER 70-1120] 20 p3710 A70-40223

Solar electric propulsion Mars high data rate orbiter trajectory design and analysis, including landing site selection and spacecraft parameters optimization

[AIAA PAPER 70-1119] 20 p3710 A70-40224

Solar electric propulsion application to out-of-ecliptic mission for interplanetary fields and particles data, comparing performance with chemical systems

[AIAA PAPER 70-1118] 20 p3691 A70-40225

Interplanetary solar electric spacecraft performance improvement by mission mode including earth swing-by maneuver in solar orbit inclined to ecliptic

[AIAA PAPER 70-1117] 20 p3710 A70-40226

Primary solar electric propulsion for automated space transportation propulsion program, considering performance and technology readiness

[AIAA PAPER 70-1115] 20 p3691 A70-40228

Solar electric propulsion systems technology development at JPL, discussing performance data and relationship to spacecraft requirements

[AIAA PAPER 70-1153] 20 p3695 A70-40520

Solar electric propulsion unmanned asteroid belt probe, discussing propulsion system, flux data acquisition, etc

[AIAA PAPER 70-1121] 20 p3717 A70-40525

Three axis attitude ion thrust vector control mechanism for solar electric propulsion spacecraft, discussing gimbal and translation actuators, array and cabling

[AIAA PAPER 70-1156] 21 p3759 A70-41784

Multimission solar electric spacecraft propulsion module design for Asteroid Belt, Jupiter and out-of-ecliptic missions, including thruster failure and power conditioning requirements

[AIAA PAPER 70-1155] 21 p3868 A70-41785

Solar-electric ion propulsion mission analysis and spacecraft designs, discussing thruster, power conditioning, propellant storage and feed, etc

[AIAA PAPER 70-1121] 23 p4234 A70-44631

SOLAR PROTONS

Sudden cosmic noise absorption /SCNA/ in polar cap during 7 July 1966 solar proton flare, estimating SCNA latitudinal distribution and protons magnetic cut-off boundary

[AIAA PAPER 70-1127] 01 p0172 A70-11527

Solar microwave burst of 30 March 1969 associated with behind-limb proton flare, studying burst spectrum

[AFRL-70-0141] 02 p0358 A70-12200

Low energy solar proton flux propagation model in interplanetary medium based on satellite data beyond earth magnetosphere

04 p0737 A70-14434

IMP F solid state detector data on 13 day solar proton event at low energy, considering cosmic rays anisotropy and interplanetary magnetic field

04 p0738 A70-14512

Solar proton latitude profiles relation to outer radiation zone electron measurements by Alouette 2 satellite charged particle detectors during quiet magnetic conditions

04 p0740 A70-15105

VLF phase disturbances and HF absorption during solar proton events of 28 August and 2 September 1966 related to proton intensities, energies and cut-off latitudes

04 p0741 A70-15124

Solar particle events 1966 /August-September/ in McMath region 8461

05 p0901 A70-16426

Solar radio emission intensity-solar flare index and 5303 A coronal line intensity-proton flare numbers relations

05 p0911 A70-16438

Solar flare alpha to proton flux ratios on 23 May 1967 observed following interplanetary disturbances, suggesting electric fields as cause of modulations

05 p0902 A70-16444

Relativistic solar proton propagation fluctuation effects in interplanetary magnetic field during cosmic ray intensity increase

05 p0903 A70-16731

Spectral characteristics of solar proton flare on 2 September 1966 noting light intensity variations

05 p0904 A70-16911

Local time dependence of geomagnetic cut-offs for solar protons in 0.52-4.0 Mev range from satellite observations

06 p1136 A70-18529

X ray and H alpha emissions associated with solar proton flares, correlating rise time with solar cosmic rays

06 p1137 A70-18547

Solar flare protons motion in sun radial magnetic field, considering protons interaction with interplanetary field inhomogeneities

07 p1366 A70-19427

Solar proton flares radiometric measurement on-board Molniya 1 satellite, detecting intensities in outer regions of magnetosphere

07 p1366 A70-19428

H alpha brightening areas related to sunspot magnetic fields configuration and solar proton flares

07 p1369 A70-20072

Solar protons captured in earth dipole trap, discussing conditions for nonadiabatic escape

07 p1374 A70-20442

Solar protons in subpolar stratosphere during solar activity minimum indicated from proton measurements at Tiksi Bay

07 p1374 A70-20444

Cosmic rays sudden intensity increases during proton flares of 28 January 1967 and 7 July and 2 September 1966, plotting proton density vs pressure

07 p1374 A70-20445

Solar proton flux increases associated with sudden commencements observed by geostationary ATS-1 satellite

08 p1562 A70-21378

Heliocentric longitude intensity profiles of protons associated with solar flare of 5 February 1965, discussing data from Mariner 4 and IMP 2

09 p1746 A70-23480

Proton injection into radiation belt, comparing solar neutron decay /SND/ and cosmic ray albedo neutron decay /CRAND/ as proton sources

09 p1746 A70-23489

Radiation hazard to space vehicles by solar flare protons, calculating risk dose by computerized Monte Carlo simulation, applying importance sampling

10 p1934 A70-25190

Type 4 solar radio bursts compared with flare observations, geophysical effects and satellite monitors data to detect proton flares spectra

10 p1934 A70-25278

Oblique shock initiated by 7 July 1966 proton flare in solar wind observed by satellite magnetometers outside magnetosphere

11 p2105 A70-26562

Low energy solar proton flux propagation model in interplanetary medium based on satellite data beyond earth magnetosphere

13 p2475 A70-28459

Proton cosmic ray flare development and spatial structure, discussing magnetic field annihilation process for particle energy and photon ejection

13 p2476 A70-29046

Solar protons and electrons spatial and angular distributions over polar caps by USAF-OAR satellites 1966-70A, 1967-72D and 1968-59A

13 p2482 A70-30073

Low energy charged particle distribution within earth magnetosphere and environs, suggesting solar origin for storm time ring current protons

13 p2483 A70-30089

Solar proton flare of 2 September 1966, discussing Abastuman observatory photographic observations and radio noise emission changes

15 p2792 A70-31618

Solar proton structure across polar cap and anomalous latitude cut-off explained by local pitch angle variations

15 p2792 A70-31672

Proton Flare Project 1969, reporting synoptic observations of sun and solar terrestrial effects

15 p2794 A70-32291

Solar activity during Proton Flare Project Retrospective Interval 1969, discussing empirical flare forecasting methods

15 p2794 A70-32292

Solar radio burst satellite observation during Proton Flare Project, giving dynamic spectra

15 p2794 A70-32293

Sudden phase anomaly /SPA/ in VLF radio wave propagation during Proton Flare Project, noting corresponding solar X-ray flux intensity enhancement

15 p2794 A70-32294

Polar cap disturbance of 7 June 1969 due to small proton enhancement, describing detection by transpolar VLF phase measurement

15 p2794 A70-32295

Solar Proton Flare Project 1969, summarizing observations and solar activity-terrestrial event correlation for June retrospective interval

15 p2794 A70-32296

Tiros solar proton monitor program, describing detector design, operational data processing and early warning network

17 p3180 A70-35304

Solar protons penetration into magnetosphere and magnetotail

18 p3306 A70-36004

Proton flares showing enhancement of ionospheric absorption and complex magnetic disturbances

18 p3306 A70-36087

Solar flare protons motion in sun radial magnetic field, considering protons interaction with interplanetary field inhomogeneities

18 p3309 A70-36901

Solar proton flares radiometric measurement on-board Molniya 1 satellite, detecting intensities in outer regions of magnetosphere

18 p3309 A70-36902

Solar particle events forecasting based on classification scheme, discussing proton active regions

19 p3493 A70-37476

Solar proton events classification system based on solar flux logarithm

19 p3493 A70-37477

Temporal and spectral changes in solar protons and alpha particles access to synchronous altitude in magnetosphere

19 p3494 A70-37485

Low energy solar protons temporal and spatial variations in magnetosphere by data comparison from polar orbiting satellite and Explorers 33 and 34

19 p3494 A70-37486

Polar cap absorption correlation with solar protons flux into magnetosphere, discussing diurnal and spatial variations and magnetic storm effects

19 p3411 A70-37492

Proton spectra and time history in interplanetary space during solar flare by satellite observation, investigating particle flux by shock waves

19 p3495 A70-37503

Solar cosmic ray protons and electrons increase during 25 February-5 March 1969 observed by Venus 5 and 6 space probes, discussing interplanetary medium disturbance

19 p3495 A70-37504

HEOS 1 low energy proton measurements in interplanetary space, discussing particle direction during solar event and anisotropy time history

19 p3495 A70-37505

Solar protons directional and omnidirectional measurements during particle event of 25 February 1969 by Heos 1 spacecraft, indicating particle diffusion in interplanetary space

19 p3496 A70-37506

Solar protons distributions in 1-30 MeV range over northern polar cap during 25 February 1969 solar event by ESRO 1 satellite

19 p3496 A70-37508

Protons and alpha particles energy spectra during 25 February 1969 solar event from Centaur rocket measurements

19 p3496 A70-37509

Protons and alpha particles energy spectra following solar flares of 24-25 February 1969 from rocket measurements, estimating proton mean free path

19 p3496 A70-37510

D region positive ion density during solar proton event by Arcas rocket-borne cylindrical electrostatic probe

19 p3411 A70-37512

- Ionospheric electron density and temperature variation measurements after solar proton event of 25 February 1969, using ESRO 1 satellite
19 p3411 A70-37514
- Energetic storm particle events observation, noting association with solar protons and interplanetary shock waves
19 p3496 A70-37518
- Low energy solar protons observation by Esro 1 satellite during solar flare of 25 February 1969
19 p3497 A70-37520
- Solar proton intensity measurement during flare by satellite Proton 3 apparatus
20 p3700 A70-39729
- Atmospheric neutron flux increase during solar proton event, measuring flux and energy spectrum of particles by balloon sounding
21 p3881 A70-41076
- Low energy solar protons penetration, examining geomagnetic cutoff latitude during magnetically disturbed period
21 p3881 A70-41077
- Solar wind proton properties examined by Vela 3, observing density distribution, flow speed and direction, thermal anisotropy, magnitude and orientation
21 p3881 A70-41081
- Solar wind instability from TEM waves propagating parallel to magnetic field in electron-proton plasma
23 p4235 A70-43826
- Solar proton events indication by 15.8 mm bursts during 1968
24 p4401 A70-45324
- VLF phase disturbances, HF absorption and solar protons in 1967 PCA events, using ionization model
24 p4314 A70-46128
- SOLAR RADAR ECHOES**
Solar radar echo characteristics, discussing coronal compressional waves and refraction by plasma clouds and moving plasma irregularities
13 p2370 A70-29852
- SOLAR RADIATION**
NT SOLAR CORPUSCULAR RADIATION
NT SOLAR COSMIC RAYS
NT SOLAR PROTONS
NT SOLAR RADIO BURSTS
NT SOLAR RADIO EMISSION
NT SOLAR WIND
NT SOLAR X-RAYS
NT SUNLIGHT
NT TYPE 2 BURSTS
NT TYPE 3 BURSTS
NT TYPE 4 BURSTS
NT TYPE 5 BURSTS
Disk-shaped Mo and Nb specimens solar radiation reflection and absorption characteristics observed for temperature effect
01 p0117 A70-10176
- Solar Mg II doublet and XUV images obtained by Fabry-Perot interferometer mounted in Skylark spectrograph
01 p0177 A70-10339
- Solar radiation pressure effects on zodiacal dust particle orbital velocity, computing Doppler shift of H-beta absorption line as function of elongation
01 p0070 A70-10348
- Optical measurements of mirrors reflectance and solar radiation transmittance to solve problems specific to solar energy engineering by standard optical equipment
01 p0010 A70-10765
- Cosmos 149 meteorological satellite telephotometers for measuring reflected solar radiation from earth
01 p0095 A70-11612
- Absorption band observation near 0.43 μ in solar spectra and scattered radiation of sky, determining nontelluric origin
01 p0084 A70-11613
- Solar UV radiation reflected from Echo satellites measured and compared with UV fluxes from Lyrae
01 p0095 A70-11614
- Secular and short period perturbations calculation of satellite orbital elements under action of solar radiation pressure
02 p0362 A70-11763
- Period changes of satellite 1963 53 A due to accelerations from atmospheric drag and solar radiation pressure
02 p0362 A70-11764
- Absorption of EUV sunlight by Jupiter upper atmosphere, discussing photoelectron energy loss, thermal equilibrium and heating efficiencies
02 p0367 A70-11816
- Solar radiation influence on Alouette satellite spin behavior with long flexible antennae, taking into account sunlight/shadow history and solar vector inclination
02 p0380 A70-11852
- Atmospheric penetration of UV and visible solar radiation during twilight, oxygen and ozone absorption, Rayleigh scattering and atmosphere refraction
02 p0357 A70-12155
- Earth climatic control by reflecting satellites producing artificial solar irradiation
03 p0581 A70-13835

- Solar IR light brightness distribution reflected by volcanic covers compared with lunar observation data
04 p0744 A70-14439
- Extraterrestrial solar spectral irradiance at earth mean solar distance within 300 to 2500 nm wavelength region, from NASA CV-990 aircraft research flights
04 p0690 A70-15019
- Excitation of H-alpha and H-beta lines in night sky, calculating solar L radiations variation with altitude
04 p0679 A70-15075
- Solar Lyman-alpha radiation observed by OGO 4 spacecraft showing short term fluctuations superposed with monthly variation
04 p0741 A70-15128
- Solar and sky far IR radiation in upper atmosphere, estimating precipitable water quantities and low absorption regions
04 p0681 A70-15521
- Simulation equipment for extraterrestrial solar radiation for spacecraft components evaluation tests, describing spectral characteristics
04 p0665 A70-15663
- Ionospheric inhomogeneities motion and vertical profile of atomic oxygen concentration associated with solar particle absorption in upper layer
04 p0681 A70-15724
- Solar structure models for neutrino flux prediction compared with solar structure, suggesting modification in solar and stellar evolution calculations
05 p0906 A70-15895
- Solar neutrino spectroscopy using various radiochemical detectors for Be 7, N 13, O 15 and B 8 neutrino fluxes, noting Li 7 suitability for determining CNO cycle
05 p0898 A70-15949
- Deuteron splitting by solar neutrinos for neutrino detection, describing deuterium scintillation detector characteristics
05 p0899 A70-15954
- Gallium trichloride and aqueous solution of lithium chloride as solar neutrino detectors
05 p0899 A70-15956
- Solar neutrinos detection from recording high energy electrons in reactions, using Li 7, Be 9 and B 11 as detectors
05 p0899 A70-15964
- Experimental determination of solar neutrino activity from interaction cross section between neutrinos and target nuclei
05 p0900 A70-15965
- Earth and atmosphere effect on solar radiation balance in Southern Hemisphere
06 p1054 A70-17413
- Radiation scattering during upper cloud altitude determination by satellite
06 p1097 A70-17790
- Instantaneous and integral solar irradiance of earth orbiting satellite surface, noting solar illumination nomogram representation
06 p1155 A70-17893
- Space forecasting system to predict solar radiation bursts and effects on earth
06 p1136 A70-18023
- Light intensity and polarization in twilight sky atmosphere at solar depressions
07 p1263 A70-19047
- Spin decay from telemetered flight data of Explorer 20 compared with calculation based on solar influence theory
07 p1394 A70-19721
- Lepton charge and neutrino astrophysics, discussing oscillations role in solar neutrino detection difficulties
07 p1371 A70-20329
- Interkosmos-1 satellite for studying solar radiation and effects on ionization and molecular dissociation in atmosphere, weather and radio signals reception
08 p1582 A70-20714
- Solar radiation reflection function for plane-parallel atmosphere with isotropic phase function calculated by successive scattering method, noting application to planetary atmospheres
08 p1571 A70-20909
- Center to limb variation of solar brightness measured at 5, 10 and 20 microns, discussing data collection and reduction and previous IR and UV measurements
08 p1562 A70-21396
- Solar meter wave emissions enhancement or emission centers, comparing radio and optical coronal enhancements
08 p1576 A70-21402
- OI 6300 A airglow intensity decrease at dawn ascribed to scattered solar radiation
08 p1492 A70-21720
- Solar radiation variations effect on earth climate, noting atmospheric transparency role in glaciation on thermal regime
08 p1539 A70-21919
- Climate variations and earth orbital elements secular perturbations, noting solar radiation and celestial mechanics roles
09 p1666 A70-22177
- Solar continually changing features (brightenings, darkenings, condensations and groupings) associated

with solar activity, emphasizing sunspot number formulas

- Earth shadow effect on solar radiation pressure induced short periodic perturbations of satellite orbits
09 p1751 A70-22197
- Thermal controls for spacecraft in space and planetary atmospheres, including heat inputs by solar radiation and planetary albedos
09 p1761 A70-23054
- Reflection patterns of solar radiation from cloud, water and land surfaces measured by airborne radiometer, observing anisotropy
09 p1789 A70-23130
- Reflected solar radiation polarization over land, sea and cloud surfaces to determine atmospheric pollution
09 p1747 A70-23603
- Ionospheric photoelectrons resulting from solar UV radiation interaction with atmospheric gases, obtaining escape fluxes using Monte Carlo method
09 p1747 A70-23667
- Solar radiation energy distribution simulated using vacuum monochromator, discussing Ar-Kr-Xe-methane mixture
10 p1931 A70-24317
- Cosmic radiation low energy positrons flux estimation compared with calculation from solar modulation models
10 p1932 A70-24537
- Radiation scattering during upper cloud altitude determination by satellite
10 p1913 A70-25022
- Polarization of solar scattered radiation measured by radio probes for aerosol particle concentration and size distribution as function of altitude
10 p1884 A70-25253
- Solar XUV lines photon flux based on one dimensional model of chromosphere-corona transition region
10 p1949 A70-25271
- Solar simulation laboratory test facility for extraterrestrial solar radiation effects on vehicles beyond earth atmosphere, emphasizing spectral filters
11 p2030 A70-25353
- Atmospheric absorption by ozone of solar radiation measured by balloon-borne spectrometer in 9-10 micron region
11 p2045 A70-25627
- Solar moustaches /transient emissions/ far wing asymmetry studied photometrically
11 p2109 A70-25745
- Global distribution and intensity of solar radiation, determining radiation of satellites and other high altitude devices
11 p2105 A70-26010
- Corrugated skins solar absorbance and IR emittance computed for spacecraft thermal design, analyzing other nondiffusive radiative enclosures
11 p2150 A70-26352
- Ionosphere dynamo region thermal input by Joule heating and solar radiation and coupling to various thermotidal modes, observing semidiurnal and semianual effects
11 p2047 A70-26569
- Solar radiation effects on evaporation of dust with high latent heat of vaporization, considering particles in comets and zodiacal cloud
11 p2117 A70-26648
- Solar radiation transmitted and reflected by earth atmosphere, solving absorption and scattering by computer programs
12 p2262 A70-26951
- Solar light brightness distribution reflected by volcanic covers compared with lunar observation data
13 p2485 A70-28464
- Soviet book on solar short wave radiation effects on ionosphere, covering solar atmosphere and spectra, ionospheric ion concentration vertical distribution, etc
13 p2487 A70-28649
- Solar spectra recording by balloon-borne monochromator, measuring stratospheric IR absorption
13 p2491 A70-29050
- Sun-planet-particle problem, considering solar radiation total pressure, Lagrangian solutions instability and differential equations of motion
13 p2494 A70-29400
- Solar radiation absorption by atmospheric ozone observations by ground stations for meteorological data
13 p2400 A70-29642
- Circumsolar sky radiation effect on pyrheliometric measurements, considering atmospheric scattering and turbidity
13 p2400 A70-29660
- Solar and terrestrial radiation measurements and computations in meteorology, considering diffuse radiation and radiative transfer in atmosphere
13 p2410 A70-29661
- Evaporated multilayer optical bandpass filters in solar radiation technology, discussing design and construction
13 p2411 A70-29665
- Lunar horizontal and inclined surfaces net radiation and components, discussing surface temperature, thermal emission and absorbed solar radiation
14 p2634 A70-30194

- Thermospheric heating and conversion efficiency of short wave radiation as functions of solar radiation spectral flux, atmospheric components concentration and elementary processes cross sections
14 p2569 A70-30212
- Sun glitter on sea surface from space photographs, considering wind and sea conditions effect on shape and brightness of patterns
14 p2572 A70-30345
- Field characteristics of solar radiation reflected and scattered into outer space by earth atmosphere, discussing brightness and angular distribution of outgoing component
14 p2603 A70-30406
- Ionospheric inhomogeneities motion and vertical profile of atomic oxygen concentration associated with solar particle absorption in upper layer
14 p2575 A70-30808
- Angular distribution of diffusely reflected solar rays over spherical shell planetary atmosphere, determining halo brightness
14 p2632 A70-31222
- Earth satellite motion about center of mass, examining effects of random variations in atmospheric density, geomagnetic intensity and solar radiation
15 p2809 A70-31650
- Solar extreme UV radiation measurements over rotation period onboard satellite OSO-3, using atmospheric absorption correction
15 p2792 A70-31666
- Report to COSPAR on Netherlands space research /1969/ including solar and stellar X radiation and UV spectrophotometry, cosmic ray measurements, satellite geodesy, etc
15 p2830 A70-31719
- Total solar radiation calculation for inclined and horizontal surfaces, noting application to solar heating
15 p2774 A70-31803
- Solar radiation and aureole measuring instrument composed of telescope, double monochromator, amplifier and recorder
15 p2735 A70-31807
- Solar simulation systems for uniform collimated intense light, noting high intensity lamp development
15 p2717 A70-32034
- Rocket and satellite data on upper atmospheric neutral/charged particles, short wave solar radiation, temperature and photochemical reactions
15 p2730 A70-32089
- Solar, clear sky and overall radiation characteristics, calculating incidence of light and radiation in room interiors
15 p2732 A70-32461
- Solar stray light, determining spread function, limb profile and aureole at various wavelengths
15 p2795 A70-32625
- UV solar opacity observations, comparing solar model predictions
17 p3160 A70-34884
- Solar corona radiation at 1-100 A for 1-10 million K, using Jordan ionization equilibrium calculations
17 p3151 A70-35582
- Solar and IR radiation distribution in multiple scattering and absorbing ground fog, obtaining intensities, fluxes and vertical divergence
18 p3284 A70-35943
- Latitude profiles made of low energy solar electrons over polar cap, finding latitude knee position
18 p3306 A70-36020
- Laminar heat transfer in circular tube under solar radiation in space
18 p3347 A70-36503
- Human bioclimatology at high altitude, discussing energy balance in terms of net solar and terrestrial radiation balance in mountain area
19 p3367 A70-37369
- Balloon-borne spectrophotometer with diffraction grating for upper atmospheric solar radiation attenuation measurement
19 p3422 A70-37639
- Fine structure of solar radiation-induced electrostatic fields on dielectric surface of comets and meteoroids
19 p3514 A70-37656
- Angular and geometric properties of actinometers, pyrheliometers and photometers, measuring direct and scattered circumsolar radiation
20 p3625 A70-39028
- Correction procedures for measurement errors in actinometers and pyrheliometers caused by circumsolar radiation
20 p3625 A70-39029
- Inverse beta decay thermonuclear reactions induced by neutrinos proposed for neutrino detection from solar interior
20 p3704 A70-39471
- Atomic hydrogen emissions in dayglow, considering excitation by resonance absorption of solar radiation
21 p3812 A70-40728
- D region electron density profiles from high power wave interaction measurements during solar flare, indicating non-X-ray production rate
21 p3879 A70-40942
- Lunar luminescence phenomena, examining gas eruptions from volcanic activity, solar radiation and color
21 p3886 A70-41070
- Apollo 11 lunar fines, investigating solar radiation effects on optical properties by standing and heating
21 p3915 A70-41660
- Silicon solar cell design optimization for near solar missions, discussing electrical characteristics and performance obtainable under various solar radiation conditions
22 p3964 A70-42496
- Global solar radiation climatology of earth including direct and diffusive radiation
22 p4013 A70-42600
- Upper atmosphere electric field nature, considering solar radiation as major source of ionization
22 p4017 A70-42788
- Vertical atmospheric ozone distribution according to direct solar radiation received on ground, using UV and IR observations
22 p4023 A70-43296
- Upper atmosphere photoionization by extreme UV solar radiation compared with ionization by charged particles collisions
22 p4096 A70-43302
- E region winds response to solar radiation variations, including geomagnetism role
23 p4186 A70-43848
- Solar L alpha absorption in upper atmosphere, using rocket-borne ionization chamber
23 p4191 A70-44270
- Solar atmosphere radiation and structure, discussing continuum and line spectra, solar rotation, chromosphere, spicules, etc
23 p4256 A70-45035
- Atmosphere and earth-reflected solar radiation pressure effects on high altitude satellite orbits
24 p4408 A70-45555
- Satellite orbit perturbation due to earth reflected or reradiated solar radiation pressure
24 p4409 A70-45556
- Solar XUV and soft X ray photometry, describing sounding rocket and satellite grazing incidence spectrometers
24 p4339 A70-45822
- D2A satellite optical experiments, examining atmospheric atomic H and solar and extraterrestrial I216 A emission
24 p4339 A70-46094
- Sunlight induced pyrimidine dimers formation in human cells in vitro, relating DNA lesions by 254 nm irradiation
24 p4304 A70-46139
- Optical solar polarization broadband measurement interpretation with depolarization factor due to elastic collisions or additional source
24 p4414 A70-46172
- Mm wavelength radiometer for recording solar activity and radiation attenuation in atmosphere as function of time
24 p4315 A70-46236
- Thermospheric heating and conversion efficiency of short wave radiation as functions of solar radiation spectral flux, atmospheric components concentration and elementary processes cross sections
24 p4331 A70-46287
- SOLAR RADIATION OBSERVATION**
U SOLAR RADIATION
SOLAR RADIATION SHIELDING
Expandable rigidizable solar shields operational, structural and thermal performance tests conducted with spherical models for cryogenically fueled space vehicles
12 p2312 A70-27131
- Thermal testing of inflatable solar shields for cryogenic space vehicles, discussing shield misalignment effects on propellant tank temperatures [AIAA PAPER 70-856]
16 p2982 A70-33901
- Solar flare radiation protection requirements, considering bulk and plasma radiation shielding
17 p3040 A70-35647
- SOLAR RADIO BURSTS**
NT TYPE 2 BURSTS
NT TYPE 3 BURSTS
NT TYPE 4 BURSTS
NT TYPE 5 BURSTS
Polarized and unpolarized impulsive solar centimeter radio bursts spectral peak interpretations
01 p0168 A70-10253
- MHD model for microwave solar circular polarization bursts interpretation, suggesting Alfvén wave disturbances in solar atmosphere
01 p0168 A70-10254
- Absolute calibration method for daily solar flux density discrepancies measurements at UHF, describing equipment and error analysis
01 p0168 A70-10259
- Sudden frequency deviation (SFD) correlation with solar radio bursts at different frequencies following inverse square law of intensity
01 p0171 A70-10871
- Solar microwave burst of 30 March 1969 associated with behind-limb proton flare, studying burst spectrum [AFCRL 70-0141]
02 p0358 A70-12200
- Pencilbeam scanning observations of solar bursts revealing recognizable postincrease phase
03 p0558 A70-13588
- Solar radio bursts time-variable structure at 12 M wavelength recorded on Ediswan pen oscillograph
06 p1144 A70-18005
- Metric type I and decametric type III bursts relationship, suggesting common generation by high energy electron outward streams from photosphere or low chromosphere
06 p1150 A70-18466
- Solar bursts of enhanced intensity at millimeter wavelengths suggested for limb brightening mechanism
06 p1153 A70-18545
- Contraction and expansion in solar region producing synchrotron emission of relativistic electrons to explain solar burst behavior
08 p1560 A70-20841
- Catalog of solar radio bursts recorded at 208 MHz during IGY and IQSY
08 p1570 A70-20843
- Localized high energy flaring of active center monitored with time-associated radio bursts in spot umbrae
08 p1561 A70-20905
- Solar microwave bursts with double structure, discussing single frequency observations and flare patrols, time variations of flux density and brightness
08 p1561 A70-21259
- Solar activity analysis emphasizing sunspots, magnetic disturbances and bursts data
09 p1752 A70-22199
- Solar U-burst radiospectrographic observations, investigating disturbing trajectories and longitudinal distribution in combination with model coronal condensation
09 p1758 A70-22737
- Circular polarization time dependent reversals during simultaneous microwave solar bursts at different plages, considering relations to coincident flares
10 p1932 A70-24626
- SID observed as VLF phase anomalies correlated with solar microwave radio bursts
10 p1933 A70-24816
- Narrow band radiation from longitudinal plasma waves nonlinear interactions during solar bursts, comparing flux intensities for Corona single or double shock wave frequencies
10 p1934 A70-25272
- Solar radio bursts dynamic spectra by magnetic tape recording of digital signal, obtaining frequency and time profiles and intensity layers
10 p1934 A70-25276
- Optical and radio homologues of solar flares, studying correlation from astronomical telescope pictures
11 p2105 A70-25747
- Solar microwave bursts polarization reversal mechanism, considering radiating electrons gyrosynchrotron absorption
11 p2106 A70-26617
- Microwave solar bursts intensity and polarization measurements at 17 GHz, discussing chromospheric flares and X ray emission
12 p2293 A70-27592
- Solar plasma and energy and radiation fading during microwave bursts due to synchrotron radiation losses, determining magnetic field strength
12 p2294 A70-27593
- Gyrosynchrotron emission from nonthermal electrons trapped in magnetic dipole field to interpret center-to-limb spectrum and polarization variations of microwave impulsive bursts
12 p2294 A70-27709
- Solar radio emissions of types I, II, III and IV activity and polarization during 18-26 May 1967 observed by narrow-band timesharing polarimeter
12 p2294 A70-27711
- Spectrograph design and specifications for solar radio flare structure, obtaining constant sum frequency by heterodyne conversion
13 p2406 A70-28948
- Galactic noise spectrum and solar radio bursts in hecto-decametric wave region observed by Alouette 2 satellite
13 p2491 A70-29093
- Circularly polarized emission from types I and 4 bursts and noise storms, considering mode coupling in warm plasma, gyroradiation and Cerenkov radiation
13 p2479 A70-29851
- Type I solar radio burst chains during noise storms, determining lifetime, bandwidth, frequency drift and fine structure
13 p2479 A70-30002
- Solar radio burst satellite observation during Proton Flare Project, giving dynamic spectra
15 p2794 A70-32293
- Type I burst effects on type III and V bursts occurrence, suggesting Langmuir waves excited by suprathermal electrons
17 p3173 A70-35746

- Solar radio bursts recording by spectrographs in 500-1500 MHz band, discussing sensitivity 18 p3307 A70-36109
- Correlated microwave bursts between adjacent active regions associated with solar flares 20 p3700 A70-40421
- Solar radio U burst second branch low relative intensity, contradicting previous theory for trajectories 21 p3880 A70-40966
- Complex burst of 2 September 1966, comparing dynamic radio spectra from Culgoora and Weissenau 21 p3880 A70-40968
- Solar X-ray bursts correlation with H alpha flares and microwave bursts observed by Explorer 34 experiment 21 p3880 A70-40970
- Radioheliograph observations of solar outbursts involving MHD waves propagation along curved paths in corona at 80 MHz 21 p3891 A70-41178
- Dynamic spectra and two dimensional radioheliograph maps of solar U bursts at 80 MHz consistent with electron streams along loops in coronal magnetic field 21 p3891 A70-41183
- Solar radio burst observation before 7 March 1970 solar eclipse, tabulating spectrum data 22 p4095 A70-43266
- Circular polarization time evolution during solar microwave impulsive bursts 24 p4401 A70-45319
- Coronal shock growth as source of thermal solar X ray bursts associated with optical events 24 p4401 A70-45320
- Solar proton events indication by 15.8 mm bursts during 1968 24 p4401 A70-45324

SOLAR RADIO EMISSION

- NT SOLAR RADIO BURSTS
- NT TYPE 2 BURSTS
- NT TYPE 3 BURSTS
- NT TYPE 4 BURSTS
- NT TYPE 5 BURSTS
- Extraterrestrial sources radiation including galactic, solar and magnetospheric radio emissions observed by RAE-1 satellite at long wavelengths [AIAA PAPER 69-1049] 01 p0170 A70-10603
- Correlation between sunspot number index and solar radio noise index relative to ionospheric propagation, noting computer analysis program and hypothesis effect 02 p0289 A70-12107
- Subcritical wavelengths processing of solar radio emission, allowing for antenna radiation pattern distortion due to surface defects 04 p0745 A70-14498
- Solar microwave and soft X ray radiation emission correlation to determine flare peak temperature and solid angle 04 p0741 A70-15126
- Tabulated values of F 2 mean solar noise indexes predicted by fifteenth degree polynomials 05 p0813 A70-16275
- Solar radio emission intensity-solar flare index and 5303 A coronal line intensity-proton flare numbers relations 05 p0911 A70-16438
- Solar activity centers life history in terms of radio emission and Ca plage intensity, noting radio emission decay faster than plage intensity 05 p0911 A70-16440
- Spectral characteristics of B and S components of solar radio emission from statistical data, investigating dependence on 11-yr cycle and minimum solar activity 07 p1378 A70-19031
- Book on solar and planetary radio emission covering solar system physical characteristics, quiet Sun, thermal and nonthermal emission, etc 09 p1752 A70-22201
- Solar corona pulsating metric radio emissions, indicating phenomena as type 4 radiation phases 09 p1758 A70-22738
- Solar radio observations tabulated for radioelectric flux density and behavior for three hour periods, average diurnal results, etc 10 p1940 A70-24414
- Low noise temperature radiometer to study solar radio emission, measuring atmospheric absorption 12 p2184 A70-27235
- Solar radio emission maps at 8.6 mm using parabolic antenna and TV camera for optical control 12 p2293 A70-27591
- Solar flares of 6 and 8 July 1968 correlation regarding electromagnetic radiation emission, radio flux, corpuscular radiation, etc 12 p2294 A70-27708
- Radio sources positions on solar disk by 2800 and 408 MHz high resolution fan beams 13 p2491 A70-29161
- Solar proton flare of 2 September 1966, discussing Abastuman observatory photographic observations and radio noise emission changes 15 p2792 A70-31618

- SHF radio telescope for solar radio wave observation, describing design and performance 15 p2717 A70-31897
- Polarization characteristics of solar radio waves reflected from coronal waves in meter wavelength range 15 p2802 A70-32485
- X ray and microwave emissions relationship to sources on sun, discussing development and structure of sunspot groups 15 p2794 A70-32486
- Low energy electron emission during solar flares relation to radio and X ray emission 15 p2795 A70-32622
- Solar radio spectrum and history of McMath 607 plage region during eclipse of 7 March 1970, considering residual emission 16 p2977 A70-33845
- Solar disk dimensions and RF emission characteristics from eclipse observation and flux recordings, considering brightness temperature distribution and lunar edge diffraction effects 19 p3521 A70-38551
- Solar radio emission slowly varying component, analyzing random aspects, correlation functions and relationship to spot groups 19 p3521 A70-38552
- Solar radio emission and optical features correlation, considering integral RF flux, spot groups, main spots and flocculi areas 19 p3521 A70-38553
- Solar eclipse of 20 May 1966, analyzing radio observations 19 p3521 A70-38554
- Solar eclipse of 22 September 1968, analyzing radio observations 19 p3521 A70-38555
- Solar radio emission intensity distribution across disk during eclipse, constructing relative RF spectrum of uncovered region 19 p3522 A70-38556
- Temperature and radio brightness distributions in active regions and upper chromosphere during minimum activity periods 19 p3522 A70-38557
- Solar radio flux variations prediction for various activity levels based on random functions theory 19 p3522 A70-38558
- Solar radio emission flux as activity index, analyzing permissible deviations from recommended wavelength 19 p3522 A70-38559
- Sun role in radio telescope radiation patterns analysis and adjustment, allowing for solar radio source finite dimensions and nonuniform brightness 19 p3390 A70-38560
- Solar radio radiation effective gravity center shift determination, considering directivity diagram scanning phase for radio transit instrument adjustment 19 p3522 A70-38562
- Antenna systems with minimum angular resolving power for solar limb radio sources recording, using data from solar meridian passage 19 p3522 A70-38563
- Moon as standard radio source for eliminating earth atmosphere influence during solar radio radiation measurements 19 p3522 A70-38564
- Solar X ray emissions from quiet and active sun compared with radio flux to investigate production mechanisms 19 p3512 A70-38909
- Solar eclipse microwave spectral observations for coronal condensation sources characteristics of solar radio emission slowly varying component, discussing ionospheric recombination coefficients 19 p3531 A70-38910
- Solar eclipse measurements in 1-30 mm range, examining chromosphere, flares and radio emission 19 p3531 A70-38911
- Millimeter wave observation of sun, deriving empirical relationships between atmospheric attenuation, emission and water vapor 20 p3623 A70-40304
- Microwave scintillations at sunrise indicating solar point sources at sunspot cycle peak and terrain configuration influence on ionospheric disturbances 20 p3591 A70-40493
- Solar active regions at millimeter wavelengths, discussing brightness temperature, background radiation, electron density, optical thickness, polarization and chromospheric magnetic fields 21 p3886 A70-40960
- Solar active region radio spectrum during 12 November 1966 eclipse, discussing flux, magnetic field effects, temperature and electron density 21 p3886 A70-40961
- Solar flare relation to radio emission at 3.3 mm, discussing sunspots, temperature gradients and magnetic fields 21 p3879 A70-40962
- Solar radio pulsations, observing modulation of coronal microwave, X ray and type III emission 21 p3880 A70-40965

- Radio observations of limb darkening and structure of solar corona at 80 MHz 21 p3890 A70-41177
- Solar radio to optical radius ratio calculated from residual flux measurements during 7 March 1970 solar eclipse 22 p4097 A70-42466
- Nonflaring solar X-ray and microwave radiation flux correlation from satellite data 22 p4104 A70-42995
- Solar optical and radio activity observation in 1968, noting optical-radio data correlation 22 p4095 A70-43259
- Polarization characteristics of solar radio waves reflected from coronal waves in meter wave length range 23 p4240 A70-43909
- X ray and microwave emissions relationship to sources on sun, discussing development and structure of sunspot groups 23 p4236 A70-43910
- Radio astronomy research covering solar radio emission, Milky Way radiation, molecular radio line spectra, etc 23 p4256 A70-45041
- Millimeter wave solar radiation atmospheric absorption examined at sea level with Michelson interferometer 24 p4398 A70-45785
- SOLAR RADIO WAVES
- U SOLAR RADIO EMISSION
- SOLAR REFLECTORS
- Qualitative analysis and comparison of hypothesis versions of Martian point flare observed by Maeda, considering solar ray reflection from ice cloud or vertical surface object 07 p1385 A70-19420
- Film type solar energy reflector peripheral blades for connection to receiver, discussing precession control and despin for rotating concentrators 07 p1196 A70-19501
- Thermal control coatings as solar reflectors for spacecraft heat dissipation 08 p1527 A70-21357
- Film type solar energy reflector peripheral blades for connection to receiver, discussing precession control and despin for rotating concentrators 15 p2678 A70-32746
- Satellite-borne test instrument for determining mirror materials degradation due to long solar exposure 16 p2921 A70-34109
- SOLAR ROTATION
- Angular momentum conservations for solar gas confined by closed field lines or outflowing along open magnetic field lines 01 p0176 A70-10251
- Rapidly rotating solar interior damping by large scale convection analysis via maximum buoyancy force in water cylinder transition 02 p0373 A70-12391
- Coronal features rotation rates as function of latitude and height above limb from autocorrelation analyses of K-coronameter observations 05 p0902 A70-16435
- Mass loss role in early spinning of sun without magnetic field braking effect, considering present surface vs core rotating velocity 05 p0913 A70-16569
- Mathematical model for testing theory of solar differential rotation maintenance by two dimensional turbulence 06 p1144 A70-18009
- Solar differential rotation relation to Rossby waves in upper convection zone based on energy conversion rate estimates 06 p1144 A70-18010
- Solar oblateness and gravitational quadrupole moment related under assumption of magnetic and velocity fields absence in surface layers, including rotation effects 08 p1570 A70-20902
- Type I comet tails orientations dispersion attributed to nonradial plasma waves and discontinuities in interplanetary gas, calculating solar angular momentum loss rate 10 p1947 A70-24987
- Exospheric density from Echo 2 orbit, observing 27 day variations associated with sun rotation and correlation with geomagnetic disturbances 11 p2046 A70-26566
- Sunspots butterfly diagram shape relation to solar differential rotation 13 p2491 A70-29048
- Solar differential rotation measurement by spectral line shift data analysis, noting angular velocity-heliographic latitude relationship 13 p2496 A70-29840
- Solar extreme UV radiation measurements over rotation period onboard satellite OSO-3, using atmospheric absorption correction 15 p2792 A70-31666
- Polar and equatorial limb darkening related to solar rotation and thermal flow, using photospheric models 15 p2807 A70-32812

Solar rotation effects on velocity field in nonspherical solar wind, using axisymmetric wind model
17 p3151 A70-34861

Energy transfer in convective envelope of rotating star and solar differential rotation, using Lucy gravity-darkening law
18 p3313 A70-36214

Solar quadrupole moment effect on secular perturbations of planetary orbital elements
18 p3313 A70-36325

Report on ASA meeting in Pasadena February 1969 covering solar observation program, solar temperature inversion, solar spin-down, etc
19 p3518 A70-38014

Interplanetary magnetic field structure, using solar wind model accounting for solar rotation
20 p3704 A70-39474

Solar internal rotation, examining oblateness, velocity and magnetic fields, wind structure and Li and Be abundances
20 p3707 A70-39936

Differential rotation at solar surface caused by anisotropic turbulent viscosity in hydrogen convection zone, solving via Navier-Stokes equation
20 p3711 A70-40404

Synoptic charts of polar magnetic fields plotted in polar coordinate system for consecutive solar rotations
20 p3711 A70-40408

Photospheric magnetic field differential rotation using synoptic charts for autocorrelation technique
21 p3885 A70-40951

Supergranular network time and shape changes, examining correlations with solar rotation, activity and cycles
21 p3885 A70-40954

Nonaxisymmetric convection of rotating spherical shell in Herring approximation, noting applicability to sun
22 p4104 A70-42994

Solar rotation, discussing oblateness, solar wind torque, main sequence stars rotating core, gravitational quadrupole moments and Li and Be depletion
23 p4252 A70-44829

Equatorial acceleration of sun, considering rotation and turbulent energy transport in convective zone
23 p4252 A70-44830

Spectroscopic differential photosphere and chromosphere rotation with height in solar envelope
23 p4252 A70-44831

Solar spin down procedure simulated via Boussinesq fluid spin down in circular cylinder
23 p4252 A70-44832

Nonspherical stars thermal stability, considering solar rotational models and oblateness problem
23 p4252 A70-44833

Solar interior differential rotation, developing angular velocity distribution equilibrium model
23 p4252 A70-44834

Solar oblateness calculation based on Stoeckly differential rotation law application to polytropes
23 p4253 A70-44835

Zonal spot activity duration dependence on daily angle of solar rotation
24 p4401 A70-45316

SOLAR SAILS

Small natural vibrations effect of solar sail-propelled system on heliocentric orbit motion
10 p1950 A70-24319

SOLAR SENSORS

Fluidic sun sensor design and breadboard test for spacecraft and missile attitude control systems
04 p0716 A70-15415

Gyroless attitude control system for pointing Aerobee sounding rocket payload at sun using solar sensors
13 p2501 A70-28422

Projectiles yawing and rolling over long flight paths, describing onboard solar aspect sensor and telemetry link to ground stations
13 p2406 A70-29005

Stepper motor for pointing Surveyor spacecraft TV transmitting antenna and solar panel at earth and sun
16 p2845 A70-34110

Solar power panel orientation servomechanism using passive elements without power consumption
16 p2846 A70-34130

Passive sun trackers using solar energy activated bimetal helix thermal heliotrope
16 p2846 A70-34131

SOLAR SIMULATION

Solar simulation /SISS/ for evaluating human visual system performance in contrasting space environment
09 p1655 A70-22680

Solar radiation energy distribution simulated using vacuum monochromator, discussing Ar-Kr-Xe-methane mixture
10 p1931 A70-24317

Solar simulation laboratory test facility for extraterrestrial solar radiation effects on vehicles beyond earth atmosphere, emphasizing spectral filters
11 p2030 A70-25353

Spectral irradiances of inert gases and mixtures for laboratory solar simulation
15 p2717 A70-32028

Solar prominences thermal and dynamical stability in terms of optically thin plasma supported by magnetic field against gravity
17 p3174 A70-35867

Solar simulation methods, discussing optical elements and artificial radiation sources suitability for thermal testing
19 p3398 A70-38282

Solar spin down procedure simulated via Boussinesq fluid spin down in circular cylinder
23 p4252 A70-44832

SOLAR SIMULATORS

Explorer 38 critical component equilibrium temperature tests in thermal vacuum chamber using modified solar simulator, noting agreement with model [ALAA PAPER 69-999]
02 p0275 A70-12527

Simulation equipment for extraterrestrial solar radiation for spacecraft components evaluation tests, describing spectral characteristics
04 p0665 A70-15663

Solar plasma wind simulator design and performance, discussing ion source, mass separator, beam mass analyzer and Faraday cup [ALAA PAPER 70-31]
06 p1030 A70-18223

Thermal vacuum simulator for testing manned Lunar Module Test Vehicle, using conformal skin heaters to control heating rates and skin temperature
09 p1656 A70-23241

Solar simulator built into multiwall ultrahigh vacuum chamber, describing simulator and chamber modifications
09 p1657 A70-23264

Xenon high wattage short arc lamps for space/ solar simulators, describing seals, electrodes shapes and cooling, operating characteristics, etc [ALAA PAPER 69-998]
13 p2384 A70-28520

Solar simulation systems for uniform collimated intense light, noting high intensity lamp development
15 p2717 A70-32034

Solar alignment, control, intensity scanner and data collection for large Space Environmental Simulator
17 p3058 A70-35155

Solar simulators using water cooled 30 kw Xe arc lamps
17 p3060 A70-35248

Solar simulator combined with space environment simulation chamber for thermal tests of artificial satellites
19 p3398 A70-38283

SOLAR SPECTRA

Photospheric Fe I abundance variation with excitation potential
01 p0175 A70-10239

Reply to Swings comments on validity of forbidden SI lines in solar spectrum communicated by Swenson
01 p0175 A70-10240

Solar corona red and green lines during 30 May 1965 total eclipse, discussing indicated radial, turbulent and displacement velocities
01 p0176 A70-10249

Solar Mg II doublet and XUV images obtained by Fabry-Perot interferometer mounted in Skylark spectrograph
01 p0177 A70-10339

Solar Lyman alpha line profile and atomic hydrogen vertical distribution measurement method for terrestrial atmosphere in 200-500 km range
01 p0078 A70-11208

Stratospheric water vapor distribution from analyzing IR solar spectrum during sunset observed by balloon-borne spectrometer
01 p0081 A70-11295

Absorption band observation near 0.43 mu in solar spectra and scattered radiation of sky, determining nontelluric origin
01 p0084 A70-11613

Extreme UV spectral line intensity enhancement during class 3 flare related to abundance of radiating element
02 p0358 A70-12205

Coronal emission lines wide slit photometry systematic error analysis and suggested error elimination by varying observation method
02 p0373 A70-12375

Crossed Fabry-Perot etalons and spectrographs for studying atmospheric solar absorption spectra
02 p0299 A70-12438

Rocket-borne spectroheliograph for taking X ray and monochromatic pictures of sun in Mg II line
03 p0570 A70-13594

Ar X and Ar XIV identification in solar corona and unidentified coronal lines origin, discussing Fe and Ni transitions from metastable levels
03 p0571 A70-13598

Absorption line identification in sunspot spectra by calculating Zeeman patterns, using Zeeman splitting for magnetic field measurement
03 p0574 A70-13934

Extraterrestrial solar spectral irradiance at earth mean solar distance within 300 to 2500 nm wavelength region, from NASA CV-990 aircraft research flights
04 p0690 A70-15019

HF molecular vibration rotation band observed in sunspot spectra, carrying out model calculations for spots differing in temperature for fluorine abundance
04 p0751 A70-15048

Solar helium-like ion line intensities, determining electron densities and excitation rate ratios
04 p0758 A70-15696

Drift, anti-Fermi retardation, convective transfer and diffusion effects on solar cosmic ray energy spectrum in earth orbit proximity
05 p0898 A70-15943

Identification of lines in Mohler photometric atlas of IR solar spectrum wavelengths
05 p0910 A70-16427

Diatomic carbon swan band violet line absence from sunspot suggested in accordance with molecular equilibrium predictions
05 p0911 A70-16433

IR solar spectrum including water vapor, carbon dioxide and methane bands
05 p0913 A70-16566

Solar activity study based on solar X ray spectra observation, considering flare mechanism
05 p0903 A70-16719

Spectral characteristics of solar proton flare on 2 September 1966 noting light intensity variations
05 p0904 A70-16911

Periodicities in solar activity variation from correlation spectral analysis, establishing monotonically decreasing component and secular variations in activity
05 p0918 A70-16913

Empirical astrophysical damping constants derived for neutral Fe lines using solar spectra, applying constants to abundances and surface gravity determination
05 p0919 A70-16939

Neutral Ne emission line in visible solar spectrum during bright events in inner corona, noting 1958 outburst of RS Oph
05 p0920 A70-16944

Radiative transfer equations for Zeeman multiplets of electric and magnetic dipoles and quadrupole radiation in solar Fraunhofer spectrum
06 p1142 A70-17991

Ca II 7233 forbidden line in solar Fraunhofer spectrum, estimating center-limb variation of equivalent width of transition
06 p1143 A70-17994

Solar Cd abundance, using spectrograph and synthetic spectral line computer program
06 p1143 A70-17995

SiH molecular absorption lines in solar disk spectrum, determining maximum equivalent widths and oscillator strength
06 p1143 A70-17996

Rocket-borne spectrometer intensity measurements UV region of solar spectrum, noting agreement with IR observations of solar temperature minimum
06 p1143 A70-17998

Solar radiation flux observation-prediction discrepancies due to Fraunhofer line absorption, studying Balmer continuum as atmospheric model criterion
06 p1148 A70-18451

Grating spectrometer with Ge-Cu detector used on balloon flights for studying variations of IR solar spectrum with altitude, emphasizing sunset features
06 p1152 A70-18523

Turbulent velocities of convective motions in active and unperturbed photospheric faculae based on spectral observations
07 p1384 A70-19415

Solar protuberance radiation polarization in Ca I 4227 A line, discussing depolarization and electron-and photoexcitation
07 p1384 A70-19416

Solar soft X ray spectrum analyzed by OSO 4 proportional counter, discussing slowly varying component, corona active regions and impulsive event characteristics
07 p1369 A70-20289

Solar magnetic field strength determination from various absorption lines, considering Rowland intensity, line lower level excitation potential, optical depth, etc
08 p1569 A70-20836

Brightness distribution of spectroheliograms taken in metal lines reflecting velocity field structure in photosphere
08 p1570 A70-20839

Magnesium hydride absorption lines in sunspot spectrograms indicating heavy Mg enhancement in sun relative to earth
08 p1571 A70-20904

Sunspots narrow and double K lines probable emission by quiescent type prominences
08 p1575 A70-21372

Molecular oxygen concentration determined by absorption spectroscopy of solar hydrogen Lyman alpha line
08 p1490 A70-21390

Oscillator strengths of Fe II lines and solar iron abundance measured by arc burning in Ar with iron chloride admixture
08 p1576 A70-21398

Corona green /5303 A/ and red /6374 A/ lines during minimum solar activity in 1964, discussing N-S and E-W asymmetries and intensities
09 p1750 A70-22100

Fabry-Perot interferometer application to photometric analysis of solar line profiles 09 p1756 A70-22652

Solar IR Fraunhofer line damping constants empirical values and variation with optical depth, noting discrepancy with theoretical constants 09 p1757 A70-22726

Solar equatorial XUV limb brightening for resonance lines of Li-like ions from OSO-4 observations interpreted by coronal model 09 p1757 A70-22732

Airborne monochromator and photoelectric filter radiometer for solar spectral irradiance measurements, estimating instrument errors 09 p1683 A70-23515

Far IR airborne spectroscopy for measuring solar brightness temperature, emphasizing scanning Michelson interferometer and radiometric calibration 09 p1683 A70-23525

Resonance, intercombination and forbidden lines observed in solar He isoelectronic sequence of oxygen, Ne, Al, Si and sulfur with Bragg crystal spectrometer 10 p1944 A70-24954

Approximations implicit in Cayrel statistical equilibrium or non-LTE analysis of ionic hydrogen bound free continuum in sun 10 p1947 A70-24989

Gadolinium II solar lines classification from photographic IR observations 10 p1947 A70-24990

Spectroscopy in astrophysical research, discussing solar corona chemical elements, forbidden lines and temperature determination 10 p1948 A70-25181

Solar XUV lines photon flux based on one dimensional model of chromosphere-corona transition region 10 p1949 A70-25271

Solar radio bursts dynamic spectra by magnetic tape recording of digital signal, obtaining frequency and time profiles and intensity layers 10 p1934 A70-25276

Type 4 solar radio bursts compared with flare observations, geophysical effects and satellite monitors data to detect proton flares spectra 10 p1934 A70-25278

Solar boron abundance from BH, BN and BO absorption bands in sunspot spectra, noting no traces in solar atmosphere 11 p2108 A70-25738

Solar limb brightening of XUV lines of carbon, nitrogen, oxygen and silicon ions in chromospheric-coronal transition region 11 p2108 A70-25740

Electron and proton excitation of forbidden transition lines in Ca XV ground configuration determined for coronal densities and temperature 11 p2109 A70-25742

Solar photospheric turbulence from observing Ti I line profiles at different center to limb distances, showing anisotropy 11 p2116 A70-26591

Zeeman effect on solar flares metallic lines splitting 11 p2106 A70-26592

Luminescing materials remote sensing during daylight by Fraunhofer line depth method with sun as excitation source 12 p2221 A70-26958

Absorption at solar H Lyman alpha line by earth hydrogen atmosphere measured as function of altitude from Aerobee flight spectrograms 12 p2222 A70-27182

Molecular line identification in solar spectrum of CN, diatomic carbon, TiO, MgH, CaH, NiH and water vapor 12 p2302 A70-27590

Violet K2 emission in H and K line cores of solar calcium ions using atmospheric model in state of motion 12 p2303 A70-27701

Solar IR triplet of singly ionized Ca, suggesting limb darkening caused by chromospheric inhomogeneities for source function inequality 12 p2303 A70-27703

Solar rotational line positions due to red band in IR continuum region to resolve blue-violet ambiguity 12 p2303 A70-27704

Magnetically sensitive Fe lines usefulness to solar polarimetry, observing absorption coefficient dependence on temperature variations 12 p2303 A70-27706

Gyrosynchrotron emission from nonthermal electrons trapped in magnetic dipole field to interpret center-to-limb spectrum and polarization variations of microwave impulsive bursts 12 p2294 A70-27709

Solar radio emissions of types I, II, III and IV activity and polarization during 18-26 May 1967 observed by narrow-band timesharing polarimeter 12 p2294 A70-27711

CH molecule line formation mechanism for 4300 Å transition in solar photosphere, noting collisions with hydrogen atoms 12 p2311 A70-28309

Dark band in H alpha solar chromosphere above photospheric limb, outlining approaches to obtain spectrally pure observational results 13 p2486 A70-28627

Solar iron-to-hydrogen ratio and oscillator strengths for Fe I lines compared with laboratory measurements of line broadening by neutral atoms 13 p2486 A70-28628

Solar spectra recording by balloon-borne monochromator, measuring stratospheric IR absorption 13 p2491 A70-29050

Magnetic field spatial structure in sunspot with photospheric bridge, using photographic observations of solar spectrum lines 13 p2493 A70-29391

Formation mechanism of molecular CN violet bands in solar photosphere 13 p2493 A70-29393

Solar Ca II H and K lines formation, discussing double reversal, limb darkening, plage and spot lines and anomalous line ratios 13 p2494 A70-29481

Solar far UV continuum photometry illustrating spectral temperature minimum transition, comparing to far IR temperature 13 p2496 A70-29841

Solar spectral line source function frequency dependence 13 p2496 A70-29842

Table of Fraunhofer solar lines without Zeeman splitting 13 p2496 A70-29843

HOH lines existence in sunspot umbral spectrum 13 p2496 A70-29847

Solar limb integrated brightness distribution in continuous spectrum during 20 May 1966 solar eclipse 13 p2498 A70-30003

Solar observations in intermediate IR, measuring continuum intensity of disk center in atmospheric water vapor window 13 p2498 A70-30006

Geoactive ionizing radiation emitted by solar flares having metallic spectral lines of various brightness intensities 14 p2630 A70-30219

Forbidden lines of OI, NI, CI, Fe II, Ni II, Si I, Si and Ca II in solar absorption, investigating effects on element abundance and gaps in thermodynamic equilibrium 14 p2637 A70-30339

Water vapor absorption bands in solar IR spectrum, considering earth curvature and atmospheric inhomogeneity and refraction 14 p2572 A70-30404

Water vapor in sunspots, taking into account red shift between telluric and intrinsic sunspot HOH lines 14 p2641 A70-30790

Ionized iron lines observations under coronal conditions, giving half-widths and kinetic temperatures for forbidden lines Fe X-Fe XV 14 p2651 A70-31377

Sun Lyman alpha emission line monitoring, describing intensity variations correlation with Zurich number 15 p2798 A70-31654

Spectral irradiances of inert gases and mixtures for laboratory solar simulation 15 p2717 A70-32028

Solar disk 10830 Å He absorption line, attributing depression at blue wing to triplet 15 p2802 A70-32488

Solar prominences monochromatic images in He I D3 and He II 4686 lines allowing for contamination in 4686 images 15 p2803 A70-32614

H alpha and Fe I lines, calculating velocity effects on profiles for differentially moving atmosphere 15 p2804 A70-32616

Line formation in solar magnetic fields with allowance for absorption emission and scattering processes, discussing Hanle effect and atomic level polarization 15 p2804 A70-32617

Fine structure in Ca II K line core, determining reduced high dispersion spectra at solar disk center 15 p2804 A70-32618

Orbiting solar telescope design for solar disturbances location and monitoring in H alpha line 16 p2907 A70-33188

Solar UV flash spectrum by spectroheliographs flown aboard Aerobee 170 mission during total solar eclipse 16 p2977 A70-33838

Coronal structures relationship to chromospheric features in H alpha and Ca II K 16 p2977 A70-33843

Solar radio spectrum and history of McMath 607 plage region during eclipse of 7 March 1970, considering residual emission 16 p2977 A70-33845

Telluric lines seasonal variations, discussing oxygen and water vapor photoelectric recordings in solar spectrum 16 p2976 A70-34185

Solar disk center to limb variation of Fraunhofer lines, comparing measurements to predictions by BCA, Elste and Holweger models 16 p2980 A70-34307

Solar X-ray spectrum and intensity and diffuse cosmic flux measurements, using polar orbiting satellite-borne instruments 17 p3149 A70-34534

Resonance and satellite lines of highly ionized iron in solar spectra, discussing spectrum features during chromospheric flares 17 p3154 A70-34541

Solar X-ray flux measurements in selected emission lines, using curved crystal Bragg spectrometers in low altitude sounding rockets 17 p3150 A70-34834

Iron line emission at 1.9 Å during solar flares observed by OSO-4 proportional counter spectrometer 17 p3150 A70-34836

Solar atmosphere structure and chemical composition by UV spectrum analysis 17 p3161 A70-34892

Solar chromosphere resonance lines, observing H and K line profiles of Mg ions 17 p3161 A70-34893

Solar UV spectrum variations due to flares and solar activity diurnal variations from satellite spectrometry 17 p3161 A70-34894

High resolution solar spectrum at 2000-2200 Å from sunpointing Skylark rocket flight, noting detectable absorption lines 17 p3162 A70-34896

Fabry-Perot interferometry of solar Mg II resonance lines 17 p3162 A70-34897

Engineering standard for solar constant and zero air mass solar spectral irradiance from high altitude measurements 17 p3077 A70-35161

Lyman alpha wing resonance broadening opacity effects on solar spectrum in 1500 Å to 8000 Å range 17 p3169 A70-35383

Non-LTE effects on flux and center to limb variation of solar spectrum at 1500-1680 Å 17 p3169 A70-35384

Continuous UV opacity effects on visual spectrum observations and predictions for solar photosphere 17 p3169 A70-35385

Fraunhofer line equivalent widths differences between pole and equator spectra of solar disk 17 p3173 A70-35734

Gamma ray pulse height spectra during active and quiet solar periods from midlatitude balloon flights 17 p3152 A70-35774

Solar potassium resonance line shape and gravitational red shift, using atomic beam technique 17 p3173 A70-35861

Solar C II resonance doublet profiles, discussing possible broadening mechanisms 17 p3174 A70-35862

Fe II line behavior in plages near solar limb 17 p3174 A70-35866

Solar image spectrum magnetic recording for computer, using photomultipliers with coding devices 18 p3256 A70-36107

Solar Ga abundance from spectral synthesis of region around 4172 Å line 18 p3316 A70-36894

Spectrophotometric solar brightness temperature measurements in far IR, discussing collision type spectral variation of absorption coefficient 18 p3319 A70-37056

Solar spectral intensity distribution and ionizing radiation spatial emission patterns during eclipse, discussing effects on ionosphere 19 p3418 A70-38908

Non-LTE line blanketed solar model atmospheres with various temperature distributions 20 p3703 A70-39020

Photographic polarimeter based on Savart and lambda/4 plates combination for linear polarization measurements of coronal and prominence emission lines during solar eclipse 20 p3627 A70-39092

Solar photospheric spectrum Ni II forbidden lines analysis, determining abundance of Ni for comparison with coronal and meteoritic data 20 p3711 A70-40405

Solar search for neutral rhenium lines using low noise, high resolution photometric tracings of Fraunhofer spectrum 20 p3711 A70-40406

Photoelectric spectra of photosphere and sunspot umbra and penumbra ranging from 3900 to 8000 Å 20 p3712 A70-40412

Solar soft X ray flare spectra of 16 November 1967, examining electron temperatures and emission lines by OSO-4 20 p3700 A70-40419

OSO far UV solar spectroheliograms atlas, describing instrumentation, data acquisition, etc 20 p3713 A70-40540

- Solar photosphere absorption line weakened region, examining temperature increase effects on neutral and ionized lines
21 p3885 A70-40953
- Large sunspot umbra continuum intensity, examining visible spectra
21 p3885 A70-40956
- Solar X-ray spectra of active regions, examining emission lines, fluxes electron temperature and density and transitions
21 p3879 A70-40963
- Sunspot umbras and penumbras magnetically nonsplit lines measured photographically by spot contrast discriminator
21 p3887 A70-41115
- Solar iron abundance from forbidden Fe II magnetic dipole transition probabilities
21 p3888 A70-41118
- Dynamic spectra and two dimensional radioheliograph maps of solar U bursts at 80 MHz consistent with electron streams along loops in coronal magnetic field
21 p3891 A70-41183
- Solar equatorial limb brightening of far UV resonance lines of lithium-like N V, O VI, Ne VIII, Mg X and Si XIII ions, interpreting os0-4 data with coronal model
21 p3924 A70-42185
- Solar far UV limb brightening of C III, N III, N IV, O III, O IV and Si IV lines in chromospheric-corona transition region, correcting coronal model for spicule effects
21 p3925 A70-42186
- Solar spectra isodentitraces indicating transition zones between and on sides of spicules in sheaths
21 p3926 A70-42197
- Transition zone height in corona-chromosphere interface from high resolution disk spectra near limb
21 p3926 A70-42198
- Photospheric metallic line profiles numerical experiment, investigating physical processes causing shape and asymmetry change
22 p4101 A70-42866
- EUV solar spectral intensity distribution and cyclic variations
22 p4106 A70-43299
- Solar disk 10830 Å He absorption line, attributing depression at blue wing to triplet
23 p4240 A70-43911
- Solar X ray spectra interpretation by laboratory measurements, using plasma X ray source and potassium acid phthalate spectrometer
23 p4237 A70-44419
- Solar center-limb observations of line brightness and Doppler shift fluctuations for Mg b lines
24 p4399 A70-45302
- MgH molecular lines Zeeman splitting in sunspot spectra confirmed by photoelectric observations
24 p4400 A70-45308
- Solar radio maps compared with H alpha pictures, correlating bright and dark features
24 p4401 A70-45317
- Solar VHF radio spectra indicating type 4 burst activity associated with type 3 formation
24 p4401 A70-45318
- Solar spectrum O I, obtaining high resolution UV line profiles from rocket-borne spectrograms
24 p4410 A70-45766
- Geoeactive ionizing radiation emitted by solar flares having metallic spectral lines of various brightness intensities
24 p4398 A70-46294
- SOLAR SPECTROMETERS**
- Solar atmospheric structure near sunspots by spectrophotometry, presenting observational and theoretical sunspot magnetic and velocity field data
04 p0754 A70-15351
- Grating spectrometer with Ge-Cu detector used on balloon flights for studying variations of IR solar spectrum with altitude, emphasizing sunset features
06 p1152 A70-18523
- Fabry-Perot interferometer application to photometric analysis of solar line profiles
09 p1756 A70-22652
- Spectrometer design for Helios solar probe using semiconductor detectors to identify particles separated by magnetic field
10 p1888 A70-24487
- Atmospheric absorption by ozone of solar radiation measured by balloon-borne spectrometer in 9-10 micron region
11 p2045 A70-25627
- Solar gamma ray lines search with high resolution balloon-borne directional spectrometer based on lithium-drifted germanium detector
12 p2292 A70-27178
- Spectrograph design and specifications for solar radio flare structure, obtaining constant sum frequency by heterodyne conversion
13 p2406 A70-28948
- EUV solar spectrometer in orbiting solar observatory /OSO-1/, describing satellite, optics and detector, data coding, etc
15 p2736 A70-32027
- Scanning mirror system for Apollo telescope mount UV spectroheliometer, describing design, fabrication and testing
17 p3083 A70-34764
- Slit quality and instrument contour of diffraction spectrograph for solar observations
24 p4335 A70-45638
- SOLAR STORMS**
- Solar proton flux increases associated with sudden commencements observed by geostationary ATS-1 satellite
08 p1562 A70-21378
- Type 1 solar radio burst chains during noise storms, determining lifetime, bandwidth, frequency drift and fine structure
13 p2479 A70-30002
- Energetic storm particle events observation, noting association with solar protons and interplanetary shock waves
19 p3496 A70-37518
- SOLAR STREAMS**
- U SOLAR CORPUSCULAR RADIATION**
- SOLAR SYSTEM**
- Three mode galactic age model for nucleosynthesis of solar radioisotopic material produced by r-processes
01 p0182 A70-10720
- White dwarf luminosity functions based on birth rate, white dwarf space density in solar neighborhood and possible red degenerate stars deficiency
01 p0189 A70-11339
- Radar probing of solar system noting contributions to knowledge on planets
01 p0192 A70-11485
- Solar system evolution based on Darwin theory, discussing energy inputs effect on primeval atmospheric molecules
02 p0229 A70-11666
- Solar system various natural members examination for suitability to relativistic pericentrum motion investigation
02 p0373 A70-12255
- Undiscovered satellites of solar system major planets, predicting Jupiter satellites
03 p0569 A70-13360
- Soviet Venus probes Venera 1, 2, 3, 4 and 5 emphasizing aims, implementation means and information yields influence on theory of solar system planets origin and evolution
04 p0757 A70-15672
- Critique of solar system resonant structure hypothesis based on planetary orbital frequencies errors
05 p0910 A70-16394
- Critique of resonant structure of solar system noting chance effects possibility
05 p0910 A70-16395
- Rebuttal of criticisms on resonant structure hypothesis, giving probability value for chance stellar system formation similar to solar system
05 p0910 A70-16396
- Solar system resonant structure probability analyzed by matrix methods
05 p0910 A70-16397
- Solar orbiting planets formation theory agreement with actual planetary system proved in terms of planetary masses and distances
05 p0913 A70-16567
- Cosmic ray triggering of solar system formation by ionizing in solar disk
06 p1135 A70-17539
- Meteors orbital elements distribution in solar system from radio observation data
06 p1141 A70-17737
- Outer solar system exploration, discussing swingby and junction missions, Jovian satellite grand tours, mission energy requirements, etc
06 p1147 A70-18229
- Unmanned exploration program to study magnetic fields and chemical composition of five outer planets in solar system
07 p1375 A70-18871
- Solar system evolution theories to explain planetary orbits, angular momentum and matter distribution, satellite systems and chemical composition
07 p1376 A70-18898
- Solar system cosmic ray time-space variations analysis based on simulation of meteorite nuclear processes
07 p1372 A70-20338
- Historical survey of celestial mechanics including three body problem and solar system dynamic model construction
08 p1565 A70-20561
- Solar system origin theory emphasizing brother star approaching nebula for instability of boundary layer
08 p1568 A70-20638
- Book on solar and planetary radio emission covering solar system physical characteristics, quiet Sun, thermal and nonthermal emission, etc
09 p1752 A70-22201
- Planetary satellites perturbation by sun for elliptical solar orbit, applying Zeipel method to equations of motion
09 p1754 A70-22480
- Solar system planetary mean motions calculation from characteristic equations roots at equilibrium points of restricted three body problem, using Taylor series solution
09 p1760 A70-22915
- Extinct radioactive isotopes of solar system, discussing decay during nuclear synthesis and planetary formation periods
09 p1762 A70-23126
- Monograph on solar wind covering solar physics, space observation methods, solar system interactions, etc
09 p1745 A70-23475
- Bode law development from dynamical relaxation suggested from comparison of Jupiter, Saturn and Uranus inner satellite systems with planetary system
09 p1765 A70-23796
- Collection of papers on analytical chemistry in space covering solar system history, atmospheres, composition, lunar and planetary surface analysis, mass spectroscopy, etc
10 p1941 A70-24608
- Solar system objects /earth, moon, planets, meteorites, etc/ chemical composition data and analysis techniques
10 p1942 A70-24609
- Solar and solar system planetary atmospheres including interplanetary space filled with solar wind
10 p1942 A70-24611
- Mass spectroscopy for solar system exploration, discussing ion sources, mass analyzers and ion detectors meeting mission requirements
10 p1942 A70-24612
- Barnard two planet solar system, dwarf star perturbations, orbital parameters and comparison with Solar system
10 p1943 A70-24758
- Jupiter atmospheric composition, gas and dust cloud formation as clues to origin and evolution of solar system
11 p2108 A70-25654
- Nuclear pulse propulsion system for manned missions to outer planets of solar system, discussing energy and travel time requirements
11 p2082 A70-26059
- Space propulsion systems for public transportation to and from orbit and throughout near solar system, discussing commercial requirements
11 p2102 A70-26060
- Outer solar system exploration, discussing planetary data, interplanetary environment, atmospheric models, data acquisition, etc
11 p2112 A70-26062
- Solar system and interstellar space exploration phases, manned and unmanned missions, meta and microprobes, propulsion systems, etc
11 p2112 A70-26063
- Undiscovered satellites of solar system major planets, predicting Jupiter satellites
11 p2118 A70-26725
- Antimatter motion in solar system and earth atmosphere, discussing vaporization and annihilation energy in collisions with interplanetary gas atoms
11 p2119 A70-26793
- Cosmic electron detection and measurement techniques, considering presence in solar system, interstellar space and metagalaxy and galactic continuum radio emission
12 p2293 A70-27572
- Lunar rocks and dust from Apollo 11 mission investigated for origin and history of moon and solar system
12 p2310 A70-28049
- Nomogram construction for graphical solution of two body problem using radius-vector and velocity components applied to solar system
12 p2311 A70-28310
- Preplanetary matter irradiation by solar particles, noting isotopic abundances for evidence of nucleosynthesis induced by proton and alpha bombardment
13 p2486 A70-28619
- Soviet monograph on minor planets origin and physical nature, considering orbits, investigative techniques, etc
13 p2488 A70-28800
- Interstellar hydrogen density around solar system from calibrated Lyman-alpha intensity measurements of Vela 7
13 p2489 A70-28894
- Cryobiological data for life mechanisms on planets in solar system emphasizing Mars
14 p2536 A70-30344
- Solar wind interaction with earth, moon, planets and comets, using hypersonic fluid analog involving shock wave interactions
14 p2631 A70-30360
- Galactic cosmic ray actions on interstellar medium for origin of Li, Be and boron in stellar atmospheres and solar system
14 p2640 A70-30786
- Atomic hydrogen distribution in upper atmosphere and solar system obtained during spin operation of OGO 5 with Lyman alpha photometer
15 p2798 A70-31655

Trojan Relay system with satellites preceding and following earth in solar orbit ensuring radio communication throughout solar system

15 p2698 A70-32061

Historical survey of celestial mechanics including three body problem and solar system dynamic model construction

15 p2805 A70-32716

Solar system Eotvos experiments for measuring gravitational to inertial mass ratio of celestial bodies

16 p2978 A70-34033

Solar wind interaction with earth, moon, Venus and Mars, reviewing literature on continuum fluid model, spacecraft observations, plasma characteristics, etc

17 p3150 A70-34669

German monograph on heavy space probes for solar system investigation covering systems analysis, mission success, flight programs, Saturn 5 launch vehicle, etc

17 p3168 A70-35378

Local system interstellar medium thermal electron distribution, synchrotron radiation emissivity, cosmic ray electron flux and spectrum

17 p3152 A70-35583

Gaseous disk in equatorial plane of solar nebula, determining dimensions from accretional theory for planets formation

17 p3172 A70-35584

Lunar gravitational field effect on sun-earth exterior libration point location, examining placement on line passing through sun and earth-moon barycenter

18 p3320 A70-37059

Integrated Milky Way spectrum, examining composition and galactic structure in solar neighborhood

18 p3329 A70-37182

Humason 1960e-1959X comet hyperbolic orbit, indicating solar system permanent membership

19 p3516 A70-37934

Galactic cosmic rays temporal and spatial variations in solar system, discussing nuclear active particles and spallation products depth distribution in meteorites

19 p3509 A70-38143

Planetary theory construction to second order of disturbing masses, applying to motions of any set of two or three planets in solar system

19 p3523 A70-38687

Solar system unmanned exploration decision making, discussing resource utilization, sequence optimization, etc

20 p3710 A70-40335

Scientific motivation for outer planets exploration covering solar system clues, atmosphere comparisons with earth, radiation and planetary radii measurement, etc

21 p3920 A70-41794

Titius-Bode law conclusions regarding solar system planetary distances numerical relations, considering planetary evolution

22 p4101 A70-42863

Solar motion apex for neutral hydrogen concentrations at different velocities, suggesting relationship to galaxy

23 p4239 A70-43815

Solar nebula rings and planet formation by sedimentation of solid particles in mechanical equilibrium, including Jupiter and Saturn protoplanets

23 p4239 A70-43867

Planetary exploration for solar system origin and evolution, identifying outer planet mission scientific values

24 p4411 A70-45962

[AIAA PAPER 70-1244] Stellar surface and solar system light element abundances, explaining formation by energetic proton flux nucleosynthetic effect

24 p4398 A70-46163

SOLAR TEMPERATURE

Solar interplanetary temperature measurement by Cl, Ga and Li isotopic detectors of solar neutrinos, discussing effectiveness and upper temperature bound

05 p0899 A70-15951

Far IR measurement of solar minimum temperature with Michelson interferometer carried on NASA research aircraft

06 p1143 A70-17997

Rocket-borne spectrometer intensity measurements UV region of solar spectrum, noting agreement with IR observations of solar temperature minimum

06 p1143 A70-17998

Polar and equatorial limb darkening related to solar rotation and thermal flow, using photospheric models

15 p2807 A70-32812

Doppler temperature and motion of solar corona from ionized Fe line using Fabry-Perot interferometer

16 p2977 A70-33841

Solar photosphere temperature constancy in thin CO layer from equivalent spectral line width determination

18 p3322 A70-37134

Report on ASA meeting in Pasadena February 1969 covering solar observation program, solar temperature inversion, solar spin-down, etc

19 p3518 A70-38014

Temperature and radio brightness distributions in active regions and upper chromosphere during minimum activity periods

19 p3522 A70-38557

Temperature difference between equator and solar poles from spectral line equivalent width variation

20 p3711 A70-40407

Solar photosphere absorption line weakened region, examining temperature increase effects on neutral and ionized lines

21 p3885 A70-40953

Soft X-ray enhancement during solar flares due to coronal condensation temperature increase

21 p3880 A70-40969

Vertical oscillations in solar temperature minimum suggested as acoustic-gravity waves modes dependent on height at chromosphere-corona interface

21 p3926 A70-42196

Solar X-ray flare temperature and emission measure profiles using OGO 5 satellite detector, interpreting energy dispersion of peak times

24 p4397 A70-45768

SOLAR VELOCITY

Simultaneous filtergrams of velocity and intensity field of central solar disk obtained in blue and red wings of Fraunhofer line

01 p0175 A70-10242

SOLAR WIND

Solar wind-induced drag resulting from collisionless plasma shock on sunward-side of large magnetic comet, using similarity with earth magnetosphere

01 p0168 A70-10258

Geomagnetic bays produced by neutral sheet plasma earthward movement resulting from solar wind enlargement of geomagnetic tail

01 p0071 A70-10409

Geomagnetic micropulsations relation to magnetospheric boundary location on sun-earth line, noting influence of solar wind pressure variations

01 p0071 A70-10412

Steady state spherically symmetric model for solar plasma acceleration with distance, showing essential role of viscosity

01 p0172 A70-11519

Electrical phenomena in upper atmosphere and solar wind may control geomagnetic disturbances and aurorae

01 p0082 A70-11523

One dimensional nonlinear model of anisotropic plasma instability with respect to Alfvén waves growth, noting applicability to solar wind processes

01 p0153 A70-11597

Solar/stellar wind solutions asymptotic behavior at large distances from central star for equations including effects of rotation and anisotropy

02 p0358 A70-12253

Dynamic electric field in solar coronal exosphere on basis of kinetic and hydrodynamic theories, giving estimate of solar wind

02 p0359 A70-12609

HEOS-1 satellite development for ESRO to investigate interplanetary magnetic fields, cosmic radiation, solar wind outside magnetosphere and earth shock wave

02 p0382 A70-12646

Linearized steady state hydrodynamic equations describing solar wind meridional motions used for studying zonal pressure perturbations

03 p0558 A70-13599

Solar wind discontinuity surfaces observed by spacecraft magnetometers determined from measured time delays and solar wind speed

03 p0558 A70-13600

Tropospheric circulation transformation from meridional to zonal forms due to macrostructure activity of solar wind, considering magnetospheric perturbations

03 p0559 A70-13757

Astronomical and space research methods probing fundamental questions concerning universe unsolvable by classical astronomy, discussing solar wind and stellar formation and evolution

03 p0571 A70-13790

Interplanetary field influence on auroral radio absorption, considering sector structure of solar wind

03 p0476 A70-13915

Thermal model for Venus ionosphere, considering photoionization and solar wind influx for possible heat sources

03 p0575 A70-13981

Magnetopause shape determination model allowing for solar wind direction obliquely toward geomagnetic dipole axis

03 p0560 A70-13984

Spacecraft surface secondary electron emission effects on electron trap measurements in magnetosphere and solar wind, noting agreement with positive ion densities

03 p0561 A70-13994

Nonthermal heating mechanism in quiet solar wind, tabulating observed and predicted parameters

03 p0561 A70-13998

Magnetospheric magnetic field disturbance due to abrupt solar wind parameters change, using Explorer 26 data

04 p0738 A70-14444

Solar wind-induced torque calculated considering special and general relativistic effects, extending method to pulsar rotational model

04 p0739 A70-14593

Galactic cosmic rays scattering by solar wind magnetic field fluctuations, considering energy and momentum transfer

04 p0739 A70-14596

Solar wind acceleration and coronal plasma heating above plage regions from spectra of solar radio echoes, computing temperature rise and energy input

04 p0740 A70-15049

Dynamic model for Martian ionosphere modification by solar wind, assuming negligible Mars magnetic moment and neutral atmosphere

04 p0753 A70-15103

Cosmic ray flux modulation in earth atmosphere produced by solar wind and geomagnetic variations, considering effects on atmospheric carbon 14 variations

04 p0680 A70-15114

Interplanetary magnetic field fluctuations stimulated by lunar wake, using Explorer 35 satellite measurements

04 p0753 A70-15122

Turbulent-plasma electrons ballistic effects on solar wind magnetic field fluctuations in lunar vicinity

04 p0753 A70-15123

Solar wind as one dimensional flow analogous to Laval nozzle flow, discussing rotation and magnetic field effect on model with heat conduction

04 p0754 A70-15352

Anomalous ionization variations of F 2 layer at northern geomagnetic pole during winter coincident with decrease in solar plasma density

04 p0682 A70-15726

Satellite HEOS-1 S 73 experiment launched during solar maximum to determine flux and energy distribution of solar wind positive component

05 p0900 A70-16077

Al foil exposed to solar wind on moon during Apollo 11 mission examined for helium particles, finding lunar solar wind albedo

05 p0900 A70-16093

Gray and colorless features of moon explained as atomic H imported by solar wind replacing lost H by photolytic decomposition of water vapor

05 p0908 A70-16303

Magnetized solar wind steady state inviscid single fluid model developed using MHD, including heat equation with thermal conduction

05 p0902 A70-16445

Earth bow shock and magnetopause oscillatory motions with respect to positions assumed under quiet solar wind conditions, discussing satellite observations

05 p0840 A70-16586

Tangential solar wind discontinuity observed by Vela 2A satellite, producing ground magnetic disturbances conjunctively with magnetospheric, ground and ionospheric currents

05 p0903 A70-16727

Cosmic ray intensity preceding Forbush effects as function of chromospheric flares solar longitude and solar wind velocity

05 p0903 A70-16730

Solar wind clues, discussing ionization blowoff, Halley comet tail and solar corona

06 p1134 A70-17322

Solar wind temperature, using distribution function for solar wind ions in anisotropic Maxwell distribution form

06 p1135 A70-17895

Spherical cylindrical and toroidal electrostatic analyzers with symmetrical angular characteristics for solar wind investigations

06 p1135 A70-17896

Spatial properties of solar wind during maximum and minimum activity inferred from sodium D-line emissions from cometary nuclei

06 p1136 A70-18012

Large scale artificial plasma cloud experiments for magnetosphere, solar wind and cometary physics, discussing Ba ion and ice clouds released by satellites [AIAA PAPER 70-33]

06 p1145 A70-18183

Kinetics of solar wind interaction with moon and planetary bodies using perturbation scheme to obtain ion density distribution on antisolar side [AIAA PAPER 70-61]

06 p1136 A70-18192

Solar plasma wind simulator design and performance, discussing ion source, mass separator, beam mass analyzer and Faraday cup [AIAA PAPER 70-31]

06 p1030 A70-18223

Solar wind flow different interactions with earth, Venus and moon

06 p1136 A70-18284

Solar wind interaction with moon derived for model and compared with satellite data

06 p1147 A70-18291

Solar flare induced interplanetary shock and helium enriched driver gas observed on 13 February 1967, discussing wind velocity and plasma acceleration

06 p1152 A70-18526

Collisional skewing of electron distribution function associated with heat conduction in solar wind, exciting collisionless ion-acoustic, electrostatic ion cyclotron and magnetoacoustic waves

06 p1136 A70-18527

- Magnetic activity effect on magnetospheric
plasmopause position, measuring ion concentrations
as function of local time from OGO 5 observations
06 p1058 A70-18530
- Lunar interior electrical conductivity estimated
using lunar interaction with solar wind and interplanetary
electric and magnetic fields
06 p1153 A70-18544
- Earth magnetosphere physics, considering solar
plasma flow, ring currents, charged particles during
magnetic storms, solar wind energy transfer, etc
06 p1060 A70-18552
- Magnetic field and plasma variations in lunar wake
using Maxwell equations
06 p1153 A70-18636
- Unipolar induction to calculate moon interior electric
field profiles, noting magnetic back pressure as
limb shock wave and interaction with solar wind
07 p1377 A70-18970
- Solar wind, using data on solar and galactic cosmic
rays in interplanetary space
07 p1366 A70-19030
- Steady spherical plasma flow from sun analyzed by
equations of solar corona hydrodynamical model
07 p1378 A70-19033
- Circumsolar plasma structural inhomogeneity origin
07 p1384 A70-19418
- Solar wind effects on galactic cosmic rays isotropic
diffusion and density distribution in interplanetary
space in presence of azimuthal asymmetry
07 p1366 A70-19429
- Solar wind velocity anisotropy effect on interplanetary
magnetic field inhomogeneity
07 p1366 A70-19443
- Strong explosion model for analyzing shock wave
propagation after chromospheric flare allowing for
quasi-radial motion of unperturbed solar wind
07 p1367 A70-19489
- Hydromagnetic wave interaction with magnetopause
and bow shock, considering solar wind turbulence
and magnetopause tail stability
07 p1270 A70-20070
- Galactic cosmic rays intensity long term modulation,
studying roles of solar corona, solar wind and
interplanetary electromagnetic field
07 p1369 A70-20075
- Cosmic ray microvariations relation to solar wind
structure, particle scattering models, spatial distribution,
time variations, etc
07 p1372 A70-20336
- Solar wind structural characteristics determination
from cosmic ray variations in interplanetary medium,
considering interplanetary magnetic field structure
and spatial orientation
07 p1372 A70-20337
- Solar wind interaction with galactic cosmic radiation
resulting in wind radial motion braking, discussing
possible solar wind focusing
07 p1373 A70-20343
- Steady state spherically symmetrical ejection of
multicomponent plasma from sun determined with
hydrogen approximation, considering ion composition
07 p1391 A70-20418
- Solar wind velocity cycles from fluid MHD viewpoint,
applying Kelvin theorem on circulation stability
in closed fluid system
07 p1373 A70-20441
- Alfvén wave structure mechanism of geomagnetic
micropulsation type in cometary tails, assuming Kelvin-
Helmholtz instability at comet plasma-solar wind
interface
08 p1565 A70-20567
- Hydrogen supply rate by solar wind found comparable
to hydrogen losses from earth by diffusion into
space
08 p1487 A70-20637
- Solar wind ejection, analyzing regions of heat conducting
fluxes and laminar patterns
08 p1561 A70-21059
- Solar wind velocity radioastronomical measurements,
discussing radio wave fluctuations, telescope
antenna designs, radiometers and observations
08 p1474 A70-21070
- Plasma instabilities in solar wind for frequencies
near proton gyrofrequency, driving instabilities by
electron and proton thermal anisotropies
08 p1561 A70-21261
- Initial deceleration of solar wind positive ions
upstream of earth bow shock determined from OGO 5
high time resolution plasma measurements
08 p1562 A70-21377
- Solar corona and interplanetary plasma structure
and dynamics, calculating solar wind velocity as function
of distance from sun
08 p1576 A70-21397
- Interplanetary density distribution of cold interstellar
origin hydrogen dependent on solar EUV flux,
considering interaction with solar wind protons
08 p1562 A70-21401
- Solar wind and Venus topside ionosphere interaction,
discussing charged particle density, temperature
and pressure distribution
08 p1578 A70-21550
- Laboratory irradiation of rock samples for solar
wind flux effects on IR reflectivity of lunar rocks
08 p1579 A70-21565
- Energy distribution of solar wind alpha particles in
magnetosheath observed by Heos A satellite
09 p1744 A70-22305
- Solar wind heating, determining roles of various
energy sources from Explorer 34 observations
09 p1755 A70-22511
- Magnetic field and gas thermal conductivity effects
in analysis of solar wind as one dimensional, steady
and spherically symmetric flow
09 p1745 A70-22687
- Refractive index variation regions and mapping
along propagation path in random medium, noting
application to solar wind electron density structures
measurements
09 p1634 A70-22699
- Solar wind magnitude and variability effects on
geomagnetic activity and cosmic ray intensity modulation
from satellite observations
09 p1745 A70-23272
- Monograph on solar wind covering solar physics,
space observation methods, solar system interactions,
etc
09 p1745 A70-23475
- Solar wind properties and helium abundance determined
from satellite-borne electrostatic analyzers
09 p1746 A70-23482
- Lunar limb weak solar wind shock due to conducting
crust-interplanetary magnetic field interaction
09 p1764 A70-23485
- Magnetic disturbances caused by magnetosphere-solar
wind filamentary inhomogeneity interaction observed
by Pioneer 6
10 p1931 A70-24320
- Comets ionized shells, studying plasma expansion in
corpuscular solar wind magnetic field
10 p1940 A70-24372
- Solar wind model with electrons, protons and alpha
particles coupled by electric field and expanding due
to pressure gradient and solar gravitation
10 p1931 A70-24433
- Magnetopause boundary between shocked streaming
solar plasma and geomagnetic tail observed at
lunar orbit by magnetometer on Explorer 35
10 p1941 A70-24436
- Isotopic ratio anomaly of Re and detection at nanogram
level in solar wind using decay curves of Re
source from lunar specimen
10 p1932 A70-24532
- Solar wind-geomagnetic field interactions, considering
day and night hemispheres, satellite observations,
shock and magnetopause motion, shock structure, etc
10 p1932 A70-24553
- Solar and solar system planetary atmospheres including
interplanetary space filled with solar wind
10 p1942 A70-24611
- Pressure anisotropies contribution to solar wind
corotation, discussing angular momentum and magnetic
field
10 p1935 A70-25285
- Satellite solar wind observations concerning interplanetary
magnetic field direction and strength, proton
distribution, solar wind velocity, density and direction
10 p1935 A70-25286
- Particle acceleration during solar plasma ejection,
disregarding magnetic effects on flux
11 p2107 A70-25526
- F region magnetic disturbances due to low energy
solar plasma penetration during proton bursts
11 p2104 A70-25535
- Polar ionospheric current and interplanetary magnetic
field directions related from mean diurnal values
of solar wind velocity
11 p2044 A70-25551
- Swiss Solar Wind Composition Experiment, analyzing
trapped particles characteristics of Apollo 11 and
12 lunar exposed aluminum foil
11 p2105 A70-25950
- Solar wind correlation with geomagnetic activity,
comparing Vela 3 and 4 observations with Mariner 2
measurements
11 p2105 A70-26075
- Plasma density and velocity required for simulating
solar wind flow over magnetosphere (bow shock/ in
plasma wind tunnel
11 p2032 A70-26372
- Interplanetary medium kinetic equations to limit ion
temperature anisotropies in solar wind, discussing
Coulomb collisions and ion-cyclotron instability effects
11 p2105 A70-26561
- Oblique shock initiated by 7 July 1966 proton flare in
solar wind observed by satellite magnetometers outside
magnetosphere
11 p2105 A70-26562
- Geomagnetic damped type pulsations associated
with storms interpreted as interaction between
hydromagnetic oscillations and magnetospheric motions
caused by solar wind
11 p2047 A70-26567
- Comet Morehouse /1908III/ tail rays waviness interpreted
in terms of fluctuations in solar wind direction
11 p2117 A70-26649
- Solar wind magnetic field power spectra and plasma
velocity, discussing turbulence, viscosity and dissipation
11 p2106 A70-26770
- Solar wind structure as function of corotating
coronal inhomogeneities determined using perturbation
equations for spherical polar coordinate system
12 p2292 A70-27179
- Very low frequency radio noise in ionosphere, magnetosphere
and solar wind, using multiple receivers to measure
mathematical relations between direction magnitude
and polarization characteristics
12 p2184 A70-27574
- Solar plasma and energy and radiation fading during
microwave bursts due to synchrotron radiation losses,
determining magnetic field strength
12 p2294 A70-27593
- Lunar limb shock wave observed by Explorer 35
satellite defined with respect to solar wind flow
direction, discussing formation mechanism
12 p2294 A70-27594
- Magnetospheric magnetic field disturbance due to abrupt
solar wind parameters change, using Explorer 26 data
13 p2475 A70-28469
- Semiannual variation of geomagnetic activity related
to incident solar wind, considering Mariner 2 measurements
13 p2475 A70-28573
- Monograph on polar aurora with emphasis on solar
wind and interplanetary magnetic fields, discussing
substorms, particle acceleration in current sheet, etc
13 p2395 A70-28983
- Two fluid model for solar wind treating constant
temperature electrons hydrodynamically and protons
as collisionless
13 p2477 A70-29178
- Steady state symmetrical model for solar wind near
equatorial plane, investigating effects of magnetic
forces, viscosity and anisotropic pressure on
azimuthal motion
13 p2477 A70-29179
- Solar wind effect on structure of magnetic field in
magnetosphere and interplanetary space, noting
interaction with moon
13 p2498 A70-30051
- Magnetotail plasma sheet temporal variations during
substorms and plasma pressure as related to dynamic
pressure of solar wind from Vela satellites observation
13 p2480 A70-30061
- Radiation belt and auroral primary ions, comparing
origin possibilities of ionosphere and solar wind
13 p2481 A70-30063
- Solar wind parameters time variations influence on
geomagnetic activity from measurements by electrostatic
analyzers on Vela satellites
13 p2481 A70-30065
- Interplanetary shock wave properties in solar wind,
determining propagation velocity, transit times proton
density, proton and electron temperatures
13 p2481 A70-30066
- Hydromagnetic fluid model of solar wind for interpreting
discontinuities in plasma and magnetic field,
interaction with atmosphere, heating mechanism and
chemical composition
13 p2481 A70-30067
- Satellite plasma diagnostics for electric and magnetic
fields and fine structure of collisionless shocks in
solar wind plasma flows and interplanetary shocks
13 p2481 A70-30069
- Plasma wave particle interactions in outer magnetosphere,
magnetosheath and solar wind, noting role of
AC electric fields
13 p2483 A70-30085
- Solar wind interaction with moon, constructing
mathematical model based on MHD equations and Explorer
35 data
14 p2630 A70-30356
- Solar wind energies spherical surface average and
fluctuations from integration of conservation equations
14 p2630 A70-30357
- Solar wind interaction with earth, moon, planets and
comets, using hypersonic fluid analog involving shock
wave interactions
14 p2631 A70-30360
- Mathematical model for interaction of solar wind
with geomagnetic field, predicting magnetosphere
shape
14 p2574 A70-30736
- Anomalous ionization variations of F 2 layer at
northern geomagnetic pole during winter coincident
with decrease in solar plasma density
14 p2575 A70-30810
- Cosmic ray transport in solar wind generalized with
anisotropic diffusion approximation
14 p2632 A70-30887
- Solar wind turbulence, demonstrating radio source
interplanetary scintillation consistent with plasma density
correlation
14 p2642 A70-30888

Solar wind interaction with planetary ionosphere, considering flow behavior across bow MHD shock 14 p2647 A70-31073

Solar flare particle flux equilibrium anisotropy and convection in solar wind 15 p2793 A70-31901

Apollo 11 lunar mission results, discussing surface, seismology, laser ranging retroreflector, solar wind and rock samples 15 p2800 A70-32073

Terrestrial magnetosphere dynamics in magnetosheath disturbances, analyzing solar wind-geomagnetic field interaction and storm development 15 p2729 A70-32080

Magnetosphere survey, including solar wind flow theory, observational techniques, radiation belt theory, magnetic storms, etc 15 p2732 A70-32544

Solar wind models based on exospheric theory assuming collisionless particles 15 p2794 A70-32613

Alfvén wave structure mechanism of geomagnetic micropulsation type in cometary tails, assuming Kelvin-Helmholtz instability at comet plasma-solar wind interface 15 p2805 A70-32722

Strong explosion model for analyzing shock wave propagation after chromospheric flare allowing for quasi-radial motion of unperturbed solar wind 15 p2795 A70-32734

Collisionless shock waves model in solar wind plasma, discussing instability and energy dissipation 15 p2795 A70-32825

Solar wind observations by Pioneer 6, considering particle density, flux and kinetic energy 16 p2972 A70-32949

German-American HELIOS solar probe for solar wind, interplanetary magnetic field and cosmic rays 16 p2987 A70-34343

Solar wind interaction with earth, moon, Venus and Mars, reviewing literature on continuum fluid model, spacecraft observations, plasma characteristics, etc 17 p3150 A70-34669

Periodic comet nature, origin and anomalous behavior with space mission planning implications, assuming solar plasma source and solar-interstellar interaction AAS PAPER 70-029 17 p3155 A70-34795

Solar rotation effects on velocity field in nonspherical solar wind, using axisymmetric fluid model 17 p3151 A70-34861

Heliostationary spacecraft at L2 point for solar wind observation, describing mission, instrumentation and spacecraft design 17 p3168 A70-35252

Lunar atmosphere as source of Ar 40 and other elements in surface materials, discussing implantation by photoionization and subsequent interaction with solar wind fields 17 p3172 A70-35624

Solar wind velocity profile in rapid acceleration of coronal plasma from type I, III and V bursts 17 p3152 A70-35745

Ions acceleration and motion in corona and solar wind, discussing equation derivation, He abundance, nonMaxwellian distribution functions, minimum flux estimation, etc 17 p3152 A70-35870

Radio sources angular broadening by solar wind turbulence used for solar corona probe 18 p3311 A70-36003

OGO 5 observations of quasi-trapped electromagnetic waves in solar wind at 70 kHz 18 p3306 A70-36005

Interplanetary plasma disturbances in Venus proximity from Venera measurements 18 p3312 A70-36172

Temporal and spatial covariation of high latitude geophysical phenomena, using unified mechanism of solar plasma stream interaction with geomagnetic field 18 p3247 A70-36404

Solar wind effects on galactic cosmic rays isotropic diffusion and density distribution in interplanetary space in presence of azimuthal asymmetry 18 p3309 A70-36903

Solar wind velocity anisotropy effect on interplanetary magnetic field inhomogeneity 18 p3309 A70-36917

Elastic energy transfer cross sections calculation of H-H scattering to estimate neutralized solar wind particles thermalization 18 p3309 A70-36951

Mass spectrometric analysis of lunar rocks for rare gases of solar wind, determining relative abundance, isotopic composition, rock age, exposure time, etc 18 p3320 A70-37083

Geomagnetic activity relation to large scale variations in interplanetary magnetic field and solar wind deformation velocity, using satellite and space probe observations 19 p3491 A70-37304

Flare associated high energy photon and particle fluxes characterized by short rise times and longer lasting decays, discussing plasma emissions 19 p3493 A70-37473

Solar wind disturbances associated with solar activity observed by spacecraft probing interplanetary space, considering geomagnetic activity classes 19 p3494 A70-37478

Solar wind fluxes observed onboard Venera 2 and 6 compared with earth electromagnetic field pulsations and short period disturbances 19 p3494 A70-37479

Plasma properties across bow shock and in magnetosheath as function of supersonic solar wind 19 p3494 A70-37481

Trapped particle population changes associated with solar events, discussing solar wind discontinuity effects on magnetosphere 19 p3495 A70-37487

Interplanetary plasma observations by Vela satellites in solar wind and plasma sheet of magnetotail during magnetic storm 19 p3410 A70-37490

Solar wind discontinuity during solar flare from Heos A measurements, observing shock wave propagation 19 p3495 A70-37502

Solar wind and flare energetic particles properties and interactions, surveying interplanetary magnetic field, planetary bow shock waves, neutrons, neutrinos, etc 19 p3511 A70-38418

Geomagnetic field pulsations prior to polar magnetic disturbance onset, discussing solar wind role 19 p3416 A70-38588

Solar wind velocity variations showing relationship with electron density excess and localized region temperature of corona 19 p3512 A70-38693

Plasmapause motion in equatorial plane under sudden dawn-dusk field with constant solar wind-magnetosphere interaction 20 p3620 A70-39341

Maximum to minimum exospheric temperature ratio determination, concluding solar wind dependence of diurnal variation in thermosphere 20 p3621 A70-39345

Interplanetary magnetic field structure, using solar wind model accounting for solar rotation 20 p3704 A70-39474

Solar wind effects on thermal control coatings reflectance and absorbance, noting simulation and thermophysical measurement requirements AIAA PAPER 70-833 20 p3655 A70-39825

Solar internal rotation, examining oblateness, velocity and magnetic fields, wind structure and Li and Be abundances 20 p3707 A70-39936

Solar wind flow behind shock fronts from Mariner 5 and Explorer 34 spacecraft 20 p3701 A70-40422

Interplanetary plasma torque due to temperature and pressure anisotropy, considering solar wind angular velocity and sun angular momentum 20 p3712 A70-40423

Solar wind X ray emission, investigating diffused cosmic ray origin and flow pattern models 21 p3878 A70-40708

Solar wind static and dynamic pressures on earth magnetosphere, using geomagnetic parameters 21 p3878 A70-40845

Flow parameters radial dependence of thin solar wind filament corotating with sun 21 p3881 A70-40972

Solar wind free electron number density measurement by Pioneer 6 spacecraft after solar proton flare, constructing plasma cloud models 21 p3881 A70-41079

Large scale flare associated solar wind disturbances observed by Vela satellites, noting prolonged elevated flow speed after shock 21 p3881 A70-41080

Solar wind proton properties examined by Vela 3, observing density distribution, flow speed and direction, thermal anisotropy, magnitude and orientation 21 p3881 A70-41081

Inner magnetosheath large amplitude hydromagnetic waves, discussing power spectrum, earth bow shock and solar wind 21 p3816 A70-41083

Particle acceleration during solar plasma ejection, disregarding magnetic effects on flux 21 p3892 A70-41276

F region magnetic disturbances due to low energy solar plasma penetration during proton bursts 21 p3882 A70-41285

Polar ionospheric current and interplanetary magnetic field directions related from mean diurnal values of solar wind velocity 21 p3819 A70-41301

Apollo 11 lunar fines trapped noble gas elemental and isotopic abundances, suggesting solar wind origin 21 p3906 A70-41565

Radiogenic and cosmogenic inert gases and isotopic ratios in Tranquility Base fines indicating solar wind saturation 21 p3775 A70-41581

Rare gas distribution in grain surfaces of lunar soil, breccias and rocks originating from solar wind, using microhelium probe 21 p3908 A70-41587

Apollo 11 lunar soil irradiation history from solar wind rare gas abundances and cosmic ray spallation products 21 p3908 A70-41590

Rock particle tracks of primary cosmic rays, spallation recoil nuclei, nuclear fission and solar wind ions, observing time scale multiple soil orientation 21 p3914 A70-41652

Proton and UV excited luminescence of Apollo 11 Tranquility rocks and fines, indicating solar wind impingement 21 p3917 A70-41672

Cosmic ray energy loss in interplanetary medium, discussing solar wind effects on low energy particles 21 p3883 A70-42111

Steady state tangential drag by solar wind on geomagnetic cavity, describing unipolar induction 22 p4013 A70-42469

Solar-magnetospheric neutral sheet reconnection and noise in geomagnetic tail from Explorer 33 Ames magnetometer 22 p4013 A70-42471

One fluid solutions for solar wind with reduced electron heat conduction in agreement with observed characteristics at corona base 22 p4093 A70-42472

Reverse hydromagnetic shock in solar wind as discontinuity of plasma density, proton temperature and magnetic field density, using spacecraft data 22 p4093 A70-42474

Comet Schwassmann-Wachmann I brightness variations due to interplanetary shock waves in solar wind 22 p4097 A70-42475

Solar wind source, nature and propagation, discussing wind-magnetosphere interaction, corpuscular radiation channeling along force lines and effects in space and on planets 22 p4093 A70-42523

Space electric field considered for solar wind plasma drift origin and possible energy source for spacecraft propulsion, estimating intensity on lunar surface 22 p4100 A70-42789

Planetary unipolar electric generator system theoretical model based on polarization charges deposition by solar wind 22 p4100 A70-42790

Weak-scattering limit in thin screen model of interplanetary scintillations of radio sources involving solar wind fluctuations at Fresnel scale 22 p4104 A70-42996

Hydromagnetic theory of solar wind flow past earth extended to nonmagnetic planets Venus and Mars 22 p4095 A70-43106

Worldwide geomagnetic fluctuations during disturbed conditions computed from spectrum analysis, considering long period oscillation caused by solar wind structure changes 22 p4019 A70-43114

Solar wind intensity and direction correlated with intensity of earth surface magnetic disturbances and geomagnetic pi-2 type pulsations 22 p4022 A70-43284

Magnetospheric and magnetic storms correlated to solar wind energy penetration, noting roles of energetic plasma and magnetospheric low energy plasma convection 22 p4022 A70-43287

Solar wind properties correlated with geomagnetic activity, discussing interplanetary discontinuities, shock waves, flare associated disturbances and geomagnetic activity sequences 22 p4022 A70-43288

Solar wind instability from TEM waves propagating parallel to magnetic field in electron-proton plasma 23 p4235 A70-43826

Geomagnetic wake in solar wind at 500 earth radii, correlating Explorer 35 and Pioneer 8 data 23 p4184 A70-43828

Solar wind flux correlation with earth EM field pulsations, noting flare-generated shock front effects on magnetosphere 23 p4236 A70-44051

Solar wind electric field relation to ground magnetic disturbances during magnetic storm from Explorer 28 and ground data 23 p4188 A70-44062

Helios solar observation satellite equipment design study for solar plasma low energy particles onboard measurements 23 p4262 A70-44844

MHD stability of tangential discontinuities in solar wind flow 24 p4396 A70-45325

Discontinuity in solar wind energy and angular distribution from 2 January 1970 ESRO satellite HEOS-1 observation 24 p4396 A70-45326

- Solar wind two fluid model with boundary conditions describing electron and proton behavior in expanding corona
24 p4397 A70-45770
- SOLAR X-RAYS**
Solar X ray flare regions size, structure and localization from Cosmos 166 and 230 heliograph observations
01 p0168 A70-10252
Meter wave type 3 solar radio waves associated with solar X ray flares, discussing sudden enhancements of LF field strength due to D layer ionization enhancement
01 p0168 A70-10257
Intensity distribution determination in spectrum of solar XUV fluxes incident upon upper atmosphere, considering quantitative model construction
01 p0170 A70-10593
Statistical analysis of satellite drag data for characteristic time of thermal fluctuations in upper atmosphere caused by soft solar X-rays
03 p0472 A70-13179
Solar X-ray bursts observations correlation with sudden phase anomalies measured at long VHF propagation paths in lower ionosphere
03 p0558 A70-13601
D layer radio absorption during solar eclipse of 22 September 1968 attributed to two solar X-ray sources
03 p0559 A70-13602
Solar microwave and soft X ray radiation emission correlation to determine flare peak temperature and solid angle
04 p0741 A70-15126
Solar particle events 1966 /August-September/ in McMath region 8461
05 p0901 A70-16426
Solar activity study based on solar X ray spectra observation, considering flare mechanism
05 p0903 A70-16719
Rapid fine structure in hard solar X ray bursts observed by OSO-5, explaining time structure by mechanism based on repetitive production of monoenergetic electrons
05 p0904 A70-16980
Extreme UV flashes of solar flare observed by sudden ionospheric frequency deviations compared with energetic X rays observations
05 p0905 A70-16981
Solar X-ray flux from Explorer 33 and 35 observations, presenting catalog of tabular and graphical data
06 p1135 A70-18006
X ray and H alpha emissions associated with solar proton flares, correlating rise time with solar cosmic rays
06 p1137 A70-18547
Solar soft X ray spectrum analyzed by OSO 4 proportional counter, discussing slowly varying component, corona active regions and impulsive event characteristics
07 p1369 A70-20289
Solar low energy X ray bursts using data from OSO-4 proportional counter spectrometer
09 p1745 A70-22739
Solar X-ray flare of 17 August 1966, describing rocket-borne instruments and measurements
09 p1746 A70-23479
SID effects during recording of long wave transmitter field strength, indicating relation between solar X-ray flares and field anomalies
10 p1932 A70-24485
Hard X-ray pulse identification with formation of brilliant kernel /11-12 September 1968/ flare by comparison with optical data
11 p2104 A70-25746
Critical review of Meisel paper on solar X ray source identification using D layer ionization behavior during eclipse
11 p2109 A70-25750
Solar X rays observation from manned orbiting workshop of Apollo Applications Program, describing telescope/camera assembly and X ray event analyzer
11 p2057 A70-26506
Solar L alpha and X ray emission contribution to lower ionosphere ion production, discussing altitudinal, latitudinal and temporal variations
11 p2106 A70-26789
X ray and proton flux measurement during solar flare of 29 September 1968 by balloon-borne detectors
14 p2633 A70-31310
Solar X-rays measurements with spectroheliograph conducted on rocket flights
14 p2589 A70-31339
X ray bursts rise and fall observed by spectrometer onboard OSO-4
15 p2792 A70-31670
Intercomos 1 satellite for observing solar UV and X-ray emission in solar flares prediction
15 p2738 A70-32145
Sudden phase anomaly /SPA/ in VLF radio wave propagation during Proton Flare Project, noting corresponding solar X-ray flux intensity enhancement
15 p2794 A70-32294
Negative sudden phase anomaly /SPA/ in VLF radio transmission, noting solar X ray flux intensity and zenith angle effects
15 p2699 A70-32297
- X ray and microwave emissions relationship to sources on sun, discussing development and structure of sunspot groups
15 p2794 A70-32486
Low energy electron emission during solar flares relation to radio and X ray emission
15 p2795 A70-32622
Solar radiation intensity at Lyman alpha wavelength and X ray spectrum before and during solar eclipse of 7 March 1970
16 p2972 A70-33827
Solar X-ray spectrum and intensity and diffuse cosmic flux measurements, using polar orbiting satellite-borne instruments
17 p3149 A70-34534
Solar X-ray flux measurements in selected emission lines, using curved crystal Bragg spectrometers in low altitude sounding rockets
17 p3150 A70-34834
Solar X-ray emission localization, examining spatial distribution by rocket-borne collimated proportional counter
17 p3151 A70-34864
Ionospheric E layer formation, investigating role of solar X ray control by electron production rate and density calculations
17 p3151 A70-34943
Solar flare of 25 February 1969 at soft X ray frequencies by ESRO 2 satellite observation
19 p3495 A70-37499
Solar X ray emissions from quiet and active sun compared with radio flux to investigate production mechanisms
19 p3512 A70-38009
Solar X ray emission during flares from ionospheric absorption measurements, discussing continuous ionograms method
19 p3512 A70-38912
Solar soft X ray flare spectra of 16 November 1967, examining electron temperatures and emission lines by OSO-4
20 p3700 A70-40419
Solar X-ray corona during eclipse of 7 March 1970, using Aerobee rocket photographs
20 p3713 A70-40430
Solar X-ray spectra of active regions, examining emission lines, fluxes electron temperature and density and transitions
21 p3879 A70-40963
Soft X-ray enhancement during solar flares due to coronal condensation temperature increase
21 p3880 A70-40969
Solar X-ray bursts correlation with H alpha flares and microwave bursts observed by Explorer 34 experiment
21 p3880 A70-40970
Particle acceleration phase in solar flare development, discussing H alpha maximum, hard X ray burst and bremsstrahlung
21 p3880 A70-40971
Nonflaring solar X-ray and microwave radiation flux correlation from satellite data
22 p4104 A70-42995
Solar X-ray data from rocket and satellites, discussing hot dense plasmas and correlation with H alpha flares, calcium plages and microwave emission
22 p4096 A70-43300
Soft solar X rays cyclic variation from satellite observation, noting relation to sunspot group magnetic field complexity
22 p4096 A70-43301
X ray and microwave emissions relationship to sources on sun, discussing development and structure of sunspot groups
23 p4236 A70-43910
Solar X ray spectra interpretation by laboratory measurements, using plasma X ray source and potassium acid phthalate spectrometer
23 p4237 A70-44419
Coronal shock growth as source of thermal solar X ray bursts associated with optical events
24 p4401 A70-45320
Solar flares X ray emission polarization measured by Thomson scattering instrument on Intercomos-1 satellite
24 p4396 A70-45321
Class 1b solar flare X ray examination, using rocket-borne liquid N cooled solid state detector
24 p4397 A70-45767
Solar X-ray flare temperature and emission measure profiles using OGO 5 satellite detector, interpreting energy dispersion of peak times
24 p4397 A70-45768
Solar XUV and soft X ray photometry, describing sounding rocket and satellite grazing incidence spectrometers
24 p4339 A70-45822
Esro 2 satellite instrument measuring soft solar X-rays
24 p4340 A70-46358
- SOLDERED JOINTS**
Ceramic plasma containers construction by soldered seal technique for ion lasers, noting moly- manganese process
02 p0314 A70-12746
- Silicon solar cell panels, studying roles of solder, interconnector metals and substrate materials in failures under thermal cycling
04 p0628 A70-15333
Brittleness of joints using Ga solders prevention by high temperature annealing noting application to aluminum alloys
05 p0628 A70-15333
Hard wire hermetically sealed two degrees of freedom rotating coupling design for continuous soldered wire connections between spacecraft and oriented solar array
16 p2924 A70-34172
Nondestructive measurement of elastic and plastic deformation in soldered joints and printed circuit boards by holographic interferometry
22 p4047 A70-43521
- SOLDERING**
NT ULTRASONIC SOLDERING
Boron carbide soldering with refractory metals by molybdenum disulfide as solder, analyzing electrical resistance and gas tightness
09 p1707 A70-23123
- SOLDERS**
Molten bridging alloy deposition on p and n type thermoelectric materials, utilizing diffusion process brief duration during contact
01 p0059 A70-10758
Solder mechanical contact strength to CdS insulating crystal platelets tested in liquid N, noting Ag epoxy
02 p0319 A70-12738
- SOLENOIDS**
Spectral line width and shift measured by spectrograph crossed with Fabry-Perot interferometer in pressure chamber, measuring magnetic field in solenoid
12 p2238 A70-28178
- SOLID ARGON**
U SOLIDIFIED GASES
SOLID LUBRICANTS
Low speed Ga lubricated sliding electrical contacts of Be in vacuum, discussing Ga film role in friction and contact resistance
01 p0059 A70-10325
Polybenzimidazole /PBI/ resin-bonded solid film lubricants composed of molybdenum disulfide, antimony trioxide and PBI resins
01 p0101 A70-10390
Bonded solid lubricant films wear life equation for low contact stress conditions, determining optimal film thickness
01 p0102 A70-10397
Load, speed and coating thickness effect on wear life of resin bonded solid lubricant, using oscillating motion and low pressure blocks
01 p0103 A70-10447
Friction and wear tests on solid lubricant graphite fluoride compared with molybdenum disulfide at specific temperatures, considering friction coefficient
02 p0321 A70-12536
Potential lubricants in friction and cup forming tests of stainless steel, Ti- and Ni-base alloys, considering boron nitride, graphitic materials and Mo oxides
02 p0309 A70-12540
Solid lubricant films adhesion to metallic surfaces measured using pivot-twist technique
03 p0485 A70-13485
Particle, resin and inorganic bonding of solid lubricant to surface and dry lubricant film performance
05 p0855 A70-16043
Molybdenum disulfide solid film lubricant with increased wear life developed from in situ conversion of electrodeposited molybdenum trioxide
06 p0191 A70-17339
Solid lubricants friction and wear bench testing under simulated space environment
06 p1075 A70-17340
Solid film lubricants pretreatment and applications in aircraft and aerospace industries
06 p1075 A70-17340
Liquid and solid lubricants, discussing properties, temperature ranges, costs, environmental effects and outlook
07 p1316 A70-18953
Synthetic molybdenum disulfide crystal properties compared to natural crystals, discussing friction coefficient, adherence to metal surfaces, etc
10 p1907 A70-24785
Molybdenum disulfide dry film lubricant wear life as film sintering process dependent on binder, additive or atmosphere chemical effects
11 p2058 A70-25571
Service life and friction coefficient of molybdenum disulfide-silicon lubricating coating as function of load, sliding rate and vacuum level
11 p2090 A70-25943
Solid lubricant crystallographic orientation selection for antifriction cermet material silver- molybdenum disulfide
12 p2254 A70-27286
Solid lubricated contacts performance in Nimbus and OAO spacecraft, discussing slip ring assembly and noise problems in Ag-graphite brushes
16 p2920 A70-33819

Materials test fixture design and fabrication for vacuum testing and evaluation of slip rings and brushes, discussing dry film lubrication 16 p2920 A70-33812

Instrument size ball bearings lubricated with bonded dry or transfer films in simulated interplanetary spacecraft tests 16 p2923 A70-34166

Solid film lubricants deposited by DC and RF sputtering on metal and glass surfaces, determining friction characteristics by electron microscopy 17 p3099 A70-34516

Transition metal disulfides and diselenides as solid lubricants, investigating sliding friction characteristics [ASLE PREPRINT 70AM 6E-1] 19 p3438 A70-38801

Binder wetting relation to solid film lubricant wear life [ASLE PREPRINT 70AM 5A-3] 19 p3439 A70-38810

Molybdenum disulfide abrasiveness on test rings coated with bonded solid lubricant [ASLE PREPRINT 70AM 5A-1] 19 p3439 A70-38811

High temperature organic resin binders and solid lubricant thermal and oxidative behavior examined by thermogravimetric analysis [ASME PAPER 70-HT-30] 22 p4058 A70-42436

SOLID NITROGEN

U SOLIDIFIED GASES

SOLID PHASES

Ni-based superalloys microstructure, describing composition, formation and characteristics of various phases 01 p0124 A70-11448

Quenched Ti-Mn alloy omega transition phase microstructure characteristics by transmission electron microscopy using thin foils 01 p0125 A70-11639

Ti-Al-Co alloys reactions in solid phase in Ti-rich region, using optical microscopy and X ray diffraction analysis 01 p0125 A70-11645

Flame spreading mechanism over surface of igniting condensed phase materials in quiescent gaseous environment with chemically reacting component 02 p0396 A70-12014

Phase content determination in borides and borocarbides mixtures based on compounds different chemical stabilities during hydrolysis and reaction with acids 03 p0514 A70-12984

Shear moduli and lattice parameters effect on screw dislocation equilibrium in bimetallic medium of soft and hard phases 03 p0587 A70-13117

Lattice misfit influence on metastable omega phase morphology and stability in Ti transition metal alloys 03 p0508 A70-13146

Carbide phase in Cr-Mn heat resistant steels at annealing temperatures, isolating gamma phase, chromium carbide and niobium carbide phases 03 p0509 A70-13279

Heat treatment effects on phase components of Cr-Mn-B alloys with W and Nb additions, discussing heat resistance 03 p0510 A70-13280

Phase structure and corrosion resistance of alloys in Ti-V-Cr system, discussing effects in HCl, sulfuric acid, nitric acid, acetic acid and NaCl solution 03 p0510 A70-13282

Extension characteristics of delta and sigma related phases in Mo-Ni ternary systems and evaluation of unit cell dimension variations on alloying 04 p0704 A70-14392

Polymorphic transformation effects on oxygen diffusion rate in alpha and beta phases of Ti, considering temperature effects and activation energy 04 p0707 A70-15211

Peptides removal from Merrifield solid phase by transesterification with anion exchange resin 06 p1003 A70-17154

Thermal control of spacecraft via solid-liquid phase change materials [AIAA PAPER 70-12] 06 p1092 A70-18137

Caloric data determining saturated vapor pressure of nitrogen tetroxide and heat of sublimation for sublimation curve 07 p1358 A70-19206

Forces at boundary surface in solid phase in solids and adhesive film interactions, considering boundary surface energy 08 p1503 A70-20879

Allende meteorite showing presence of Ca-Al-rich glasses associated with other crystalline phases 08 p1579 A70-21562

Creep deformation in single crystals of gamma prime precipitation hardened nickel base alloys at intermediate temperatures 09 p1705 A70-22809

Sigma phase occurrence in transition/nontransition elements alloys, discussing solid solubility limits 09 p1708 A70-23424

Optical properties of beta prime phase CoAl, CoGa and NiGa as functions of composition and photon energy 10 p1919 A70-23986

Solid-gas phase equilibria of binary systems related to cryogenics 12 p2329 A70-27023

Phase lattice constants determination by computer method of debyeogram line indexing 12 p2258 A70-28350

Specific heat measurements on disordered and ordered phases of Cu-Au alloys at low temperatures 14 p2626 A70-30497

Superconductivity in noble metal rich hexagonal close packed phases and fcc solid solutions ascribed to Fermi surface-Brillouin zone interaction 15 p2785 A70-32398

Metastable beta phase decomposition in Ti alloy during mechanothermal treatment and aging, determining correspondence to alpha phase segregations via electron microscopy 16 p2931 A70-33207

Gamma phase particle distribution changes in homogeneous segregation in Co-Ti alloy attributed to elastic interaction during aging temperature changes 16 p2931 A70-33208

Ti alloys systems physical properties and structural phase stability, discussing electronic Fermi state density variation 17 p3114 A70-34376

Titanium base binary systems phase diagrams, describing component activity and compound phases heat of formation 17 p3114 A70-34379

Ti alloys martensitic transformations, metastable beta-phase decomposition and alpha-phase ordering 17 p3118 A70-34403

Metastable Ti alloys beta-omega-alpha decomposition and Ti-8Al alpha-ordered alpha transformation, using automatic measuring apparatus 17 p3118 A70-34409

Omega phase morphology in Ti alloy by electron microscope techniques, noting cubic structure 17 p3118 A70-34410

Omega phase stability in Ti and Zr alloys, interpreting upper temperature limit from critical temperature associated with peritectoid reaction 17 p3119 A70-34411

Heat treatment and composition effect on mechanical properties of alpha Ti-base alloy, discussing creep resistance, tensile strength, etc 17 p3122 A70-34439

Fe-Ni alloy alpha-gamma phase transformation after heating, noting deformation planes and directions in martensite 18 p3275 A70-36204

Titanizing Armco iron and carbon steels, examining diffusion layer structure and phase composition 19 p3451 A70-37460

Solid-solid phase transitions in molecular crystals of organic tetrahedral substances, using differential scanning calorimetry 19 p3373 A70-38193

Phase formation and mass transport during iodine-refined Ti reaction with nitrogen at various elevated temperatures 19 p3452 A70-38364

Solid phase stabilization of zirconium dioxide by combined addition of yttrium and magnesium oxides 19 p3455 A70-38732

Ti alpha alloys subjected to heating in beta region, investigating plate-like precipitates by electron transmission microscopy 20 p3645 A70-39042

Two phase Ti alloy subjected to quenching and annealing studied by diffraction electron microscope, discussing needles complex fine structure 20 p3645 A70-39043

Microstructure and composition of hafnium dioxide stabilized with Ca, Y and Mg oxides using metallographic, X ray and microprobe 20 p3654 A70-39242

Liquid and solid phases of substance, calculating thermodynamic properties and vapor pressure logarithm dependence on temperature 22 p4124 A70-42683

Phase analysis for individual multicomponent alloys, discussing chemical composition in case of invariant equilibria and electron beam microprobe 22 p4053 A70-42734

Ni base superalloys gamma prime phase long range order parameter measured by X ray diffraction 23 p4207 A70-44423

Solid phase energy role in flame spreading over solid fuel bed surface in oxidant-containing environment 23 p4281 A70-44424

Ni-Fe-Cr-Nb alloy, investigating precipitation hardening of Ni3Nb phases by transmission electron microscopy 24 p4357 A70-45226

Al-Mg alloys solid phases free energy, entropies and formation heats determination by electromotive force measurement 24 p4357 A70-45230

Subsolidus state multicomponent eutectics systems temperature range based on number and melting points ratios of individual components 24 p4367 A70-45476

Chemical diffusion kinetics of zirconium silicates formation during sintering under pressure, noting activation energy estimation 24 p4367 A70-45479

Aluminized Armco iron and steel diffusion layers phase composition and microstructure 24 p4350 A70-46337

SOLID PROPELLANT IGNITION

Solid propellant combustion instability advances, discussing combustion flow interactions, response functions, etc 02 p0351 A70-12008

Flame spreading mechanism over surface of igniting condensed phase materials in quiescent gaseous environment with chemically reacting component 02 p0396 A70-12014

Solid propellants ignition response to radiative and conductive heat transfer 03 p0544 A70-13921

Saturn 5 thru-bulkhead initiator for solid propellant rocket motor ignition, discussing transfer design, pressure output and postfire leakage 03 p0546 A70-14105

Flame spreading velocity characteristics over solid fuel surfaces, discussing environmental pressure, chemical reactivity, pyrolysis, forced convection, etc [WSCIPAPER 69-33] 06 p1178 A70-17979

Ignition of single particles of light metal hydrides, considering combustion stages and heat transfer [WSCIPAPER 69-47] 06 p1179 A70-17984

Heterogeneous ignition mechanism of solid fuels, deriving surface temperature history for time and nature of transition from weak to strong combustion mode [AIAA PAPER 70-119] 06 p1128 A70-18041

Light emission and gas phase ignition of homogeneous solid propellants under shock tube conditions [AIAA PAPER 70-120] 06 p1128 A70-18042

Surface thermal factors influencing ignition delay time of composite solid propellants, using double wavelength optical detector [AIAA PAPER 70-121] 06 p1128 A70-18043

Book on fundamental aspects of solid propellant rockets covering nozzle flow, solid propellants performance, ignition, combustion stability, etc [AGARDGRAPH-116] 09 p1743 A70-22635

Composite solid propellant ignition characteristics using arc imaging furnace for radiant energy source, discussing minimum initial pressure determined by binder thermal decomposition 09 p1742 A70-23226

Exothermic bimetallic ignition systems (EBIS)/design for solid propellant rocket motors of tactical missiles to reduce shock loadings 12 p2289 A70-27694

Acoustic conductivity of burning solid propellant surface, discussing critical conditions and variable surface measurement methods 13 p2522 A70-29421

Ignition transients in solid propellant rocket engines, taking into consideration flame temperature changes with pressure and igniter secondary mass addition 14 p2628 A70-30778

Composite solid propellants surface structure and profile characteristics burning with various oxidizers and polyurethane binder by scanning electron microscopy 14 p2628 A70-30948

Ignition delay of uncompressed composite solid or hybrid propellant mixtures in rocket engine igniters 18 p3301 A70-36651

Autoignition, ignition and surface temperatures of M-2 double base propellant at low pressure, correcting thermocouple measurements by theoretical model 18 p3299 A70-36697

Homogeneous opaque reactive solid heating and ignition by constant energy flux, examining physical and chemical parameters at critical conditions 20 p3738 A70-40078

Solid propellant radiant and hypergolic ignition, examining radiation absorption and surface reaction between fuel and gaseous oxidizer 20 p3689 A70-40081

Temperature measurements in gaseous reaction zone near surface of burning composite solid propellant, using modified line reversal pyrometer 20 p3694 A70-40273

Composite solid propellant thermal ignition from hot wire tests and model 21 p3942 A70-40877

Aft-end igniter design and placement for solid propellant rocket motors avoiding overpressurization and nozzle pressure oscillations 21 p3866 A70-40892

Solid phosphorus triamide derivatives as ignition aids in hypergolic propellant systems, testing characteristics in interaction with oxidizers 21 p3865 A70-41404

Solid phase energy role in flame spreading over solid fuel bed surface in oxidant-containing environment 23 p4281 A70-44424

SOLID PROPELLANT ROCKET ENGINES

Chemical engineering application to solid propellant rocket motors optimization for specific operations, discussing fuel properties, formulation and additives, mixing and casting
[AICHE PAPER 28A] 01 p0166 A70-10971

Soviet book on gas thermodynamics of solid propellant rocket engines covering combustion products equilibrium in nozzle and chamber, engine design, etc
02 p0353 A70-11690

Axial mode shock wave oscillations in end-burning solid rocket motor, obtaining periodic solutions for flow properties, solid temperature and burning rate
02 p0353 A70-12010

Sensing device to measure radial stress induced at solid propellant grain-to-case bond interfaces during wide temperature variations, detailing instrumentation and operation
03 p0480 A70-12882

Three dimensional photoelastic case bonded solid propellant motor model, analyzing stress distribution using scattered light photoelasticity
[SESA PAPER 1587] 03 p0583 A70-12885

Mathematical model for burning rates of solid propellant rocket motors during pressure transients, coupling conservation equations with mass balance equation
03 p0543 A70-12912

Case bonded solid propellant rocket motors stresses under transverse body force loading as function of load orientation, case stiffness and support method
[SESA PAPER 1502] 03 p0579 A70-12961

Two dimensional plane stress photoelastic models of star configurations in elastic case bonded solid propellant rocket motors under transverse body force loading
03 p0582 A70-14312

Solid rocket engine components technologies, studying effects of cost consciousness
[SAE PAPER 690702] 05 p0922 A70-15828

Solid propellant motors relative performance as related to intermediate payload missions, considering reusable liquid strap-on stages for post-Saturn payloads
05 p0897 A70-16897

Hazards model for probabilistic prediction of casualties by exploding solid propellant rockets, deriving casualty expectation equation
[AIAA PAPER 69-461] 06 p1154 A70-17169

Solid rocket motor ignition system based on exothermic alloying of bimetallic wire constituents
[AIAA PAPER 69-425] 06 p1128 A70-17179

Soviet book on guided ballistic missiles design and construction employing liquid and solid propellant engines with emphasis on aerodynamic heating
06 p1155 A70-17410

Soviet book on thermodynamic and ballistic fundamentals of designing solid propellant rocket engines
06 p1130 A70-17421

LF nonacoustic instability of solid propellant rocket motors, using combustion model allowing flame temperature oscillations with chamber pressure
[AIAA PAPER 68-179] 07 p1421 A70-19319

Fluid controlled solid rocket motors design for Mars mission with acceleration level as parameter, discussing mission specifications, system design and component considerations
[AIAA PAPER 69-446] 07 p1365 A70-19707

Sterilized solid propellant motors applicability to planetary landing capsule spin stabilization
[AIAA PAPER 69-823] 07 p1365 A70-19716

Saturn ULLAGE solid propellant rocket motor vibration test evaluation
07 p1365 A70-20039

Solid propellant rocket engines design, considering nonlinear longitudinal combustion instability encountered in aluminized propellants
08 p1558 A70-20623

Quality planning for Japanese solid propellant sounding rocket motor production, discussing documentation, design, development and process controls, inspection and tests, etc
09 p1691 A70-22570

Book on fundamental aspects of solid propellant rockets covering nozzle flow, solid propellants performance, ignition, combustion instability, etc
[AGARDGRAPH-116] 09 p1743 A70-22635

Pressure surges originated by tangential instabilities in solid propellant motors, using double base homogeneously compounded cylindrical grains
09 p1743 A70-22661

Structural reliability of missile and aircraft solid propellant engines, estimating effect of loads variance, geometrical dimensions and mechanical strength
10 p1930 A70-24294

Solid rocket motor performance prediction including motor pressure, thrust and propellant parameters, discussing mathematical modeling of flow fields
[AIAA PAPER 69-732] 11 p2102 A70-26117

Interior ballistics for wide temperature throttling of solid propellant rockets by variable-throat-area nozzle, noting composition effect screening
11 p2103 A70-26154

Exothermic bimetallic ignition systems /EBIS/ design for solid propellant rocket motors of tactical missiles to reduce shock loadings
12 p2289 A70-27694

Cost optimal booster stage for European satellite launchers, comparing liquid and solid propellant rockets
13 p2502 A70-28450

Soviet book on dynamics of rockets covering solid and liquid fuel rocket stability, controllability and transfer functions
13 p2505 A70-28799

Stagnation point electrostatic probe for measuring local electrical properties of solid propellant rocket exhausts
[AIAA PAPER 69-573] 13 p2475 A70-29960

Soviet book on rocket engine theory covering liquid and solid propellants, combustion physics, nozzle and thrust chamber geometry, etc
14 p2628 A70-30628

Ignition transients in solid propellant rocket engines, taking into consideration flame temperature changes with pressure and igniter secondary mass addition
14 p2628 A70-30778

Solid rocket motors potential hazards explosive reactions and temperature and blast effects
14 p2629 A70-30782

Spacecraft propulsion development guidelines concerning rocket engines with storable propellants, rotating solid propulsion systems, cryogenic propellants, etc
15 p2790 A70-32256

Spin effect on internal ballistic of radial burning solid propellant rocket motor spun about longitudinal axis
15 p2791 A70-32794

Solid propellant rocket motor combustion control by fluidic vortex valve, considering thrust variation
[AIAA PAPER 70-643] 16 p2965 A70-33535

Optimal water quench of solid rockets using injection normal to propellant surface
[AIAA PAPER 70-640] 16 p2968 A70-33598

Combustion extinguishment of composite solid propellant motors by fluid injection, considering binder, curing agent and burning rate catalyst
[AIAA PAPER 70-641] 16 p2968 A70-33599

Titan 3C solid rocket motor exhaust plumes thermal radiation analysis for designing Stage I engines and components thermal protection
[AIAA PAPER 70-842] 16 p3000 A70-33925

Radiative heat transfer effects on polymeric combustion-inhibiting coatings in solid propellant rocket motors
[AIAA PAPER 70-835] 16 p2971 A70-33930

Solid rocket motors, investigating thrust magnitude and stop-restart control
17 p3148 A70-35207

Solid propellant rocket motor, discussing manufacture, materials and configuration of 156 inch engine
17 p3148 A70-35217

Adhesive debonding in case-bonded solid propellant rocket motors, describing stress analysis and interfacial surface energy measurement
17 p3146 A70-35222

Combustion instability due to narrow cavities in solid propellant engines
17 p3198 A70-35739

Integrated structural analysis for reliability prediction of solid propellant rocket motors
19 p3489 A70-38844

Sensing device to measure radial stress induced at solid propellant grain-to-case bond interfaces during wide temperature variations, detailing instrumentation and operation
20 p3718 A70-39158

Spinning satellites stationkeeping at synchronous altitude, using solid propellant pulsed plasma microthrusters
[AIAA PAPER 70-1148] 20 p3690 A70-40206

Tank collection and spectrophotometric tests in determining aluminum oxide particle size produced by small rocket engine
[AIAA PAPER 69-146] 21 p3867 A70-41727

Solid propellant rocket motors performance, manufacture and hardware, discussing mechanical properties, storage, combustion, nozzle expansion, etc
21 p3869 A70-42040

Otomat surface to surface missile with turbojet engine for extended range subsonic cruise and two solid propellant rocket engines for launch
22 p4110 A70-43211

Gyroscopically stabilized solid propellant apogee motor for experimental satellite of CECLES/ELDO Europa 2 program
23 p4235 A70-45018

High strength low-alloyed steel for solid propellant rocket engine case, discussing high temperature production and test methods
23 p4208 A70-45046

Lockseal /flexible joint/ for solid propellant rocket motor thrust vector control, considering construction, operating characteristics and tradeoffs
[SAE PAPER 700777] 24 p4393 A70-45865

Low cost fabrication for solid rocket nozzles using carbon or graphite reinforcements in throat inserts
[SAE PAPER 700796] 24 p4349 A70-45897

SOLID PROPELLANTS

NT CASE BONDED PROPELLANTS

NT COMPOSITE PROPELLANTS

NT DOUBLE BASE ROCKET PROPELLANTS

NT METAL PROPELLANTS

NT PLASTIC PROPELLANTS

NT SOLID ROCKET PROPELLANTS

Position control of burning solid nonmetalized propellant strand in combustion bomb using closed loop servomechanism
01 p0215 A70-10830

Combustion instability of solid propellants using response to pressure perturbations for T and L burners
02 p0352 A70-12013

Transient response of heterogeneous solid propellant combustion surface determined by step technique regarding pressure buildup and drop conditions
[ONERA-TP-748] 03 p0544 A70-13635

Copper chromite catalyst effects on sublimated ammonium perchlorate dissociation products, noting applications to solid propellants
03 p0544 A70-13923

Fragment fabrication of hybrid propellant solid grain emphasizing spherical shape and diameter uniformity
04 p0737 A70-15673

Combustion model for temperature inhomogeneities effect on stability of solid fuels steady combustion
05 p0958 A70-16960

Solid propellant cool gas generating systems applications to inflating emergency escape slides, rafts, pontoons and flotation bags
06 p0986 A70-17720

Hazards in manufacturing solid propellants evaluated to design tests and suggest process conditions
07 p1361 A70-19915

Solid propellant technology, discussing manufacturing processes, sample testing, inspection, etc
08 p1557 A70-20690

Acoustic conductivity of burning solid propellant surface calculated, showing positive values or possible amplification at LF
09 p1741 A70-22113

Transient regimes of solid fuel diffusion combustion in channel with oxidizer fed in from outside, proposing finite difference scheme for integrating equations
09 p1741 A70-22114

Solid propellants mechanical properties under uniaxial tension
09 p1741 A70-22423

Polybutadiene-ammonium perchlorate solid propellant microscopic failure analysis under uniaxial tension
09 p1741 A70-22424

Polybutadiene-ammonium perchlorate solid propellant BPT-1 mechanical properties viscoelastic analysis under constant strain rate tension
09 p1742 A70-22425

Burning solid ammonium perchlorate composite propellants surface structure observation to assess heterogeneous or subsurface reactions, using scanning electron microscope
09 p1742 A70-23234

Fluidic vortex valve to modulate solid propellant generated hot gas flow
[AIAA PAPER 69-424] 09 p1743 A70-23249

Mandel adhesion and cure shrinkage impact on structural integrity of solid propellant grain
09 p1742 A70-23263

Oxidizer particle size and binder type effects on nonacoustic combustion instability of solid propellants
[AIAA PAPER 69-175] 12 p3332 A70-27804

Solid propellant combustion - Conference, Novosibirsk, November 1965
13 p2519 A70-28576

Solid fuel steady combustion regime stability dependence on heat generation in reaction zones and temperature and velocity fields inhomogeneity
13 p2522 A70-29423

Longitudinal temperature gradients effects on stress analysis in solid propellants, using viscoelastic data
14 p2627 A70-30755

Linear regression rate of spherical solid hybrid fuel grains oxidized in reducing gas flow
15 p2786 A70-32263

Motor design parameters effects on solid propellant extinguishment predicted from mathematical combustion model
16 p2962 A70-33571

Solid propellant extinguishment by rapid depressurization, investigating motor configuration effect, binder, burning rate catalyst, oxidizer, metal loading and exhaust pressure levels
16 p2962 A70-33572

Diaphragm pressure transducer interaction with solid propellant grain, superposing solutions to clamped circular plate and half-space
16 p2992 A70-33987

Solid propellant combustion, observing burning rate in spin acceleration environments
17 p3145 A70-35209

SOLID ROCKET BINDERS

Ammonium perchlorate filler fraction effect on viscoelastic behavior, relaxation modulus and failure mechanisms of solid composite propellants 17 p3145 A70-35216

Nonsteady combustion analysis, using method of flame front penetration through fine metal layer in solid propellant 18 p3300 A70-36704

Turbofan engine aerodynamic interactions, cryogenic space storable propellants, space station attitude control biowaste resistojet and long burning time solid propellants 20 p3688 A70-39667

Solid propellant ingredients and explosives differential thermal analyses, discussing thermogravimetry, isothermal or adiabatic constant volume decomposition, crystallographic phase changes, etc 21 p3865 A70-42263

Solid propellant cool gas generating systems, discussing development history, general capabilities and applications 22 p3962 A70-42297

Quasi-hybrid rocket engines with solid propellant and liquid hydrogen injection, discussing performance in comparison with other propellant systems 22 p4089 A70-42498

Warm gas reaction control thrusts via solid propellant exhaust products for ballistic missiles attitude control [SAE PAPER 700780] 24 p4295 A70-45863

Tempering stress in circular plates and cylinders in casting of solid propellants 24 p4427 A70-46147

SOLID ROCKET BINDERS

Propellants chemistry based on chemically cross-linked binder 07 p1360 A70-19909

Solid propellant binders of saturated aliphatic hydrocarbons, describing microstructure, performance contribution, etc 21 p3865 A70-42143

Saturated hydrocarbon prepolymers for solid propellant elastomeric binders 21 p3865 A70-42144

SOLID ROCKET PROPELLANTS

NT DOUBLE BASE ROCKET PROPELLANTS

NT METAL PROPELLANTS

Abnormal burning surface regression in rocket motor solid propellant detected with flash X ray exposures 01 p0085 A70-10021

Chemical engineering application to solid propellant rocket motors optimization for specific operations, discussing fuel properties, formulation and additives, mixing and casting [AICHE PAPER 28A] 01 p0166 A70-10971

Combustion chamber traveling oscillating shock wave as driving mechanism of high amplitude axial mode solid rocket combustion instability 02 p0353 A70-12009

Pseudo two dimensional photoelastic test method applied to axisymmetric solid propellant rocket grains under pressure and thermal loads [SESA PAPER 1482] 03 p0482 A70-12968

Powder and solid propellant combustion, discussing heterogeneous and homogeneous systems, characteristics of foam, fizz and flame zones, etc 03 p0544 A70-13860

Stress analysis for nonlinear viscoelastic cylinder with ablating moving inner surface used to investigate propellant grain in solid fuel rocket under firing condition [ASME PAPER 69-WA/APM-14] 04 p0771 A70-14914

Dynamic response of solid propellant flame to oscillating pressure field using T-tube rocket motor, discussing entropy waves produced in oscillatory combustion [ALAA PAPER 68-499] 04 p0737 A70-15580

Aluminized solid propellant transient burning rate augmentation during acceleration loads [ALAA PAPER 70-126] 06 p1129 A70-18047

Burning rate for composite solid propellant, using model with specific gas phase combustion distribution 07 p1422 A70-19584

Metal particles additives behavior in solid rocket propellant combustion, using scanning electron microscope 07 p1359 A70-19585

Slurry-cast filled nitrocellulose plastisols as solid propellants, discussing compositions, performance and applicability to beryllium fuel 07 p1360 A70-19907

Polyurethane-based solid rocket propellants, discussing catalyst modification, mix viscosities, moisture embrittlement, etc 07 p1360 A70-19910

Butadiene prepolymers containing carboxyl functional groups used in binder matrix for solid composite propellants 07 p1360 A70-19911

Processing methods for manufacturing composite solid propellants, describing oxidizer, binder and fuel

preparation, propellant mixing and chamber insulation and lining and instrumental analysis 07 p1361 A70-19912

Solid propellant mechanical properties tests, failure and physical deterioration /aging/ 07 p1361 A70-19913

Granular diffusion flame theory application to low pressure burning of composite solid AP propellants 07 p1361 A70-19914

Pressure decay prediction improvement for venting and quenching processes of solid propellants using analytical method 11 p2101 A70-25683

Solid rocket motor performance prediction including motor pressure, thrust and propellant parameters, discussing mathematical modeling of flow fields [ALAA PAPER 69-732] 11 p2102 A70-26117

Styrene-oxygen copolymer preparation methods, discussing burning rates for rocket solid propellants mixtures with ammonium perchlorate 11 p2100 A70-26146

Grain configurations classification for solid propellant rockets by relative web thickness and mean vector direction of burning surface into topological continuum 11 p2100 A70-26288

Reissner variational theorem applied to stress analysis of vertically accelerated end burning solid propellant grain in studying elastic rocket launch failure 12 p2313 A70-27196

Collection of papers on solid propellant technology covering rocket interior ballistics, composite rocket propellants, etc 13 p2472 A70-29602

Incompressible solid propellant rocket charges axisymmetric problems, using Galerkin stress functions 14 p2657 A70-30772

Instantaneous burning rates prediction methods based on flame structure model and steady state burning rate data as pressure and initial temperature functions [ALAA PAPER 70-667] 16 p2971 A70-33949

Secondary combustion products of air augmented boron loaded solid propellant rocket ramjet, measuring properties by spectroscopy 17 p3196 A70-35196

Solid propellant rocket motor, discussing manufacture, materials and configuration of 156 inch engine 17 p3148 A70-35217

Flame propagation in narrow slit and fine hole of solid propellant grain 18 p3300 A70-36698

Wire reinforced solid rocket propellant grains mechanical properties and failure modes 20 p3689 A70-40050

Solid rocket propellants linear and nonlinear pressure coupled combustion instability behavior relationship to exothermic surface processes 20 p3694 A70-40274

Forces acting at thrust termination time with aluminized solid propellant rocket fuel, predicting thrust reversal ratio under vacuum conditions 21 p3869 A70-41869

Solid rocket fuels mechanical properties, using high speed pneumatic test machine and impact tensile tester 22 p4088 A70-42342

Radiant energy flux effect on atmospheric pressure burning rate of composite solid propellant 23 p4232 A70-44552

SOLID ROTATION

U ROTATING BODIES

SOLID SOLUTIONS

Phase equilibria in Mn-S, Mn-Se and MnS-MnSe systems by X ray diffraction after preparation by annealing 02 p0249 A70-11652

Size distribution of Ni-Si particles precipitated from Si solid solution in Ni measured as function of concentration, aging time and temperature 02 p0317 A70-12320

Nb-NbH solid solutions thermodynamic properties at various temperatures described by formulas 02 p0320 A70-12819

Aluminum oxide solid state reaction with Ta at high temperatures using chemical analysis 03 p0511 A70-13487

Raman spectra of lead titanate, sodium tantalate /potassium tantalate and potassium tantalate/ potassium niobate solid solutions at various temperatures 03 p0542 A70-13824

AsSbSI crystal production technology concerning substitution type solid solution structure and photoconducting ferroelectric properties 04 p0729 A70-14409

InAs-GaAs solid solutions microhardness and brittleness, studying chemical composition effects 04 p0730 A70-14464

Ni-V alloys precipitation behavior with 15.4/16.5 wt percent V content, observing tetragonal equilibrium theta phase precipitation 04 p0708 A70-15368

Alpha and beta solid solutions chemical composition in two phase alloys of Ti-Al-Mo and Ti-Al-V determined by electron microprobe analyzer 05 p0864 A70-16549

Solid solution softening in bcc Ta-Re alloy system attributed to substitutional-interstitial interaction 07 p1310 A70-19736

Phase equilibrium and homogeneity regions of solid solutions system Ni-Nb-O at elevated temperature 07 p1315 A70-20313

Mo effect on structure and properties of Ni-Al-Nb system alloys in gamma and gamma prime solid solutions range, discussing high temperature strength 08 p1514 A70-20549

Literature on IV-VI semiconducting Pb compounds PbTe, PbSe, PbS and PbO, discussing PbTe-SnTe and PbSe-SnSe solid solutions 08 p1555 A70-20584

Graphite crystals surface ribbed growth in Ni-C solutions due to B content observed by scanning electron microscope 08 p1520 A70-21552

Phase diagrams of metal systems - U.S.S.R. Conference, Moscow, June 1967 09 p1702 A70-22559

Metallic solutions formation dependence on alloying elements electron structure assumed by atoms in solvent lattice 09 p1702 A70-22560

Magnesium solubility in titanium from X ray analysis of Mg distribution in diffusion zones at high temperature and pressures 09 p1703 A70-22567

Combined solubility of group IVA metals and carbon in solid state molybdenum at various temperatures 09 p1704 A70-22754

Alkali-alkaline earth niobates phase equilibrium study revealing tetragonal tungsten bronze-type solid solutions existence range 09 p1740 A70-22983

Ni alloys with Ir and Rh using X ray diffraction and microscopy, exhibiting continuous solid solutions 09 p1708 A70-23423

Sigma phase occurrence in transition/nontransition elements alloys, discussing solid solubility limits 09 p1708 A70-23424

Phase diagram of rapidly crystallized Al-Cu-Mn alloys, observing ternary solid solutions formation during high cooling rate of melt 09 p1709 A70-23786

Phase diagram of Ti-Ta-V system, determining solubility of sigma Ta and V in alpha and beta Ti in solid solutions 09 p1709 A70-23788

Fiber-reinforced composite alloys prepared by controlled dissociation of Au-Ni and Al-Zn solid solutions 10 p1902 A70-23814

Tantalum solubility in alpha titanium and Ti-Ta system physicochemical properties using metallographic, X ray, hardness and resistance analysis 10 p1903 A70-23864

Fe-Mo-C and Fe-Ti-C alloys microstructure and hardness after rapid cooling from melt, considering phase dispersion and particle size, spacing and shape 11 p2065 A70-25774

Zone and phase aging of aluminum alloys, discussing structural and property characteristics of solid solution decomposition 11 p2066 A70-25912

Ternary phase diagrams and quaternary excess free energy prediction using binary data, applied to Pb-Sn-Zn, Ag-Pd-Cu and Pb-Sn-Cd-Bi systems 12 p2254 A70-27475

Interstitial solid solutions stability in cast molybdenum subjected to heat treatment 12 p2257 A70-28225

Decomposition of supersaturated solid solutions in granulated Al alloys with Mn, Cr, Zr, Ti, V and Mo, studying microhardness and electrical resistivity 12 p2258 A70-28274

Phase equilibria in quasi-ternary alloys by microstructural, thermographic and X ray analyses, showing continuous solid solutions formation in titanium-niobium-titanium aluminide 12 p2258 A70-28275

Residual stresses in cylindrical shell made of two component solid solution under thermal diffusion 12 p2329 A70-28323

Ni alloys hardening by solid solution precipitation and insoluble particles dispersion, emphasizing heat resistant alloys and mechanical properties 13 p2433 A70-28762

Temperature dependence of electrical properties and permittivity of barium titanate solid solutions containing Nb, Ta, Sb and La, using bridge-circuit of resonance techniques 13 p2469 A70-28853

Solid solutions of GaAs with 2B or 6A intermetallic compounds, using metallographic and X ray methods 13 p2469 A70-28856

Ta solid solution hardening by nitrogen and oxygen, noting yield stress variation with interstitial gas concentration 13 p2434 A70-29084

DC plasma arc jet excitation and emission characteristics for solution analysis with economical inert gas flow rates

13 p2362 A70-29107

Interatomic bond strength in solid solutions of Ti-Sn-O with respect to heat resistance at elevated temperatures

14 p2595 A70-30170

V-N and V-O solid solutions magnetic, electrical, crystallographic and mechanical properties as function of gas concentration

14 p2596 A70-30842

Nitrogen solubility in Nb-Mo solid solutions, determining relationship between N partial pressure, temperature and concentration

14 p2598 A70-31285

Magnetically ordered ferroelectric materials properties for various compounds and solid solutions

15 p2785 A70-32749

Yield strength of Nb-O single crystal solid solutions as function of temperature

15 p2763 A70-32808

Hydrogen separation from supersaturated solid solution in Zn-Zr alloy, measuring at room temperature with eudiometer

15 p2764 A70-32856

Composition dependence of optical energy gap and diffuse reflectance in MnSe-CdSe solid solutions

16 p2960 A70-33094

Ti-Cu-Ag phase diagrams and liquidus surface structure, using metallographic, thermal and X ray techniques

16 p2931 A70-33221

Polycrystalline NaCl-KCl solid solution alloy, considering high temperature creep under constant compression stress

16 p2961 A70-33275

Decomposition of unstable beta solid solution of Ti-V alloy, using X ray and microscopic analyses

17 p3125 A70-35336

Aligned composite materials preparation by unidirectional lamellar eutectoid decomposition in Co-Si, Cu-Al, Ni-In and in supersaturated solid solution Sn in Pb

18 p3274 A70-36052

Relaxation peaks associated with interaction clusters of Zr and Nb dissolved in Nb

18 p3274 A70-36056

Internal residual stress relaxation theory in dielectric aging in tetragonal solid solutions of calcium titanate in barium titanate

19 p3486 A70-37776

Yield stress in electron beam-refined Nb-N solid solution at room temperature and specific strain rate range

19 p3454 A70-38813

Nb-Ta and Nb-Mo alloys single crystal solid solution strengthening as function of composition, temperature and strain rate

20 p3646 A70-39105

Duplex eutectic with Ni-Be fibers embedded in Ni-Cr solid solution matrix, discussing solidification conditions, optimum composition, heat treatment, mechanical properties and oxidation

20 p3647 A70-39107

Epitaxial GaAs films growth from solid solutions of InAs-GaAs system deposited on GaAs substrates, noting electron mobility and temperature effect

20 p3686 A70-39629

Ni-Cu-C solid solutions, measuring temperature dependence of graphite solubility by vapor transport method

21 p3841 A70-42149

Grain boundary damping characteristics of Cu-Ni alloys solid solutions, discussing height, temperature and activation energy of solute peak

22 p4053 A70-42729

Temperature stable homogeneous single phase zirconate solid solution ceramics for microwave dielectric resonators and microstrip substrates

22 p3996 A70-42922

Al-Be-Mg alloys under solution treatment, noting aging and prolonged heating effects on mechanical properties from solid solution decomposition diagram

22 p4056 A70-43127

Solid solutions of quasi-binary cross section CdP-CdTe and ZnP-CdTe, using X ray, thermal, microstructural and microhardness analyses

22 p4086 A70-43132

Solid solutions properties in Nb-oxygen system, examining atomic bond nature by elastic modulus measurement

22 p4056 A70-43345

Superconductivity and crystalline structure of laminar solid solutions of niobium-selenide-niobium-telluride single crystals

22 p4088 A70-43464

Rare earth metals-ruthenium Laves phases solid solutions superconducting transition temperature measurement

23 p4231 A70-44885

Solid solution of GaAs with CdSe and CdS compounds, investigating intrinsic absorption edge dependence on temperature

24 p4390 A70-45663

Solubility isotherms of alloying elements in Ge-Al-P semiconductor-acceptor-donor system at high temperatures

24 p4391 A70-46143

Solid solution hardening of single crystal Ta base alloys, measuring critical shear stress at various temperatures

24 p4365 A70-46370

SOLID STATE

Characteristics of dynamic mechanical systems including solid state and hydrodynamic analogs of ideal incompressible fluids, based on statistical theory of turbulence

01 p0068 A70-11594

Wave propagation in solid state plasma with ferroelectric and ferromagnetic properties, deriving matrix equation allowing for nonlinearity of dielectric constant and magnetic permeability

12 p2283 A70-26970

Dispersion relations between wave frequency and vector obtained from matrix equation for wave propagation in solid state plasma with ferroelectric and ferromagnetic properties

12 p2283 A70-26971

Solid state diffusion bonding applied to rocket engine injectors manufacture [ALAA PAPER 70-639]

16 p2968 A70-33597

Deformable Al alloys hardening, emphasizing heat treatment in solid state

18 p3276 A70-36308

SOLID STATE DEVICES

NT AVALANCHE DIODES

NT TRANSISTORS

NT VARACTOR DIODES

Solid state electronics application in automatic flight control, discussing redundancy, internal failure correction, fault isolation and automatic checkout

02 p0335 A70-12178

Airborne UHF transmitters, discussing data on designs, performance, packaging and limiting factors of solid state devices for RF utilization

02 p0267 A70-12183

Tuneable adjustable solid state bandwidth filter using N path system for low pass to bandpass filter transformation

02 p0270 A70-12666

Josephson effect in superconductors emphasizing Josephson junction electrical properties and applications to devices and measuring techniques

03 p0542 A70-14190

Solid state digital pressure transducer incorporating Si diaphragm with piezoresistive sensing elements for computerized supersonic and subsonic data applications

03 p0496 A70-14194

Microwave low power electron tube oscillators and solid state technology

05 p0823 A70-16882

Solid state microwave acoustic variable delay devices for radar, fuses, repeaters, altimeters, etc, emphasizing magnetoelastic wave method

06 p1018 A70-17356

Solid state VHF omnirange navigation system operation, principle, equipment, applications, advantages, etc

07 p1241 A70-19622

Computer managed display system using CRT and appropriate solid state displays providing flight crew with automatically sequenced time varying information

08 p1498 A70-21677

Solid state IC-compatible display devices optical, electrical, mechanical and thermal characteristics

09 p1642 A70-22018

Current-voltage characteristics and lifetime of thin film diodes on chalcogenide glass substrate with symmetrical and asymmetrical electrodes

09 p1647 A70-22751

Covert solid state imaging system applicability to totally dark laboratory environment

09 p1686 A70-23752

Solid state resonant bandpass electronic filter composed of ferroelectric dielectric capacitors with adaptable voltage gain

09 p1653 A70-23801

Alphanumeric solid state displays with vertically stacked character rows for text format reading, using injection electroluminescence technology

10 p1846 A70-23882

Integrated circuit microwave phased array radar antenna systems for multiple frequency bands and multifunction operations to save cost and space

10 p1851 A70-24878

Microwave devices including gridded tubes, magnetrons, traveling wave tubes, amplifiers, solid state devices for radar and communication applications

10 p1851 A70-24885

Rocket- and projectile-borne microwave miniature solid state transmitters, discussing transistor oscillator-multiplier, hybrid integrated circuits, bulk effect devices, etc

10 p1852 A70-24887

Complex microwave solid state subsystems designs for specialized systems

10 p1852 A70-24889

Book on integrated electronic systems covering integrated circuit design, device and material properties, quality control, applications, etc

10 p1853 A70-25049

Solid state proximity switches, sensors, logic and self test circuits for aircraft electrical applications to improve reliability and maintainability over mechanical switches

[SAE PAPER 700305]

12 p2195 A70-27449

Solid state power controllers for aircraft electrical power systems

[SAE PAPER 700304]

12 p2195 A70-27450

Electronic tuning range of solid state microwave oscillators, deriving equations in terms of tuning device Q factor and available power output

13 p2376 A70-28802

Solid state device inductance by thermal effects, describing characteristics and applications in resonant circuits

15 p2783 A70-31839

Transistor densitometer used for variable star interpretation by amateur photographers

15 p2740 A70-32348

Solid state UHF and microwave device testing by computer automated network analyzers, measuring scatter parameters

15 p2742 A70-32590

Solid state subnanosecond electro-optic light switch for mode locked laser controller or light shutter

15 p2753 A70-32815

Microwave IC methods applied to solid state signal sources design, using varactor tuned transistor oscillators, resistive isolation pads, amplifiers and frequency multipliers

16 p2872 A70-33069

Solid state logarithmic radiometer, measuring radiation within narrow portions of optical spectrum

16 p2905 A70-33160

Solid state electroluminescent phosphor displays for aircraft/spacescraft instrument panels

16 p2906 A70-33178

Solid state dipole antenna array miniaturization by etching microstrip components on alumina substrate having high dielectric constant

16 p2876 A70-33409

Solid state phased array radar employing MIC modules in radiating elements, achieving reliability by redundancy

16 p2877 A70-33411

Thermal noise in space charge limited solid state diodes by Langevin equation, relating spectral intensity for open and short circuit voltage and current

16 p2878 A70-33694

Solid state IR to visible converter, using minority carriers stimulated tunnel injection into wide band gap phosphor

17 p3081 A70-34648

Hybrid solid state image detectors, discussing integration and excitation storage operation modes

17 p3053 A70-35122

Book on design of resonant piezoelectric devices covering linear piezoelectric materials, Green function, variational methods for dimensional motions and modes, etc

17 p3143 A70-35188

Solid state display for on-line information retrieval using light emitting crystals, integrated circuits and hybrid packaging

17 p3063 A70-35514

Subminiature solid state piezoelectric accelerometer using diffused four arm Wheatstone bridge sensor

17 p3094 A70-35522

Solid state switching effect on aerospace electric power conditioning equipment

[SAE PAPER 700306]

18 p3302 A70-36802

Solid state multiplexed electrical power distribution system for future generation military and commercial airplanes

[SAE PAPER 700301]

18 p3216 A70-36803

Thin films for semiconductor integrated circuits and solid state devices

19 p3389 A70-38195

- Superconductor thin films, discussing transition temperature, critical field and current, solid state applications, etc 19 p3488 A70-38198
- Solid state, digital, Resonant Capsule Pressure Transducer based on natural frequency variation of aneroïd capsules by pressure induced curvature changes 19 p3430 A70-38520
- Solid state switching effect on aerospace electric power conditioning equipment 21 p3758 A70-41210
- Solid state switches for operating ion thrusters directly from high voltage solar cells, noting satellite weight saving 21 p3798 A70-41215
- Shot, thermal, induced gate and flicker noise in various solid state devices and lasers 21 p3792 A70-42112
- Thermally induced oscillations and negative resistance in seminsulating oxygen-doped GaAs double injection devices via heating beyond critical temperature 22 p4084 A70-42326
- Liquid crystals as solid state organic material with physical properties of liquid, discussing electro-optical properties and applications 22 p4085 A70-42724
- Solid state batteries based on highly conducting solid electrolyte rubidium silver iodide, testing discharge performance 22 p3966 A70-43543
- Solid state high energy light detector for pulsed ruby and glass lasers in long pulse mode 22 p4052 A70-43614
- Solid state IF or baseband switching elements design for high capacity multichannel microwave systems 23 p4172 A70-44014
- Computer optimization program for solid state components and integrated circuits design with conversational system for man machine dialogues 24 p4317 A70-46321
- ### SOLID STATE LASERS
- #### NT RUBY LASERS
- Solid state ring laser properties as oscillator, waveguide, interferometer and mechanical gyro considered for potential as rate gyro 01 p0108 A70-10417
- Q switching of continuously pumped Nd/YAG using double Fabry-Perot etalons to replace laser resonator output mirror 01 p0112 A70-10903
- Diffraction loss measurement in solid state laser to determine laser material contribution to total cavity loss 01 p0113 A70-10919
- Optical parametric oscillator pumped by continuously repetitively Q switched Nd/YAG laser output 01 p0113 A70-11171
- High output neodymium glass laser with small emission divergence angle using four lamp pumping system 01 p0114 A70-11267
- Luminescence quantum yield in neodymium glass, noting independence to stimulating light frequency 01 p0114 A70-11595
- Soviet book on methods in laser design, Volume 2, covering pumping radiation in active rods, unsteady modes, ruby and Nd glass lasers 02 p0310 A70-11691
- Resonant energy transfer of trivalent Yb into trivalent Eb for optical pumping improvement for fluorophosphate glass lasing 02 p0314 A70-12725
- Quasi-classical theory of solid state lasers generation and amplification, describing radiation by Maxwell equations and atoms in external fields by Schrodinger equation 02 p0315 A70-12832
- Angular dependence of one dimensional first and second index matching for optical parametric mixing of laser and SRS Stokes beams for tunable laser source 03 p0498 A70-13157
- Linearly polarized radiation in Nd-glass laser obtained without energy loss by placing glass plates in resonator at Brewster angle to axis 03 p0499 A70-13257
- Population inversion distribution effect on resonator losses of Nd-glass laser, showing threshold limits 03 p0500 A70-13527
- Pico-nanosecond light pulses from mode-locked Nd glass laser with spectral mode selector, noting correspondence between pulse duration and inverse bandwidth 03 p0503 A70-14210
- Pumping techniques, design and properties of pulsed and CW lasers based on Nd-glass, ruby, barium fluoride and calcium tungstate crystals 05 p0860 A70-16821
- Single mode neodymium laser second harmonic radiation self focusing resulting in filamentary fractures in solid dielectrics 06 p1080 A70-17496
- Spectral power distribution and ultrashort pulses limiting duration of ruby-neodymium laser with passive shutter 06 p1081 A70-17766
- Time characteristics of pulsed calcium fluoride-dysprosium laser in single mode, observing constant emission and peak regime 06 p1082 A70-17808
- Nd glass laser emission spectral width reproducibility as function of flash intervals and pump energy 07 p1297 A70-18869
- Resonator aberrations and active element imperfections effect on formation of spatial and angular structures of solid state laser modes 07 p1299 A70-19854
- Caustic surface of spherical resonator with external mirrors used to calculate light angular divergence and spectral properties 07 p1299 A70-19859
- Solid state laser kinetic regime as function of diffusive and directional motions of active medium excitations 07 p1299 A70-19860
- Solid state lasers thermal resonator buckling time dependence and compensation, graphing results of resonator field analysis 07 p1303 A70-20359
- Raman effect in liquid nitrogen resonator with light from Q modulated Nd laser pumped into resonator at small angle to axis 07 p1303 A70-20366
- Solid state lasers with strongly degenerated modes investigated for induced radiation spectral composition inertial properties 08 p1510 A70-20507
- Polarization anisotropy effect of laser cavity on neodymium glass laser output power 08 p1510 A70-20513
- Uncontrolled and controlled neodymium glass laser outputs, using ultrasonic traveling wave diffraction modulator 08 p1510 A70-20514
- Neodymium laser frequency doubling based on nonlinear functional relation between polarization and electric vector in matter 08 p1512 A70-20677
- Population inversion in neodymium glass impurities in four level laser dependent on electron beam intensity and energy 08 p1512 A70-21205
- Neodymium glass laser stimulated by pinch discharge radiation in He and Kr, increasing power, energy and pulse repetition frequency by improved pumping energy coupling 08 p1512 A70-21213
- Solid state and gas lasers industrial applications in machining and nonmachining areas, discussing limiting factors 09 p1692 A70-22706
- Holographic recording of Q switched neodymium laser beam achieved through lens testing on reconstructed beam 09 p1697 A70-22845
- Pulse train transition in Nd-YAG and He-Ne lasers mode-locked by intracavity phase modulator 09 p1697 A70-22919
- Strontium fluoride crystals containing trivalent neodymium cations investigated for laser action and radiation characteristics by spectroscopy 10 p1899 A70-24253
- Pulsed solid state laser power output stability in terms of kinetic theory noting laser action threshold role 10 p1899 A70-24254
- Neodymium glass laser fundamental frequency spatial structure effects on KDP crystal second harmonic generation efficiency, describing optimal system for laser beam shaping 10 p1899 A70-24262
- Neodymium spectral line widths in various glasses, studying role of inhomogeneous broadening 10 p1900 A70-24266
- CW Nd-doped YAG laser rods, measuring thermal and optical properties before and during pumping with W lamps 10 p1900 A70-24942
- Axial mode selection and frequency stabilization of Nd-YAG laser by optimally designed crystal quartz etalon 10 p1900 A70-24943
- Ultrasonic LF modulation of solid state traveling medium lasers radiation intensity attributed to elastic vibrations of rods 11 p2062 A70-25398
- Monopulse laser operating on ruby and neodymium glass using quarter-wave electro-optical Q switch 11 p2064 A70-26810
- Solid state laser with traveling wave during steady state emission, determining pulse shape, duration and amplitude 12 p2247 A70-27497
- Laser output energy decreased by microscopic fractures masking effect in neodymium glass laser rod during monopulse operation 12 p2250 A70-28152
- Population inversion effect on angular divergence of neodymium glass laser radiation, observing energy independence for refractive index of medium surrounding active rod 12 p2250 A70-28154
- Solid state laser transverse modes maximum dependence on resonator geometrical parameters usable for producing stable kinetic emission mode with narrow spectral line 13 p2428 A70-29410
- Solid state laser optical pumping energy density calculations for case of circular cylindrical image of pumping lamp formed in rod 13 p2429 A70-29476
- Non Q switched Nd laser light intensity correlation function measurement, using optical gate for producing second harmonic light 13 p2430 A70-29706
- Thermo-optical constant of laser neodymium glasses measured with interferometer 13 p2430 A70-29761
- Temporal structure and spectral evolution of Nd laser emission with self locking axial modes, noting gain saturation effects 13 p2430 A70-29776
- Electron beam-pumped ZnO laser emission wavelength at various temperatures 13 p2430 A70-29833
- Nitrous oxide and carbon dioxide laser Q switching by ammonia Stark effect 13 p2431 A70-29835
- Ultrashort pulse generation by solid state Q switched lasers, discussing spontaneous emission effects, atomic polarization and populations variation 14 p2594 A70-30477
- Luminescent line broadening effect on axial mode selectivity in pulsed neodymium lasers with Fabry-Perot resonator at above-threshold pumping power 15 p2749 A70-31554
- Solid state traveling medium laser pulsed emission characteristics and nonlinear intensity distribution 15 p2753 A70-32699
- Ruby and neodymium glass free running lasers output power modulation relationship to excited modes and active rod position in resonator 15 p2753 A70-32822
- Optical resonator thermal deformations during pumping of circular cylindrical interferometer rods in illuminators, measuring thermo-optical constants of neodymium glass 15 p2754 A70-32863
- Mechanically heterogeneous and optically homogeneous solid/liquid mixed laser with active centers contained in Ne bathed in liquid 16 p2926 A70-33109
- Amplitude modulation of ruby and neodymium-doped glass lasers via ultrasonic acoustic wave injection 16 p2926 A70-33162
- Inorganic laser materials containing ionic crystalline structures, including fluorides, oxides, rubies, garnets and oxygen containing complex compounds 16 p2927 A70-33223
- Laser design for production tool applications, noting use of Nd-YAG and carbon dioxide laser [ASME PAPER 70-DE-1] 16 p2917 A70-33418
- Low threshold electron beam pumped CdS lasers with improved Al coated Fabry-Perot mirrors in end-pumped configuration 16 p2928 A70-33642
- Nd-glass laser operation in giant pulse mode with passive or optomechanical shutter, noting applications 16 p2929 A70-34211
- Solid state laser active element lateral surface microprofile effect on heat endurance 16 p2929 A70-34220
- Solid state giant pulse laser with small divergence angle, using polymethyl dye solution in nitrobenzene as Q switch 16 p2929 A70-34221
- High power Nd-glass solid state laser characteristics measured to improve beam properties 17 p3105 A70-35090
- High-power Q switched solid state laser radiation intensity measurement methods for multi and single modes 17 p3105 A70-35094
- Oscillation frequency retuning and stabilization and loss factor determination in solid state lasers by dispersive resonators 17 p3106 A70-35100
- Fluorescence method of determining solid state laser parameters using spontaneous and stimulated emission observations 17 p3106 A70-35101
- Solid state laser polarization mechanism, considering isotropic and anisotropic cavities 17 p3106 A70-35103
- Crystal and glass lasers activated by Nd ions, examining stimulated emission temperature dependence by high temperature spectroscopy 17 p3106 A70-35105
- Picosecond pulses in Q switched neodymium glass and ruby lasers, describing pulse measurement with fluorescence 17 p3108 A70-35623

Spectral emission kinetics from neodymium glass laser with rod in translational motion during laser action 18 p3267 A70-36613

Nd-YAG Q switched laser using feedback loss control to increase switching speed for digital scanning 18 p3270 A70-36744

Nd glass laser ultrashort light impulse optical rectification, presenting lower harmonics angular dependence 19 p3443 A70-37287

Traveling medium solid state lasers radiation intensity modulation by active element motion 19 p3444 A70-37442

Subnanosecond jitter spark gap obtained with YAG-Nd pulsed laser triggered switching at moderate repetition rates 19 p3444 A70-37666

Low jitter multiple high voltage spark gaps switching at 50 pps by Q spoiled YAG laser triggering 19 p3444 A70-37667

Energy levels and spectral broadening of neodymium ions in laser glass from fluorescence and absorption spectra 19 p3445 A70-37760

Solid state laser with transverse mode selection to increase brightness, discussing plano-concave resonator 19 p3447 A70-38508

Protein solutions and cell cultures changes by ruby and Nd lasers radiation, noting threshold energy 20 p3579 A70-39419

Solid state laser glass filters for absorbing UV light emitted by pumping tubes 20 p3641 A70-39739

Pulsed composite laser performance with He-Ne active section and neodymium-glass power gain section 20 p3641 A70-39740

Smooth periodic wavelength retuning in organic dye laser, using neodymium glass laser with YAG for pumping 20 p3642 A70-39742

High radiation intensity neodymium glass laser, describing installation for heating plasmas to high temperatures 20 p3643 A70-39758

Fluctuations in radiation power density of solid state laser near focal plane of convergent lens, using device for selecting and recording individual peaks 20 p3643 A70-40022

Ultrasonic LF modulation of solid state traveling medium lasers radiation intensity attributed to elastic vibrations of rods 20 p3643 A70-40092

Thermally induced stress birefringence effect on linearly polarized CW YAG-Nd laser 21 p3834 A70-40566

YAG-ND laser volume limits condition for high power fundamental mode operation 21 p3836 A70-40808

Nd-YAIG laser design for sleeve stabilization, discussing flicker problem and rod cladding 21 p3836 A70-40822

Thermal and birefringent effects on output of continuous Nd-YAG laser rod, using 6328 A probe 21 p3837 A70-41906

Laser characteristics of Nd doped lithium germanate and silicate glasses, discussing spectroscopic properties 21 p3838 A70-42010

Host materials for increasing optically pumped solid state CW laser fundamental mode output power 22 p4048 A70-42333

Solid state laser optical pumping systems design and evaluation 22 p4049 A70-42514

LF cavity loss modulations of homogeneous four-level CW Nd-YAG laser, including relaxation-oscillation regime 22 p4050 A70-43005

Particle size, shape and absorptivity effects on inclusion damage of Nd-doped barium crown laser glass 22 p4050 A70-43007

Phase locked solid state laser with picosecond pulses applied to high speed cinematography [SMPT PREPRINT 22] 22 p4034 A70-43051

Ruby and Nd glass solid state lasers modes partial self synchronization investigated by spectral time resolution method 22 p4051 A70-43463

Nd-glass mode-locked laser with KDP crystal frequency doubling and pulse selection with Pockels cell 23 p4201 A70-44476

Monopulse laser operating on ruby and neodymium glass using quarter-wave electro-optical Q switch 24 p4351 A70-45182

Single mode ruby and Nd glass lasers axial mode selection by dye filters, noting radiation spectra and spatial coherence 24 p4352 A70-45462

Nd glass laser with smooth emission frequency scanning, giving block diagrams and radiation spectra 24 p4353 A70-45464

Mode locked neodymium-glass pulsed laser stimulated picosecond time resolved light emission observation by cross beam technique 24 p4354 A70-45647

SOLID STATE PHYSICS

Cryogenically cooled superconducting electromagnets design, construction and properties for research in plasma and solid state physics, considering coil systems 01 p0143 A70-10970

Book on thin film transistors microelectronics covering semiconductor physics, fabrication, analysis, applications and comparison with MOS transistors 01 p0052 A70-11329

Cryogenics applications to solid state physics and materials research tabulated for experimental methods and objectives 05 p0892 A70-16398

Bismuth oxide resistivity and structural characteristics at high temperature and during transformation from solid to liquid state 10 p1927 A70-24272

Solid state plasma drift velocity effect on helicon propagation constant assuming isotropic momentum relaxation time and effective mass 10 p1928 A70-24831

Solid state welding processes for space, nuclear and deep submergence technologies, discussing diffusion bonding of Al and stainless steels 13 p2419 A70-29117

Solid state mechanics of deformable media, surveying development trends with emphasis on rheology and dislocation theory 15 p2818 A70-32176

Reliability physics role in kinetic studies of physical and chemical degradation and failure mechanisms in semiconductor devices 15 p2713 A70-32661

Glass switching /Ovshinsky effect/, discussing various theoretical explanations 18 p3298 A70-36956

Soviet papers on physics of semiconductors and semiconductor devices covering kinetic equation, electrical conductivity anisotropy, thermal emf, current carrier recombination, radiation flaws, etc 19 p3482 A70-37292

Kinetic equation in strong electric fields, describing current carrier behavior in semiconductors 19 p3483 A70-37293

Solid state plasmas waves and oscillations in metals, semimetals and semiconductors, noting applications for microwave devices 19 p3479 A70-37944

Thin films physics for microelectronic applications 19 p3389 A70-38194

SOLID SURFACES

NT CRYSTAL SURFACES

Computerized calculations for cylindrical tank bottoms with outlet based on strength analysis, using zero moment theory for surface stability under uniform pressure 05 p0946 A70-16957

Unsteady inverse heat conduction of semibounded body solved by least squares method 06 p1178 A70-17856

Unsteady calorimetric sensor for measurement of heat transfer between gas jets and solid targets 06 p1064 A70-17857

Three dimensional model for high energy scattering of inert gas atoms from solid surfaces, calculating trapping, accommodation and flux and velocity distributions 06 p1110 A70-18261

Solid surface-compressible liquid drop high speed impact damage, discussing contact pressure 06 p1053 A70-18611

Wall boundary condition model modification applied to molecular beam-solid surface scattering, noting qualitative agreement with observed distributions 07 p1342 A70-20118

Solid surface roughness influence on reflection of thermal energy molecular jets, showing shock determined by incidence angle 07 p1343 A70-20121

Gas molecules scattering by solid surface for monoenergetic and Maxwellian beams, discussing model with different values for magnitude and velocity direction 07 p1343 A70-20124

Solid Mo, Ni, Ta and W surface energies determined by multiphase equilibration technique 08 p1522 A70-21749

Three dimensional oblique incidence liquid jet impinging on solid surface, evaluating flow force by applying mass and momentum conservation 13 p2389 A70-29540

Light gas atoms adsorption on solid surfaces, calculating wave function, energy, mobility, sticking coefficient, etc 18 p3225 A70-36186

Nucleation phenomena associated with boiling heat transfer in pure liquids at solid heating surfaces 21 p3948 A70-41205

Acoustic field scattering from multipole point sources by solid spherical surface 22 p4010 A70-42693

Water drop-solid surface collision experiments to study rain impact erosion process, using gas gun projectiles, high speed photography, photomicrography and profilometry techniques 22 p4116 A70-43096

Solid surface interaction between surface with normal molecular beam, generalizing model by energy parameter simulating dissipative forces 23 p4223 A70-44994

SOLID-SOLID INTERFACES

Space charge barriers AC impedance modification at metal/semiconductor contacts due to trapping 01 p0157 A70-10296

Fiber-polymer matrix interfacial tensile and shear strengths evaluation methods, including data correlation from various tests 01 p0087 A70-10478

Antiplane strain deformation problems concerning crack extension along circular interface separating materials with different shear moduli 05 p0931 A70-16091

Thermal resistance of multicontact heat conducting stainless steel plate stacks with different interface purities in vacuum 05 p0957 A70-16293

Temperature of contact surface between two homogeneous isotropic solid bodies determined by calculating plane heat source of steady three dimensional temperature field 05 p0958 A70-17014

Contact resistance measurements used in contaminant removal and metallic adhesion on iron surfaces 07 p1293 A70-18940

Elastic fields in bimaterial plate under uniform compressive and anti-plane shear loadings, finding stress distribution and induced interfacial shear stresses 07 p1412 A70-19957

Orthogonal polynomials in three dimensional contact problems without friction, discussing construction of kernels over finite and semiinfinite intervals 08 p1594 A70-21634

Interfacial thermal conductivity model based on statistical features of two faces in contact, discussing surface roughness and heat flow 11 p2083 A70-25763

Effusion steady state pressures time dependence of carbon monoxide and calcium vapors generated during calcium oxide-graphite interaction 11 p1995 A70-26602

Reaction impulse during steel spheres impacts at lead surface in vacuum dependent on kinetic energy, velocity and spheres material 11 p2146 A70-26794

Interfacial tractions between matrix and fiber in elastic composite materials reinforced with elastic fibers 12 p2322 A70-27230

Stress and strain in matrix of fiber reinforced material within elastic region, calculating interface shear stress for rectangular fiber 12 p2322 A70-27231

Heat resistance of machined stainless steel and molybdenum contact pairs in vacuum, discussing compressive loads and surface defects effects 12 p2243 A70-27290

Silicon and alpha-alumina support interface reactions during nucleation-coalescence and after epitaxial growth, investigating electrical properties 13 p2470 A70-28958

Computerized analysis of shear failure at initial fragment collision during trifragment rotor disk interaction with containment rings 14 p2563 A70-30870

High temperature solid-solid reactions and solid-liquid or condensed phase-gas equilibria, using solar furnace 14 p2545 A70-30907

Double ended dislocation pileups and elastic cracks at bimaterial interface under screw, edge and shear modes 15 p2756 A70-31561

Photoemission of electrons and holes from Al into aluminum oxide, giving approximate energy band diagram of Al-aluminum oxide interface 15 p2783 A70-31759

Reinforced plastics adhesion to hydrophilic mineral surfaces by using silane coupling agents 16 p2937 A70-33374

Radioisotopic and complementary surface chemical analysis of coupling agent films on glass surfaces 16 p2917 A70-33375

Thermal constriction resistance between contacting metallic paraboloids applied to instrument bearings [AIAA PAPER 70-857] 16 p2998 A70-33902

Heat transfer in tungsten-tungsten and Armcro Iron-Armco Iron specimens, confirming Bowden-Tabor model of elastoplastic events during cyclic engagement of surfaces [AIAA PAPER 70-853] 16 p3000 A70-33920

Circular inclusion interface separation in matrix under incident compressive waves interpreted for fiber reinforced composites

17 p3185 A70-34963

Heat resistance of machined stainless steel and molybdenum contact pairs in vacuum, discussing compressive loads and surface defects effects

20 p3638 A70-40340

Interface interaction of colliding plates of different materials, reducing flow problem to differential equation via hodograph transformation

21 p3747 A70-41962

Octahedral solid-solid phase transitions by differential thermal analyzer and scanning calorimeter module, discussing entropy change causes

21 p3784 A70-42264

Rigid circular cylindrical inclusion elastic bedding dynamic loading, calculating stresses in interface

22 p4112 A70-42345

Isothermal kinetic rates of penetration of polymer by spherical indenter, using thermomechanical analyzer

22 p4059 A70-43079

Solid particles interactions during entrainment by viscous incompressible fluid in pipe, calculating interaction force as function of radius, distance and Reynolds number

23 p4181 A70-44310

Thermal constriction resistance due to nonuniform metal surface conditions, considering macroscopic contact resistance for nonuniform interface pressure distribution

24 p4429 A70-46177

SOLIDIFICATION

Effects of solidification conditions and gas content in melt on continuously cast Al ingots as-cast structure

02 p0316 A70-12297

Al solidification in direct chilling molds effect on as-cast structure, analyzing heat removal, casting rate and application of water to outgoing ingot

02 p0316 A70-12298

Filamentary casting technique for nonequilibrium alloy structures to produce continuous specimens by rapid solidification

04 p0698 A70-15135

Heat transfer effects during solidification on mechanical properties of Al alloy castings compared with sand castings

[ASM PAPER W9-7.2]

07 p1293 A70-18998

Mutual thermal influence zone between parts of die casting during solidification established as function of time

08 p1506 A70-21138

Heat exchange during solidification of castings in molds, studying thermal properties effect for achieving constant mold surface temperature

08 p1506 A70-21141

Solidification thermal conditions during Ti casting by melting out patterns in graphite molds, investigating heat accumulation coefficients in molds

08 p1506 A70-21142

Copper alloy composite reinforced by unidirectional solidification of pseudobinary eutectic Cu-ZrCuSi, discussing mechanical properties and electrical conductivity

11 p2066 A70-25775

Eutectic NiAl-Cr structure and high temperature tensile strength as function of solidification rate

15 p2755 A70-31560

Unidirectional-solidification casting of superalloys of refractory metals in turbine blade production

15 p2757 A70-31811

Materials preparation processes and improvements in space weightless environment, considering metals and ceramics melting, solidification, electromagnetic process control, etc

16 p2919 A70-33717

Lunar cratering rates from Apollo flights data on solidification ages for Mare Tranquillitatis

16 p2979 A70-34037

Solidification theory application to Ti alloys, predicting microsegregation in binary alloys

17 p3112 A70-34352

Two dimensional solidification of forced viscous flow over flat plate with constant heat removal

17 p3194 A70-34634

Ti-Si eutectic alloys unidirectional solidification by zone melting

19 p3450 A70-37375

Solidification and composition model of macroscopic freckles in nickel base superalloys single crystals

20 p3646 A70-39101

Cold plate immersed in warm flowing liquid, calculating two dimensional transient and steady state solidification by conformal mapping

21 p3949 A70-41319

Solar nebula rings and planet formation by sedimentation of solid particles in mechanical equilibrium, including Jupiter and Saturn protoplanets

23 p4239 A70-43867

Columnar grain and Ni alloy single crystal gas turbine engine components resistant to high temperatures produced by precision casting, using directional solidification

23 p4207 A70-44857

Ternary Co-Cr-C alloys unidirectional solidification with metal matrix and carbide simultaneous freezing at eutectic liquidus line

24 p4358 A70-45235

Nonequilibrium solidification and metastable-stable phase transformation during heating of Al-Mo and Al-Cr alloys

24 p4360 A70-45829

Al-Cu alloy unidirectional solidification, investigating interfacial transition from plane to cellular structure and segregation pattern

24 p4362 A70-46179

Cellular breakdown in binary Al-Cu alloys in unidirectional solidification, observing small pit stability on solid-liquid interface

24 p4362 A70-46180

Eutectic and hypereutectic Al-Si alloy quench modification by rapid solidification, investigating microstructure and mechanical properties

24 p4362 A70-46183

SOLIDIFIED GASES

Solid hydrogen condensation on interstellar grain surfaces at extremely low temperatures related to H atoms density

01 p0183 A70-10896

Thermal stability of graphite core-solid hydrogen mantle grains determined from temperature and evaporation rates calculated for interstellar space

04 p0743 A70-14398

Molecular and solid hydrogen in dense interstellar clouds suggested from underabundance of neutral atomic hydrogen, discussing grain temperature

04 p0747 A70-14585

Solid carbon dioxide measured for complex index of refraction at IR wavelengths

04 p0719 A70-15036

Fusion reactions generation by high power laser beams focused on solid deuterium target

05 p0857 A70-15992

Mariner 6 and 7 missions IR spectrometric records showing evidence of solid carbon dioxide in Martian upper atmosphere

06 p1137 A70-17194

Spectral reflectance of carbon dioxide and water frosts at 0.8-3.2 microns, growing frosts in cold vacuum chamber from high purity gases

07 p1388 A70-19945

Plasma production by solid hydrogen-giant pulse laser interaction, studying time dependent distributions of plasma density, temperature and velocity

10 p1902 A70-25222

Plasma production by irradiating solid hydrogen foils with intense pulse ruby laser

14 p2622 A70-30659

Capture coefficients and reflected flux measurements for gaseous nitrogen molecular beams impinging on solid nitrogen cryodeposit surface

20 p3675 A70-39390

Solid para hydrogen IR and Raman spectra frequency analysis, examining lattice vibration effects

21 p3853 A70-41721

SOLIDS

NT SOLIDIFIED GASES

Lamb wave techniques using guided ultrasonic waves for solid cylindrical objects nondestructive testing

01 p0098 A70-10019

Solid bodies unsteady thermal conductivity in presence of quasi-steady heat transfer under combined radiant and thermal fluxes, presenting thermodynamic nomograms

01 p0213 A70-10215

Book on nonlinear stress waves propagation in elastic solids covering adiabatic shocks, isentropic plane waves, Lagrange equation, spherical waves, heat conduction effect, etc

01 p0202 A70-10966

Light emission by solids, discussing injection lasers, luminescence semiconductor diodes, group 2 and 6 compounds, etc

01 p0160 A70-11288

Kharlamova solution for solid body motion in Newtonian force field represented as rolling, without slipping, of mobile hodograph of angular velocity vector

01 p0145 A70-11431

Kharlamova motion equations solution for solid body with fixed point in potential force field, assuming fixed center of gravity

01 p0145 A70-11432

Kharlamov motion equations solution for solid body with fixed point subjected to zero-potential forces

01 p0145 A70-11433

Euler-Poisson equations application to motion of heavy solid body about fixed point to determine kinetic momentum vector relative to fixed reference system

01 p0145 A70-11434

Canonic equations of motion of heavy solid body with fixed point

01 p0145 A70-11436

Body motions containing cavity filled with viscous fluid under influence of gravity, formulating motion equations for fluid and body

01 p0068 A70-11576

Variational principle for admissible functions particular solution in elasticity theory involving solid bodies with cracks

01 p0212 A70-11608

Lamb waves behavior applied to defect evaluation in nondestructive tests of solid elongated cylindrical objects

02 p0276 A70-12552

Variational equation describing thermal diffusion in solid body undergoing deformation

03 p0589 A70-13348

Optimal stabilization of free solid body equilibrium state with gyroscope, using solution of three flywheel system stabilization

03 p0484 A70-13364

Extrapolation formulas to calculate temperature gradients and heat fluxes in solid heated by variable heat flux, estimating errors

03 p0606 A70-13521

Nonlinear solid applied mechanics, emphasizing nonlinear constitutive equations and related subjects, cyclic loading effect on solid materials, etc

03 p0610 A70-14230

Creep rupture and fatigue strength in solid body mechanics, considering triaxial stress state and simplified creep rupture theory variant

03 p0599 A70-14249

Deformability calculation of two phase composite solid materials through laminated structural models

03 p0602 A70-14337

Finite element method applied to heat conduction in solids with temperature dependent thermal conductivity, using nonlinear constitutive equation for heat flux [ASME PAPER 69-WA/HT-34]

04 p0782 A70-14806

Effective wave propagation velocities, bulk and shear moduli of elastic heterogeneous solids approximated by self consistent method

04 p0777 A70-15496

Three dimensional analysis of nonhomogeneous elastic solids based on finite element method and equilibrium equations, discussing iterative solution

05 p0926 A70-15915

Propagation and growth equations governing wave propagation in micropolar viscoelastic solids couplings between discontinuities in macroscopic and microscopic fields

05 p0929 A70-16063

Spread criterion and stress distribution near penny shaped crack in elastic solid under axisymmetric body forces distribution

05 p0930 A70-16079

Stress distribution in vicinity of stress-free Griffith crack in elastic solid acted upon by symmetric distribution of body forces

05 p0930 A70-16084

Three dimensional brittle body limiting axisymmetric stability under tensile stresses and weakened by ring shaped cracks, determining critical tensile loads

05 p0945 A70-16855

Incremental stress distribution near circular crack with internal pressure in neo-Hookean solid under deformation due to triaxial compression, illustrating initial stress effect

05 p0956 A70-17108

Inherent stresses in elastic solid assuming inherent strain as stress source, integrating stress functions

06 p1160 A70-17131

Activated carrier mobility confirmed in organic solids

06 p1004 A70-17325

Compatibility conditions of theory of micromorphic elastic solids using Riemann theorem

06 p1164 A70-17530

Limiting stress states analysis in isotropic solids using loading history and replacing nonlinear stress-strain curve by approximating rectilinear polygon

06 p1165 A70-17547

Dual model for describing brittleness and plasticity of solid elastic deformable body, formulating criteria for passage into inelastic state

06 p1166 A70-17656

Shear and linear strain energy criteria for limiting stress state model of solid deformable bodies, considering uniaxial, biaxial and triaxial loading

06 p1166 A70-17657

Temperature distribution law for semifinite and infinite solid bodies under steady heat conduction in presence of concentrated heat source

06 p1178 A70-17872

Uncoupled quasi-static boundary value problem for linear viscoelastic solids undergoing thermal and mechanical deformation solved by computational algorithm

06 p1168 A70-17937

Pyrolysis effect on infinite slab subjected to front heat flux, attributing increased porosity to mass loss [WSCIPAPER 69-27]

06 p1178 A70-17978

Hyperboloids and paraboloids in flow of Reynolds number 22-65000 and Mach number 10, discussing viscous interactions effects on pressure, drag and skin friction

[AIAA PAPER 70-182]

06 p0976 A70-18240

- Faint meteor ablation processes, presenting evidence of solid consistency prior to atmospheric entry, vaporization, wake blending and trails
06 p1151 A70-18481
- Micropolar homogeneous and anisotropic elastic solids linear dynamic theory, deriving reciprocity and variational theorems
06 p1172 A70-18512
- Soviet monograph on theory and calculations of impact systems covering solid body collisions, elasticity, wave mechanics and nonflat rod applications
07 p1400 A70-18732
- Frequency equation for harmonic waves propagating in fluid filled circular cylindrical cavity in infinite isotropic solid medium
07 p1253 A70-18846
- Inelastic behavior of solids strained at high temperature emphasizing hot creep phenomena in aviation materials
07 p1406 A70-19346
- Heavy solid body motion about stationary point at small nutation angle, estimating region of series convergence representing periodic solutions to motion equations
07 p1336 A70-20298
- Aerodynamic characteristics of nonconvex bodies in free molecular flow of monatomic gas
08 p1547 A70-21081
- Aerodynamic coefficients of nonconvex bodies in free molecular flow of monatomic gases based on delta representation of flow velocity distribution function
08 p1432 A70-21084
- Electromagnetic fields interaction with nonconducting neutral elastic solid, formulating relativistic variational principle for balance laws and constitutive equations
08 p1545 A70-21252
- High speed testing - Conference, Boston, March 1969, Volume 7, Rheology of solids
08 p1526 A70-21326
- Strain rate effects on mechanical properties of solids under dynamic loading
08 p1590 A70-21328
- Constitutive inequalities for isotropic elastic solids under finite strain generated by introducing concept of conjugate pairs of stress
08 p1590 A70-21351
- Laser-induced electron emission from metals and insulators in form of evaporated films and single crystals, discussing many-photon photoelectric effects and thermionic emission
08 p1556 A70-21509
- Pressure effects on melting temperature curves of solids, considering Van der Waals solids, metals and ionic compounds
09 p1665 A70-22056
- Laser heating of plasma, motion pattern and shock wave parameters during absorption burst in solid body vapor, using numerical analysis
09 p1695 A70-22181
- Variational theorem for compatibility and plasticity for Mises solids based on stress functions
09 p1771 A70-22397
- Vitreous transparent solids emission after irradiation by Q switched laser, ascribing luminescence to multiphonon and excitonic phenomenon
09 p1710 A70-22836
- Irreversible processes thermodynamics during thermoelastic deformation of solid bodies, deriving thermodynamic potentials, state and coupled heat equations
09 p1777 A70-23077
- Thermal conductivity of arbitrarily inhomogeneous bodies, considering vectorial field isotropy and temperature gradients dispersion
09 p1789 A70-23103
- Equations of motion integration for solid body in potential forces field induced by elastic springs
09 p1728 A70-23386
- Book on solid materials under stress covering mechanical testing, metals and polymers structure, ceramic crystals and creep and composite materials properties
09 p1708 A70-23476
- Solid dielectrics permittivity measurement using beam deflection phenomenon in multislot waveguide antenna
09 p1652 A70-23656
- Two dimensional MHD flow past solid body at large Reynolds numbers, treating boundary layer transition
10 p1922 A70-24011
- Equilibrium equations integration for body in isotropic linear viscoelastic medium with contact-type boundary conditions
10 p1957 A70-24267
- Crack development in solid body, considering condition at crack tip not derivable from equation of motion and strain equation
10 p1960 A70-25007
- Solid body acceleration by ideally conducting gas in constant gravity field under magnetic field, considering rarefaction, reflected waves, motion equation, wall pressure, etc
11 p2082 A70-25389
- Elastodynamics mixed initial and boundary value problems numerical solution method applied to deformation of elastic solid
11 p2140 A70-26485
- Mechanical properties in solids under dynamic incremental shear loading, discussing wave propagation tests on steel, Cu and Al
11 p2143 A70-26669
- Slow electrons interaction with periodic and nonperiodic solid surfaces, investigating elastic scattering
12 p2275 A70-27252
- Analytic expressions for concentration distribution functions in inhomogeneous solids within intermediate stages of homogenization process
12 p2253 A70-27282
- Rigid solid replacement by elastic body in relativistic mechanics
13 p2451 A70-28955
- Elastoplastic continuum under specified rates of body forces, surface tractions and displacements, formulating minimum principle for solving boundary value problem
13 p2513 A70-29154
- Variational principles derivation for inelastically deformable body mixed boundary value problem, considering loading conditions with basic functions free of discontinuities
13 p2516 A70-29524
- Jet collisions solutions for impact of pin at obstacle, solid body impact at surface, cylindrical shells longitudinal impact and jets interactions
13 p2453 A70-29771
- Mechanics of solid structures including shells and beams, considering three dimensional behavior laws in plasticity and creep
14 p2656 A70-30294
- Variational equation describing thermal diffusion in solid body undergoing deformation
14 p2657 A70-30722
- Finite elements for three dimensional compressible and incompressible solid continua based on minimum potential energy and variational principles
14 p2659 A70-31128
- Thermoelasticity of incompressible solids, integrating linearized equations using Helmholtz solution
14 p2660 A70-31224
- Thermocouples performance during fast varying temperature measurements in solids, considering physical parameters effects on accuracy
15 p2734 A70-31646
- Viscoelastic-plastic solid delayed fracture associated with wedge formation of crazed material at crack tip
15 p2816 A70-32010
- Free solid body time optimal rotation about fixed central axis under action of external control moment vector, assuming zero initial and terminal angular velocity
15 p2775 A70-32447
- Stress wave propagation in solid infinite elastic medium and laminated materials
15 p2823 A70-32784
- Equation of state of solids measured by shock wave techniques, considering elastic-plastic flow in plane wave geometry
15 p2824 A70-32789
- Initial thermally stressed state of solid bounded by concentric circular cylinders, applying Cauchy thermoelastic stress theory
16 p2987 A70-32993
- Rigid inclusion effect on stress distribution in isotropic infinite solid with Griffith crack under plane strain
16 p2994 A70-34250
- Stress wave generation in elastic temperature-dependent absorbing solids by impulsive EM radiation
17 p3185 A70-34967
- Shock wave response of metals and nonmetals under high strain rates
17 p3188 A70-35223
- Nonaxisymmetric thermal stress distribution in infinite elastic solid containing external stress-free crack with prescribed heat flux
17 p3196 A70-35437
- Heat conduction from sliding solids, discussing restrictions effect on temperature field near interface
17 p3197 A70-35543
- Equilibrium theory of finite deformation of elastic solids, discussing applications and approximate solution methods
18 p3335 A70-35975
- Thermodynamic application to strained solids, considering paradoxes, irreversible processes and continuum mechanics
18 p3340 A70-36555
- Thermodynamics of solids deformation, tracing macroscopic inelastic behavior to deformation induced internal structural changes governed by atomic and molecular processes
18 p3340 A70-36556
- Hybrid rocket engine with solid oxidizer, noting applications as apogee or perigee motor
18 p3301 A70-36655
- Heat transfer rates in short flow duration facilities /shock tubes/ from surface temperature measurement of solid exposed to flow
18 p3348 A70-36715
- Torsional and longitudinal vibrations of circular cylinders of micropolar elastic solids in terms of Laplace and Helmholtz equations solutions
19 p3537 A70-37789
- Plane waves superposed on solid during steady state isothermal creep deformation subjected to unidirectional constant initial tensile stress
19 p3537 A70-37791
- Infinite linearly elastic solid response with random variations in material elastic properties, obtaining average energy in displacement field by method of moments
19 p3538 A70-37796
- Elastic particulate composite solid with microinclusions, deriving dispersion relations governing plane longitudinal wave propagation modes by analogy with continuum theory
19 p3540 A70-37942
- Fiber reinforced solid material, determining swelling or temperature change induced dilatation by micromechanics and physical chemistry
19 p3540 A70-37943
- Safety factor limit analysis for anisotropic nonhomogeneous solids by variational method, exemplifying by four layer rectangular beam
19 p3547 A70-38355
- Equilibrium equations integration for body in isotropic linear viscoelastic medium with contact-type boundary conditions
19 p3547 A70-38395
- Surface layer heating of solid body by dense gas discharge plasma radiation, comparing vaporization and reversible opacity onset times in quartz
19 p3482 A70-38733
- Variational principles in linear quasi-static theory of inhomogeneous and isotropic viscoelastic solids with microstructure
20 p3718 A70-39229
- Solid body nonelastic deformation in terms of thermodynamic principles of nonequilibrium processes
20 p3718 A70-39246
- Perforated solid body moving in ideal incompressible fluid, deriving equations of motion in Lagrangian form
20 p3610 A70-39732
- Soviet papers on mechanics of solid deformed body covering elasticity and plasticity theories, shell stability, eigenvalue problems, etc
20 p3722 A70-39851
- Fatigue phenomena based on solid body model, establishing breaking stress dependence on time or load cycles number
20 p3740 A70-39854
- Solid bodies statistical creep analysis, assuming macroscopically homogeneous isotropic polycrystallinity
20 p3725 A70-39866
- Book on stability of dynamic systems and solid bodies covering variation equations, Liapunov method and functions, approximations, harmonic balance and applications
21 p3850 A70-41370
- Anisotropic elastic solid body thermal stresses, investigating static plain strain problem in thermoelastic linear theory
21 p3936 A70-41414
- Microelastic solids theory achieved with application of internal constraints from postulate of principal coincidence
21 p3939 A70-42029
- Constitutive equation for homogeneous and isotropic elastic solids
21 p3940 A70-42101
- Temperature distribution measurement inside solid samples by Mossbauer effect, considering application to turbine blades
21 p3830 A70-42165
- Linear coupled thermoelasticity theory for homogeneous isotropic solid with two temperatures
22 p4123 A70-42540
- Crack growth study in viscoelastic solids by linear continuum mechanics, discussing cyclic loads, composite solids mechanical behavior and thermodynamics
22 p4115 A70-42937
- Sound velocity in isotropic nonlinearly elastic continuum with microstructure, showing dispersion coincident with Cosserat constant
22 p4120 A70-43713
- Strong fibrous solids - Conference, London, January 1970
24 p4366 A70-45165
- Electromagnetic waves nonlinear interaction at various threshold powers, inducing propagation in solid body plasma
24 p4388 A70-45201
- Linear viscoelastic solid quasi-static deformation, deducing associated minimum principles under assumption of unique solutions existence for boundary value problems
24 p4420 A70-45264

- Hercules 89 supergiant abnormal IR radiation flux originating in circumstellar shell of solid particles radiating at observed long wavelengths
24 p4410 A70-45772
- Two incompressible isotropic nonlinear elastic solids mixture, investigating entropy production inequality effects
24 p4425 A70-45991
- Plane parallel collision of two solid spherical bodies with mass centers coincident with geometrical centers
24 p4427 A70-46377
- SOLIDUS**
Ternary Ti-Ta-Nb solidus surface determination by simplex lattices and cubic approximation, statistically evaluating equation derived
05 p0864 A70-16547
- Visualized multicomponent systems subsolidus structures, studying physicochemical characteristics
13 p2470 A70-28885
- Subsolidus state multicomponent eutectics systems temperature range based on number and melting points ratios of individual components
24 p4367 A70-45476
- Simplex lattice mathematical models of solidus volume for quaternary Nb-W-Ti-Zr system
24 p4361 A70-45833
- SOLSTICES**
F 2 layer midday ionization equatorial anomaly during summer and winter solstices, using calculated mean critical frequencies
11 p2042 A70-25533
- Solstitial solar quiet currents along magnetic lines of force in magnetosphere, discussing ionospheric wind asymmetry effects
17 p0377 A70-34949
- F 2 layer midday ionization equatorial anomaly during summer and winter solstices, using calculated mean critical frequencies
21 p3819 A70-41283
- SOLUBILITY**
Gas solubilities investigated for gaseous pressurization of propellants
01 p0160 A70-10840
- Ternary chemical element additions (O, Sn, Zr, Cu, Mo, V) effects on solubility range of primary alpha region of Ti-Al base alloys
01 p0122 A70-11239
- Temperature and hemoglobin concentration effect on oxygen solubility in blood, constructing table for Bunsen solubility coefficients
03 p0428 A70-14156
- Solubilities and heats of solutions of Mo, W, V, Ti and Zr in liquid K
04 p0710 A70-15632
- Binary system Mo-C determined in temperature range 1250-2270 C, using microscopic and thermal analyses and microhardness testing
05 p0862 A70-16198
- Metastable tau-phase in Fe-Ni-B melt solidifying into boride, noting lattice constant and solubility
07 p1307 A70-19393
- Waspaloy gamma prime solvus temperature relationships as function of solution treatment and precipitation strengthening additives, discussing microstructure and tensile properties
08 p1520 A70-21555
- Transition metal alloys electronic effect on solubility of interstitials
08 p1521 A70-21695
- Combined solubility of group IVA metals and carbon in solid state molybdenum at various temperatures
09 p1704 A70-22754
- Oxygen solubility in liquid Mo in presence of volatile oxides, determining equilibrium constant of dissolution reaction
09 p1709 A70-23784
- Tantalum solubility in alpha titanium and Ti-Ta system physicochemical properties using metallographic, X ray, hardness and resistance analysis
10 p1903 A70-23864
- Nitrogen solubility in Nb-Mo solid solutions, determining relationship between N partial pressure, temperature and concentration
14 p2598 A70-31285
- Hydrogen solubility in electrically exploded metals
15 p2762 A70-32747
- Impurities solubility in semiconductor indium telluride with stoichiometric vacancies, verifying thermodynamic model by phase diagrams
16 p2960 A70-33224
- Mo, W, V, Ti and Zr solubilities in liquid K
16 p2933 A70-34210
- Nitrogen solubility calculation in transition metals liquid binary systems, using quasi-chemical model
18 p3273 A70-36045
- Ti, Nb and Mo solubility during surface doping in Al melts containing various metals, discussing melt lattice structure effects
18 p3276 A70-36208
- Oxygen solubility in Nb-Hf alloys at elevated temperatures, using isothermal sections for Nb-rich part
19 p3453 A70-38708
- Ni-Cu-C solid solutions, measuring temperature dependence of graphite solubility by vapor transport method
21 p3841 A70-42149

- Solubility isotherms of alloying elements in Ge-Al-P semiconductor-acceptor-donor system at high temperatures
24 p4391 A70-46143
- Fe-Cr and Fe-Cr-V system miscibility gap, using differential thermal analysis and Mossbauer effect measurements
24 p4362 A70-46190
- Fe-Ni-Mn ternary martensitic alloy, discussing metastable miscibility gap island existence in bcc phase
24 p4363 A70-46193
- SOLUTES**
Helical twisting power of steroidal solutes in cholesteric mesophases, discussing nematic temperature shift dependence on ester chain
08 p1455 A70-21524
- Interstitial solutes effect on athermal component of flow stress in alpha titanium
08 p1521 A70-21577
- Organic solutes diffusion in stagnant blood plasma and red cell suspensions, using models from transport theory
15 p2686 A70-32847
- SOLUTIONS**
NT AQUEOUS SOLUTIONS
NT DETONABLE GAS MIXTURES
NT GAS MIXTURES
NT NUCLEAR EMULSIONS
NT PHOTOGRAPHIC EMULSIONS
NT SOLID SOLUTIONS
Turbulent flow theory of dilute linear polymer solutions in smooth and rough tubes based on Reynolds equation
15 p2719 A70-31491
- Molecular interactions, surface pressures and potentials of mixed monolayers of stearic acid and stearyl alcohol with inorganic subsolutions
15 p2695 A70-32547
- SOLVENTS**
Thermodynamics of LiBr in anhydrous dimethyl sulfoxide determined at several temperatures using EMF method
06 p1003 A70-17219
- Lil thermodynamic properties in dimethyl sulfoxide determined by emf method, discussing ionic solution energies
10 p1831 A70-25041
- Propylene carbonate, dimethyl formamide, acetonitrile and methyl formate diffusion coefficients measurement for estimating nonaqueous Li batteries transport limitations
15 p2766 A70-32528
- Free energy and enthalpy of single ion solvation in water and propylene carbonate, using electrostatic model
15 p2695 A70-32829
- SOMMERFELD APPROXIMATION**
Laminar flow stability along flexible boundary on basis of Orr-Sommerfeld equation
05 p0836 A70-16923
- Orr-Sommerfeld equation asymptotic solution corresponding to boundary layer velocity distribution
15 p2721 A70-32357
- Leaky wave antennas, deriving radiation field distribution in terms of power leakage from interior by Sommerfeld integral and Kirchhoff-Huygens integration
17 p3052 A70-35071
- Numerical integration of Orr-Sommerfeld equation for flat plate Blasius boundary layer transition
23 p4179 A70-43973
- Linear stability of fluid flow, proving equivalence of slow and rapid asymptotic solutions of Orr-Sommerfeld equations
23 p4180 A70-43994
- Laminar to turbulent boundary layer flow transition over flat plate, using space amplified numerical solutions of Orr-Sommerfeld equation
23 p4181 A70-44234
- SOMMERFELD WAVES**
Sommerfeld type radiation conditions for linear homogeneous isotropic elastic materials with microstructure, discussing field equations, displacement and rotation vector and scalar conditions
21 p3936 A70-41417
- SONAR**
Radar and sonar data processing for display in command and control systems using digital technique, discussing processor configuration
05 p0828 A70-16189
- Echoes with ion sonar waves in ionized gases, considering ion density disturbances under local excitation
24 p4387 A70-45795
- SONDES**
NT IONOSONDES
NT RADIOSONDES
NT RAWINSONDES
Global meteorological sounding network requirements, restraints and sensors, considering gun launched meteorological probe role
01 p0054 A70-10082
- Drop sondes dynamic and aerodynamic design for lower Venus atmosphere based on solution for free

- fall of body in atmosphere with constant temperature gradient
09 p1766 A70-22935
- SONIC ANEMOMETERS**
Atmospheric wind velocity and temperature oscillations measurement using acoustic anemometer, resistance thermometer and multichannel signal spectrum analyzer
07 p1284 A70-19833
- Acoustic piezoceramic anemometer for steady state measurements of wind turbulence on meteorological tower
07 p1285 A70-19835
- Acoustic piezoceramic anemometer for steady state measurements of wind turbulence on meteorological tower
20 p3634 A70-40342
- SONIC BOOMS**
Sonic boom pressure signatures for uniform and maneuvering flight conditions determined for fighter and SST aircraft
[AIAA PAPER 69-1134] 01 p0005 A70-10606
- Sonic boom wave shapes and amplitudes determination in still stratified atmosphere, comparing U.S. standard atmosphere results to various atmospheric models
03 p0411 A70-12927
- Sonic boom propagation in still atmosphere with vertical temperature gradient, using graphical method of determining rays for aircraft motion
05 p0791 A70-15786
- Sonic boom overpressures generated by aircraft level rectilinear flight at supersonic speed in temperature and wind stratified atmosphere, calculating atmospheric correction factor
05 p0794 A70-16411
- Sonic boom theory of geometric acoustics with nonlinear effects modification, emphasizing horizontally stratified atmospheric propagation, discussing failure near caustic
05 p0796 A70-16794
- Sonic boom research, considering exposure pattern development, propagation in inhomogeneous atmosphere and effects on structural responses
05 p0796 A70-16795
- Sonic bang simulation by linearly distributed explosives, creating blast waves with wide range of shapes and durations
05 p0796 A70-16796
- Aircraft configurations designed for eliminating sonic boom due to lift
05 p0791 A70-16798
- Weak shock thicknesses with turbulent scattering as dissipative mechanism compared with magnitude in sonic boom flight tests and explosions
[AIAA PAPER 70-54] 06 p1042 A70-18190
- Sonic booms propagation in nonhomogeneous atmosphere, outlining effects on intensity and range for transport and military fighter aircraft
07 p1190 A70-18779
- Sonic boom focalization, considering linear propagation for real atmosphere with wind and Jericho experiments
07 p1193 A70-19130
- Book on sonic boom effects covering shock waves generation and propagation, elastic structures response to dynamic loads, structural damage, etc.
09 p1609 A70-22203
- Super sonic booms occurrence and propagation, discussing aircraft operating conditions for prevention of effect on ground
10 p1805 A70-24130
- Shock impedance definition consistent with acoustic limit, considering use of impedance mismatch to reduce sonic boom overpressure
10 p1805 A70-24522
- Coupled panel-cavity vibrations analysis, emphasizing sonic boom excitation of large window-room combinations
11 p2133 A70-25728
- Seismic measurements of sonic boom induced ground vibrations for hazard to structures
12 p2227 A70-28078
- Plane acoustic shock wave vertical propagation in gravity-stratified atmosphere with temperature gradient, using homogeneous perturbation velocity
[DFVLR-SONDDR-35] 12 p2212 A70-28209
- Climatology of safe threshold Mach number and airplane ground speed for boomless supersonic cruise, considering San Francisco-New York route
14 p2530 A70-30606
- Overpressure, rise time and wave period of sonic boom signatures at ground level from unaccelerated supersonic overflights
14 p2530 A70-30608
- Sonic boom incident and ground reflected waves action on exterior wall, calculating arrival time as functions of aircraft speed and altitude and wall slope
14 p2566 A70-30861
- Sonic boom minimization methods involving mass or energy addition
14 p2531 A70-30868
- Sonic boom causes and nature, considering aircraft configuration and attitude and minimizing effects
15 p2673 A70-31852

Sonic boom variation with aircraft geometry, volume, weight, weather and environment conditions, noting effects on structures and people
16 p2840 A70-32947

Sonic boom penetration into water, discussing N wave reflection and refraction, sound fields, etc
16 p2952 A70-34095

Supersonic transport sonic boom theory and effect reduction, discussing Whitham rule, bow shock, overpressure, engine and aircraft design and shock wave control
16 p2843 A70-34263

Annoyance assessment for sonic boom series exposure near airport
16 p2843 A70-34325

Sonic boom minimization through airstream alteration by force or heat fields and aircraft body shaping [AIAA PAPER 70-903]
17 p3019 A70-35817

Supersonic boom intensity calculation on ground, assuming isobaric inhomogeneous atmosphere and weak shock wave
18 p3213 A70-36380

Lower bounds for sonic boom, considering negative overpressure region in configuration tailoring
18 p3241 A70-36456

Liability for damages due to supersonic flight sonic booms, discussing pertinent provisions in Dutch and international law
19 p3553 A70-37561

Intersecting shock waves propagation, deriving equations for aircraft sonic boom intensity
19 p3355 A70-38484

Atmospheric inhomogeneity and temperature gradient effects on sonic booms, discussing displacement, growth rate and shock wave radii refraction
22 p3961 A70-42311

Two dimensional flow about supersonic airfoil, considering trailing Taylor columns behavior like sonic booms
22 p4009 A70-42629

Human disturbance from SST overflight sonic booms, discussing overpressure, rise times and durations
23 p4137 A70-44016

SST configurations minimizing sonic booms obtainable for given length and weight [ICAS PAPER 70-23]
23 p4138 A70-44110

Near field flow effects on sonic boom for incident triangular wing with constant lift distribution [ICAS PAPER 70-20]
23 p4138 A70-44113

Sonic boom effects on building structures, using Concorde measurements and explosion simulation studies
24 p4289 A70-45151

Sonic boom waves diffraction and reflection, developing analytical method for pressure-time history in vicinity of walls and corners
24 p4289 A70-45266

Sonic boom, discussing characteristic flow phenomena, intensity, effects on buildings and animals, human reactions, etc
24 p4289 A70-45786

SST sonic boom noise level reduction by thermal simulation of long body aircraft, considering thermal spike or keel [AIAA PAPER 70-1323]
24 p4291 A70-45942

All-body configuration hypersonic transport aircraft performance by computer synthesis, considering sonic boom constraint, maximum payload ratio and optimal cruise speed [AIAA PAPER 70-1224]
24 p4291 A70-45957

Sonic boom effects on guinea pigs Corti organ, comparing auditory damage in cochlea with hair cell damage
24 p4305 A70-46374

SONIC FLOW

U TRANSONIC FLOW

SONIC NOZZLES

Exhaust plume from underexpanded sonic and supersonic nozzles including boundary mixing analyzed by approximate model to predict Mach disk location [AIAA PAPER 70-229]
06 p0972 A70-18135

Relaxation time influence on mass output calculation errors for gases in small diameter sonic nozzles
09 p1604 A70-22841

Exhaust plume rarefaction from sonic orifice, considering continuum to transitional behavior for perfect gas [AIAA PAPER 69-657]
21 p3745 A70-41742

SONIC SOLDERING

U ULTRASONIC SOLDERING

SONIC SPEED

U ACOUSTIC VELOCITY

SONIC WAVEGUIDES

U ACOUSTIC DELAY LINES

SOOT

Liquid fuel combustion luminous flame monochromatic radiation distribution, considering soot particle clouds effective emission thickness
06 p1172 A70-17142

Jet aircraft air pollutant production and dispersion of nitric oxide and soot, discussing mixing process [AIAA PAPER 70-115]
06 p1131 A70-18070

German monograph on soot formation and separation in turbulent diffusion flame in power plant combustion chamber, noting pyrolysis role
24 p4428 A70-45087

SORBENTS

NT ABSORBENTS

NT ADSORBENTS

SORPTION

NT ADSORPTION

NT CHEMISORPTION

Gases interaction with ablator and components during thermal conductivity, measuring nitrogen, helium, carbon dioxide and water sorption
21 p3951 A70-41873

SORTING

U CLASSIFYING

SOUND

U ACOUSTICS

SOUND ABSORPTION

U SOUND TRANSMISSION

SOUND AMPLIFICATION

Mechanical parametric amplification, improving SNR of acoustic systems in hostile environments
19 p3422 A70-37695

SOUND BARRIER

U ACOUSTIC VELOCITY

SOUND DETECTORS

U SOUND TRANSDUCERS

SOUND FIELDS

Horizontal and vertical sound fields local effects on natural convection from heated horizontal circular cylinder, using shadowgraphy
01 p0219 A70-11198

Mean acoustic force on small spherical and nonspherical inclusions in standing acoustic field, discussing equilibrium orientations of body
04 p0720 A70-15085

Near noise fields of choked axisymmetric air jet, discussing sound pressure levels surrounding jet
05 p0834 A70-16783

Pseudosound field wall pressure correlation obtained to predict response characteristics of aircraft panel mounted along jet wake
05 p0835 A70-16785

Noise field from ground testing of nuclear rocket engines operated at various reactor power levels
06 p1133 A70-18234

Bragg diffraction imaging for sound fields visualization
10 p1893 A70-24170

Sound radiation from rigid flow spoilers correlated with fluctuating forces, measuring jet-pipe drag and lift components with transducers
11 p2085 A70-26699

Pressure fluctuations in acoustic field of boundary layer under slot suction, considering vortex formation and separation on edges
12 p2209 A70-27298

Interference phenomenon observable by ultrasonic fields visualization in 1-10 MHz range, discussing beam stratification
13 p2404 A70-28646

Plane rectangular plate in acoustic field of jet engine exhaust, calculating surface stresses
15 p2819 A70-32186

Sonic boom penetration into water, discussing N wave reflection and refraction, sound fields, etc
16 p2952 A70-34095

Holographic flow and sound visualization, determining three dimensional density distributions in aerodynamic flows
19 p3425 A70-37888

Cylindrical radiator radiation resistance and mass in waveguide with reflecting boundaries, calculating sound field for effect of medium reaction
19 p3472 A70-38656

Sound field produced in uniform moving ideal fluid stream by nonuniform oscillating elastic wall
19 p3353 A70-38657

Noise field from ground testing of nuclear rocket engines operated at various reactor power levels
20 p3689 A70-39688

Sound generation by fluctuating subsonic jet flow, considering field directional characteristics and sound pressure variations with Mach number
21 p3850 A70-41422

Frequency dependent effects of applied acoustic fields on attached jet flows for Reynolds numbers over curved surfaces [ASME PAPER 70-FLCS-1]
22 p4008 A70-42430

Acoustic fields of circular, rectangular and line focused ultrasonic emitters for small defect detection
22 p4048 A70-43618

Lighthill aerodynamic noise theory fundamental equation for acoustic field density distribution, determining flow fields for surfaces in uniform translational motion
24 p4324 A70-45268

Ultrasonic angle probes with circular and rectangular transducers, discussing radiation field characteristics
24 p4336 A70-45686

SOUND GENERATORS

Sound radiation from airfoil in turbulent jet flow, discussing direct correlation of fluctuating lift
01 p0004 A70-11192

Sound generation by multibladed single stage fans operating in free field, deriving model as boundary value problem involving inhomogeneities due to quadrupole distribution
01 p0166 A70-11197

Sound generation in axial-flow subsonic turbomachinery, using two dimensional model [ASME PAPER 69-WA/FE-4]
04 p0733 A70-14785

Discrete noise generation and propagation due to fan engine rotor forcing excitation and interaction with downstream stator
05 p0896 A70-16791

Sound radiated by fluctuating forces on helicopter rotor analyzed, predicting noise output variation as function of helicopter design parameters
05 p0796 A70-16792

Ground reflection effect on plane uniform sound source distribution applicable to compressor and fan noise under far field conditions
09 p1726 A70-22240

Acoustic radiation produced in response to harmonically oscillating circular cylinder rotating in viscous fluid solved within Lighthill-Curle formalism for aerodynamically generated sound
09 p1726 A70-22391

Rigid rectangular box with supported flexible wall analyzed for internal acoustostructural mode coupling factors and corresponding modal average radiation efficiency
09 p1770 A70-22393

Low Mach number aerodynamic sound generation by turbulent flow at sharp edged thin scattering half plane solved with Green function
10 p1802 A70-24521

Sound generation and detection by distributed piezoelectric sources using frequency response and equivalent circuit
11 p2085 A70-26701

Mechanical seals ringing sound relationship with heat transfer and interfacial conditions, noting sliding surfaces temperature effect
13 p2417 A70-28611

Cylindrical radiator radiation resistance and mass in waveguide with reflecting boundaries, calculating sound field for effect of medium reaction
19 p3472 A70-38656

Sound vibrations resonant frequency relation to jet internal structure in gas jet stem radiator
19 p3354 A70-38658

Sound generation by fluctuating subsonic jet flow, considering field directional characteristics and sound pressure variations with Mach number
21 p3850 A70-41422

SOUND INTENSITY

NT ZERO SOUND

Subjective measurement of sound level of impulses and pulses, investigating 1 kHz tone and selection of time length between sound events
05 p0882 A70-16344

Sound levels and frequency spectra of noises measured in AN-24 and IL-18 turboprop aircraft cockpits
05 p0796 A70-16925

Pro- and anticoagulants dynamics in rats blood during early phases of prolonged sound effect
12 p2168 A70-27347

Shock wave radiation from supersonic ducted rotor, determining sound power at blade passing harmonic frequency
19 p3353 A70-38614

Rod surface roughness effect on eddying sound frequency and intensity and on aerodynamic resistance
19 p3353 A70-38654

Sound level vs duration evaluated for noise exposure using different exchange rates [ASA PAPER FF2]
20 p3578 A70-39125

SOUND LOCALIZATION

Directional dependence of broadband artificial ear signal spectrum and correlation functions using dummy head
09 p1624 A70-22761

Frequency function of sound localization in median plane measured psychoacoustically at both ears with narrow band signals
09 p1624 A70-22762

Auditory and cutaneous sound localization acuity
13 p2354 A70-29597

SOUND MEASUREMENT

U ACOUSTIC MEASUREMENTS

SOUND PERCEPTION

U AUDITORY PERCEPTION

SOUND PRESSURE

Acoustical resonators free oscillations and pressure effects on damping, amplification, decay decrement and relaxation time
02 p0304 A70-12772

Spectral response of cylindrical shell due to random acoustic pressure input computed using modal approach
04 p0778 A70-15528

Sound pressure field from stationary and moving jets determined from jet and aircraft trajectory parameters

05 p0834 A70-16781

Microphone output level in airstream relation to sound pressure and pressure fluctuations caused by turbulent flow

07 p1334 A70-19372

Probability theory of stresses during random vibrations of flat panel in acoustic field of jet engine exhaust

18 p3301 A70-36301

Error analysis of Corcos hypothesis concerning cross spectra of pseudoacoustic LF turbulent pressure pulsations on flat plate

18 p3241 A70-36305

Sound generation by fluctuating subsonic jet flow, considering field directional characteristics and sound pressure variations with Mach number

21 p3850 A70-41422

SOUND PROPAGATION

Acoustic and shock waves propagation in multicomponent media, assuming uniform speed for components and complex density dependence of media on pressure

03 p0465 A70-13329

Sound propagation along cylindrical duct of wind tunnel, discussing fluid flow effect on modal cut-off frequencies

04 p0719 A70-15078

Surface inhomogeneities effect on sound radiated by nearby turbulence near flexible boundary, using converted Lighthill wave equation to obtain far field radiation

07 p1256 A70-19262

Two phase supersonic continuum flow of dispersed equal gas-liquid volume ratio in shock tunnel using continuum theory, considering sound propagation

07 p1256 A70-19311

Vertical propagation of short acoustic waves from harmonic source in inhomogeneous atmosphere, calculating shock front width and heating rate

12 p2264 A70-27519

Nonviscous relativistic fluid energy momentum tensor modification to rule out sound wave propagation velocities above speed of light

13 p2454 A70-29900

Acoustic and shock waves propagation in multicomponent media, assuming uniform speed for components and complex density dependence of media on pressure

14 p2566 A70-37079

Sound propagation in atmospheric fog, considering mass, momentum and energy transfer mechanisms between particles and gas

15 p2769 A70-31443

Sonic boom penetration into water, discussing N wave reflection and refraction, sound fields, etc

16 p2952 A70-34095

Perturbation method to obtain analytical expressions for attenuation of plane wave sound propagation in lined ducts

17 p3136 A70-34523

Axial compressor air intake wall design influence on sound propagation

19 p3353 A70-38653

Sound propagation in cylindrical waveguide with impedance walls in presence of flow

19 p3472 A70-38655

Perturbation method for nonlinear wave propagation in inhomogeneous media, considering sound propagation in ducts and hydromagnetic waves across nonuniform magnetic field

20 p3672 A70-39611

Mach number effect on sound propagation in tuning acoustically lined rectangular duct with uniform flow

20 p3673 A70-39709

Vertical propagation of short acoustic waves from harmonic source in inhomogeneous atmosphere, calculating shock front width and heating rate

21 p3818 A70-41167

One dimensional sound propagation in reacting gas mixture near equilibrium, obtaining equilibrium and frozen sound speed

22 p4074 A70-42752

SOUND RANGING

SOFAR /sound fixing and ranging/ systems for location and recovery of reentry vehicles and missile cases and rescue of disabled transoceanic aircraft

13 p2449 A70-29169

Simultaneous equations for motion location, speed and direction in acoustic tracking of supersonic objects, recording shock wave times of arrival with microphone system

13 p2450 A70-29988

SOUND TRANSDUCERS

NT ELECTROACOUSTIC TRANSDUCERS

NT LOUDSPEAKERS

NT MICROPHONES

Impedance, transfer and scattering characteristics for interdigital acoustic surface wave transducers, using linear equivalent circuit model

06 p1062 A70-17478

Acoustic scattering parameters for interdigital transducer as function of electrical loading and frequency using equivalent circuit model

06 p1062 A70-17485

Turbulence measurement by piezoceramic acoustic sensors, considering capacitance

07 p1284 A70-19829

Acoustic emission monitoring methods to detect crack formation and growth in ceramics

10 p1894 A70-24174

Sound generation and detection by distributed piezoelectric sources using frequency response and equivalent circuit

11 p2085 A70-26701

Precision components engineering inspection and sonic transducer surface vibration modes analysis by hologram interferometry

17 p3087 A70-35021

SOUND TRANSMISSION

Brittle composites /including fiber reinforced material/ deformability and plastic deformation effect on tensile strength, discussing pressure induction of sound flow

[ASME PAPER 69-WA/PROD-28]

04 p0705 A70-14834

Theoretical model of fan/compressor noise blade passing frequency generation and transmission, noting duct length and configuration in engine operation

04 p0734 A70-14886

Sound energy transmission and radiation into room by flexible structural panels subjected to acoustic excitation using wave equations

10 p1964 A70-25224

Sound transmission properties in terms of medium excitation by primary and secondary sound sources

11 p2083 A70-25730

Pilot helmets, discussing sound attenuation, noise protection and speech intelligibility

12 p2177 A70-27040

Plane harmonic sound wave reflection and transmission in flowing medium by infinite set of arbitrary spaced and staggered flat plates

16 p2971 A70-34016

Sound passage through rigid screen of arbitrary wave thickness with apertures, using linear algebraic equations

18 p3291 A70-36306

Sound transmission and suppression in turbomachinery fans and compressor ducts, using three dimensional wave equation

18 p3304 A70-36873

Space law aspects of direct broadcasting satellites for TV and sound transmission

20 p3740 A70-39408

Acoustic pulse transmission through plane vortex sheet, examining zone of silence, geometrical acoustics and sound radiation

21 p3849 A70-41243

Ultrasound inductive absorption coefficient of metals in quantized magnetic field

22 p4075 A70-43474

SOUND VELOCITY

U ACOUSTIC VELOCITY

SOUND WAVES

NT AERODYNAMIC NOISE

NT AIRCRAFT NOISE

NT ENGINE NOISE

NT JET AIRCRAFT NOISE

NT LAMB WAVES

NT NOISE [SOUND]

NT ROCKET ENGINE NOISE

NT SONIC BOOMS

NT THERMAL NOISE

Emission from broadband impulsive point source refracted by spherical interface between fluids with different acoustic velocities, showing emitted and inverse waveform disturbances

01 p0046 A70-11190

Short sound waves propagation in moving inhomogeneous medium, studying viscosity and heat conductivity influence

01 p0146 A70-11581

F 2 region acoustic waves over Kansas and Nebraska attributed to local storms in troposphere

02 p0290 A70-12158

Traveling wave velocity in human cochlea determined by equally loud tonal pairs, comparing results to psychophysical and electrophysiological findings

02 p0237 A70-12323

Charged particles motion in isotropic weakly ionized plasma acoustic wave associated with difference in electrons and ions entrainment by neutral particles

03 p0530 A70-13087

LF sound velocity measurement in carbon dioxide near critical point, noting existence of logarithmic divergence

04 p0718 A70-14685

Sound wave propagation in liquid containing gas bubbles allowing for relative motion of bubbles and liquid, deriving steady shock wave structure

04 p0671 A70-14991

Radiation from and panel response to supersonic turbulent boundary layer, emphasizing panel mode coupling to acoustic field

04 p0615 A70-15081

Sound vibrations effect on pulsation characteristics of turbulent gas jet

04 p0618 A70-15248

Auroral radio reflections using two coherent bistatic radio systems, discussing ionoacoustic waves in auroral plasma

05 p0837 A70-16072

Kirchhoff wave scattering geometric optics theory accuracy, using multifrequency acoustic wave backscatter data obtained from rough surfaces

05 p0814 A70-16401

Optical wave front reconstruction principles applied to sonic and seismic wave holography for mapping earth subsurface structure

05 p0850 A70-16685

Acoustic radiation from underexpanded supersonic main jet flow from nozzle impinged upon by annular jet

05 p0835 A70-16784

Experimental and analytical work on structural panels vibratory response and acoustic radiation excited by turbulent boundary pressure fluctuations, evaluating applicability to noise research

05 p0835 A70-16789

Surface acoustic wave components for performing transduction, amplification and coupling functions, considering compatible component configurations

06 p1018 A70-17477

Electrical impedance, conversion loss and bandwidth for piezoelectric film or plate transducers used for generating planar volume-acoustic waves at microwave frequencies

06 p1062 A70-17480

Plane light wave diffraction incident upon isotropic dielectric layer traversed by acoustic microwave using guided microwave theory

06 p1105 A70-17484

Sound wave velocity and damping in liquid N measured along saturated vapor line using thermal Brillouin scattering techniques

06 p1105 A70-17491

Witham radiative acoustics, analyzing nonequilibrium waves propagating in nongray radiating and absorbing gas

06 p1173 A70-17514

Radiatively driven plane acoustic wave in nongray radiating and absorbing gas assuming local molecular equilibrium

06 p1173 A70-17515

Pipe bounding walls effect on sound waves dispersion in rarefied gas, deriving integral equations showing frequency range decrease with container size

06 p1107 A70-18315

Electromagnetic-acoustic probe for remote wind velocity sensing and radar range performance

06 p1071 A70-18509

Frequency calculation and measurement for acoustic waves produced by carbon dioxide Q switched lasers

06 p1084 A70-18620

Optical system with orthogonal standing waves in liquid used for two dimensional scanning of laser beam in ultrasonic field

07 p1296 A70-18765

Plane acoustic wave steady state scattering at circular cylinder in semibounded region

07 p1334 A70-19089

LF ion-acoustic waves in ionosphere, considering electric and magnetic field variations, instability, etc

07 p1347 A70-19187

Sound waves dispersion and attenuation produced in gas flow by relaxation effects of solid particles presence

07 p1258 A70-19567

Dispersion of ion-acoustic waves in quiescent rare gas discharge plasmas, discussing model simulating ion waves generated by finite sine wave bursts

07 p1352 A70-19990

Propagation pattern of surface acoustic wave visualized in piezoelectric and nonpiezoelectric materials by dusting delay line with fine particles

07 p1336 A70-20283

Radial vibrations of hollow elastic sphere in acoustic medium, considering Laplace transform of field equations with respect to time

08 p1587 A70-21076

Acoustic wave propagation in partially ionized gas in external electric field, solving differential equations by Laplace transformation

08 p1552 A70-21503

Nondestructive testing and inspection by acoustic emission from stressed materials, discussing microstructure effect and crack initiation detection

08 p1508 A70-21747

Acoustic radiation produced in response to harmonically oscillating circular cylinder rotating in viscous fluid solved within Lighthill-Curle formalism for aerodynamically generated sound

09 p1726 A70-22391

Rigid rectangular box with supported flexible wall analyzed for internal acoustostructural mode coupling factors and corresponding modal average radiation efficiency 09 p1770 A70-22393

Thermoacoustic waves formation and propagation in metallic rods by light pulses, studying pulse rise time influence on waves shape and amplitude 09 p1778 A70-23090

Ion-acoustic wave oscillations of weak collision plasma in strong electromagnetic field, discussing instability 09 p1736 A70-23198

Acoustic gravity waves horizontal ducting in atmosphere with spatially periodic wind shears 09 p1671 A70-23498

Nonlinear oscillations averaging method applied to resonant interactions of acoustic gravity waves 09 p1729 A70-23666

Vertical liquid jets capillary instability under audio frequency disturbances, measuring disturbance growth rates for various wavelengths and fluid viscosities 09 p1664 A70-23678

Ion acoustic wave propagation near sheath at plasma-wall boundary in low pressure argon plasma measured by electron beam probe 10 p1921 A70-23965

Acoustic wave amplification and generation in piezoelectric semiconductors and semimetals by super-sonic carrier drift currents 10 p1925 A70-25030

Sound energy transmission and radiation into room by flexible structural panels subjected to acoustic excitation using wave equations 10 p1964 A70-25224

Sound transmission properties in terms of medium excitation by primary and secondary sound sources 11 p2083 A70-25730

Crack propagation in tensioned plates subjected to sonically induced vibrations 11 p2133 A70-25731

Microwave amplifiers based on interaction between piezoelectric acoustic waves and collinearly drifting carriers, analyzing gain, frequency response, etc 11 p2018 A70-26164

Acoustic perturbations in stationary weakly ionized pulsed neon plasma 11 p2096 A70-26842

Radiation characteristics of ion acoustic waves from monopole and dipole antennas, observing patterns of longitudinal wave in isotropic plasma 12 p2279 A70-27778

Plane acoustic shock wave vertical propagation in gravity-stratified atmosphere with temperature gradient, using homogeneous perturbation velocity [DFVLR-SONDDR-35] 12 p2212 A70-28209

Oscillating infinite cylinder as acoustic waves source in homogeneous viscous medium, deriving scalar and vector potentials 12 p2274 A70-28240

One dimensional radiatively driven acoustic waves analysis by approximation for radiative heat addition, achieving better accuracy than substitute-kernel method 13 p2520 A70-28633

Textbook reissue on diffraction of electromagnetic and acoustic waves at open end of waveguide, using Wiener-Hopf-Fock factorization method 13 p2363 A70-28724

Atmospheric turbulence effects on acoustic-gravity waves propagation, deriving dispersion relation for phase velocity and propagation constants 14 p2579 A70-31252

Amplitude modulation of ruby and neodymium-doped glass lasers via ultrasonic acoustic wave injection 16 p2926 A70-33162

Acoustic and magnetic surface waves technologies for radar signal processing 16 p2874 A70-33390

Sound wave phase fluctuations from ultrasonic waves traveling through turbulent wakes of circular cylinders and plates, using multichannel pulse height analysis 16 p2839 A70-34086

Plane acoustic wave interaction with elastic spherical shell, discussing effects of membrane, bending, rotatory inertia and shear deformation 16 p2993 A70-34087

Optical system with orthogonal standing waves in liquid used for two dimensional scanning of laser beam in ultrasonic field 18 p3271 A70-37109

Long range infrasound from rockets, showing two wave groups generated by launch and first stage reentry 19 p3531 A70-37694

Sound wave radiation and excitation in plane infinite plate by vortices 19 p3354 A70-38722

High temperature acoustic waves, examining solid and fluid properties, weld integrity nondestructive material tests and nondisruptive process measurement 20 p3628 A70-39170

Nonlinear acoustic absorbers behavior analysis, discussing spectral and temporal computation methods 20 p3672 A70-39237

Perturbation method for nonlinear acoustic wave propagation in steady one dimensional flow through variable cross section duct 20 p3673 A70-39612

Flow rate, momentum and energy perturbations during gas motions through shock wave, discussing acoustic waves impinging from supersonic region 20 p3612 A70-39815

Radio aurora model based on two stream, ion acoustic wave instability, investigating radar backscatter 20 p3623 A70-40465

Collisionless shock wave geometry, determining dispersion relation for ion acoustic waves propagating in plasma 21 p3856 A70-41082

Ion sound system one dimensional hydrodynamic equations, examining formation and interaction of nonlinear ion acoustic shock waves 21 p3857 A70-41384

Continuous pseudoacoustic and ion waves excitation and damping in plasma sheath around grid, taking into account transit time effect on ion acceleration 21 p3858 A70-41710

Collisionless nitrogen plasma drift velocity measurement by ion acoustic wave method 21 p3859 A70-41760

Acoustic surface waves phase velocity on lithium niobate with gold layer for propagation modes, predicting LF cut-off by substrate anisotropy 21 p3863 A70-42001

Acoustic waves in carbon dioxide at 2-25 torr initial pressures induced by heat from incident carbon dioxide laser pulses 21 p3837 A70-42003

Brillouin effect lines shape dependence on analogous acoustical waves temporal and spatial coherence 21 p3839 A70-42100

Acoustic waves generation from decay region of pulsating supersonic jet expelled from nozzle 21 p3748 A70-42211

Radiation patterns and scattering cross sections of plane black disks excited by electromagnetic and acoustic waves 22 p3984 A70-42391

Monochromatic acoustic wave interaction with turbulent jet fluctuating vorticity field, using Fourier analysis to extend spectral relations [ASME PAPER 70-FLCS-6] 22 p4008 A70-42426

Acoustic frequency spectra of transverse vibrations in bracketed bar caused by dry friction, using Lagrange method 22 p4073 A70-42612

Elastic cylindrical shell transient response to plane acoustic shock wave traveling through light fluid medium 22 p4114 A70-42647

Compressional sound waves electromagnetic generation in metals in static magnetic fields, examining acoustic amplitude variations 22 p4074 A70-42968

ELF acoustic gravity wave arrival from Apollo launches recorded by Doppler shift ionospheric sounder channeled near mesopause and lower thermosphere 23 p4187 A70-43859

Far field diffraction spreading of surface acoustic waves on cut Li-niobate in two directions 23 p4230 A70-44199

Fatigue crack growth detection by acoustic emission techniques 23 p4194 A70-44214

Gravitational acoustic wave emission in isothermal stellar atmosphere with mass sources 23 p4242 A70-44267

Sound radiation from unflanged circular waveguide duct with flow, calculating reflection coefficients, directivity pattern and power for comparison with approximate methods 23 p4219 A70-44392

Bunched ion bursts amplitude modulation effects on nonlinear ion acoustic waves in grid plasma system 23 p4229 A70-44989

Ion acoustic wave propagation in collisionless gravity-supported plasma in static magnetic field calculated from linearized Vlasov equation 24 p4382 A70-45109

Acoustic plasma wave excitation by transverse electromagnetic wave beam, calculating LF instabilities and energy losses 24 p4384 A70-45149

Single crystal piezoelectric materials growth characteristics and wave propagation properties for surface acoustic wave applications 24 p4367 A70-45399

Electron plasma oscillations excitation by ion acoustic waves 24 p4386 A70-45607

SOUNDERS
U SOUNDING

SOUNDING
NT BALLOON SOUNDING
NT IONOSPHERIC SOUNDING
NT ROCKET SOUNDING
IR equipment on Tiros and Nimbus 1 and 2 satellites, describing vertical atmospheric sounding 03 p0492 A70-13833

Meteorological guns for synoptic sounding of stratospheric circulation, discussing system characteristics and operations 07 p1250 A70-20280

SOUNDING ROCKETS
NT AEROBEE ROCKET VEHICLE
NT ANTARES ROCKET VEHICLE
NT APACHE ROCKET VEHICLE
NT ARCAS ROCKET VEHICLES
NT SKUA ROCKET VEHICLES
NT SKYLARK ROCKET VEHICLE
Burning program for sounding rocket to reach maximum altitude with given initial and propellant masses, discussing numerical parameter optimization technique 01 p0161 A70-10150

Graphical method for determining sounding rocket attitudes from optical sensor and flux gate magnetometer data 01 p0196 A70-10841

Time optimal attitude control for alignment of spin stabilized sounding rocket, discussing feedback control system 03 p0580 A70-13805

Parachute design for decelerating upper atmosphere rocket probes at high altitudes, using high drag coefficients in Stokes flow regime [AIAA PAPER 68-949] 04 p0624 A70-15410

Sounding rocket Vera 15 design with emphasis on operation safety, discussing payload capacity 04 p0765 A70-15669

Fluidics application in sounding rocket guidance control circuits used in space boosters 05 p0797 A70-15809

Response characteristics of height-based and time-based wind reduction techniques for meteorological rocketsondes 05 p0879 A70-17101

Meteorological Rocket Network for limited synoptic inspection of stratospheric circulation 07 p1273 A70-20252

Meteorological rocket system Meteor 1 firing procedure 07 p1395 A70-20254

PWN-8B meteorological rocket system for synoptic investigation of stratospheric circulation, describing sensor system deployment for descent measurements of wind and temperature 07 p1395 A70-20255

Kookaburra meteorological rocket system for sounding stratospheric circulation, describing instrument payload deployment for descending wind and temperature measurements 07 p1395 A70-20257

Parachute wind sensors used in Arcas and Loki sounding rocket systems for stratospheric sounding, describing position data acquisition via radar tracking 07 p1395 A70-20259

Temperature measurement in stratospheric circulation by meteorological rocketsonde wire sensor, presenting error correction technique 07 p1289 A70-20264

Meteorological rockets fired in Spain, obtaining stratospheric wind and circulation data 07 p1396 A70-20278

Quality planning for Japanese solid propellant sounding rocket motor production, discussing documentation, design, development and process controls, inspection and tests, etc 09 p1691 A70-22570

Nose cone modifications for Meteor-1 meteorological sounding rocket used for wind velocity measurements 09 p1767 A70-23406

Sounding rockets impact dispersion associated with wind measurement errors and thrust misalignments, discussing correction via reduced aerodynamic stability and initial rocket spin 13 p2503 A70-28677

Industry role in sounding rocket program, highlighting activities in various areas 13 p2523 A70-28679

Sounding rocket telemetry systems, discussing use of PCM and thick film techniques 13 p2363 A70-28681

Petrel payloads taking into consideration rocket stability after launch and compartment design 13 p2503 A70-28683

British national and Commonwealth collaborative sounding rocket programs, discussing organization, scope and range facilities 13 p2523 A70-28685

INTA-255 ionospheric sounding rocket, describing vehicle and launcher design, test firings, ground facilities, etc 13 p2504 A70-28686

- Altimeter-telemetry system for small sounding rockets, discussing ground and flight test results
13 p2363 A70-28688
- SR-1 hybrid propellant engine for sounding rockets, describing design and operating characteristics
13 p2474 A70-28689
- ESRange-high altitude sounding rocket range for European space research, discussing location, safety, equipment, instrumentation, staff and programs
13 p2523 A70-28690
- Petrel sounding rocket design and performance
13 p2504 A70-28692
- Petrel sounding rocket performance and facilities, describing rocket firings at Hebrides range
13 p2504 A70-28693
- Balloon flight measurements clarifying Arcasonde sensor bias over radiosonde atmospheric temperature data
14 p2585 A70-30570
- Pitot probe for high altitude atmospheric density measurements integrated with telemetry system mounted on two stage Super Loki sounding rocket
14 p2585 A70-30576
- Parachute altitude wind sensor (PAWS) project for real time wind profile determination, using modified HASPI sounding rocket
14 p2585 A70-30577
- Report to COSPAR on Australian space research /1969/ including tracking stations, sounding rockets, technology utilization, etc
15 p2829 A70-31706
- Report to COSPAR on space research in Pakistan, covering rocket, satellite and ground based investigations, etc
15 p2830 A70-31718
- Meteorological rocket probing, noting 100 and 170 km range probes in U.S.S.R., thermobaric maps and aerological stations for high altitude aviation
15 p2771 A70-32108
- Upper atmosphere sounding vehicle /Bora-Sond/, describing payload section, launch acceleration, apogee time, weight and length, staging, etc
15 p2811 A70-32259
- Sounding rockets safe operation and handling, examining ground and flight factors
16 p2981 A70-32923
- Atmospheric temperature and wind data before, during and after solar eclipse of 7 March 1970, using ARCAS meteorological rockets
16 p2977 A70-33828
- Japanese sounding rockets for space research, discussing missions, launchings, flight tests, etc, of Kappa and MT-135 rockets and M-45 launch vehicle
17 p3177 A70-35205
- UK space program, describing scientific satellites, Black Arrow launch vehicle and sounding rockets
17 p3167 A70-35206
- Bora-Sond atmospheric probe providing two stage minimum cost high altitude sounding for supersonic transport /SST/, discussing hot water propulsion system
17 p3178 A70-35257
- Electrical power supply systems for meteorological sounding rockets under vibration, acceleration and temperature variation conditions during flight
18 p3215 A70-36251
- Mechanical passive cone angle amplifier for spinning sounding rockets for IR sky scanning, solving equations of motion for system
21 p3931 A70-41905
- Sounding rockets dispersion, considering deviations from predicted point of impact due to wind effects, thrust vector errors and manufacturing inaccuracies
23 p4262 A70-44845
- High performance reaction pointing control systems for sounding rockets, using proportional control of differential thrust and adaptive control of thrust magnitude
24 p4415 A70-45861
- British National and Commonwealth collaborative sound rocket programs, discussing organization, scope and range facilities
24 p4431 A70-46124
- SOUTHERN HEMISPHERE**
- NT ANTARCTIC REGIONS**
- Meteor rate data tabulated from controlled parameter radar survey of Southern Hemisphere activity, noting diurnal and annual variations
05 p0907 A70-16001
- Earth and atmosphere effect on solar radiation balance in Southern Hemisphere
06 p1054 A70-17413
- Interhemispheric mass exchange as function of eddy transfer and meridional circulation
08 p1539 A70-21922
- Middle stratospheric circulation in Southern Hemisphere, associating temperature changes and ozone content with planetary wave passage in Antarctic polar vortex
14 p2568 A70-30123
- F 2 layer ionization asymmetry for Northern and Southern Hemispheres during solstice periods due to electron density variations and aeronomic conditions
14 p2569 A70-30206
- Magnetic activity intensity comparison in Northern and Southern hemispheres, noting correlation with solstices and equinoxes
14 p2580 A70-31260
- Exospheric density at opposite hemispheres, showing variations from winter helium bulge
15 p2724 A70-31679
- Upper stratosphere and mesosphere structure and circulation in Southern Hemisphere, using meteorological rockets and radiosonde data
15 p2724 A70-31683
- Comet Bennett 1969 visual observations in Southern Hemisphere, using photometer ocular
18 p3319 A70-37049
- Atmospheric ozone longitudinal variation in lower middle latitudes of Southern Hemisphere
18 p3256 A70-37117
- Meridional mean eddy transport of enthalpy in Southern Hemisphere during IGY, comparing results with Northern Hemisphere
20 p3661 A70-39143
- Southern objective prism plates B stars with strong neutral He I absorption lines
21 p3890 A70-41160
- F 2 layer ionization asymmetry for Northern and Southern Hemispheres during solstice periods due to electron density variations and aeronomic conditions
24 p4330 A70-46281
- SOVEREIGNTY**
- Legal implications of national flags on moon as symbols of national sovereignty, considering spacecraft and lunar colonies legal status by international agreements
07 p1426 A70-18877
- Line of demarcation of national sovereignty between air space and free space
12 p2334 A70-27009
- Human and divine aspects of space law, discussing ownership and sovereignty problems connected with space and celestial body exploration and utilization
16 p3004 A70-34344
- Juridical status and sovereignty of rocket launching and cosmic stations in international law
17 p3202 A70-35786
- SOYUZ SPACECRAFT**
- Radiation level recordings during Soyuz manned orbital flights indicating safety standards maintenance
03 p0580 A70-13704
- Soviet space activities /1969/, discussing Soyuz orbital flights, Venera probes, Zond lunar orbiters and Proton 4 space laboratory scientific results
05 p0917 A70-16862
- Cold pressure welding of space station tested on Soviet Soyuz spacecraft
06 p1078 A70-18503
- Radiation level recordings during Soyuz manned orbital flights indicating safety standards maintenance
11 p2121 A70-25504
- Soyuz 6, 7 and 8 group flight as step in Soviet space program to place manned station in earth orbit
11 p2121 A70-25623
- Twilight sky color visual estimation from Soyuz 5 spacecraft noting cloudiness effects
15 p2723 A70-31597
- Monograph on upper atmosphere and outer space studies in U.S.S.R. /1969/ covering Soiuz 4, 5, 6, 7, 8 and Venera 5, 6 flights
15 p2829 A70-31702
- Soyuz-9 manned space mission, outlining craft occupants personal background and statements
15 p2814 A70-32792
- Twilight colorimetry from horizon spectra obtained by Soyuz 5, computing chromaticity coefficients for purely scattering molecular atmosphere
16 p2896 A70-33260
- Physiological reactions of Soyuz 6, 7 and 8 crew during group flights, noting cardiovascular and respiratory reaction to submaximum stresses after flight
17 p3038 A70-35361
- Arc welding in space under high vacuum weightless conditions, describing equipment design and Soyuz 6 experiments
19 p3436 A70-37803
- Medical monitoring system onboard Soyuz spacecraft, describing equipment design, data acquisition and analysis, telemetric recordings, etc
20 p3581 A70-40193
- Soyuz and Apollo spacecraft on board computers, discussing design, guidance, navigation and requirements
21 p3793 A70-41071
- Astronaut physiological monitoring aboard Soyuz spacecraft
22 p3980 A70-43691
- Spectrophotometry of earth surface from manned Soyuz spacecraft, obtaining transfer function of atmosphere by aircraft flights
23 p4191 A70-44636
- Astronaut work capacity and adaptation during long term flight of space vehicle Soyuz-9
23 p4154 A70-44651
- SPACE**
- Space three dimensionality compared with Huygens principle via quantum mechanics, discussing past and current theories and empirical arguments
24 p4380 A70-45643
- SPACE BASES**
- Artificial gravity simulation effects on human performance in space base
24 p4417 A70-45938
- NERVA Technology Reactor design integrated with Brayton cycle space power conversion systems, considering space bases and shielding analysis
24 p4377 A70-45955
- SPACE BIOLOGY**
- U EXOBIOLOGY**
- SPACE BUSES**
- U FERRY SPACECRAFT**
- SPACE CAPSULES**
- NT ESCAPE CAPSULES**
- NT MERCURY SPACECRAFT**
- Display systems used in space capsule window simulation for flight training, discussing erecting eyepieces, field of view and exit pupils
01 p0058 A70-10814
- Dry heat resistance of bacillus subtilis var. niger spores on selected planetary lander capsule surface materials
04 p0645 A70-15442
- Sterilized solid propellant motors applicability to planetary landing capsule spin stabilization
07 p1365 A70-19716
- Differential thermal analysis-effluent gas analysis /DTA-EGA/ experiment for lightweight Martian landed capsule
11 p2050 A70-25802
- Rough-landing space capsule for omnidirectional touchdown in lunar and Martian missions, tabulating design characteristics and functional capabilities
11 p2123 A70-26053
- Lunik 16 lunar probe recovery technique, using steep angle and high deceleration reentry trajectory for unmanned capsule
23 p4257 A70-44096
- SPACE CHARGE**
- Double injection in semiconductors at high current densities, discussing procedure yielding space charge and field distribution and voltage drop
01 p0154 A70-10123
- Space charge barriers AC impedance modification at metal/semiconductor contacts due to trapping
01 p0157 A70-10296
- Space charge injection-impulse voltage separation technique for nonuniform field breakdown phenomena
01 p0110 A70-10560
- Electron flux interaction with electromagnetic field in comb type waves via linear approximation assuming small space charge
03 p0447 A70-13291
- Atmospheric space charge magnitude and polarity below 50 km based on rocket probes
04 p0675 A70-14437
- Neutron induced defect clusters in high field space charge region of Si p-n junctions, noting rate of volume damage dependence on electric field strength
04 p0730 A70-14728
- Neutron irradiation effect on space charge limited current of electrons in high purity silicon, noting SCLC sensitivity in detecting traps and changes
04 p0731 A70-14730
- Ion implantation for reducing space charge buildup in thermal oxides on silicon exposed to ionizing radiation
04 p0731 A70-14743
- Magnetron electron beam amplifier large signal operation analysis using model with thin beam to calculate space charge
05 p0823 A70-16884
- Optimal electron bunching in two cavity klystron by varying parameters and nonlinear one dimensional approximation
05 p0823 A70-16888
- Convection currents calculation in multicavity klystron allowing for space charge forces influence
05 p0823 A70-16889
- Phase velocities of intrinsic normal waves of electron beam in three frequency parametric amplifier of space charge waves, determining optimal wave interaction conditions
05 p0823 A70-16890
- Convergent ribbon electron beam shaping for vacuum welding with double anode gun, considering space charge effect
06 p1076 A70-17784
- Plasma polarization shift for resonance line of ionized He in shock tube due to negative space charge
07 p1348 A70-19273
- Hydrodynamic stability criterion of isolating incompressible fluids subjected to unipolar space charge injection
09 p1737 A70-23311
- Cylindrical magnetrons steady state characteristics with thick and infinitely thin cathodes for full space charge and inclined magnetic field
09 p1651 A70-23641

Space charge parameters influence on electron wave and traveling wave interactions in TWT
09 p1652 A70-23654

Electrostatic energy converter load current analysis, deriving expression for space charge electric field with axially varying or constant charge distribution
10 p1808 A70-25036

Amplitude and phase constants of interacting waves in three frequency nondegenerate parametric amplifier of fast space charges using coupled wave technique
10 p1853 A70-25133

Space charge sheath electric thruster principles, construction and performance using laboratory test model
[AIAA PAPER 69-282] 11 p2102 A70-26121

Dispersion relation derived for space-charge waves propagating in thick Gunn diode, showing validity limit of one dimensional approach
12 p2194 A70-27164

Read-diode microwave oscillators performance degradation due to space charge and series resistance, discussing RF power optimization
12 p2194 A70-27167

Atmospheric space charge magnitude and polarity below 50 km based on rocket probes
13 p2392 A70-28462

Electrostatic probes response due to thermionic electron emission, considering I-V characteristics and space-charge-limited current
13 p2459 A70-28635

Electric field intensity and extension of space charge sheath for ion extraction from nitrogen plasma
14 p2622 A70-30661

GaAs epitaxial layered wafer natural CW R band oscillations in LSA mode
14 p2550 A70-30688

Coulomb force effect on electron beam spatial charge for optimal three resonator transit type klystron, regarding buncher length
15 p2707 A70-31507

Spectral distribution of GaAs photoconductivity, allowing for coordinate dependence of minority carrier lifetime in surface space charge region
15 p2782 A70-31626

Space charge waves in electron beams with velocity distribution, considering dispersion equation and Landau damping
15 p2708 A70-31831

Electric space charge pulse density measurements near ground in sunny weather related to free convection
15 p2726 A70-31868

Photovoltaic effects in diodes with generation-recombination process in space charge region
15 p2709 A70-32427

Millimeter wave amplification by pumped n-type gallium arsenide oscillating in limited space charge accumulation mode
16 p2875 A70-33399

Thermal noise in space charge limited solid state diodes by Langevin equation, relating spectral intensity for open and short circuit voltage and current
16 p2878 A70-33694

Space charge sign distribution sounding in atmosphere by electrode potential difference measurement
18 p3246 A70-36180

High resistance space charge region formation near crystal cathode in GaAs due to limited contact emissive capacity
18 p3297 A70-36417

Colloid annular thruster performance, using low mass flow rate data and space charge formulas
[AIAA PAPER 70-1113] 20 p3692 A70-40230

Gunn oscillation stabilization in layered semiconductors based on space charge growth reduction via two-stream interaction between GaAs diode and passive bias semiconductor
23 p4230 A70-44196

Ion source emitter plasma column generated by electron beam injection through gas filled chamber, compensating ion space charge with fast discharge electrons
24 p4385 A70-45451

Light reflectance from optically inhomogeneous medium due to space charge near semiconductor surface
24 p4390 A70-45661

Spin waves amplification in ferromagnetic conductor crystals, taking into account arbitrary external electric field and propagation vector orientations and space charge
24 p4392 A70-46363

SPACE COMMUNICATION
NT INTERPLANETARY COMMUNICATION
NT LUNAR COMMUNICATION
NT REENTRY COMMUNICATION
NT SPACECRAFT COMMUNICATION

Laser communication system for outer space, beam guiding and fiber optical guiding systems
04 p0649 A70-15038

Electrical and mechanical characteristics and specifications of second parabolic reflector antenna at Pleumeur-Bodou space communications center
05 p0819 A70-15982

Electrical and hydraulic units controlling second antenna at Pleumeur-Bodou space communication center
05 p0819 A70-15984

Antenna-central building connecting equipment at Pleumeur-Bodou space telecommunication center, discussing frequency compression demodulators
05 p0819 A70-15985

Transmission equipment of Pleumeur-Bodou space communication installation including modulators, converters and amplifiers for telephone and TV carriers
05 p0819 A70-15986

Practical codes in digital space communication systems, reviewing Shannon information theory theorems
15 p2698 A70-31963

Repeater and antennas for space telecommunications onboard ELDO STV-F9 satellite, describing tests and measurements
15 p2811 A70-32282

Deep space optical communications link, fabricating operational prototype of flight hardware for spaceborne terminal
16 p2863 A70-33190

Mars photography from flybys and orbiters, communicating planetary scene information to eye-brain receiver of earth based interpreters
16 p2912 A70-33976

Mechanically despun multifrequency, attitude sensing antenna for spin stabilized spacecraft, deep space probes, tactical communications and community broadcast applications
16 p2986 A70-34159

Book on law relating to activities of man in space covering liability, space communication, international organization, military implications, etc
19 p3553 A70-37676

Optical communications in space, considering multiple access low earth orbit-to-synchronous and synchronous-to-synchronous links
19 p3379 A70-37878

Deep space microwave and optical communications, describing ground tour requirements
21 p3784 A70-40546

Millimeter wave space-to-space and space-to-ground satellite communication links frequency allocation problems
21 p3787 A70-41335

Carbon dioxide laser systems for various space communication links between ground, satellites and Mars probe
21 p3787 A70-41338

Information theory in physics and engineering, considering data processing, error correction codes, space communication, optical data transmission, noise effects and holography
24 p4379 A70-45616

SPACE DEBRIS
Water vapor homogeneous nucleation in simulated spacecraft debris clouds
22 p4110 A70-43115

SPACE DENSITY
White dwarf luminosity functions based on birth rate, white dwarf space density in solar neighborhood and possible red degenerate stars deficiency
01 p0189 A70-11339

Dynamic spectrum of density fluctuations and galaxy clustering in Einstein universe, considering self gravitation of medium
14 p2652 A70-31389

Universe density estimation by galaxy formation theory, discussing spiral galaxies intergalactic gas thermal radiation and soft X rays
21 p3887 A70-41113

SPACE ELECTRIC ROCKET TESTS
Space electric rocket test /SERT/ II thruster system, discussing flight worthiness and mercury bombardment discharges
[AIAA PAPER 67-700] 07 p1364 A70-19701

SERT 2 thruster system performance over expected mission parameters, noting operational lifetime excess over mission requirements
[AIAA PAPER 69-235] 07 p1364 A70-19702

Passive thermal control system design of SERT II nonspinning satellite based on 534-node analytical model calibrated against test data
11 p2127 A70-26358

Mercury bombardment ion thruster life test in space environment onboard space electric rocket test /SERT/ satellite, describing passive satellite thermal control system design
11 p2127 A70-26606

SERT 2 mercury vapor fed hollow cathode operated in bell jar, determining volt-ampere characteristics and flow rates for plasma diagnostics
[AIAA PAPER 69-258] 13 p2473 A70-28515

Emissive probes for measuring plasma potentials over different ion density ranges on SERT spacecraft, detailing calibration and mechanical and electronic configurations
[AIAA PAPER 69-272] 13 p2404 A70-28519

SPACE ENVIRONMENT
U AEROSPACE ENVIRONMENTS
SPACE ENVIRONMENT SIMULATION
NT WEIGHTLESSNESS SIMULATION

Display systems used in space capsule window simulation for flight training, discussing erecting eyepieces, field of view and exit pupils
01 p0058 A70-10814

Human factors research with simulated reduced gravity conditions by parabolic flight technique with aircraft
[AMRL-TR-69-16] 01 p0037 A70-10962

Life support system model using heart rate to monitor man doing physical work in space suits under simulated space environment
02 p0245 A70-12146

Venus probe high level entry deceleration simulation, discussing test program, equipment and results
03 p0463 A70-13541

Space suit meteoroid protection for extravehicular activity, discussing Gemini and lunar surface EVA suits and bumper concept
[AIAA PAPER 69-366] 04 p0645 A70-15402

Distance discrimination experiment in reduced cue setting simulating outer space, confirming Weber power function exponent
04 p0645 A70-15647

Radiation fluxmeters involving black plates and sensor disk respectively for use in space simulation chambers
05 p0849 A70-16636

Mathematical model for investigating satellite thermal behavior in space based on space simulation in vacuum chamber with walls maintained at liquid nitrogen temperature
05 p0924 A70-17022

Solid lubricants friction and wear bench testing under simulated space environment
06 p1075 A70-17340

Thermal efficiency of modified transtage of Titan 3C spacecraft, discussing environmental simulation, heat rejection system and test firing
[AIAA PAPER 70-171] 06 p1156 A70-18027

Laboratory simulation of interactions between ionospheric plasma and diverse spacecraft systems
06 p1029 A70-18067

Interplanetary plasma flow past earth and planets simulation using kinetic equations
06 p1147 A70-18292

Satellite wake in ionosphere simulated in cold ion plasma without magnetic field, observing complex far wake structure and peculiar electrostatic probes response
06 p1147 A70-18297

U.S., U.S.S.R. and European space environment simulation chambers accommodating assembled spacecraft for thermal tests, describing design and characteristics
07 p1249 A70-19659

Solar simulation /SISS/ for evaluating human visual system performance in contrasting space environment
09 p1655 A70-22680

Space environment simulation chamber free from oil molecules contamination
09 p1655 A70-22830

Thermal vacuum simulator for testing manned Lunar Module Test Vehicle, using conformal skin heaters to control heating rates and skin temperature
09 p1656 A70-23241

Simulated degrading environment effect on spacecraft thermal control surfaces subjected to plume heating during apogee firing and solar irradiation
[AIAA PAPER 69-1024] 09 p1657 A70-23259

Solar simulator built into multiwall ultrahigh vacuum chamber, describing simulator and chamber modifications
[AIAA PAPER 69-1001] 09 p1657 A70-23264

Apollo lunar module manned testing in thermal vacuum, emphasizing safety aspects of hardware, procedures and training
10 p1859 A70-24389

Environmental engineering at NASA MSC, surveying Lunar Receiving Laboratory, microbe incinerator, radon adsorption, Apollo Post-Landing Environmental Test Tank and vacuum chamber
10 p1860 A70-24411

Aerospace vehicles structural vibration environments prediction methods emphasizing vibration sensor mounting resonances
[AIAA PAPER 70-402] 10 p1959 A70-24903

Apollo lunar module mechanical acceptance tests evaluation based on reported flight anomalies review
[AIAA PAPER 70-401] 10 p1951 A70-24904

Ar-arc-produced dust of iron, carbon, silicon carbide and silica, investigating shapes, sizes, grouping and optical absorption to simulate interstellar grains
10 p1944 A70-24957

Laboratory simulation for shock waves around earth, moon and Venus based on artificial solar wind and magnetic dipole interaction study
10 p1948 A70-25182

Radiation environmental model of synchronous communication satellite solar cell degradation by particle fluxes
[AIAA PAPER 70-481] 11 p2103 A70-25411

Wakes of cylinder in collision-free plasma wind tunnel simulating ionospheric satellite conditions, noting decaying oscillation

11 p1976 A70-26018

Test model thermal balance in space simulator, measuring effects of solar simulator irradiance reflected from carbon dioxide cryopanel deposits

[AIAA PAPER 69-1012] 11 p2149 A70-26153

Comet tail simulation by using fast acting gas valve to produce gas cloud for interaction with plasma stream

12 p2298 A70-27190

Pressure measurements and gas flow analysis during thermal vacuum tests of manned spacecraft indicating adequate space vacuum simulation

[AIAA PAPER 69-1033] 13 p2384 A70-28518

Stomatologic diseases during prolonged space flights simulation, discussing gingivitis, stomatitis, dental caries, parodontitis and odontogenous inflammations

13 p2352 A70-29338

Space environment simulators and test facilities for solar cells and arrays, describing solar and magnetic field simulators and universal battery charger

13 p2385 A70-29555

Seed germination in simulated planetary atmospheres, considering biological responses of various organisms

14 p2537 A70-30692

Simulated Venusian atmosphere effects on polymeric plastic and rubber materials, comparing with high temperature air and nitrogen exposures

14 p2640 A70-30781

Mission simulation testing in thermal vacuum environment for Apollo Lunar Module, noting conformal skin heaters

[AIAA PAPER 69-991] 15 p2718 A70-32515

U.S., U.S.S.R. and European space environment simulation chambers accommodating assembled spacecraft for thermal test, describing design and characteristics

15 p2718 A70-32696

Apollo telescope mount postmanufacturing checkout under simulated mission environment, ensuring flight readiness

16 p2889 A70-33723

Instrument size ball bearings lubricated with bonded dry or transfer films in simulated interplanetary spacecraft tests

16 p2923 A70-34166

Space molecular sink simulator facility /Molsink/ for extreme high vacuum outer space environment simulation, discussing Mariner Mars 1969 spacecraft components tests

16 p2889 A70-34167

Solar alignment, control, intensity scanner and data collection for large Space Environmental Simulator

17 p3058 A70-35155

Test machine for partial gravity environment simulation for aerospace subsystem testing in vacuum chamber

17 p3060 A70-35181

Cryopumping systems of ultrahigh vacuum space environmental chambers

17 p3060 A70-35247

Adenosine triphosphate and vitamins /amitetraviv/ as prophylactics against radiation injuries in dogs during simulated space flight

17 p3038 A70-35351

Plasma induced radio frequency interferences from DC-DC converter to receiving antenna simulated for REXS satellite in space chamber

17 p3047 A70-35400

Spacecraft simulator using air bearing technique to simulate low friction aspect of environment, considering application to satellite attitude control

18 p3236 A70-36064

Thermal conductivity of particulate basalt as function of density in simulated lunar and Martian environments, noting temperature and pressure effects

18 p3316 A70-36772

Aerospace coldness and vacuum simulation, discussing uses of cryogenic, titanium sublimation, ion and molecular pumps

19 p3396 A70-37462

Space simulation for satellites and space probes - Conference, Aachen, Germany, March 1970

19 p3397 A70-38276

Space environment simulation installations design, discussing aerospace industry requirements

19 p3554 A70-38278

Space environment simulation in terrestrial laboratories, discussing test instruments and procedures

19 p3398 A70-38279

Vacuum pump systems properties for space environment simulation installations

19 p3358 A70-38280

Space cold simulation installations, discussing cold wall design

19 p3398 A70-38281

Solar simulator combined with space environment simulation chamber for thermal tests of artificial satellites

19 p3398 A70-38283

Space corpuscular radiation simulation to obtain data for increased spacecraft life

19 p3511 A70-38284

Space simulation for satellites and space probes - Conference, Aachen, Germany, March 1970

19 p3398 A70-38285

Magnetic perturbations effect neutralization for satellite attitude stabilization by real time simulation of satellite angular motion in magnetic field

19 p3399 A70-38286

Thermal space simulation tests on Azur research satellite relating to temperature control subsystems and qualification and acceptance procedures

19 p3399 A70-38288

Spacecraft test programming at test facilities providing vacuum and thermal space simulation suggested by Azur and Dial satellite development experience

19 p3399 A70-38290

Heos 1 research satellite space simulation tests at ESTEC test facility

19 p3399 A70-38292

German papers on space simulation for satellites and space probes, covering spacecraft structures measurement and magnetic parameters, motion simulators, thermal vacuum tests, etc

19 p3400 A70-38294

Azur satellite magnetic parameters simulation, noting spacecraft structure effect

19 p3400 A70-38295

Space motion simulators for Azur satellite, considering satellite attitude related to sun

19 p3400 A70-38296

Signal measurement and processing in thermal vacuum and space simulation tests of Azur and Dial satellites

19 p3400 A70-38298

Space environment simulation and thermal vacuum tests for satellite thermal balance during development

19 p3401 A70-38300

Thermal error in temperature differences between actual and simulated space environment

19 p3401 A70-38301

Space environment simulator for thermal vacuum performance of artificial satellites and components

19 p3401 A70-38308

Space environment simulation chamber for testing of equipment temperature and satellite thermal model

19 p3402 A70-38897

Systemic bacterial infection resistance in white mice exposed to simulated hypobaric normoxic space cabin environment

20 p3572 A70-39431

Laboratory simulation of interactions between ionospheric plasma and diverse spacecraft systems

[AIAA PAPER 70-169] 20 p3606 A70-39695

Solar wind effects on thermal control coatings reflectance and absorbance, noting simulation and thermophysical measurement requirements

[AIAA PAPER 70-833] 20 p3655 A70-39825

Simulated space flight radiation effects on dogs DNA synthesis and bone marrow cell differentiation

20 p3575 A70-40191

Surface contamination and degradation effect on reflectance of evaporated vacuum UV mirrors and temperature control coatings under simulated space environments

21 p3842 A70-40815

Integrated temperature and humidity control and water recovery subsystem for manned test in space station simulator

21 p3769 A70-40998

Thermal scale modeling of heat pipe in deep space, using material and heat flux preservation techniques

21 p3946 A70-41048

Apollo spacecraft tests in Space Environment Simulation Laboratory, discussing thermal data, astronaut training, extravehicular activity, reaction control system, etc

21 p3805 A70-41271

Copper disulfide-cadmium sulfide thin film solar cell degradation under simulated low orbit conditions, investigating thermal stress

21 p3759 A70-41313

Electron pulse generator for imaging of glass microspheres simulating meteorite flight and impact in evacuated vessel

[SMPT PREPRINT 96] 22 p4036 A70-43059

Water vapor homogeneous nucleation in simulated spacecraft debris clouds

22 p4110 A70-43115

Man-rated chamber facilities at Manned Spacecraft Center /MSC/, discussing safety requirements and criteria, environmental test chamber design and test results

23 p4152 A70-44458

Artificial gravity simulation effects on human performance in space base

[AIAA PAPER 70-1329] 24 p4417 A70-45938

SPACE ENVIRONMENTAL LUBRICATION

U SPACECRAFT LUBRICATION

SPACE ERECTABLE STRUCTURES

NT BEACON SATELLITES

NT EXPLORER 22 SATELLITE

Deployment systems for extending large area lightweight flexible solar arrays in space, tabulating estimated design weights including power-weight ratios

02 p0228 A70-11932

Expandable space hangar with composite wall for orbiting maintenance shelter, providing radiation and meteoroid protection for occupants

02 p0380 A70-11934

Spacecraft boom design and performance, including Russian spacecraft photographs

16 p2985 A70-34137

Thermal and mechanical properties of materials for spacecraft booms design

16 p2986 A70-34138

Storable tubular extendible member /STEM/, discussing advantages of BI-STEM for erecting unfurlable structures in space

16 p2846 A70-34141

Closed tubular extendible boom /Multiple Applications Storable Tube/ design, fabrication and applications, including stress factors and materials

16 p2846 A70-34142

Space erectable boom with interlocked seam, perforations and coatings to provide torsional rigidity and thermal stability

16 p2986 A70-34143

Dynamics of deployable space structures stiffened by centrifugal forces due to spin, discussing LF radio telescope

21 p3931 A70-41854

Rotating cable-connected orbital space stations deployment dynamics, considering cable mass and motion equation

23 p4258 A70-44529

SPACE EXPLORATION

NT VIKING MARS PROGRAM

Solar and nuclear electric propelled spacecraft applications to planetary and interplanetary missions, considering asteroid survey, out-of- ecliptic, Mercury orbiter, comet rendezvous, etc

[AIAA PAPER 69-1108] 01 p0181 A70-10619

Interplanetary space investigation by HEOS 1 satellite during maximum solar activity, discussing orbital apogee, mission and technical requirements

01 p0186 A70-11113

IR systems in military intelligence and space research including aerospace and planetary investigations, discussing IR detection and IR and earth radiation

01 p0144 A70-11255

Slow scan TV systems for planetary exploration, discussing sampled vidicon operation, digital encoding, data storage, signal to noise ratio, future design trends, etc

[SMPT PREPRINT 106-3] 02 p0294 A70-11682

Solar electric propulsion /SEP/ for automated planetary missions, discussing system characteristics, capabilities and costs

[AIAA PAPER 69-1103] 02 p0382 A70-12531

Space exploration, discussing nationalism, technological benefits, etc

02 p4042 A70-12629

HEOS-A2 project development plan for investigating unexplored interplanetary space in eccentric orbit

05 p0923 A70-16588

Electric propulsion system and initial gross weights estimation for manned Mars missions

05 p0924 A70-17093

Low thrust trajectory and performance analysis of solar electric propulsion system for unmanned interplanetary exploration

[AIAA PAPER 70-212] 06 p1145 A70-18081

Outer solar system exploration, discussing swifby and junction missions, Jovian satellite grand tours, mission energy requirements, etc

[AIAA PAPER 70-58] 06 p1147 A70-18229

Unmanned exploration program to study magnetic fields and chemical composition of five outer planets in solar system

07 p1375 A70-18871

International law applicability to national activities regarding exploration and use of space, examining Space Treaty and UN resolutions

07 p1426 A70-18879

Space role in competition between U.S. and U.S.S.R. since August 1957, discussing armament control agreements regarding space

07 p1426 A70-18882

Book on space observatories covering rocket mounted telescopes for atmospheric structure, opaque wall, air diffusion, clouds and refraction, particle bombardment, meteorite melting, etc

07 p1379 A70-19099

UN treaty based on U.S.-U.S.S.R.-UK agreement banning nuclear arms in space and establishing international law covering space exploration

07 p1428 A70-19106

Peaceful uses of outer space, discussing committee reports and recommendations, direct broadcast satellites, administrative and financial implications, etc

07 p1428 A70-19688

Astronomy role in physical science and space exploration

10 p1940 A70-24373

Space engineering, flight instrumentation features and spacecraft subsystems integration problems
10 p1950 A70-24610

Mass spectroscopy for solar system exploration, discussing ion sources, mass analyzers and ion detectors meeting mission requirements
10 p1942 A70-24612

Lunar and planetary surface chemical composition analysis using neutron inelastic scattering as optimum for unmanned missions
10 p1942 A70-24613

High energy neutron activation method for remote extraterrestrial in situ rock surface constituents analysis
10 p1932 A70-24614

Recovered extraterrestrial material, considering analysis, mass spectroscopy, emission spectroscopy, flame photometry, etc
10 p1942 A70-24615

Interstellar flights, discussing human limitations, star systems with habitable planets and possible galactic communities
10 p1943 A70-24759

TRW space program to 1978, discussing lunar optical observatory, orbital radio astronomical observatory, satellite applications, planetary exploration spacecraft, etc
10 p1951 A70-24875

Nuclear propulsion systems types, discussing relative capabilities and future roles in aerospace applications
11 p2082 A70-26055

Unmanned exploration of planetary surfaces in preparation for manned landings, describing Surveyor lunar probes
11 p2112 A70-26056

Mankind role in cosmos as function of self realization developed by science and technology
11 p2153 A70-26057

Nuclear pulse propulsion system for manned missions to outer planets of solar system, discussing energy and travel time requirements
11 p2082 A70-26059

Lunar and planetary exploration costs and technology, discussing role of nuclear propelled passenger vehicles
11 p2082 A70-26061

Outer solar system exploration, discussing planetary data, interplanetary environment, atmospheric models, data acquisition, etc
11 p2112 A70-26062

Solar system and interstellar space exploration phases, manned and unmanned missions, meta and microprobes, propulsion systems, etc
11 p2112 A70-26063

Interstellar exploration mission profiles, considering technical constraints, propulsion modes, environmental hazards, spacecraft communications and control, etc
11 p2112 A70-26065

Spacecraft propulsion systems selection for particular exploration missions including planets, comets and interstellar space
11 p2112 A70-26066

Orbital laboratories role in planetary manned exploration, discussing flyby missions, flyby/lander modes, periodic orbits, etc
12 p2314 A70-27748

Space information systems effectiveness evaluation based on generalized homomorphous model
13 p2372 A70-28377

Unmanned vehicles for planet surface exploration, discussing design and control using self adjusting and logic circuits
13 p2384 A70-28418

Soviet lunar and interplanetary space missions during 1969 including Venera, Cosmos, Luna and Meteor satellite activities
13 p2505 A70-28901

Dual mode algorithm for routing unmanned autonomous roving vehicle around obstacles on planets, using dynamic programming and terrain information [JPL-TR-32-1484]
14 p2655 A70-31183

Monograph on upper atmosphere and outer space studies in U.S.S.R. /1969/ covering Soiuz 4, 5, 6, 7, 8 and Venera 5, flights
15 p2829 A70-31702

Report to COSPAR on East German space research including Intercosmos satellites scientific apparatus preparation, meteorological and ionospheric research, etc
15 p2830 A70-31712

Report to COSPAR on Greek space research /1969/ covering big planets observations, solar activity, ionospheric propagation, airglow measurements, satellite trackings, etc
15 p2830 A70-31714

Report to COSPAR on Japanese space research including satellite, rocket and balloon observations of ionosphere, magnetosphere, interplanetary space, moon, planets, cosmic rays, etc
15 p2830 A70-31720

Report to COSPAR on space exploration research in Poland including satellite tracking, geodesy, meteorology and aerospace medicine
15 p2830 A70-31721

COSPAR report on UK space research /1969/ covering neutral atmosphere, ionosphere, solar radiation, etc
15 p2831 A70-31723

Mars geology, discussing polar caps phenomena, diurnal variations, orbital eccentricity, seasonal meteorology, volcanism, erosion, etc
15 p2800 A70-32059

Reliability factors in design and development staging systems /DDSS/ for military and space exploration programs
15 p2747 A70-32639

Outer space exploration and utilization, analyzing 1967 UN treaty provisions from standpoint of war potential inherent in space stations existence
16 p3003 A70-33100

Human and divine aspects of space law, discussing ownership and sovereignty problems connected with space and celestial body exploration and utilization
16 p3004 A70-34344

Future manned planetary missions with reusable nuclear shuttles, comparing operating modes in terms of propellant requirement, costs, complexity, etc [AAS PAPER 70-040]
17 p3155 A70-34781

Outer planets exploration program using unique planetary alignment in 1977, discussing mission profiles, spacecraft designs, etc [AAS PAPER 70-028]
17 p3155 A70-34797

Unmanned flyby missions to Mercury in 1973-1990, discussing scientific objectives and payloads [AAS PAPER 70-027]
17 p3155 A70-34798

Slow scan TV systems for planetary exploration, discussing sampled vidicon operation, digital encoding, data storage, signal to noise ratio, future design trends, etc [SMPT PREPRINT 106-3]
17 p3095 A70-35634

Treaty on principles governing activities of states in exploration and use of outer space, appraising various provisions
17 p3173 A70-35792

International juridical discipline of space including moon and other celestial bodies, discussing shortcomings and limitations
18 p3349 A70-36653

Mission success model for unmanned space exploration, combining expected data return with computer technique
19 p3527 A70-38838

Solar system unmanned exploration decision making, discussing resource utilization, sequence optimization, etc
20 p3710 A70-40335

Life detection for unmanned planetary exploration from extraterrestrial sample involving growth, gas changes and carbon dioxide fixation
21 p3769 A70-41003

Scientific motivation for outer planets exploration covering solar system clues, atmosphere comparisons with earth, radiation and planetary radii measurement, etc
21 p3920 A70-41794

Polymers in space research - ACS Conference, Pasadena, July 1968
21 p3781 A70-42126

Planetary probes, orbiting space stations and manned spacecraft in interplanetary flights, discussing Mariner, Gemini and Apollo reentry and Venus landing
22 p4109 A70-42313

Manned space program goals, discussing orbiting observatories, lunar bases, biological and earth resources satellites
22 p4128 A70-43627

Geolunar space development with transportation based on shuttle stations, describing communication, orbits, logistics, etc
22 p4108 A70-43628

International cooperation in space exploration, UN role and benefits for nonspace nations
22 p4128 A70-43632

Full-scanning random arrays with high resolution for space exploration, radio astronomy and long range radar
23 p4160 A70-43770

Jupiter Orbiting Vehicle for Exploration system for gathering Jupiter atmosphere, magnetic, radiation, gravitation, temperature, topography and interplanetary data
23 p4264 A70-45010

Space vehicle for interstellar flight, discussing propulsion concepts, mission implications and international cooperation
23 p4254 A70-45011

Automated mission requirements for outer planets, discussing flyby spacecraft, orbiters, atmospheric entry and grand tour missions [AIAA PAPER 70-1246]
24 p4411 A70-45919

Planetary exploration for solar system origin and evolution, identifying outer planet mission scientific values [AIAA PAPER 70-1244]
24 p4411 A70-45962

Space biological exploration for determining life origin on earth, emphasizing extraterrestrial life possibilities on other planets
24 p4301 A70-46000

SPACE FLIGHT

NT APOLLO FLIGHTS
NT APOLLO 7 FLIGHT
NT APOLLO 8 FLIGHT
NT APOLLO 9 FLIGHT
NT APOLLO 10 FLIGHT
NT APOLLO 11 FLIGHT
NT GEMINI FLIGHTS
NT GEMINI 4 FLIGHT
NT GEMINI 6 FLIGHT
NT GEMINI 11 FLIGHT
NT GEMINI 12 FLIGHT
NT HYPERSONIC REENTRY
NT INTERPLANETARY FLIGHT
NT INTERSTELLAR TRAVEL
NT LUNAR FLIGHT
NT MANNED REENTRY
NT MANNED SPACE FLIGHT
NT RETURN TO EARTH SPACE FLIGHT
NT SPACECRAFT REENTRY
NT VIKING MARS PROGRAM

Skeletal status evaluation in space flight, describing instrumentation for bone mineral measurement and acoustic velocity method for bone elasticity
01 p0032 A70-10369

Mission model construction for power limited systems, discussing flight concepts, propulsion mixes and electric propulsion
01 p0183 A70-10848

Automatic IR control and tracking systems for aviation, space flights and military use, discussing sensor elements
01 p0139 A70-11262

Meteoroid collision hazards of space travel, discussing meteor flux, mass and impact measurements
02 p0360 A70-11668

Soviet book on flight vehicle trajectories covering equations of motion, flight mechanics, reference systems, etc, for rockets and spacecraft
03 p0410 A70-12871

Radiation damage recuperation process in living organisms and justified risk dose in prolonged space flights using Blair model
03 p0423 A70-13705

Soviet engineering reference book on space flight technology covering astronomical and geophysical data, flight mechanics, vehicles and systems
04 p0761 A70-14703

Three man space escape system, describing emergency situations, parachute descent, life raft design, rescue operations and engineering tests [AIAA PAPER 68-936]
04 p0763 A70-15403

Soviet monograph on optimal space flight trajectory control, covering vehicle CG trajectory and synthesis of automatic stabilization system using variational calculus
04 p0764 A70-15493

Collection of papers on spaceflight radiological problems experimentation covering satellite data, dosimetry, solar flares, etc
06 p0989 A70-17259

Broad beam Tracking Data Relay Satellite /TDRS/ for manned and automated spacecraft using VHF bands
06 p1006 A70-17345

Legal status of space flights in view of physical effects on atmosphere and near-earth space, discussing international and Polish air traffic statutes
07 p1425 A70-18783

Book on spaceflight propulsion covering jet thrust, energy release, chemical, nuclear and electric propulsion, transportable and environmental systems
09 p1742 A70-22202

Orbital space flight effects on dry barley seeds, noting increased intracellular rearrangements
10 p1811 A70-24324

Spacecraft optimal flight from earth orbit to outer planet orbit with ideally controlled engine using differential motion equations
10 p1941 A70-24512

Time dilation in space travels at light velocity under influence of special theory of relativity
10 p1943 A70-24760

Radiation damage recuperation process in living organisms and justified risk dose in prolonged space flights using Blair model
11 p1985 A70-25505

Space flight thermodynamics and thermophysics - Conference, Palo Alto, California, March 1970
11 p2149 A70-26351

Lunar physics expansion stemming from physical, geophysical and chemical experiments and measurements by manned and unmanned space flight
12 p2302 A70-27583

High intensity noise effects on auditory thresholds, blood pressure and time response to light stimuli, showing permissible levels during space flights
13 p2358 A70-29334

Coriolis illusions amelioration during space flight, noting cross coupling effects minimization by reflex vestibular stabilization of head
13 p2358 A70-29432

Infectious disease hazards on space flight, discussing internal environmental factors including resistance and etiologic agents transmission

14 p2537 A70-30366

Book on space flight simulation systems examining real time and real performance requirements, mathematical models and various simulation programs

14 p2563 A70-30955

Electrostatic analyzer without fringe field effects for measuring low energy particles on spacecraft

15 p2740 A70-32432

Space travel genetic effects, discussing radiation, weightlessness, vibration and acceleration

21 p3761 A70-40842

OP-EX, optimal explicit guidance algorithm for powered flight outside atmosphere

[AIAA PAPER 68-869]

21 p3848 A70-41734

Space flight effects on dogs cardiac activity, brain circulation and systemic-tissue circulation interactions

22 p3972 A70-43635

SPACE FLIGHT FEEDING

Human response in Apollo flights emphasizing astronaut food, water, waste management, physical examination, preventive medicine problems, etc

02 p0239 A70-12669

Sweet potatoes productivity and nutritive value as carbohydrates source in manned space flights

04 p0641 A70-14572

Manned space flight requirements connected with cabin atmosphere, food/water supplies and waste disposal and environmental conditioning

05 p0807 A70-16632

Nutritive value of mycelium of *Cantharellus cibarius* mushroom on rats compared with eggs and fresh and sour milk

05 p0809 A70-17111

Space diets tests for mean DAR of proteins, carbohydrates, fats and water, considering body weight and required energy expenditure

09 p1623 A70-22088

Rehydratable food consumption in zero-gravity environments with spoons and forks, observing interfacial tensions between water and food, containers and utensils

09 p1628 A70-23464

Human response in Apollo flights emphasizing astronaut food, water, waste management, physical examination, preventive medicine problems, etc

13 p2353 A70-29434

Space diets tests for mean DAR of proteins, carbohydrates, fats and water, considering body weight and required energy expenditure

15 p2693 A70-32684

Hydrogenomonas vs *Chlorella* spacecraft life support systems, discussing human requirements and equipment for balanced food supply on long duration space missions

16 p2855 A70-34315

Microwave feeding system for heating and cooking prepackaged meals during extended space missions

19 p3368 A70-37747

Long term space flight crew habitation emphasizing food management, station housekeeping, personal hygiene and waste handling

23 p4154 A70-44622

Space diets with pure nutrition for balanced nutrition obtained through biological and physicochemical synthesis

23 p4157 A70-45027

SPACE FLIGHT STRESS

Interview with Yegorov, discussing ECG, EEG, muscular effort, eyeball movement, blood pressure changes and vision changes during space flight

02 p0230 A70-11675

Biological rhythm disturbances of astronauts during air and space travel, discussing sleeping habits, alertness under weightlessness conditions, etc

02 p0241 A70-12763

Motion sickness causes and prevention during prolonged space flights, discussing vestibular system and characteristics of visual-inertial and canal-otolith incongruities

03 p0421 A70-13542

Spine acceleration tolerance after prolonged human exposure to weightlessness, noting osseous apparatus tissue decalcination

03 p0423 A70-13712

Pharmacology for long term manned space

04 p0629 A70-14566

Biological rhythm perturbations effect on astronauts, emphasizing waking-sleeping rhythm during space flights

04 p0630 A70-14610

Atrophic changes in tortoises during roundtrip to moon on Zond 5 ascribed to hunger and space flight factors

07 p1207 A70-19496

Astronauts visual performance during space flight, studying reduction of visual disturbances from various physiological flight factors

08 p1444 A70-20741

Physiopathological effects of weightlessness, showing desirability of partial gravity for long voyages via spacecraft rotation

09 p1621 A70-23439

Spaceflight effects on dry crepis capillaris seeds in five day orbit, showing chromosome rearrangements and increased mutagenic sensitivity

10 p1811 A70-24323

Spine acceleration tolerance after prolonged human exposure to weightlessness, noting osseous apparatus tissue decalcination

11 p1985 A70-25512

Physiological and psychological human reactions during space flight concerning hypokinesia, space kinetosis, isolation and limited room conditions

11 p1986 A70-25707

Atrophic changes in tortoises during roundtrip to moon on Zond 5 ascribed to hunger and space flight factors

15 p2685 A70-32741

Dynamic spacecraft cabin atmospheres for extended operation, discussing gas composition, weightlessness and various stress factors

22 p3980 A70-43643

Reflex vestibular disturbances and motion sickness prevention in artificial gravity of rotating space base, by incremental adaptation tests and drugs

23 p4154 A70-44625

Astronaut work capacity and adaptation during long term flight of space vehicle Soyuz-9

23 p4154 A70-44651

Space environment husbandry, examining chickens stress response to restraint and parenteral hydration

24 p4296 A70-45337

SPACE FLIGHT TRAINING

Display systems used in space capsule window simulation for flight training, discussing erecting eyepieces, field of view and exit pupils

01 p0058 A70-10814

Astronauts physical training for space flight requirements

04 p0629 A70-14564

Visual spaceflight simulators for spacemen and aircraft pilot training

04 p0663 A70-14691

Water immersion facility training for extravehicular activities and man physical movements in spacecraft, utilizing buoyancy-gravitation balance

21 p3804 A70-41191

SPACE GLIDERS

U LIFTING REENTRY VEHICLES

SPACE LABORATORIES

NT MANNED ORBITAL LABORATORIES

NT MANNED ORBITAL RESEARCH LABORATORIES

Aerospace laboratories organization concepts, discussing dependence on product, size, location and technological trends

03 p0612 A70-14313

Crew requirements influence on systems design and operations criteria for long duration biomedical and behavioral measurement program in earth orbiting space laboratory

[ASME PAPER 69-WA/BHF-17]

04 p0643 A70-14858

Four satellite cluster laboratory in near-earth environment to investigate solar-terrestrial relationships, emphasizing interaction of solar wind and magnetosphere

07 p1387 A70-19711

Manned laboratories in space - Conference, New York, October 1968

12 p2313 A70-27741

Orbital laboratories role in planetary manned exploration, discussing flyby missions, flyby/lander modes, periodic orbits, etc

12 p2314 A70-27748

Orbital laboratories and international cooperation, discussing national and foreign viewpoints

22 p4128 A70-43631

Space treaty obligations concerning orbital laboratories, discussing legal conflicts and establishment of international organization for protection of common interests

23 p4286 A70-44673

International earth orbital space laboratory program, discussing objectives, management, stations, shuttles, tugs, tracking, communication, data distribution network, etc

23 p4262 A70-44687

Iantar 1 automatic ionospheric laboratory flight tests results, investigating Arion engine performance

23 p4264 A70-45009

SPACE LAW

Legal aspects concerning outer space and boundaries, discussing treaty aspects considered by various international congresses

01 p0220 A70-10333

Book on space law covering space exploration and research, air and space sovereignty, legal terminology and principles, etc

01 p0221 A70-11304

UN General Assembly outer space treaties governing international exploration and use and rescue and return of astronauts and objects

02 p0402 A70-12308

Experimental Washington Agreement /1964/ governing international juridical rules and regulations regarding telecommunication satellites

03 p0609 A70-13853

Collection of papers on space law with regional viewpoints on peaceful cooperation in outer space

03 p0610 A70-14255

Space law applicability noting space activity not regulated by Space Treaty of 27 January 1967

03 p0611 A70-14256

International law framework for outer space, resolutions and recommendations by UN and international bodies and Space Treaty of 27 January 1967

03 p0611 A70-14257

International Law Association and development of legal regime of outer space, discussing treaties

03 p0611 A70-14258

Latin American viewpoint on Space Treaty and prior UN Declaration implications, discussing military activity, astronaut legal treatment, liability, information access, etc

03 p0611 A70-14260

Soviet viewpoint of international law regulating space activities, discussing space exploration and exploitation, legal liability, accidents, emergencies, landings, etc

03 p0611 A70-14261

Liability convention requirements for international space law, considering personal injury or property damage caused by space activities of another state

03 p0612 A70-14262

Astronaut rescue and return of objects launched into space, discussing U.S.S.R. and U.S. proposals

03 p0612 A70-14263

Spacecraft registration and legal liability issues, noting UN Treaty assumption of registration

03 p0612 A70-14264

Legal status of space flights in view of physical effects on atmosphere and near-earth space, discussing international and Polish air traffic statutes

07 p1425 A70-18783

Legal implications of national flags on moon as symbols of national sovereignty, considering spacecraft and lunar colonies legal status by international agreements

07 p1426 A70-18877

International law applicability to national activities regarding exploration and use of space, examining Space Treaty and UN resolutions

07 p1426 A70-18879

Space law by analogy with earth legal concepts, considering possible relations with extraterrestrial life

07 p1427 A70-18887

Liability for damage due to space objects, discussing questions before UN juridical subcommittee

12 p2334 A70-26999

Line of demarcation of national sovereignty between air space and free space

12 p2334 A70-27009

International law applications to space, analyzing Space Treaty provisions

12 p2336 A70-27773

Lunar spaceports for military uses from legal viewpoint, considering Space Treaty

12 p2336 A70-27774

Book on aerospace law covering legal status of space and spacecraft use in scientific research and telecommunications, international cooperation, etc

14 p2667 A70-30375

Outer space exploration and utilization, analyzing 1967 UN treaty provisions from standpoint of war potential inherent in space stations existence

16 p3003 A70-33100

Human and divine aspects of space law, discussing ownership and sovereignty problems connected with space and celestial body exploration and utilization

16 p3004 A70-34344

Moon legal status, discussing territorial sovereignty, peaceful uses, UN Resolutions and Space Treaty, rule of occupation, etc

17 p3200 A70-35323

Space law treaties and UN programs

17 p3200 A70-35324

Outer space law - Conference, Mar del Plata, Argentina, October 1969

17 p3200 A70-35776

Legal problems of space telecommunications, discussing world juridical regime, United Nations work and satellite systems broadcasting

17 p3201 A70-35777

Legal questions of satellites telecommunications at Washington Intelsat Conference

17 p3201 A70-35778

UN space committee discussion on rules governing direct TV broadcasting by satellite, taking into account frequency allocation, geostationary orbits, etc

17 p3201 A70-35779

Legal aspects of telecommunications by satellite systems, discussing international organization, Intelsat integration and direct broadcasting

17 p3202 A70-35781

Juridical structure, risks and control of satellite telecommunication ensuring equality of nations

17 p3202 A70-35782

Liability for damages by space objects, taking into account states and international organizations

17 p3202 A70-35783

International organizations participation in convention on liability for damage caused by launching of objects into outer space
17 p3202 A70-35784

Juridical condition of earth orbiting space stations, discussing term definitions in treaty on outer space
17 p3202 A70-35785

Juridical status and sovereignty of rocket launching and cosmic stations in international law
17 p3202 A70-35786

Space object, launching and platform registration
17 p3202 A70-35787

Registration procedure for space exploration objects
17 p3202 A70-35788

Spacecraft launch registration, comparing Soviet and American information furnished to UN
17 p3202 A70-35789

Legal status of ownership rights of lunar soil samples and objects left on moon by astronauts
17 p3203 A70-35790

Legal problems arising from Apollo 11 lunar landing with respect to Space Treaty, discussing lunar soil removal, flag planting, Luna 15 flight, etc
17 p3203 A70-35791

Treaty on principles governing activities of states in exploration and use of outer space, appraising various provisions
17 p3173 A70-35792

Meteorites and celestial products legal status with respect to rights of property
17 p3173 A70-35793

Legal aspects concerning lunar matter and product disposal resulting from human cosmic expansion
17 p3203 A70-35795

Legal status of natural resources of celestial bodies, discussing limitations of Space Treaty of 27 January 1967
17 p3203 A70-35796

Space law foundations, outlining natural scientific bases
17 p3203 A70-35797

Regulations existence and application to exploitation of resources in celestial bodies
17 p3203 A70-35798

Space legal problems involving earth resource survey (ERS) satellites and weather modification
17 p3203 A70-35799

Legal problems in satellite communications, emphasizing copyright, satellite television legality and protection of transmission and broadcasts
17 p3203 A70-35800

Space law teaching and study facilities
17 p3204 A70-35801

International juridical discipline of space including moon and other celestial bodies, discussing shortcomings and limitations
18 p3349 A70-36653

Legal aspects of suborbital space transports based on air transportation concepts
18 p3350 A70-36661

Book on law relating to activities of man in space covering liability, space communication, international organization, military implications, etc
19 p3553 A70-37676

Space law aspects of direct broadcasting satellites for TV and sound transmission
20 p3740 A70-39408

Space treaty obligations concerning orbital laboratories, discussing legal conflicts and establishment of international organization for protection of common interests
23 p4286 A70-44673

SPACE LOGISTICS
Space station operations and logistics scheduling for long duration missions, using activity network model
01 p0179 A70-10487

Space station-logistics vehicle docking and men-material transfer problem
[AIAA PAPER 69-1118] 01 p0193 A70-10612

Extraterrestrial resources for space flight maintenance and human life support in space and on extraterrestrial bodies
14 p2634 A70-30199

Space shuttle logistics transportation for long duration space station with crew rotation and resupply cycle, considering NASA and DOD requirements
16 p2983 A70-34069

Logistic support reusable earth to orbit space shuttle design, noting weight penalties, payloads and development time
[AAS PAPER 70-042] 17 p3175 A70-34782

Space Station long term operations and logistics concerning inventory, configuration and cargo management
[SAE PAPER 700757] 24 p4416 A70-45871

SPACE MAINTENANCE
Equipment reliability data application in analytic techniques to predict human requirements for system, using in-space maintenance as reference frame
01 p0055 A70-10117

Cost reductions achieved by space payload life extension through manned maintenance and increased transportation economies via refueling and improved space propulsion
01 p0196 A70-10844

Expandable space hangar with composite wall for orbiting maintenance shelter, providing radiation and meteoroid protection for occupants
02 p0380 A70-11934

Extraterrestrial resources for space flight maintenance and human life support in space and on extraterrestrial bodies
14 p2634 A70-30199

Ground controlled remote manipulator spacecraft system through wideband radio link for satellite maintenance and repair
15 p2810 A70-31780

Maintenance vs redundancy for manned space station economy, considering costing structure and time increase for maintenance
15 p2713 A70-32666

Magnetomotive tools and power systems for maintenance, repair and assembly in space weightless environment
19 p3436 A70-37949

Space maintenance tools necessity on long duration manned space missions 1972-1980
19 p3442 A70-38836

SPACE MECHANICS
NT ASTRODYNAMICS
NT CELESTIAL MECHANICS
NT KEPLER LAWS
NT ORBITAL MECHANICS

Space mechanics problem of passing from perigee to radial distance in given time determined by fitting conic to radii, using iteration method
09 p1760 A70-22927

SPACE MISSIONS
Space station operations and logistics scheduling for long duration missions, using activity network model
01 p0179 A70-10487

Earth and planetary entry vehicle designs for manned and unmanned space missions, noting thermal protection, environmental control requirements and communication systems
[AIAA PAPER 68-1080] 01 p0195 A70-10826

AMPROD (Automated Mission Profile Design) generating schedules for long duration missions with real cost and time savings
03 p0581 A70-14023

Solar powered electric propulsion systems for automated missions throughout solar system by extending range of Atlas Centaur-Titan 3-C launch vehicles
[AIAA PAPER 68-1120] 04 p0736 A70-15401

Automated parameter search techniques applied to low thrust mission design, stressing trajectories and mission optimization
[AIAA PAPER 69-261] 04 p0736 A70-15404

Spacecraft design, trajectory and mission analyses for multipurpose solar electric propulsion missions, emphasizing modular ion engine and fixed attitude spacecraft designs
[AIAA PAPER 69-252] 04 p0763 A70-15412

Saturn 5 program status to meet mission requirements for manned lunar exploration, space station/base programs and outer planet exploration with unmanned probes
[SAE PAPER 690715] 05 p0922 A70-15852

Electric thrusters for putting communications satellite into synchronous orbit analyzed for mission performance, finding hydrogen resistojets as attractive compromise between payload and transfer time
05 p0897 A70-16899

Manned or unmanned missions to asteroids close to earth as intermediate stage in planets formation
06 p1139 A70-17551

Analytic Trajectory Optimization Model to develop computational techniques for low thrust mission analysis
[AIAA PAPER 70-96] 06 p1159 A70-18230

Instrumental space flight internationalization considering manned flight and military obstacles, suggesting scientific and political steps
07 p1427 A70-19097

Apollo Program mission evaluation and flight anomalies team to identify and understand unforeseen peculiarities and systems problems during spacecraft mission
09 p1768 A70-23708

Operational planning for earth resources surveys using spacecraft
09 p1672 A70-23762

Planetology and space mission planning - Conference, New York, October 1967
11 p2110 A70-26026

Signature theory application to space mission planning and archeological project
11 p2051 A70-26034

Biosatellite environmental control coolant loop system design for 30-day mission program, discussing fuel cell power source, cryogenic subsystem, etc
11 p2127 A70-26360

Small satellites for scientific technological and operational missions, discussing piggyback launching, command, battery storage, telemetry and attitude control systems
15 p2810 A70-31781

International Aeronautical Federation space records, discussing record classification for suborbital, earth orbital and lunar and planetary missions
15 p2831 A70-32245

American-German solar probe HELIOS mission parameters for interplanetary and close proximity solar research, discussing spacecraft building and launching
15 p2801 A70-32281

Periodic comet nature, origin and anomalous behavior with space mission planning implications, assuming solar plasma source and solar-interstellar interaction
[AAS PAPER 70-029] 17 p3155 A70-34795

Japanese sounding rockets for space research, discussing missions, launchings, flight tests, etc, of Kappa and MT-135 rockets and M-45 launch vehicle
17 p3177 A70-35205

Titan 3 launch vehicle for scientific space missions, discussing building blocks, performance and payloads
17 p3178 A70-35260

Low thrust high impulse nuclear and electric space propulsion systems, discussing performance capability for space missions
18 p3290 A70-36566

Future space missions for observing solar events, magnetospheric problems, cosmic rays and low energy plasma, considering use of multiple satellites
19 p3513 A70-37523

Mariner Mars 1971 mission design, discussing objectives, orbit selection, guidance, navigation and sequence analysis
[AIAA PAPER 70-1048] 19 p3527 A70-38863

Solar electric propulsion application to out-of-ecliptic mission for interplanetary fields and particles data, comparing performance with chemical systems
[AIAA PAPER 70-1118] 20 p3691 A70-40225

High impact Ag-Zn cell design for space missions instrument package landing, considering heat sterilization and minimum operational capability
21 p3757 A70-41013

Mission Control Center and Apollo flight controller team, discussing personnel qualifications, equipment and individual evaluation
21 p3805 A70-41197

TOPS /thermoelectric outer planet spacecraft/ project integrating R and D for specific space missions
21 p3920 A70-41793

Thermoelectric outer planet spacecraft (TOPS) data subsystems for 12 year missions compared with Mariner subsystem
21 p3795 A70-41796

Silicon solar cell design optimization for near solar missions, discussing electrical characteristics and performance obtainable under various solar radiation conditions
22 p3964 A70-42496

Lunar orbital science, discussing U.S. and Soviet missions, NASA plans and results concerning remote sensing, force field and particle studies
22 p4105 A70-43144

Apollo project technology for future space missions, discussing space shuttles, management, material procurement, test programs and computer utilization
22 p4128 A70-43513

Automated and manned spacecraft design, discussing mission objectives and present and potential applications
23 p4264 A70-45003

Venus atmosphere exploration by multiple entry probe, describing spacecraft system design, launch and earth-Venus transfer trajectory, approach and entry sequence, etc
[AIAA PAPER 70-1245] 24 p4417 A70-45963

SPACE NAVIGATION
NT INTERPLANETARY NAVIGATION

Orbital charts development for space navigation, discussing cartography and orbital navigation
01 p0138 A70-11251

Optimum estimation equations as simple averaging extension, considering application to Kalman filtering in integrated space navigation system
03 p0522 A70-13608

Launch vehicles design, propulsion, maneuverability and navigation
05 p0923 A70-16565

Apollo translunar and transearth orbit determination and navigation using ground and onboard systems
[AIAA PAPER 70-27] 06 p1103 A70-18124

Ground-based and onboard guidance and navigation systems for outer planet flyby missions concerning direct, Jupiter swingby and Grand Tour trajectories
[AIAA PAPER 70-71] 06 p1104 A70-18194

Space rendezvous navigation and guidance based on optical sightings with hand-held sextant entered into and processed by small digital computer
07 p1331 A70-20061

Apollo space vehicles guidance and navigation using data obtained onboard, discussing inertial platforms, accelerometers and trajectory calculations
08 p1541 A70-21023

Gradient method applied to onboard analysis of astronavigational bearings of spacecraft
09 p1719 A70-22165

- Keplerian integrals analogy to integrals of adjoint equations suggested by optimum space navigation trajectories considerations 12 p2261 A70-27834
- Lunar far side features position from Apollo 8 data, evaluating Apollo navigation system accuracy 12 p2309 A70-27949
- Mariner Mars 1969 navigation, guidance and control systems design, mechanization and flight testing 13 p2446 A70-28393
- Earth orbital parameters estimation in manned flight by manual space navigation sensors and computer 13 p2446 A70-28406
- Space navigation procedures verification considering vehicle trajectory parameters, noting applicability to linear systems with estimable parameters 13 p2447 A70-28412
- Space navigation for Apollo 11 mission, emphasizing ground and onboard systems, interfaces with guidance and use in phases of lunar landing 13 p2447 A70-28547
- Space navigation theory and practice - Conference, Ames Research Center, Moffett Field, California, February 1970 14 p2612 A70-30451
- Saturn 5 launch vehicle navigation system design, discussing configurations, implementation schemes, system tradeoffs and performance 14 p2613 A70-30453
- Apollo 12 navigation for pinpoint lunar landing, correcting errors in downtrack position in guidance computer near powered descent initiation time 14 p2613 A70-30456
- Lunar based radar beacons for nearby spacecraft navigation, noting trajectory determination advantages 14 p2614 A70-30461
- Synchronous navigation satellite system for ships and aircraft applicable to earth orbital and lunar operations 14 p2614 A70-30463
- Operational and environmental factors constraining onboard navigation system design for outer planet flyby missions 14 p2614 A70-30467
- Navigation data from Mariner Mars 1969 TV pictures, estimating spacecraft trajectory to planetary center 14 p2614 A70-30468
- Apollo navigation methods and data analysis covering inertial guidance with gyro-stabilized platforms, acceleration sensors, sextants and telescopes, ergodicity, filtering, etc 15 p2772 A70-31549
- Transstellar space navigation, discussing system concepts, measured observables during flight, instrumentation, etc 15 p2773 A70-32060
- Statistical error analysis of autonomous manned spacecraft navigation in long duration eccentric Mars orbits [AIAA PAPER 69-880] 15 p2773 A70-32503
- Three body numerical solutions to low thrust guidance and navigation for outer planet orbiter with nuclear-electric propulsion [AIAA PAPER 70-1040] 19 p3527 A70-38855
- Guidance and navigation system design for automatic stationkeeping one earth orbiting vehicle with respect to other [AIAA PAPER 70-1005] 20 p3667 A70-39526
- Inertial guidance technology applications for space navigation, considering instrument design tradeoff between accuracy and cost for performance and reliability improvements 21 p3848 A70-41128
- Mariner 6 and 7 navigational accuracies prior to time of planetary encounter 21 p3888 A70-41129
- ### SPACE ORIENTATION
- Space triangulation equations based on simultaneous measurements of satellite topocentric coordinates and distances between tracking station and satellite 02 p0254 A70-11753
- Simultaneity circle for calculating spatial direction of straight line joining satellite observation stations, noting time factor role 06 p1139 A70-17548
- Spatial direction Riga-Cairo determined using simultaneous photographic observations of Pagesa A satellite 06 p1054 A70-17550
- USAF undergraduate pilot trainees responses in prototype spatial orientation trainer 13 p2359 A70-29439
- ### SPACE PERCEPTION
- Motion perception sensitivity measurement in various portions of retina for operation accuracy of photooptical systems of simulation 01 p0036 A70-10820
- Perceived size relation to retinal size under reduced observation conditions compared with size-distance invariance hypothesis for binocular and monocular observations 01 p0025 A70-11051
- Sensory and muscular factors interaction in space perception via empirical test of summative hypothesis derived from sensory tonic field theory 02 p0239 A70-12626
- Visual, motion and auditory stimuli role in enhancing aircraft pilot training simulators realism, considering motion perception research [ASME PAPER 69-WA/BHF-9] 04 p0642 A70-14853
- Distance discrimination experiment in reduced cue setting simulating outer space, confirming Weber power function exponent 04 p0645 A70-15647
- Mathematical models for describing visual perception of distance to ground during VTOL landing and takeoff 05 p0810 A70-17119
- Flight crews spatial vision, estimating absolute distance perception of pilots and navigators with emmetropic refraction 08 p1450 A70-20742
- Convergence role in distance perception during aircraft landing, testing subjects with normal binocular vision, emmetropic refraction and visual acuity 08 p1450 A70-20744
- Horizontal disparity and ratio of perceived egocentric distance related in stereoscopic vision during investigation of three point light sources problem 08 p1447 A70-21725
- Optic chiasm damage effects on human depth perception implying interhemispheric link for binocular integration in central vision 09 p1618 A70-22669
- Corpus callosum damage effects on human depth perception implying interhemispheric link for binocular integration in central vision 09 p1618 A70-22670
- Movement information from spatio-temporal integration in binocular-kinetic space perception of time varying optical inputs 09 p1618 A70-22672
- Solar simulation /SISS/ for evaluating human visual system performance in contrasting space environment 09 p1655 A70-22680
- Psychophysical metric for space perception visual cues measurement, describing applications to distance discrimination 10 p1827 A70-24768
- Stimuli eliciting vergence eye movements and stereopsis, discussing retinal disparity locations and limits due to form, spatial position, luminance, contrast and onset 12 p2171 A70-28034
- Neuron processing of retinal activity in estimating distances and sizes of objects in field of vision 12 p2172 A70-28312
- USAF undergraduate pilot trainees responses in prototype spatial orientation trainer 13 p2359 A70-29439
- Perceptual displacement of hashmark between unequal squares, discussing contour repulsion and perspective interpretation 14 p2537 A70-30899
- Neurophysiological framework for binocular single vision and depth discrimination, concerning construction of horopter for cat 14 p2539 A70-31348
- Book on visual perception space covering biological optics, eye model, monocular vision, etc 14 p2539 A70-31349
- Book on psychophysical analysis of visual size-distance perception and physiological optics 15 p2688 A70-31575
- Visual effects in astronauts and pilots, discussing optical illusions and distance estimation errors due to accelerations, runway factors, lack of oxygen, etc 18 p3225 A70-36777
- Equidistance effects on human size and distance perception in visual alley 19 p3368 A70-37771
- Human spatio-temporal visual evoked response characteristics, showing potential gradient rotation in same period as input stimulus 19 p3360 A70-37845
- Object identification and form of multidimensional discrimination space, using locus stimulus model 19 p3361 A70-38051
- Spatial disorientation of human subjects in centrifuge, examining otolith role in reorientation and eye sensory mechanisms 22 p3976 A70-43707
- Astronaut distance judgement enhancement in space by combining stereoptics effect with apparent movement phenomenon 23 p4150 A70-43965

- Jupiter chemical composition and atmosphere, considering space probe experiments 01 p0185 A70-11047
- In-flight compensation for space probe trajectory deviations, discussing attitude determination and control of triaxial and spin stabilized space probes 01 p0186 A70-11265
- Venusian atmospheric model based on Venera 4 measurements, calculating probe distance travel, temperature, density and pressure profiles 01 p0192 A70-11504
- Space probe investigation of comets, discussing feasibility, instrumentation, mission planning, etc 06 p1153 A70-18550
- Grand tour space probe optics for observation of objects on planet, considering atmospheric refraction indices effect 09 p1700 A70-23768
- Ground stationed automatic orbital operations system /AOOSY/ for satellites and space probes, discussing flow diagram and Siemens computer programming 13 p2372 A70-28398
- Parametric amplifier as preamplifier for microwave receivers in space probes, presenting block diagrams and test results 13 p2379 A70-29559
- Hollow cathode ion thruster and lightweight power conditioner of solar-electric propulsion system for unmanned deep space probes [AIAA PAPER 70-648] 16 p2966 A70-33546
- Mechanically despun multifrequency, attitude sensing antenna for spin stabilized spacecraft, deep space probes, tactical communications and community broadcast applications 16 p2986 A70-34159
- Digital simulation of linear filter, investigating noise and rounding errors effects on decoding signals from lunar and interplanetary probes 17 p3049 A70-34612
- Interplanetary probes trajectory optimization for minimum energy expenditures, neglecting solar and terrestrial perturbations within earth sphere of influence 17 p3168 A70-35366
- German monograph on heavy space probes for solar system investigation covering systems analysis, mission success, flight programs, Saturn 5 launch vehicle, etc 17 p3168 A70-35378
- Low energy solar and galactic cosmic rays propagation in interplanetary medium observed by Zond and Venus space probes, discussing shock waves retardation 19 p3493 A70-37475
- Solar wind disturbances associated with solar activity observed by spacecraft probing interplanetary space, considering geomagnetic activity classes 19 p3494 A70-37478
- Electron density irregularities convected past space probe relationship to radio intensity power spectrum scintillations 20 p3703 A70-39023
- Pluto space probe using swingby technique with Jupiter, Saturn and Uranus gravitation fields for acceleration 21 p3886 A70-41073
- Space DC electric field measurement by quadrupole probe, discussing geomagnetic field and contact potential effects 22 p4029 A70-42792
- Astronomical observations from outside terrestrial atmosphere, discussing vehicles and equipment for solar and stellar research, rocket and balloon data, etc 23 p4257 A70-45043

SPACE PROGRAMS

NT APOLLO PROJECT
NT EUROPEAN SPACE PROGRAMS
NT FRENCH SPACE PROGRAMS
NT LUNAR PROGRAMS
NT SURVEYOR PROJECT
NT TEKITE PROJECT
NT U.S.S.R. SPACE PROGRAM

Hazards due to nonohmic materials responsible for electrostatic failures in missile and space programs and ground equipment

01 p0141 A70-10088

Space programs to monitor earth resources from synchronous orbit of 19,400 nautical miles, discussing geostationary systems characteristics related to optics and telemetry

01 p0093 A70-11280

Space law applicability noting space activity not regulated by Space Treaty of 27 January 1967

03 p0611 A70-14256

Experiment selection in orbital program planning based on broad system synthesis, discussing identification and grouping of objectives, critical issues and experimental equipment requirements

[AAS PAPER 69-580] 04 p0749 A70-14652

Space projects quality assurance with allowance for technological trends, discussing product and system oriented organizational requirements, failure potentials, contractor performance, etc

04 p0699 A70-15138

Meghdoot program for satellite network communications technology applications to national goals in India

04 p0757 A70-15670

Reliability engineering related to general and professional levels, discussing space program methods and Concerto program for electronic components

05 p0853 A70-15810

Space programs and future missions assessment based on technical feasibility, considering effects of economic and social factors

06 p1185 A70-17644

Integrated space program with merger of manned and automated activities for coming decade permitting costs comparable to aircraft-based scientific programs

07 p1375 A70-18872

Space shuttle program from technological and budgetary objections viewpoint, evaluating risks against program options

[AIAA PAPER 70-264] 07 p1398 A70-20394

National Space Program relevance to human society, discussing solar system exploration, applications in meteorology, communication, etc

09 p1792 A70-22041

Satellites application to studying and monitoring earth ecology, discussing environmental space research and space program priorities

09 p1794 A70-23333

TRW space program to 1978, discussing lunar optical observatory, orbital radio astronomical observatory, satellite applications, planetary exploration spacecraft, etc

10 p1951 A70-24875

Book on aerospace law covering legal status of space and spacecraft use in scientific research and telecommunications, international cooperation, etc

14 p2667 A70-30375

Scientific satellites history, projects, technology, coordination and international collaboration

14 p2655 A70-31416

Report to COSPAR on Argentine Space Research Commission covering sounding rockets, cameras, launching bases, research, balloon flight, etc

15 p2829 A70-31701

Report to COSPAR on space research in Bulgaria, considering ionospheric physics, cosmic rays, satellite observations, meteorology and space communications

15 p2829 A70-31704

Report to COSPAR on Australian space research /1969/ including tracking stations, sounding rockets, technology utilization, etc

15 p2829 A70-31706

Report to COSPAR on space research in Canada, covering Alouette satellites, ISIS I, international cooperation, etc

15 p2829 A70-31708

Report to COSPAR on space research covering satellite tracking telemetry, Apt, meteorology, cosmic rays, solar activity and international cooperative programs, etc

15 p2829 A70-31709

Report to COSPAR on Indian space research describing organizational structure, facilities, experiments and international cooperation

15 p2830 A70-31715

Report to COSPAR on 1968/1969 Indonesian space research including TV broadcasts through Intelsat 3 satellite, sounding rocket research, atmospheric physics, etc

15 p2830 A70-31716

Report to COSPAR on space research in Pakistan, covering rocket, satellite and ground based investigations, etc

15 p2830 A70-31718

Report to COSPAR on Japanese space research including satellite, rocket and balloon observations of ionosphere, magnetosphere, interplanetary space, moon, planets, cosmic rays, etc

15 p2830 A70-31720

Space research cost effectiveness in weather forecasting, TV broadcasting, space biology and medicine, geodesy, aerial and maritime navigation, earth resources, etc

15 p2811 A70-32283

Space program planning for scientific and application earth satellites, stressing image sensors development

15 p2812 A70-32289

Fluidic technology applications to space and oceanography, discussing control, monitoring, sequencing and signal processing

16 p2845 A70-33714

NASA program for international cooperation in space involving developing and advanced nations, discussing television instruction for India, resource surveys, etc

18 p3349 A70-36514

Cost effectiveness methodology for space program, industry, military sector, etc

19 p3554 A70-38402

Post Apollo space research, discussing Saturn Workshop /Skylab/, Nerva nuclear rocket engine and international cooperation

21 p3956 A70-41496

U.S. and Soviet space program administration and management

21 p3956 A70-41893

Earth orbital experiments synthesis in space programs methodology, discussing examples in astronomy, biology and oceanography research

22 p4097 A70-42500

Earth resources information systems using space, aerial and ground measurements, discussing Apollo 9 IR color photograph of Mississippi Valley and timber inventory applications

23 p4192 A70-44679

International earth orbital space laboratory program, discussing objectives, management, stations, shuttles, tugs, tracking, communication, data distribution network, etc

23 p4262 A70-44687

International Space Research Organization /ISRO/ for space operations, considering political, economic, technical and scientific requirements

23 p4286 A70-44688

Manned space flight programs management, discussing organizational aspects of projects including Apollo, space shuttle and space station

23 p4286 A70-44696

Free-flying modules interface and operation in conjunction with space station for orbital research into manned space program

[AIAA PAPER 70-1300] 24 p4417 A70-45950

SPACE RADIATION

U EXTRATERRESTRIAL RADIATION

SPACE RADIATORS

U SPACECRAFT RADIATORS

SPACE RATIONS

Prototype space foods effects on humans, determining changes in bacterial fecal flora content

17 p3032 A70-35565

Space diets with pure nutrition for balanced nutrition obtained through biological and physicochemical synthesis

23 p4157 A70-45027

SPACE RENDEZVOUS

NT EARTH ORBITAL RENDEZVOUS

NT LUNAR ORBITAL RENDEZVOUS

NT ORBITAL RENDEZVOUS

Minimum propellant rendezvous maneuver of space vehicles in neighboring circular orbits

01 p0193 A70-10555

Manned vehicles rendezvous missions in space and hydrospace, proposing functional structure involving concurrent ship control, navigation, perception, communication and prehension

[AIAA PAPER 69-1102] 01 p0034 A70-10615

Minimum propellant maneuver during docking of elliptical orbit rendezvous between propelled and passive target vehicles, analyzing as variational problems

02 p0380 A70-12784

Analytic guidance and control for minimum fuel expenditure and optimal guidance corrections for low thrust vehicle in Martian orbit

[AIAA PAPER 68-862] 04 p0716 A70-15544

Time optimal rendezvous maneuver between neighboring elliptic orbits, discussing propulsive jet system with variable thrust

07 p1381 A70-19357

Space rendezvous navigation and guidance based on optical sightings with hand-held sextant entered into and processed by small digital computer

07 p1331 A70-20061

Computer program /TACTICS/ for simulating three vehicles simultaneous motion in space, considering interceptor-target guidance and intercept trajectories

07 p1239 A70-20414

Rendezvous problems formulated as optimal control problems in combined state space, considering decomposition in optimality criteria and solution existence

11 p2127 A70-26331

Manual spacecraft rendezvous system based on handheld instruments and manual computations, considering error analysis and simulation

13 p2357 A70-28392

Automatic rendezvous and mooring-coupling of spin stabilized satellites, discussing configuration, guidance and dynamics model

13 p2499 A70-28397

Spacecraft rendezvous control at minimal propellant consumption, deriving algorithm

13 p2499 A70-28400

Automatic-manual space rendezvous control system for Cosmos and Soyuz satellites, considering terminal phase control at specific closing range and velocity

13 p2499 A70-28402

Radio command guidance system for Mars probe ascent from surface to rendezvous with flyby vehicle on escape trajectory

13 p2447 A70-28421

Minimum-fuel multiple impulse orbital fixed time rendezvous in circular orbit vicinity

18 p3289 A70-36682

Future spacecraft mission for short period comets rendezvous, considering trajectory requirements and launch vehicle payload capabilities

[AIAA PAPER 70-1072] 19 p3530 A70-38885

Jupiter swingby trajectory analysis for comet flyby and rendezvous missions, discussing approach velocity and payloads

[AIAA PAPER 70-1074] 19 p3530 A70-38886

SPACE RENDEZVOUS MANEUVERS

U SPACE RENDEZVOUS

U SPACECRAFT MANEUVERS

SPACE SCIENCES

U AEROSPACE SCIENCES

SPACE SELF MANEUVERING UNITS

U SELF MANEUVERING UNITS

SPACE SHUTTLES

Saturn launch vehicle systems in terms of design, operating characteristics and potential applications, showing need for reusable space shuttle systems

[SAE PAPER 690703] 05 p0922 A70-15830

Onboard and ground checkout systems for space station and space shuttle operations

[AIAA PAPER 70-245] 07 p1251 A70-20373

Launch facilities institutionalization for space shuttles launch cost minimization

[AIAA PAPER 70-244] 07 p1251 A70-20374

Low operating cost space shuttle system for cargo and personnel transportation to earth orbiting stations involving reusable winged vehicles

[AIAA PAPER 70-242] 07 p1396 A70-20376

Reusable air breathing launch vehicle for earth orbit shuttle, comparing performance, costs and operation with rocket powered systems

[AIAA PAPER 70-270] 07 p1396 A70-20381

Reusable metallic and nonmetallic thermal protection materials for space shuttle applications

[AIAA PAPER 70-273] 07 p1397 A70-20383

Ground and onboard electronics systems for space shuttle vehicles, discussing role in equipment reliability and maintainability, life cycle costs, management control, etc

[AIAA PAPER 70-261] 07 p1398 A70-20391

Integrated electronics system for space shuttles including propulsion, electrical power, life support and flight control

[AIAA PAPER 70-257] 07 p1398 A70-20392

Space shuttle program from technological and budgetary objections viewpoint, evaluating risks against program options

[AIAA PAPER 70-264] 07 p1398 A70-20394

Unmanned and manned interorbital shuttle systems for satellite placement and repair and planetary spacecraft insertion, emphasizing cost analysis

[AIAA PAPER 70-267] 07 p1398 A70-20396

Orbit-to-orbit shuttle for launch in earth-to-orbit shuttle vehicle, discussing design requirements

[AIAA PAPER 70-268] 07 p1399 A70-20397

Reusable passenger and cargo shuttle system based on integral launch and reentry vehicle /ILRV/, considering propulsion systems, aerodynamic and structural configurations, aerothermal characteristics, etc

08 p1582 A70-20689

NASA earth-orbit shuttle /EOS/ for achieving routine arrival, conventional landing after orbital flight and reentry

09 p1766 A70-22677

NASA future space programs, discussing space shuttle and station, nuclear propulsion, manned Mars landing, unmanned Venus-Mercury probes, etc

09 p1762 A70-23065

Space shuttle program, considering vehicle configurations mission capabilities and cost estimates with emphasis on ground and flight tests

[AIAA PAPER 70-739] 10 p1953 A70-25074

Space shuttle structural dynamic problems, discussing stall flutter due to transition from high angle of attack to normal aircraft flying attitude

[AIAA PAPER 70-740] 12 p2312 A70-27150

Checkout systems for shuttle and orbiting space stations, discussing shift from ground to onboard operation 12 p2208 A70-27691

Low cost orbital space transportation system with shuttle service, discussing booster and configuration selections, weight, costs, etc [AIAA PAPER 70-256] 13 p2506 A70-29615

Space shuttle automatic landing system based on aircraft low visibility landing, considering economy and safety 14 p2614 A70-30466

Atmospheric elements and properties pertinent to design and operations of Space Shuttle 14 p2606 A70-30556

CAT and small scale atmospheric motions in relation to supersonic transport and space shuttle design and operation 14 p2609 A70-30602

Two stage reusable space shuttle consisting of booster and orbiter 15 p2789 A70-32255

Reusable ferry spacecraft program, discussing space shuttles, cost reduction and nuclear propulsion for deep space missions 15 p2791 A70-32300

Reusable nuclear shuttles/RNS/ for interorbital and escape missions, discussing alternate stage configurations, radiation shielding, subsystem options, etc [AIAA PAPER 70-678] 16 p2950 A70-33579

Space shuttle aerodynamic studies including staging, launching, entry and booster cruise 16 p2981 A70-33702

Space shuttle booster configurations, including wing and tail sizes, vehicle balance and engine location 16 p2982 A70-33706

Space shuttle avionics cost effective design approach, discussing guidance, commonality, reliability, communications and autonomy 16 p2982 A70-33802

Meteorological problems associated with space shuttle design and operations, permitting tradeoff analysis on environment effects 16 p2946 A70-33804

Space shuttle logistics transportation for long duration space station with crew rotation and resupply cycle, considering NASA and DOD requirements 16 p2983 A70-34069

Space shuttle systems structural design and thermal protection technology, stressing hardware reliability and reusability 16 p2986 A70-34227

Materials technology for reuse capability of space shuttle, discussing normal and stress corrosion, hydrogen embrittlement and flammability 16 p2987 A70-34228

Reusable nuclear shuttle/RNS/ for space program providing low cost transportation beyond earth orbit [AIAA PAPER 70-679] 17 p3174 A70-34512

Experiment space module combined with space station and serviced by shuttle for low total cost and maximum flexibility in funding and scheduling [AAS PAPER 70-034] 17 p3175 A70-34777

Manned planetary flight systems engineering, discussing feasibility, objectives, propulsion, transplanet injection via geospace shuttle station, energy requirements for various synodic modes [AAS PAPER 70-037] 17 p3155 A70-34778

Future manned planetary missions with reusable nuclear shuttles, comparing operating modes in terms of propellant requirement, costs, complexity, etc [AAS PAPER 70-040] 17 p3155 A70-34781

Logistic support reusable earth to orbit space shuttle design, noting weight penalties, payloads and development time [AAS PAPER 70-042] 17 p3175 A70-34782

Configurational and operational characteristics for space shuttle design, considering economic tradeoffs between expendable and reusable systems [AIAA PAPER 70-045] 17 p3175 A70-34783

Propulsion requirements for reusable space shuttle, discussing engine development program [AAS PAPER 70-044] 17 p3147 A70-34784

Cost reduction in designing space shuttle system using reusable winged vehicles, suggesting airlines operations method [AAS PAPER 70-043] 17 p3175 A70-34785

Space shuttle weight, reliability and reuse cost factors, discussing Phase A ILRV project reducing cost per pound of payload to orbit [AAS PAPER 70-046] 17 p3175 A70-34786

Space shuttle atmospheric maneuvers, examining booster and orbiter entry, flyback and abort [AAS PAPER 70-047] 17 p3175 A70-34787

Space shuttle mission trajectory optimization with steering in atmospheric flight and orbiter maneuvers [AAS PAPER 70-048] 17 p3176 A70-34788

Space shuttle-manned space station integration, discussing design and operation, crew rotation, station resupply, docking, etc [AAS PAPER 70-051] 17 p3176 A70-34789

Space shuttle safety program for low risk passenger transportation, combining large aircraft experience with spacecraft technology [AAS PAPER 70-055] 17 p3176 A70-34793

Low cost earth-moon transportation system based on shuttle station mode concept [AAS PAPER 70-058] 17 p3176 A70-34806

Unmanned and manned interorbital shuttle systems for satellites placement and repair and planetary spacecraft insertion, emphasizing cost analysis [AIAA PAPER 70-267] 17 p3172 A70-35650

Space station with shuttle and tug service, discussing reduced costs, reusability and commonality 18 p3333 A70-36318

Space shuttle development, discussing weight and lateral separation distance 19 p3531 A70-37378

European participation in American space program, considering space station, shuttle and tug 19 p3531 A70-37379

Optimal angle of attack transition trajectories for space shuttle from atmospheric entry to cruising flight for conventional airport landing 20 p3713 A70-39515

Atmospheric ascent optimal trajectories for medium to high lift drag ratio space shuttle type rocket vehicles [AIAA PAPER 70-978] 20 p3714 A70-39551

Nonrolling lifting gliding vehicle hypersonic longitudinal dynamic stability, applying analysis to space shuttles [AIAA PAPER 70-977] 20 p3715 A70-39552

Launch facilities institutionalization for space shuttles launch cost minimization [AIAA PAPER 70-244] 20 p3606 A70-39697

Space shuttle design, considering costs, boosters, payloads and orbits 20 p3716 A70-39795

Reusable rocket engine for space shuttle, discussing propellants, configuration, design, combustion cycle and size 20 p3689 A70-40084

Space shuttle with reusable launch system, discussing payload sensitivities regarding orbiter and booster weight and engine reliability [SAWE PAPER 849] 20 p3716 A70-40377

Two stage reusable shuttle for space transportation, discussing aerodynamic characteristics, thermal protection system, performance requirements, etc 21 p3929 A70-40981

Space transportation system, discussing shuttle costs, aerodynamic and propulsion configurations, management planning, etc 21 p3929 A70-40982

Space shuttle vehicle requirements, discussing configurations aerodynamic characteristics, aerothermodynamics, materials technology, etc 21 p3929 A70-40983

Cost optimal space shuttle systems, discussing booster configurations, weight and performance factors, technology utilization, etc 21 p3929 A70-40984

Reusable space shuttle technology, discussing vehicle configurations, system growth capability, thermal protection, cryogenics, integrated avionics, etc 21 p3929 A70-40985

Boundary layer transition application to space shuttle design, relating aerodynamic noise to turbulent boundary layers 21 p3744 A70-41015

Aerodynamic heating prediction methods for delta body space shuttle orbiter, comparing with wind tunnel test data 21 p3744 A70-41016

Aerodynamic heating constraints on space shuttle design, discussing prediction uncertainties for boundary layer transition, laminar, turbulent heating, etc 21 p3744 A70-41017

Nuclear rocket applications in Nuclear Flight Propulsion Module/NFPM/ and Reusable Nuclear Shuttle/RNS/ 22 p4070 A70-43180

Lubrication technology for space shuttles, discussing vehicles and airbreathing and rocket engines 22 p4047 A70-43325

Space shuttle mission and economics, discussing cost effectiveness, capabilities, satellite transportation payloads and traffic forecasts 22 p4127 A70-43505

European-U.S. cooperation in shuttle and space station program, noting experience in unmanned systems 22 p4127 A70-43508

European participation in small space shuttle development, discussing design, test vehicle program and European applications 22 p4111 A70-43511

Space shuttle structural technology for booster and orbiter, discussing hot and cold structure concepts, reentry bodies, military payloads, radiating protective coatings, refractory materials, etc 22 p4111 A70-43516

Geolunar space development with transportation based on shuttle stations, describing communication, orbits, logistics, etc 22 p4108 A70-43628

Space shuttle configurations, discussing launch, entry and landing characteristics 22 p4111 A70-43629

NASA design objectives for space transportation, discussing space shuttle, airlines-aerospace industry cooperation, computerization, etc 23 p4257 A70-44173

Operational requirements for NASA space shuttle Survival and Flight Equipment, discussing protection during launch and ascent 23 p4258 A70-44484

Hypersonic viscous effects on space shuttle entry trajectory, measuring lift and drag in free flight regime 23 p4258 A70-44526

Space station requirements and design, discussing space shuttles, operational personnel, long term effects, logistical systems, functions, etc 23 p4259 A70-44606

Space shuttle electronics requirements, considering systems in Mercury and Gemini spacecraft and Apollo lunar and command service modules 23 p4259 A70-44612

Reusable earth surface-to-orbit shuttle, discussing cost and performance design considerations 23 p4260 A70-44618

Space rescue operations in orbit during heavy traffic of spacecraft with large passenger loadings, noting role of space shuttles and tugs 23 p4260 A70-44619

Space shuttle transition trajectory optimization for cruising flight entry, considering longitudinal control, pitchup instability and angle of attack 23 p4244 A70-44623

Space transportation, discussing space shuttles, technological, commercial, human and philosophical aspects 23 p4245 A70-44641

Free flight remote controlled teleoperator system applications in manned orbital space station/space shuttle program 23 p4260 A70-44644

Space shuttle economic risk analysis, using computer program as design and management tool 23 p4261 A70-44674

Space shuttle for low cost transportation, discussing reusable vehicles, payload, design, orbital inclination, mission capabilities and international participation 23 p4261 A70-44676

Single stage reusable ballistic space shuttle, featuring minimum payload mass ratios and high propulsive efficiency 23 p4262 A70-44686

Aeroelastic and aerothermoelastic development of winged interorbital space shuttle concerning panel flutter, stability and nonstationary lifting surface theory 23 p4273 A70-44760

Orbital space station program, discussing common module design, support, space shuttles and objectives [SAE PAPER 700755] 24 p4415 A70-45852

Space shuttle structural design concepts and fabrication, tabulating structural and heat shield materials [SAE PAPER 700768] 24 p4415 A70-45867

Economic and design aspects of universal Orbit-to-Orbit Shuttle component of Space Transportation System [SAE PAPER 700763] 24 p4416 A70-45868

Low and high chamber pressure concepts for space shuttle reaction control system [SAE PAPER 700802] 24 p4416 A70-45909

Biotechnological design of shirt-sleeve side-by-side crew station for shuttle vehicle, including pilot vision and landing experience from X-15 program [AIAA PAPER 70-1327] 24 p4416 A70-45923

Orbit-to-orbit space shuttle toroidal propellant tank design, construction and testing for outflow and slosh characteristics [AIAA PAPER 70-1325] 24 p4417 A70-45940

Earth-orbiting manned space station design, describing shuttle support and experimentation in attached and free-flying modules [AIAA PAPER 70-1299] 24 p4417 A70-45951

Integrated electronics for NASA space shuttle program, discussing costs, configurations and technologies application [AIAA PAPER 70-1252] 24 p4418 A70-45966

Earth-to-orbit space shuttle environmental control and life support system [AIAA PAPER 70-1253] 24 p4418 A70-45967

Space shuttle onboard cost effective data management system, discussing checkout, fault isolation, redundant element switching and crew interaction [AIAA PAPER 70-1293] 24 p4418 A70-45975

SPACE SIMULATORS

NT HIGH VACUUM ORBITAL SIMULATOR

Ground based space simulation of arc-type electrothermal propulsion systems, discussing test facilities 01 p0161 A70-10225

Automatic simulator for guidance system installed on cartographic satellite in circular orbit at 600 km, discussing weightlessness and vacuum simulation devices 03 p0464 A70-13834

Space simulation test results compared with analytical methods for thermal data prediction of Azur satellite 04 p0762 A70-15182

French guided satellite space flight simulator developed in search for suitable three axial onboard guidance systems

06 p1028 A70-17933

Thermal testing of planetary lander vehicle in vacuum chamber, modeling electronics modules and experiments using resistance heaters

06 p1157 A70-18128

Xenon high wattage short arc lamps for space/solar simulators, describing seals, electrodes shapes and cooling, operating characteristics, etc

13 p2384 A70-28520

Spacecraft simulator using air bearing technique to simulate low friction aspect of environment, considering application to satellite attitude control

18 p3236 A70-36064

Ames Hypervelocity Free Flight Facility, discussing aerodynamic tunnel, radiation tunnel and light gas gun for reentry simulation

22 p4006 A70-42764

SPACE STATIONS

NT ORBITAL SPACE STATIONS

NT ORBITAL WORKSHOPS

Space station operations and logistics scheduling for long duration missions, using activity network model

01 p0179 A70-10487

Space station-logistics vehicle docking and material transfer problem

01 p0193 A70-10612

Manned space station power systems design and selection problems, discussing requirements based on impacts on space station design and operations

01 p0008 A70-10625

Buoyant Venus station using superpressure balloon, discussing requirements for structural design and station position tracking capability

01 p0195 A70-10633

Mission simulation mathematical modeling technology developed for optimization of experiment program management and operational planning for manned space station missions

01 p0181 A70-10634

Space station flexibility design based on INT-21 payload capability emphasizing volume and weight factors

01 p0195 A70-10635

Spaceborne computer system for manned space station to perform functions in addition to guidance and navigation including processing

04 p0654 A70-14651

Space station damage containment and control, emphasizing safety problems and guidelines

04 p0762 A70-14933

Manned space stations development, objectives, supply, storage and waste disposal, launching and artificial gravity

05 p0923 A70-16042

Resistojet design criteria for performance modeling of ammonia propellant thrusters and manned space stations using biowaste propellants

06 p1131 A70-18026

Cold pressure welding of space station tested on Soviet Soyuz spacecraft

06 p1078 A70-18503

Onboard and ground checkout systems for space station and space shuttle operations

07 p1251 A70-20373

Space stations life support systems for air purification, water reclamation and oxygen recovery

08 p1449 A70-20630

NASA future space programs, discussing space shuttle and station, nuclear propulsion, manned Mars landing, unmanned Venus-Mercury probes, etc

09 p1762 A70-23065

Space station program development requirements, describing ground and flight tests synthesis

10 p1952 A70-24926

Space station design for long duration operation, considering optimum mix of redundancy, maintainability and checkout

12 p2313 A70-27743

Space station experiments, payloads and activity planning

16 p2983 A70-34067

Space shuttle logistics transportation for long duration space station with crew rotation and resupply cycle, considering NASA and DOD requirements

16 p2983 A70-34069

Candidate products for manufacturing on space station, emphasizing liquid solid transformations, bubbles and droplets, polymerization, and cost effectiveness

17 p3041 A70-34791

Manned space station safety, discussing hazards identification and elimination, rescue/escape systems, etc

17 p3016 A70-34792

Subsystem selection integration and technology for space base and planetary mission module /PMM/ of space station program

17 p3023 A70-34801

Habitability factors in space station crew quarter design, discussing hygiene and dining facilities

17 p3036 A70-34803

Low cost earth-moon transportation system based on shuttle station mode concept

17 p3176 A70-34806

Juridical status and sovereignty of rocket launching and cosmic stations in international law

17 p3202 A70-35786

European participation in American space program, considering space station, shuttle and tug

19 p3531 A70-37379

Manned space station design, discussing durations of scientific experiments and crew operation

19 p3532 A70-37752

Optimization model for evaluating information management systems for handling control functions of long duration space station missions

19 p3532 A70-37851

Algorithms for processing of cosmic ray data monitored by space station with multichannels for neutron and meson components recordings

20 p3698 A70-39309

Buoyant Venus station using superpressure balloon, discussing requirements for structural design and station position tracking capability

20 p3715 A70-39677

Waste management for large space stations, discussing removal, venting, utilization, processing techniques, etc

21 p3769 A70-40996

Integrated temperature and humidity control and water recovery subsystem for manned test in space station simulator

21 p3769 A70-40998

European-U.S. cooperation in shuttle and space station program, noting experience in un manned systems

22 p4127 A70-43508

Space station mission and configuration concepts, discussing experimental/operational capability, crew assignments, accommodation and module sizing

22 p4111 A70-43517

Space station development and missions, discussing general design philosophy, successive project lineage and applications programs

22 p4108 A70-43653

Rotating flexible cable-connected space station dynamic scale model, describing suspension system and artificial gravity generation

23 p4258 A70-44528

Space station requirements and design, discussing space shuttles, operational personnel, long term effects, logistical systems, functions, etc

23 p4259 A70-44606

Space station program information management system involving data acquisition and extended manned flight operation with minimum ground support

23 p4164 A70-44637

Space Station long term operations and logistics concerning inventory, configuration and cargo management

[SAE PAPER 700757] 24 p4416 A70-45871

Spacecraft sensor trends from space station research and technology requirements regarding astronomy, biomedicine and biology, earth resources, etc

[AIAA PAPER 70-1291] 24 p4418 A70-45974

International participation in U.S. post-Apollo program involving reusable space transportation system and multipurpose space station

24 p4431 A70-46123

SPACE STORAGE

Thermally induced convective mixing motion in rotating cylindrical cryogen space storage tank model under heat flux, calculating critical Rayleigh number

07 p1257 A70-19320

Payload optimization factors for orbital storage of liquid hydrogen, considering payload cost of agitation, tank pressure, pressurant weight, etc

09 p1767 A70-23262

Supercritical pressure system heat transfer characteristics for cryogenic space oxygen storage and supply

14 p2667 A70-31342

Heat pipe cooled thrust chambers for space storable propellants, discussing design feasibility for radiation and regeneratively cooled concepts

[AIAA PAPER 70-942] 16 p2965 A70-33541

Gelled space-storable oxygen difluoride and diborane analysis, including particle preparation, yield stresses, viscosities and storability

[AIAA PAPER 70-609] 16 p2962 A70-33607

Storable tubular extendible member /STEM/, discussing advantages of BI-STEM for erecting unfurlable structures in space

16 p2846 A70-34141

SPACE SUITS

Simulated zero gravity tests of force application by subjects in Apollo suits, varying worksite geometry, personnel restraints and force type and direction

01 p0038 A70-10964

Life support system model using heart rate to monitor man doing physical work in space suits under simulated space environment

02 p0245 A70-12146

Space suit meteoroid protection for extravehicular activity, discussing Gemini and lunar surface EVA suits and bumper concept

[AIAA PAPER 69-366] 04 p0645 A70-15402

Open loop portable life support system containing light breathing vest within space suit

05 p0806 A70-16123

Computerized mass spectrometer for monitoring atmosphere in astronaut suits and cabin

[AIAA PAPER 69-1016] 07 p1249 A70-19730

Antigravitation suit effects on rheoencephalography changes during Valsalva maneuver and horizontal-passive orthostatism transition in humans

07 p1212 A70-19738

Water cooled space suits automatic control based on physiological changes in astronaut during hard work

09 p1627 A70-23458

Extravehicular activity space suits evolution emphasizing appropriate body temperature control under various conditions and work loads

10 p1824 A70-24412

Minimum ventilation volume requirement for space suit relation to air contaminants and body gas discharge intensities and locations

13 p2358 A70-29333

Space suit thermal insulation properties, wear durability and nonflammability improvements, reflecting techniques in fabricating cryogenic multilayer insulation systems

[AIAA PAPER 70-851] 16 p2939 A70-33918

Human cardiac flow during acceleration as function of time with and without anti-g suit, using electric plethysmograph

17 p3040 A70-35915

Portable contingency transfer life support system for crewman of Apollo missions providing oxygen and cooling

20 p3580 A70-39441

Rapid decompression due to pressure loss in space vehicle or suit, discussing fulminating hypoxia, mechanical trauma and ebullism

22 p3973 A70-43639

Decompression sickness prevention in space flight, discussing suit and capsule pressure, extravehicular activity and alleviation of conditions

22 p3980 A70-43640

SPACE SURVEILLANCE

Aircraft and ship position surveillance by satellites system with independent capability and undelayed voice and digital communication

09 p1723 A70-23043

Radar target optimal detection algorithms in cloud of passive reflectors, noting space surveillance regularities

15 p2696 A70-31516

Satellite based systems for aircraft surveillance, discussing satellite power and bandwidth conservation, pulse techniques and interrogators

18 p3288 A70-36391

SPACE SURVEILLANCE [SPACEBORNE]

Planetary film system /PFS/ camera-processor-scanner for scientific spaceborne applications, detailing design and performance

03 p0490 A70-13664

Satellite surveillance in cloud and weather modification, considering area selection for cloud seeding, atmospheric energy redistribution, etc

[AAS PAPER 69-621] 04 p0677 A70-14645

Air traffic control surveillance and data system using synchronous satellites in inclined elliptical orbits for communications and aircraft position determination

12 p2268 A70-27644

Ground and cockpit initiated collision avoidance commands system based on satellites surveillance of aircraft position and velocity data

19 p3466 A70-38242

SPACE SYSTEMS ENGINEERING

U AEROSPACE ENGINEERING

SPACE TEMPERATURE

Space temperature determination, discussing planet or satellite absorption and radiation rate dependence on surface characteristics, solar radiation, planet albedo and thermal radiation

05 p0914 A70-16629

SPACE TOOLS

Welding of satellite and spacecraft segments in space, discussing arc, electron beam, resistance, vacuum diffusion, cold pressure and brazing techniques

05 p0855 A70-16375

Cold pressure welding of space station tested on Soviet Soyuz spacecraft

06 p1078 A70-18503

Orbital zero and low g environment utilization for space manufacturing processes and related operational and tooling requirements

16 p2919 A70-33718

Systems design and instrumentation for chemical/biochemical space manufacturing at zero g, developing scaling laws for transition to larger production units

16 p2919 A70-33719

SPACE TRANSPORTATION

Magnetomotive tools and power systems for maintenance, repair and assembly in space weightless environment

19 p3436 A70-37949

Space maintenance tools necessity on long duration manned space missions 1972-1980

19 p3442 A70-38836

SPACE TRANSPORTATION

Plasma devices for spacecraft propulsion taking into account electrothermal, electromagnetic and electrostatic systems

05 p0895 A70-15817

Reusable space shuttle employing two stages resembling subsonic aircraft for carrying passengers and cargo between earth surface and orbit

07 p1392 A70-18873

Low operating cost space shuttle system for cargo and personnel transportation to earth orbiting stations involving reusable winged vehicles

[AIAA PAPER 70-242]

07 p1396 A70-20376

Structural composite materials for thermal protection of reusable weight-saving vehicles in space transportation system

[AIAA PAPER 70-272]

07 p1397 A70-20382

Environmental test facilities for space transportation systems, discussing aerodynamic, propulsion and structural problems, operational requirements and existing capabilities

[AIAA PAPER 70-275]

07 p1251 A70-20384

Space transportation system booster and orbiter development ground and flight tests, considering vehicle size and reusability requirements

[AIAA PAPER 70-276]

07 p1397 A70-20385

Space transportation system objectives including design, operations and economics

[AIAA PAPER 70-263]

07 p1398 A70-20393

Reusable space transportation vehicle design evolution, considering staging, aerodynamic shapes, etc

[AIAA PAPER 70-265]

07 p1398 A70-20395

Reusable passenger and cargo shuttle system based on integral launch and reentry vehicle (ILRV), considering propulsion systems, aerodynamic and structural configurations, aerothermal characteristics, etc

08 p1582 A70-20689

NASA earth-orbit shuttle (EOS) for achieving routine arrival, conventional landing after orbital flight and reentry

09 p1766 A70-22677

Low cost orbital space transportation system with shuttle service, discussing booster and configuration selections, weight, costs, etc

[AIAA PAPER 70-256]

13 p2506 A70-29615

Reusable earth-moon and deep space return transportation, assuming extraterrestrial nuclear rocket propellant source

14 p2653 A70-30766

Space shuttle logistics transportation for long duration space station with crew rotation and resupply cycle, considering NASA and DOD requirements

16 p2983 A70-34069

Low cost earth-moon transportation system based on shuttle station mode concept

[AAS PAPER 70-058]

17 p3176 A70-34806

Legal aspects of suborbital space transports based on air transportation concepts

18 p3350 A70-36661

Suborbital space transports problem solution by recoverable jet orbital or jet assisted aircraft, discussing implications of Concorde supersonic flight

18 p3350 A70-36663

Extraterrestrial transport trajectory control by jet assistance

18 p3333 A70-36670

Primary solar electric propulsion for automated space transportation propulsion program, considering performance and technology readiness

[AIAA PAPER 70-1115]

20 p3691 A70-40228

Two stage reusable shuttle for space transportation, discussing aerodynamic characteristics, thermal protection system, performance requirements, etc

21 p3929 A70-40981

Space transportation system, discussing shuttle costs, aerodynamic and propulsion configurations, management planning, etc

21 p3929 A70-40982

Nuclear rockets for interorbit transportation, discussing reuse economics, propulsion system performance, etc

21 p3886 A70-40987

Reusable space transporter predicted applications evolution from earth circling to space bases and space colonies for deep space missions

21 p3930 A70-41495

Operational safety of nuclear rockets in orbit-to-orbit transportation in regard to radiation doses from plume and reactor, including malfunction condition

22 p4070 A70-43183

Space shuttle mission and economics, discussing cost effectiveness, capabilities, satellite transportation payloads and traffic forecasts

22 p4127 A70-43505

Space transportation systems cost comparison, taking into account national program goals and near/far orbit traffic fraction

23 p4285 A70-44511

Space transportation, discussing space shuttles, technological, commercial, human and philosophical aspects

23 p4245 A70-44641

Economic and design aspects of universal Orbit-to-Orbit Shuttle component of Space Transportation System

[SAE PAPER 700763]

24 p4416 A70-45868

Space transportation system concept and operational objectives, discussing configurational aspects, aerodynamic complexity, propulsion systems, payloads, performance and aerothermodynamic constraints, etc

[AIAA PAPER 70-1249]

24 p4418 A70-45965

International participation in U.S. post-Apollo program involving reusable space transportation system and multipurpose space station

24 p4431 A70-46123

SPACE TUGS

Space based reusable manned/unmanned tug, discussing potential missions, system requirements and auxiliary hydrogen oxygen propulsion system

[AIAA PAPER 70-719]

16 p2964 A70-33533

Space station with shuttle and tug service, discussing reduced costs, reusability and commonality

18 p3333 A70-36318

Aerodynamic braking for returning high speed recoverable space tug to low earth orbit

23 p4259 A70-44611

SPACE VEHICLE CHECKOUT PROGRAM

Temperature distribution causes in earth orbiting satellite, outlining thermal control and temperature calculation methods and prelaunch ground tests

05 p0956 A70-15813

Digital computer impact on aerospace sciences and technologies in terms of computerized design, interactive graphics, flight simulation, Apollo systems checkout, etc

09 p1642 A70-23277

Apollo lunar module mechanical acceptance tests evaluation based on reported flight anomalies review

[AIAA PAPER 70-401]

10 p1951 A70-24904

Launch vehicle automatic checkout methods emphasizing guidance and control equipment performance in real time operations

[AIAA PAPER 70-393]

10 p1952 A70-24912

Apollo Spacecraft Certification Test Program at replaceable hardware assembly level noting future manned spacecraft applications

[AIAA PAPER 70-375]

10 p1952 A70-24928

Apollo Lunar Module Test Program Management, discussing test requirements optimization, control, planning, etc

[AIAA PAPER 70-368]

10 p1952 A70-24932

Automatic test and checkout system difficulties in space vehicles

11 p2032 A70-26338

Checkout systems for shuttle and orbiting space stations, discussing shift from ground to onboard operation

12 p2208 A70-27691

Apollo Guidance, Navigation and Control system prelaunch checkout, flight experience and error analysis

[AIAA PAPER 69-891]

14 p2615 A70-30758

Spacecraft onboard computer for prelaunch targeting constants verification through checksum equation and error detection scheme, using generated number sequence

[AIAA PAPER 69-946]

14 p2599 A70-30769

Real time simulation of space vehicle and ground support equipment by digital computer for launch programs checkout

16 p2870 A70-33733

Onboard automatic checkout systems for manned space vehicles, investigating data management development costs for thorough tradeoff studies

16 p2889 A70-33803

Digital data acquisition and control system for acoustic testing of large spacecraft

17 p3062 A70-35506

Computerized automatic ground equipment (CAGE) as intelligence system for checkout and control of launch vehicles and spacecraft

19 p3397 A70-37915

Surveyor spacecraft testing at Environmental Test Laboratory, describing facilities and innovations designed for temperature extremes

19 p3532 A70-37960

Environmental tests and checkout procedures for Azur satellite subsystems and subassemblies integration into flight readiness

19 p3533 A70-38289

Spacecraft test programming at test facilities providing vacuum and thermal space simulation suggested by Azur and Dial satellite development experience

19 p3399 A70-38290

Cost effective spacecraft testing in terms of statistical reliability, program effectiveness and equipment costs

19 p3554 A70-38293

NASA automatic checkout systems for Saturn 5 stages and instrument units

21 p3803 A70-40770

Computer real time Apollo simulation, checkout and training system duplicating actual mission for flight controllers in Mission Control Center

21 p3805 A70-41198

Programming and checkout of computer for ELDO inertial guidance system, including flight simulation and autopilot tests

[AIAA PAPER 69-961]

21 p3795 A70-41862

SPACE VEHICLE CONTROL

U SPACECRAFT CONTROL

SPACE VEHICLES

U SPACECRAFT

SPACE WEAPONS

Future U.S. aerospace power in terms of military technology and defense policies and attitudes

05 p0960 A70-16633

SPACE-TIME CONTINUUM

U RELATIVITY

SPACE-TIME FUNCTIONS

Four dimensional optimal interpolation for maximum wind velocity components, calculating spatiotemporal correlation functions

01 p0135 A70-10205

Gravitational theories scheme combining tetrad field with bimetric theories, including general relativity, space-time dependent Lorentz rotations, red shift and light deflection

01 p0141 A70-10232

Gravitational field equations in flat space, using quaternion representation of general relativity Riemannian space time in terms of spinors

01 p0141 A70-10279

Field equations in particle neighborhood for spherically symmetric metric in conformal gravitation theory, considering particle inertial mass as function of position

01 p0142 A70-10492

Motion equations of material point in general relativity theory found analogous to equations in classical mechanics for metric in introduced physical space

01 p0146 A70-11443

F 2 layer state prediction as function of solar activity by series expansion for describing space-time variations of monthly F 2 medians critical frequencies

01 p0083 A70-11547

Einstein equations for five dimensional spherically symmetric space solved using gravitational constant without singularities on Schwarzschild sphere

05 p0880 A70-15793

Relativistic length contraction, time dilation and classical electrodynamics formulated in terms of special relativity using Galilean transformations

05 p0881 A70-15875

Seasonal variation in ionospheric radiation absorption related to time variation between sunrise and constant angle attainment of sun

05 p0842 A70-16758

Criteria for particle motion with constant acceleration in curved space-time

06 p1104 A70-17186

Back reflection of zero-mass scalar or vector waves in gravitational fields produced by non-Lorentz part of spatial metric components

07 p1387 A70-19923

Solar system cosmic ray time-space variations analysis based on simulation of meteorite nuclear processes

07 p1372 A70-20338

Space-time singularities of gravitational collapse and cosmology indicated by timelike or null geodesic incompleteness

08 p1575 A70-21353

Asymptotic model for stationary radiative stationary transitions using Newman-Penrose spin coefficient approach to gravitational radiation for Riemann space-time

11 p26547 A70-26547

Metric analyticity around each point of C cubed static vacuum space-time for Einstein equations

11 p2084 A70-26553

Neutral-dominated plasma turbulence, discussing space-time plasma probe correlation functions for electron density fluctuations measurements

11 p2095 A70-26757

Turbulent flowing plasma, analyzing wavenumber frequency dependent spectral function and space-time correlation function

11 p2096 A70-26768

Clock synchronization in general relativity theory, investigating temporal and spatial relations in four dimensional continuum using simultaneous hypersurface

12 p2272 A70-27357

General relativity integral conservation laws of system of bodies in curved space-time obtained from symmetrical energy-momentum tensor

12 p2274 A70-28222

Eulerian space-time correlations of velocity and pressure for universal homogeneous turbulence by separating kinematic convection effects of large eddies from velocity assumption

13 p2386 A70-28645

Oscillator perturbed motion of elastic body in general relativity space time, discussing energy tensor, unitary speed vector and density 13 p2451 A70-28954

Kerr-Schild space-time manifolds with electromagnetic field, solving Einstein equations 13 p2451 A70-29166

Pseudoisotropic surfaces in Minkowski space-time with proof of existence, formulating congruencies of normal fiber 13 p2452 A70-29634

Homogeneous isotropic turbulence velocity field space-time variable correlation functions in fluid flow 15 p2719 A70-31487

Pulsar models distinguishing by Huygens principle in flat space-time, describing electromagnetic propagation in Riemann space 17 p3173 A70-35757

Circular orbit stability in stationary axisymmetric space-times dependence on angular momentum per unit mass increases outward from symmetry axis 18 p3317 A70-37004

Ricci curvature tensor perturbations of space-time on Alfvén wave fronts 19 p3472 A70-38935

Midtropospheric frontogenesis, using three hourly rawinsonde data for isentropic trajectories to describe velocity field in space and time 20 p3664 A70-39374

General relativity integral conservation laws of system of bodies in curved space-time obtained from symmetrical energy-momentum tensor 20 p3673 A70-40097

Invariance principle in mechanics of deformable continua connecting three dimensional and relativistic space-time formulation 21 p3940 A70-42097

Chronometrically invariant formulation of Petrov gravitational fields algebraic classification at space-time fixed point in general relativity 21 p3851 A70-42239

Einstein equations solved for steady axisymmetric physical schemes by varying Kerr metric constants, considering electromagnetic field case 22 p4073 A70-42717

Space-time Riemann metric for scalar-tensor gravitational theories with arbitrary omega parameter 22 p4104 A70-42991

Gravitational equations with oscillatory physical singularity, noting Bianchi type IX homogeneous metric 22 p4063 A70-43477

Metric evolution in oscillatory mode of approach to singularity in homogeneous cosmological models in asymptotic region, showing Kasner epoch dependence on perturbation 22 p4075 A70-43478

Clock synchronization in general relativity theory, investigating temporal and spatial relations in four dimensional continuum using simultaneous hypersurface 22 p4075 A70-43598

Optical point characteristics of static spherically symmetric space-times of de Sitter universe, Einstein universe and exterior Schwarzschild field 23 p4239 A70-43821

Einstein-Rosen matter concept given by space-time with isometric domains, discussing hypersurface derivatives 24 p4379 A70-45486

SPACE-TIME METRIC

U SPACE-TIME FUNCTIONS

SPACEBORNE PHOTOGRAPHY

NT SATELLITE-BORNE PHOTOGRAPHY

Mars craters and crater-like objects catalog from Mariner 4 photographs, statistically analyzing diameter-frequency relations 01 p0179 A70-10523

Spacecraft orientation from onboard stellar photographs, calculating absolute and relative elements, accuracy and camera parameters 01 p0198 A70-11512

Rb-75 adapted reconnaissance cameras error sources on basis of processed Echo 2 satellite photographs 02 p0294 A70-11772

Space research photography role in studying earth and moon atmospheres and surfaces, determining spectral bands for contrast 03 p0483 A70-13168

Planetary film system (PFS) camera-processor-scanner for scientific spaceborne applications, detailing design and performance 03 p0490 A70-13664

Meteorological satellite TV cameras development, discussing image sensors and tabulating characteristics 03 p0491 A70-13665

Multispectral scanner technology for earth resources exploration from space 03 p0492 A70-13671

Visual interpretation of moon and Mars surface photographs taken from satellites, analyzing craters and bumps 04 p0686 A70-14266

Cloud cover consequence on earth photographing space missions simulated by Monte Carlo method using worldwide statistics 04 p0676 A70-14636

Apollo 9 space photography of earth surface and use for quantitative analysis of earth resources, including supporting aircraft photography 04 p0687 A70-14650

Multiband photographic system for automatic earth resources aerial sensing and lunar orbital mapping with manual override provisions 04 p0687 A70-14657

Remote sensing aerial and space surveys application to agriculture, forestry and water resources, discussing imaging systems and information acquisition and analysis techniques 05 p0838 A70-16164

Earth resources remote sensing investigations from spacecraft and aircraft, noting Gemini and Apollo photography, hydrological surveys and radar techniques 05 p0849 A70-16450

Modern astronautics, discussing postwar rocket motors and ballistic missiles construction, ELDO program, moon and planetary photographs and space walk, etc 05 p0960 A70-16627

Spatial resolution and repetition intervals for optimum utilization of space-derived remotely sensed data of ocean surface features 06 p1060 A70-18593

Lunar photography interpretation, discussing topographic maps obtained by spacecraft 07 p1284 A70-19779

Geology from air covering aerial and space photography, nonvisible spectrum utilization, photograph transmission from Mars and moon, balloon flights, etc 07 p1272 A70-20225

Lunar Orientale region structure geological interpretation based on Lunar Orbiter 4 photographs 09 p1751 A70-22196

Automated crop surveys from integrating observations made at different times/time dimensioning/ during growing season, noting earth resources satellites role 09 p1666 A70-22263

Multiband high resolution spaceborne imagery telemetry with optical mechanical scanners from earth orbiting satellites in earth resource applications 09 p1677 A70-22873

EROS program earth imaging models characteristics, describing airborne and spaceborne film return and global and geosynchronous space data transmission 09 p1678 A70-22889

Mars primitive atmosphere analyzed from statistics of craters quantity as function of diameter, using Mariner 6 and 7 probe photographs 09 p1763 A70-23318

Crop species and soil conditions identification from space by comparison of multivase and multiemulsion photography, assigning standard signature to optical fields 10 p1879 A70-24745

Gemini 12 photographs examined for urban and transportation data content 12 p2228 A70-26909

Spaceborne photography for detecting and identifying road networks, using color separation plates and photograph enlargement 12 p2216 A70-26910

Aerial oceanographic photographic image enhancement by including blue spectral region, presenting Apollo 9 space photographs 12 p2217 A70-26917

Multistage sampling of space and aircraft remote sensor imagery for forest inventory 12 p2228 A70-26921

Photography for geological interpretation, comparing color, color IR, and black-and-white photographs from spacecraft and aircraft 12 p2221 A70-26956

Relative control data incorporation into sequential or simultaneous analytical triangulation systems, considering extraterrestrial photographs reduction 12 p3088 A70-27875

Photographic apparatus for lunar orbiters and Apollo spacecraft, describing lunar surface closeup camera for astronauts, launch photography, etc 13 p2406 A70-28926

Lunar surface terrain types and chemical composition based on Surveyor pictures 14 p2634 A70-30193

Apollo 9 scientific multispectral photography mission, discussing meteorological support aspect of real time planning 14 p2610 A70-30614

Nimbus weather satellite as laboratory for sensors collecting data for global weather system, describing launching, attitude control systems and cameras 14 p2654 A70-31149

Cloud cover stationary pictures by spin-scan camera in synchronous orbit over Pacific converted into motion pictures showing cloud pattern changes and storm development 14 p2587 A70-31150

Light sources design with variable uniform luminance for space exploration cameras calibration [JPL-TR-32-1470] 15 p2737 A70-32037

Oceanographic phenomena inference from satellite cloud photographs, developing seasonal cloud climatology for Peru Current area 16 p2897 A70-33713

Mars photography from flybys and orbiters, communicating planetary scene information to eye-brain receiver of earth based interpreters 16 p2912 A70-33976

Combination shutter and filter-changing mechanism for spacecraft vidicon cameras 16 p2914 A70-34150

Mariner 6 and 7 TV camera pictures of Mars during approach and encounter, discussing IR spectroscopy, celestial mechanics experiment and Martian terrain 17 p3158 A70-34875

Gemini spacecraft photograph patterns revealing relationship between cloud formation and topography 18 p3258 A70-36298

Lunar regolith depth measurement by Lunar Orbiters 4 and 5 high resolution photographs, discussing thickness relation with sinuous rilles in marial regions 18 p3319 A70-37054

Mariners 6 and 7 orbits determination by weighted least squares estimation based on common surface features in overlapping TV pictures [ALAA PAPER 70-1066] 19 p3529 A70-38879

Earth resources data from man operated airborne/spaceborne sensors and data handling systems, examining Apollo Applications Program 20 p3616 A70-39056

Geological and cartographical data acquisition and processing, considering aircraft and satellite-borne photography of earth surface 20 p3616 A70-39061

Orbital photography interpretation from test rockets and Apollo-Gemini spacecraft, considering environmental applications 20 p3634 A70-40321

EROS program earth imaging models characteristics, describing airborne and spaceborne film return and global and geosynchronous space data transmission 21 p3829 A70-41871

Mapping from satellite-collected earth surface images, emphasizing optical/mechanical scanner images 22 p4037 A70-43089

Meteorological TV imaging systems development in last decade, including low and synchronous altitude camera, sensors, orthicons, etc 23 p4193 A70-43963

Apollo and Skylab photographic systems, describing equipment and missions 24 p4333 A70-45360

Earth Resources Technology Satellites (ERTS) providing high resolution image data regarding agriculture, geology, hydrology, geography, etc [SAE PAPER 700761] 24 p4416 A70-45869

SPACECRAFT

Registration procedure for space exploration objects 17 p3202 A70-35788

Computerized assembly of production space vehicle with controlled mass properties, discussing automated system of data collection, storage and retrieval [SAWE PAPER 851] 20 p3639 A70-40375

Astronautics - IAF Conference, New York, October 1968, Volume 1, Spacecraft systems 23 p4262 A70-45001

SPACECRAFT ANTENNAS

Radiation enhancement from spherical antenna by overdense plasma coating, noting use for reentry vehicle blackout prevention 02 p0262 A70-12601

High gain antenna for 1973 Mars Soft Lander data transmission using sensors and digital computer to achieve autonomous precision pointing to earth [AAS PAPER 69-578] 04 p0716 A70-14653

Oil vapor lubricated bearing for compensated antenna of spin stabilized spacecraft, discussing service life, power and storage in sintered porous material [DGLR-69-062] 07 p1391 A70-18775

Spacecraft phased array antenna techniques, discussing tape helix radiators design for applications in navigation, TV broadcasting and data relay systems [ALAA PAPER 70-425] 11 p2015 A70-25452

Spacecraft high efficiency phased arrays with deployable helix radiating elements, considering gain and weight factors 12 p2197 A70-27930

Oil-vapor lubricated ball bearing system for deployable spin-free antenna of spin stabilized spacecraft 13 p2349 A70-28843

Magnetospheric plasma density effects on impedance of VLF electric field spacecraft antenna 13 p2397 A70-29186

High gain helix radiators for spacecraft phased arrays, measuring performance vs design parameters 15 p2678 A70-32600

Lunar Module landing radar system design, discussing antenna and electronics assembly 16 p2865 A70-33681

- Stepper motor for pointing Surveyor spacecraft TV transmitting antenna and solar panel at earth and sun
16 p2845 A70-34110
- Mechanically despun multifrequency, attitude sensing antenna for spin stabilized spacecraft, deep space probes, tactical communications and community broadcast applications
16 p2986 A70-34159
- Flush mounted lightweight antennas for rockets, discussing construction radiation patterns, input impedance, etc
17 p3053 A70-35273
- Thermoelectric outer planets spacecraft /TOPS/ attitude control subsystem providing accurate antenna pointing and trajectory correction engine thrust vector orientation
21 p3930 A70-41801
- Thermoelectric outer planet spacecraft /TOPS/ structural problems associated with high gain antenna and electronic equipment
21 p3930 A70-41803
- Flexible antennas and solar panels effect on dynamic behavior and control system response of dual spin spacecraft
21 p3931 A70-41855
- Sheaths effect on capacitance of plane grid capacitor in plasma, discussing satellite aerials admittance
21 p3792 A70-42046
- SPACECRAFT CABIN ATMOSPHERES**
- Volatile contaminants emitted from space cabin construction materials tested under simulated space conditions
01 p0031 A70-10237
- Apollo space cabin atmospheres, evaluating diluent N effect on decompression sickness in intermittently exercising men
01 p0032 A70-10368
- Molecular sieve mixed gas adsorption and vacuum desorption of carbon dioxide in Apollo spacecraft cabin
01 p0040 A70-11450
- Physiological effects on men of 10 hr exposure to nitrogen-oxygen mixture followed by pure oxygen 4 hr exposure, simulating conditions during EVA
03 p0436 A70-13899
- Space cabin atmosphere effects on primary and secondary immunological responses in mice relative to spleen weight and antibody titers following antigenic stimulation
03 p0437 A70-14062
- Spacecraft cabin atmosphere effects on mice primary and secondary immunological responses relative to spleen histochemical and biochemical changes in enzyme activity
03 p0437 A70-14063
- Ground level denitrogenation duration effects on decompression sickness occurrence in space cabin atmospheres
06 p0999 A70-17289
- Physiological and hygienic data on oxygen partial pressure in space cabin atmosphere analyzed for manned space flights
07 p1220 A70-19502
- Human exhaled air contaminants analysis role in disease diagnosis, metabolism study and spacecraft cabin atmosphere changes
07 p1220 A70-19514
- Computerized mass spectrometer for monitoring atmosphere in astronaut suits and cabin
[ALAA PAPER 69-1016] 07 p1249 A70-19730
- Soviet monograph on toxicology of active human life gaseous products, noting implications for artificial atmosphere formation in pressurized compartments
09 p1624 A70-22549
- Physiological and hygienic data on oxygen partial pressure in space cabin atmosphere analyzed for manned space flights
11 p1991 A70-26101
- Human exhaled air contaminants analysis role in disease diagnosis, metabolism study and spacecraft cabin atmosphere changes
11 p1991 A70-26113
- Combustion efficiency and rate in oxygen enriched spacecraft atmosphere
17 p3177 A70-35210
- Hypoxia warning systems using polarographic sensor and miniaturized electronics for face-mask and cabin installation for aircraft and spacecraft
20 p3579 A70-39429
- Systemic bacterial infection resistance in white mice exposed to simulated hypobaric normoxic space cabin environment
20 p3572 A70-39431
- Prototype electrolyzer for generating oxygen from water vapor under various atmospheric conditions, noting spacecraft cabin application
20 p3564 A70-39696
- NASA aircrew oxygen system, describing carbon dioxide control and oxygen generation subsystems
21 p3768 A70-40990
- Oxygen-nitrogen generation for long manned space flight based on liquid center dual matrix electrolysis cell
21 p3768 A70-40992

- Corona and voltage breakdown for spacecraft electrical components in low pressure helium-oxygen atmospheres, measuring between parallel plates
21 p3851 A70-42124
- Dynamic spacecraft cabin atmospheres for extended operation, discussing gas composition, weightlessness and various stress factors
22 p3980 A70-43643
- Alpine 11,500 ft air atmosphere for manned orbiting laboratory, noting reduced risk of dysbarism during space suit operations
22 p3980 A70-43645
- Space cabin atmosphere regeneration by unicellular algae photosynthesis, discussing Chlorella cultivation procedures and additional functions in life support systems
23 p4154 A70-44655
- SPACECRAFT CABIN SIMULATORS**
- Crew locomotion effect on spacecraft attitude control using space cabin simulator tests
01 p0036 A70-10853
- Apollo mission simulation, discussing Command Module Simulator /CMS/, onboard computer system and dynamic visual presentation via infinity-optics display
[SMPT PAPER 105-74] 09 p1655 A70-22226
- Command module simulators for Apollo astronaut training in moon landing, using computer, exterior visual scenes and spacecraft interior replica
21 p3804 A70-41195
- Lunar module simulator for Apollo flight training using computers, digital conversion, cockpit replica, infinity-optics display and instructor control
21 p3805 A70-41196
- Trace contaminants associated with habitation by man in space cabin simulator by gas chromatography and IR and mass spectroscopy
21 p3770 A70-41482

SPACECRAFT CABINS

- Artificial gravitation parameters for manned compartments of spacecraft, analyzing permissible angular velocity and rotation radius regarding vestibular-vegetative disorders
04 p0760 A70-14446
- Spacecraft cabins illumination conditions selection based on cosmonaut visual perception of luminous objects
07 p1221 A70-19515
- Spacecraft cabins illumination conditions selection based on cosmonaut visual perception of luminous objects
11 p1991 A70-26114
- Environmental control of confined spaces and life support systems by Pontryagin maximum principle of optimal control theory, discussing cabins, heat exchanger, etc
11 p1991 A70-26363
- Artificial gravitation parameters for manned compartments of spacecraft, analyzing permissible angular velocity and rotation radius regarding vestibular-vegetative disorders
13 p2503 A70-28471
- Closed compartment fire mathematical model to analyze combustion parameter effects, atmosphere pressure and temperature during fire
17 p3198 A70-35646
- Flame resistant nonmetallic materials for manned spacecraft and aircraft interiors, considering fibers, polymers, paper and composites
22 p4058 A70-42295
- Decompression sickness prevention in space flight, discussing suit and capsule pressure, extravehicular activity and alleviation of conditions
22 p3980 A70-43640

SPACECRAFT COMMUNICATION

- NT REENTRY COMMUNICATION**
- Communications subsystem configuration for orbital manned space station, describing data rates and processing, multiplexing and associated modulation methods
[ALAA PAPER 69-1079] 01 p0043 A70-10627
- HEOS 1 satellite for interplanetary space exploration, describing eccentric orbit, structure, power supply, attitude measurement and control, spin rate control, telemetry and telecommand systems
01 p0196 A70-11114
- HEOS 1 satellite telemetry, telecommand and tracking systems, noting data transmission degradation due to high solar activity
01 p0045 A70-11115
- Multipath spectral and statistical characteristics in VHF satellite-aircraft link, discussing geometric considerations and reflection from Gaussian surfaces
02 p0259 A70-12565
- Solar phenomena effect on VHF communications between synchronous satellite relay and earth ground stations
02 p0259 A70-12566
- UHF shallow-cavity crossed-slot aircraft antenna for satellite to air communications
02 p0269 A70-12585
- Apollo 11 electronics, discussing inertial measurement unit, optical navigation system, command

module computer, communication network, TV and experimental packages

- 02 p0270 A70-12633
- Intelsat satellites telemetry and telecontrol /ITTC/, describing Fucino plant design and operation
02 p0263 A70-12647
- Phase lock loop circuit for spacecraft communication noise filtration, describing linear study of first-four-order loops
03 p0448 A70-13537
- Troposphere effects on low incident Explorer 22 satellite signal amplitude, noting role of diffraction
03 p0449 A70-13611
- Bandwidth reduction for interlacing two voice and three additional teletype subchannels in standard phone frequency range for use in VHF/UHF satellite link
03 p0450 A70-13623
- Mission design, spacecraft characteristics, communications and experimental approaches for Viking 1973 Mars Project
03 p0576 A70-14020
- High gain antenna for 1973 Mars Soft Lander data transmission using sensors and digital computer to achieve autonomous precision pointing to earth
[AAS PAPER 69-578] 04 p0716 A70-14653
- Linear phase detection using FM demodulation for Apollo S band communication system eliminating baseband voice interference with telemetry
[AAS PAPER 69-610] 04 p0648 A70-14659
- Phase feedback demodulation technique to analyze telemetry performance degradation caused by voice interference in modes of Apollo communication system, providing linear detection scheme
[AAS PAPER 69-609] 04 p0648 A70-14660
- Ground station location, equipment and function for radio communication with German research satellites, noting NASA and ESRO cooperation
04 p0664 A70-15304
- Meghdoot program for satellite network communications technology applications to national goals in India
04 p0757 A70-15670
- Satellite communications influence on ground stations design, describing steerable antenna and receive and transmit configurations for domestic station
05 p0811 A70-16095
- Spacecraft telecommunication and tracking systems in Gemini, Mercury and Apollo programs, emphasizing Apollo command and lunar modules equipment and mission ground stations
05 p0813 A70-16326
- Aerodynamic damping measured for parabolic satellite communication antenna with pronounced flexibility in azimuth drive, simulating by scaled wind tunnel models
05 p0938 A70-16455
- Assignment problem for finite set elements pairing, discussing probabilistic formulations and applications to satellite communications problems
05 p0815 A70-16716
- PCM time division satellite multiple access communication system to increase time slot utility, considering individual earth station control and common signaling circuit features
06 p1011 A70-18409
- Acquisition system design and experimental results for time division multiple access satellite communication system
06 p1011 A70-18410
- Clock synchronization system design and test results for PCM time division multiple access satellite communication system
06 p1011 A70-18411
- L band transponder design for aeronautical satellite, giving block diagrams
07 p1234 A70-19292
- Radio wave refraction and field strength in model Venus atmosphere for various spacecraft trajectories
07 p1235 A70-19492
- Communication satellite transponders design, cost, reliability, manufacturing, testing and future developments
07 p1241 A70-19620
- Deep space network /DSN/ functions and characteristics, discussing spacecraft control, data acquisition, orbit determination, data processing, etc
08 p1481 A70-20614
- Laser and quasi-laser systems modulation for wide spectrum communications, discussing global potentials and application as low cost satellite links
08 p1459 A70-20802
- UHF satellite receiver for binary FSK data collection system using matched integrate and dump filter detectors
08 p1459 A70-20804
- Optimal satellite communication system design concerning station spectrum and interference limits
08 p1459 A70-20805
- Low noise tunable parametric amplifier for tactical satellite communications, discussing characteristics and varactor diode mount
08 p1471 A70-20806

- Modern selection for satellite communications system, considering bandwidth and power constraints, propagation characteristics, point-to-multipoint operation, etc 08 p1459 A70-20807
- German satellite ground station system central station design, discussing cooperation between aerospace institute and electronic company 08 p1481 A70-21368
- Atmospheric turbulence regarding refractive index fluctuations over UK measured by radio telescope, discussing effects on satellite communication 09 p1667 A70-22384
- ARCOM earth terminal for Domestic Satellite Communication System bringing telephone, TV and data service to northern Canada 09 p1656 A70-22945
- Optical transmission technology for aerospace launch operations investigated on wideband communication systems projects involving use of gallium arsenide lasers and diodes 09 p1640 A70-23776
- Independent burst and burst coherent TDMA methods compared for ground station-satellite communication 10 p1836 A70-24340
- Error probability degradation for digital satellite communication systems, employing multiphase signal sets distorted by bandlimited filtering 10 p1836 A70-24342
- Adaptive multiple access satellite communication system at millimeter wavelengths in time- and frequency-division modes, compensating rainfall attenuation 10 p1838 A70-24358
- Multiple access technique for millimeter wave satellite communications, noting weight and size of on-board equipment 10 p1838 A70-24359
- Demand assignment economics relative to ground stations in satellite telecommunication systems 10 p1838 A70-24360
- TDMA demand-assigned satellite communication system developed for INTELSAT, discussing PCM, voice signals and channels, etc 10 p1839 A70-24362
- Review of 1969 London International Conference on Digital Satellite Communication session covering modulation, synchronization and coding [AIAA PAPER 70-464] 11 p1997 A70-25409
- Communications and attitude control on Phase 2 satellite for Defense Satellite Communication System [AIAA PAPER 70-493] 11 p1998 A70-25427
- Satellite communications subsystem performance testing from initial integration through launch under all environmental exposure 11 p2030 A70-25445
- Microwave tubes for high power transmission from space to ground and in deep space communications, discussing klystrons, TWT and crossed field amplifiers [AIAA PAPER 70-435] 11 p2016 A70-25456
- Satellite Integrated Communications, Navigation and Identification System for implementing worldwide command-control system and equipment and signal integration [AIAA PAPER 70-503] 11 p2000 A70-25466
- Navigational satellite communication experimental design emphasizing mobile, ship or aircraft station technical characteristics [AIAA PAPER 70-407] 11 p2001 A70-25469
- S band communications repeater using retrodirective phased array on synchronous altitude data relay satellite /DRS/ for intersatellite and ground links [AIAA PAPER 70-424] 11 p2001 A70-25472
- LES 5 and 6 feasibility demonstration of satellite communications at VHF/UHF to mobile terminals and as test beds, emphasizing stationkeeping and attitude control [AIAA PAPER 70-494] 11 p2121 A70-25474
- Low noise wideband uncooled preamplifier for small unattended satellite communication terminals, discussing theory, design and performance [AIAA PAPER 70-419] 11 p2016 A70-25485
- Report on Spectrum Utilization and System Constraints session of Intelsat/IEEE International Conference on Digital Satellite Communication, London, November 1969 11 p2002 A70-25486
- Digital satellite communications systems, discussing time division multiplexing, steerable beam antennas and satellite-to-satellite transmission [AIAA PAPER 70-491] 11 p2003 A70-25492
- Telemetry tracking and command antenna array of Central German Ground Station for satellite communication [DFVLR-SONDDR-52] 11 p2017 A70-25800
- Laser systems for deep space communications, considering high data rates, laser types, systems operation, earth atmosphere effects, hardware reliability, etc 11 p2005 A70-26036
- Cassegrain antenna feed system for satellite communication earth stations, noting low noise characteristics 11 p2011 A70-26716
- Satellite signal scintillation spectrum analysis by digital filtering of magnetic tape recording 11 p2012 A70-26718
- Modulation-demodulation system for multiple access tactical satellite communication 12 p2187 A70-27915
- TDMA applicability to military satellites, describing synchronization process 12 p2187 A70-27916
- RF EMI propagation between manned spaceflight network and Apollo 10 launch vehicle in trans lunar mission, considering cochannel interference possibilities 12 p2189 A70-28137
- Atmospheric water effect on satellite communications in UHF region and above, discussing signal attenuation 13 p2364 A70-28782
- Space-surface path loss due to atmospheric gases, rain and clouds, considering military ground site location for space communication 14 p2608 A70-30596
- Satellite laser communication system using dual scan acquisition technique 14 p2552 A70-31197
- S band telemetric signals reception transmitted by Apollo 12 during occultation behind lunar disk, discussing lunar surface reflectivity 15 p2699 A70-32290
- Radio wave refraction and field strength in model Venus atmosphere for various spacecraft trajectories 15 p2705 A70-32737
- Optical spacecraft communication system, discussing size, weight, power, etc 16 p2864 A70-33484
- Range and velocity components for ray paths between tracking and data relay satellite and user communication satellite 16 p2866 A70-34073
- High power TWT for satellite communications ground stations, including Intelsat experience 17 p3054 A70-35282
- Space vehicle and mission control center telecommunications networks for Apollo lunar landing program, considering NASCOM relay system 17 p3047 A70-35585
- Legal problems in satellite communications, emphasizing copyright, satellite television legality and protection of transmission and broadcasts 17 p3203 A70-35800
- Apollo digital Range Safety Command System for signal-crowded communications channels 20 p3605 A70-39497
- Transmission power formula for satellite to ground station and slant ranges calculations 21 p3785 A70-40755
- Satellite communications performance improvement by use of multipath signal for channel models including noncoherent FSK 21 p3787 A70-41329
- Wideband millimeter wave communications experiments for satellite applications, considering ATS-5, radiometry and future lunar base 21 p3787 A70-41337
- Fences and pits effectiveness for shielding satellite earth stations from local terrestrial facilities interference 21 p3789 A70-41342
- Transportable earth station for satellite communications system, describing antenna design and transportation modes 21 p3798 A70-41344
- Ground station requirements for transition to multitransponder INTELSAT 4 satellite, discussing interference filtering, group delay distortion, etc 21 p3789 A70-41346
- Multiple beam earth station torus microwave antenna for satellite communication with nonplanar field of view over geostationary arc 21 p3798 A70-41357
- Synchronous satellites VHF signal fading attributed to high latitude scintillations, noting intensity at night and during magnetic storms 21 p3790 A70-41362
- ATS-5 spacecraft L band propagation performance, describing up and downlink test methods 21 p3790 A70-41363
- Spacecraft data transmission efficiency improvement by budgeting onboard electric energy consumption among data types 21 p3790 A70-41364
- Single channel per carrier PCM FDMA demand assignment satellite communication system, discussing digital encoding, quadrature PSK modulation, etc 21 p3791 A70-41367
- RF requirements of deep space-outer planet spacecraft communications for Jupiter, Saturn, Uranus and Neptune flyby missions 21 p3791 A70-41369
- Mariner 1969 communication system modified for thermoelectric outer planet spacecraft /TOPS/, noting X band addition to S band and associated problems 21 p3791 A70-41797
- Interference coupling between satellite ground station and radio relay station due to rain scattering at SHF 22 p3990 A70-43201
- Satellite technology application to aeronautics, predicting synchronous satellites communication for transoceanic and overland ATC 22 p4111 A70-43512
- Rescue waiting time relation to number of communication and return sites for emergency astronaut return, considering day vs day/night recovery 23 p4245 A70-44639
- ### SPACECRAFT COMPONENTS
- #### NT LANDING MODULES
- #### NT LUNAR LANDING MODULES
- #### NT LUNAR MODULE
- #### NT MARS EXCURSION MODULE
- #### NT SPACECRAFT CABINS
- #### NT SPACECRAFT MODULES
- Machined surface evaluation of fabricated components by electron microscopy to identify defects 01 p0097 A70-10012
- Cost-effective look at vacuum testing of spacecraft components, noting sensitivity prediction and thermal cycle test 01 p0055 A70-10113
- Magnetic components design, manufacturing and handling for use in space communication satellites, noting design group role in parts construction and quality control 02 p0267 A70-12057
- Explorer 38 critical component equilibrium temperature tests in thermal vacuum chamber using modified solar simulator, noting agreement with model [AIAA PAPER 69-999] 02 p0275 A70-12527
- Logic methods of efficient organization of satellite integration, considering project, physical components and program elements 03 p0609 A70-13842
- Spacecraft components temperature response predicted in nonstandard solar orientation 04 p0786 A70-15432
- Simulation equipment for extraterrestrial solar radiation for spacecraft components evaluation tests, describing spectral characteristics 04 p0665 A70-15663
- Soviet unmanned spacecraft and components displayed at Le Bourget show, including Molniya 1, Proton 4 satellites, Venus 4 station, vertical cosmic probe, etc 05 p0921 A70-15814
- Spacecraft contamination control teamwork operation, examining procedures and processes to ensure components cleanliness 05 p0809 A70-16713
- Laboratory simulation of interactions between ionospheric plasma and diverse spacecraft systems 06 p1029 A70-18067
- Space engineering, flight instrumentation features and spacecraft subsystems integration problems 10 p1950 A70-24610
- Biosatellite Primate Mission Program for component qualification levels validated by flight tests data, performing vibration tests on prime structure spacecraft [AIAA PAPER 70-403] 10 p1951 A70-24902
- Microwave tubes for high power transmission from space to ground and in deep space communications, discussing klystrons, TWT and crossed field amplifiers [AIAA PAPER 70-435] 11 p2016 A70-25456
- Syncom and Early Bird systems development, launch procedure and operation, discussing common components 14 p2654 A70-31144
- Redundancy for spacecraft elements, describing various factors for priority establishment 15 p2712 A70-32643
- Reliability life tests preventing sliding electrical contacts failure in space vehicles, discussing data dissemination 16 p2920 A70-33806
- Literature review of sliding electrical contacts in space vehicles, covering heavy aromatic hydrocarbons, molybdenum disulfide and other lubrication materials 16 p2920 A70-33811
- Explosively actuated /pyromechanical/, devices for spacecraft, discussing guidelines for design, testing, application and cost efficiency 16 p2963 A70-34125
- Flow control valve without moving parts used in ATS A and D, describing design, operation and theoretical performance 16 p2846 A70-34132

Space molecular sink simulator facility /Molsink/ for extreme high vacuum outer space environment simulation, discussing Mariner Mars 1969 spacecraft components tests 16 p2889 A70-34167

Torsion, filar, flexure and coil type mechanical suspensions for space applications, considering instability due to temperature changes and magnetic, electric and force fields 16 p2924 A70-34169

Spacecraft waste management system zero-gravity flight tests, describing components and functions 17 p3036 A70-34751

Apollo spacecraft parts environmental simulation and testing, using real time computer generated graphic display 19 p3532 A70-37918

Electrical tests on satellites and space probes applied to spaceborne subassemblies, subsystems and electronic systems EM compatibility 19 p3532 A70-38287

Laboratory simulation of interactions between ionospheric plasma and diverse spacecraft systems [AIAA PAPER 70-169] 20 p3606 A70-39695

SPACECRAFT CONFIGURATIONS

NT APOLLO TELESCOPE MOUNT

NT SATELLITE CONFIGURATIONS

Air force booster growth inventory, noting combination with space-configured upper stages and strap-on solid motors [SAE PAPER 690713] 05 p0922 A70-15831

Dosimetry data and personal radiation sensors from Apollo and Gemini flights, noting spacecraft geometry shielding effects 06 p1134 A70-17268

Reusable space shuttle employing two stages resembling subsonic aircraft for carrying passengers and cargo between earth surface and orbit 07 p1392 A70-18873

Space transportation system booster and orbiter development ground and flight tests, considering vehicle size and reusability requirements [AIAA PAPER 70-276] 07 p1397 A70-20385

Modular earth orbiting space station design, configuration and operation 08 p1568 A70-20688

Space shuttle program, considering vehicle configurations mission capabilities and cost estimates with emphasis on ground and flight tests [AIAA PAPER 70-739] 10 p1953 A70-25074

Low cost orbital space transportation system with shuttle service, discussing booster and configuration selections, weight, costs, etc [AIAA PAPER 70-256] 13 p2506 A70-29615

Aerodynamic and structural configuration effects on spacecraft inflight wind load calculations, showing Apollo interface lateral bending 14 p2653 A70-30585

Europa 3 configurations for launching payloads into geostationary orbit using various rocket stage combinations 15 p2789 A70-32254

Nuclear orbital launch stages for interplanetary departure, comparing parallel and tandem spacecraft configurations [AIAA PAPER 70-680] 16 p2950 A70-33580

Configurational and operational characteristics for space shuttle design, considering economic tradeoffs between expendable and reusable systems [AIAA PAPER 70-045] 17 p3175 A70-34783

Spacecraft shape and thermal coating pattern optimization by computer program 17 p3178 A70-35251

Structurally similar models, investigating space vehicles dynamic characteristics 18 p3332 A70-36161

Space vehicles dimensions effects on working fluid mass and power required for orientation 21 p3927 A70-40826

Thin walled spherical shell spacecraft solar heating in planetary surface proximity, considering skin temperature distribution 21 p3944 A70-41019

Structural configurations effect on momentum imparted to spacecraft by hypervelocity meteoroid impact 21 p3938 A70-41879

Space station mission and configuration concepts, discussing experimental/operational capability, crew assignments, accommodation and module sizing 22 p4111 A70-43517

Space shuttle configurations, discussing launch, entry and landing characteristics 22 p4111 A70-43629

Pressure distribution, force and heat transfer measurements on varied-configurations of lifting reentry vehicles in hypersonic flow [ICAS PAPER 70-03] 23 p4132 A70-44117

Venus atmosphere flight vehicle configuration, discussing payload capacity, range, velocity, flight altitude and aerostatic aerodynamic, ground effect and underwater capabilities 23 p4260 A70-44627

Skylab mission in 1972, describing orbital workshop configuration and three man crew integration for operational experiments [AIAA PAPER 70-1328] 24 p4417 A70-45939

Space transportation system concept and operational objectives, discussing configurational aspects, aerodynamic complexity, propulsion systems, payloads, performance and aerothermodynamic constraints, etc [AIAA PAPER 70-1249] 24 p4418 A70-45965

SPACECRAFT CONSTRUCTION MATERIALS

Volatile contaminants emitted from space cabin construction materials tested under simulated space conditions 01 p0031 A70-10237

Optical and mechanical techniques for space experiment structures and metals satisfying space requirements 03 p0492 A70-13848

Nonflammable material development program for Apollo spacecraft, noting requirements imposed by high oxygen environments, toxic offgassing and temperature range 03 p0436 A70-14055

Materials selection and Apollo command module atmosphere design considerations, discussing fire extinguisher system, equipment design changes, etc 03 p0437 A70-14058

Apparatus and techniques for investigating spacecraft materials mechanical and thermal properties, using vacuum effect to simulate space environment [ASME PAPER 69-WA/PID-22] 04 p0663 A70-14752

Ti alloys, high strength steels and plastics for aircraft and spacecraft constructions, including aging behavior of lap joints and prepreg laminates in vacuum [DGLR-69-58] 04 p0699 A70-15162

Micro and macromechanics for design and mechanical properties prediction of laminated fibrous composites for airframes and space structures 05 p0941 A70-16619

Structural material selection for thermal shock conditions, deriving index from parameters governing solutions in thermoelasticity 07 p1413 A70-20002

Reusable metallic and nonmetallic thermal protection materials for space shuttle applications [AIAA PAPER 70-273] 07 p1397 A70-20383

Boride composites with high strength and thermal resistance suitable as nose cap and leading edge materials for reusable lifting reentry systems [AIAA PAPER 70-278] 07 p1315 A70-20387

Apollo command and service modules from metallurgical viewpoint 09 p1766 A70-22792

Silicone products with low outgassing characteristics for spacecraft applications, discussing fluids, compounds and elastomers 10 p1906 A70-23914

Hemispherical emissivity measurement in vacuum chamber for thermal testing of space satellite structural materials 12 p2332 A70-27984

Sliding electrical contacts for unmanned scientific satellites, discussing Nimbus AVCS camera iris motors 16 p2920 A70-33809

Thermal and mechanical properties of materials for spacecraft booms design 16 p2986 A70-34138

Space vehicle optimal design based on reliability analysis, taking into account cost of materials strength tests [JPL-TR-32-1496] 17 p3188 A70-35224

Cs and Hg electrostatic thruster effluents effects on spacecraft materials, describing chemical, metallurgical and thermophysical experiments [AIAA PAPER 70-1144] 20 p3652 A70-40519

Materials problems in space and spacecraft environments, discussing particle density, composition and UV radiation, spacecraft structure, payloads, vibration, etc 23 p4209 A70-44328

Fibrous, cellulosic, elastomeric and plastic materials with improved flame resistant properties for space applications 23 p4152 A70-44461

Manned spacecraft nonmetallic construction materials selection criteria, testing and configuration control, considering flammability hazard 23 p4152 A70-44462

Fireproof nonmetallic materials for spacecraft and aircraft, discussing functional utility, durability and aesthetic requirements relative to environmental conditions 23 p4210 A70-44610

Space shuttle structural design concepts and fabrication, tabulating structural and heat shield materials [SAE PAPER 700768] 24 p4415 A70-45867

SPACECRAFT CONTAMINATION

Apollo spacecraft contamination control program, considering NASA role in management, contractor controls, criteria establishment and enforcement, etc 01 p0220 A70-11076

Apollo spacecraft contamination control, discussing Boeing responsibility for engineering, facilities, materials, etc, for Saturn rocket 01 p0058 A70-11077

Apollo spacecraft contamination control, describing Rocketdyne programs for rocket engines 01 p0059 A70-11078

Apollo spacecraft contamination control, describing McDonnell Douglas role in S-4B stage production 01 p0059 A70-11079

Apollo spacecraft contamination control, describing organization and operation of Grumman Contamination Control Committee 01 p0059 A70-11080

Contamination control of spacecraft for planetary exploration missions emphasizing monitoring equipment and cleaning procedures 05 p0808 A70-16702

Microbial contamination levels and types detected on Apollo 9 spacecraft and related effects of various test and assembly environments 05 p0809 A70-16711

Spacecraft contamination control teamwork operation, examining procedures and processes to ensure components cleanliness 05 p0809 A70-16713

Spacecraft window cleaning with methyl alcohol and low pressure nitrogen providing filming control for Apollo optical experiments 11 p2051 A70-26143

Infectious disease hazards on space flight, discussing internal environmental factors including resistance and etiologic agents transmission 14 p2537 A70-30366

Microbial release from solid spacecraft materials after hard landings, testing survival during decontamination or terminal sterilization 15 p2688 A70-31664

Microbial contamination levels on Apollo 6 spacecraft, discussing intramural environments for assembly and testing 16 p2849 A70-33995

Thruster exhaust effluent characteristics relating to spacecraft contamination [AIAA PAPER 70-1143] 20 p3690 A70-40208

SERT 2 spacecraft surface contamination by Hg ion thruster effluents, using solar cell sensors [AIAA PAPER 70-1128] 20 p3690 A70-40217

Scientific payloads integration with multimission electric propulsion interplanetary spacecraft, discussing possible contamination effects due to solar electric propulsion system [AIAA PAPER 70-1141] 21 p3930 A70-41781

SPACECRAFT CONTROL

NT SATELLITE ATTITUDE CONTROL

NT SATELLITE CONTROL

Manned space station system analysis for identifying control subsystem functions /weight penalties/ and system characteristics to minimize penalties [AIAA PAPER 69-1078] 01 p0194 A70-10628

Roll control method using recirculating base flow reaction against oriented blades or fins attached to reentry vehicle base to produce rolling moments 01 p0003 A70-10847

Crew locomotion effect on spacecraft attitude control using space cabin simulator tests 01 p0036 A70-10853

Rotational motion of self excited symmetric gyroscopes applied to attitude control and nutation damping of space vehicles 01 p0143 A70-10929

Spacecraft longitudinal control during reentry of Lunar Orbiter into atmosphere, analyzing final range prediction, trajectory tracking and accelerometers performance 01 p0197 A70-11497

Spacecraft range control algorithm during reentry at parabolic velocity into atmosphere with varying parameter distributions 01 p0197 A70-11498

Optimal control algorithm for spacecraft descent in atmosphere based on nominal trajectory and acceleration measurements 01 p0197 A70-11499

Optimal motion control of spacecraft refueling during flight by liquefying atmospheric gas along prescribed trajectory under constant thrust 01 p0197 A70-11502

Man machine system consisting of manned station controlling distant spacecraft via wideband radio link 02 p0229 A70-12145

Optimum angle of attack control for multistage rocket as function of phase coordinates and time by solving functional equation with finite difference method 02 p0381 A70-12407

Optimum power and operation mode of space vehicle engine with control error allowance as function of mass and velocity 04 p0760 A70-14433

Fluidic sun sensor design and breadboard test for spacecraft and missile attitude control systems 04 p0716 A70-15415

Free gas formation in propellant systems and effects on attitude control systems [AIAA PAPER 69-434] 04 p0763 A70-15418

Mariner 4 guidance and control system performance from mission nominal end to final termination time
04 p0765 A70-15664

Display/control system and key technical decisions at Manned Space Mission Control Center, discussing command consoles
05 p0829 A70-16194

Biological model describing spacecraft operator sensorimotor activity in response to various spacecraft control stimuli, outlining computer algorithm
05 p0810 A70-17118

Launch vehicle control system synthesis based on mode control theory state variable formulations
06 p1156 A70-17958

Thermal control of spacecraft via solid-liquid phase change materials
[AIAA PAPER 70-12]
06 p1092 A70-18137

Screening devices to control heat supplied to spacecraft, discussing mathematical model to determine effective emission
[DGLR-69-060]
07 p1392 A70-18816

Space vehicle digital control system attitude computations using quaternion matrix algebra to simplify control equations
[AIAA PAPER 68-825]
07 p1393 A70-19302

Range safety philosophy and practice concerning malfunctioning missile and space vehicle launch and flight
[AIAA PAPER 70-249]
07 p1250 A70-20369

Deep space network /DSN/ functions and characteristics, discussing spacecraft control, data acquisition, orbit determination, data processing, etc
08 p1481 A70-20614

Queue control techniques in generating predicted trajectory, discussing queue control logic requiring minimum storage
08 p1467 A70-21049

Control display requirements for manned spacecraft, integrating human operator with vehicle control system and determining man machine relations in stabilization, control and guidance
08 p1498 A70-21678

Active and passive geomagnetic rate dampers for attitude control systems of geomagnetically, gravitationally or spin stabilized spacecraft
09 p1766 A70-22936

Space vehicle attitude stabilization by passive control moment gyros, discussing viscous and Coulomb friction effects
10 p1950 A70-24054

Coupled control of space vehicle orientation with reference to three celestial bodies, reducing plane vibrations to dynamic third order system
10 p1914 A70-24307

Soviet book on rendezvous in orbit, flight dynamics and control of spacecraft covering trajectory synthesis, optimization and control for approach stage
10 p1950 A70-24656

Large angle suboptimal attitude control of rigid spinning spacecraft
10 p1856 A70-25236

Fuel suboptimal attitude control of spin stabilized axisymmetric spacecraft
10 p1953 A70-25237

ATS-3 hydrazine orbit control system efficiency evaluation statistical method, considering stationkeeping maneuvers
[AIAA PAPER 70-460]
11 p2121 A70-25464

Control theory, Volume 2, Analysis and design of space vehicle flight control systems
11 p2122 A70-25772

Three axis motion simulator for in-orbit spacecraft attitude control evaluation using earth, sun and star sensor references
[AIAA PAPER 69-1029]
11 p2031 A70-26147

Initial parameter conditions influence on sustained unstable oscillations of attitude control system for large space vehicle, calculating stable region by nonlinear method
11 p2124 A70-26149

Radar signal quick indication and extrapolation for terminal guidance control of Mars soft lander, reducing radar lock on loss sensitivity and engine spurious noise throttling
11 p2080 A70-26210

Space vehicle velocity-attitude optimal control for on-line trajectory control schemes
11 p2025 A70-26216

Spacecraft stochastic optimal control, discussing design of least upper bound fuel optimal system with measurement uncertainty
11 p2025 A70-26222

Digital guidance computer compatibility with analog attitude control loop in Digital Inertial Guidance System used in ELDO launch vehicle
11 p2080 A70-26280

Mercury bombardment ion thruster life test in space environment onboard space electric rocket test /SERT/ satellite, describing passive satellite thermal control system design
11 p2127 A70-26606

Apollo Command Module inverter experience for post-Apollo spacecraft applications, discussing phase loads and control logic circuits
12 p2165 A70-27693

Spacecraft autonomous control algorithm to ensure geographically specified landing accuracy without considering atmospheric density distribution
12 p2270 A70-28251

Reentry control algorithm for prescribed landing point of space vehicle entering earth atmosphere at parabolic velocity, discussing double-dip reentry and digital simulation
13 p2499 A70-28376

Apollo man-machine control design, discussing communication, integration, lunar landing, attitude control, CMC and LGC programs
13 p2357 A70-28379

Man machine function distribution optimization in spacecraft closed-loop automatic control system
13 p2380 A70-28381

Manual spacecraft rendezvous system based on handheld instruments and manual computations, considering error analysis and simulation
13 p2357 A70-28392

Mariner Mars 1969 navigation, guidance and control systems design, mechanization and flight testing
13 p2446 A70-28393

Spacecraft rendezvous control at minimal propellant consumption, deriving algorithm
13 p2499 A70-28400

Self contained optimal control synthesis for spacecraft entering atmosphere at first cosmic speed, considering landing spots dispersion component decrease
13 p2500 A70-28407

Booster control system reducing maximal wind-induced bending torques, examining booster response to aerodynamic forces
13 p2500 A70-28413

Spacecraft orientation control system optimization by plotting controlled motion kinematic models
13 p2501 A70-28417

Prelaunch dynamic response test parameter selection for control systems for space complexes with form of Nyquist locus
13 p2381 A70-28423

Optimum power and operation mode of space vehicle engine with control error allowance as function of mass and velocity
13 p2503 A70-28458

Wind effects on rigid launch vehicle guidance and control system design, using model incorporating structural bending and fuel sloshing
[AGARDGRAPH-115]
13 p2448 A70-28755

Shutter thermal control for Helios solar observation satellite, considering closed and open conditions
13 p2505 A70-28769

Nonlinear control systems optimization applied to asymmetrical spacecraft
13 p2382 A70-29071

Performance cost functions for reaction-jet controlled spacecraft during on-off-on limit cycle
13 p2382 A70-29072

Ground support real time operating system 360 for manned spaceflight, discussing system features and performance
13 p2375 A70-29937

Lunar Orbiter Spacecraft Guidance and Control, discussing design and flight results
14 p2613 A70-30455

First pulse vacuum startup measurements of monopropellant hydrazine thrust reactors with spontaneous catalyst, simulating spacecraft control dynamics
14 p2628 A70-30753

Digital guidance and control system, discussing communication device providing data transfer between airborne digital computer and control device
[AIAA PAPER 69-988]
14 p2615 A70-30771

Parameter plane method of stability analysis applied to spacecraft attitude control system with two nonlinearities related by nonlinear differential equation
16 p2881 A70-33032

Digital computer generation of system stability Liapunov functions for ninth order spacecraft attitude control
16 p2867 A70-33043

Optimal desaturation of angular momentum exchange controllers in spacecraft attitude control systems, using natural environmental torques
16 p2947 A70-33345

Speed convergence of hybrid vs digital computer synthesis of optimal boost vehicle controller, considering fuel consumption and pitch dynamics
16 p2981 A70-33442

Waste hydrogen utilization in microthrusters for spacecraft attitude control involving mass expulsion of cold gas
[AIAA PAPER 70-613]
16 p2969 A70-33609

Spacecraft attitude control microthrusters utilizing catalytically reactive gas mixtures during pulse mode and steady state operation
[AIAA PAPER 70-614]
16 p2969 A70-33611

Optimum guidance and control law for lifting reentry bodies, investigating plane descent trajectories for minimum structural heating
16 p2982 A70-33774

Lightweight spiral wound bimetallic actuators for active spacecraft thermal control systems
17 p3022 A70-34755

Mariner Mars 1971 gimbal actuator design and life test for autopilot system using hypergolic bipropellant rocket engine
17 p3022 A70-34758

Flexible space vehicles dynamics and control covering free vibration analysis, thermal flutter and structural deflection effect on attitude control
17 p3177 A70-35233

R-4D multiapplication rocket engine for Apollo spacecraft reaction control, discussing design, performance, quality assurance and tests
17 p3178 A70-35259

Apollo lunar landing guidance, navigation and control, discussing inertial and optical measurements, computer, digital autopilots, rendezvous and mid-course navigation
17 p3134 A70-35288

Continuous time nonlinear filter for space vehicle attitude determination, using estimation theory
17 p3130 A70-35291

Multistage rockets terminal control synthesis based on linear functionals
18 p3333 A70-36163

Optimization model for evaluating information management systems for handling control functions of long duration space station missions
19 p3532 A70-37851

Computerized automatic ground equipment /CAGE/ as intelligence system for checkout and control of launch vehicles and spacecraft
19 p3397 A70-37915

Control moment gyro /CMG/ for spacecraft attitude control, determining optimal gimbal angle rate for desired torque
[AIAA PAPER 70-1042]
19 p3433 A70-38857

Spacecraft fuel optimal controls for out-of-plane motion about translunar libration point based on phase plane methods
[AIAA PAPER 70-1079]
19 p3530 A70-38890

Lunar module digital autopilot design, considering attitude state estimator, reaction control system and thrust vector control
[AIAA PAPER 70-991]
20 p3668 A70-39539

Spacecraft pulse width modulated attitude control system stability, using state space method
[AIAA PAPER 70-984]
20 p3714 A70-39545

Control moment gyro /CMG/ spacecraft attitude control systems, discussing selection and design criteria
[AIAA PAPER 70-976]
20 p3668 A70-39553

Magnetic three degree of freedom attitude control system for axisymmetric spinning spacecraft, using Kalman filter
[AIAA PAPER 70-974]
20 p3668 A70-39555

Direction cosine attitude control logic for spin stabilized axisymmetric spacecraft, using control torques generated by reaction jet system
20 p3669 A70-39679

Nonlinear adaptive reaction jet attitude control for long life space vehicles, providing optimal performance over bias acceleration disturbances
[AIAA PAPER 69-945]
20 p3716 A70-39680

Trajectory correction propulsion subsystem /TCPS/, attitude propulsion subsystem /APS/ and pyrotechnic subsystem of thermoelectric outer planet spacecraft /TOPS/
21 p3868 A70-41800

Thermoelectric outer planets spacecraft /TOPS/ attitude control subsystem providing accurate antenna pointing and trajectory correction engine thrust vector orientation
21 p3930 A70-41801

Flexible antennas and solar panels effect on dynamic behavior and control system response of dual spin spacecraft
21 p3931 A70-41855

Algorithm for spacecraft rotational maneuver control based on single turn around specific axis, using onboard computer
21 p3849 A70-42236

Space vehicle self oscillatory pulsed relay attitude control system with jet nozzles, determining angular motion
22 p4001 A70-42838

Lunik 16 lunar soft landing technique, discussing automatic and ground controlled mission phases
22 p4110 A70-43210

Space vehicle attitude control by cold gas jets, examining principles of operation, optimal conditions for gas consumption and gravitational and gyroscopic effects
[MBB-UR-37-70-0]
23 p4261 A70-44662

Spacecraft trajectory control rockets design and operational characteristics, discussing various propellant types, control valve designs, etc
24 p4393 A70-45640

Manned spacecraft abort guidance and control problems, discussing various modes and emergency conditions
24 p4374 A70-46210

SPACECRAFT DESIGN

NT SATELLITE DESIGN

Systems design experience derived from Mercury, Gemini and Apollo projects, discussing thermal protection, launch propulsion, life support, etc
[AIAA PAPER 69-1077]
01 p0193 A70-10604

Saturn 5 launch vehicle design, role in exploration and anomalous structural vibration and oscillation [AIAA PAPER 69-1094] 01 p0194 A70-10620

Space station flexibility design based on INT-21 payload capability emphasizing volume and weight factors [AIAA PAPER 69-1064] 01 p0195 A70-10635

Orbital space station operations requirements and interactions, considering experimentation, support vehicles, ground support and follow-on growth [AIAA PAPER 69-1062] 01 p0195 A70-10636

Earth and planetary entry vehicle designs for manned and unmanned space missions, noting thermal protection, environmental control requirements and communication systems 01 p0195 A70-10826 [AIAA PAPER 68-1080]

Propellant condensation on surfaces near electric rocket exhaust, calculating particle arrival rates, backflow and desorption energies 01 p0166 A70-10836 [AIAA PAPER 69-270]

Mercury atmospheric models for preliminary environmental criteria to be used in spacecraft design and engineering tradeoff studies 01 p0183 A70-10838 [AIAA PAPER 69-54]

Minimum fuel consumption criteria applied to design of manned spacecraft attitude control system, using reaction jets for lateral and directional controls 01 p0196 A70-10950

HEOS 1 satellite for interplanetary space exploration, describing eccentric orbit, structure, power supply, attitude measurement and control, spin rate control, telemetry and telecommand systems 01 p0196 A70-11114

Soviet book on physicochemical basis of space research covering near earth and interplanetary environmental factors and effects on spacecraft designs and materials 02 p0360 A70-11693

Thermal protection systems (TPS) design criteria for maneuverable reentry spacecraft, comparing weight and cost for various alloy systems 02 p0392 A70-11940

Solar photoelectric power ion propelled probe of asteroid region, describing design and mission planning [AIAA PAPER 69-1105] 02 p0382 A70-12529

Intelsat 4 communications satellite design and manufacture, discussing European participation with emphasis on British involvement 02 p0383 A70-12649

Mission design, spacecraft characteristics, communications and experimental approaches for Viking 1973 Mars Project 03 p0576 A70-14020

Reentry body aerodynamic heating and thermal insulation system design, discussing analytical procedure taking into account complex geometrical configurations 04 p0616 A70-15186

Development models for post-Apollo lunar cargo delivery system utilizing Saturn 1B and Centaur stages [DGLR 69-9] 04 p0763 A70-15187

Spacecraft design, trajectory and mission analyses for multipurpose solar electric propulsion missions, emphasizing modular ion engine and fixed attitude spacecraft designs [AIAA PAPER 69-252] 04 p0763 A70-15412

Parametric performance and cost comparison of separate and integral vehicle concepts for manned space activity using payload criterion 04 p0763 A70-15420

Saturn launch vehicle systems in terms of design, operating characteristics and potential applications, showing need for reusable space shuttle systems [SAE PAPER 690703] 05 p0922 A70-15830

Manned space stations development, objectives, supply, storage and waste disposal, launching and artificial gravity 05 p0923 A70-16042

Launch vehicles design, propulsion, maneuverability and navigation 05 p0923 A70-16565

Optimum second stage sizes for Blue Streak first stage for maximum payload injection into various orbits, tabulating sizes and payloads 05 p0924 A70-16589

Spacecraft design for manned interplanetary missions, considering structural materials and weights, cryogenic insulation, meteoroid protection, landing gear, etc 05 p0924 A70-16720

Radio astronomy spacecraft (RAS) engineering design, technology and flight results 06 p1153 A70-17151

Attitude performance of GEOS 2 gravity gradient spacecraft, discussing prelaunch design and post-launch analyses 06 p1154 A70-17162

Systems engineering aspects of Apollo Telescope Mount spacecraft, considering design and manned space flight role 06 p1061 A70-17312

Multilayer insulation blankets with slits normal to energy transfer direction for thermal control of spacecraft and cryogenic tankage [AIAA PAPER 70-15] 06 p1156 A70-18076

Trajectory, guidance and environmental parameters and uncertainties effect on design optimization of out-of-orbit Viking soft lander 06 p1157 A70-18134 [AIAA PAPER 70-99]

Hybrid coordinate formulation for flexible space vehicle attitude control system design 06 p1158 A70-18180 [AIAA PAPER 70-20]

Compact reentry flight test body construction featuring extended permissible entry corridor by means of generated lift [DGLR-69-035] 07 p1392 A70-18987

NASA three meter orbital telescope discussing configuration, optical geometry, launching, power supply, etc 07 p1280 A70-19150

Streamlining design for high altitude hypersonic flight vehicles based on drag minimization at flight condition 07 p1189 A70-19717

Low operating cost space shuttle system for cargo and personnel transportation to earth orbiting stations involving reusable winged vehicles [AIAA PAPER 70-242] 07 p1396 A70-20376

Launch vehicle minimum cost design emphasizing flight vehicle evolution stages via effect on costs [AIAA PAPER 70-240] 07 p1396 A70-20378

Reusable space transportation vehicle design evolution, considering staging, aerodynamic shapes, etc [AIAA PAPER 70-265] 07 p1398 A70-20395

Orbit-to-orbit shuttle for launch in earth-to-orbit shuttle vehicle, discussing design requirements [AIAA PAPER 70-268] 07 p1399 A70-20397

Modular earth orbiting space station design, configuration and operation 08 p1568 A70-20688

Mars lander atmospheric entry digital simulation for deceleration system design, discussing ballistic coefficient, aeroshell diameter, parachute size and deployment altitude, etc 08 p1582 A70-20932

Test-aided aerospace design, noting design engineer attitude and software problems 09 p1766 A70-22678

Manned Spacecraft Center spacecraft development, mission design and planning, flight crew operations for Apollo, discussing spacecraft design principles 09 p1767 A70-23703

Apollo project hardware design and evaluation principles coupling simple design practice with stringent technical and administrative discipline 09 p1768 A70-23704

Materials and processing technology roles in NASA programs involving manned space stations, service spacecraft and unmanned space exploration 10 p1902 A70-23855

Spacecraft and boosters for earth resources surveys, discussing design, payloads, orbits, etc 10 p1902 A70-24641

Ground based simulation for hypersonic reusable lifting reentry vehicle design with pilot-in-loop, discussing six degree of freedom simulation [AIAA PAPER 70-385] 10 p1861 A70-24920

Apollo Applications Program command and service module test requirements to achieve reliable hardware for extended missions [AIAA PAPER 70-378] 10 p1952 A70-24925

Electric propulsion system selection for Lockheed Communications Satellite (LCS) based on weight, development status and complexity considerations, discussing optimization procedure [AIAA PAPER 70-478] 11 p2101 A70-25470

Rough-landing space capsule for omnidirectional touchdown in lunar and Martian missions, tabulating design characteristics and functional capabilities 11 p2123 A70-26053

Interstellar transport vehicles design around thermonuclear propulsion plants, discussing weight, mission velocity, acceleration time and fuel costs 11 p2123 A70-26054

Evaluation technique for astronautics subsystems in automated spacecraft designed for interplanetary missions, considering operation times, navigation updating and midcourse correction [AIAA PAPER 69-882] 11 p2079 A70-26118

Martian atmospheric models for lander and simulator design, obtaining effective sky temperatures, surface pressures and temperatures, atmospheric compositions, etc 11 p2112 A70-26141

Subsystem weight trade-offs for design optimization of out-of-orbit Mars soft lander, using atmosphere and surface environmental Monte Carlo model 11 p2124 A70-26215

Computerized tradeoff analysis for planetary landing vehicle entry capsule and lander design optimization, emphasizing weight allocation for Mars 1973 missions 11 p2126 A70-26320

Corrugated skins solar absorbance and IR emittance computed for spacecraft thermal design, analyzing other nondiffusive radiative enclosures 11 p2150 A70-26352

Bidirectional reflectance of three dimensional surfaces described by diffuse triangular subareas network

for spacecraft thermal design, giving numerical technique 11 p2084 A70-26354

Embossed/crinkled aluminized film multilayer insulation blankets with joints performance variation with temperature predicted by radiation heat transfer correlation 11 p2150 A70-26365

Manned space stations size, crew, orbit, lifetime, resupply requirements, etc 12 p2313 A70-27742

Space station design for long duration operation, considering optimum mix of redundancy, maintainability and checkout 12 p2313 A70-27743

Europa 3 satellite carrier system configurations, discussing rocket design, propellant composition, etc 13 p2502 A70-28445

Pioneer 6-9 low magnetism spacecraft for interplanetary magnetic field observation 13 p2507 A70-30046

Space design, considering problems due to weightlessness, vacuum, thermal effects, micrometeorite, cosmic forces, etc 14 p2656 A70-30301

Spacecraft design requirements for scientific zero G cloud physics experiments concerning colloidal modification processes 14 p2584 A70-30552

Aerospace environment models developed by NASA for engineering use in Space Vehicle Design Criteria program 14 p2637 A70-30554

Atmospheric elements and properties pertinent to design and operations of Space Shuttle 14 p2606 A70-30556

Martian atmosphere modeling for obtaining Viking lander spacecraft design margins by Monte Carlo method 14 p2637 A70-30564

Wind gust data analysis for spacecraft design using power spectrum approach 14 p2607 A70-30580

Launch vehicle design, considering tradeoffs between wind effects and analysis time 14 p2653 A70-30589

OSO 1-6 spacecraft design, payloads and performance for continuous solar observation, discussing instrumentation and Delta launch vehicle characteristics 14 p2638 A70-30691

Spacecraft meteoroid protective shield thickness sensitivity relationship to luminous efficiency 15 p2813 A70-32518

Hypervelocity impact damage on complex targets, considering spacecraft and missile design 15 p2824 A70-32791

Lunar surface exploration vehicle (Lunar Rover) design, analyzing stowage aspects in Lunar Module 16 p2888 A70-33680

Space shuttle avionics cost effective design approach, discussing guidance, commonality, reliability, communications and autonomy 16 p2982 A70-33802

Meteorological problems associated with space shuttle design and operations, permitting tradeoff analysis on environment effects 16 p2946 A70-33804

Book on tubular spacecraft booms covering design and flight experiences, system performance, evaluation, etc 16 p2983 A70-33961

Aerospace mechanisms design attitudes effects on cost and success of space mission 16 p2985 A70-34102

Aerospace mechanism design from test laboratory viewpoint, balancing technical, cost and schedule factors with mission objective 16 p2921 A70-34103

Light weight integrated spin-up launch mechanism for rocket propelled payload 16 p2845 A70-34113

Ball-bolt-bolt separation mechanism for spacecraft applications requiring low shock, controlled release, nonfragmenting fastener 16 p2922 A70-34119

Ruggedized spacecraft mechanisms for severe shock environments 16 p2922 A70-34121

Apollo lunar module alightment system, discussing design, performance and reliability 16 p2985 A70-34122

Surveyor spacecraft landing shock absorbers design and performance assessment by digital computer simulation 16 p2922 A70-34123

Explosively actuated (pyromechanical), devices for spacecraft, discussing guidelines for design, testing, application and cost efficiency 16 p2963 A70-34125

Agenda D vehicle self destruct charge ordnance component, discussing design, performance and tests 16 p2963 A70-34126

- Fluid thermal actuator for temperature control of ITOS /Improved Tiros Operational System/ meteorological satellite, discussing design and performance 16 p2846 A70-34129
- Solar power panel orientation servomechanism using passive elements without power consumption 16 p2846 A70-34130
- Aerospace thermophysics considerations in spacecraft and hypervelocity vehicles systems thermal design, discussing thermal control and control coatings optical and radiative properties [AIAA PAPER 70-812] 17 p3194 A70-34509
- Composite materials in aerospace vehicle design, discussing mechanical behavior, applications and characteristics 17 p3127 A70-34674
- Spacecraft separation mechanisms selection, design and use, discussing multiple device point and linear systems 17 p3175 A70-34767
- Logistic support reusable earth to orbit space shuttle design, noting weight penalties, payloads and development time [AAS PAPER 70-042] 17 p3175 A70-34782
- Configurational and operational characteristics for space shuttle design, considering economic tradeoffs between expendable and reusable systems [AIAA PAPER 70-045] 17 p3175 A70-34783
- Space shuttle-manned space station integration, discussing design and operation, crew rotation, station resupply, docking, etc [AAS PAPER 70-051] 17 p3176 A70-34789
- Habitability factors in space station crew quarter design, discussing hygiene and dining facilities 17 p3036 A70-34803
- Expandable and modular structures technology for manned and unmanned space missions, discussing expandable air lock experiment 17 p3177 A70-35230
- Black Arrow X3 spacecraft design and experiments, including silicon cells performance electronic assemblies and micrometeoroid fluxes 17 p3178 A70-35256
- Delta launch vehicle design modifications for increased payload and space research programs 17 p3179 A70-35261
- Apollo docking system design considerations and preliminary models evaluation for best choice to meet requirements 17 p3179 A70-35262
- Systems design experience derived from Mercury Gemini and Apollo projects, discussing thermal protection, launch propulsion, life support, etc [AIAA PAPER 69-1077] 17 p3180 A70-35644
- ELDO launch vehicle design, describing high energy upper stages 18 p3333 A70-36300
- Kinetic heating of spacecraft surfaces, emphasizing materials and fluid circulation cooling devices 18 p3333 A70-36654
- Space shuttle development, discussing weight and lateral separation distance 19 p3531 A70-37378
- Manned space station design, discussing durations of scientific experiments and crew operation 19 p3532 A70-37752
- Papers on thermophysics for spacecraft thermal design 19 p3551 A70-37781
- Axisymmetric dual spin spacecraft consisting of nonconcentric frictionlessly mounted cylinders equipped with viscous damping mechanisms, evaluating stability criteria by energy method [AIAA PAPER 70-973] 20 p3715 A70-39556
- Soviet book on flight vehicle optimal design algorithms, covering mathematical theory of variational method, multistage spacecraft, etc 20 p3716 A70-39898
- Optimized trajectories and spacecraft for solar-electric missions to asteroids, using chemical booster for injection [AIAA PAPER 70-1120] 20 p3710 A70-40223
- Lunar module systems design, describing R and D program and landing mission 21 p3928 A70-40977
- Space shuttle vehicle requirements, discussing configurations aerodynamic characteristics, aerothermodynamics, materials technology, etc 21 p3929 A70-40983
- Cost optimal space shuttle systems, discussing booster configurations, weight and performance factors, technology utilization, etc 21 p3929 A70-40984
- Boundary layer transition application to space shuttle design, relating aerodynamic noise to turbulent boundary layers 21 p3744 A70-41015
- Aerodynamic heating constraints on space shuttle design, discussing prediction uncertainties for boundary layer transition, laminar, turbulent heating, etc 21 p3744 A70-41017
- Thermoelectric outer planet spacecraft /TOPS/ flight environment, systems design and Titan 3D/Centaur launch vehicle with Burner II upper stage 21 p3930 A70-41795
- Small scientific satellite design objectives, structural and electrical requirements, components integration, instrumentation, antennas, spin rates, vibrations, sealing, reliability, etc 22 p4110 A70-42497
- European participation in small space shuttle development, discussing design, test vehicle program and European applications 22 p4111 A70-43511
- Space station development and missions, discussing general design philosophy, successive project lineage and applications programs 22 p4108 A70-43653
- Spacecraft design to overcome space and launch environment, including environmental protection 23 p4257 A70-44327
- Reusable earth surface-to-orbit shuttle, discussing cost and performance design considerations 23 p4260 A70-44618
- Solar-electric ion propulsion mission analysis and spacecraft designs, discussing thruster, power conditioning, propellant storage and feed, etc 23 p4234 A70-44631
- Apollo spacecraft program evolution, discussing Apollo 13 accident, command and service module modifications, oxygen tank design, mission objectives, etc 23 p4245 A70-44640
- Industry-university interaction in competitive teaching of spacecraft design 23 p4285 A70-44643
- Space shuttle economic risk analysis, using computer program as design and management tool 23 p4261 A70-44674
- Space shuttle for low cost transportation, discussing reusable vehicles, payload, design, orbital inclination, mission capabilities and international participation 23 p4261 A70-44676
- Helios solar probe for automated spacecraft exploration of interplanetary space near sun, considering design, mission planning and U.S.-German cooperation 23 p4245 A70-44689
- Automated and manned spacecraft design, discussing mission objectives and present and potential applications 23 p4264 A70-45003
- Spacecraft fluid mechanical system design, considering environments, materials, lubrication, zero gravity and inflight maintenance [SAE PAPER 700781] 24 p4295 A70-45862
- Economic and design aspects of universal Orbit-to-Orbit Shuttle component of Space Transportation System [SAE PAPER 700763] 24 p4416 A70-45868
- Space station design, discussing existing technology base for earth orbital operations program implementation [SAE PAPER 700756] 24 p4416 A70-45872
- Biotechnological design of shirt-sleeve side-by-side crew station for shuttle vehicle, including pilot vision and landing experience from X-15 program [AIAA PAPER 70-1327] 24 p4416 A70-45923
- Orbit-to-orbit space shuttle toroidal propellant tank design, construction and testing for outflow and slosh characteristics [AIAA PAPER 70-1325] 24 p4417 A70-45940
- Earth-orbiting manned space station design, describing shuttle support and experimentation in attached and free-flying modules [AIAA PAPER 70-1299] 24 p4417 A70-45951
- Systems and design requirements for NASA Manned Space Station, discussing projected experiment program for applications and science [AIAA PAPER 70-1298] 24 p4417 A70-45952
- Venus atmosphere exploration by multiple entry probe, describing spacecraft system design, launch and earth-Venus transfer trajectory, approach and entry sequence, etc [AIAA PAPER 70-1245] 24 p4417 A70-45963
- Long life spacecraft design and reliability based on marine practices and advanced system technology project, considering grand tour outer planets mission [AIAA PAPER 70-1247] 24 p4412 A70-45964
- SPACECRAFT DOCKING**
- Space station-logistics vehicle docking and men-material transfer problem [AIAA PAPER 69-1118] 01 p0193 A70-10612
- Minimum propellant maneuver during docking of elliptical orbit rendezvous between propelled and passive target vehicles, analyzing as variational problems 02 p0380 A70-12784
- Three dimensional latching dynamics and loads induced during Apollo spacecraft docking, using linear stiffness or flexibility matrices for structural elasticity [AIAA PAPER 70-21] 06 p1158 A70-18181
- Transposition and lunar docking simulation tests for Apollo 9 and subsequent missions using test vehicles equipped with flight type hardware 06 p1030 A70-18209
- Automatically controlled rendezvous and docking for orbital assembly of spacecraft, deriving motion equations for mass centers 07 p1393 A70-19481
- Optimal control frequency signals for automatic spacecraft docking 08 p1582 A70-21180
- Automatic rendezvous and mooring-coupling of spin stabilized satellites, discussing configuration, guidance and dynamics model 13 p2499 A70-28397
- Automatic-manual space rendezvous control system for Cosmos and Soyuz satellites, considering terminal phase control at specific closing range and velocity 13 p2499 A70-28402
- Automatically controlled rendezvous and docking for orbital assembly of spacecraft, deriving motion equations for mass centers 15 p2813 A70-32726
- Gemini/Agna docking mechanism design and function, describing latch and rigidizing devices 16 p2986 A70-34151
- Apollo docking system for CSM-LM connection and disconnection during lunar landing mission, discussing flight hardware 17 p3175 A70-34768
- Apollo docking system design considerations and preliminary models evaluation for best choice to meet requirements 17 p3179 A70-35262
- Transposition and lunar docking simulation tests for Apollo 9 and subsequent missions using test vehicles equipped with flight type hardware 20 p3606 A70-39685
- Translation and docking simulator for Gemini support modified for Apollo LM active lunar orbital docking with CSM 21 p3804 A70-41194
- Solar cell array peak power tracker and battery charger for Airlark Vehicle coupling Apollo spacecraft and Saturn IVB stage to form manned orbiting workshop 21 p3759 A70-41221
- Automatic control of Cosmos spacecraft docking maneuvers in two successive encounter phases 23 p464 A70-45016
- SPACECRAFT ELECTRONIC EQUIPMENT**
- NT AIRBORNE/SPACEBORNE COMPUTERS**
- Cosmos 149 meteorological satellite telephotometer, radiometer and other electronic equipment for measuring atmosphere and underlying surfaces physical parameters 01 p0095 A70-11611
- Electronic integration assembly/EIA/ incorporating modular electronic packaging design techniques to provide reliable mechanical configuration for spacecraft equipment 02 p0268 A70-12579
- Apollo 11 electronics, discussing inertial measurement unit, optical navigation system, command module computer, communication network, TV and experimental packages 02 p0270 A70-12633
- MOSFET uses in spacecraft electronic subsystems, describing digital control unit and typical logic circuitry 03 p0456 A70-13534
- Spacecraft electronics packaging methods, discussing mechanical engineering aspect of high density component packing in single housing 06 p1017 A70-17337
- Avionic and space electronic equipment converging design, considering chip computer 06 p1017 A70-17354
- Ground and onboard electronics systems for space shuttle vehicles, discussing role in equipment reliability and maintainability, life cycle costs, management control, etc [AIAA PAPER 70-261] 07 p1398 A70-20391
- Integrated electronics system for space shuttles including propulsion, electrical power, life support and flight control [AIAA PAPER 70-257] 07 p1398 A70-20392
- Prototype Onboard Processor /OBP/ designed for high reliability, low power dissipation, small size and low weight, discussing attitude control signal processing 08 p1464 A70-20609
- Maintainable electronic equipment requirements for long duration manned space missions 10 p1852 A70-24895
- Spacecraft S band power amplifier TWT electrical, environmental and life tests under saturated conditions [AIAA PAPER 70-506] 11 p2016 A70-25468
- TWT, obtaining life performance data from spacecraft, discussing distortion characteristics [AIAA PAPER 70-505] 11 p2017 A70-25494
- Alouette satellite antennas and receivers for detecting plasma resonances and VLF signals, noting ground station telemetry link 13 p2380 A70-29902
- MOSFET integrated circuits radiation resistance measurements under electron irradiation, determining

changes in threshold voltage, transconductance and on-resistance for applications in spacecraft
14 p2559 A70-31372

Wire wrapped, soldered, welded and crimped joints and plug/socket connections in electronic packaging for spacecraft
16 p2879 A70-33958

Manufacturing and technology of hybrid microelectronics packaging in Black Arrow X-3 satellite equipment
16 p2879 A70-33959

Satellite electronics production, discussing dielectric film capacitor, solar probe magnetic oxide memory core and thin film assemblies
17 p3053 A70-35268

LSI circuits in space electronics, discussing packaging, reliability, applications, etc
17 p3053 A70-35274

Wideband microwave IC tunnel diode amplifier /TDA/ for artificial satellites, discussing noise, size and weight reduction
17 p3053 A70-35277

LM-Apollo rendezvous radar and transponder electronic assemblies packaging and mechanical design
18 p3332 A70-36762

Soviet book on space electronics fundamentals covering equipment problems, energy requirements, communication, features, radio remote control and correction, radio astronomy, etc
19 p3375 A70-37400

Aerospace electronics covering fly-by-wire aircraft flight control, ATC, star trackers for spacecraft attitude control, etc
20 p3669 A70-39668

Pin fin coldplate heat exchanger for cooling Apollo spacecraft electronic equipment, calculating forced convection heat transfer and fluid pressure drop
21 p3797 A70-41025

Electronic parts testing for long duration Mariner spacecraft missions
21 p3799 A70-41798

Thermoelectric outer planet spacecraft /TOPS/ structural problems associated with high gain antenna and electronic equipment
21 p3930 A70-41803

Space shuttle electronics requirements, considering systems in Mercury and Gemini spacecraft and Apollo lunar and command service modules
23 p4259 A70-44612

Helios solar observation satellite equipment design study for solar plasma low energy particles onboard measurements
23 p4262 A70-44844

Integrated electronics for NASA space shuttle program, discussing costs, configurations and technology application
24 p4418 A70-45966

Miniwire method of packaging high density electronic equipment shown in photographs, including OAO applications
24 p4320 A70-46247

SPACECRAFT ENVIRONMENTS

Simulated zero gravity tests of force application by subjects in Apollo suits, varying worksite geometry, personnel restraints and force type and direction
01 p0038 A70-10964

Plume-induced flow separation effect on thermal environment using Saturn 5 film and instrument data, attributing heating rate increase to recirculated exhaust gases
04 p0761 A70-14815

Mathematical model for investigating satellite thermal behavior in space based on space simulation in vacuum chamber with walls maintained at liquid nitrogen temperature
05 p0924 A70-17022

Space radiation environment, discussing characteristics and measurement techniques of various radiation types and sources
06 p1134 A70-17260

Dose calculation by space radiation dose evaluation codes /SPARDEC/ for various space radiation environments
06 p0990 A70-17261

Space environment radiation dose monitoring systems requirements and implementation, discussing material distribution, dose equivalence, parameters accuracy, etc
06 p0990 A70-17262

Spacecraft radiation environment, dosage and shielding problems, discussing high energy protons and electrons exposure hazards for astronauts and mission planning computer codes
06 p0991 A70-17273

Space environment simulation chamber free from oil molecules contamination
09 p1655 A70-22830

Spacecraft conditions influencing remote imaging sensor performance, discussing altitude, temperature and moisture at sensor, air turbulence, vehicle motion, etc
09 p1677 A70-22853

Solar simulation laboratory test facility for extraterrestrial solar radiation effects on vehicles beyond earth atmosphere, emphasizing spectral filters
11 p2030 A70-25353

Thermal control pressure sensitive adhesive tapes for spacecraft applications, discussing properties degradation due to simulated terrestrial and space environments
11 p2067 A70-26366

Apollo command and service modules environmental control system, discussing redesign of faulty hardware
12 p2167 A70-27948

Computerized thermal modeling of spacecraft environmental control systems /ECS/
15 p2705 A70-32523

Hydrogenomonas vs Chlorella spacecraft life support systems, discussing human requirements and equipment for balanced food supply on long duration space missions
16 p2855 A70-34315

Bioastronautics and earth ecology, discussing environmental pollution, nutritional, microbiological and psychological problems
18 p3350 A70-36757

Thermal error in temperature differences between actual and simulated space environment
19 p3401 A70-38301

Space environment simulator for thermal vacuum performance of artificial satellites and components
19 p3401 A70-38308

Satellite radiation dosage in space proton and electron environment
19 p3511 A70-38490

Soviet monograph on automated physiological measurements with onboard computers, covering EKG, EEG, electromyogram, respiration, muscular activity, etc
19 p3372 A70-38797

Artificial rain erosion effects on missile and spacecraft recorded via high speed photography
20 p3635 A70-40531

Steady one dimensional temperature field of cylindrical shell spacecraft, allowing for heat conduction and convective and radiative heat transfer within shell
21 p3942 A70-40841

Chicken lymphopenia and body mass loss resulting in death from chronic restraint, developing physiologically unstressful restraint for space environmental testing
21 p3765 A70-41488

Mass spectrometer and high voltage converter powering electrostatic plasma and solar wind analyzer for cosmic space studies on Sputnik 3 and Heos A satellites
22 p4025 A70-42312

Stepwise linear regressions method for estimating black body surface radiances from model atmospheres and corresponding simulated Nimbus 2 window-channel radiances
22 p4013 A70-42617

Electrofluid dynamic cooling system for spacecraft environmental control, describing design and operating principles
22 p3965 A70-43142

High voltage solar array operational problems in earth orbit environment, discussing conducting surfaces, power loss, plasma effects, leakage, etc
22 p3967 A70-43544

Manned orbiting laboratory microclimate including atmosphere composition, temperature, humidity and weightlessness effects, radiation and noise protection, etc
22 p3980 A70-43636

Blood-brain and blood-cerebrospinal fluid barriers alterations under various physical environments in manned orbital laboratory
22 p3973 A70-43647

Materials problems in space and spacecraft environments, discussing particle density, composition and UV radiation, spacecraft structure, payloads, vibration, etc
23 p4209 A70-44328

Long term space flight crew habitation emphasizing food management, station housekeeping, personal hygiene and waste handling
23 p4154 A70-44622

SPACECRAFT GUIDANCE

NT SATELLITE GUIDANCE

Two axis spherical gas bearing gyro for accurate measurements of space vehicle position and attitude rates while maintaining compatibility with exotic environments
01 p0086 A70-10308

Strapdown inertial guidance systems performance and applications
02 p0336 A70-12264

Apollo 11 electronics, discussing inertial measurement unit, optical navigation system, command module computer, communication network, TV and experimental packages
02 p0270 A70-12633

Optimal strategies for controlled plant guidance into convex space assuming linear differential equations of motion
03 p0459 A70-13339

Shooting method for real time optimization of multiple burn rocket flights, presenting analysis, algorithm and test results
04 p0761 A70-14932

Analytic guidance and control for minimum fuel expenditure and optimal guidance corrections for low thrust vehicle in Martian orbit
04 p0716 A70-15544

Mariner 4 guidance and control system performance from mission nominal end to final termination time
04 p0765 A70-15664

Onboard computer requirements for inertial navigation of spinning and maneuvering vehicle, determining design parameters
06 p1013 A70-17161

Trajectory, guidance and environmental parameters and uncertainties effect on design optimization of out-of-orbit Viking soft lander
06 p1157 A70-18134

Ground-based and onboard guidance and navigation systems for outer planet flyby missions concerning direct, Jupiter swingby and Grand Tour trajectories
06 p1104 A70-18194

Optimal control program using multiple maxima method for maneuvering spacecraft in earth atmosphere with aim of changing orbital plane
07 p1331 A70-19483

Apollo space vehicles guidance and navigation using data obtained onboard, discussing inertial platforms, accelerometers and trajectory calculations
08 p1541 A70-21023

Apollo crew procedures, simulation and flight planning, discussing navigation, guidance and control procedures
09 p1657 A70-23706

Linearized theory for minimum fuel guidance in neighborhood of minimum fuel space trajectory, unrestricted thrust magnitude and allowances for mid-course impulses
11 p2079 A70-25957

Minimum fuel control for discrete time Gaussian processes, applying results to spacecraft midcourse guidance for earth-Mars mission
11 p2079 A70-25958

Guidance boundary value problem estimation by continuous least mean square /CLMS/ method, describing application to generation of velocity required coefficients
11 p2081 A70-26322

Gimbal influence on three axis gyro stabilized platform in spacecraft guidance during maneuvers
13 p2446 A70-28388

Apollo Guidance Computer operations and functions during lunar orbit rendezvous
13 p2446 A70-28390

Mariner Mars 1969 navigation, guidance and control systems design, mechanization and flight testing
13 p2446 A70-28393

Trajectory predictive lunar return atmospheric reentry guidance of roll-controlled Apollo-type vehicle, using variable integration steps
13 p2446 A70-28396

Optimum filtering techniques for radio guidance of third stage of Europa 1 booster compared for effectiveness
13 p2381 A70-28437

Laser tracking system for space guidance, describing equipment and operations
13 p2447 A70-28529

Onboard navigational requirements for future planetary missions, discussing major subsystems
13 p2448 A70-28701

Wind effects on rigid launch vehicle guidance and control system design, using model incorporating structural bending and fuel sloshing
13 p2448 A70-28755

Centaur space guidance equipment design, development, parts control and reliability
14 p2612 A70-30452

Lunar Orbiter Spacecraft Guidance and Control, discussing design and flight results
14 p2613 A70-30455

Navigation for lunar parking orbit with time varying osculating orbital elements, using Apollo 11 Doppler tracking data
14 p2613 A70-30457

Guidance system cost and reliability by Monte Carlo analysis of failure statistics
14 p2614 A70-30462

Temperature rate flight control system /TRFCS/ for lifting reentry vehicles control and guidance
14 p2614 A70-30464

Onboard moon-to-earth trajectory approach guidance with or without midcourse guidance using optical angular measurements
14 p2615 A70-30470

Apollo Guidance, Navigation and Control system prelaunch checkup, flight experience and error analysis
14 p2615 A70-30758

Restricted three body interplanetary guidance scheme using midcourse fixed time of arrival velocity correction

14 p2615 A70-30760

Apollo navigation methods and data analysis covering inertial guidance with gyro-stabilized platforms, acceleration sensors, sextants and telescopes, ergodicity, filtering, etc

15 p2772 A70-31549

Planetary atmospheres parameters use in spacecraft guidance

15 p2773 A70-32267

Variational equation of ballistic trajectory applied to two point boundary value guidance problems

15 p2812 A70-32504

Optimal control program using multiple maxima method for maneuvering spacecraft in earth atmosphere with aim of changing orbital plane

15 p2813 A70-32728

Star tracker rigidly connected to spacecraft frame for attitude determination by star field correlation

16 p2946 A70-33157

Cross product steering for space vehicles and ballistic missiles guidance during powered vacuum flight, pointing thrust acceleration vector to null velocity at termination

16 p2947 A70-33440

Velocity vector for boost vehicles guidance, comparing implicit and explicit computation

16 p2947 A70-33441

Terminal guidance for Mars softlander utilizing Doppler and range radar for steering and propulsive control

17 p3133 A70-35286

Apollo lunar landing guidance, navigation and control, discussing inertial and optical measurements, computer, digital autopilots, rendezvous and mid-course navigation

17 p3134 A70-35288

Optimal explicit guidance equation using maximum principle for two stage vehicle injecting satellite into parking orbit

17 p3134 A70-35289

Apollo lunar landing flight control functions, organization, disciplines and activities at Mission Control Center

17 p3134 A70-35292

ELDO launch vehicle FE /flat earth/ guidance, discussing perturbations, trajectory optimization, inertial navigation system, onboard computer, etc

18 p3288 A70-36299

Comet de Arrest 1976 opportunity mission analysis, considering flyby and rendezvous trajectories and guidance problems

[AIAA PAPER 70-1073]

19 p3513 A70-37426

Saturn 5 suboptimal continuous guidance design, eliminating discontinuous control encountered in SA-502 flight

[AIAA PAPER 70-965]

20 p3600 A70-39564

Booster parameterized guidance algorithms investigated on basis of steering forms validity, discussing exoatmospheric ascent applications

[AIAA PAPER 70-1006]

20 p3669 A70-39584

Preflight error statistics of earth based Doppler tracking for Mariner navigation concerning Mars 1971 and Venus-Mercury 1973 missions

[AIAA PAPER 70-1077]

20 p3670 A70-40023

OP-EX, optimal explicit guidance algorithm for powered flight outside atmosphere

[AIAA PAPER 68-869]

21 p3848 A70-41734

Manned spacecraft abort guidance and control problems, discussing various modes and emergency conditions

24 p4374 A70-46210

Satellite launch vehicle guidance equations for programmed optimization applied to Eldo inertial guidance system

24 p4375 A70-46359

SPACECRAFT INSTRUMENTS

NT LASER ALTIMETERS

NT SATELLITE INSTRUMENTS

NT SPACECRAFT POSITION INDICATORS

Floated single degree of freedom gyroscope and pendulous integrating gyroscope accelerometer, discussing design features as inertial sensors for future space missions

01 p0086 A70-10313

Cryogenic temperature sensor calibration with automated data readout for spacecraft accuracy requirements, describing potentiometric system

03 p0486 A70-13561

Spacecraft surface secondary electron emission effects on electron trap measurements in magnetosphere and solar wind, noting agreement with positive ion densities

03 p0561 A70-13994

Meteor particles spatial density and energy characteristics on space vehicles, using luminescent sensors coupled with photomultiplier

04 p0744 A70-14445

Apollo lunar mission optics concerning liftoff alignment theodolites, spacecraft atmosphere electro-optical sensor, helmet optical coating and laser experiment

04 p0688 A70-14693

Si fluid thermal actuator as temperature sensor and prime mover for active thermal controller in spacecraft

05 p0806 A70-16124

Scientific equipment on Cosmos 237 satellite for recording extraterrestrial radiation data, discussing specifications, operation and mission purpose

05 p0851 A70-16733

Distance of spacecraft descending on parachute through planetary atmosphere measured from center of planetary mass using onboard instrument data

06 p1155 A70-17897

Electron gun onboard reentering spacecraft to measure densities and temperatures in flowing gases

06 p1066 A70-18286

Visual display media requirements of future high performance vehicles, considering spacecraft and aircraft

08 p1499 A70-21691

Spacecraft conditions influencing remote imaging sensor performance, discussing altitude, temperature and moisture at sensor, air turbulence, vehicle motion, etc

[AIAA PAPER 70-291]

09 p1677 A70-22853

Earth resources sensor integration into satellite or aircraft, discussing cost effectiveness

[AIAA PAPER 70-316]

09 p1677 A70-22871

TV instruments for Mariners 6 and 7 providing analog and digital data, comparing resolutions and accuracies to earth based telescopes and Mariner 4 photographs

09 p1682 A70-23506

Michelson interferometer usable in space for stellar spectroscopy, noting compactness achieved through mirror area reduction

[ONERA-TP-799]

10 p1887 A70-24032

Space engineering, flight instrumentation features and spacecraft subsystems integration problems

10 p1950 A70-24610

Mass spectroscopy for solar system exploration, discussing ion sources, mass analyzers and ion detectors meeting mission requirements

10 p1942 A70-24612

Test program effectiveness for Saturn Instrument Unit (IU), summarizing objectives, costs and results

[AIAA PAPER 70-379]

10 p1891 A70-24924

LiF prism spectrometer for space applications, discussing vacuum UV transmission and mechanical properties

11 p2049 A70-25629

Digital closed-loop inflight calibration system for spaceborne particle spectrometers, utilizing cesium iodide crystal and programmable photomultiplier dynode supply

12 p2232 A70-27405

Optical instruments for space measurements, discussing photoelectric spectroscopic devices, Michelson interferometer, etc

12 p2234 A70-27597

Rocket-borne flight testing of sensitive accelerometer developed to measure small forces applied to satellite or space probe surface

13 p2403 A70-28433

Meteor particles spatial density and energy characteristics on space vehicles, using luminescent sensors coupled with photomultiplier

13 p2485 A70-28470

Spaceborne logarithmic variable prescaling counters for automatic compression of particle measurement data, discussing statistical error

13 p2406 A70-28931

Surface type airborne electrostatic probes in ambipolar diffusion flux measuring ion saturation current, discussing electrode contamination and temperature and ablation tests

[AIAA PAPER 69-700]

13 p2412 A70-29967

Fluxgate and Ru vapor magnetometers for space measurements over wide field intensities, reducing electronic phase shift and experiment weight

13 p2415 A70-30045

Viking Mars mission meteorological instruments for measurements of water vapor content, wind speed/direction, temperature and pressure

14 p2584 A70-30553

Nimbus weather satellite as laboratory for sensors collecting data for global weather system, describing launching, attitude control systems and cameras

14 p2654 A70-31149

Apollo navigation methods and data analysis covering inertial guidance with gyro-stabilized platforms, acceleration sensors, sextants and telescopes, ergodicity, filtering, etc

15 p2772 A70-31549

Low altitude atmospheric effects on IR beam horizon sensors in carbon dioxide band, noting corrections for spacecraft attitude measurement

15 p2735 A70-31792

Mariner spacecraft electro-optically controlled star sensors design and performance, discussing star simulation and stray light test techniques

15 p2736 A70-32033

Atomic clock for climatic and mechanical conditions of aerospace environment, using optically pumped rubidium cell

15 p2740 A70-32366

Solid state electroluminescent phosphor displays for aircraft/spacecraft instrument panels

16 p2906 A70-33178

Automatic active optic control of alignment and figure of primary mirror of spacecraft-borne telescope with response time stability

16 p2907 A70-33189

Spacecraft hydraulic timers design and qualifications testing, discussing oil selection and temperature dependence

16 p2914 A70-34112

Nonmagnetic explosive actuated indexing device permitting precise 180 deg rotation of magnetometer sensor on Pioneer 6 spacecraft

16 p2914 A70-34124

Nonmagnetic lightweight oscillating actuator for multiple indexing of spacecraft magnetometer

16 p2845 A70-34128

Thermal response of passive heliotope solar array orientation device using rotating bimetallic helix, performing energy balance analysis for helix temperature distribution

17 p3082 A70-34761

Astronaut scientific observation capabilities, discussing flexibility and instrumental design

[AAS PAPER 70-035]

Active RC bandpass filter for space fluxgate magnetometer, using state variable synthesis

17 p3054 A70-35526

Spaceborne lightweight mirror blanks made from ceramics fabricated from glass crystallization

18 p3263 A70-36559

Aerospace instrumentation - Conference, Cranfield Institute of Technology, England, March 1970

19 p3428 A70-38514

Launch and reentry vehicles pressure transducers, measuring propellant quantity, water systems, fuel, oxidizer, battery compartment and ascent engines, etc

19 p3430 A70-38519

Spacecraft-based navigation instruments for outer planet missions using celestial directions to outer planet natural satellites

[AIAA PAPER 69-902]

20 p3669 A70-39681

NASA automatic checkout systems for Saturn 5 stages and instrument units

21 p3803 A70-40770

Integrated Cryogenic Isotope Cooling Engine system (ICICE) for spacecraft sensors refrigeration requirements

21 p3947 A70-41053

Spacecraft sheath structure, potential and velocity effects on ion current measurements by traps and mass spectrometers

21 p3816 A70-41087

Transistorized DC to AC converter providing sinusoidal output to power automatic spacecraft control devices via pulse width modulation

22 p3994 A70-42309

Mass spectrometer and high voltage converter powering electrostatic plasma and solar wind analyzer for cosmic space studies on Sputnik 3 and Heos A satellites

22 p4025 A70-42312

Astronaut physiological monitoring aboard Soyuz spacecraft

22 p3980 A70-43691

Soft X ray astronomical instrumentation for space experiments, discussing Geiger tubes, gas counters, modulation collimators, telescopes, etc

23 p4196 A70-44416

Apollo command service module nondispersive X ray detection system for lunar composition map compilation, discussing design and performance

23 p4196 A70-44417

Spacecraft astronomical instrument structural design, examining aging, vibration and temperature distribution deformations and optical surface contamination

24 p4339 A70-45823

Spacecraft sensor trends from space station research and technology requirements regarding astronomy, biomedicine and biology, earth resources, etc

[AIAA PAPER 70-1291]

24 p4418 A70-45974

SPACECRAFT LANDING

NT LUNAR LANDING

NT PLANETARY LANDING

Optimal space vehicle reentry control ensuring minimum scattering of landing points based on accelerometer and free pitch-angle gyroscope data

04 p0760 A70-14431

Chemical heat source combined with metals ignition properties considered for spacecraft heating during Mars nighttime landing

04 p0628 A70-15426

High speed instrumentation camera system for recording rapid motions during Apollo landing impact

09 p1688 A70-23770

Sterile lander recontamination prevention from microorganisms during in-flight transfer from unsterilized carrier vehicle

11 p1991 A70-26049

Mars landing analysis and simulation for unmanned lander prototype, discussing digital simulation by Monte Carlo techniques and physical tests

11 p2032 A70-26291

On-line parameter updating for relationship between Martian atmospheric density and height above surface during spacecraft descent based on least squares approach 11 p2113 A70-26318

Spacecraft autonomous control algorithm to ensure geographically specified landing accuracy without considering atmospheric density distribution 12 p2270 A70-28251

Reentry control algorithm for prescribed landing point of space vehicle entering earth atmosphere at parabolic velocity, discussing double-dip reentry and digital simulation 13 p2499 A70-28376

Manual control systems for spacecraft stabilization involved in rendezvous, midcourse correction, landing, etc 13 p2357 A70-28394

Optimal space vehicle reentry control ensuring minimum scattering points based on accelerometer and free pitch-angle gyroscope data 13 p2503 A70-28456

Microbial release from solid spacecraft materials after hard landings, testing survival during decontamination or terminal sterilization 15 p2688 A70-31664

All-flexible parawing as primary descent system for large spacecraft landing, discussing configuration, structural arrangement, multistage reefing and L/D performance tests [AIAA PAPER 70-1187] 21 p3754 A70-41828

Point accelerations on semirigid body spacecraft from accelerometer data with structural vibration noise at landing 23 p4200 A70-44387

Spacecraft landing gear shock attenuation systems using crushable honeycomb, draw-die tubes and retrorocket skirt jet 23 p4262 A70-44695

SPACECRAFT LAUNCHING

HEOS 1 launch operations, discussing test and checkout phase, mating with Thor Delta launch vehicle, countdown phase and launch 01 p0196 A70-11116

Postlaunching operations putting HEOS 1 satellite into orbit, verifying subsystem functions, starting experiments and tracking for data recovery 01 p0197 A70-11117

European Space Operations Center activities in observing HEOS 1 satellite, discussing launch, data processing and S-11 experiment involving ionized Ba cloud creation 01 p0197 A70-11118

NASA network and Thor Delta type booster to launch Italian satellite to geostationary orbit, evaluating feasibility 03 p0451 A70-13841

Italian space satellite booster programs for launching satellite payloads into low orbit 03 p0609 A70-13846

Orbit determination program for launching and stationkeeping of 24 hr geostationary satellites, using azimuth and elevation of single autotrack antenna 03 p0578 A70-14339

Simple harmonic oscillator vibrations due to local random processes in spacecraft launching, calculating oscillator displacement variance 04 p0774 A70-15102

High energy propulsion module utilizing F/H fuels for planet flyby, orbiter mission and injection of 24-hr satellites, discussing design and equipment [DGLR-69-18] 04 p0736 A70-15176

Orbital rendezvous for inspection, rescue, etc, discussing launch bases number, warning time and alert status effect on reaction time 06 p1027 A70-17173

Satellite launch vehicle attitude control stability study including fuel sloshing and body bending effects 06 p1155 A70-17320

Launch facilities institutionalization for space shuttles launch cost minimization [AIAA PAPER 70-244] 07 p1251 A70-20374

Launch vehicle minimum cost design emphasizing flight vehicle evolution stages via effect on costs [AIAA PAPER 70-240] 07 p1396 A70-20378

Orbit-to-orbit shuttle for launch in earth-to-orbit shuttle vehicle, discussing design requirements [AIAA PAPER 70-268] 07 p1399 A70-20397

Longitudinal structural vibration and lateral bending response mass and spring coupling in Saturn AS-502 during boost with longitudinal excitation by pogo effect 09 p1766 A70-23239

Optical transmission technology for aerospace launch operations investigated on wideband communication systems projects involving use of gallium arsenide lasers and diodes 09 p1640 A70-23776

Spacecraft launch computerized simulator, discussing operational characteristics applicable to on-line real time process control 11 p2013 A70-26217

Atlas/Centaur and Titan/Centaur launching of Intelsat 4 communication satellites, discussing booster, stage characteristics and payload [AIAA PAPER 70-483] 11 p2127 A70-26605

Diamant B satellite launcher testing and construction, discussing DIAL/WIKA scientific satellite launch 12 p2314 A70-28299

Turbopump-fed rocket engine for satellite launchers, discussing gas cooling, fuel tank pressurization, etc 13 p2474 A70-29138

Space vehicle response to in-flight wind turbulence, describing operational procedure for launch advisability determination 14 p2653 A70-30587

Atmospheric wind profiles and boundary layer turbulence power spectra for calculation of wind loads on space vehicles during prelaunch and launch 14 p2653 A70-30600

Syncom and Early Bird systems development, launch procedure and operation, discussing common components 14 p2654 A70-31144

Nimbus weather satellite as laboratory for sensors collecting data for global weather system, describing launching, attitude control systems and cameras 14 p2654 A70-31149

Modular launch vehicle system for European commercial satellites using Eldo-A/I Astris and French rocket stages 16 p2987 A70-34342

Satellite launching rocket guidance and control based on implicit measurement 17 p3133 A70-35283

Optimal explicit guidance equation using maximum principle for two stage vehicle injecting satellite into parking orbit 17 p3134 A70-35289

International organizations participation in convention on liability for damage caused by launching of objects into outer space 17 p3202 A70-35784

Space object, launching and platform registration 17 p3202 A70-35787

Spacecraft launch registration, comparing Soviet and American information furnished to UN 17 p3202 A70-35789

Optimum launch trajectories for ATS-E mission with noncircular parking orbits, considering apogee motor size, perigee radius and duration constraints [AIAA PAPER 70-1051] 19 p3528 A70-38866

Launch facilities institutionalization for space shuttles launch cost minimization [AIAA PAPER 70-244] 20 p3606 A70-39697

ELF acoustic gravity wave arrival from Apollo launchers recorded by Doppler shift ionospheric sounder channelled near mesopause and lower thermosphere 23 p4187 A70-43859

Launch optimization of artificial satellites for minimizing thermal radiative heat input during low altitude orbit 23 p4264 A70-45047

SPACECRAFT LUBRICATION

Vacuum evaluation of lubricants and techniques applicable to miniature ball bearings and instrument gearing for space systems [ASME PAPER 69-LUB-30] 01 p0100 A70-10379

Solid lubricants friction and wear bench testing under simulated space environment 06 p1075 A70-17340

Applied space research covering photovoltaic cells, electric propulsion, onboard data storage, vacuum lubrication and NASA-European organizations budgets 06 p1141 A70-17780

Vacuum evaluation of lubricants and techniques applicable to miniature ball bearings and instrument ball bearings and instrument gearing for space systems 13 p2419 A70-29120

Solid lubricated contacts performance in Nimbus and OAO spacecraft, discussing slip ring assembly and noise problems in Ag-graphite brushes 16 p2920 A70-33810

Slip ring assemblies for spacecraft devices, evaluating sliding electrical contact industry technological capabilities 16 p2920 A70-33811

Lubrication role in aerospace engineering, discussing lubricant and component selection, environmental factors, etc 16 p2923 A70-34155

Lubrication system flight performance and laboratory test data for space applications, considering torque motors, slip rings, bearings and gears 16 p2923 A70-34157

Controlled leakage sealing of hydrodynamic bearing lubrication systems for space vehicles in synchronous orbit 16 p2923 A70-34158

Instrument size ball bearings lubricated with bonded dry or transfer films in simulated interplanetary spacecraft tests 16 p2923 A70-34166

Lubrication technology for space shuttles, discussing vehicles and airbreathing and rocket engines 22 p4047 A70-43325

SPACECRAFT MANEUVERS

Minimum propellant rendezvous maneuver of space vehicles in neighboring circular orbits 01 p0193 A70-10555

Minor circle maneuver solution to equations of motion of vehicle in spherical planet atmosphere for gliding and cruising, discussing cylindrical planar case 01 p0184 A70-10949

Spacecraft horizontal maneuvers in homogeneous gravitational field to achieve soft landing on planetary surface, including optimal liftoff and orbital transfer 01 p0197 A70-11501

Dynamic characteristics of model of spacecraft-astronaut-tether system during approach, deriving kinetic potential 01 p0192 A70-11587

Geostationary satellite payload-optimal injection trajectory from nonequatorial firing range, describing dog-legging maneuvers 03 p0573 A70-13845

Optimal descent maneuver from planetary orbit for fixed atmospheric reentry angle, considering minimum impulse/fuel consumption/ 04 p0745 A70-14496

Launch vehicles design, propulsion, maneuverability and navigation 05 p0923 A70-16565

Orbital rendezvous for inspection, rescue, etc, discussing launch bases number, warning time and alert status effect on reaction time 06 p1027 A70-17173

Satellite electric propulsion system and configuration for orbital transfer maneuvers, describing ELDO launcher, Black Arrow, orbital dynamics, sensor system, etc 06 p1130 A70-17468

Interplanetary swingby trajectory correcting maneuvers for space vehicles return to earth after planar orbiting, with emphasis on singular points 06 p1142 A70-17877

Lunar module motion during optimal ascent from moon surface into circular orbit of command module, noting descent maneuver similarity 06 p1155 A70-17881

Time optimal rendezvous maneuver between neighboring elliptic orbits, discussing propulsive jet system with variable thrust 07 p1381 A70-19357

Optimal control program using multiple maxima method for maneuvering spacecraft in earth atmosphere with aim of changing orbital plane 07 p1331 A70-19483

Flight maneuver for roll modulated lifting reentry vehicle to reduce deployment dynamic pressure 07 p1394 A70-19724

Abort and staging separation maneuvers of two equal size reusable lifting entry vehicles in wind tunnel tests [AIAA PAPER 70-260] 07 p1397 A70-20389

Optimal maneuver decision strategy for space vehicle midcourse trajectory corrections 09 p1760 A70-22928

Capillary barriers to provide propellant positioning, expulsion capability and slosh dampening for spacecraft propulsion systems during rotational maneuvers [AIAA PAPER 69-529] 11 p2123 A70-26119

Space vehicle on-line tracking with impulsive thrust maneuver by sequential estimation scheme, reducing radius measurement error 11 p2008 A70-26237

Spin stabilized satellite attitude and orbital maneuvers computation, considering required accuracy and computer time in numerical integration procedures 11 p2125 A70-26278

Gimbal influence on three axis gyro stabilized platform in spacecraft guidance during maneuvers 13 p2446 A70-28388

Synergetic plane change maneuver optimal control, combining aerodynamic and propulsive flight phases for efficiency 15 p2715 A70-31874

Optimal control program using multiple maxima method for maneuvering spacecraft in earth atmosphere with aim of changing orbital plane 15 p2813 A70-32728

Space shuttle mission trajectory optimization with steering in atmospheric flight and orbiter maneuvers [AAS PAPER 70-048] 17 p3176 A70-34788

Parking orbit optimal orientation for minimal impulsive maneuvers total velocity increment in three dimensional capture-escape mission [AIAA PAPER 69-918] 17 p3172 A70-35649

Covariance matrices estimates for trajectory parameter tracking of thrust-maneuvering spacecraft [AIAA PAPER 70-1017] 20 p3666 A70-39516

German monograph on satellite orbit synergetic plane change maneuver optimal control by entry into denser atmosphere 20 p3705 A70-39924

Large earth orbiting spacecraft minimum time attitude maneuvers with control moment gyroscopes, discussing torque calculation and gimbal angle rates 20 p3670 A70-40284

- Optimal low thrust power plant for spacecraft payload-maneuver tradeoff 21 p3866 A70-40832
- Algorithm for spacecraft rotational maneuver control based on single turn around specific axis, using onboard computer 21 p3849 A70-42236
- Rocket nose cone optimal turn into horizontal ballistic trajectory after separation from booster, using dynamic programming 22 p3962 A70-43351
- Satellite dynamics - Conference, Prague, May 1969 24 p4405 A70-45526

SPACECRAFT MODELS

- Mission model construction for power limited systems, discussing flight concepts, propulsion mixes and electric propulsion 01 p0183 A70-10848
- Dynamic characteristics of model of spacecraft- astronaut-tether system during approach, deriving kinetic potential 01 p0192 A70-11587
- Mathematical model for investigating satellite thermal behavior in space based on space simulation in vacuum chamber with walls maintained at liquid nitrogen temperature 05 p0924 A70-17022
- Passive thermal control system design of SERT II nonspinning satellite based on 534-node analytical model calibrated against test data 11 p2127 A70-26358
- Wind effects on rigid launch vehicle guidance and control system design, using model incorporating structural bending and fuel sloshing [ACARDOGRAPH-115] 13 p2448 A70-28755
- Spacecraft thermal mathematical model adjustment to fit measured temperatures, using iteration method 15 p2812 A70-32513
- Rotating flexible cable-connected space station dynamic scale model, describing suspension system and artificial gravity generation 23 p4258 A70-44528

SPACECRAFT MODULES

- NT LANDING MODULES
- NT LUNAR LANDING MODULES
- NT LUNAR MODULE
- NT MARS EXCURSION MODULE
- High energy propulsion module utilizing F/H fuels for planet flyby, orbiter mission and injection of 24-hr satellites, discussing design and equipment [DGLR-69-18] 04 p0736 A70-15176
- Experiment space module combined with space station and serviced by shuttle for low total cost and maximum flexibility in funding and scheduling [AAS PAPER 70-034] 17 p3175 A70-34777
- Subsystem selection integration and technology for space base and planetary mission module /PMM/ of space station program [AAS PAPER 70-021] 17 p3023 A70-34801
- Nuclear rocket applications in Nuclear Flight Propulsion Module /NFPM/ and Reusable Nuclear Shuttle /RNS/ 22 p4070 A70-43180
- Orbital space station program, discussing common module design, support, space shuttles and objectives [SAE PAPER 700755] 24 p4415 A70-45852
- Free-flying modules interface and operation in conjunction with space station for orbital research into manned space program [AIAA PAPER 70-1300] 24 p4417 A70-45950
- Earth-orbiting manned space station design, describing shuttle support and experimentation in attached and free-flying modules [AIAA PAPER 70-1299] 24 p4417 A70-45951

SPACECRAFT MOTION

- U SPACECRAFT TRAJECTORIES
- Mathematical relations and procedures for automatic satellite tracking by four axis Zeiss camera, discussing motion along small circle approximation and punch tape criteria 02 p0255 A70-11770
- Satellite motion in earth gravitational field under additional forces using Stockel theorem 04 p0760 A70-14432
- Ion and electron concentrations far field disturbances caused by satellite motion in ionosphere and lower exosphere, deriving plasma drag 04 p0762 A70-14935
- Meteoroids average velocity relative to spacecraft determined using sporadic meteors orbital elements data in interplanetary space 04 p0757 A70-15550
- Kalman-Bucy filtering for estimating initial conditions and smoothing problems in linear dynamic systems, applicable to rectilinear motion of randomly accelerated spacecraft 12 p2186 A70-27905
- Satellite stationary motions stabilization using rotors with axes fixed inside spacecraft 13 p2499 A70-28389
- Satellite motion in earth gravitational field under additional forces using Stockel theorem 13 p2503 A70-28457

- Reentry vehicles dynamic stability analysis involving pitch, yaw and roll motions modes coupled by asymmetries 13 p2341 A70-29027
- [AIAA PAPER 70-561] 13 p2341 A70-29027
- Ionospheric plasma disturbances due to moving space vehicle, investigating by electron density measurements in rarefied wake regions using gyro-plasma probe 17 p3142 A70-35763
- Motion perturbation equations for guided space vehicles, allowing for sloshing liquid propellant viscosity effects 18 p3332 A70-36160
- Intermediate orbit calculation, allowing for spacecraft large gravitational perturbation during motion near planetary sphere of influence 18 p3312 A70-36166
- Satellite translational motion in circular problem of three bodies, discussing existence of equations in integral 18 p3324 A70-37150
- Space motion simulators for Azur satellite, considering satellite attitude related to sun 19 p3400 A70-38296
- Apollo service module retrograde motion due to propellants reorientation after reentry jetison predicted by digital simulation 19 p3534 A70-38862
- [AIAA PAPER 70-1047] 19 p3534 A70-38862
- Motion and stability of rotating connected two body space station satellite system, developing Lagrangian equations of motion and optimizing damping system parameters 20 p3716 A70-39678
- [AIAA PAPER 69-919] 20 p3716 A70-39678
- Elastic deformable satellite motion stability in central Newtonian force field 21 p3927 A70-40827
- Spacecraft sheath structure, potential and velocity effects on ion current measurements by traps and mass spectrometers 21 p3816 A70-41087
- Lifting reentry vehicle two dimensional motion optimization with inequality constraints explicitly containing control by perturbation method 21 p3845 A70-41265
- Space vehicle self oscillatory pulsed relay attitude control system with jet nozzles, determining angular motion 22 p4001 A70-42838
- Artificial satellite motion theory, discussing gravitational and nongravitational force effects 24 p4406 A70-45527
- Solar corpuscular flux and visible solar spot area correlation with geomagnetic planetary index for 27-day intervals, considering relationship to earth satellites motion 24 p4408 A70-45547

- Solar power system of ELDO F-9 satellite boosted into polar orbit by EUROPA 1, discussing cell placement 03 p0573 A70-13847
- German developments in electric propulsion and energy supply systems for commercial satellites in geostationary orbits [DGLR-69-20] 04 p0735 A70-15169
- Computer program for electrical and transient thermal analysis of satellite electric power subsystem consisting of solar array, battery and power controls 04 p0628 A70-15332
- Gas core nuclear reactors feasibility based on gas core hydrodynamics, heat transfer and neutronics development, noting spacecraft weight and trip time reduction potential 04 p0717 A70-15639
- Liquid metal pump design and performance in SNAP 8 Mercury Rankine and Advanced Rankine fluid power systems, including containment materials and corrosion effects 04 p0718 A70-15641

Sealed Ni-Cd aerospace battery design, discussing recombination of gases produced during prolonged overcharging at low temperature, separator material, plate balance, etc

05 p0798 A70-16096

Solar energy as spacecraft power source examined in operating life comparison with chemical, electrochemical and nuclear energy, discussing silicon solar cells

05 p0799 A70-17023

Lewis Research Center applications of optics to research in flight propulsion and space power generation, discussing gas density visualization, radiative heat transfer, etc

09 p1657 A70-23522

Oriented flexible rolled-up solar array (FRUSA) for spacecraft electric power generation, describing orientation and deployment mechanisms, solar panel, system operation, etc

[AIAA PAPER 70-738] 11 p2119 A70-25434

Nonislanding rotary electrical connector for conducting current and signals from satellite solar panel

[AIAA PAPER 70-458] 11 p2016 A70-25453

Rankine 10 MWe nuclear electric space power system design, discussing reactor power, fuel, coolant, structural material, control system, shield, etc

11 p2082 A70-26123

Electrostatic rocket exhaust condensation on spacecraft solar electric panels cover glasses, noting deleterious effects

[AIAA PAPER 69-271] 11 p2103 A70-26131

Weights, sizes and costs of nuclear and nonnuclear spacecraft power systems with reference to mission duration

11 p2082 A70-26260

Hybrid Cockcroft Walton multinode photomultiplier supply for space applications, using miniature components and thick film technology

12 p2233 A70-27406

Optimal control of nuclear propulsion and energetic plants of space vehicle, considering thermionic generator

13 p2450 A70-28436

Brayton, Hg, organic-Rankine and potassium-Rankine dynamic space power systems for use with nuclear energy sources

13 p2450 A70-29492

Nuclear power systems for manned orbiting space stations, noting Brayton aggregate and NASA objectives

13 p2450 A70-29493

Azur satellite p- and n-type Si solar cell system providing both power supply and storage battery charging

13 p2506 A70-29553

Solar cell power supplies for weather balloon and satellite systems

14 p2535 A70-31146

Spacecraft electric power supplied by isotope nuclear sources, discussing heat sources, energy converters and heat rejection systems

14 p2616 A70-31147

OGO spacecraft structures, thermal control systems, attitude control, weight and power supplies

15 p2810 A70-31782

Ion thrusters and sources in space propulsion, discussing power supply level, efficiency and service lifetime

[ONERA-TP-739] 15 p2787 A70-31808

Ripple filters for DC power supplies using reliable small capacitance capacitors suitable for spacecraft applications

15 p2714 A70-32806

Large capacity sealed nickel cadmium battery for spacecraft, describing mechanical and electrical characteristics

16 p2844 A70-33473

Space collector ring systems surface physics, discussing dry thin film lubricants, smoothness, service life, etc

16 p2917 A70-33485

Solar electric spacecraft for interplanetary missions including asteroid belt survey, Jupiter flyby and out-of-elliptic survey

[AIAA PAPER 70-645] 16 p2981 A70-33531

Power conditioning and control system prototype for Mercury spacecraft ion thruster, describing supply subsystems, circuit design, component selection and reliability

[AIAA PAPER 70-649] 16 p2970 A70-33615

MHD electric power generators characterized by high power level and duration for future application in space

16 p2844 A70-33711

Rotary relay for solar array space power transfer using clutch of low moment of inertia capable of recycling once each orbit

17 p3101 A70-34765

Deep space spacecraft radioisotope thermoelectric generators, discussing testing and evaluating for future missions

18 p3215 A70-36229

Electrical power supply systems for meteorological sounding rockets under vibration, acceleration and temperature variation conditions during flight

18 p3215 A70-36251

Radiant gas heater for Brayton cycle space power system

[ASME PAPER 70-GT-36] 18 p3303 A70-36834

SI and thin film solar cells for satellite power supplies, considering manufacture and space environment

19 p3358 A70-38478

Aircraft auxiliary systems and spacecraft power supplies, considering fly-by-wire control actuators, pyrotechnics and stowable solar array

20 p3564 A70-39669

SERT 2 solar array power system in sun synchronous orbit, considering power conditioning and deployment technique

[AIAA PAPER 70-1159] 20 p3567 A70-40202

Nuclear space power three stage potassium turbine erosion testing in stainless steel loop with various contamination levels

21 p3756 A70-41005

Regenerative hydrogen-oxygen secondary fuel cells as rechargeable battery for communication satellites

21 p3756 A70-41007

Solar arrays for Venus-Mercury flyby, evaluating temperature and power performance

21 p3756 A70-41010

Solar cell/battery systems for spacecraft, discussing power system evaluator, NiCd thermal control, lightweight rigid panels design, etc

21 p3757 A70-41011

Ni-Co aerospace batteries thermal and mechanical design for orbiting space vehicles

21 p3757 A70-41012

Power conditioning systems for INTELSAT satellites, describing methods for battery charging, charge control, voltage regulation and power management

21 p3757 A70-41207

Regulated spacecraft solar array mathematical model for high voltage power supply regulator analysis

21 p3757 A70-41208

Solid state switching effect on aerospace electric power conditioning equipment

21 p3758 A70-41210

Integrated circuit requirements for space power conditioning equipment for ion thrusters

21 p3797 A70-41211

Modular Dc to Dc switching mode converter for space power system

21 p3758 A70-41217

Automatic and command multiple sequencer for spacecraft solar cell battery charger, providing switching logic by integrated circuits design

21 p3758 A70-41218

Buck-boost main bus voltage regulator for solar array battery space power system

21 p3758 A70-41219

Solar cell array peak power tracker and battery charger for Airlock Vehicle coupling Apollo spacecraft and Saturn IVB stage to form manned orbiting workshop

21 p3759 A70-41221

Electrical design of ferrite configuration high power rotary transformer for satellite slip ring replacement, minimizing transistor turn-off losses

21 p3759 A70-41222

Spacecraft data transmission efficiency improvement by budgeting onboard electric energy consumption among data types

21 p3790 A70-41364

High voltage solar arrays, considering plasma power losses dielectric stresses design, fabrication and testing

[AIAA PAPER 70-1137] 21 p3759 A70-41780

High voltage solar array with integral power conditioning, discussing weight factors, panel design and layout, mechanization, performance prediction, etc

[AIAA PAPER 70-1158] 21 p3759 A70-41787

Thermoelectric outer planet spacecraft (TOPS)/solar-independent power subsystem

21 p3760 A70-41802

Orbital mission solar energy power conversion system, discussing heat transfer processes for storage feasibility

21 p3951 A70-41852

Transistorized DC to AC converter providing sinusoidal output to power automatic spacecraft control devices via pulse width modulation

22 p3994 A70-42309

Finned tube-sheet spacecraft radiator transient response for perturbations caused by power supply and heat sink temperature changes

22 p4123 A70-42519

Space electric field considered for solar wind plasma drift origin and possible energy source for spacecraft propulsion, estimating intensity on lunar surface

22 p4100 A70-42789

Brayton, Hg, organic-Rankine and potassium-Rankine dynamic space power systems for use with nuclear energy sources

22 p4071 A70-43189

ZrH reactor program and multikilowatt space oriented thermoelectric power conversion systems

22 p4071 A70-43190

Space nuclear power system design and operation related to safety, discussing SNAP flights

22 p4071 A70-43192

Nuclear power systems for manned orbiting space stations, noting Brayton aggregate and NASA objectives

22 p4071 A70-43193

Earth orbital space station electrical power systems, discussing power sources, effect on structural configuration, environmental control and launch and resupply operations

[MDAC-WD-1461] 23 p4143 A70-44605

Spacecraft radioisotope thermoelectric generator interference in onboard instrument operation, using analytical models to determine necessary shielding

24 p4375 A70-45175

SPACECRAFT PRELAUNCH TESTS

U SPACE VEHICLE CHECKOUT PROGRAM

SPACECRAFT PROPULSION

NT ELECTROMAGNETIC PROPULSION

NT ELECTROSTATIC PROPULSION

NT ION PROPULSION

NT PHOTONIC PROPULSION

NT PLASMA PROPULSION

NT SOLAR PROPULSION

Minimum propellant rendezvous maneuver of space vehicles in neighboring circular orbits

01 p0193 A70-10555

Solar and nuclear electric propelled spacecraft applications to planetary and interplanetary missions, considering asteroid survey, out-of-elliptic, Mercury orbiter, comet rendezvous, etc

[AIAA PAPER 69-1108] 01 p0181 A70-10619

Simulator for testing colloid microthruster, discussing spacecraft interfaces and time of flight thrust data

[AIAA PAPER 69-314] 01 p0058 A70-10834

Performance boundaries of space propulsion systems containing nuclear electric stages

[AIAA PAPER 69-249] 01 p0196 A70-10839

Cost reductions achieved by space payload life extension through manned maintenance and increased transportation economies via refueling and improved space propulsion

01 p0196 A70-10844

Chemical engineering application to solid propellant rocket motors optimization for specific operations, discussing fuel properties, formulation and additives, mixing and casting

[AICHE PAPER 28A] 01 p0166 A70-10971

Propulsion efficiency in air and in space measured according to relativity concepts, including electric field inertia explanation

02 p0355 A70-12364

Solar electric propulsion (SEP) for automated planetary missions, discussing system characteristics, capabilities and costs

[AIAA PAPER 69-1103] 02 p0382 A70-12531

Optimum power and operation mode of space vehicle engine with control error allowance as function of mass and velocity

04 p0760 A70-14433

Solar or nuclear energy powered electric propulsion systems for transferring satellite from low to geostationary orbit, discussing feasibility and costs of various designs

04 p0735 A70-15174

Apollo spacecraft propulsion systems design and operational requirements, emphasizing use of redundant components and system backups to achieve reliability

[SAE PAPER 690704] 05 p0923 A70-15858

Launch vehicles design, propulsion, maneuverability and navigation

05 p0923 A70-16565

SERT 2 thruster hollow cathode durability tested in bell jar

[AIAA PAPER 69-304] 07 p1364 A70-19703

Book on spaceflight propulsion covering jet thrust, energy release, chemical, nuclear and electric propulsion, transportable and environmental systems

09 p1742 A70-22202

Lewis Research Center applications of optics to research in flight propulsion and space power generation, discussing gas density visualization, radiative heat transfer, etc

09 p1657 A70-23522

Spacecraft optimal flight from earth orbit to outer planet orbit with ideally controlled engine using differential motion equations

10 p1941 A70-24512

Nuclear propulsion systems types, discussing relative capabilities and future roles in aerospace applications

11 p2082 A70-26055

Space propulsion systems for public transportation to and from orbit and throughout near solar system, discussing commercial requirements

11 p2102 A70-26060

Spacecraft propulsion systems selection for particular exploration missions including planets, comets and interstellar space

11 p2112 A70-26066

Background pressure and magnetic field shape effect on MPD thruster performance, testing radiation cooled thrusters

[AIAA PAPER 69-243] 11 p2102 A70-26122

Optimum power and operation mode of space vehicle engine with control error allowance as function of mass and velocity

13 p2503 A70-28458

Pulsed plasma microthruster propulsion system for synchronous orbit LES 6 satellite [AIAA PAPER 69-298]

13 p2473 A70-28504

Hollow cathode mercury electron bombardment thruster design, emphasizing low specific impulse operation and discharge chamber improvements

13 p2473 A70-28505

Ion thrusters and sources in space propulsion, discussing power supply level, efficiency and service lifetime [ONERA-TP-739]

15 p2787 A70-31808

Space propulsion evolution in 1970s - Conference, Rome, March 1970

15 p2788 A70-32251

Space propulsion research with emphasis on tripropellant mixtures, discussing increased combustion pressure, nozzle design, reusable orbital transporter, etc

15 p2789 A70-32252

Spacecraft propulsion development guidelines concerning rocket engines with storable propellants, rotating solid propulsion systems, cryogenic propellants, etc

15 p2790 A70-32256

Space vehicles chemical propulsion limitations and potential applications

15 p2786 A70-32268

Reusable ferry spacecraft program, discussing space shuttles, cost reduction and nuclear propulsion for deep space missions

15 p2791 A70-32300

Rocket engine prototype for Mariner Mars 71 spacecraft, describing performance test results and response, thermal and throttling characteristics [AIAA PAPER 70-716]

16 p2966 A70-33545

Spacecraft propellant expulsion systems, comparing capillary with conventional techniques [AIAA PAPER 70-685]

16 p2962 A70-33584

Manned planetary flight systems engineering, discussing feasibility, objectives, propulsion, transplanet injection via geospace shuttle station, energy requirements for various synodic modes [AAS PAPER 70-037]

17 p3155 A70-34778

Propulsion requirements for reusable space shuttle, discussing engine development program [AAS PAPER 70-044]

17 p3147 A70-34784

Quantum electronic space vehicle, discussing time reversing motor or inverse /anti-/ atomic engine

17 p3148 A70-35213

Electromagnetic, mechanical and chemical methods for automatic checkout of nonelectronic aerospace propulsion systems

17 p3095 A70-35525

Unmanned nuclear electric propelled spacecraft using reactor with liquid metal MHD power conversion system

20 p3566 A70-40016

One millipound cesium ion thruster for synchronous ATS-F satellite, describing power conditioning and control logic subsystems [AIAA PAPER 70-1149]

20 p3690 A70-40205

Electric propulsion systems integration into SERT 2 spacecraft, discussing launch imposed environment, thrust vector control, thruster breakdown, power conditioning, etc [AIAA PAPER 70-1123]

20 p3691 A70-40222

Primary solar electric propulsion for automated space transportation propulsion program, considering performance and technology readiness [AIAA PAPER 70-1115]

20 p3691 A70-40228

Micropond extended range thrust stand /MERTS/ for testing electric thrusters for spacecraft auxiliary propulsion, providing three thrust measurement ranges and data telemetry system

20 p3607 A70-40232

Kaufman ion thruster providing electric propulsion for satellite spiraling from parking to synchronous orbit [AIAA PAPER 70-1101]

20 p3692 A70-40237

Third stage engine performance from mass properties data for space vehicles with side-by-side tanks [SAWE PAPER 846]

20 p3717 A70-40378

Solar electric propulsion systems technology development at JPL, discussing performance data and relationship to spacecraft requirements [AIAA PAPER 70-1153]

20 p3695 A70-40520

Concentric tube resistojet life tested on hydrogen and ammonia propellants for use with biowaste propellants [AIAA PAPER 70-1133]

20 p3568 A70-40521

Drag-free satellite design and propulsion requirements, noting orbit perturbation mechanisms [AIAA PAPER 70-1145]

20 p3717 A70-40523

Thermionic reactor electric propulsion for unmanned outer planets exploration, discussing spacecraft design, launch vehicle, weight factors, etc [AIAA PAPER 70-1122]

20 p3717 A70-40524

Optimal control of composite spacecraft propulsion system incorporating high thrust-weight ratio chemical engine and low thrust ion engine

21 p3865 A70-40831

Vapor biowaste electric spacecraft propulsion system, discussing recovery cycles and subsystem tradeoffs, specific impulse, chamber heating, power input and reaction products

21 p3866 A70-40869

Secondary propulsion subsystem earth synchronous orbital mission requirements, discussing thrust vector alignment and control, colloidal propellants and pulsing [ASME PAPER 70-AV/SPT-31]

21 p3866 A70-40870

Resistojet thrusters for spacecraft propulsion and control, discussing systems configurations, performance, weight, etc

21 p3866 A70-40986

Space compatible flight prototype ion engine power conditioning system design for Hg thruster using oxide cathode

21 p3867 A70-41006

Power conditioning requirements and specifications for spacecraft electric propulsion ion thruster

21 p3758 A70-41209

Nuclear fusion reactor spacecraft propulsion system using ion rocket with charged deuterium nuclei fuel, emphasizing nuclear plasma confinement problem

21 p3867 A70-41498

Pulsed plasma and low pressure detonator thrusters for long life secondary spacecraft propulsion, considering satellite stationkeeping and attitude control [AIAA PAPER 70-1147]

21 p3868 A70-41782

Mars and Venus orbiter spacecraft electric propulsion system, discussing Hg electron bombardment ion engine [AIAA PAPER 70-1154]

21 p3868 A70-41786

Rocket motion and space propulsion systems, discussing exhaust velocity effect on payload

21 p3869 A70-42039

Spacecraft electric propulsion system performance, discussing exhaust velocity optimization

21 p3869 A70-42043

Radioisotope thrusters for space propulsion, considering thermal heating methods and direct recoil

22 p4070 A70-43185

Nuclear electric space propulsion, emphasizing systems uncertainties and cost aspects

22 p4070 A70-43187

Thermionic reactors for spacecraft auxiliary power and electric propulsion, discussing in-core conversion system and diodes

22 p4071 A70-43191

Space vehicle for interstellar flight, discussing propulsion concepts, mission implications and international cooperation

23 p4254 A70-45011

Astronautics - IAF Conference, New York, October 1968, Volume 3, Propulsion reentry physics

23 p4234 A70-45017

Hydrogen oxygen engine designs for space vehicle auxiliary propulsion systems, considering long life thrust chamber performance with compatible heat transfer characteristics [SAE PAPER 700803]

24 p4395 A70-45908

Thermonuclear spacecraft propulsion, comparing X ray pumped gas laser and ion drive systems

24 p4377 A70-46211

SPACECRAFT RADIATORS

Radiator selection for manned spacecraft, considering thermal coating degradation, structural design, micrometeorite protection, plume impingement, reliability and fabrication

01 p0215 A70-10631

Optimal steady state thermal design for fin-tube single and double surface space radiators, including meteoroid protection and pumping power weight penalties

01 p0215 A70-10829

Circumferential wall temperature gradients in spacecraft radiator tubes as function of tube wall fins

09 p1789 A70-23261

Transient response of fin-tube space radiators sudden steady state operation halting and system cooling

09 p1790 A70-23564

Increased heat transfer for thermal coupling by interleaving fins in space applications

13 p2519 A70-28522

Passive radiative coolers role in utilizing IR detector systems for low temperature spacecraft applications, describing staged radiator design, optimization and tests [AIAA PAPER 70-854]

16 p2983 A70-33921

Thin plates radiant cooling with mutual irradiation in spacecraft radiators

22 p4122 A70-42518

Finned tube-sheet spacecraft radiator transient response for perturbations caused by power supply and heat sink temperature changes

22 p4123 A70-42519

Space vehicles with shielding for protection against meteor impacts, discussing tubular radiator design for heat removal

23 p4284 A70-45008

SPACECRAFT RECOVERY

Space rescue techniques and equipment in NASA recovery programs, considering low earth orbit and water landing

01 p0035 A70-10717

Space rescue requirements for earth-returning astronauts recovery under emergency conditions, discussing recovery zones determination by space flight mission control

04 p0761 A70-14929

Command and control functions of DOD Manager for Manned Space Flight Support Operations in spacecraft recovery

05 p0827 A70-16180

SOFAR /sound fixing and ranging/ systems for location and recovery of reentry vehicles and missile cases and rescue of disabled transoceanic aircraft

13 p2449 A70-29169

Space rescue probabilities, considering spacecraft emergency returns from orbit to earth surface and time sequences

14 p2654 A70-30780

Spacecraft or escape capsule rescue, discussing design, recovery planning, forces and sites

17 p3180 A70-35301

Reentry vehicle recovery deployment initiation, comparing performances of conical wake drogue and body attached spoilers hypersonic deceleration devices [AIAA PAPER 70-1207]

21 p3752 A70-41811

Lunik 16 lunar probe recovery technique, using steep angle and high deceleration reentry trajectory for unmanned capsule

23 p4257 A70-44096

Space rescue operations in orbit during heavy traffic of spacecraft with large passenger loadings, noting role of space shuttles and tugs

23 p4260 A70-44619

Space vehicle personnel escape/rescue/ survivability capabilities, considering on board, prepositioned aid and earth launched concepts

23 p4260 A70-44620

Rescue waiting time relation to number of communication and return sites for emergency astronaut return, considering day vs day/night recovery

23 p4245 A70-44639

SPACECRAFT REENTRY

Spacecraft reentry trajectory optimization, considering minimum coolant weight requirement in internal cooling system

02 p0381 A70-12416

Spacecraft thermal control during reentry, considering heat absorption, cooling by gas injection, radiant heat removal and shielding

04 p0780 A70-14407

Optimal space vehicle reentry control ensuring minimum scattering of landing points based on accelerometer and free pitch-angle gyroscope data

04 p0760 A70-14431

Electron gun onboard reentering spacecraft to measure densities and temperatures in flowing gases

06 p1066 A70-18286

Optimum impulsive velocity calculation for three dimensional deorbit from elliptical orbits to achieve specified reentry angle

06 p1152 A70-18496

Control algorithm for vehicle descent after reentry based on descent range prediction by integrating motion equations allowing for motion three dimensionality

07 p1393 A70-19482

Reentry into earth atmosphere of heavy ballistic missiles with variable and constant geometry compared with light missile

08 p1433 A70-21766

Mathematical model for determining optimal control of spacecraft reentry into atmosphere

10 p1940 A70-24318

Spacecraft optimal impulsive braking by onboard engine to ensure maximum angle of atmospheric reentry

12 p2310 A70-28253

Spacecraft reentry trajectory reconstruction using accelerometer and onboard navigation data from Apollo flights

13 p2485 A70-28378

Stochastic optimal trajectory control for spacecraft reentry at supercircular velocity, deriving computer algorithm

13 p2499 A70-28382

Optimal space vehicle reentry control ensuring minimum scattering points based on accelerometer and free pitch-angle gyroscope data

13 p2503 A70-28456

Radiation from electric dipole oriented normal to magnetostatic field in plasma column improving antenna transmission characteristic during reentry

13 p2467 A70-29913

Heating and g forces on rockets and space vehicles in descent trajectories as function of reentry velocity, achieving control by attack angle variation

15 p2812 A70-32361

Apollo thermal protection system noting low density ablation, flight and ground tests [AIAA PAPER 68-1142]

15 p2813 A70-32514

Control algorithm for vehicle descent after reentry based on descent range prediction by integrating motion equations allowing for motion three dimensionality

15 p2813 A70-32727

Optimal open loop controller and suboptimal feedback law to minimize terminal error of entry vehicle

16 p2947 A70-33439

Automated orbiting biosatellite program with reentry system, studying long term weightlessness and radiation effects

17 p3178 A70-35258

Space vehicle reentry hypersonic boundary layer characteristics, considering air components chemical reactions due to excessive heat

18 p3346 A70-36384

Planetary probes, orbiting space stations and manned spacecraft in interplanetary flights, discussing Mariner, Gemini and Apollo reentry and Venus landing

22 p4109 A70-42313

SPACECRAFT RELIABILITY

Apollo spacecraft hardware, command, service and lunar modules, discussing design factors and tests contributing to spacecraft reliability

[ALAA PAPER 69-1095] 01 p0194 A70-10618

Structural qualification testing of experimental tactical communication satellite (TAC COM SAT)

02 p0274 A70-13936

Space station damage containment and control, emphasizing safety problems and guidelines

04 p0762 A70-14933

German Space Research Association reliability and testing function, using failure analysis for space projects components and structures

[DGLR-69-30] 04 p0698 A70-15137

Inertial navigation system reliability indices and improvement, discussing mission success, mean time between failure and automatic monitoring

04 p0716 A70-15166

NASA aerospace system safety program implementation and supporting organization with emphasis on background, concepts, constraints, methods and results

[SAE PAPER 690710] 05 p0792 A70-15856

Apollo spacecraft propulsion systems design and operational requirements, emphasizing use of redundant components and system backups to achieve reliability

[SAE PAPER 690704] 05 p0923 A70-15858

Apollo reliability and quality requirements, reviewing changes due to cost reductions in space program

06 p1065 A70-17988

Thermal testing of planetary lander vehicle in vacuum chamber, modeling electronics modules and experiments using resistance heaters

[ALAA PAPER 70-222] 06 p1157 A70-18128

Aerospace vehicles testing cost and technical analysis, discussing component failure, motivation effects, test design optimization, flight simulation, etc

[ALAA PAPER 70-239] 07 p1396 A70-20379

Weapon Systems Level testing methods and machines application to missiles, manned space flight vehicles and Safeguard System

[ALAA PAPER 70-380] 10 p1862 A70-24923

Systems engineering approach to test planning with emphasis on risk reduction for spacecraft

[ALAA PAPER 70-367] 10 p1952 A70-24933

Launch load simulation on scaled vibration model concerning Saturn 5 structural integrity and flight failure

10 p1953 A70-25072

Thermoelectric outer planet spacecraft (TOPS) project incorporating adaptable data handling system and self testing and repairing computer with triple redundancy subsystems

11 p1996 A70-25368

Interplanetary space systems, analyzing failure factors to assure reliability

11 p2112 A70-26051

Quality assurance R and D for product design and operational integrity in manned space flight, noting space developments application to aircraft safety

15 p2676 A70-32231

Redundancy for spacecraft elements, describing various factors for priority establishment

15 p2712 A70-32643

Satellite reliability, discussing quality control, contractual matters, mathematical models, project management, failure modes, etc

15 p2813 A70-32826

Apollo lunar module rendezvous radar redundant gyro system for reliability enhancement, discussing principles and logic

16 p2983 A70-34066

Surveyor thermal switch for temperature control to assure spacecraft components performance during temperature extremes on lunar surface

16 p2845 A70-34127

Cost effective reliability apportionment in spacecraft subsystems, allocating failure-risk goals by mathematical model

17 p3101 A70-35160

Spacecraft flight systems voltage breakdown due to DC gas discharge, discussing occurrence and preventive techniques

17 p3053 A70-35164

Real time data processing and display for spacecraft thermal vacuum testing, using hybrid computer

17 p3059 A70-35176

Space corpuscular radiation simulation to obtain data for increased spacecraft life

19 p3511 A70-38284

Cost effective spacecraft testing in terms of statistical reliability, program effectiveness and equipment costs

19 p3554 A70-38293

Mariner 1969 test and operations program evaluated by ground tests and flight results, giving flight acceptable spacecraft recommendations

19 p3533 A70-38819

Mariner 7 preencounter anomaly in radio tracking data and trajectory investigated by computerized simulation

[ALAA PAPER 70-1065] 19 p3534 A70-38878

SERT 2 for testing ion thruster reliability and operational characteristics, discussing design and mission objectives

[ALAA PAPER 70-124] 20 p3716 A70-40221

Aerospace vehicles testing cost and technical analysis, discussing component failure, motivation effects, test design optimization, flight simulation, etc

[ALAA PAPER 70-239] 21 p3931 A70-41876

Lunar launch vehicles quality control and reliability, describing management procedures for test facilities, preproduction and purchased materials quality

22 p4126 A70-42384

Operational safety of nuclear rockets in orbit-to-orbit transportation in regard to radiation doses from plume and reactor, including malfunction condition

22 p4070 A70-43183

Long life spacecraft design and reliability based on marine practices and advanced system technology project, considering grand tour outer planets mission

[ALAA PAPER 70-1247] 24 p4412 A70-45964

SPACECRAFT RENDEZVOUS

U SPACE RENDEZVOUS

SPACECRAFT SENSORS

U SPACECRAFT INSTRUMENTS

SPACECRAFT SHIELDING

Radiation dosimetry and shielding onboard Cosmos 110 artificial satellite, noting earth belt proton radiation

01 p0198 A70-15158

Penetration criterion for double walled structures subject to hypervelocity meteoroid impact providing choice of protective material properties

[ALAA PAPER 68-1058] 03 p0584 A70-12921

Shield mass optimization of low thrust nuclear powered space vehicle for occupant shielding against reactor radiation

03 p0523 A70-13575

Spacecraft thermal control during reentry, considering heat absorption, cooling by gas injection, radiant heat removal and shielding

04 p0780 A70-14407

Meteoroid hazard to spacecraft, discussing penetration and protection information reliability obtained from terrestrial and satellite observations

05 p0914 A70-16631

Computer optimization of spacecraft optical coatings for temperature control, using finite element analysis and matrix inversion

[ALAA PAPER 69-979] 06 p1172 A70-17180

Satellite radiation dose rate experiment with simultaneous trapped particle and absorbed dose rate measurements, discussing proton spectra, material distribution, shielding effects, etc

06 p1061 A70-17263

Dosimetry data and personal radiation sensors from Apollo and Gemini flights, noting spacecraft geometry shielding effects

06 p1134 A70-17268

Gemini spacecraft shielding configuration and radiation detectors, describing cabin radiation distributions

06 p0990 A70-17269

Lightweight double walled meteoroid shield for Mariner Mars 1971, considering Teflon impregnated glass fabric outer sheet and multilayer thermal insulation

[ALAA PAPER 69-377] 07 p1394 A70-19712

Refurbishable ablative thermal protection for reusable lifting reentry vehicles

[ALAA PAPER 70-277] 07 p1397 A70-20386

Thermal control coatings as solar reflectors for spacecraft heat dissipation

08 p1527 A70-21357

Nondestructive tests for diffusion-formed refractory alloy coatings used as oxidation protection for hypervelocity spacecraft and reusable systems

09 p1692 A70-22679

Silicon oxide films coated satellite aluminum surfaces solar absorptivity and thermal emissivity, noting suitability as temperature control coatings

09 p1613 A70-23514

Insulation foils and surface coatings thermal properties effect on radiation properties for spacecraft thermal control systems

10 p1951 A70-24863

Radiation hazard to space vehicles by solar flare protons, calculating risk dose by computerized Monte Carlo simulation, applying importance sampling

10 p1934 A70-25190

Two plate meteoroid shields effectiveness determined by analyzing debris cloud ejected behind front plate after hypervelocity impact

[ALAA PAPER 69-380] 11 p2138 A70-26132

Spacecraft temperature prediction and heat conduction problems with nonlinear radiation boundary conditions by perturbation theory, applying to heat shield analysis

11 p2150 A70-26355

Expandable rigidizable solar shields operational, structural and thermal performance tests conducted with spherical models for cryogenically fueled space vehicles

12 p2312 A70-27131

Spacecraft meteoroid protective shield thickness sensitivity relationship to luminous efficiency

15 p2813 A70-32518

Damage mechanisms of hypervelocity projectile impact on thin targets and spacecraft shields

15 p2823 A70-32786

Thermal testing of inflatable solar shields for cryogenic space vehicles, discussing shield misalignment effects on propellant tank temperatures

[ALAA PAPER 70-856] 16 p2982 A70-33901

ZnO coating pigment for spacecraft thermal control, examining UV irradiation effects on electrical properties

16 p2961 A70-34056

Spacecraft shape and thermal coating pattern optimization by computer program

17 p3178 A70-35251

Solar flare radiation protection requirements, considering bulk and plasma radiation shielding

17 p3040 A70-35647

Earth intrinsic radiation flux incident angular coefficient, examining effect on partially screened flat spacecraft elements

21 p3942 A70-40847

Spacecraft thermal control coatings scale models, discussing temperature errors due to energy transport along surfaces

21 p3951 A70-41874

Spacecraft magnetic radiation shield optimization based on thickness criterion and system mass consideration

22 p3979 A70-43390

Deployable meteoroid shield for Saturn 1 workshop, describing design and hardware kinematics

23 p4257 A70-44386

Temperature measurement on thin steel shield subjected to hydrogen peroxide motor exhaust heating at cryogenic temperatures in space

23 p4280 A70-44389

Space vehicles with shielding for protection against meteor impacts, discussing tubular radiator design for heat removal

23 p4284 A70-45008

Environmental heat shielding for various sized Jupiter atmospheric entry probes

[ALAA PAPER 70-1324] 24 p4429 A70-45941

SPACECRAFT STABILITY

Time history of spin and forward motion accuracy of rocket launched from smoothbore, using analytical model and motion coupling through dynamic friction coefficient

03 p0582 A70-14311

Deployable STEM /storable tubular extendible member/ booms for aerospace gravity gradient stabilization, noting interlocked BI-STEM

04 p0761 A70-14725

Optimal iterative weighted least squares estimation of rotation-coupled flexural oscillations of boom stabilized satellites in earth orbits

04 p0763 A70-15413

Soviet monograph on optimal space flight trajectory control, covering vehicle CG trajectory and synthesis of automatic stabilization system using variational calculus

04 p0764 A70-15493

Liquid filled dampers for nutation damping of spacecraft with momentum wheel for attitude stabilization

06 p1154 A70-17163

Installed thrust vector for scarfed attitude control nozzles flush mounted with spacecraft cylindrical surface, predicting pressure distributions for internal thrust

06 p1154 A70-17167

Capture and gravity gradient stabilization of LIDOS satellite in eccentric orbit

[ALAA PAPER 69-921] 06 p1154 A70-17175

Spacecraft level vibrations and gravity effects on blue-green algae Plectonema Boryanum proposed as gas exchange medium

06 p0999 A70-17292

- Satellite launch vehicle attitude control stability study including fuel sloshing and body bending effects 06 p1155 A70-17320
- Suboptimal stabilization of axially symmetric satellite angular velocity, using ionic propulsion system as control torque 06 p1155 A70-17554
- Stochastic Liapunov stability of satellite motion influenced by aerodynamic and gravity gradient torques, considering atmospheric density uncertainty [AIAA PAPER 70-37] 06 p1159 A70-18185
- DODGE satellite launched into near-synchronous orbit to demonstrate gravity-gradient stabilization at high altitude and to experiment with damping techniques [AIAA PAPER 70-69] 06 p1159 A70-18218
- Flywheel stabilization for communication satellites, considering stabilization by reaction wheels, gyros, gas jets, etc [DGLR-69-058] 07 p1392 A70-18817
- Discures project satellites design, considering use of rotation stabilization 07 p1392 A70-18989
- Lunar mascon effects on Apollo type spacecraft orbits calculated for minimizing orbital instabilities 07 p1387 A70-19715
- Ammonia micropropulsion for geostationary satellites stabilization, discussing principle and working mode of thrusters 09 p1743 A70-22660
- Tethered orbiting interferometer configurations for future Radio Astronomy Explorer satellites, discussing gravitational stabilization and delta launching into orbit as single payload [AAS PAPER 69-255] 09 p1766 A70-22930
- Nonspinning satellite orbit eccentricity effect on attitude stability 09 p1766 A70-23229
- Small plane perturbations stability losses in uniform rectilinear motion of nonrigid deformable rocket, using slender bodies pressure theory 10 p1950 A70-24528
- Orbital stability of geostationary vehicle at arbitrary latitude, considering nonlinear equations and deducing stability conditions by Liapunov method 10 p1950 A70-24783
- Delayed feedback for LF periodic conditions /auto-oscillations/ in relay systems of cosmic flying apparatus stabilization 11 p2119 A70-25342
- Motion stability of rapidly spinning satellite, discussing elastic booms effect 11 p2128 A70-26784
- Equations of motion for dynamic stability of flexible freely spinning Alouette-type satellite with crossed dipole configuration 12 p2312 A70-27194
- Dual spin satellite stability with four mass nutation damper 12 p2314 A70-27842
- Satellite stationary motions stabilization using rotors with axes fixed inside spacecraft 13 p2499 A70-28389
- Dynamics of gravity stabilized satellite having maximum damping rate 13 p2499 A70-28391
- Manual control systems for spacecraft stabilization involved in rendezvous, midcourse correction, landing, etc 13 p2357 A70-28394
- Satellite stabilization one-axis control system using earth magnetic torquer 13 p2500 A70-28405
- Admissible controls synthesis for closed loop system /satellite/ stability 13 p2500 A70-28410
- Circular orbit gravitationally stabilized satellite oscillation damping by changes of moments of inertia 13 p2501 A70-28420
- Attitude-translation motion coupling effect on stability of gravity-stabilized drag-free satellites 13 p2501 A70-28424
- DODGE satellite gravity gradient stabilization at synchronous altitude by flywheel and magnetic sample-and-hold damping, noting boom bending 13 p2501 A70-28425
- Symphonic communication satellite orbit and attitude stabilization systems components, operation and accuracy requirements 13 p2502 A70-28432
- Petrel payloads taking into consideration rocket stability after launch and compartment design 13 p2503 A70-28683
- Stability and wind response determining spacecraft structure forces and bending moments [AGARDOGRAPH-115] 13 p2504 A70-28754
- Spacecraft parameters role in response to atmospheric disturbances, considering model design and control systems effects [AGARDOGRAPH-115] 13 p2504 A70-28757
- Numerical solution of satellite rotational damping by onboard motors using Euler equations, local variations and finite control time 13 p2505 A70-28963
- Gravity gradient stabilization systems for earth-pointing satellites, noting long term reliability and accuracy 13 p2507 A70-29828
- Nonspin stabilized satellite attitude reconstruction using least squares estimate 14 p2654 A70-30775
- Equilibrium configurations, considering aerodynamic forces for axisymmetric satellites attitude stability using infinitesimal analysis and Liapunov method 15 p2809 A70-31779
- Gravity stabilized gyrostabilized satellites internal angular momentum effect on nonlinear resonant attitude motions 15 p2810 A70-31785
- Scanning celestial attitude determination system /SCADS/, providing triaxial information for earth stabilized satellites 16 p2946 A70-33159
- Manned and unmanned orbital space facilities pointing and stability requirements, noting application to stellar and solar astronomy, earth observations, etc 16 p2979 A70-34068
- Bearing assembly energy dissipation effects on dual spin spacecraft attitude stability, explaining satellite motion anomalies 17 p3100 A70-34756
- Dual spin satellites considered as deformable flexible gyrostats, obtaining stability criteria 17 p3177 A70-35234
- Stable equilibrium positions for satellite consisting of many rigid bodies in circular orbit about center of gravity, using numerical method 18 p3332 A70-35963
- Satellite vibration tests simulation installations, describing measurement and control devices for lateral motion and test object safety 19 p3401 A70-38299
- Nonspinning symmetrical satellite in circular orbit, analyzing laterally oriented rotor effect on attitude stability 19 p3533 A70-38340
- Dual spin spacecraft bearing assembly flexibility effects on attitude stability [AIAA PAPER 70-1043] 19 p3533 A70-38858
- Dual spin spacecraft, considering nonlinear damping effect on attitude stability [AIAA PAPER 70-1044] 19 p3533 A70-38859
- Torque free spinning satellite with flexible appendages, investigating design parameters effects on nutational stability [AIAA PAPER 70-1046] 19 p3534 A70-38861
- Nutational stability and closed loop position control of dual spin spacecraft with despun platform [AIAA PAPER 70-975] 20 p3715 A70-39554
- Axisymmetric dual spin spacecraft consisting of nonconcentric frictionlessly mounted cylinders equipped with viscous damping mechanisms, evaluating stability criteria by energy method [AIAA PAPER 70-973] 20 p3715 A70-39556
- Motion and stability of rotating connected two body space station satellite system, developing Lagrangian equations of motion and optimizing damping system parameters [AIAA PAPER 69-919] 20 p3716 A70-39678
- Adaptive tracking filter for bending mode stabilization of large flexible boosters [AIAA PAPER 69-874] 20 p3716 A70-39682
- Multiplane balancing method for minimizing weight required for spacecraft stability [SAWE PAPER 848] 20 p3595 A70-40362
- Air navigation Discourses project satellites, discussing spin or three axis stabilization, system replenishment strategies and subsystem reliability 21 p3929 A70-41259
- Magnetic desaturation of inertia flywheels of satellite in equatorial or slightly inclined orbit, discussing satellite stabilization 22 p4110 A70-42488
- Radiation forces on flat plate in ecliptic earth orbit applicable to satellite attitude dynamics during pitching libration 22 p4125 A70-43437
- Comparative stability of freely spinning satellites for arbitrary number of flexible booms in rotation plane 22 p4111 A70-43440
- Aerodynamic and gravitational torque effects on orbiting satellites attitude stability, applying Liapunov direct method in case of conservative aerodynamic torque [AIAA PAPER 69-832] 23 p4258 A70-44559
- Space shuttle transition trajectory optimization for cruising flight entry, considering longitudinal control, pitchup instability and angle of attack 23 p4244 A70-44623
- Optimal moments of inertia of rigid satellite in circular orbit by generalization of Beletskij concept, discussing libration boundaries 23 p4261 A70-44677
- Satellites with many flexibly coupled rigid bodies, calculating libration upper bounds for predicting perturbation and stability 23 p4262 A70-44682
- Magnetically stabilized satellites passive roll control, discussing resonance solutions by variational approach 23 p4262 A70-44690
- Parameter optimization of gravity gradient stabilized satellite in circular orbit, considering minimum transition time and eccentricity oscillation 23 p4264 A70-45014

SPACECRAFT STERILIZATION

Collection of papers on planetary quarantine and spacecraft sterilization covering microbiology, spacecraft components, launching and environments, planetary landing, etc 03 p0433 A70-12996

Electro-pyrotechnic initiators for space applications subjected to dry heat sterilization cycles and to post-sterilization mechanical and electrical environments 03 p0495 A70-14131

Microbiological assay procedures for spacecraft sterilization and tabulation of microorganisms found on Surveyor 7 05 p0808 A70-16705

Sterile access system using pilot assembly sterilizer system /PASS/ for NASA Planetary Quarantine Program 05 p0808 A70-16708

Spacecraft contamination control teamwork operation, examining procedures and processes to ensure components cleanliness 05 p0809 A70-16713

Sterilized solid propellant motors applicability to planetary landing capsule spin stabilization [AIAA PAPER 69-823] 07 p1365 A70-19716

Sterile lander recontamination prevention from microorganisms during in-flight transfer from unsterilized carrier vehicle 11 p1991 A70-26049

SPACECRAFT STRUCTURES

Al-B composite missile adapter design for aerospace structures 02 p0306 A70-11951

Optical and mechanical techniques for space experiment structures and metals satisfying space requirements 03 p0492 A70-13848

Hypervelocity projectile size and density effect on ballistic limit of dual sheet spacecraft meteoroid protection structures, considering penetration of low and high density particles [AIAA PAPER 69-376] 04 p0776 A70-15422

Welding of satellite and spacecraft segments in space, discussing arc, electron beam, resistance, vacuum diffusion, cold pressure and brazing techniques 05 p0855 A70-16375

Atmospheric turbulence characteristics related to drag loads of tall spacecraft structures by boundary layer wind model 06 p1160 A70-17165

Flexible spacecraft equations of motion derived by modeling as rigid central body with arbitrary subsidiary flexible bodies [AIAA PAPER 70-19] 06 p1157 A70-18116

Lightweight double walled meteoroid shield for Mariner Mars 1971, considering Teflon impregnated glass fabric outer sheet and multilayer thermal insulation [AIAA PAPER 69-377] 07 p1394 A70-19712

Structural analysis of boron filament-epoxy composite laminate tubes for use as spacecraft long column members 08 p1595 A70-21911

Space engineering, flight instrumentation features and spacecraft subsystems integration problems 10 p1950 A70-24610

Tiros M requirements for earth resources sensor systems, discussing spacecraft structure, dynamics, power, command and communications subsystems 10 p1950 A70-24638

Aerospace vehicles structural vibration environments prediction methods emphasizing vibration sensor mounting resonances [AIAA PAPER 70-402] 10 p1959 A70-24903

Vibration behavior theory for elastomechanical systems applied to aircraft and space constructions 10 p1961 A70-25054

Space vehicle residual thrust oscillation and dynamic response using power spectral density functions from flight data 10 p1953 A70-25068

Corrugated skins solar absorptance and IR emittance computed for spacecraft thermal design, analyzing other nondiffusive radiative enclosures 11 p2150 A70-26352

Radiation stable refractory oxides in white spacecraft thermal control coatings, discussing photocatalysis application to degradation analysis 11 p2067 A70-26364

Solid state diffusion bonding techniques for aerospace Ti structural components 12 p2242 A70-27093

Penetration mechanics of multishield structures based on discrete particle modeling of impact debris [AIAA PAPER 69-371] 13 p2509 A70-28521

Stability and wind response determining spacecraft structure forces and bending moments
[AGARDGRAPH-115] 13 p2504 A70-28754

Aerodynamic and structural configuration effects on spacecraft inflight wind load calculations, showing Apollo interface lateral bending 14 p2653 A70-30585

Optimum overlap design of thin walled tubular extendible spacecraft structures under solar heating in zero-g environment 14 p2657 A70-30762

OGO spacecraft structures, thermal control systems, attitude control, weight and power supplies 15 p2810 A70-31782

Book on tubular spacecraft booms covering design and flight experiences, system performance, evaluation, etc 16 p2983 A70-33961

Compression spring mechanisms for separation of spacecraft and shrouds, summarizing design characteristics 16 p2921 A70-34116

Mariner 4 spacecraft structural dampers construction and performance 16 p2922 A70-34120

Ruggedized spacecraft mechanisms for severe shock environments 16 p2922 A70-34121

Spacecraft boom design and performance, including Russian spacecraft photographs 16 p2985 A70-34137

Spacecraft boom selection, discussing parameters, intended use, environment and effect on vehicle 16 p2986 A70-34140

High intensity noise enveloping space vehicle as distributed excitation, examining correlation effects on structural response 17 p3059 A70-35170

Space vehicle optimal design based on reliability analysis, taking into account cost of materials strength tests [JPL-TR-32-1496] 17 p3188 A70-35224

High intensity noise testing of missile and spacecraft structures, simulating acoustically induced vibrations due to aerodynamic turbulence 19 p3531 A70-37697

Azur satellite magnetic parameters simulation, noting spacecraft structure effect 19 p3400 A70-38295

Spacecraft thermal vacuum test installations design and operations for locating spacecraft structural weak points 19 p3400 A70-38297

Filamentary composite materials for space vehicles structural design, noting mass reduction, strength, foldability, formability, etc 20 p3656 A70-40030

Aircraft, rocket or other rigid or flexible structure, computing inertial constants based on measurements of generalized masses of natural modes 21 p3935 A70-41408

Thermoelectric outer planet spacecraft (TOPS)/structural problems associated with high gain antenna and electronic equipment 21 p3930 A70-41803

All-flexible parawing as primary descent system for large spacecraft landing, discussing configuration, structural arrangement, multistage reefing and L/D performance tests [AIAA PAPER 70-1187] 21 p3754 A70-41828

Dynamics of deployable space structures stiffened by centrifugal forces due to spin, discussing LF radio telescope 21 p3931 A70-41854

Small scientific satellite design objectives, structural and electrical requirements, components integration, instrumentation, antennas, spin rates, vibrations, sealing, reliability, etc 22 p4110 A70-42497

Earth orbital space station electrical power systems, discussing power sources, effect on structural configuration, environmental control and launch and resupply operations [MDAC-WD-1461] 23 p4143 A70-44605

SPACECRAFT TELEVISION

NT SATELLITE TELEVISION

Slow scan TV systems for planetary exploration, discussing sampled vidicon operation, digital encoding, data storage, signal to noise ratio, future design trends, etc [SMPT PREPRINT 106-3] 02 p0294 A70-11682

Secondary electron conduction TV camera tube with three color filter wheel for Apollo missions 03 p0493 A70-14025

Black and white and color Apollo 11 secondary electron conduction TV cameras, discussing characteristics and mission requirements 04 p0688 A70-14692

Lunar regolith and polarized component of earthlight observations by Surveyor 7 TV camera 04 p0752 A70-15061

Prelaunch photometric calibration of Surveyor TV system for reconstruction of lunar terrain televised

pictures permitting system lunar performance prediction [AIAA PAPER 68-1138] 04 p0692 A70-15405

Apollo 7 and 8 command modules TV camera systems design, considering additional function of public information 07 p1280 A70-19229

Visual imaging systems for Mars orbiter compared for performance and interactions with mission and spacecraft design 07 p1280 A70-19230

TV test chart for evaluating Surveyor lunar spacecraft TV system covering resolution, photometric and colorimetric response and sun angular position [SMPT PAPER 105-71] 10 p1890 A70-24601

Geometric distortions in ESSA 7, Surveyor 7 and Mariner 4 TV systems caused by scale distortion, discussing stability of systematic component in magnitude and shape 10 p1890 A70-24727

Satellite video-telephone systems promoting economic growth in developing nations through linkage with developed nations advanced centers [AIAA PAPER 70-474] 11 p2000 A70-25455

Crosstalk effects on data transmission in multiplex TV systems for aerospace communications analyzed by signal and noise models 13 p2363 A70-28384

Navigation data from Mariner Mars 1969 TV pictures, estimating spacecraft trajectory to planetary center 14 p2614 A70-30468

ESSA 7, Surveyor 7 and Mariner 4 space TV systems geometric distortions analysis and potentials in analytic photogrammetry and topographical mapping 14 p2586 A70-30982

Low light level TV /LLLTV/ tube, camera and sensor development for military and space applications 16 p2903 A70-33129

Apollo 10 color TV camera for real time scenes, describing configuration performance and total system operation 16 p2907 A70-33187

TV experiment for Mariner Mars 1971 Project, providing fixed and variable feature imaging data 16 p2978 A70-34027

Surveyor TV mechanisms, discussing camera, mirror, zoom lens, filter wheel, focal plane shutter and lubrication 16 p2914 A70-34147

Spaceborne narrow band TV system with image memory tube and electronic shutter, noting variable exposure time, motion compensation and multimode scanning 17 p3089 A70-35267

Slow scan TV systems for planetary exploration, discussing sampled vidicon operation, digital encoding, data storage, signal to noise ratio, future design trends, etc [SMPT PREPRINT 106-3] 17 p3095 A70-35634

Surveyor 7 TV system in photon integration mode, analyzing slow scan vidicon storage characteristics and dark current limitations 17 p3095 A70-35635

Apollo black and white TV scan converter design and operation 17 p3095 A70-35636

Mariners 6 and 7 orbits determination by weighted least squares estimation based on common surface features in overlapping TV pictures [AIAA PAPER 70-1066] 19 p3529 A70-38879

Grand tours navigation system consisting of deep space network radio and onboard TV for future TOPS /Thermoelectric Outer Planet Spacecraft/ applications 21 p3849 A70-41799

Meteorological TV imaging systems development in last decade, including low and synchronous altitude camera, sensors, orthicons, etc 23 p4193 A70-43963

Integrated data processor-operation controller for stellar TV photometer systems in spaceborne observatory, considering limited channel transmission capacity 23 p4167 A70-44649

SPACECRAFT TRACKING

NT SATELLITE TRACKING

Two axis spherical gage bearing gyro for accurate measurements of space vehicle position and attitude rates while maintaining compatibility with exotic environments 01 p0086 A70-10308

HEOS 1 satellite telemetry, telecommand and tracking systems, noting data transmission degradation due to high solar activity 01 p0045 A70-11115

Lunar gravitational field determination from analysis of Lunar Orbiter spacecraft tracking data 03 p0562 A70-12915

Artemis I and II telemetering antennas at Guiana Space Center for spacecraft tracking 05 p0819 A70-15987

Spacecraft telecommunication and tracking systems in Gemini, Mercury and Apollo programs, emphasizing

ing Apollo command and lunar modules equipment and mission ground stations 05 p0813 A70-16326

Apollo onboard computers tracking data state-vector corrections covariance matrix, considering initial estimate, noise and tracking geometry errors [AIAA PAPER 70-162] 06 p1015 A70-18072

Navigation accuracy of two way Doppler tracking of interplanetary spacecraft during heliocentric and planetary encounter trajectory phases [AIAA PAPER 69-899] 07 p1331 A70-19727

Linear FM pulse compression radar system operating at 94 GHz, obtaining echoes from orbiting objects for identification 08 p1462 A70-21290

ELDO rocket tracking error, considering guidance antenna angular precision and UHF circuit performance in signal comparison 09 p1720 A70-22649

Step-Track automatic angle tracking technique for communication satellites, seeking peak of antenna single beam [AIAA PAPER 70-416] 11 p1999 A70-25454

Space vehicle on-line tracking with impulsive thrust maneuver by sequential estimation scheme, reducing radius measurement error 11 p2008 A70-26237

Binary-coded sequential acquisition spacecraft ranging system operating at weak signals using HF digital logic 11 p2009 A70-26252

Optimal linear estimation and control theory application to high precision optical spacecraft tracking systems design 11 p2028 A70-26302

Telescope servocontrol system with low pointing error and drift rate, permitting extended time exposure photography of star or deep space probe 12 p2202 A70-26869

Lunar gravity correlation with large craters indicated from negative accelerations recorded in Apollo 12 lunar module Doppler radio tracking data 12 p2298 A70-27270

Deep Space Network /DSN/ data accuracy limitations relation with ability to determine orbit of probe, examining improvements after Mariner 2 and trends 13 p2448 A70-28702

Spacecraft tracking methods applied to solid earth and ocean physics 15 p2809 A70-31685

Recursive estimation and Kalman filtering for space vehicle trajectory tracking, using Doppler shift measurements 16 p2866 A70-34071

Digital computer controlled positioning of telemetry antennas for tracking spacecraft 17 p3062 A70-35508

Search optimization for object drifting in outer space, considering approximate location and speed 17 p3172 A70-35668

Covariance matrices estimates for trajectory parameter tracking of thrust-maneuvering spacecraft [AIAA PAPER 70-1017] 20 p3666 A70-39516

Gravitational relativistic theory tests using tracking data from interplanetary spacecraft, orbiters and landers [AIAA PAPER 70-1317] 24 p4414 A70-46326

SPACECRAFT TRAJECTORIES

NT CIRCUMLUNAR TRAJECTORIES

NT EARTH-MARS TRAJECTORIES

NT EARTH-MOON TRAJECTORIES

NT EARTH-VENUS TRAJECTORIES

NT INTERPLANETARY TRAJECTORIES

NT LUNAR TRAJECTORIES

NT MOON-EARTH TRAJECTORIES

In-flight compensation for space probe trajectory deviations, discussing attitude determination and control of triaxial and spin stabilized space probes 01 p0186 A70-11265

Spacecraft trajectory optimal determination without knowing measurements error distribution function, examining computer solution properties of linear programming 01 p0192 A70-11477

Minimum time turns for spacecraft about fixed axis lying beyond plane of vehicle forces 01 p0197 A70-11480

Spacecraft motion parameters and physical characteristics of space determined from statistical analysis of measurement data 01 p0094 A70-11484

Optimal motion control of spacecraft refueling during flight by liquefying atmospheric gas along prescribed trajectory under constant thrust 01 p0197 A70-11502

Osculating transfers between two prescribed trajectories without considering optimization problem, obtaining in-space launching point of artificial cosmic bodies 03 p0575 A70-13972

Optimal control of thrust limited minimum-propellant rocket-powered vehicle using expansion about optimal trajectory 04 p0750 A70-14928

- Patch-conic method accuracy and limitations in determining space trajectories as function of planetary zones of influence 04 p0750 A70-14941
- Soviet monograph on optimal space flight trajectory control, covering vehicle CG trajectory and synthesis of automatic stabilization system using variational calculus 04 p0764 A70-15493
- Tangential thrust, constant acceleration trajectories for close solar probe missions using low thrust electric engines 06 p1137 A70-17177
- Satellites and space probes orbital parameters calculation, considering circular and elliptical trajectories and rendezvous maneuver example 06 p1140 A70-17583
- Optimal landing of spacecraft on moon surface from low circular orbit, analyzing rocket thrust, altitude and landing site distance effect on spacecraft mass 06 p1155 A70-17880
- Optimal information selection for determining spacecraft trajectory, considering atmosphere, light speed and series expansion coefficients of planetary gravitational potentials 06 p1142 A70-17891
- Manual onboard orbit determination assuming electronic equipment failure, discussing geometric in-plane orbital parameters and safe orbit check [AIAA PAPER 70-159] 06 p1144 A70-18033
- Heliocentric low thrust spacecraft trajectory analysis using two-variable asymptotic expansion method [AIAA PAPER 70-214] 06 p1145 A70-18064
- Trajectory, guidance and environmental parameters and uncertainties effect on design optimization of out-of-orbit Viking soft lander [AIAA PAPER 70-99] 06 p1157 A70-18134
- Computation methods for optimal rocket trajectories closely approaching gravitating celestial bodies, alleviating computational difficulties with regularizing techniques [AIAA PAPER 70-95] 06 p1146 A70-18202
- Hybrid patched conic technique as iterative procedure for generating translunar and transearth trajectories emphasizing computing time saving 06 p1152 A70-18495
- Lawden primer vector theory applied to matched conic spacecraft trajectories optimization 07 p1381 A70-19325
- Soviet book on motion of guided rockets in space covering aerodynamic and structural aspects, stabilized and disturbed rocket motion, etc 08 p1582 A70-20756
- Queue control techniques in generating predicted trajectory, discussing queue control logic requiring minimum storage 08 p1467 A70-21049
- Spacecraft mission planning for trajectory control after establishing mission objectives, trajectory plan and crew timeline for Apollo flights 09 p1725 A70-23709
- Selection of uncorrelated measurement composition ensuring optimal accuracy of space vehicle trajectory 10 p1939 A70-24301
- Free fall vehicle dynamics for wind tunnel measurements of research shapes used in computer simulation of vehicle trajectories [AIAA PAPER 69-229] 12 p2157 A70-28081
- Satellite rendezvous programmed control with allowance for thrust limitation by free trajectories method, determining impulse duration, magnitude and time 12 p2314 A70-28257
- Adaptive variable-parameter spacecraft trajectory control, discussing loop synthesis and model reference system stability and dynamic accuracy 13 p2380 A70-28383
- Space navigation procedures verification considering vehicle trajectory parameters, noting applicability to linear systems with estimable parameters 13 p2447 A70-28412
- Space probe trajectory near second order integration under influence of solar oblateness and gravitation 14 p2635 A70-30288
- Lunar based radar beacons for nearby spacecraft navigation, noting trajectory determination advantages 14 p2614 A70-30461
- Navigation data from Mariner Mars 1969 TV pictures, estimating spacecraft trajectory to planetary center 14 p2614 A70-30468
- Jet assisted orbital spacecraft trajectories equations derivation, considering Kepler trajectories and orbital velocities 15 p2800 A70-32260
- Semiwideband and adaptive noise variance recursive estimation techniques applicable to spacecraft trajectory analysis 15 p2803 A70-32586
- Branched trajectory optimization for split rocket vehicles using projected gradient or steepest descent method 16 p2977 A70-33871
- Recursive estimation and Kalman filtering for space vehicle trajectory tracking, using Doppler shift measurements 16 p2866 A70-34071
- Interstellar drag resulting from relativistic rocket elastic collisions with interstellar matter, discussing effects on minimum time acceleration limited relativistic trajectories 17 p3155 A70-34752
- Computation methods for optimal rocket trajectories closely approaching gravitating celestial bodies, alleviating computational difficulties with regularizing techniques 17 p3172 A70-35666
- Space vehicle trajectories, discussing programming method to control motion for prescribed boundary conditions 17 p3173 A70-35700
- Extraterrestrial transport trajectory control by jet assistance 18 p3333 A70-36670
- Perturbative effects of Jupiter moons on spacecraft flyby and postencounter heliocentric trajectories, noting precision targeting [AIAA PAPER 69-932] 18 p3316 A70-36680
- Closed form solution for minimum fuel constant thrust trajectories for vehicle transfer in vacuum between arbitrary boundary conditions 18 p3316 A70-36683
- Pioneer-F Jupiter flyby mission planning, considering use of optimum broken plane trajectories to increase launch opportunity and/or payload capability [AIAA PAPER 70-1050] 19 p3528 A70-38865
- Closed form approximate solution for restricted three body motion of lunar or interplanetary spacecraft, demonstrating accuracy and flexibility in lunar mission trajectory calculations [AIAA PAPER 70-1061] 19 p3529 A70-38875
- Multiconic method space flight trajectories analysis, discussing computation time and circumlunar flight altitude and velocity errors [AIAA PAPER 70-1062] 19 p3529 A70-38876
- Mariner 7 preencounter anomaly in radio tracking data and trajectory investigated by computerized simulation [AIAA PAPER 70-1065] 19 p3534 A70-38878
- Future spacecraft mission for short period comets rendezvous, considering trajectory requirements and launch vehicle payload capabilities [AIAA PAPER 70-1072] 19 p3530 A70-38885
- Spacecraft trajectory initial conditions expressions as parameters dependent functions, applying results to Mars lander mission [AIAA PAPER 70-1016] 20 p3666 A70-39517
- Closed form expressions for linear and higher order corrections to multipulse approximations of space flight trajectory optimization solutions, using bang-bang thrust control [AIAA PAPER 70-1014] 20 p3667 A70-39519
- Space vehicle trajectories power-optimal single parameter nonlinear correction, assuming ideal impulse performance 21 p3883 A70-40829
- Midlatitude stratosphere and lower ionosphere density model, discussing vertical, diurnal and seasonal variations effects on spacecraft trajectories 21 p3813 A70-40830
- Low thrust trajectory transfer from low to synchronous orbit, examining hydrogen resistance jet and mercury bombardment ion thruster 22 p4089 A70-42487
- Analytic approximation for initial adjoint vector for optimal/minimum propellant/ space trajectories [AIAA PAPER 69-916] 23 p4243 A70-44509
- Algorithm for space trajectories optimization with delta velocity constraints 23 p4245 A70-44683
- SPACECREWS**
- Crew locomotion effect on spacecraft attitude control using space cabin simulator tests 01 p0036 A70-10853
- Crew requirements influence on systems design and operations criteria for long duration biomedical and behavioral measurement program in earth orbiting space laboratory [ASME PAPER 69-WA/BHF-17] 04 p0643 A70-14858
- Space flight emergencies causes and consequences, underlying life threats and crew survival times, considering equipment failures, personnel errors, etc 04 p0761 A70-14926
- Physiological and physiopathological effects of transverse accelerations on spacecraft crews, discussing cardiovascular and respiratory systems 05 p0799 A70-15763
- Wake-sleep rhythm of spacecrews for operational capacity to maintain constant watch of spacecraft, suggesting recreation of terrestrial time cycle in space 05 p0799 A70-15766
- Regenerative life support system development for multiman crews on extended space missions, considering maintainability, reliability and automation [SAE PAPER 690637] 05 p0804 A70-15845
- Spacecraft incorporated emergency rescue systems, discussing design of nonseparable crew escape compartment and separable capsule 07 p218 A70-19010
- Crew visibility requirements for rendezvous, docking and earth landing of reusable reentry vehicles [AIAA PAPER 70-262] 07 p1399 A70-20398
- Spacecrew candidates leisure time preferences, discussing off-duty concepts for long space missions 16 p2853 A70-33709
- NASA ten year space station operational concepts, discussing mission planning, crew scheduling and management [AAS PAPER 70-031] 17 p3176 A70-34804
- Physiological reactions of Soyuz 6, 7 and 8 crew during group flights, noting cardiovascular and respiratory reaction to submaximum stresses after flight 17 p3038 A70-35361
- Medicobiological approach to living conditions for sustained residence and human activity during prolonged space flights, describing sealed chamber experiment 19 p3367 A70-37525
- Manned space station design, discussing durations of scientific experiments and crew operation 19 p3532 A70-37752
- SkyLab mission in 1972, describing orbital workshop configuration and three man crew integration for operational experiments [AIAA PAPER 70-1328] 24 p4417 A70-45939
- SPACERS**
- Spaced damping reducing structural response to vibration, discussing efficiency, design flexibility and weight addition 08 p1507 A70-21269
- Lateral heat transfer along parallel conducting and radiating plates spaced by absorbing and isotropically scattering dielectric [AIAA PAPER 70-849] 16 p2939 A70-33916
- SPACING**
- NT AIRCRAFT APPROACH SPACING**
- Electromagnetic energy transmission factors for metal-dielectric-metal system, calculating net energy flux, noting effects of metal spacing, time, temperature level, etc [ASME PAPER 69-WA/HT-8] 04 p0784 A70-14822
- Close-spaced nozzles twin jet configuration, achieving low nozzle and total afterbody drag [AIAA PAPER 70-934] 17 p3149 A70-35844
- Dolph-Pritchard technique limitations for transformation of array factor into Chebyshev polynomial as related to element spacing for single lobe endfire arrays 20 p3599 A70-40315
- SPAIN**
- Meteorological rockets fired in Spain, obtaining stratospheric wind and circulation data 07 p1396 A70-20278
- INTA-255 ionospheric sounding rocket, describing vehicle and launcher design, test firings, ground facilities, etc 13 p2504 A70-28686
- SPALLATION**
- Cross sections of fragments emitted in spallation reactions of carbon and nitrogen nuclei emulsion with alpha particles 09 p1733 A70-23549
- Radionuclides production rates in stratosphere from spallation reactions of cosmic rays with Ar 17 p3152 A70-35759
- Cosmic ray track sources in meteoritic minerals, considering heavy primaries, secondary spallation and fission products 19 p3508 A70-38142
- High energy alpha particle beam exposed to plastic scintillators, determining spallation cross section for C12/alpha, alpha n/C11 21 p3852 A70-41138
- Apollo 11 lunar dust examination by neutron activation analysis, determining spallogenic manganese 53 21 p3908 A70-41579
- Rock particle tracks of primary cosmic rays, spallation recoil nuclei, nuclear fission and solar wind ions, observing time scale multiple soil orientation 21 p3914 A70-41652
- Spallation limits on low energy cosmic and nuclear gamma rays interstellar fluxes, evaluating fast particle effects on interstellar medium 24 p4397 A70-45758
- SPALLING**
- Stress gradient theory interpreted in terms of time dependent failure criterion to study critical stress vs impulse theory of spall fracture 05 p0938 A70-16481
- High purity beryllium dynamic tests determining Hugoniot equation of state, shock profile and spall threshold /onset of microcracking/ for elastic pulses [AIAA PAPER 69-360] 11 p2066 A70-25964
- Fractography of spall cavities and crack growth in ball rolling contact fatigue, using scanning electron microscope 15 p2745 A70-32444

SPARE PARTS

Spall nucleating mechanism for Al, noting microcracks in embedded particles 16 p2991 A70-33894

SPARE PARTS

Integrated materiel management for systems or product costs reduction applied to high cost spares management 02 p0401 A70-11671

Spares management of large aircraft contract in relationship to total integrated logistics support systems management 02 p0401 A70-11672

Optimal spare parts inventory determined for stochastically failing components using mathematical model 08 p1501 A70-20603

Computerized control of aircraft spare parts inventories, using optimization method maximizing aircraft availability and minimizing handling costs 13 p2524 A70-28836

Cost effective spares provisioning models for airline operations, minimizing availability-cost ratio for line replaceable unit and total fleet 13 p2525 A70-29571

Availability assurance using computerized spare allocation model for optimal selection of sufficient spares to achieve required protection against system failures 14 p2592 A70-31114

Comparative demand forecasting for military helicopter spare parts, stressing exponential smoothing model 20 p3740 A70-39643

SPARK CHAMBERS

Monograph on balloon and satellite borne spark chambers for cosmic gamma radiation energy and direction determination, discussing relativistic electrons multiple scattering 07 p1368 A70-19617

Primary cosmic ray particles location in photographic emulsions exposed to balloon elevations by spark chambers, noting stack alignment 09 p1679 A70-22990

Pulsed gamma ray emission from Crab Nebula pulsar NP 0532 investigated by balloon-borne spark chamber detector 13 p2492 A70-29271

Astronomical gamma ray emission measurement by balloon-borne spark chamber, presenting results for discrete and diffuse sources and albedo intensities 19 p3501 A70-38088

SPARK DISCHARGES

U ELECTRIC SPARKS

SPARK GAPS

Space charge injection-impulse voltage separation technique for nonuniform field breakdown phenomena 01 p0110 A70-10560

Fixed gap electrostatic spark discharge apparatus for booster type explosive sensitivity tests, discussing construction of two models, safety features and results 03 p0548 A70-14120

Laser induced ion emission triggering of spark gaps, distinguishing channels due to electrons and ions by high speed shadowgraph technique 13 p2426 A70-28797

Laser triggered spark gap /LTSG/ with subnanosecond rise time, describing construction and operating characteristics 18 p2371 A70-37092

Subnanosecond jitter spark gap obtained with YAG-Nd pulsed laser triggered switching at moderate repetition rates 19 p3444 A70-37666

Low jitter multiple high voltage spark gaps switching at 50 pps by Q spoiled YAG laser triggering 19 p3444 A70-37667

Breakdown mechanism in Q switched ruby laser triggered spark gap, noting pulse duration and power peak 22 p4049 A70-42352

Air spark gap to switch stored charge in LC circuit, using auxiliary triggering circuit to clamp magnetic flux 23 p4177 A70-44471

Spark gap triggering with Q switched laser, comparing performance with electrical method 24 p4353 A70-45560

SPARK IGNITION

Arc ignition and cathode spot movement dynamics of thermionically emitting cathode surfaces in heat feedback plasma 21 p3859 A70-41903

Spark gap triggering with Q switched laser, comparing performance with electrical method 24 p4353 A70-45560

SPARK MACHINING

Electrical discharge machining showing close tolerance sizing capability on honeycomb panels 02 p0310 A70-12665

Electrical discharge machining using electrical spark eroding action for machining tough metals in burr-free

intricate configurations, including narrow slots and blind holes 03 p0497 A70-13564

Current density distribution during electroerosive machining, discussing current diagram construction and tool profile 11 p2060 A70-25935

Electric discharge machining technology, discussing quality control factors 12 p2239 A70-26990

Cobalt surface X ray analysis after spark erosion treatment, revealing phase with high temperature stability 14 p2596 A70-30840

Spark erosion milling machines adaptable to piece and mass production 15 p2744 A70-31899

SPARK SHADOWGRAPH PHOTOGRAPHY

U SHADOWGRAPH PHOTOGRAPHY

SPARKS

NT ELECTRIC SPARKS

Light spark and rapid nonlinear effects in focusing powerful light by longitudinal beam 04 p0718 A70-14405

Energy distribution of laser spark spectrum in air, He and Ar, determining transmission coefficients of spark plasmas by self absorption method 18 p3265 A70-36151

Spark tracing in gaseous flows in flames, wind tunnels, nozzles and pneumatic valves, using pulse transformer [SMPTE PREPRINT 41] 22 p4033 A70-43041

SPATIAL DEPENDENCIES

Random fields entropy estimation technique taking into account higher than immediately adjacent spatial dependencies 12 p2192 A70-27771

Free generation regime of ruby laser studied by electro-optical method of smoothing spatial inversion inhomogeneities 16 p2927 A70-33192

Doppler shifted radiation production, using time and space dependent radiant energy sources 16 p2952 A70-34255

Spatial summation of retinal neurons receptive field centers excitation from single optic tract fibers action potential in light-adapted cats 22 p3971 A70-43403

SPATIAL DISTRIBUTION

NT STAR DISTRIBUTION

Quasars variability, distribution, absorption line characteristics, red shift peaks, physical models, cosmological problems, etc 01 p0177 A70-10341

Spatial characteristics of magnetosheath magnetic field observed simultaneously by Explorer satellites, showing zero order agreement with prediction of MGD theory 01 p0071 A70-10410

Optical scintillation measurements applied to turbulence diagnostics, inferring spatial spectrum of turbulent scatterers, using Monte Carlo numerical procedure 02 p0296 A70-11892

Spatial distribution of Pi 2 micropulsations over specific distances and geomagnetic latitudes, noting coastline and geological effects 02 p0290 A70-12154

Propagation velocity relation with time delay in human visual system, using various sets of line stimuli having different spatial distance 02 p0237 A70-12457

Threshold visibility of uniformly moving colored gratings, noting chromaticity discrimination dependence on spatial and temporal frequencies 02 p0237 A70-12460

Spatial distribution function calculation for muons in extensive air shower model and secondary particles mean transverse momentum estimation 03 p0556 A70-13039

Scintillation counters hodoscopic system for studying spatial distribution of muon and muon-number fluctuations in extensive air showers 03 p0482 A70-13042

Spatial distribution of cascade shower particles in atmosphere described by integrodifferential equations system, considering medium ionization 03 p0557 A70-13049

Electron and photon spatial distributions in cascade air shower, applying moment method to space/angle problem solution 03 p0557 A70-13050

Electromagnetic field spectrum and spatial distribution in ring laser, considering transverse modes influence 03 p0500 A70-13462

Large amplitude wave trains in cosmic ray neutron intensity compared with diurnal variations, determining interplanetary space directional distribution from monitor data 03 p0559 A70-13912

Cosmic ray increases during Forbush decrease onset stage in terms of transient spatial anisotropy 03 p0559 A70-13914

Correlation function for spatial distribution of galaxies determined as function of inverse distance between galaxies 04 p0744 A70-14470

Stress-strain spatial distribution in notched plate fatigue specimen of mild steel determined by finite element method, noting cyclic strain softening effect [ASME PAPER 69-MET-C] 04 p0770 A70-14876

Plasma camera photographs of K plasma spatial distribution with electric fields and density gradients perpendicular to magnetic field, observing rotating irregularities around edge 04 p0728 A70-15005

Resonant compression waves in geomagnetic tail estimated for frequency and spatial distribution by single layered two dimensional model 04 p0680 A70-15127

Spatial distribution of field intensities of resonators, using diffraction gratings and prisms 04 p0651 A70-15289

Spatial resonance capture rates for U-238 thick slabs to correct gamma ray attenuation errors in broad group shielding calculations 05 p0884 A70-16169

Spatial and temporal relations between auroral emission at green line 5577 and cosmic noise absorption studied to determine energy spectra and particles distribution 05 p0907 A70-16281

Size and spatial distribution of meteoritic showers, establishing fragment distribution pattern relationship to sorting factor 05 p0912 A70-16464

Spatially homogeneous distribution function describing uniform gas motion derived to permit computer calculations in obtaining numerical solutions to kinetic equation 06 p1036 A70-17753

Kinetic Boltzmann equations for spatially uniform two component gas mixture solved with allowance for relaxation processes, assuming differing temperatures 06 p1109 A70-17754

Molecule spatial and velocity distributions of supersonic molecular beams, measuring scattering cross sections of He and Ar on noncondensable gases 06 p1043 A70-18252

Species spatial distribution measured for He-Ar gas mixtures expanding in supersonic jets, compared to measurements with skimmer-nozzle arrangement 06 p1066 A70-18256

Particle, momentum and energy flux spatial distributions of molecules scattered in collisions of low energy Ar atoms with mica and Ag surfaces 06 p1111 A70-18268

Transverse mode locking for carbon dioxide laser achieved with nonlinear boron chloride absorber, observing emission spatial buildup 06 p1083 A70-18425

Propagation in perturbed magnetically focused electron beams, noting influence of spatially varying drift velocity and damping effect 07 p1239 A70-18867

Three dimensional unsteady and steady sediment distribution obtained by Monte Carlo simulation method, using stochastic hydrodynamics model for transport 07 p1255 A70-19103

Horizontal ionospheric drift over Northern Hemisphere during low solar activity, studying spatiotemporal distribution patterns of drift parameters 07 p1266 A70-19438

Sporadic E layer parameters spatial distribution, describing analytic planetary coordinate system 07 p1267 A70-19453

Geomagnetic micropulsation amplitudes and polarization along meridional profile analyzed from simultaneous ground station recording 07 p1268 A70-19463

Charged particles and He nuclei spatial distribution from recordings in cosmic ray equator region by Cerenkov counter mounted on Proton 2 satellite 07 p1367 A70-19490

Kinetic theory of laser emission on band impurity transitions, noting spatial homogeneity effect on laser mode 07 p1299 A70-19852

Resonator aberrations and active element imperfections effect on formation of spatial and angular structures of solid state laser modes 07 p1299 A70-19854

Cosmic ray microvariations relation to solar wind structure, particle scattering models, spatial distribution, time variations, etc 07 p1372 A70-20336

Spatial and temporal cosmic plasma variations over various energy and wavelength ranges using cosmophysical and aeronautical facility 07 p1372 A70-20339

Lower ionosphere geomagnetic field local gradients determination by partial reflection method 07 p1277 A70-20455

Mathematical model of extensive air showers, calculating lateral distribution of photoelectronic component at all altitudes 08 p1560 A70-20598

Spatially inhomogeneous semiconductor structures dynamic characteristics, obtaining equations
08 p1474 A70-21207

Stress and strain spatial distribution in notched steel plate under cyclic loading determined by finite element method
08 p1590 A70-21315

Auroral zone electrojets spatial structure and dynamic behavior based on IGY and IQSY geomagnetic data
08 p1491 A70-21717

Auroral zone electrojet return current spatial distribution using idealized models for stationary state
08 p1491 A70-21718

Auroral electrons and photoelectrons spatial, energy and angular distributions measurements using low energy electron spectrometer onboard satellite Cosmos-261
08 p1500 A70-21797

Umkehr observation days selectivity effects on calculated mean ozone distributions in layers 2 and 3
08 p1492 A70-21970

Perseids time distribution, based on observations during meteor showers, contradicting appearance of homogeneous Poisson process
09 p1750 A70-22099

Quasar sky distribution as function of apparent magnitude for identification with galaxies of origin
09 p1759 A70-22909

Fast electrons spatial distribution for multiple scattering in nitrogen and argon, noting target thickness and incident energy
09 p1735 A70-23179

Compact galaxies, discussing distribution, integral photometry and isophotometry, brightness outbursts, etc
09 p1763 A70-23373

Low energy protons omnidirectional intensity contours in outer radiation zone at magnetic equator
09 p1747 A70-23491

Optimal control of distributed parameter systems, discussing necessary and sufficient optimality conditions based on functional analysis with emphasis on thermal processes
09 p1654 A70-23542

Neodymium glass laser fundamental frequency spatial structure effects on KDP crystal second harmonic generation efficiency, describing optimal system for laser beam shaping
10 p1899 A70-24262

Spatial frequency spectra of three dimensional phase object and three dimensional hologram, discussing interaction characteristic for monochromatic illumination
10 p1888 A70-24263

Stationary low pressure plasma enclosed in emitting surfaces calculated for spatial charge density distribution
10 p1923 A70-24539

Coherent photon responses production in liquids and glasses by superposing trains of giant laser pulses, achieving spatial separation of responses by combining pulse trains
10 p1900 A70-24564

Explosion aerial blast wave for producing impulsive structural forced response, discussing spatial distribution method for increased wave duration
11 p2133 A70-25729

Integral relay operations effectiveness based on random spatial distribution of aircraft under control of Army flight operations center
11 p2080 A70-26265

Elastic wedge under spatially uniform but time dependent shear tractions, studying shear stress and transient wave propagation
11 p2142 A70-26629

Cosmic X ray sources searched for by Aerobee rockets, noting locations and distribution correlation with galactic novae
12 p2292 A70-27385

Brightness distribution in hologram generated image modulated by square of temporal-spatial coherence modulus of laser emitting longitudinal and transverse modes
12 p2233 A70-27503

Spatial-temporal distribution of meteorological elements allowing for effects of underlying surface
12 p2263 A70-27511

Spatial-temporal distribution of wind swell HF components measured by two dimensional antenna array fed by DC signals
12 p2263 A70-27516

Growth rate and spatial distribution of solid deposit freezing onto vertical surface in presence of convective heat transfer at moving phase interface
12 p2331 A70-27696

Solar radio types I and III sources spatial distribution of circular polarization and coronal magnetic field configurations in active regions
12 p2294 A70-27710

Wave propagation in spatially homogeneous time varying dispersive media, emphasizing excitation and source dependent phenomenon
12 p2188 A70-27961

One dimensional perfect gas motion under spatial pressure distribution, investigating self similar solutions
12 p2212 A70-28189

Einstein equations derivation in comoving reference frame for spatially homogeneous gravitational fields
12 p2310 A70-28221

Soft electron fluxes spatial distribution and temporal variations in magnetosphere based on Elektron 2 charged particle trap data
12 p2295 A70-28259

Transverse laser modes interaction in traveling and standing wave generators allowing for spatial distribution
13 p2424 A70-28597

Solar flares number decrease near central meridian noting no sunspot decrease
13 p2477 A70-29047

Interferometric measurement of spatial correlation function of optical radiation fields propagating through turbulent atmosphere
13 p2454 A70-29825

Spatial distribution and directional anisotropies of tail plasma sheet energetic electrons from measurements by electrostatic analyzer and energetic particle experiments on Vela 4
13 p2482 A70-30071

Solar protons and electrons spatial and angular distributions over polar caps by USAF-OAR satellites 1966-70A, 1967-72D and 1968-59A
13 p2482 A70-30073

Standard pattern recognition with spatial discretization, concerning discrete cell or segment viewing
14 p2553 A70-30422

Optimal spatial discretization and brightness quantization of graphical symbols for pattern recognition, considering illumination and reflection coefficient
14 p2553 A70-30423

Statistical mesosphere temperature, density and wind profiles models based on rocket soundings
14 p2608 A70-30593

Coherent or spatially incoherent light recordings of Fourier transform holograms, investigating resolution cells film grain and signal to noise ratio
14 p2588 A70-31207

Night airglow space and time variations from jet aircraft observations, measuring conjugate enhancements
14 p2580 A70-31266

Atomic hydrogen distribution in upper atmosphere and solar system obtained during spin operation of OGO 5 with Lyman alpha photometer
15 p2798 A70-31655

Ionospheric currents time-space distribution noting rocket data, induction mechanism and geophysical effects
15 p2730 A70-32087

Geomagnetic disturbances temporal behavior and spatial scales
15 p2732 A70-32543

Charged particles and He nuclei spatial distribution from recordings in cosmic ray equator region by Cerenkov counter mounted on Proton 2 satellite
15 p2795 A70-32735

Ruby laser spatial and temporal characteristics improvement with bleachable dye filter, using local negative feedback
15 p2754 A70-32865

LF oscillations of bounded low pressure plasma under magnetic field in discharge chamber, determining spatial distribution by Langmuir sliding probes
16 p2958 A70-33254

Meteoroids origin and distribution, examining collisional and radiative processes effects
16 p2974 A70-33650

Solar X-ray emission localization, examining spatial distribution by rocket-borne collimated proportional counter
17 p3151 A70-34864

Orowan stress calculation, discussing line tension, screw or edge character, spatial distribution and yield strength
17 p3191 A70-35457

Optimal temporal and spatial-temporal resolution for unknown parameter of interfering signal on white noise background
17 p3048 A70-35680

Pulsars spatial distribution, comparing actual distribution to Monte Carlo computations
17 p3173 A70-35755

Spatial-temporal distribution of laser spark plasma electron density and temperature based on holographic interferometry
18 p3265 A70-36152

Pulsars period galactic equator concentration correlation, discussing period-radio luminosity relation and spatial distribution
18 p3314 A70-36335

Spatial signal transmission through open resonator determination based on resonator integral equation, extending to dielectric lens with finite Fresnel diffraction number
18 p3259 A70-36480

Brightness field spatial structure of solar radiation reflected from earth by Cosmos 149 satellite, discussing homogeneity and isotropy
18 p3247 A70-36629

Horizontal ionospheric drift over Northern Hemisphere during low solar activity, studying spatiotemporal distribution patterns of drift parameters
18 p3249 A70-36912

Sporadic E layer parameters spatial distribution, describing analytic planetary coordinate system
18 p3249 A70-36927

Geomagnetic micropulsation amplitudes and polarization along meridional profile analyzed from simultaneous ground station recording
18 p3250 A70-36937

Pulsar galactic longitudinal distribution, discussing observability impaired by high electron density in spiral
18 p3328 A70-37173

Interstellar dust spatial distribution, indicating galactic spiral structure
18 p3329 A70-37183

Solar particle observations over polar caps, considering spatial and angular distribution measurements
19 p3494 A70-37484

Polar cap absorption correlation with solar protons flux into magnetosphere, discussing diurnal and spatial variations and magnetic storm effects
19 p3411 A70-37492

Diurnal variations of thermospheric atomic hydrogen, investigating lateral flow effects on global distribution
19 p3415 A70-38419

Spatial gain variations transverse to discharge in axially flowing carbon dioxide laser amplifier, noting relationship to flow velocity
20 p3640 A70-39391

Einstein equations derivation in comoving reference frame for spatially homogeneous gravitational fields
20 p3710 A70-40096

Diurnal variations and spatial distribution of total electron content in equatorial ionosphere
20 p3623 A70-40477

Extended extragalactic bright radio sources with complex structure, comparing radio to optical field
21 p3892 A70-41189

CW gas laser improvement, discussing optimum efficiency and photon beam spatial distribution
21 p3836 A70-41419

Electron beam instability in cylindrical magnetically confined plasma column, calculating quasi-static spatial growth increments
22 p4080 A70-42403

Ionospheric electron content measurement during solar activity cycle, noting temporal and spatial variations
22 p4020 A70-43159

Butterfly diagram for describing latitude distribution of sunspots during solar cycle, considering representation methods
22 p4106 A70-43264

One dimensional perfect gas motion under spatial pressure distribution, investigating self similar solutions
22 p4012 A70-43314

Globular cluster relaxation time using non-Maxwellian velocity distribution and polytropic spatial distribution
22 p4109 A70-43744

Secondary source distribution of EM field induced on ground-air interface by antenna
23 p4161 A70-43773

LF oscillations of bounded low pressure plasma under magnetic field in discharge chamber, determining spatial distribution by Langmuir sliding probes
23 p4226 A70-44283

Auroral electrojet return current spatial extent from model ionospheric current distribution and geomagnetic variations
23 p4192 A70-44922

Rumanian book on spatial problems in elasticity theory covering deformation geometry, temperature effects, elastic parallelepipeds, etc
23 p4275 A70-44999

Spatial potential measurements in magnetized non-Maxwellian hydrogen plasma, using Zaitsev-Mnev method
24 p4385 A70-45464

SPATIAL FILTERING

Optical spatial amplitude filtering techniques application to moire fringe patterns processing
01 p0058 A70-11060

Image formation from wave front sampling in holography by spatial filtering, comparing Monte Carlo sampling to spaced sampling
04 p0692 A70-15365

Photographic film imagery, degraded by long term artificial atmospheric turbulence, restored by spatial filters placed in Fourier transform plane
07 p1336 A70-20090

Optical data processing systems with spatial filters for two dimensional signals detection, using film nonlinearities to record Fourier transform hologram
07 p1287 A70-20094

- Hologram data efficiency improvement by spatial offset removal, analyzing plane and spherical reference waves and plane and solid objects
08 p1500 A70-21787
- Hologram spatial bandwidth reduction by space-time multiplexing
09 p1673 A70-22074
- Optical signal processing using circular array and spatial frequency filtering to yield azimuthal distribution of sources
09 p1678 A70-22969
- Optical processing of signals from circular aerial arrays involving use of spatial filter
09 p1678 A70-22970
- Parametric image transformation during sum frequency generation
09 p1636 A70-23134
- Deformed grating frequency multiplication by filtering in Fourier plane of lens, forming moire pattern in image plane by mechanical interference
10 p1890 A70-24592
- Laser-light spatial-domain scanning function for deconvolution of blurred photographs using point-spread and holographic Fourier transform division filter
11 p2050 A70-25832
- Spatial domain deconvolution by laser scanning of blurred photographs, using holographic Fourier transform division filter and photoelectric integration
12 p2230 A70-26979
- Spatial filters for ratio W/H measurement in aerial mapping
14 p2581 A70-30144
- Book on holography covering principles, applications, spatial and temporal coherence, interference and diffraction theory and optical filtering
16 p2908 A70-33266
- Automatic speech recognition using spatial filtering and Fourier transforms
16 p2869 A70-33462
- Spatial filter properties of antennas, discussing system performance optimization and incoherent source transfer functions
17 p3045 A70-35077
- Hologram line scattering function dependence on light source spatial coherence, presenting quantitative evaluation, theoretical and experimental data
20 p3633 A70-39760
- Arbitrary mode launching on fiber-optical dielectric waveguides by spatial filtering technique
21 p3829 A70-41930
- Microwave antenna array irregularity location from hologram by optical signal processing, using far field spatial filter
21 p3792 A70-42048
- One, two and three dimensional array receiving systems, determining signal detectability characteristics by spatial filtering variation
22 p3986 A70-42527
- Seeding particles motion recording in fluid flow by holographic velocimetry, using optical matched spatial filtering to determine particle location
24 p4340 A70-46350

SPATIAL ISOTROPY

U ISOTROPY

U SPATIAL DISTRIBUTION

SPATIAL ORIENTATION

U ATTITUDE [INCLINATION]

SPECIES DIFFUSION

- Diffusive separation of Ar 36 and 40 and He in axisymmetric supersonic jet taking into account pressure diffusion
08 p1431 A70-21027

- Ultrasonic irradiation effects on steel hardenability and carbon diffusion rate during annealing, noting microstructure
18 p3273 A70-36049

- Molybdenum trisilicide-tantalum trisilicide and molybdenum trisilicide-tungsten trisilicide interdiffusion for molybdenum disilicide protective coating on Ta and W surfaces
21 p3840 A70-42056

SPECIFIC HEAT

NT HEAT OF SOLUTION

- Boundary conditions of heat conduction in systems of vessels connected by rods with given heat capacity and unknown temperature
02 p0400 A70-12674

- Three dimensional elasticity theory of generalized continua developed from atomic lattice theory model, discussing frequency spectra, specific heat and applications to crystal defects
03 p0525 A70-14232

- Specific heat, electrical resistivity and thermal conductivity changes in materials properties at cryogenic temperatures, noting parasitic phenomena, mechanical and dielectric properties
03 p0525 A70-14269

- Hypersonic flow over blunt bodies, discussing Mach number, specific heat and blast wave limits
04 p0613 A70-14454

- Two phase liquid-vapor system specific heat increase at temperatures approaching critical point,

- using nonanalytic vapor pressure equation with data for nitrogen and oxygen
04 p0780 A70-14584

- Specific heat and thermal EMF increase due to radiation damage in lattice of fast neutron bombarded Cu, Mo and W specimens
05 p0863 A70-16292

- Steady and frictionless supersonic flow of ideal gas of constant heat capacity around slightly deformed cone, calculating force exerted by gas
06 p0964 A70-17240

- Specific radiant heat flow and spectral blackness degree of tungsten with different surface finish
07 p1309 A70-19662

- Silicates thermal conductivity-Debye temperature relationship from thermal conductivity and acoustic data, applying to earth conductivity measurements
09 p1665 A70-22054

- Composite materials macroscopic thermoelastic properties relationships to constituents properties, discussing effective thermal expansion coefficients and specific heats
09 p1703 A70-22682

- Molybdenum heat capacity, electrical resistivity and thermal radiation measurements at high temperatures with millisecond resolution
09 p1706 A70-22955

- Specific heat ratio and configuration effects on flow in subsonic, transonic and supersonic sections of Laval nozzle
12 p2159 A70-28233

- Linear high polymers heat capacity measurements theory emphasizing simple mechanical systems and contribution of lattice vibrations
13 p2438 A70-28997

- Calorimetric measurements for Re specific heat in normal and superconducting states, comparing to theoretical calculation
14 p2626 A70-30478

- Temperature dependence of short wavelength magnon energies correlated with heat capacity
14 p2619 A70-30487

- Specific heat measurements on disordered and ordered phases of Cu-Au alloys at low temperatures
14 p2626 A70-30497

- Specific heat, thermal pressure and molar volume of liquid krypton measured with adiabatic calorimeter, discussing thermal expansion coefficients
14 p2617 A70-31016

- Electrical conductors specific heat measurement at high temperatures, using optical techniques and digital systems
15 p2826 A70-31942

- Specific heat and enthalpy of body centered cubic refractory metals at high temperatures
15 p2757 A70-31943

- Sound velocity relation with specific heat at constant volume at liquid-gas equilibrium critical point
15 p2826 A70-32022

- Graphite surface Debye temperature calculation based on crystal lattice dynamics
15 p2765 A70-32024

- Weak steady shock waves formation in relaxing binary gas mixture, discussing vibrational specific heat temperature dependence
20 p3614 A70-40350

- Apollo 11 rocks IR absorption properties, specific heat and thermal conductivity, discussing heat flow in surface layer
21 p3913 A70-41642

- Apollo 11 sample specific heats at 90-350 K, using adiabatic calorimeter
21 p3917 A70-41674

- Surface pressure coefficient dependence on specific heat ratio for yawed conical lifting bodies in supersonic streams
21 p3747 A70-41877

- Amorphous and partly crystalline polymers low temperature thermal conductivity and heat capacity
21 p3844 A70-42136

- Linear aliphatic polyesters melting point, fusion heat and entropy correlations to molecular parameters
22 p3982 A70-42502

- Specific heat and thermodynamic functions of endo- and exo-isomers of 2-methylbicyclo heptane in 12-310 K temperature range
22 p3982 A70-42681

- Fluorine specific heat derived from measurements on two phase liquid vapor system at constant volume by PVT properties at coexistence
23 p4157 A70-44001

- High temperature specific heat terms for refractory metals and ceramics from room temperature to near-melting point
23 p4207 A70-44440

- High speed photoelectric pyrometry of Ta heat capacity at high temperatures induced by pulse heating
23 p4207 A70-44441

- Al and W specific heat and Al heat of fusion by quasi-adiabatic calorimetry, estimating anharmonic lattice vibrations role via atomic thermodynamic analysis
23 p4208 A70-44931

- Specific heat of amorphous polymethyl methacrylate and polystyrene by pulse method below 4 K, comparing Debye and acoustic values
24 p4367 A70-45598

SPECIFIC IMPULSE

- Agna propulsion system performance model for predicting propellant flow rate, mixture ratio, thrust time and specific impulse
14 p2629 A70-30754

- Electrothermal thruster with liquid propellant, describing energy dissipation and high specific impulse
15 p2791 A70-32280

- Engine weight estimation for showing effect on thrust, specific impulse and uranium loss rate for open cycle gas fueled nuclear rocket engine
16 p2949 A70-33553

- Low, medium and high specific impulse microthrusters development in France, using cold gases, subliming solids, hydrazine, ammonia and cesium ions
16 p2969 A70-33613

- NERVA XE-Prime test series, discussing computer simulation, full power and high specific impulse operation and startup under varying initial conditions
16 p2951 A70-33950

- Thrust measurements on pulsed vacuum-arc thruster, comparing specific impulse and efficiency with exhaust velocity measurements by ion collecting double probes
20 p3567 A70-40207

- Nonuniform flow parameters for maximum thrust in nozzle, discussing specific impulse determination
22 p3960 A70-43366

SPECIFICATIONS

NT AIRCRAFT SPECIFICATIONS

NT EQUIPMENT SPECIFICATIONS

- Process specifications to control manufacturing operations, describing contents, purposes and preparation, emphasizing three levels of control
06 p1184 A70-17601

- Monograph on adhesive materials covering selection criteria tables, mechanical properties, specifications, surface preparation and joint strength
10 p1908 A70-25225

- Inter-Range Instrumentation Group /IRIG/ document regarding meteorological data reliability, defining measuring process accuracy and errors
14 p2606 A70-30567

- F-111A reliability levels achieved via high reliable hardware and redundancy and alternate mode capability requirements in contract
15 p2676 A70-32638

SPECIMENS

- Welded flat plate specimen to evaluate low cycle crack initiation and propagation of butt welds under compressive loading, discussing design, fabrication and testing
01 p0199 A70-10452

- Specimen design of laminated angle-ply composite materials for straight-sided axial coupon and long beam flexure tension testing
08 p1530 A70-21885

- Specimen size and mechanical factors in plane strain fracture toughness testing of metallic materials
23 p4206 A70-44195

Martian carbon dioxide band observations using multislit spectrophotometer, indicating surface height variations near Syrtis Major

01 p0182 A70-10723
Venus upper atmosphere average rotational temperature determined from high dispersion spectroscopic observations of 7883 A carbon dioxide band
01 p0184 A70-10912
Carbon dioxide laser with incorporated grating for measuring line strength to width ratio for various rotational lines

01 p0112 A70-10916
Ammonia red and green bands measured line positions, strengths and half widths applied to Jupiter atmospheric pressure determination

02 p0368 A70-11821
Collision-narrowed growth curves for interpreting hydrogen quadrupole lines applied to photoelectric observations of Jupiter vibration-rotation bands

02 p0368 A70-11824
IR spectra of four carbon stars and Sirius obtained with Michelson interferometer, indicating diatomic carbon and CO bands

02 p0372 A70-12252
Ammonia absorption band at 6450 A in Jovian atmosphere, clarifying controversial absorption time variations

02 p0375 A70-12428
NH bands in stellar spectra by visual inspection of spectrograms, noting abundance of N in normal and strong CN stars

02 p0379 A70-12708
Rotational lines in iodine B-X system vibrational bands, calculating Doppler, natural and collisional widths

03 p0527 A70-13298
Spectral index for diffuse X ray sky background within specific band determined from rocket observations with wide angle telescope

03 p0479 A70-14223
Integrated intensity measurements of carbon dioxide bands in micron regions, using self-broadening method

04 p0690 A70-15025
HF molecular vibration rotation band observed in sunspot spectra, carrying out model calculations for spots differing in temperature for fluorine abundance

04 p0751 A70-15048
Line transfer with scattering described by redistribution function numerically solved, using discrete ordinate method

04 p0720 A70-15701
High resolution Venus spectra, obtaining band spectra growth curve of C13O16O18 isotope of carbon dioxide, comparing data reduction methods

05 p0910 A70-16392
IR solar spectrum including water vapor, carbon dioxide and methane bands

05 p0913 A70-16566
Electrically discharged O effect on N first positive band emission in surface catalyzed excitation

06 p1109 A70-17489
Methylamine crystals lattice vibrations IR spectra recordings, making spectral band assignments according to translational and librational motions

07 p1356 A70-18958
Spectral band transmission functions of atmospheric water vapor, nitrogen, ozone, nitrous oxide and methane in IR region

07 p1330 A70-20306
Emission and absorption by nonhomogeneous gases with vibration-rotation bands determined by scaling approximation

10 p1968 A70-24474
Translational spectral bands of compressed rare gas binary mixtures, considering mass and temperature effects

12 p2275 A70-27172
Auroral enhancement of IR oxygen band at 1.27 micron compared with molecular nitrogen band intensity

12 p2222 A70-27185

IR absorption in ozone band, including atmospheric inhomogeneity effects on accuracy of transmittance calculations

12 p2223 A70-27515
Experimental IR earth horizon profiles measured by satellite in F region, discussing spectral channels and attitude control

12 p2225 A70-27751
Elsasser and statistical band models in single parameter functions representing mean absorption in given spectral range

12 p2191 A70-28295
Dark band in H alpha solar chromosphere above photospheric limb, outlining approaches to obtain spectrally pure observational results

13 p2486 A70-28627
Reflecting surface nonplane parallelism effects on Fabry-Perot interferometers superposition bands contrast and multiplied length measurement accuracy

13 p2408 A70-29366
Formation mechanism of molecular CN violet bands in solar photosphere

13 p2493 A70-29393
Temperature dependence of laser emission line self broadened half widths in spectral band of carbon dioxide at constant pressure

15 p2752 A70-32056
Pressure broadened line widths in electric field induced fundamental hydrogen spectral band, noting linear variation with density

16 p2954 A70-33276
Diatomic nitrogen ions branch overlapping, discussing rotational line structure in first negative system vibrational bands

16 p2956 A70-34254
Delta Scuti stars, determining consistent absolute magnitudes by Stromgren intermediate band colors and Crawford photoelectric H beta indices

17 p3171 A70-35443
Spectrophotometric airglow intensity measurements of OH, O I 6300, hydrogen H alpha and oxygen Herzberg I bands by airborne laboratory

17 p3080 A70-35769
Close-confinement LPE AlGaAs junction laser properties, examining range of alloy direct bandgap transition

18 p3268 A70-36727
Atmospheric water vapor distribution by intensity measurements of outgoing radiation from satellites in carbon dioxide and water vapor spectral bands

18 p3287 A70-36971
Arcturus Co bands, examining equivalent widths, rotational lines and 12C/13C ratio

18 p3318 A70-37015
High altitude humidity from millimeter-band water vapor lines, using EHF atmospheric spectral transparency calculation

19 p3461 A70-37633
Evening twilight airglow oxygen IR band ground based observation by two-channel photometric technique

19 p3415 A70-38385
Solar eclipse measurements in 1-30 mm range, examining chromosphere, flares and radio emission

19 p3531 A70-38911
Oscillator strengths for aluminum oxide molecular electronic sigma band system from intensity measurements in cyanogen-oxygen flame system

20 p3676 A70-40474
Nitrogen photoelectron excitation in dayglow, examining 3371 A band intensity, energy spectrum and flux in ionosphere

21 p3882 A70-41093
Hydrogen chloride self broadened fundamental vibration rotation band intensity variation with pressure investigated by absorption spectroscopy analysis

22 p3983 A70-42945
Water vapor emission computation from statistical band model, investigating accuracy limitations

22 p4065 A70-43169
Auroral molecular nitrogen bands tentative identification based on rocket-borne spectrometer results

23 p4186 A70-43856
IR absorption bands absolute intensities determination method, giving special consideration to absorption band wings and precision

23 p4217 A70-44203
Molecular oxygen ions 1Ng band and molecular nitrogen 1Pg band relative intensities in normal and type B auroras

23 p4191 A70-44408
Low temperature stars SiO IR spectral band identification based on rotation-vibration spectrum calculation

24 p4411 A70-45777
SPECTRAL CORRELATION
Complex burst of 2 September 1966, comparing dynamic radio spectra from Culgoora and Weissenau

21 p3880 A70-40968
Nonflaring solar X-ray and microwave radiation flux correlation from satellite data

22 p4104 A70-42995

SPECTRAL EMISSION

Far IR night sky emission above 120 km over millimeter range, using rocket-borne telescope

01 p0069 A70-10040
Thermodynamic aspects of ray invariance of spectral brightness ratio to square of local index of refraction compared to black body power radiation

01 p0144 A70-11293
Helium-neon laser wavelength calculations from spectral observations by Fabry-Perot etalon, proposing formulas to enhance accuracy

02 p0299 A70-12439
Peculiar emission object with emissions narrower and with lower ionization lines than cool Wolf-Rayet stars

03 p0574 A70-13933
Ablation chars, carbon and graphite spectral emittance and reflectance as function of wavelength and temperature, noting applications to atmospheric entry heat shielding

04 p0787 A70-15590
Antarctic twilight Na emission abundance and concentration in lower E region, discussing meteor ablation models

05 p0836 A70-15819
Sco X-1 line spectra search in X ray spectrum by rocket-borne proportional counters, noting iron line emission

05 p0904 A70-16979
IR region spectral hemispherical emittance of surfaces measured by bihemispherical reflectometer

06 p1107 A70-18205
[AIAA PAPER 70-65]
Hydrogen 109 alpha recombination line emission in galactic H II regions surveyed at National Radio Astronomy Observatory

10 p1936 A70-23942
Stellar atmosphere model for multilevel spectral line emission, assuming semiinfinite hydrogen atmosphere with sequence of plane parallel zones

12 p2306 A70-27856
Low pressure nitrogen and air spectra excitation by low energy proton bombardment, using spectroscopic, photometric and microphotometric analyses

14 p2619 A70-30653
Spectral line formation, assuming frequency redistribution for plane parallel stellar atmosphere containing nonuniform distribution of internal emission sources

14 p2651 A70-31289
Spectral emission in trivalent Ho doped Yb-Al garnet single crystals grown by optical zone melting

15 p2784 A70-32198
Reflectance measurements of directional spectral emittance of black body cavities with specific geometries, using laser source and integrating hemi-ellipsoid

20 p3627 A70-39091
Organic laser spectral and energy characteristics, discussing practical operation principles, low generation threshold and harmonic energy

20 p3642 A70-39754
Time varying flow properties effects on hypersonic wind tunnel spectroscopic measurements, considering direct emission and electron beam techniques

20 p3607 A70-40271
Shock tube measurements of bimolecular reaction rates in branched chain hydrogen-carbon monoxide-oxygen system, monitoring flame band emission

21 p3773 A70-41314
Stellar population of young clusters containing red supergiants, determining spectral types and luminosity classes

22 p4102 A70-42979
Spectral radiation extinction at atmospheric aerosol particles, discussing particles complex refractive indices and size distributions

22 p4065 A70-43171
Ti phase transformation effects on thermal conductivity, electrical resistivity and spectral and total emittances at 1100-1500 K

22 p4056 A70-43222
Spectral brightness temperature, directional emissivity and surface temperature of earth from remote radiance observations by balloon-borne multidetector grating spectrometer

23 p4194 A70-44035
Ta spectral emissivity, using ratio of specimen surface and black body spectral radiant intensities

23 p4207 A70-44447
Spectral and threshold emission from optically pumped semiconductor lasers as function of carrier type and concentration in GaAs single crystals

23 p4203 A70-45069

SPECTRAL ENERGY DISTRIBUTION

X ray line emission from Sco X-1 using Monte Carlo estimates of spectral distribution of scattered photons in terms of Fe line and cosmic abundance

01 p0169 A70-10338
Intensity distribution determination in spectrum of solar XUV fluxes incident upon upper atmosphere, considering quantitative model construction

01 p0170 A70-10593

Spectral distribution of X ray atmospheric absorption to determine high energy photoelectrons spectrum

01 p0172 A70-11494

Directional and spectral characteristics of bremsstrahlung X rays from auroral arc in low energy range during cosmic rays sounding rocket measurements

02 p0357 A70-12069

Jupiter Red Spot continuous spectrum intensity distribution and methane/ammonia absorption between 3300-6500 Å

02 p0374 A70-12427

Double exposure holograms in diffuse radiation used to reconstruct in white light interferogram images localized in hologram plane

03 p0483 A70-13259

Solar IR light brightness distribution reflected by volcanic covers compared with lunar observation data

04 p0744 A70-14439

Statistical model of ozone absorption bands for calculating intensity, rotational line position and transmission functions of complex spectral regions

04 p0680 A70-15252

Simulation equipment for extraterrestrial solar radiation for spacecraft components evaluation tests, describing spectral characteristics

04 p0665 A70-15663

Wall effect on differential spectral distortions in cylindrical ionization chamber and proportional counter type detectors

05 p0900 A70-15971

Visible light emission from nonequilibrium Cs plasma measured for spectral intensity distribution, suggesting excitation mechanism in terms of collision-radiation model

05 p0887 A70-16109

Power spectra, modulation indices, frequency distributions and decorrelation frequencies of intensity fluctuations of pulsar radiation consistent with interstellar scintillation theory

05 p0908 A70-16302

Spectral power distribution and ultrashort pulses limiting duration of ruby-neodymium laser with passive shutter

06 p1081 A70-17766

Tropospheric and stratospheric turbulent horizontal heat and momentum transfer spectral density profiles calculations from radio launchings data

07 p1269 A70-19646

Spectral line intensities in hydrogen plasma, calculating relative intensities and Balmer line width for various electron temperatures and optical thicknesses in H alpha line

07 p1389 A70-20205

Spectral intensity distribution of night airglow noting visual spectra distribution difference from G2 stars

07 p1277 A70-20457

FM spectral density model with applications to radio transmitter bandwidth estimation and interference analysis

08 p1456 A70-20473

Quasi-stellar objects absolute spectral energy distribution, considering electron temperature and photon density

08 p1572 A70-20916

Meteors spectral intensity variations along flight path noting color dependence on brightness

08 p1572 A70-20946

Spectral densities of phase coordinates of nonlinear automatic systems in steady states at random disturbances determined by statistic linearization

08 p1480 A70-21016

Modified diffusion approximation for spectral transfer of isotropic turbulent pulsation energy for temperatures with low Prandtl number

08 p1538 A70-21429

Surface roughness effects on measured cross spectral density of wall pressure fluctuations beneath turbulent boundary layer

08 p1486 A70-21859

Anisotropic turbulent energy spectral distribution approximated assuming homogeneous and axisymmetric turbulence with vertical axis of symmetry

09 p1717 A70-22374

Book on rotational structure of diatomic molecules spectra covering multiplets, intensity distributions and perturbations

12 p2274 A70-27094

Calcium H and K lines core residual intensities in stars with quiet and active chromosphere, suggesting activity due to thermal gradient

12 p2303 A70-27702

Energy distribution in dark and light details on Venus spectrograms, considering relation to clouds in upper atmosphere

12 p2311 A70-28304

Solar light brightness distribution reflected by volcanic covers compared with lunar observation data

13 p2485 A70-28464

Tungsten strip lamps spectral radiance calibration, discussing accuracy requirements for radiation constants, wavelength and black body temperature

13 p2410 A70-29655

Temporal structure and spectral evolution of Nd laser emission with self locking axial modes, noting gain saturation effects

13 p2430 A70-29776

Metastable He ion two photon decay, observing photon coincidence angular correlation in spectral distribution

13 p2456 A70-29811

Solar far UV continuum photometry illustrating spectral temperature minimum transition, comparing to far IR temperature

13 p2496 A70-29841

Si solar cell power output and spectral response as function of angle illumination, eliminating atmospheric influence

14 p2533 A70-30337

Heterochromatic spectrophotometry, discussing maxima and integral techniques for line measurement, photoemulsion properties and Eberhard effect

14 p2585 A70-30784

Comet Bennett 1969i photometric observations, showing blackbody-like continuum at short wavelengths with sharp peak due to silicate grains

14 p2642 A70-30895

Spectral line formation, assuming frequency redistribution for plane parallel stellar atmosphere containing nonuniform distribution of internal emission sources

14 p2651 A70-31289

Nitrogen K-LL Auger spectrum high energy lines measurement by high resolution electron spectrometer

14 p2620 A70-31301

Cosmic X ray and gamma ray spectral energy distribution slope change explained by measurement process involving photon spectrum

15 p2792 A70-31431

Spectral distribution of GaAs photoconductivity, allowing for coordinate dependence of minority carrier lifetime in surface space charge region

15 p2782 A70-31626

Clutter signals in radar receiver antenna, determining autocorrelation function and spectral power density

15 p2701 A70-32466

Atmospheric temperature fluctuation spectrum determination by energy budget solution, considering spectral density dependence on Richardson number

15 p2732 A70-32542

Meteors spectral intensity variations along flight path noting color dependence on brightness

15 p2806 A70-32758

Energy distribution in continuous spectrum of star MWC 334 from spectrophotometric observations

15 p2808 A70-32888

Quantum theory for spontaneous parametric light scattering, determining photon spectral distribution

16 p2951 A70-33196

Spectral densities of intensity and frequency fluctuations of single frequency He-Ne laser radiation

17 p3105 A70-35092

Spectral radiation and polar distribution from high power Ar, Kr and Xe arcs

17 p3023 A70-35156

Hour-angle and declination center-to-limb profiles of quiet sun 3.3mm brightness temperature distribution

17 p3174 A70-35868

Spectral densities of input and output signals of discretely continuous systems as function of comparison moment

18 p3233 A70-36069

Optimum spectral control of nonlinear plant, using Newton iteration and linear programming

18 p3234 A70-36075

Star AG Draconis spectrum in visible range by meniscus prismatic camera, deriving energy distribution

18 p3315 A70-36575

Quasar 4C 05.34 absolute spectral energy distribution by multichannel photoelectric spectrometry

18 p3318 A70-37019

Galactic spiral structure from atomic hydrogen line intensity longitudinal distribution

18 p3328 A70-37168

Spectral radiative capacity of lower level clouds in specific transmittance window, using airborne diffraction spectrometer measurements

19 p3461 A70-37424

Spectral intensity distribution of extragalactic radio sources, comparing spectral deviations from simple power law to radio emission from relativistic electrons in magnetic field

19 p3524 A70-38749

Spectral energy distribution of meteor trail in Leonid meteor shower from photographic analysis

19 p3526 A70-38779

Spectral energy distribution curves and color indices of specific meteor trails observed on 12 August 1959 and 25 July 1963

19 p3526 A70-38780

Solar spectral intensity distribution and ionizing radiation spatial emission patterns during eclipse, discussing effects on ionosphere

19 p3418 A70-38908

Nebula K3-50 IR radiation source observation, noting energy distribution resembling NGC 7027 and W51-IRS 2

20 p3701 A70-39003

Carbon monoxide laser efficiency increase through addition of Xe, noting change in laser output spectral intensity distribution

21 p3835 A70-40572

Omnidirectional cosmic gamma ray flux near one MeV observed by ERS-18 satellite, plotting spectral energy distribution

21 p3876 A70-40697

Magnesium-sodium nitrate porotechnic flare spectral radiant energy comparison with radiative transfer theory data, considering Na resonance continuum formation

21 p3850 A70-41937

Semiconductor junction diode spontaneous emission sources, considering frequency-energy characteristics relationship

22 p4085 A70-42504

Solar spectral irradiance measurements at different altitudes, using multichannel radiometers

22 p4013 A70-42599

Exploding wire light source modification by immersing in transparent fluid to increase intensity, measuring spectral characteristics

22 p4032 A70-43037

EUV solar spectral intensity distribution and cyclic variations

22 p4106 A70-43299

SPECTRAL LINE WIDTH

Velocity distribution and optical depth of line formation in solar atmosphere using blue and red wing filtergram and numerical experiment

01 p0175 A70-10241

Critique of double resonance theory in gaseous lasers, including correction regarding saturation parameter for small RF perturbations and line width dependence

01 p0109 A70-10432

Carbon dioxide laser with incorporated grating for measuring line strength to width ratio for various rotational lines

01 p0112 A70-10916

Oscillation and doubling of 0.946 micron line in Nd ion doped YAG, calculating optimum nonlinear coupling to internal Q switched laser

01 p0113 A70-11169

Pressure and line width estimate from high resolution image tube spectra of Jupiter at 11,000 Å

02 p0366 A70-11808

Rotational temperatures and methane abundances in Jovian atmosphere calculated for various Lorentz half widths

02 p0366 A70-11809

Two layer model of Jovian clouds including clear space, showing computed and measured equivalent widths of H quadrupole lines

02 p0367 A70-11813

Pioneer 6 radio signal spectrograms during solar occultation, noting solar event effects on bandwidth

02 p0369 A70-12060

Microwave dispersion caused by atmospheric gases at water vapor line, using microwave spectrometer based on dispersion detection in refraction spectrum

02 p0260 A70-12571

Atmospheric oxygen A band individual rotational lines intensities and half widths measurements

02 p0344 A70-12656

Demodulation of signals modulated with respect to wave period, deriving spectral width of pulsed period modulation

03 p0446 A70-13200

Rotational lines in iodine B-X system vibrational bands, calculating Doppler, natural and collisional widths

03 p0527 A70-13298

Spectral line widths in MPD arc jet measured to determine plasma electron density and heavy particle temperature

03 p0536 A70-14371

Classical path methods for treating Stark spectral line broadening in plasmas illustrated by Lyman alpha line of hydrogen calculations

04 p0726 A70-14670

Hydrogen atoms van der Waal dispersion interaction effects on H lines broadening in neutral medium, taking into account resonance interaction

04 p0723 A70-15714

Charged particle concentration emitted by inhomogeneous plasma determinable from emission spectral lines broadening, suggesting error correction procedure

05 p0889 A70-16541

Methane abundance in Jovian atmosphere deduced from line equivalent widths, obtaining line intensity for J manifolds

05 p0919 A70-16940

Self broadened semihalf widths measurement in pure rotational spectrum of carbon monoxide compared with vibration-rotation calculation

05 p0886 A70-17086

Photon number per mode for laser with nonresonant feedback for homogeneous and inhomogeneous atomic line broadening

06 p1081 A70-17746

SiH molecular absorption lines in solar disk spectrum, determining maximum equivalent widths and oscillator strength

06 p1143 A70-17996

Excitation emission of diatomic nitrogen molecule for first negative band broadening, considering high energy primary beam with secondary electrons

06 p1124 A70-18305

Calcium neutral and ionic lines broadening and shift by microfields measured by plasma flame observations

06 p1148 A70-18453

Spectral broadening mechanisms for trivalent Eu ions in glass, considering fluorescence and absorption spectra measurements

06 p1127 A70-18640

Nd glass laser emission spectral width reproducibility as function of flash intervals and pump energy

07 p1297 A70-18869

Hydrogen fluoride fundamental vibration rotation band spectral line shift and broadening due to carbon dioxide

07 p1337 A70-19365

Pressure-narrowing theory applied to calculating equivalent widths of lines in quadrupole rotation-vibration spectrum of molecular hydrogen

07 p1338 A70-19366

Axicon systems for spectroscopy of light emitted by foil-excited accelerator beams, discussing scattering contribution to spectral line widths

07 p1287 A70-20083

Spectral line intensities in hydrogen plasma, calculating relative intensities and Balmer line width for various electron temperatures and optical thicknesses in H alpha line

07 p1389 A70-20205

Resonant and foreign gas broadening using Schrodinger equations for collision problems

07 p1346 A70-20244

Spectral line shapes determination for radiating atoms immersed in plasma developed without neglecting ion-electron interaction and static-ion assumption

07 p1346 A70-20247

Equivalent line widths of anomalously fast stars of early spectral classes and reference stars, discussing binary nature and radial velocities of OB stars

08 p1569 A70-20828

Absorption lines in hazy planetary atmosphere with isotropic scattering, examining phase variations of equivalent width

08 p1571 A70-20910

O and B type stars neutral He lines, studying UV line blanketing effects on predicted departures from LTE

08 p1571 A70-20912

Iron ions EPR lines widening in corundum crystals due to lattice defects, estimating mosaic blocks disorientation parameter and point defects density

08 p1556 A70-21122

Plasma electron density determination by number of extreme resolved line, considering broadening action by Doppler effect for Balmer, Lyman and Paschen series

09 p1734 A70-22731

Stark broadening of singly ionized nitrogen lines measured in dense high temperature plasma behind reflected shock wave in T tube

09 p1731 A70-22776

Singly ionized Mg resonance lines electron impact broadening quantum mechanical calculation

09 p1732 A70-22827

Wave number, intensity and half width of vibrational-rotational lines pertaining to transition of carbon monoxide perturbed by argon

09 p1733 A70-23316

Line profiles and equivalent widths from Si II, Mg II, Ni II and Fe II spectra of shell star zeta Tauri

10 p1936 A70-23941

Equivalent widths for rotational lines to detect interstellar hydrogen gas, discussing absorption line

10 p1937 A70-23947

Pulsars dynamic spectra in 110-420 MHz range, observing emission bandwidths to formulate power law

10 p1938 A70-24099

Neodymium spectral line widths in various glasses, studying role of inhomogeneous broadening

10 p1900 A70-24266

Absorption strengths of j-manifolds in R branch of Jupiter atmosphere methane band, discussing fine structure blending

10 p1919 A70-24473

EPR line width angle and temperature dependences assuming line widening due to electric field of lattice defects, dipole-dipole interactions and spin-lattice relaxation

11 p2097 A70-25382

Optical heterodyning of Doppler shifted signal with minimal instrumental spectral broadening and high SNR, applying to turbulence structure measurement by CW laser

11 p2062 A70-25630

Neutral helium line profiles for line-blanketed model atmospheres grid

11 p2117 A70-26660

Ruby laser with electro-optical Q switching, using polarization element for emission spectrum narrowing to single longitudinal mode

12 p2245 A70-27303

Inhomogeneous interatomic magnetic field effects on spectral line widening and shifts of emitting atoms in low temperature plasma

12 p2278 A70-27318

Spectral line width and shift measured by spectrograph crossed with Fabry-Perot interferometer in pressure chamber, measuring magnetic field in solenoid

12 p2238 A70-28178

Solar iron-to-hydrogen ratio and oscillator strengths for FeI lines compared with laboratory measurements of line broadening by neutral atoms

13 p2486 A70-28628

Cs atomic spectral line broadening under simultaneous electric and magnetic fields, observing Zeeman and Stark splitting

13 p2460 A70-28711

HCN laser 890 GHz line phase locked to multiplied standard frequency with wide bandwidth loop, narrowing line widths

13 p2426 A70-28798

Stark-broadened neutral atomic line widths and shifts, determining electron densities from H beta profiles and pressure-temperature data

13 p2455 A70-29220

Stark broadening of neutral helium line in plasmas for electron densities measurements accuracy, comparing to H beta determined densities

13 p2456 A70-29225

Homogeneous absorption line and peak power widths relationship in high resolution gas laser with internal absorbing cell

13 p2428 A70-29365

Solid state laser transverse modes maximum dependence on resonator geometrical parameters usable for producing stable kinetic emission mode with narrow spectral line

13 p2428 A70-29410

Ca atom-graphite grain model for interstellar absorption at 4430 A, calculating resonant line shift and width as functions of atom-surface distance

14 p2639 A70-30729

Non-LTE and LTE line profiles and equivalent widths for transitions in singlet and triplet systems of neutral He in hot stars, explaining anomaly

14 p2641 A70-30884

Nightglow OI lambda 6300 line width measurements during magnetic storm, discussing temperatures and intensity variations

14 p2579 A70-31250

Stark broadening calculations of H alpha and H gamma hydrogen lineshapes

14 p2620 A70-31303

Ion line Stark broadening, considering electron-ion quadrupole excitation and electron resonant scattering

14 p2620 A70-31376

Opposing mode interaction effect on ring laser unidirectional emission instability, discussing homogeneous and inhomogeneous line broadening

15 p2749 A70-31552

Diagram extracting Lorentzian line widths from Fabry-Perot interferometer profiles

15 p2737 A70-32050

Temperature dependence of laser emission line self broadened half widths in spectral band of carbon dioxide at constant pressure

15 p2752 A70-32056

Cygnus loop nebula H alpha line halfwidths and radial velocities

15 p2802 A70-32482

H alpha and H beta lines electrodynamic broadening with linear Stark effect, calculating relative intensity

15 p2777 A70-32490

Optical quantum amplifier frequency characteristics dependence on broad spectral composition amplified signal intensity and resonator parameters

15 p2754 A70-32862

Digital logic control of chromatographic system for measuring instrumental contributions to band broadening

16 p2855 A70-33120

Book on stellar spectra theory covering line absorption coefficient expressions, radiative transfer, line source function, line broadening, etc

16 p2974 A70-33270

Pressure broadened line widths in electric field induced fundamental hydrogen spectral band, noting linear variation with density

16 p2954 A70-33276

Spectral line formation in Mars and Venus atmospheres, discussing Lorentz and Doppler broadening

16 p2976 A70-33793

He-Ne CW laser emission line width measurement, describing apparatus and technique

17 p3106 A70-35108

Lyman alpha wing resonance broadening opacity effects on solar spectrum in 1500 A to 8000 A range

17 p3169 A70-35383

Fraunhofer line equivalent widths differences between pole and equator spectra of solar disk

17 p3173 A70-35734

Solar C II resonance doublet profiles, discussing possible broadening mechanisms

17 p3174 A70-35862

Upper atmospheric ions kinetic temperatures based on chromatic broadening of mass spectral lines

18 p3252 A70-36985

Na I 5889 A pressure broadening by high temperature neutral He, allowing damping constant direct measurements

18 p3318 A70-37013

Arcturus Co bands, examining equivalent widths, rotational lines and 12C/13C ratio

18 p3318 A70-37015

Solar photosphere temperature constancy in thin CO layer from equivalent spectral line width determination

18 p3322 A70-37134

Near collisions approximation in Stark broadening of hydrogen Lyman alpha line

18 p3296 A70-37227

Energy levels and spectral broadening of neodymium ions in laser glass from fluorescence and absorption spectra

19 p3445 A70-37760

Real time narrow band vibration spectrum analysis techniques, discussing application to failure prediction and flight and wind tunnel tests

19 p3430 A70-38528

Helium II line broadening in high temperature plasma, measuring profile for comparison with theoretical prediction

20 p3677 A70-39115

Wave particle resonances broadening by particles random motion in turbulent electric field, determining cyclotron instabilities saturation level from vanishing nonlinear growth rate

20 p3679 A70-39661

Pulsed ruby free emission mode laser spectrum narrowing, using diffraction lattice adjusted in resonator transversely to beam axis

20 p3643 A70-39757

Temperature difference between equator and solar poles from spectral line equivalent width variation

20 p3711 A70-40407

Coupling constant and binary collision expansions for ion motion in plasma line broadening

21 p3855 A70-40722

Inhomogeneous interatomic magnetic field effects on spectral line widening and shifts of emitting atoms in low temperature plasma

21 p3860 A70-42059

Radiative transfer equations quantum theoretical deduction in spectral line regime, considering Planck law, Einstein coefficients and kinetic equations

22 p4072 A70-42339

T tauri star mass loss, observing variations in spectral emission line widths

22 p4101 A70-42858

Silicon line collisional broadening by electrons and hydrogen atoms, discussing Stark effect and van der Waal interactions

22 p4076 A70-42861

Be stars hydrogen emission lines widths measurement

22 p4101 A70-42867

H alpha and H beta lines electrodynamic broadening with linear Stark effect, calculating relative intensity

23 p4221 A70-43912

CA II chromospheric emission lines for deriving Mn in stellar luminosity, discussing calibration

23 p4242 A70-44293

Stellar abundance determination, considering rapid uniform rotation effects on equivalent spectral line widths

23 p4250 A70-44811

Early type Ia and Iab supergiant stars macroturbulence and rotation, investigating spectral line broadening, mass loss and angular momentum

23 p4250 A70-44813

Spectral line width distributions in main sequence stars, emphasizing B2 to A2 range rotational velocities with Maxwellian distribution

23 p4251 A70-44821

UV Cet type flare star rotational velocity upper limits from H alpha emission line width in chromospheres

23 p4251 A70-44824

Deutsch period vs line width relation for periodic Ap stars, determining rotational velocities with rigid rotator model

23 p4251 A70-44825

Nd laser single picosecond pulse energy, duration and frequency width

24 p4354 A70-45664

ESR intensities and line widths at X and Q bands of Cr and Fe molecular ions in water/glycerol mixtures

24 p4310 A70-46045

SPECTRAL LINES

U LINE SPECTRA

SPECTRAL NOISE

U WHITE NOISE

SPECTRAL RECONNAISSANCE

Wheat fields recognition, mapping and acreage measurement by multispectral scanning with real time analog data processing, considering seasonal and observation altitude effects

12 p2219 A70-26930

Spectral discrimination technique for crops remote sensing, comparing statistical irradiance model with airborne multispectral scanner data

12 p2219 A70-26931

Engineering soils mapping by multispectral techniques, describing image interpretation by visual means, densitometric measurements and automatic spectral response classification

12 p2220 A70-26932

Collapse prone land detected by multispectral scanning and photography with analog data processing

12 p2220 A70-26933

Hydrobiological features mapping in Everglades by multispectral scanning and analog data processing

12 p2220 A70-26934

Multispectral color aerial photography, describing instrumentation, oceanographic and agricultural applications, atmospheric effects on images, etc

12 p2220 A70-26937

UV flash spectra of total solar eclipse of 7 March 1970 obtained by Aerobee 150 rocket

12 p2304 A70-27717

Terrain spectral imagery from satellites for natural resources investigations

12 p2235 A70-27745

SPECTRAL REFLECTANCE

Venusian atmosphere low reflectivity reinterpretation based on spectrophotometric data indicating constituents of yellow and upper UV haze layers

02 p0377 A70-12555

Mars multicolor filter photometry showing variation in whole-disk reflectivity

02 p0378 A70-12560

GaAs n-type single crystals thermorefectance spectra at various energies

03 p0541 A70-13721

Mars surface reddish color due to carbon suboxide suggested based on spectral reflectivity measurements and matching in laboratory

04 p0743 A70-14423

Relative reflectivity of lunar landing site Apollo 7 compared to site Apollo 2, showing compositional and mineralogical differences

04 p0751 A70-15059

Ablation chars, carbon and graphite spectral emittance and reflectance as function of wavelength and temperature, noting applications to atmospheric entry heat shielding

04 p0787 A70-15590

Reflectance spectra obtained for igneous rocks and minerals, establishing correlation between reflectance and energy wavelength, composition and sample particle size

05 p0839 A70-16390

Near IR reflectance spectrometer integrated into environmental chamber to study frost spectral properties

06 p1072 A70-18522

Spectral reflectance of carbon dioxide and water frosts at 0.8-3.2 microns, growing frosts in cold vacuum chamber from high purity gases

07 p1388 A70-19945

Martian polar cap spectra interpreted with laboratory measurements of water-carbon dioxide frost spectral reflectance

07 p1388 A70-19946

Jupiter and Saturn IR reflection spectra observed with Michelson interferometer-spectrometer, eliminating effects of terrestrial atmospheric absorption, solar spectral lines, etc

08 p1570 A70-20895

Microphotometric spectral reflectivity correlation to static Young moduli of carbon and graphite yarn filaments as optical testing method

08 p1497 A70-21350

Fluorel spectral reflectance, transmittance and absorbance under monochromatic irradiation, considering thermal analysis and surface finish

09 p1710 A70-22794

Gallium arsenide phosphide epitaxial films electroluminescence spectra noting composition effect

10 p1928 A70-24833

Plant leaves discrimination by multispectral reflectance indicated in transmittance measurements via remote sensing from aircraft and spacecraft

12 p2218 A70-26920

Absorption bands in reflection spectra of various asteroids, comparing Vesta composition to meteorites and Apollo 11 samples

16 p2972 A70-32987

Model relating spectral reflectance to thermal control materials properties and environment induced changes

16 p2940 A70-33934

Rough surface radiative properties, determining electromagnetic wave scattering by Maxwell equation solution

17 p1315 A70-34508

Ecological potentials in spectral signature analysis, using laboratory leaf and soil spectral reflectance data

17 p3078 A70-35612

False color aerial photography with IR film for distinguishing vegetation types and assessing plant vigor based on leaf reflectance

17 p3078 A70-35613

Mars UV reflectivity, examining spectrum, absorption features, planet albedo and ozone content by rocket-borne instruments and atmospheric models

18 p3317 A70-37011

Mercury photometric measurement, examining surface brightness for photometric function

18 p3319 A70-37052

Lunar surface spectral reflectivity measured with ground based telescopes for remote mineralogical analysis

20 p3709 A70-39977

Directional, spectral and total reflectance for Apollo 11 fines and rock chips, observing dependence on illumination angle

21 p3913 A70-41643

Apollo 11 rocks spectral reflectance and albedo before/after proton irradiation and vitrification, investigating color differences for lunar surface dark and bright areas

21 p3913 A70-41645

Spectral bidirectional reflectance measurements of rough metallic surfaces for reflected energy spatial distribution determination in radiative heat transfer problems

23 p4281 A70-44446

Highly alloyed indium arsenide reflection spectra and band structural characteristics

24 p4389 A70-45482

SPECTRAL RESOLUTION

Spectrometer scanning, 20-15 microns in 3 sec, measuring absorption and emission spectra of hot samples alternately, discussing resolutions at various bands

01 p0091 A70-10914

Jovian surface elements spectral and color contrasts from spectrograms obtained between 3200- 4900 A wavelengths

02 p0375 A70-12429

Spectrophotometric facility for measuring spectral characteristics of color filters, photomultipliers and photographic plates as function of temperature

02 p0301 A70-12494

Image intensifiers to improve telescope system sensitivity and spectral resolution in radiometric measurements of reentry vehicles

03 p0489 A70-13654

Low resolution spectra of IR stars NML Tau, CIT 3, 6 and 13 considered inadequate for molecular band identification

04 p0748 A70-14591

Spectrally and spatially resolved measurements on arc heated Ar plasma radiation for eliminating discrepancies in transition probabilities

06 p1122 A70-18187

High resolution mass spectrography using AgBr photographic plates as ion detectors for organic chemical problems

07 p1224 A70-18894

Time variations in human spectral response, considering sequential gain and phase estimates formation by Gabor elementary signals theory

10 p1823 A70-23895

Grate spectrometer with high resolution for 20-45 micron range, describing water vapor transmission spectrum

10 p1886 A70-23912

Precise sweep calibrations and simultaneous spectrum recording for high resolution nuclear magnetic resonance spectroscopy

11 p2052 A70-26375

Monochromators dispersion and resolution increased by multiple passage of light through singly dispersive element, comparing optical schemes

12 p2237 A70-28160

Dynamic spectra of type 3 solar bursts from OGO-3 antenna/radiometer observations

17 p3150 A70-34835

Photographic materials for holography, discussing spectral sensitivity, grain size, resolution, transfer functions, diffraction efficiency, etc

17 p3084 A70-35003

Error analysis of Corcos hypothesis concerning cross spectra of pseudoacoustic LF turbulent pressure pulsations on flat plate

18 p3241 A70-36305

Ruby and Nd glass solid state lasers modes partial self synchronization investigated by spectral time resolution method

22 p4051 A70-43463

Reflection echelon and Fabry-Perot interferometer with surface imperfections, comparing spectral resolution limit with Rayleigh limit

22 p4040 A70-43612

SPECTRAL SIGNATURES

ERTS multispectral scanner with optimal sensitivity and resolution for agricultural scenes signature analysis

12 p2229 A70-26941

Spectral signature recognition for automatic interpretation of earth resources multispectral data

22 p4037 A70-43088

SPECTRAL THEORY

Pressure-narrowing theory applied to calculating equivalent widths of lines in quadrupole rotation-vibration spectrum of molecular hydrogen

07 p1338 A70-19366

Cosmic X ray source spectra possibly due to plasma bremsstrahlung

07 p1368 A70-19700

Comet model atmospheres for head theoretical spectra computation, considering collisional effects through total gas density distribution

11 p2116 A70-26647

Plasma turbulence spectral theory, considering cascade processes in collisional and collisionless dissipation

11 p2095 A70-26756

Radar spectrum control based on two pulse shaping techniques using klystron transmitter

12 p2188 A70-27941

Turbulent shear flow energy spectrum theory for unstratified fluid with arbitrary eddies-mean velocity gradient interaction

12 p2214 A70-28364

Linear distributed system with periodic parameters spectral characteristics based on multidimensional Fourier transforms with drift

13 p2383 A70-29718

Spectral transmittance coefficients at Naugazan astronomical station, using Bouguer method

15 p2809 A70-32909

Stellar UV spectral line profiles interpretation, using atmospheric models and line formation theory

17 p3161 A70-34890

Acoustic turbulence spectrum in compressible fluid with potential motion, using complex traveling wave amplitudes in hydrodynamic equations

18 p3242 A70-36637

SPECTROGRAMS

Atlas of near IR spectra of Venus, Mars, Jupiter and Saturn obtained by Fourier spectroscopy, discussing observational procedures, data recording and processing

01 p0173 A70-10078

Jovian surface elements spectral and color contrasts from spectrograms obtained between 3200- 4900 A wavelengths

02 p0375 A70-12429

SPECTROGRAPHS

U SPECTROMETERS

SPECTROHELIOGRAPHS

Simultaneous filtergrams of velocity and intensity field of central solar disk obtained in blue and red wings of Fraunhofer line

01 p0175 A70-10242

Chromospheric slitless spectrograms at 1962 eclipse, discussing Balmer-Paschen line intensities, continuum data, reduction and source error

01 p0175 A70-10244

Chromospheric structural parameters determined from XUV spectroheliograms, discussing He 2 emission, O 4 and O 5 emission distribution, etc

01 p0175 A70-10246

Rocket-borne spectroheliograph for taking X ray and monochromatic pictures of sun in Mg II line

03 p0570 A70-13594

Multichannel magnetograph display for pattern recognition of solar feature morphology compared with spectroheliograms

06 p1142 A70-17993

Radioheliograph observations at 80 MHz of directive shock wave propagation in solar corona

06 p1144 A70-18007

Solar magnetic field spectroheliographic mapping, discussing detection levels, resolution, applications, etc

06 p1148 A70-18454

Brightness distribution of spectroheliograms taken in metal lines reflecting velocity field structure in photosphere

08 p1570 A70-20839

Atomic frequency standards for phase calibration of large aerial arrays applied to radioheliograph

11 p2019 A70-26300

Statistical heliographic latitude dependence of dominant polarity of interplanetary magnetic field, using photospheric synoptic chart

13 p2492 A70-29195

Solar X-rays measurements with spectroheliograph conducted on rocket flights

14 p2589 A70-31339

SHF radioheliograph with T shaped dish antenna array, noting high resolution and special applications

17 p3061 A70-35397

Solar radio bursts recording by spectrographs in 500-1500 MHz band, discussing sensitivity

18 p3307 A70-36109

Laser aided frequency and amplitude analysis of vacuum test chamber vibration during alignment of orbiting UV spectroheliograph

19 p3396 A70-37877

Spectroscopic differential photosphere and chromosphere rotation with height in solar envelope
23 p2452 A70-44831

SPECTROHELIOSCOPES
U SPECTROHELIOGRAPHS
SPECTROMETERS
NT FABRY-PEROT SPECTROMETERS
NT INFRARED SPECTROMETERS
NT MASS SPECTROMETERS
NT NEUTRON SPECTROMETERS
NT SOLAR SPECTROMETERS
NT SPECTROHELIOGRAPHS
NT TIME OF FLIGHT SPECTROMETERS
NT ULTRAVIOLET SPECTROMETERS
Holographic spectroscopy design and development, discussing components and recording yellow Na doublet
01 p0087 A70-10659
Spectrometer scanning .20-15 microns in 3 sec, measuring absorption and emission spectra of hot samples alternately, discussing resolutions at various bands
01 p0091 A70-10914
X ray spectrometer for space science and laboratory research, presenting CrK spectrum and fine structure
01 p0092 A70-11172
X band electron paramagnetic resonance spectrometer with ruby maser preamplifier, correcting misinterpretation and noise figure analysis
01 p0114 A70-11196
Nutational NMR nonuniform magnetic field stabilizer for beta spectrometer, structural details and circuit schematic
03 p0485 A70-13467
Electron spectrometer for nitrogen energy loss spectrum in 12-14 eV region, detailing relative intensities of transition bands
03 p0528 A70-13577
Multichannel spectrometer electronic circuitry for ionization colorimeter providing data on low energy particle interactions, emphasizing reliability and accuracy
05 p0846 A70-15948
Scintillation spectrometer design for mass and energy spectra of elementary particles, discussing block diagram
05 p0846 A70-15962
On-line system transmitting experimental data from optical spectrometer to central computing facility for magnetic tape recording
05 p0818 A70-16846
Binary cyclic coding schemes for multiplex spectrometry in terms of linear least mean square unbiased estimate
06 p1013 A70-17217
Pulsed grid modulation for ion cyclotron resonance spectrometer
07 p1286 A70-19974
Anamorphic optics to focus luminous wakes of hypervelocity projectiles onto focal plane of slitless spectrograph in free flight ballistic range launching
07 p1287 A70-20082
Rapid scanning high resolution photoelectric spectrometer for sunspot spectra study
07 p1289 A70-20291
Sea level testing of magnetic spectrograph and calorimeter apparatus for studying cosmic ray spectra at different atmospheric depths
08 p1560 A70-20474
Emission flame spectrometer based on double diffraction monochromator, describing design features and operating characteristics
08 p1493 A70-20545
Longitudinal nuclear-electromagnetic cascade in ionization spectrometer simulated by Monte Carlo method, noting energy relationship to particle sum recording
08 p1500 A70-21743
Low energy ion spectrum and spatial distribution measurements in auroral zones by Cosmos-261 satellite spectrometer
08 p1492 A70-21798
Cosmos-261 satellite-borne scintillation electron proton spectrometers and lead shielded Geiger counter, measuring electron and proton energy spectra, pitch distributions, etc
08 p1501 A70-21799
LEPR spectrometer with sample cavity as part of HCN laser for experiments with gases, noting improved sensitivity
09 p1698 A70-22991
Kerr cell-shuttered high speed stigmatic spectrograph for shock tube electron density distribution measurement
09 p1682 A70-23503
Spectroscopic instruments for atmospheric temperature measurements classified in terms of filtering, modulating and multiplexing systems
10 p1873 A70-23828
Satellite-borne spectrometer for low energy electrons measurement, describing virgin photoelectrons equilibrium energy spectrum for different latitudes and pitch angles
10 p1874 A70-24313

Satellite-borne spectrometer for low energy ion measurement
10 p1874 A70-24314
Satellite-borne scintillation spectrometers for medium and high energy electron and proton measurements
10 p1931 A70-24315
Rocket-borne spectrometer for measuring 1-13 keV electron fluxes in auroral zone, describing design, operation and calibration
10 p1889 A70-24493
High sensitivity particle spectrometer for onboard OV-1-18 satellite measurements of precipitating protons, electrons and alpha particles during PCA events
12 p2232 A70-27402
Particle spectrometer for Apollo measurements of trapped protons and electrons, using directional telescope composed of solid state and scintillation counters
12 p2232 A70-27404
Digital closed-loop inflight calibration system for spaceborne particle spectrometers, utilizing cesium iodide crystal and programmable photomultiplier dynode supply
12 p2232 A70-27405
Spectral line width and shift measured by spectrograph crossed with Fabry-Perot interferometer in pressure chamber, measuring magnetic field in sodium
12 p2238 A70-28178
Spectrometer model for short wave radiation in atmosphere, measuring sky brightness, polarization and total solar flux
14 p2583 A70-30413
Spectropolarimeter for measurements of polarization characteristics of atmospheric radiation in nanometer range
14 p2583 A70-30414
Carrier distillation DC arc emission spectrography, determining lead, bismuth and tin traces in nickel base alloys after conversion to oxides
14 p2546 A70-30957
NaI scintillation spectrometer response function matrices semiautomatic generation, using standard source spectra to obtain normalized Compton continua
14 p2587 A70-31006
Automatic audio frequency spectrometer for ELF and VLF amplitude spectrum of atmospherics, discussing attenuation band near 3 kHz
15 p2725 A70-31856
IR reflectometer system using Fourier transform spectrometer and ellipsoidal mirror, describing design, construction and performance
16 p2905 A70-33171
Low energy electron impact spectrometry, discussing apparatus, procedures, electronic excitation of gas molecules, etc
16 p2857 A70-33797
Digital spectrophotometer with automatic continuous wavelength selection, sample feed, measurement and printout
16 p2914 A70-34098
Aircraft engine failures advanced detection by spectrometric lubricating oil analysis
17 p3061 A70-35481
Image intensifier apparatus photographing nuclear electromagnetic cascades in ionization spectrometer
18 p3261 A70-37091
Inlet optics modification in Raman laser spectrometer, discussing high pressure gas storage and support plate enlargement
19 p3443 A70-37361
Spectrosensitometer for standardizing meteor spectrograms
19 p3514 A70-37643
X rays measurement by spectrometer on satellite Cosmos 207
19 p3506 A70-38122
Photoelectron spectra of methane, silane, germane, methyl fluoride, difluoromethane and trifluoromethane, describing electron spectrometer with double focusing electrostatic plates
19 p3374 A70-38269
Correlation spectrometry for earth resources, considering sulfur dioxide, nitrogen oxide and iodine pollution
20 p3626 A70-39055
Primary cosmic rays spectrographic measurement, using hard muon component intensity variations data
20 p3629 A70-39320
Event-triggered high speed spectrograph shutter, studying shock tube plasmas
20 p3630 A70-39484
Air polluting sulfur dioxide and nitrogen dioxide remote sensing based on radiation molecular absorption using long line correlation spectrometer
20 p3633 A70-39793
Ionization spectrometer for hadron energy measurement, analyzing instrument accuracy by Monte Carlo model for nuclear-EM cascade in iron absorber
20 p3635 A70-40456

Dispersive spectrometer multiplexing light in entrance and exit slit positions compared with Michelson interferometric spectrometers
21 p3823 A70-40848
Interplanetary medium energetic electrons and isotopes measurement, discussing spectrometer electronics of IMP H and J
21 p3825 A70-41000
Photoelectron production and escape flux at midlatitudes, using spectrometric measurements from ISIS-1 satellite
21 p3818 A70-41102
Microwave frequency marginal oscillator for electron spin resonance spectrometer, using Gunn diode in sample cavity
21 p3827 A70-41460
Wide frequency range dielectric spectrometer for insulating materials permittivity and loss factor measurement and display
21 p3830 A70-41950
Three dimensional hologram diffractive efficiency measurement by spectrographic attachment
22 p4026 A70-42508
High dispersion stellar spectroscopy with echelle grating, discussing instrument design, operation and performance
22 p4040 A70-43613
Superheterodyne EPR spectrometer microwave bridge using single X band klystron
23 p4170 A70-43798
Soft X ray slitless spectrometer with gold-shadowed transmission gratings for rapid astronomical spectral surveys
23 p4196 A70-44418
Soft particle spectrometer in Isis-1 satellite using electrostatic deflection for differential energy spectra measurements for electrons and protons
23 p4197 A70-44468
Varian HA-100 spectrometer eliminating phase change by compensation network in synchronous audio detector reference signals
23 p4199 A70-44949

SPECTROMETRY
U SPECTROMETERS
SPECTROPHOTOGRAPHY
Photographic films for astronomy and spectroscopy, discussing resolving power, light sensitivity, antihalo lacquer and emulsions
10 p1892 A70-25129
Chilled emulsion photography for astronomy and spectrography, reducing long exposures with chilled plates
14 p2585 A70-30649
SFR high speed photochronograph for visible and UV raster, stereoscopic and spectral photography
24 p4335 A70-45652

SPECTROPHOTOMETERS
NT INFRARED SPECTROPHOTOMETERS
NT ULTRAVIOLET SPECTROPHOTOMETERS
Monk-Gilleson convergent beam dispersion method applied to rocket-borne photoelectric spectrophotometer for far UV stellar spectra observation
01 p0090 A70-10904
Remote sensors for measurement and mapping of ocean color variations, discussing Widerange Image Spectrophotometer and Water Color Spectrometer
06 p1073 A70-18592
Multichannel IR spectrophotometer to obtain albedo curves of Martian surface
12 p2229 A70-26927
Manual spectrograph for distant objects spectrophotometry under natural conditions and solar illumination
14 p2583 A70-30415
Concentric polarization Fabry-Perot duochromator for spectral line displacement measurements applied to ion drifts in hollow cathode plasma
15 p2737 A70-32042
Atmosphere spectral transparency and stability spectrophotometric studies based on measuring solar aureole brightness
16 p2899 A70-34183
Balloon-borne spectrophotometer with diffraction grating for upper atmospheric solar radiation attenuation measurement
19 p3422 A70-37639
Pulse counting and encoding system on rocket-borne spectrophotometer for starlight collected by primary telescope mirror
22 p4038 A70-43174
Phosphor-output image intensifier response to single photon inputs in multichannel spectrophotometer for faint optical sources
23 p4195 A70-44291

SPECTROPHOTOMETRY
NT STELLAR SPECTROPHOTOMETRY
Spectrophotometric facility for measuring spectral characteristics of color filters, photomultipliers and photographic plates as function of temperature
02 p0301 A70-12494
Venusian atmosphere low reflectivity reinterpretation based on spectrophotometric data indicating constituents of yellow and upper UV haze layers
02 p0377 A70-12555

Satellite multispectral photometry data in airglow bands correlated with cloud characteristics and surface albedo variations

04 p0715 A70-15522

Spectral, angular and spatial evolution of earth twilight aureole brightness pattern from visual observation and spectrophotometry on Soyuz 5 spacecraft

10 p1873 A70-24270

Heterochromatic spectrophotometry, discussing maxima and integral techniques for line measurement, photoemulsion properties and Eberhard effect

14 p2585 A70-30784

Aerospectrometric camera facilitating spectral brightness coefficients determination for object identification

16 p2908 A70-33227

Supergiant alpha Car UV spectrophotometry from Gemini 11, comparing with model atmosphere

17 p3161 A70-34888

Upper atmospheric gas components vertical distribution by airborne photometric absorption and attenuation measurements in UV spectrum

18 p3248 A70-36633

Optical density of valence and conduction states by UV photoelectric spectroscopy, outlining experimental techniques and inelastic scattering effects

19 p3471 A70-37711

Evening twilight airglow oxygen IR band ground based observation by two-channel photometric technique

19 p3415 A70-38385

Ikeya-Seki /1967n/, Thomas /1968b/ and Honda /1968c/ comet photoelectric spectrum, examining swan bands, continuum and reflected scattered light

20 p3703 A70-39024

Plate illumination relation to opacity in photometry and spectrophotometry, using digital techniques

20 p3630 A70-39475

High temperature combined differential thermal analysis and spectrophotometric cell for phase transformation monitoring of evaporated thin film and bulk phthalocyanine

21 p3827 A70-41459

Spectrophotometry of earth surface from manned Soyuz spacecraft, obtaining transfer function of atmosphere by aircraft flights

23 p4191 A70-44636

SPECTORADIOMETERS

Optical telescope spectrograph to obtain radiometric and spectrographic data on vehicles reentering atmosphere, discussing performance criteria and tests

03 p0489 A70-13653

Extraterrestrial solar spectral irradiance at earth mean solar distance within 300 to 2500 nm wavelength region, from NASA CV-990 aircraft research flights

04 p0690 A70-15019

Spectral radiometer for observing excited hydrogen radio frequency lines using paramagnetic traveling wave quantum amplifier

08 p1495 A70-21052

Radiometers sensitivity increaseable by combining quasi-zero method with compensation circuits

08 p1495 A70-21053

Spectroradiometer with paramagnetic traveling wave quantum amplifier applied to radio telescope, studying noise, temperature and fluctuation sensitivity at given time constant

08 p1495 A70-21054

Zero radiospectrometer for spectral observations of radio emission of excited galactic hydrogen at centimeter wavelength, noting Omega nebula detection

08 p1495 A70-21063

Parametric amplifier for spectral radiometer of U.S.S.R. astronomical telescope, showing improved sensitivity observations of neutral H emission

08 p1473 A70-21066

Modulation lanes in fine structure of dynamic spectra of Jovian L bursts possibly due to ionosphere or magnetosphere

08 p1576 A70-21394

Solar U-burst radiospectrographic observations, investigating disturbing trajectories and longitudinal distribution in combination with model coronal condensation

09 p1758 A70-22737

Airborne monochromator and photoelectric filter radiometer for solar spectral irradiance measurements, estimating instrument errors

09 p1683 A70-23515

Color TV tubes white field balancing by spectroradiometer, colorimeter and colorgram meter

12 p2195 A70-23732

Remote sensing of plankton and matter in sea by determining spectral changes in scattered light measured with radiometer

17 p3079 A70-35619

SPECTROSCOPES

U SPECTROMETERS

SPECTROSCOPIC ANALYSIS

Spectroscopically active compounds observability in Jupiter atmosphere using solar composition adiabatic equilibrium model

01 p0180 A70-10530

Spectroscopic quantitative diagnostics of high density plasma sources encountered in aerospace applications and chemistry

06 p1063 A70-17729

Axicon systems for spectroscopy of light emitted by foil-excited accelerator beams, discussing scattering contribution to spectral line widths

07 p1287 A70-20083

Consumable protective coat /silasene/ application to reentry models to eliminate metallic pollution in hotshot wind tunnels for spectroscopic analysis

10 p1825 A70-24548

Wall stabilized arc source for spectroscopic measurements of isothermal plasma at various pressures

14 p2584 A70-30505

Book on interpretation of spectra and atmospheric structure of cool stars covering line identification, dissociative equilibrium, opacity, chemical composition, carbon stars, etc

16 p2978 A70-33962

Time varying flow properties effects on hypersonic wind tunnel spectroscopic measurements, considering direct emission and electron beam techniques

20 p3607 A70-40271

Mossbauer effect spectrometry application to Apollo 11 lunar rocks composition, using nuclear gamma resonance measurements for nuclide Fe 57

21 p3916 A70-41662

Venus spectrum from high resolution Michelson interferometers with Fourier transform and digital computation, discussing Venus atmospheric models

22 p4099 A70-42721

Shock wave propagation studies by grating spectrograph with high speed camera, computing equilibrium detonation gases temperature from emitted light [SMPTE PREPRINT 98]

22 p4035 A70-43057

Ion cyclotron resonance spectroscopy for detecting trapped gaseous ions in analyzer cell, observing ion-molecule reactions

23 p4196 A70-44390

Spectroscopic features of mercury laser associated with electron energy levels and spontaneous emission line structure, giving excitation and disruption mechanisms

23 p4202 A70-45054

SPECTROSCOPIC TELESCOPES

Rocket telescope spectrometer precision pointing achieved by servocontrolling secondary mirror, discussing use for planetary atmospheres far UV spectrum studies

02 p0296 A70-11916

Optical telescope spectrograph to obtain radiometric and spectrographic data on vehicles reentering atmosphere, discussing performance criteria and tests

03 p0489 A70-13653

Image intensifiers to improve telescope system sensitivity and spectral resolution in radiometric measurements of reentry vehicles

03 p0489 A70-13654

Optical systems for coude focus spectroscopic telescopes, discussing advantages over Newtonian and Cassegrain foci

04 p0685 A70-14522

Speckle patterns Fourier transform analysis for diffraction limited resolution attainment in large telescopes

14 p2589 A70-31382

Astronomical Fourier spectroscopy, discussing techniques, improvements, advantages and mode of use

20 p3706 A70-39933

OAO 2 for UV telescope sky mapping and spectrophotometric measurements of celestial bodies

23 p4261 A70-44666

Laser optoelectronic and spectroscopic methods using fixed gap spherical mirror confocal Fabry-Perot interferometer and multiple beam image tube framing camera

01 p0112 A70-10901

Far IR airborne spectroscopy for measuring solar brightness temperature, emphasizing scanning Michelson interferometer and radiometric calibration

09 p1683 A70-23525

Spectroscopy applied to spontaneous combination scattering of light

10 p1892 A70-25026

Heavy particle spectroscopy, deducing collision parameters from empirical observations

13 p2456 A70-29810

Efficiency of holographic gratings in instrumental spectroscopy

19 p3421 A70-37360

Integrating cavity spectroscopy for measuring absorption coefficient of material

21 p3822 A70-40817

Multichannel monitor for repetitive short scan Auger electron spectroscopy for surface composition changes, using low energy electron diffraction

21 p3827 A70-41467

Carbon monoxide-nitrogen laser luminescent phenomena by electronic spectroscopy

21 p3837 A70-41717

Ultrasonic spectroscopy in nondestructive materials tests, discussing electronic equipment design, FM, pulse and pulsed FM methods

22 p4027 A70-42583

Image orthicon detection and recording system adapted for spectroscopic measurements in shock tube emission studies

23 p4197 A70-44469

SPECTRUM ANALYSIS

Slitless spectrograms of chromosphere obtained during 1962 eclipse to determine H level populations decrements, self absorption in Balmer lines and chromosphere model

01 p0175 A70-10245

Pulse width and spectrum generated by ring laser mode locked by synchronously modulated absorber as function of modulator waveform curvature and active medium

01 p0109 A70-10430

Interferometer for compressing linearly FM light pulses and analyzing spectra of picosecond pulses

01 p0111 A70-10670

Galactic water vapor line emission observations indicating short term variability in spectra of several sources

01 p0182 A70-10722

Electromagnetic procedures and camera-spectrometer system for studying detonation processes, measuring mass flow rates and explosives spectra

01 p0090 A70-10887

Spectrometer scanning .20-15 microns in 3 sec, measuring absorption and emission spectra of hot samples alternately, discussing resolutions at various bands

01 p0091 A70-10914

CW laser ranging systems power and signal to power ratio characteristics, finding possible advantages over pulsed systems

01 p0114 A70-11321

Real configuration effect of magnetic field in moderately perturbed magnetosphere on whistlers dynamic spectra, stressing geomagnetic perturbation detection

01 p0082 A70-11486

Pressure and line width estimate from high resolution image tube spectra of Jupiter at 11,000 A

02 p0366 A70-11808

Ammonia spectral lines positions, intensities and half widths under Jovian conditions calculated, including ground state rotation and rotation inversion bands

02 p0368 A70-11820

Collision-narrowed growth curves for interpreting hydrogen quadrupole lines applied to photoelectric observations of Jupiter vibration-rotation bands

02 p0368 A70-11824

Stellar spectral lines fine analysis methods compared for curves of growth, line profiles and related contribution curves in model atmospheres for Procyon and sun

02 p0343 A70-11906

Molecular rotations and kinetics from spectral features of molecular Raman spectra, using light scattering spectroscopy

02 p0343 A70-12077

VLF observations of auroral beams for auroral V-emissions source and characteristics, explaining spectral shape

02 p0291 A70-12204

Cape Kennedy vertical wind speed profiles measured by spectral analysis using fast Fourier transform method

02 p0325 A70-12285

Correlation characteristics and dimensionality of speech spectra from statistical properties derived from continuous speech and summarized by covariance-matrix eigenvectors

02 p0237 A70-12324

IR spectrum of Jupiter with calibrations from laboratory studies of methane and ammonia bands

02 p0378 A70-12559

Satellite lines of forbidden transition in laser-produced He plasma attributed to longitudinal plasma oscillations

02 p0379 A70-12717

Optical transmission spectra of polypeptide films showing exciton structure near 1600 A for alpha and polyproline II helices

02 p0345 A70-12723

Scattering functions from sky light spectra measurements on high mountain for various sun altitudes, obtaining color value functions

02 p0359 A70-12776

Ionized matter complex at galactic periphery deduced from neutral hydrogen line and continuous spectrum observations

03 p0564 A70-13222

Spectral polarization characteristics phase variations used for classifying lunar surface features

03 p0565 A70-13234

Late stars spectral characteristics, verifying criteria for spectral classification and anomalous spectra determination

03 p0569 A70-13424

Electromagnetic field spectrum and spatial distribution in ring laser, considering transverse modes influence

03 p0500 A70-13462

Spectrum parameters analysis of signal in form of radio pulses sequence with harmonic angular modulation

03 p0448 A70-13511

Sampled signal and associated sequence with identical Fourier transforms, noting applications to digital spectral analysis onboard spacecraft

03 p0449 A70-13538

Airborne multispectral sensing based on modified AN/AAS-5/XE-2/ scanners mounted in C47 aircraft, discussing applications

03 p0491 A70-13669

Periodic clustering of red shift values in quasi-stellar and unusual objects spectra, using power spectra

03 p0577 A70-14217

Analog techniques for pulse integration based on sonograph audio spectrum analyzer for pulsar observation by radio telescopes near Hobart, Tasmania

04 p0655 A70-14520

Slitless system using interference filter, fixed Fabry-Perot etalon and automatically controlled etalon for recording spectral information for efficient light detection

04 p0685 A70-14523

Decaying isotropic turbulence spectrum evolution model, verifying numerical integration of differential equations

04 p0673 A70-15249

Shear-dependent nearly isotropic turbulence energy spectrum theory, considering effects of viscous loss, shear production and inertial and velocity gradient transfer

04 p0674 A70-15520

Line transfer with scattering described by redistribution function numerically solved, using discrete ordinate method

04 p0720 A70-15701

Surface wave spectrum and propagation in non-homogeneous bounded elastic solid, considering existence and eigenvalues approximation

05 p0925 A70-15789

Spectral and lasing characteristics of microwave frequency modulated He-Ne laser operating at 0.63 micron wavelength

05 p0858 A70-16257

Reflectance spectra obtained for igneous rocks and minerals, establishing correlation between reflectance and energy wavelength, composition and sample particle size

05 p0839 A70-16390

High resolution Venus spectra, obtaining band spectra growth curve of C13O16O18 isotope of carbon dioxide, comparing data reduction methods

05 p0910 A70-16392

Periodicities in solar activity variation from correlation spectral analysis, establishing monotonically decreasing component and secular variations in activity

05 p0918 A70-16913

C V lines measured near 1s-2p line of C VI, identifying lines belonging to various transitions

05 p0921 A70-16982

Cosmic ray electron spectrum above 200 Gev based on pure nuclear emulsion stack using horizontal sandwich assembly

06 p1135 A70-17473

Discrete spectrum of fourth order differential operator estimating number of eigenvalues in bounded interval of real line

06 p1094 A70-17740

Spectral transparency inversion of aerosol-containing atmosphere

06 p1098 A70-17832

Granular and intergranular region solar magnetic field difference detection attempt from line profiles, noting equivalent width increase in ionized Cr line

06 p1142 A70-17989

Solar Cd abundance, using spectrograph and synthetic spectral line computer program

06 p1143 A70-17995

Optical spectra of discharge chambers of electron bombardment mercury ion thrusters with hollow and oxide cathodes

06 p1132 A70-18157

[ALAA PAPER 70-176]

Spectral characteristics of B and S components of solar radio emission from statistical data, investigating dependence on 11-yr cycle and minimum solar activity

07 p1378 A70-19031

Absorption lines in quasars spectra indicating line formation close to quasar nucleus

07 p1383 A70-19402

Spectral functions of airflow velocity pulsations in circular pipe at various Reynolds numbers, considering laminar, transition and turbulent regimes

07 p1259 A70-19826

Holographic system to obtain time-bandwidth product improvement in spectral analysis without sacrificing multichannel processing capability

07 p1288 A70-20098

Optical hardness effect on dispersed particles spectrum determination accuracy by spectral transmittance

07 p1330 A70-20309

Solid state lasers with strongly degenerated modes investigated for induced radiation spectral composition inertial properties

08 p1510 A70-20507

Soviet book on celestial bodies radiation transfer and spectra covering light scattering, radiation fields, absorption, etc

08 p1568 A70-20768

Free radical formation in irradiated pyrimidines from ESR spectrum analysis of gamma irradiated single crystals of alloxantin, confirming radical stability

08 p1455 A70-20774

Binary star spectrum analysis establishing seasonal and season-to-season variations in He II emission band intensity and shift toward long wave region

08 p1569 A70-20827

Equivalent line widths of anomalously fast stars of early spectral classes and reference stars, discussing binary nature and radial velocities of OB stars

08 p1569 A70-20828

Celestial emission bodies forbidden line analysis for physical conditions determination using formulas and graphs

08 p1569 A70-20831

Jupiter atmospheric properties on basis of spectrograms analysis

08 p1569 A70-20833

Venus clouds absorption spectra correlation with carbon suboxide first reflection spectra, suggesting absence of carbon suboxide in atmosphere

08 p1571 A70-20911

Von Zeipel 1128 O star spectrum analysis, discussing mass, He/H ratio, metal abundances, etc

08 p1571 A70-20913

Spectral radiometer for observing excited hydrogen radio frequency lines using paramagnetic traveling wave quantum amplifier

08 p1495 A70-21052

Nitrogen dioxide presence in solar atmosphere from balloon-borne spectrometer observations, presenting graph of sunset solar spectrum

08 p1575 A70-21262

Ionized matter complex at galactic periphery deduced from neutral hydrogen line and continuous spectrum observations

08 p1580 A70-21655

Spectral polarization characteristics phase variations used for classifying lunar surface features

08 p1580 A70-21667

IR absorption spectral curve interpretation using computer program for iterative solution

09 p1726 A70-22138

Solar chromosphere-corona transition region properties, discussing temperature increase within very thin layer and inferring temperature-density structure from emission line intensities

09 p1752 A70-22246

Backscattered sun and skylight spectra from sea obtained from low flying aircraft as measure of chlorophyll concentration

09 p1666 A70-22250

Spectra of meteorological variables - Conference, Stockholm, June 1969

09 p1713 A70-22351

Turbulence and internal waves in stably stratified atmosphere and ocean, proposing velocity and temperature spectral behavior model

09 p1716 A70-22370

Dynamics dominant on different scales in atmosphere by spectral analysis, showing marked gap under most synoptic conditions

09 p1717 A70-22376

Pulsed microwave spectrum analyzer using holography and Fourier spectroscopy compared with frequency methods

09 p1675 A70-22485

Europium isotope ratio in solar atmosphere equal to terrestrial using spectral line profiles analysis

09 p1757 A70-22727

Automatic spectral data reduction and analysis system consisting of densitometer, analog-digital converter and IBM 1800 process computer with magnetic disk memory

09 p1629 A70-22765

Critical review of paper on molecular oxygen microwave spectrum analysis

09 p1732 A70-22829

Scanning spherical mirror interferometer for carbon dioxide lasers radiation spectrum analysis, discussing instrument errors in mode and wavenumber studies

09 p1683 A70-23519

Fourier spectrum of chopped bivariate normal intensity distribution with coefficients calculated numerically by computer, verifying by chopped laser beam signal analysis

09 p1729 A70-23520

Galactic sources H109 alpha line and continuum surveys, showing thermal continuum spectrum for sources with radio recombination lines

10 p1936 A70-23903

Exploding tungsten wires in air and vacuum, describing visible and X-ray spectrum characteristics

10 p1915 A70-23994

Spectrum analysis of unsteady duct flow caused by pressure loss induced instability

10 p1863 A70-24026

Mariner 6 spectra establishing Fox-Duffendack-Barker bands and ionized carbon dioxide UV doublet bands as important components of Martian dayglow

10 p1938 A70-24073

Intensity vs voltage curves for LEED beams from clean Ni surface, calculating Bragg spectrum with energy diagram method

10 p1927 A70-24077

Excited gas kinetic state determination from observed spectral profiles during interaction with radiation

10 p1919 A70-24147

Oscillator strengths relative values determined from flame atom absorption line sensitivity measurements

10 p1828 A70-24259

Spatial frequency spectra of three dimensional phase object and three dimensional hologram, discussing interaction characteristic for monochromatic illumination

10 p1888 A70-24263

Plasma magnetic field measurement by scattered light, analyzing electron spectrum modulation with gyration frequency

10 p1916 A70-24401

Ultrasonic pulse frequency spectrum analyzer, describing electronic components, transducer type and positioning, beam collimation, applications in testing, etc

10 p1895 A70-24830

Resonance, intercombination and forbidden lines observed in solar He isoelectronic sequence of oxygen, Ne, Al, Si and sulfur with Bragg crystal spectrometer

10 p1944 A70-24954

H II region properties from non-LTE analysis of alpha, beta, gamma, delta and epsilon radio recombination line data, determining electron temperature and concentrations

10 p1945 A70-24959

Quasar spectra searched for intergalactic absorption lines, discussing red shift

10 p1947 A70-24998

Radio wave reflection spectra from plane surfaces, determining physical properties and composition

10 p1843 A70-25154

Sulfur beam foil spectrum in 600-4000 A range, identifying transitions in S I-S VI

11 p1994 A70-25362

Raman and IR spectrum analysis of polywater indicating impurities role in anomalous properties

11 p1994 A70-25655

Solar moustaches /transient emissions/ far wing asymmetry studied photometrically

11 p2109 A70-25745

Turbulent ionized wakes Doppler radar scattering spectrum parameters in terms of wake characteristics using double convolution integral

11 p2010 A70-26271

Excess color method for photometric and spectral studies of interstellar absorption in cluster NGC 6913

11 p2116 A70-26585

Excess color method for studying interstellar absorption around cluster NGC 6823

11 p2116 A70-26586

Spectral classification of stars from unbroadened spectra recordings possible when comparing optical depths of lines

11 p2116 A70-26589

Satellite signal scintillation spectrum analysis by digital filtering of magnetic tape recording

11 p2012 A70-26718

Spectroscopic diagnostics of erosion plasma jets from cylindrical pulsed plasma generator operating in vacuum

11 p2093 A70-26745

Turbulent flowing plasma, analyzing wavenumber frequency dependent spectral function and space-time correlation function

11 p2096 A70-26768

Cosmos 137 proton spectra data obtained in inner radiation belt agreeing with Relay 1 data

11 p2106 A70-26786

Single mode TW ruby laser with ring resonator, analyzing emission spectral characteristics by Fabry-Perot etalon 12 p2246 A70-27356

Alias-free randomly timed sampling of stochastic processes, considering spectrum recovery by linear operation 12 p2204 A70-27419

Primary cosmic ray proton and alpha particle spectral measurements by balloon flights 12 p2293 A70-27586

Molecular line identification in sunspot spectrum of CN, diatomic carbon, TiO, MgH, CaH, NiH and water vapor 12 p2302 A70-27590

Computer programs for calculating spectral lines oscillator strength in Coulomb approximation, proposing Fortran program 12 p2192 A70-27595

Coronal condensation spectra during 4 February 1962 total eclipse, determining abundances, ionization equilibria, electron densities, etc, from Fe and Ca XV lines analysis 12 p2303 A70-27712

Emission asymmetry of solar limb flares, inferring luminescent layer contraction-expansion from spectral qualitative analysis 12 p2294 A70-27859

Merope /IC 349/ nebula, noting luminescence and continuous spectrum fine structure 12 p2307 A70-27867

Integral color indices relation to spectral type on NGC 3077 and M82 galaxies 12 p2308 A70-27871

Primordial radiation spectrum, discussing possible distortions due to energy injection before and after recombination 12 p2308 A70-27886

Absolute sky brightness temperatures measured with horn antennas and Dicke receivers, indicating spectrum change due to galactic nonthermal radiation 12 p2309 A70-27893

Pipeline fast Fourier transform signal processor for digital spectrum analysis of wideband radars 12 p2186 A70-27904

Microwave signals covariance and spectra calculation for amplitude and phase fluctuations propagated over line-of-sight path through turbulent atmosphere 12 p2189 A70-27963

Closed product form and simplified algorithm for efficient operation of generalized Kronecker matrices, considering role in spectral analysis 12 p2193 A70-28029

Mathematical models for radar transmitters emission spectra envelopes calculation, considering effects of pulse width, rise and fall times, corner smoothing and frequency modulation 12 p2189 A70-28136

Maximum mode selection tuning of scanning interferometer with spherical mirrors applied to He-Ne laser spectrum analysis 12 p2250 A70-28182

Output signal spectrum analysis for nonlinear active element in presence of distorted modulating voltage 12 p2191 A70-28342

Anisotropic two phase plates gas laser resonator spectrum, analyzing zero or 90 degree angles between plates 13 p2424 A70-28594

Three mirror resonator He-Ne laser output spectra, studying frequencies and intensities of generated modes 13 p2424 A70-28595

Spectral analysis of LF pulses from defects obtained by modulation method of monitoring using eddy currents with superposed converter 12 p2404 A70-28660

Star eta Arietis spectra analyzed for Fe and V abundance 13 p2487 A70-28715

Laser field structure effect on spectrum of Q switched laser nonmonochromatic emission after amplitude modulation 13 p2426 A70-28872

Nonoriented cadmium silicon arsenide single crystals optical properties, determining spectral distribution of IR absorptivity for various photon energies 13 p2470 A70-28883

Strontium chloride lanthanum ion system with dynamic Jahn-Teller effect, indicating isotropic EPM spectrum resulting from averaging by relaxation 13 p2470 A70-29109

Fast time-resolved spectra of earth bow shock electrostatic turbulence based on broadband analog electric data fromOGO-5 13 p2396 A70-29111

Kinetic changes in spectral lines and bands intensity of individual molecular gases and mixtures for carbon dioxide lasers 13 p2428 A70-29361

Pulsed Ne laser superradiation spectrum fine structure, using Fabry-Perot interferometer 13 p2428 A70-29362

Lunar crater Aristarchus red spot spectrum analysis, determining emission bands 13 p2494 A70-29398

Oscillators frequency instability and spectral purity relations [ONERA-TP-829] 13 p2383 A70-29637

Two body system with Newtonian force interaction, calculating gravitational wave energy losses and spectral decomposition 13 p2453 A70-29668

Real time signal processor for correlation and spectrum analysis, displaying results on cathode ray oscilloscope 13 p2370 A70-29817

Solar differential rotation measurement by spectral line shift data analysis, noting angular velocity-heliographic latitude relationship 13 p2496 A70-29840

Solar observations in intermediate IR, measuring continuum intensity of disk center in atmospheric water vapor window 13 p2498 A70-30006

Fog droplet size growth time dependence and spectral variations during simulated cloud formation by water vapor condensation in chamber 14 p2601 A70-30128

Model for droplet size spectrum in cloud with spatial inhomogeneity of nuclei concentration, determining characteristic size dependence on altitude 14 p2601 A70-30129

Entire functions for analysis and representation of distant atmospherics, using concentrated spectrum and zero coordinate readings 14 p2569 A70-30210

Bright IR stars observed using photometry and spectroscopy, suggesting protostars presence 14 p2641 A70-30880

Venus carbon dioxide absorption bands determining atmospheric scattering model suitability for all data 14 p2642 A70-30889

Water vapor abundance in Mars atmosphere from high resolution spectroscopy 14 p2649 A70-31211

Galactic abundances and cosmic ray spectra by IMP-4 satellite, obtaining He ratio 15 p2793 A70-31794

Continuous differential energy pulse height spectra reduction to photon upper atmospheric spectra 15 p2694 A70-31800

Generalized spectral analysis method implementing orthogonal transformations through Kronecker product representation and matrix factorization 15 p2767 A70-32099

Rocket engine propellants flame temperature measurement by spectral line intensity comparison method 15 p2786 A70-32270

Turbulence spectrum functions time variations, examining electron density fluctuations in ionized gas 16 p2894 A70-33886

Equipment shock test model, using impedance method for spectrum analysis 16 p2992 A70-33988

Venus upper atmosphere carbon atoms detection based on low resolution spectra analysis of solar illuminated atmosphere 16 p2979 A70-34036

Automatic spectrophotometer for measuring sky spectrum brightness at 6910-4040 A, determining point of minimum brightness 16 p2899 A70-34182

Atmosphere spectral transparency and stability spectrophotometric studies based on measuring solar aureole brightness 16 p2899 A70-34183

X ray spectrum analysis for Crab, Cas A and SN 1572 supernova remnants 17 p3156 A70-34830

Mercury disk temperature from microwave spectrum analysis, proposing subsurface greenhouse effect 17 p3157 A70-34838

Hypersonic velocity and turbulence measurements in wind tunnels, using spectral analysis of Doppler shifted laser light 17 p3103 A70-34849

Discrete Fourier transform method for factoring spectral density functions, calculating absolute error 17 p3129 A70-34855

Early-type star spectral scan analysis from OAO observation, comparing model atmosphere calculations 17 p3161 A70-34887

Solar atmosphere structure and chemical composition by UV spectrum analysis 17 p3161 A70-34892

Nonhydrogen spectral lines in interstellar gas, discussing Ca/Na abundance anomaly 17 p3162 A70-34900

Real time swept sine wave spectrum analyzer using time compression to change filter bandwidth as function of control signal 17 p3059 A70-35166

Sine wave discrete components detection from complex spectrum with random noise, evaluating errors 17 p3059 A70-35168

Automatic shock spectrum synthesizer/analyzer for shock testing of field environments 17 p3059 A70-35175

Ecological potentials in spectral signature analysis, using laboratory leaf and soil spectral reflectance data 17 p3078 A70-35612

Fine structure of hydromagnetic ULF emissions on spectrograms of whistlers, periodic emissions, choruses and sweepers 17 p3047 A70-35640

Crab Nebula X ray flux pulsations, analyzing spectra 17 p3152 A70-35756

Water vapor pure rotational absorption spectrum compared with calculated far and near IR spectra 18 p3244 A70-35949

Solar image spectrum magnetic recording for computer, using photomultipliers with coding devices 18 p3256 A70-36107

Energy distribution of laser spark spectrum in air, He and Ar, determining transmission coefficients of spark plasmas by self absorption method 18 p3265 A70-36151

Quasar 4C 05.34 absolute spectral energy distribution by multichannel photoelectric spectrometry 18 p3318 A70-37019

P Cygni line profiles emission and absorption components rectification procedure, considering errors 18 p3321 A70-37123

Relativistic electron spectra of cosmic rays accelerated by plasma turbulence, examining singularity in solution 18 p3322 A70-37127

Integrated Milky Way spectrum, examining composition and galactic structure in solar neighborhood 18 p3329 A70-37182

Atmospheric turbulence vertical component spectral density observation by aircraft in steady flight, considering transfer function computation methods 19 p3351 A70-37646

RMS spectrum analysis system for wideband acoustic data processing, using analog method with digital output 19 p3397 A70-37910

Spectra and cross-spectra estimation by fast Fourier transform algorithm 19 p3384 A70-38040

Ballistocardiogram autocorrelation function and spectrum by scanning graph decoder and computer, determining total power, harmonics periodicity and energy concentration 19 p3370 A70-38211

Real time narrow band vibration spectrum analysis techniques, discussing application to failure prediction and flight and wind tunnel tests 19 p3430 A70-38528

Solar radio emission intensity distribution across disk during eclipse, constructing relative RF spectrum of uncovered region 19 p3522 A70-38556

Power spectrum analysis of division errors of graduated circles associated with meridian astronomy 19 p3523 A70-38686

Spectrum analysis of P Cygni star AG Carinae and derivation of mean radial velocities for different epochs 19 p3523 A70-38694

Spectral energy distribution of meteor trail in Leonid meteor shower from photographic analysis 19 p3526 A70-38779

Cardiac contraction rhythm autocorrelation and spectral analysis in healthy subjects and patients with disturbed sinus node functional states 20 p3578 A70-38963

Quasars PHL 5200 and RS 23 spectra absorption lines, examining resonance line transfer of radiation through differentially expanding atmosphere 20 p3701 A70-39006

Laser beam method sensitivity for spectral emission analysis of nonconducting materials 20 p3642 A70-39743

Amplitude-phase data from gathering receiving antenna array, obtaining Doppler frequency spectrum as arrival angle function 20 p3599 A70-40319

Diatomic Cs 7667 A band vibrational spectrum analysis 20 p3676 A70-40349

Solar photospheric spectrum Ni II forbidden lines analysis, determining abundance of Ni for comparison with coronal and meteoritic data 20 p3711 A70-40405

Human body radioactive nuclides in vivo quantitative analysis by gamma ray spectra, considering matrix method accuracy 20 p3582 A70-40449

Current driven ion wave plasma turbulence in collisionless shock, measuring frequency and wave number spectra by shock front light scattering 20 p3685 A70-40497

Cosmic hard X ray sources spectra and time variations by balloons and OSO-3 satellite observations of Crab Nebula 21 p3872 A70-40657

Hyades giant stars epsilon and gamma Tau strong line profile analysis, obtaining effective temperatures 21 p3885 A70-40931

Apollo 11 lunar samples spectral analysis, discussing Fe and Mn electron paramagnetic resonance and Al 27 nuclear magnetic resonance spectra 21 p3919 A70-41683

Solid para hydrogen IR and Raman spectra frequency analysis, examining lattice vibration effects 21 p3853 A70-41721

Autoionization spectral lines growth curves analysis, applying to 3s-4p transition in Ar at 466 A with specified absorption cross section 21 p3781 A70-41931

Acoustoelectric domain spectra in n-GaAs by microwave emission, comparing results with parametric conversions theory 21 p3863 A70-42002

Accurate tuning methods for laser mode locking device, using diffracted light measurement and photodiode with LF spectrum analyzer 21 p3838 A70-42047

Cadmium sulfide pulsed laser spectrum analysis, discussing laser output stabilization by mode selection and electron beam scanning 22 p4049 A70-42405

Ultrasonic transducer diffraction fields in highly anisotropic crystals obtained by plane waves angular spectrum 22 p4029 A70-42643

Worldwide geomagnetic fluctuations during disturbed conditions computed from spectrum analysis, considering long period oscillation caused by solar wind structure changes 22 p4019 A70-43114

Pc-1 and IPPD pulsations propagation characteristics from ground based measurements, discussing spectral structure, waveforms, polarization, time delay between different observation stations, etc 22 p4021 A70-43277

Laser light pulse interaction with solid targets, observing second harmonic generation in induced plasma from time resolved spectra 22 p4084 A70-43673

F region night airglow in equatorial and midlatitudes, discussing red and blue emission origins 23 p4185 A70-43839

Global geomagnetic field fluctuations of internal and external origins, analyzing HF spectrum based on monthly mean plots 23 p4187 A70-43861

Cosmic ray 11-year variation pattern change in 19th and 20th solar activity cycles determined by latitude expeditions spectrum analysis 23 p4237 A70-44071

Wind generated water waves spectral characteristics at low momentum levels 23 p4215 A70-44273

Solar X ray spectra interpretation by laboratory measurements, using plasma X ray source and potassium acid phthalate spectrometer 23 p4237 A70-44419

Auger spectra characteristics obtained with X rays and electrons from radioactive alpha sources 23 p4222 A70-44421

Mars topography from Mariner 6 and 7 IR spectra, discussing geographical resolution, surface carbon dioxide pressure, depressions, ridges and valleys 24 p4399 A70-45128

Sunspot penumbra velocity field spatial structure by filament spectrum analysis, plotting radial velocities relative to undisturbed photosphere 24 p4400 A70-45310

Multiply ionized Fe valence and inner shell transitions from spectrum analysis, noting similarities to solar flares 24 p4401 A70-45315

Entire functions for analysis and representation of distant atmospheres, using concentrated spectrum and zero coordinate readings 24 p4330 A70-46285

SPECULAR REFLECTION

Speckle pattern in image plane of laser illuminated diffuse object, calculating pattern intensity and contrast 02 p0312 A70-12106

Specular reflections influence on bistatic tropospheric radio scatter from turbulent perturbations in refractivity 02 p0326 A70-12289

Monte Carlo simulation for shock wave formation by specularly reflecting piston, discussing reflection from specularly reflecting wall 06 p1049 A70-18334

Hologram interference fringes formation and location using grating model of diffusely reflecting surface 07 p1280 A70-19144

Specular reflectivity measurement method for optical thin film coating in 10.6 micron IR region using carbon dioxide laser source 07 p1302 A70-20084

Passive radiant cooler design involving patch cone radiative coupling calculation based on specular image technique 07 p1425 A70-20091

Argon ion laser output powers dependence on discharge tube design and mirror reflection coefficient in emission line 08 p1511 A70-20541

Monochromatic plane electromagnetic wave incident from vacuum on plane boundary of plasma half space, discussing specular reflection and diffuse scattering boundary conditions 08 p1553 A70-21611

Laser radiation diffuse reflection from rough surfaces, considering surface specularity and reflected waves polarization and spatial structure 09 p1696 A70-22630

Aluminized epoxy integrating hemiellipsoidal reflector, discussing fabrication, focusing properties and selection of detector size 09 p1683 A70-23530

Radiant heat transfer predictions between isothermal plates based on diffuse plus specular directional property model [AIAA PAPER 69-624] 11 p2149 A70-26157

Transition radiation in plasma sheet in vacuum assuming specular reflection of electrons at vacuum boundary 13 p2464 A70-29512

Speckle patterns Fourier transform analysis for diffraction limited resolution attainment in large telescopes 14 p2589 A70-31382

Diffuse specular rough surface measure for imperfect reflections in thermal radiation transfer through slot passages 16 p2999 A70-33905

Super and sub specular maxima in angular distribution of polarized radiation reflected from roughened dielectric surfaces 16 p2999 A70-33906

Diffuse-specular models for radiant heat interchange prediction for isothermal-adiabatic surface enclosure tested for steel and gold 16 p3003 A70-34197

Spectral and temporal characteristics of ruby laser operating with dielectric coated mirror scatterer 17 p3108 A70-35673

Thick plane fog layers reflection and transmission properties, using emerging light angular distribution for Milne problem 18 p3284 A70-35944

Integrating sphere theory with wall mounted specular sample in reflectance and transmittance measurements 18 p3284 A70-36776

Monochromatic radiant flux angular distribution reflected from water and carbon dioxide cryodeposits, discussing incidence, deposit thickness and wavelengths [ASME PAPER 70-HT-34] 22 p4122 A70-42433

Turbomolecular pumps efficiency calculation by Maxwell transport equation, assuming gas molecules perfect specular reflection from blade surface 22 p4009 A70-42607

Cotton leaves ammonia induced discoloration spectrophotometric examination, discussing light reflectance, transmittance and absorbance 22 p4014 A70-42771

Light beam direction variation by crystal deflectors, examining changing internal reflection angle by applied electric field or mechanical stress 23 p4196 A70-44411

Narrow capillary supermolecular flow density relation to vapor molecule specular reflection, considering Knudsen flow conditions 24 p4381 A70-45491

SPEECH

NT ARTICULATION

NT WORDS [LANGUAGE]

Correlation characteristics and dimensionality of speech spectra from statistical properties derived from continuous speech and summarized by covariance-matrix eigenvectors 02 p0237 A70-12324

Soviet monograph on secondary signaling system role in development of speech, thought, conditioned and unconditioned reflexes, human will and hypnosis, noting salivary gland function 19 p3359 A70-37407

SPEECH DISCRIMINATION

U SPEECH RECOGNITION

SPEECH RECOGNITION

Speech intelligibility tested using Modified Rhyme Test and air traffic control and civil disaster vocabularies, noting Articulation Index for signal-noise conditions 02 p0246 A70-12150

Automatic formant-frequency extraction using vowel-type spectrum, inverse filtering, moment calculation and evaluation by synthesized speech 06 p1009 A70-17909

Analysis method permitting English speech sound recognition by computer for different speakers 08 p1460 A70-20815

Algorithms based on continuous-group pattern recognition, distinguishing human faces, speech and handwritten characters 09 p1640 A70-22143

Commercial aircraft peak cockpit noise level during cruise and high speed descent, discussing damage risk criteria and interpolator speech interference 11 p1991 A70-26275

Transmission delay and echo effects in long distance satellite relay telephony links, describing echo suppression and speech quality 12 p2183 A70-27004

Pilot helmets, discussing sound attenuation, noise protection and speech intelligibility 12 p2177 A70-27040

Real time sonic information input/output computer system for acoustic signals and speech synthesis, concerning man machine communication 14 p2553 A70-30425

Speech signals reflection in nervous system, constructing functional perception model for signals conversion into phonetic patterns 15 p2687 A70-32870

Automatic speech recognition using spatial filtering and Fourier transforms 16 p2869 A70-33462

Automatic speech recognition and tracking techniques of moving objects, considering applicability to processing data from earth resources satellites 16 p2871 A70-34313

Loudspeaker optimal arrangement for speech intelligibility in aircraft crew compartments, discussing apparent SNR improvement 17 p3039 A70-35564

Attention direction role in auditory recognition, testing unwanted inputs attenuation hypothesis 19 p3362 A70-38317

SPEED

U VELOCITY

SPEED BRAKES

U BRAKES [FOR ARRESTING MOTION]

SPEED CONTROL

Brushless DC motors speed regulation with electronic commutators, discussing photoelectric, magnetic sensing and magnetic coil commutation 02 p0229 A70-12616

Thrust control unit in Lufthansa Boeing 707 aircraft designed to maintain landing approach speed by adjusting throttle setting and landing flap position 05 p0845 A70-15903

Pre-set Mach number control in supersonic wind tunnel, evaluating effects of nozzle installation, stagnation temperature drop and pressure errors 06 p1028 A70-17912

Closed loop automatic speed control system for working shaft of two stage alternating current electric servomotor, using invariance principle 20 p3564 A70-39849

SPEED INDICATORS

NT ANEMOMETERS

NT HOT-WIRE ANEMOMETERS

NT SONIC ANEMOMETERS

NT TACHOMETERS

Laser Doppler velocimeter optics, noting minimal heterodyne alignment needs and stress and vibration stability 10 p1889 A70-24556

Carbon dioxide CW laser-Doppler velocimeter for detecting aircraft wing tip trailing vortices by measuring atmospheric aerosols backscatter 12 p2249 A70-27630

Air-damped capacitance accelerometers and velocimeters in data acquisition systems using signal processing 13 p2405 A70-28813

Air velocities measurement with heated thermistors probe, discussing calibration and reliability dependence on flow velocity range 13 p2405 A70-28841

Graphical plotting of critical Preston tube diameter, allowing for Mach and Reynolds numbers effects and introducing limiting line 14 p2586 A70-30871

SPEED REGULATION

U SPEED CONTROL

SPEED REGULATORS

Helicopter gas turbine governor systems for engine and rotor speed control, minimizing pilot activity [ASME PAPER 70-GT-37] 18 p3214 A70-36835

Hydraulic synchronizers for motors and actuators speed equalization, describing operation and technical specifications 21 p3756 A70-40800

SPEEDOMETERS

U SPEED INDICATORS

SERMATOGENESIS

Pre-sage flight tests effects on Macaca nemestrina monkeys spermatogenesis, considering immobilization and exposure time effects 06 p0991 A70-17287

SPHERES

NT CELESTIAL SPHERE

NT POINCARE SPHERES

NT ROTATING SPHERES

Solid glass sphere reinforced nylon resins properties, processing and applications, noting tensile and impact strength and heat distortion

01 p0128 A70-10772

Time dependence of contact zone radius of rigid sphere pressed against viscoelastic half space by normal force

02 p0384 A70-11738

Geodesic motion of massless particles inside static sphere of small volume, analyzing relativistic effect of energy accumulation and release

02 p0339 A70-12117

Spherical conducting body effect on induction coil impedance and EMF in nondestructive testing using eddy current probes

02 p0300 A70-12478

Geometrical optics method for obtaining radar cross section of perfectly conducting sphere with inhomogeneous dielectric coating

02 p0262 A70-12599

Radiative energy transfer from single small sphere to quiescent nonconducting gas with constant volumetric absorption coefficient, using method of matched asymptotic expansions

02 p0400 A70-12861

Two spheres moving in ideal incompressible fluid, studying velocity field, hydrodynamic forces, kinetic energy, etc

03 p0465 A70-13335

Equilibrium temperature and heat transfer of sphere in supersonic flow of rarefied air

03 p0409 A70-13874

Magnetic boundary layer equations applied to flow past stationary circular cylinder and sphere, showing graphical variation of slip velocity with angle

03 p0471 A70-14334

Mass and radius relations for zero temperature spheres of chemical elements, using equation of state and numerical integration

04 p0749 A70-14599

Ideal fluid flow past sphere in rectangular duct and slot solved in series form in spherical functions

04 p0666 A70-14605

Viscous ideal gas supersonic flow past spheres, using integral relations based on Navier-Stokes equations

04 p0613 A70-14606

Electron heat transfer to spherical body in nonequilibrium quiescent plasma by asymptotic solution

[ASME PAPER 69-WA/HT-56] 04 p0727 A70-14793

Configuration factors independence on Lambert law in radiation from spheres and infinitely long cylinders

[ASME PAPER 69-HT-J] 04 p0784 A70-14870

Aligned electric current effect on drag of sphere with arbitrary conductivity moving in current carrying fluid

04 p0671 A70-14993

Temperature distribution around radiating sphere in homogeneous gas medium with molecular heat transfer, solving energy transport equation

04 p0785 A70-15012

Ideal fluid motion characteristics near variable volume spheres with radial mass transfer through surfaces

04 p0672 A70-15198

Penetration depth calculation of high speed nondeformable sphere into massive body, approximating force on sphere by ideal incompressible fluid cavitating flow

04 p0776 A70-15269

Motion generated by spherical body moving along axis of uniformly rotating fluid, measuring particle velocities ahead of and behind body

05 p0789 A70-16013

Hydrodynamic fields of revolution around sphere in unbounded fluid governed by Oseen equation, emphasizing streamlines and attached vortex

05 p0832 A70-16157

Stress distribution in restrained hyperelastic sphere based on elastomer reinforcement theory by carbon black

05 p0940 A70-16510

Forward angle microwave scattering by plasma covered magnetized metallic sphere, calculating radial electron density distribution

06 p1008 A70-17576

Homogeneous gravitating sphere deformation by internal dislocations determined using Green dyad

06 p1055 A70-17605

Sphere drag measurements in low density hypersonic transition and near free molecular flow

06 p1124 A70-18373

Dynamic simulation parameters for sphere drag coefficient data correlation in near free molecular flow

06 p0983 A70-18374

Free molecular heat transfer from sphere at rest in rarefied monatomic gas solved for Krook model of Boltzmann equation

06 p1183 A70-18375

Sphere drag in near free supersonic molecular flow

06 p0983 A70-18377

First collision Monte Carlo method for calculating aerodynamic drag on hard sphere and Maxwell molecular models in near-free molecular flow

06 p0983 A70-18379

Drag and heat transfer predicted by kinetic theory for rarefied gas flow over sphere at low Mach numbers, analyzing flow field

06 p0984 A70-18381

Hypersonic rarefied gas flow near stagnation point investigated to predict drag on sphere in high speed gas stream with densities in transition regime

06 p0984 A70-18382

Sphere and sharp slender cone drag coefficients in hypersonic transitional flow measured by flow modulation technique

06 p0984 A70-18389

Rarefied gas flow past sphere, using integral iteration method for Krook equation

07 p1187 A70-18675

Quasi-steady radially symmetric theory of liquid drop vaporization and homogeneous combustion extended to burning of solid carbon spheres gasified by chemical attack

07 p1419 A70-18915

Gaseous spheres gravitational stability in proper field, considering convection and radial perturbations effects

07 p1383 A70-19408

Unsteady heat conduction in plate, solid or hollow infinite cylinder and sphere with internal heat source and radiative heat transfer on surface

07 p1423 A70-19818

Temperature stress distribution in cylinder or sphere with variable surface temperature and heated by external sources

07 p1411 A70-19819

Viscous hypersonic flow past sphere in presence of strong injection through front surface at large Reynolds numbers using asymptotic method

07 p1189 A70-20146

Gravitating particles systems equilibrium states, solving kinetic equations for sphere and cylinder in isotropic and anisotropic cases

07 p1389 A70-20207

Particle flux densities in electric field near spherical body moving in rarefied plasma

07 p1355 A70-20368

Density profiles of sphere wake in rarefied hypersonic flow compared to free molecular flow calculations

08 p1431 A70-20591

Quadrature solution for elastic sphere deformation by axisymmetric normal loads, writing Green function of boundary value problem in finite form

08 p1585 A70-20956

Potential distribution outside ideally reflecting charged sphere immersed in resting plasma described by nonlinear integral equation, allowing for polarization

08 p1432 A70-21090

Flow characteristics behind sphere suspended in vertical axisymmetric jet dependent on ratio of specific parameter

09 p1658 A70-22118

Electromagnetic wave diffraction by sphere and spheroid at resonance frequencies with incident wavelength comparable to bodies dimensions

09 p1632 A70-22402

Refractive index chart for scattered electromagnetic fields from sphere, evaluating modal coefficient for lossy materials

09 p1633 A70-22697

Stokes flow around sphere moving along axis of cylinder with near-unity diameters relationship

09 p1661 A70-22839

Drag coefficients for spheres and sharp cones in rarefied hypersonic air flow obtained in shock tunnel using free flight technique

[AIAA PAPER 69-140] 09 p1605 A70-23221

Three dimensional flow field codes for spheres: cones at nonzero angles of attack, comparing numerical and experimental results

09 p1606 A70-23254

Sphere motion in laminar flow, postulating absolute velocity as resultant of entrainment and fall velocities and stable position in tube with ascending flow

09 p1663 A70-23309

Static gravitation field of spherical mass immersed in cosmological gas, using combined model of Einstein and de Sitter static universes and Schwarzschild solutions

09 p1763 A70-23312

Solid radiating sphere cooling in space, determining transient temperature distribution by finite difference computing techniques

09 p1790 A70-23562

Flow field around and drag on sphere rising axially through rotating viscous fluid

09 p1663 A70-23676

Shear flow of inviscid incompressible fluid past sphere, calculating secondary vorticity and upstream velocity distribution

09 p1664 A70-23680

Combustible gas /hydrogen-air/ subsonic and transonic flow past sphere, approximating combustion zone structure by model

10 p1801 A70-24142

Nusselt numbers of nonstationary and stationary heat transfer between metal spheres and liquid flow, showing bulk heat and geometry dependence

12 p2330 A70-27288

Gravitational collapse of slightly spherical body with axial symmetry characteristics, taking linear approximation of equation for additions to metric in empty space

12 p2310 A70-28223

Sphere supersonic motion in combustible gas mixture of given temperature and pressure, discussing constant density two front detonation wave model

12 p2334 A70-28242

Hard sphere model for reactive molecular collisions based on energy and momentum of reactants and products

13 p2361 A70-28497

Thermal stresses in solid nonhomogeneous sphere in high periodic temperature field, assuming temperature dependent Young modulus and linear thermal expansion coefficient

13 p2512 A70-28979

Radiative heat transfer through gray gas in equilibrium between concentric spheres, using variational method

13 p2521 A70-29137

Double sphere dipole antenna detecting VLF electrostatic plasma waves, discussing induced and contact potentials

13 p2372 A70-29927

Electric current direction effect on wake of copper sphere moving in electrolyte

13 p2391 A70-29968

Thermoelastic stresses in sphere with cylindrical cut under axisymmetric temperature field and constant surface temperature

14 p2655 A70-30135
